

ine States ow Paying ar Bonus o Veterans

Interest to Naval Medical Center personnel was the announcement last week of the States and Territories paying a bonus to veterans, the States in which legislation on State is pending, and the States which have not enacted a bonus legislation.

As of January 1, 1948, nine States and two Territories authorized and paying or have paid a maximum bonus to veterans, or to the next of kin of deceased servicemen of World War II as follows:

Connecticut: \$300.00 to veterans; \$100.00 to next of kin. Apply to the Treasurer, Veterans Bureau, Division, State Armory, Hartford, before June 1, 1949.

Illinois: \$10.00 a month for domestic service and \$15.00 per month for foreign service between September 1, 1940 and September 2, 1945. Exceptions: The next of kin of deceased Illinois servicemen.

ny Dentists Talk Newark, Montreal

Throughout the country during the past few weeks several members of the U. S. Naval Dental School have delivered lectures and addressed on dental techniques used by the Dental Corps throughout the world.

Commander Frank E. Frates was the principal speaker at the Essex County Dental Society meeting at Newark, New Jersey. Commanders C. Wolfarth and George W. Ferguson addressed the Annual Fall Meeting of the Montreal Dental Club.

Commander Frates' lecture on "Amalgam Technique" was highlighted by a demonstration of extensive silver restorations which were in place by Doctor Frates more than 10 years ago. The patient was a resident of Newark who received the dental care while in the

Montreal Dental Club were treated with demonstrations on the use of acrylic resins in crown and bridge procedures based on the work taught at the U. S. Naval Dental School by Doctor Wolfarth. Commander Ferguson presented a clinic on silicate cement restorations based on the work of the dental materials group at the Naval Bureau of Standards.

NEWS' New Look Wins Enthusiastic Support of Admiral Willcutts

Fresh out of drydock after major alterations, the N. N. M. C. "News" unfurls a new name plate and stretches to full size with pride in its new look.

Admiral Willcutts has expressed keen interest in the new venture and promises enthusiastic support to the editor and staff of our bigger and better station paper.

The "News" is a station paper representing equally all the commands that are combined to make the National Naval Medical Center, which include the Naval Hospital, the Medical School, the Dental School, the Naval School of Hospital Administration, and the Naval Medical Research Institute.

Station papers and publications are classed in the category of morale boosters. The "News" is proud to accept that duty. Such publications are intended to afford diversion, information and light reading to service personnel. The "News" is confident that it can fill the bill. Station papers also are intended to reflect the spirit and principle that

govern the daily tenor of the station. The "News" by its format and content will continue to reflect the dignity, the traditions and devotion to duty that is exemplified by the Center as an integral whole.

Publications have a policy. The "News" has one—a booster to the personnel—a fair and impartial reporting of the news and events that personalize and breathe life into dog tags, making Joe Doakes a real personality, not a mere number.

The creed of the "News" is the American way of life and the proud recording of achievements of the Medical forces of the United States Navy.

To all hands we say—The "News" is your paper. It is a paper written by the crew about the crew and their station, and what that station represents. In order that this publication may be successful, it must be backed by the full support of all personnel attached to this station.

News writers, reporters, and staff editors will be needed to carry on the work of this bigger and better

Jennifer Jones, 'Song Of Bernadette Star', To Visit Hospital Patients Here Today

Film star Jennifer Jones, four times nominated for the Academy Award and its winner for her role in "The Song of Bernadette," will visit the National Naval Medical Center today.

Coming here direct from Hollywood, Miss Jones' appearance is being sponsored by the Veterans Hospital Camp Shows, which presents stage shows once a month at the Center Theatre.

NNMC Group Ends 21,000 Mile Journey

A naval medical science group, having just completed eight months of study and 21,000 miles of travel by jeep and truck through 15 countries of Africa, is now returning to the United States in the light cruiser USS Huntington.

The group started in Port Said, Egypt, last February as part of the University of California African expedition. Its mission was to study tropical diseases, collect rare specimens and to set up a medical information exchange program.

Those returning in the Huntington are Commander J. M. Amberson, MC, USNR, Commander T. K. Ruebush, MC, USN, and Dr. Ernst Schwartz, zoologist, all instructors at the Naval Research Medical Center, and H. S. Cope, Jr., Photographer's Mate, second class, USN. They are highly satisfied with the results of the expedition.

Three members of the Naval party, Captain J. J. Saperro, MC, USN, R. H. Hoogstraal, and D. K. Lawless, HMC, USN, are still at Madagascar studying disease in leopards and rodents.

It will take at least another six months to identify and mount the animals, insects and other specimens collected and to complete the report of the trip. Specimens being returned include a collection of internal and external parasites and many diseased organs of man and animal. These, with numerous movies and still photographs showing phases of tropical diseases and their carriers, will be used to instruct Naval medical officers. They will also be made available to other scientific and research institutions.

She is expected to arrive late this morning or early this afternoon and after being greeted by Rear Admiral Morton D. Willcutts, Medical Officer in Command, National Naval Medical Center and Captain Leslie O. Stone, Medical officer in Command, U. S. Naval Hospital, she will devote most of her time to visiting patients in the wards of the Naval Hospital.

In the evening at supper, the actress will be the guest of honor in the enlisted men's mess hall.

Starred with Joseph Cotton in David O. Selznick's "Portrait of Jennie," which is to be released about December 1 and probably will be shown on the Center Theatre screen, Miss Jones has had one of the most sensational and rapid rises in the history of Hollywood. She has been featured in "Duel in the Sun," "Cluny Brown," "Love Letters," and "Since You Went Away."

After finishing "Portrait," she was loaned to Metro-Goldwyn-Mayer for another role that promises to be epochal, that of Madame Bovary in the movie of the same name.

Visiting the hospitalized veterans and service men here will be no new experience for Miss Jones. During the war she worked day and night for the American Red Cross. She was one of the first nurses' aides and was on call at any hour.

Sheehy Praises Medical Corps

The Right Rev. Msgr. Maurice S. Sheehy of Catholic University paid high tribute to the 200,000 medical corps men and women who served the Navy during World War II in a recent address at the Naval Medical Center.

Msgr. Sheehy, former Navy chaplain and now head of the university's department of religious education, said that during the 31 months he was in the Pacific he saw "countless marvels" of medical service performed by the corps.

"Perhaps the hospitals consisted

KEEP QUIET!

Recently, the Hollywood version of the novel, "Mourning Becomes Electra," was shown to NMMC personnel at the Center Theatre. The results were disastrous! Eugene O'Neil, the dean of American dramatists, took the worst beating of his life, and some in the audience hit an all time low in behavior that could only be called disgusting and juvenile.

Some fellows feel that to show everyone how masculine and virile one can be they must hoot, stomp, whistle and emit ecstatic sighs whenever a female appears on the screen, or whenever one shows more of her leg than the new look normally allows. Most of the time the audience would howl if Whistler's Mother hobbled on the screen, just to show the other guy that they are "that-a-way about goils," and not just "that-a-way" period. Relax, Bub, everybody believes you, and some people do come to hear the dialogue.

It is admitted that "Mourning" was heavy drama at its greatest depth, and that many people do not enjoy that type of entertainment. What isn't understood, is WHY don't the jokers who dislike that sort of thing, politely get up and leave? Must they stay and act like a pack of braying donkeys, seeing who could outlaugh the other when the scenes became quite

heavy? It isn't compulsory to stay . . . but stay they did and laugh they did. And ruin the show for many . . . they certainly did! The laughter became so contagious that when the mother shoots herself they howled like lonely wolves. When the son cried in profound grief over his mother's death, they began vying for the best imitation of a love sick prairie dog. From their reactions it is guessed that most of the audience would howl in childish glee if their own mother shot herself. That, of course, is an absurd statement . . . but no more absurd than the audiences' participation.

True to form the next night's movie was a bang up western with Dick Powell and Jane Greer. The film was the same stereotyped western that is made year after year, and is forgotten as quickly. In the "out-to-get-his man" scenes you could hear an eyelash flutter. Of course, Janie got her prescribed number of shrieks from the virile set. Regardless of that . . . it was too bad that the same civility couldn't have been shown the previous evening's movie. We all like a romantic show, many like cowboy shows, it all depends on the individual, but the code of decency is very simple . . . if you don't like the movie, SHOVE OFF, or if you prefer to stay at least KEEP QUIET. Give the other fellow a chance.

Dental School Graduation Held

Dental School graduation exercises, Friday afternoon, 5 November 1948, highlighted news events at the Naval Medical Center during the month. A cocktail party honoring the graduates was given by the staff and student body of the school on the eve of graduation, in the Bachelor Officers Quarters.

Distinguished guests who attended included Rear Admiral and Mrs. Clifford A. Swanson, Surgeon General of the Navy, Rear Admiral and Mrs. Clemens V. Rault, Deputy Chief of Bureau for Dentistry, former commanding officer of the Dental School, Rear Admiral and Mrs. Morton D. Willcutts, commanding the Naval Medical Center and Dr. Clyde E. Minges of Rocky Mount, North Carolina, President of the American Dental Association.

Graduation exercises were held in the main auditorium with a record attendance. The principal address was given by Admiral Swanson. Other speakers on the program were Dr. Minges and Admiral Rault.

Captain Louis D. Mitchell, Commanding Officer of the school, acted as master of ceremonies and Admiral Willcutts presented certificates to the graduates. There were 16 regular Navy dental officers in the group who completed a six months PG course in general dentistry and 44 reserve dental officers finishing a two weeks training course. The hospital corpsmen orchestra furnished the music for the occasion.

Taylor Designs NEWS Name Plate

The name plate you see on the front page of the "NEWS" was designed by Barney L. Taylor DTC, USN. Barney is a member of the Dental Facility Staff at the Naval Medical Research Institute. He has been a member of the staff for the last two and a half years. During this period he has been very generous in making contributions to the station paper.

Designing a name plate for a paper might seem hard for some people, but to Barney Taylor it is enjoyment, due to the fact that his favorite hobby is art work.

SHEEHY PRAISES

(Continued from Page 1)

only of a few quonset huts," he said, "but they were staffed by the best trained doctors, nurses and enlisted personnel. The splendid organization of this corps is responsible for the almost incredible fact that 97 of every hundred wounded recovered."

He added nurses, doctors, and pharmacists' mates were the "eyes and ears" of chaplains in their ministrations to the sick and dying, asserting that religion "gives God his due" and patriotism gives our country its due "without hatred of any other country or race."

November Girl . . .

This is November. This is the Thanksgiving month, and this is our Thanksgiving Girl. One of the many things we are thankful for is that our surroundings are graced by the pretty, likeable person of Miss Ruth Ireland. Ruth not only lifts the morale around this activity but contributes her intelligence to the running of the Research Institute. Her educational prowess proves that the slogan "Beautiful but Dumb" has long ago become a saying of the dark past. Ruth holds a Bachelor of Science degree in Biology from Bucknell University, and a Master of Science bestowed upon her from Wayne University and Henry Ford Hospital in Detroit. What more could we want for our girl of the month . . . brains . . . charm and beauty . . . Ruth has them all. We thank ya' Mr. and Mrs. Ireland, we thank ya'.

Vital Statistics: Hair—Blonde; Eyes—Blue; Present residence—Bethesda, Maryland; Phone Number—(ah, ah, we aren't going to let the Thanksgiving spirit get us that much.)

Crews' Library: New Historical Novel Added To Collection

Have you noticed that the days are getting shorter? Now that there is no daylight to be saved, these long evenings are an invitation to reading!

There are many new historical novels in the CREWS' LIBRARY to tempt you; choose your favorite author, style, background and period and see how easy it is to become engrossed. A few of the newest novels are:

BLACK IVORY—Collins.

Excitement and color are to be found in this story of a lad Shanghai'd aboard a junk ship in 1829.

BRIDE OF FORTUNE—Kane.

A romantic picture of the beautiful and intelligent Varina Howell and her marriage to Jefferson Davis, whose career she helped immeasurably. An appealing story with a sympathetic understanding of the South.

CAPTAIN FOR ELIZABETH—Westcott.

The adventurous voyages of Captain Tom Cavendish, who sailed to the new world for Queen Elizabeth. He fought his way around the world to win the prize of war, a Spanish beauty.

FIRE IN THE HEART—Buckmaster.

A warm and tender story of the famous actress, Fanny Kemble. Competition for her hand resulted in an unhappy marriage but there were triumphs on the stage to compensate.

SOMETHING GLEAMED—Kenyon.

A strange and secret side of the Revolutionary War is discovered in the story of a group of women kidnapped from England and brought to America to comfort the British troops.

Parties Feature 'Y' Cottage Schedule

Schedule of events at the "Y" Cottage, 8410 Wisconsin Avenue, Bethesda, for the month of November follows:

November 18—Bingo Party, 8:00 p. m.

November 23—Square Dance, St. John's Church, 8:30 p. m.

November 25—Thanksgiving Buffet Supper, 5:30 p.m.

November 30—Birthday-Farewell - Hello - Congratulations Party, 8:30 p. m.

Hospital Services Are Combined

Effective on October 1, 1948, dependents of active military personnel may receive medical treatment at any of the hospitals of the three services. In addition, the per diem charge for dependent patients has been standardized at \$1.75 for all the hospitals of all of the services.

The Navy Bureau of Medicine & Surgery immediately upon formulation of the policy, which was agreed upon on September 28, issued instructions to implement the new plan. Instructions outlining the Navy's policy will be found in Bu-Med CirLtr 48-106.

(SEA)—A part of the southern sky near the Southern Cross which appears to be devoid of stars is called the coal sack.

'Y' Cottage Woos Navy Men With Aroma of Coffee

Have you met the gang at the "Y" Cottage? If you haven't you are missing a lot of fun and recreation as well as a place of relaxation for your leisure hours. You people who are regular "Y" Cottage Clubbers really have an edge on your buddies and fellow workers. It's a bet if you stop by the Y Cottage, 84 Wisconsin Avenue, you'll come back for more.

Just as an introduction to the interior of the Cottage, here is a brief resume. Upon entering you might get the feeling that you are walking into someone's private home. I don't back out the door because you let your eyes wander around the living room you will probably see a familiar face and will definitely be greeted with a welcome smile.

Everyone seems to head for the kitchen upon arrival—could it be the tempting aroma of coffee—could be, because there is always a supply on the stove just waiting for you to pour a cup and it's on the house. Many new friendships have been formed around the kitchen table at the Cottage while chatting and sipping at that cup of coffee.

The kitchen is not the only popular spot, however, because as you begin to wander through the rest of the building (escorted by one of the charming hostesses) you will find other groups doing many different things. As you entered, it is quite possible that there were one or more card tables in the living room; there are fiends in the group; Bridge, Pinochle, Hearts, Russian Bank, and Cribbage as well as other card games—these happen to be the most popular at this particular time. In addition to card playing it is unusual to have a gang around a piano singing old and new favorites.

Continuing on you will find a group in the music room completely relaxed and enjoying the music of Bach, Beethoven, Mozart or some of the other "long hair" composers; not they may be tuned in on a radio show.

You say you want more activity, okay, try the Rec Room. There are hundreds of records for your dancing pleasure and there is always a dancing partner. It is even possible that one of the girls will teach you to dance if you don't know how.

The Crafts Corner always creates curiosity. At this season there are several groups making various items for Christmas. Equipment is available for working on ceramics, leather, and metal or painting your Christmas cards. There are regular classes in each of these fields and you are interested why not enroll for the next session. Of course, you are already in the know you are sitting down and start work.

One of the regular and popular features at the Cottage is the Sunday Night Suppers when the gang gathers and is served home-cooked food on a share-the-cost basis. Every Sunday at 6:00 P. M. you will find a sizeable group gathering for the purpose of eating together and enjoying each other's company.

paper. Look about you—do you see a story about your shipmate or a story among the many activities of your station? Write it down and bring it to us. All articles submitted to the editor, and approved for publication will always carry credit line to the writer.

Patients' Corner:

Redskins' Game Activity Week-end

by Thomas W. Burke

"Sammy" Baugh and his Washington Redskins offer the top cross-sponsored attraction for Hospital patients this week.

Redskins are scheduled to play with the Detroit Lions in a football game at Griffith Stadium Saturday afternoon at 2:30 p.m. Free tickets and transportation are available to those making arrangements through their ward Red Cross recreation worker, or at the Red Cross office in Room 102 on the 11th floor. Special provisions have been made for seating of wheelchair patients.

As usual, the game will be telecast and broadcast over WMAL by announcers Harry Wismer and Jim Brown. If you can't get there but like to watch the telecast, drop in to the Recreation Building.

BASKETBALL COMING UP

Another sports attraction for NH patients is Mike Uline's professional basketball team, the Washington Redskins, rated among the best in the country.

Caps recently opened their 1949 season and for all home games played on Saturday evening the Red Cross will have tickets. Transportation to and from the arena will be provided.

If you're an ice hockey fan you can see the Washington Lions in action against American Hockey League opponents whenever they're in town for games at Uline Arena on Sunday nights. The deal on tickets and transportation is the same as for football and basketball.

AT NAVY GAMES

The Navy football team had a enthusiastic following at the Naval Medical Center was evidenced by the demand for tickets.

Red Cross had available tickets and transportation for 70 patients for the four games played at Griffith Stadium in Baltimore this season. And the demand for tickets was far in excess of the supply.

Other Baltimore grid attraction patients have been seeing is the Baltimore Colts of the All-America Football Conference. The Red Cross has scheduled trips whenever the Colts play home Sunday games.

BERLIN EXPRESS

Appearing briefly in a scene with other Red Cross workers in the "Berlin Express," is Jane Hildebrand, who until early this year was stationed at the Naval Medical Center. She's now on duty in the "Berlin Express" and "Campus Moon" are listed for showings during the week of November 15.

SCUTTLEBUTT

The Red Cross has a dope on outside entertainment. The Red Cross has a list of movies every Tuesday at the Warner and Metropolitan theaters. They're stamped "See Only" but don't pay any money to that. You can use any time while you're on liberty day they're issued.

Slattery gave a guest lecture to the boys over in 133 on November 3. He's football editor of the Washington Daily News. A familiar face in many of the rooms will be missing. She's on Ahern, Red Cross recreation worker, who's leaving November for Los Angeles, where she'll reside. She plans to continue her association with the Red Cross.

BuPers to Issue New Manual Soon

(SEA)—A revised BuPers manual will be ready for distribution to ships and stations soon.

The new manual will contain fewer pages than the old one, but the page size will be larger. It will consolidate the latest BuPers policy changes, including the new rating structure. Material of a related nature will be included within the same articles and sections with an over-all index for ready reference.

Some minor administrative instructions and policies which have not appeared in previous directives will be included in the new manual.

Printed matter will be arranged in two columns on each page and all 415 pages will be bound in a four-post loose-leaf binder. The pages will measure 8 1/4 by 11 3/4 inches.

The manual will be distributed at the same time as the revised U.S. Navy Regulations.

Dance Band, Songstress Make Debut

Currently hard at work practicing both "hot" and "sweet" numbers is the recently re-organized NNMC dance band, which already has played at the station movie on two occasions and performed a week ago at the Dental Officers graduation.

Leader of the group is J. R. Hildebrand, HN, a student in the Naval Medical School here. A majority of the members of the promising orchestra also are Med School students, while others are in the Center, Research, and Naval Hospital Commands.

Booked to play for future staff dances, the NNMC music-makers have been devoting much of their leisure time to rehearsing new numbers, re-writing pieces, selecting new ones from the latest hits on the nation's swing market, and hope to accomplish bigger and better things in the months ahead.

The outfit's saxophone section includes Hildebrand (alto), C. E. George, HM1 (alto), and C. P. Foreman, Jr. HN (tenor), while "sending" audiences on the guitar is J. Gaffney, HN.

Trumpet men are D. L. Phillips, HN, R. M. Gertz, HM3, I. A. Blazi, HN, and J. B. Ruth, HM3, while H. C. Schubert, HM3, and D. J. Burkhardt, HN, are the trombonists.

Helen Hollquist, LTJG NC USN, is the female vocalist, "Buck" Meadows, HN, the drummer, and H. C. McLaughlin, HN, slaps the bass, and

Shown above is a portion of the NNMC dance band, which recently made its debut. In the picture are (left to right), C. P. Foreman, Jr., Blazi, W. H. Benson, H. C. McLaughlin, and three medical center men.

Colors at the Naval Medical Center

Lowering of the colors is a familiar sight every afternoon in front of the Medical Center. Marines in the picture are (left to right) Cpl. Joseph H. E'Toile, Pfc. Kenneth A. LaFlame, Cpl. David H. Moore, Pfc. Joseph R. Lange, and Pfc. William R. Howles. The United States Marine Corps celebrated their 173rd Anniversary on 10 November 1948.

Meet Your Commanding Officer:

Captain Charles F. Behrens

To the average bluejacket in the Navy the Commanding Officer or "The Old Man" in seagoing parlance is someone who wears three or four stripes on his sleeve and who has an uncanny ability to find hidden dust on inspection days. After thinking over this not-too-clear description of the men who command the activities at this Medical Center we came to the conclusion that we would bring to light the facts about these men and perhaps, find the stuff of which Captains are made.

On April 4 of this year Captain Charles F. Behrens, MC, USN assumed command of the Naval Medical Research Institute. Behind Captain Behrens were twenty-eight years of naval service which began at Great Lakes in 1920. Fresh out of medical school at the University of Pennsylvania the young doctor made two decisions which have undoubtedly been the most important ones of his entire fifty-two years. The first choice came on May 30, 1920, when he was married. The second occurred during October of the same year when he accepted a commission in the naval medical corps as assistant surgeon.

Today Captain Behrens has one son, a navy veteran, and three daughters. To say that the events are sometimes crowded is an understatement for the year 1948 when the Captain saw his son and two daughters married within a period of five months.

Without mentioning what motivated his first choice in 1920 we may go on and explain his second choice . . . the navy. Not particularly liking the prospects of general practice and with a certain ancestral leaning toward the following of the sea the choice was not too difficult. Among his ancestors who lived in the coastal regions of Germany many had been sea-going men. Perhaps, heredity played a part here or perhaps, it was the eye-opening, romantic appeal of the Navy's recruiting posters which as we all know state "Join the Navy and See the World." Whatever was the actual reason it has certainly been a profit to the Navy.

After graduate training in clinical pathology and radiology the shortage of trained men in these fields kept Captain Behrens on extended tours of duty in this country. However, he did serve on the USS Henderson from 1923-25 and on the USS Relief from 1937-38. He also was on duty with the Garde d'Haiti at Cape Haitien from 1929-32 as a consultant with the Service d'Hygiene at the same place.

It was in Haiti that Captain Behrens discovered the native substitute for our APC's. As he was entering the sick bay one morning he passed by a gendarme who was just leaving after being treated by the Captain's prize hospital corpsman. He noticed that plastered on the gendarme's forehead was a cross made of green leaves. Wondering what was coming off he asked the corpsman about the patient and was told that he had a headache. "Why the green cross on the forehead?" asked the Captain. "That's the best way

Bonus

(Continued from Page 1)
will be paid \$900.00 if death was service connected and occurred between September 16, 1940 and September 2, 1945, inclusive. Apply before July 1, 1949. Veterans and survivors in Cook County, apply to Service Recognition Board, 218 Monroe Street, Chicago; all others apply to Service Recognition Board, 301 West Adams Street, Springfield.

Massachusetts: \$300.00 to veterans; \$300.00 to next of kin. Apply to State Treasurer, State House, Boston. (Note: World War I veterans who were in the service between February 3, 1917 and November 11, 1918 are eligible to receive \$100.00. Apply to State Treasurer, State House, Boston.)

Michigan: \$500.00 to veterans; \$500.00 to next of kin. Apply prior to March 19, 1949 to the Bonus and Military Pay Division, Adjutant's General's Office, Lansing 1. (Note: World War I veterans \$10.00 payable for each month spent in service; apply same as above.)

New Hampshire: \$100.00 to veterans; \$100.00 to next of kin. Apply to the Adjutant General, Concord.

New York: \$250.00 to veterans; \$250.00 to next of kin. Apply to Veterans Bonus Bureau, Department of Taxation and Finance, 1875 North Broadway, Albany.

Ohio: \$400.00 to veterans; \$400.00 to next of kin. Apply to Director, World War II Compensation Fund, Columbus 15. (Note: World War I veterans and next of kin, \$250.00, apply to the Adjutant General, Columbus.)

Rhode Island: \$200.00 to veterans; \$200.00 to next of kin. The time limit for making application expired on 30 June 1947.

Vermont: \$120.00 to veterans; \$120.00 to next of kin. Apply to Veterans State Bonus Division, State House, Montpelier. (Note: \$120.00 payable to Vermont World War I veterans.)

Alaska: \$300.00 to veterans. One year minimum period of service required unless discharged for service connected disability. \$300.00 to next of kin. (Note: Veterans may elect to take the bonus or a loan not in excess of \$10,000. If the bonus is accepted, the veteran is not eligible for a loan until such time as the bonus is repaid.) Apply to the Commissioner of Veterans Affairs, Juneau.

Hawaii: \$300.00 to veterans with 10% or more disability only. Apply to the Director of Veterans Affairs, Honolulu.

States Proposing Bonus Legislation: The following States have bonus referenda on their ballots in the recent elections: Indiana, Iowa, Louisiana, Minnesota, Missouri, North Dakota, Pennsylvania, South Dakota, Washington, and Wisconsin. Of these States, Washington is proposing \$350.00 maximum bonus, Missouri is proposing \$400.00.

North Dakota has approved a bonus which is expected to be enacted in January 1949. The 1949 Pennsylvania legislature must reapprove proposed bonus to the voters. The State of Kansas introduced bonus legislation to the 1947 legislative session. It was not reported out of the committee, and it is expected that action may be taken in the next legislative session (January 1949).

States Which Have Not Enacted Bonus Legislation: To date, States which have not enacted bonus legislation are as follows: Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Idaho, Kentucky, Maryland, Mississippi, Montana, Nebraska, Nevada, New Jersey, New Mexico, North Carolina, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Virginia, West Virginia, and Wyoming.

A proposed law which would have paid a bonus to veterans from the State of Maine was defeated by the voters in the 1947 general election,

(Continued on Page 4)

Three Medical Center Men Receive Decorations

Captain Albert Richard Behnke, Jr., MC, USN, recently was presented a Commendation Ribbon by Rear Admiral Morton D. Willcutts, MC, USN, "for exemplary service as Research Executive at the Naval Medical Research Institute," as stated in the citation from Secretary of the Navy John L. Sullivan.

The remainder of the citation follows:

"Outstanding in scientific achievement in submarine and diving medicine, Captain Behnke has made possible safe diving operations at greater depths, a significant contribution to the prevention and treatment of decompression illness in divers and caisson workers.

"His wide knowledge and experience in research, appreciation of the importance of medical research in the Navy, and his unfailing interest and high motivation in the performance of his duties have contributed in great measure to the establishment, development, and high standing of the Naval Medical Research Institute.

"Captain Behnke's achievements

and devotion to duty are in keeping with the highest traditions of the United States Naval Service."

Another recent award was that of the Good Conduct Medal to James P. Weeks, HMI, USN, at the Naval Medical School on 15 October, 1948, by Captain M. J. Aston, MC, USN, Medical Officer in Command.

T. E. Locklear, HMC, USN, was presented the Army Distinguished Unit Emblem by Rear Admiral Willcutts earlier in October.

This emblem together with Oak Leaf Cluster, was awarded Chief Locklear for service with the U.S. Naval Forces, Mariveles Area, in defense of the Philippine Islands. Locklear was a Japanese prisoner of war from 12 April, 1942 to September, 1945.

In separate ceremonies, awards for merit were made to Naval Medical Center personnel. At left, Admiral Willcutts presents Chief Pharmacists Mate T. E. Locklear with the Army Distinguished Unit Emblem, while in the center photo, Capt. A. R. Behnke, Jr., receives a commendation ribbon from Admiral Willcutts. Being awarded the good conduct medal, at right, is James P. Weeks, HMI, by Capt. M. J. Aston.

Sportin' Aroun'

by Clyde Schubert

Sure, I know the basketball season is just around the corner and our Washington Capitols already are well into their 1948-49 BAA campaign, but since there'll still be a lot of pigskins flying through the air on gridirons all over the nation the rest of this month, most of this initial kolyum will deal with disa and data in the football world. Okay? Then we're off like a herd of turtles.

First off, what happened to such ball clubs as Penn, Duke, Missouri, Georgia Tech and vaunted North Carolina U. last Saturday was enough to make many people give up betting on football games.

I was one of the lucky guys who picked Penn State, Wake Forest, Oklahoma, and also Virginia to trip N.C. State, but Northwestern's recent victory over the Minnesota Gophers and subsequent drubbing at mighty Michigan's hands still haunt my mind—and deserted Willfold as well.

Center Grid Sidelights: Congrats to the Center Command touch football squad, who made their pre-season role as league favorite look like good casting by drubbing a good Annex Two outfit by four T.D.'s last Saturday.

It looks as though Med School and Research, Center foes tomorrow and next Saturday respectively, both will be tough to get by, though. I pick the aerial-minded Center as league champs.

ORCHIDS and ONIONS Dept.: Orchids to George Royster, clever Center Command halfback, who leads the loop's scorers with a total of 31 points, having made five tallies and one extra point in three tilts. Onions to the Naval Hospital for not working harder at fielding good intramural athletic teams.

Two Center regulars, Royster and Bob Marchand, rugged lineman, are Naval Hospital corpsmen. Royster, an Electroencephalography technician of no mean ability, says "watch the NP cagers this winter."

The NEWS has no reporters in either the Dental or Medical School, so how about you men in those commands getting together and coming up with a News Hound or two? Here's your chance to see your commands represented on the staff.

Al Bramley, noted authority on tiddlywinks and crap-shooting, wonders how people will avoid getting killed by golf balls on the compound next spring and summer. Those greens are precariously near sidewalks and streets in some cases. That's something to think about.

Center Command Still Undefeated, Smashes Annex Two Club, 28-0

Flashing a dazzling passing attack that was beautiful to behold, Center Command ran roughshod over highly-touted Annex Two, 28-0, in the feature tussle of last Saturday's three-game NNM intramural touch football loop card.

With big Jay Bell on the firing line, the Center crew, slight favorites before the contest, threw the pigskin around like a hot potato, and completed 17 of 32 attempted aeriels in all.

Bell flipped a trio of touchdown passes, one to shifty George Royster, top scorer in the league to date, with a 31-point output, and detoured m Annex Two toss to run it back for the other tally.

Outcharged by a beefy Center line, led by "Gunboat" Anderson and "Bruiser" Marchand, the losers never were able to get their offense in high gear. The lopsided reverse dropped the Negro six into a three-way tie for second place.

A second-period touchdown by Tom Stockstill gave Research a hard-fought 6-0 triumph over cellar-dwelling Dental, and pushed the victor back into the title picture with two wins and one loss.

Striking through the air for a fourth-frame marker with six minutes to go, Medical School rallied to nip an improved Hospital club, 14-12, in a well-played affair. Med. School now is deadlocked with Annex Two and Research for the runnerup spot.

Center	7	0	7	14-28
Annex Two	0	0	0	0-0

Touchdowns: Royster, McCarthy, Bell, Moore.

Conversions: Royster, Partridge, 2, Marchand.

Research	0	6	0	0-6
Dental	0	0	0	0-0

Touchdown: Stockstill.

Med. School	0	7	0	7-14
Hospital	6	0	6	0-12

CENTER TAKES TWO—ANNEX BLANKS RESEARCH

In earlier contests, Center Command, pre-season favorite to capture the league title, easily outclassed the Naval Hospital gridders, 32-0, swept past the Dental six, 27-13.

In its triumph over the Hospital club, Center's speedy outfit scored almost at will through the air lanes, and left the losers badly baffled. Strong line enabled the winners' passers to take plenty of time in spotting receivers, and the result was "victory through air power."

Uncorking a strong ground attack behind fierce blocking, Dental notched two tallies in the last half against Center, but a 20-7 half-time margin, coupled with a fourth-period T. D., were enough to send the underdogs sprawling.

Annex Two's dangerous outfit blanked Research, 12-0, as Lester Le ran back a pair of the losers' stray aeriels for the colored club's dozen points. The Hospital forfeited its scheduled tilt with Annex Two, failing to field a team at game time.

Spearheaded by Bruce Tillman's alert quarterbacking, Research squashed Medical School, 28-0, to deal the Lab men their initial setback. Lack of any sustained drive and a shaky defense spelled doom for the victims.

Once-beaten Med School then turned on Dental to gain a 19-6 victory as "Jarrin' John" Swinko of the winners intercepted a pass and back brilliantly for a marker late in the third stanza.

INTRAMURAL FOOTBALL LEAGUE

STANDINGS

	Won	Lost	Pct.
Center	3	0	1.000
Annex Two	2	1	.667
Med School	2	1	.667
Research	2	1	.667
Dental	0	3	.000
Hospital	0	3	.000

See how many of these 15 college grid contests for this weekend you can pick correctly: Army-Penn, Brown-Harvard, Colgate-Syracuse, Dartmouth-Cornell, Navy-Columbia, Princeton-Yale, William and Mary-Boston College, Baylor-Tulane, Clemson-Wake Forest, Minnesota-Iowa, West Va.-Virginia, Marquette-Wisconsin, Ohio State-Illinois, Wash State-California, and Texas-T.C.U.

That Clemson-Wake Forest fray should be a thriller. BIG GAME — Maryland-North Carolina U. at Griffith Stadium Saturday. Pick the winner and probable score on that one, and you've done a full day's work. I like the Terps by seven points, and Wake Forest to tumble Clemson; also Tulane over Baylor and Dartmouth over Cornell.

Oh yes, it looks like fun for G.W.U. against Duke next week. The Blue Devils are no little provoked now about last week's loss to Wake Forest.

Why can't the Washington Lions hockey team ever seem to win? Jerry Snodgrass says it's because they don't make any goals. OUCH! Jay Bell thinks most gals like vegetarians—men with a lot of lettuce, that is.

Paul Murray, NH Kentucky Colonel, says North Carolina will stom Maryland. Beware of this gent—he picked Penn last week by 19.

FLASH! Next issue your intrapid columnist will go way out on limb and choose an all-America collegiate grid team—also a NNM intramural football league all-star club. My choices ought to be good for jokes, men. The first issue in December will carry an all-star professional eleven.

Dance Band

(Continued from Page 3)

also can double on the drums. At present the band is looking for a good pianist, and any pianists on the compound wishing to try out are asked to get in touch with LTJG J. O. Atkinson, Recreation Officer, whose office is in the Rec. Bldg.

Since most of the Med School students will be leaving NNM in January, all sections of the orchestra will need new talent in the near future. Lt. Atkinson has urged all musicians on the station interested in playing in the group to contact him as soon as possible.

Center Cage Squads Urged To Organize

With the weather leaning more and more toward winter these unpredictable November days, many a basketball-inclined man on the compound already is looking forward to the resumption of NNM intramural cage loop activities.

Plans now are being formulated for a top-notch hardwood league here during the coming 1948-49 season, and it is hoped by the Recreation Department to choose several members of the NNM ball club in the Potomac River Naval Command court circuit from the various intramural aggregations on the station.

Advance reports indicate that almost all commands anticipate entering one or two quintets in the loop. Strong entries are expected from Dental, Med School, Center Command, Naval Hospital, Research, and others.

The grapevine has it that two outfits, the colorful all-Negro Annex Two crew and the redoubtable Neuropsychiatric Dept. "Cold-Packers" of Naval Hospital intend to display a wide-open fast-breaking style of attack in the league this winter.

No deadline for submitting entries has as yet been determined, but all planning on entering fives in the league are urged to get organized as soon as possible by CDR. Frates, DC, USN, Athletic Officer of the base.

(SEA)—Four hundred and ninety-one ensigns in the regular Navy, the Naval Reserve and temporarily commissioned ensigns in both the regulars and the Reserves, will be eligible for promotion to the rank of lieutenant (junior grade) by 31 Dec. 1948.

CAPTAIN BEHRENS

(Continued from Page 3)

to treat such things!" answered the corpsman.

During his twenty-eight years of service Captain Behrens has become a Diplomat of the American Board of Radiology and of the Board of Internal Medicine. Besides his present duties of commanding officer he also heads the Atomic Defense Division of the Bureau of Medicine and Surgery.

One of the things that Captain Behrens showed an acute appreciation for, is the position of the enlisted hospital corpsmen and technicians. He considers these men and women as valuable assets to the Navy and is keenly aware of the need for an increased consideration of them.

Remembering once again the year 1920 the Captain recalled a story which his commanding officer told him that may bear repeating from one sailor to another. The story in substance answers the question why the ladies are like angels. First, they always are harping on things. Second, they are always up in the air; and third, they never have anything to wear. There's a moral there, sailor. And that could be the stuff of which commanding officers are made.

Center Command Wins Championship, Ships N.M.R.I., 33-13

By Clyde Schubert

Center Command's pass-conscious ball club rang down the curtain on a victorious NNM intramural touch football season by blasting aside the Research outfit, 33-13, in Saturday afternoon's season finale. Once again it was the accurate pigskin-pitching of Jay Bell and the receiving of his teammates that brought disaster to an opposing title.

Naval Veterans' Rights Listed New Manual

A new "Navy Manual of Veterans Information" distributed to all ships and stations contains valuable information regarding rights and benefits of naval personnel on active duty, or those about to be separated from the service.

The manual (NavPers 15,078A), in connection with the Civil Reading Program, provides the performance of a service in each district which may furnish personnel with assistance cannot be obtained from veterans' agencies, and which are required in solving problems arising in their naval service, particularly those connected with their rights and benefits.

In implementing the Civil Reading Program, the manual insures personnel, upon being separated from service, are provided with comprehensive information concerning their rights and benefits as veterans. Furthermore, it provides an informational service which service records and documents may be added correctly to contain all entries to enable the veteran to take full advantage of his rights and benefits.

Of the manual, which deals primarily with rights and benefits, information on eligibility; payment rights and readjustment allowances; loans, National Life Insurance; retirement pay, and pensions; medical hospitalization and special benefits for the disabled; burial allowances; benefits for dependents and survivors; miscellaneous rights and benefits; and other rights and benefits.

Opening up with a razor-sharp aerial show, the undefeated victors struck for their initial tally late in the first period, then passed for three more touchdowns in the second chapter to erect an insurmountable 26-0 halftime margin.

Sparked by the great running of speed demon, Tom Stockstill and inspired play of Bruce Tillman, crafty signalcaller, Research came battling back to make a real fight of it in the last half, but it was a case of the horse already being stolen before the barn door was locked.

"Gunboat" Anderson struck the first major blow for the favored Center six when he deflected the ball from a Research back's hand on an attempted pass play, grabbed the oval in mid-air and rumbled 45 yards to the pay office. Bell's flip to Upchurch added the extra point.

In the fatal second stanza, Bell fired a pair of T.D. bullseyes to George Royster, standout Center speedster, and then still another to Pat Partridge, who made a fine running catch in the end zone behind Tillman, the losers' safety man. Anderson snared one dividend-point toss.

Medal Awarded N.M.R.I. Doctors

Lt. Comdr. E. P. Cronkite and Lt.(jg) W. H. Chapman, have been awarded the Sir Henry Wellcome prize in Military Medicine for 1948, for their essay entitled "A Critical Analysis of the Syndrome of Acute Total Body Radiation Illness, Its Role in Atomic Warfare and Its Influence in the Future Practice of Military Medicine." The essay was based on work performed at NMRI and Joint Task Force One "Operation Crossroads." The award was presented on November 12 at San Antonio, Texas and consisted of a medal, scroll and \$500.00.

The prize was established in 1916 by the late Sir Henry Wellcome at the time he established the Wellcome Foundation for Medical Research in Great Britain. This is the third time that NMRI workers won this prize.

On Thursday evening, 18th November 1948, the fourteenth Gray Lady Graduation Class of the National Naval Medical Center received their veils in the auditorium of the Recreation Building.

Premiere Portrait...

To better portray the life of a great man, a distinguished officer and gentleman, we publish the speech of acceptance of the portrait of the Medical Corps' premier doctor, Admiral Edward Rhodes Stitt. The speech of acceptance was delivered by Rear Admiral (then Capt.) H. L. Pugh MC, USN in the Medical School library on 6 July 1945.

SPEECH OF ACCEPTANCE:
This is a most happy occasion and one which is to me in its very elements both signal and symbolic. It is signal in that it honors a noted man. It is symbolic in that the individual who is being honored and memorialized is himself a symbol of the Naval Medical Corps' highest precepts.

He was the Surgeon General of the Navy from 1920 to 1928—8 years, and it has always seemed to me that his incumbency in that office marked the beginning of a new era for the Navy's Medical Corps. It was during that period that the post World War I reorganization and readjustment took place.

In any event, he is thought of more as an institution than as an individual—more as immortal than mortal. His is the first portrait of any person to be presented to the National Naval Medical Center and it is indeed particularly fitting that it be presented to the Medical School since it has always been the School with which the subject has been more intimately identified. He was its Commanding Officer from 1916 to 1920.

He has for long been known to the world as an authority on tropical medicine. His book, in two volumes, on the "Diagnosis, Prevention, and Treatment of Tropical Diseases" is internationally recognized as authoritative as is his book on "Practical Bacteriology, Haematology, and Animal Parasitology."

Admiral Edward Rhodes Stitt, MC, U.S. Navy — 1867 - 1948

Could there be placed on these walls a more appropriate portrait or could this portrait be placed on more appropriate walls?—these walls of literally the Navy's greatest monument to medicine, the walls which encompass the number one teaching institution of the Navy's Medical Corps—the School which had as an illustrious former commanding officer this man—this, the premiere portrait of the Naval Medical Corps' premiere doctor, scientist, author, scholar, officer and gentleman—the personification, I believe, of the

(Continued on Page 3)

V.A. Hospital Show, 'Harlem On Parade,' Here Dec. 1

"Harlem On Parade" an all-negro funfest, will play in the main auditorium of the Naval Hospital on 1 December at 1800, and those who catch it will come away smiling and singing. The reason is that some of the brightest stars on the sepia circuit have been gathered from the major theaters and nightclubs in the country for your listening and looking pleasure.

This revue catches the happy, carefree appeal that is the keynote of entertainment today. It presents the gayest and fastest in rhythm, music, songs and comedy offered by professional artists who are top favorites wherever people congregate for amusement.

Here are the stellar attractions:

THE WILLIE MOORE TRIO are three splendid dispensers of "hot jazz." Willie Moore, electric guitarist, Mable Godwin, pianist and Albert Best, at the bass fiddle, improvise on "Linger Awhile," "Exactly Like You" and a couple of Billy's own numbers in the boogie manner will have you jumpin'.

THE WALLACE BROTHERS are almost a whole show in themselves—they're so versatile. They sing and dance, go through acrobatic routines and are accomplished comedians. Scott and Norman Wallace give out with "Sunny Side of the Street" and "Honeysuckle Rose" in a manner guaranteed to make rhythm and melody seep right into your bones. Their mimicry of Edward G. Robinson, Peter Lorre, Bette Davis and Charles Laughton is authentic—and funny.

RHYTHM WILLIE is a harmonica wizard. He weaves his music out of a tiny instrument with only ten keys that will make your eyes and ears open wide. He will play such ever popular favorites as "I Got Rhythm," "Stardust," "Stairway to the Stars," and others.

LORA PIERRE, the show femcee and songstress, is fresh from engagements at Harlem's citadel of vaudeville, the Apollo Theater.

Gen. Beach Dead; Headed Med. Center

The Navy Medical Center extends to the Army Medical Center heartfelt sympathy and sincere regrets for the loss of its Commanding Officer, General George C. Beach.

Gen. Beach exemplified the ideal in cooperative accomplishment in the noble art of healing carried on by both the Army and Navy Medical Corps.

THANKSGIVING

In a world where God and the prerogatives of God are being more and more denied—and consequently the natural rights of men which directly come from God—it is a heartening thing to hear the President of the United States again proclaim a day of Thanksgiving to God for all Americans.

How much we as Americans have to be thankful for! All our blessings as a Nation can be said to spring from the fundamental principle on which America was founded:

"We hold these truths to be self-evident: That all men are created equal. That they are endowed by their Creator with certain inalienable rights; that among these are the right to life, liberty, and the pursuit of happiness."

We are grateful that America believes in God a Creator who has endowed us as individuals, by birth, with the basic rights to life, liberty and the pursuit of happiness. We as Americans have never known anything else in a country which takes these things for granted. But look about you in the world. See how over the greatest part of the globe this fundamental principle is denied because God and his prerogatives are denied. Therefore human beings have no rights from nature but only that paltry degree of freedom doled out by an almighty state.

Free men of these United States—on this Thanksgiving Day get down on your knees and thank Almighty God that you are an American, because America believes in God and therefore guarantees your rights as free men. But remember this: wherever there are rights there are corresponding duties.

With all its perfections, America's greatest imperfection is that too many of us accept our rights and shirk our duties. America is You. You must build it strong, cherish, and protect it. You must willingly accept your duties to bear arms if necessary; pay your share of taxes; obey its laws; take part in its government; and as men and women of the United States Navy live up to the finest traditions of your service.

Too often the spirit has been "What can I get" rather than "What can I give." When all Americans are concerned only with what they can "get" rather than with what they can "give" their country then America and its future are in danger. Our basic natural rights are only as strong as our acceptance of our duties to God and Country.

MICHAEL J. MACINNES, Chaplain.

Plan 527,014 Navy Strength

(SEA)—The Navy's budget request to meet a planned average strength in the Navy and Marine Corps of 527,014 was fully approved by Congress.

Of the planned figure, the Navy will have 41,551 officers, 4,149 warrant officers, 2,914 nurses, 3,114 academy midshipmen and 386,061 enlisted men. The Marine Corps will have 6,363 officers, 1,000 warrant officers and 81,862 enlisted men.

Figures released as of 1 June 1948, show that the Navy had 389,086 men while the Marine Corps had 81,513 men. This figure is the last tabulation available.

Pacific Xmas Mail Deadline

To insure timely receipt of Christmas parcels and greeting cards sent by airmail to Naval personnel in the Pacific Ocean areas, a schedule of final dates for arrival of mail at the Fleet Post Office, San Francisco, California, has been established.

Postal regulations restrict the combined three dimensions of an airmail package to 100 inches, and the total weight to 70 pounds.

The schedule of destinations with final dates of arrival of prepaid airmail at the Fleet Post Office, San Francisco, follows:

Destination	Date
China	December 5, 1948
Japan	"
Philippines	"
Okinawa	"
Truk	"
Peleliu	"
Guam	December 10, 1948
Saipan	"
Kwajalein	"
Samoa	"
Hawaii	December 15, 1948
Midway	"

(SEA)—A small stowage space closet is called a locker. There is either in the form of a chest or a paint locker, boatswains' locker and two chain lockers aboard every ship.

(SEA)—A timber added to the main keel of a ship to increase the draft or protect the keel is called a false keel.

Jennifer Jones Visits Naval Hospital Patients

One of the most charming personalities ever to visit the National Naval Medical Center was Hollywood's Jennifer Jones, Academy Award winner and star of such outstanding films as "Song of Bernadette," "Duel in the Sun," and "Cluny Brown."

On a recent trip to Washington she devoted an entire afternoon to visiting patients at the Naval Hospital.

Miss Jones visited a majority of the wards, among them 5-C, where she talked at length with D. C. Rancey, M/Sgt., USMC (top left photo) and other patients. Later, she stopped in Ward 6-C and is shown (top right

photo) getting a big smile from Forest L. Howell, PFC USMC.

Quite a delegation was on hand to greet the movie queen in Ward 134 (lower left photo) where she was seen sitting with James M. Cavanaugh, Jr., SN, USN, and Robert E. Parker, PFC, USMC, while Robert Migneault, AM1, USN, Billy E. Putnam, PFC, USMC, Don F. Vandiver, PFC, USMC, and James A. Beasley, SA, USN, look on.

In the lower right photo Miss Jones is shaking hands with Thomas W. Burke, Veterans Administration patient, and N. N. M. C. NEWS editorial advisor.

Crews' Library: 'One Clear Call' Among Books Now In Library

If you are interested in keeping up with the new books, you want to check up on some of the following new titles:

SEA CHASE—Geer
The pursuit, escape and final destruction of a German ship in War time. Exciting and well written.

CLEFT ROCK—Hobart
A three-generation history of a California family. The plot concerns the clash between large and small landowners over water rights which make the difference between desert land and fertile farms.

THE PRECIPICE—MacLennan
A small town Canadian girl marries a sophisticated American. This thoughtful story reveals their differences in viewpoints, temperaments and values.

ONE CLEAR CALL—Sinclair
In the ninth book of this series, Lanny Budd is still taking a hand in the European situation of World War II; he makes a dramatic escape from Germany when his spying is detected.

There are also new mysteries, westerns and non-fiction books to be found on the Library Shelves. Patients and Staff are invited to come in and browse. Building 2, Room 105 open 0800-1600, Monday through Friday and every evening from 1800-2000.

Ship's Service Opens Toyland

If you haven't been in the Recreation Building within the last week, you wouldn't know of the spirit that has invaded the first floor. The spirit of Christmas with its bright lights and gay colors. Brings a new addition to Ship's Service, something to interest the young and old alike. We now have a "Toyland."

In our Toyland we have gifts of fun for all ages. The poppas have been having more fun with the electric trains than the kiddies, trains with real live smoke and whistles. Accessories also are available that make the setup seem real.

How would your little boy or nephew like to open his present to find a catcher's mitt? You'll find handsome soft ball mitts, Gilbert Tool Chests and Lionel Construction sets that will keep the little fellows busy and at the same time educate them. Taxi cabs, Tractors, Trucks, Airplanes, we have them.

For the little girls, we have dolls of all sizes and shapes. We have a little sailor girl and boy twin doll set that any little girl would love. Also Betsy dolls and drum major-ettes with lovely hair and long eyelashes. There are many more just waiting to be taken home for some little girl to love. Just like Mommy, she can push her little doll up and down in a doll stroller made to look like one she used to ride in.

We're open every day except Sunday from 8:30 in the morning until 5:00. Bring the Kiddies too. You're all welcome.

Xmas Formal Planned Dec. 16 By 'Y' Cottage

Too late to wish you Happy Thanksgiving but we do hope you didn't miss that delicious Buffet Turkey at the "Y" Cottage; 'twas a beautiful stuffed bird presented us by Mrs. Milton Harris. Enough of what has been—a peek at the December Activity calendar (you can see it for yourself on the Bulletin Board by the Mess Hall) reveals that the Christmas formal dance scheduled for December 16—8:30 p.m. at the Bethesda Woman's Club. There'll be beautiful girls, refreshments, a good floor and an Orchestra and in case you don't know you don't need a date to appear and have a good time. All the "Y" Cottage dances are "stag or drag"—help us keep them that way.

The December Square Dance will be Tuesday, December 7 at St. John's Episcopal Church, Brady Blvd. & Wisconsin. It's the "Can Can" dance for the month. (If you don't know what a "Can Can" dance is just ask any regularite from the Cottage.)

Seems there is going to be quite a bit of Christmas Spirit around the Cottage starting with a "Tree Hunt" Sunday p.m. Dec. 12. Haven't gotten the official dope on this outing but it is easy to surmise that at 11:00 a.m. people are going to load in Red's truck and jolt along to the woods to cut a Christmas tree, there'll be plenty of food, no doubt and of course hot coffee.

Patients Corner: Basketball, Ice Hockey in Spotlight

By Thomas W. Burke

The sports seasons are changing that means entertainment changes for Naval Hospital patients. Soon the spotlight will be off football and on basketball and ice hockey. NH patients will have their first crack at football a week from today, 5 December, when the Washington Redskins tackle the Los Angeles Rams at Griffith Stadium. Make your reservations for passes transportation through your Red Cross recreation worker. From now until Spring, keep in mind that the Red Cross will have hockey tickets available for all day night home games of the Washington Lions at Uline Arena. Other Uline attraction for which passes can be had is the Washington Capitals basketball team. You can see their Saturday night games whenever the club plays a home

CHECK ON OTHER EVENTS

Frequently, the Red Cross has entertainment events in Washington vicinity that do not become available until a few days before. Examples are concerts at Constitution Hall and plays at the Auditorium of George Washington University and at Catholic University. Find out what's scheduled by asking your Red Cross recreation worker because advance information on events often cannot be posted.

TELEVISION A HIT ON 4-D

Card 4-D patients are getting enjoyment from that television donated to the Naval Hospital months back by Bill Herson WRC. Favorite program is the Theatre show on Tuesday nights, but the real preference is for broadcasts of football games and wrestling matches. Incidentally, the set was just one given to area hospitals as part of Herson's Hospital Television campaign. Since 7 August, Herson has been asking listeners on his "Timekeeper" broadcasts each week to send donations. Contributions as the campaign ended totaled \$3,628.26. The receivers are installed by local television distributors without charge.

WARD SCUTTLEBUTT

If you're interested in popular music you'll have a chance to discuss it with an expert . . . John of the National Academy of Broadcasting, is making a tour of wards to hold what he calls a "Session" . . . He brings along a supply of recordings to play for and then gives a brief lecture and answers questions. Lloyd W. Lindholm, SA (Ward 1), had what he calls the "thrill lifetime" the other day . . . he was undergoing a treatment for Fever Therapy, former Secretary of State Cordell Hull and Admiral Clifford Swanson, the Navy's 1st General, made an unexpected visit . . . After introducing themselves, they talked with Lindholm for about five minutes. Lindholm commended the work of two Red Cross therapists, Ranson Cooley, and Ralph Rich, HMI . . . they also believe that professional wrestling is losing two good aspects in "Crusher" Cooley and "Angler" Rich. Your ward movie schedule for the week are "State of the Union," "Dream Girl," "Out of the Fog," and "Desire Me" are listed showings beginning the week of December.

Upper Left, P. A. Lankford HMC, Student making an identification picture of Naval Officer. Upper Right, Lt. J. T. Stringer HS, USN Officer in Charge of Naval Medical Photography School. Lower Left, Sam Leviten HMI, student using the Photomicrographic Camera. Lower Center, Tony Canedo HMI, Staff Photographer of Naval Medical School and station "News" publication photographing a gross pathological specimen. Lower Right, R. A. Bredland HMI, Student photographing a clinical subject in Photo Lab.

Medical Photography Highlights Fields of Medicine and Science

Photography is of the utmost importance in the field of Medicine and Science. It is the easiest and the cheapest method of medical illustration. A graphic and historical record of the progress of medicine and science is recorded. This graphic and historical record is used to further the professional education of the officers, nurses and enlisted personnel of the medical department. Through photography, it is possible to place the medical and dental officers, the medical service corp officers, the nurses, and the enlisted personnel side by side with the skilled surgeon in the operating room, at the bedside with the diagnostician, and in the field with the medical units. They are able to witness cases and procedures over and over again and study the various techniques. Here in the Photographic Laboratory at the Naval Medical School, photography is practiced on a large

scale and in a highly professional manner. Black and white and color pictures are made. Still and motion pictures are made of the clinical and surgical cases and procedures; wounds, injuries and diseases relating to the Naval Service and their treatment; pathological specimens and pathological sections and organisms as seen through the microscope. Copies are made of roentgenograms, charts, medical drawings and all important medical and scientific material. In addition to medical photography, the Photo. Lab. is called upon to produce photographs for public relations, public information, architectural records and investigations. Last but not least, all photography in the "NEWS" is produced by the Photo. Lab. Specimens are received from the U. S. Navy all over the world to be photographed and preserved. Recently a portion of a tattered under-

shirt was sent from an outlying base to determine identification of the wearer who had been in a plane crash. Positive identification was made possible through the use of infra-red photography. In order to acquaint one with the work load of the Photographic Laboratory the following figures are quoted for the work performed in an average quarter: 3000 negatives, 2500 Kodachromes, 800 I.D. Cards, 1000 lantern slides, 19,431 prints, 2000 feet of motion picture film and 9100 feet of Photo-stat paper. The commercial value of this work would amount to approximately \$60,000. Also, the Photographic Laboratory offers a course in Medical and General Photography. This course is open to members of the hospital corps subject to approval by the Bureau of Medicine and Surgery. At the present time there are six men under instruction.

Center Command

(Continued from Page 1)

Late in the third quarter "Stockey," whose heads-up ball carrying had made Research a constant scoring threat, heaved a long, high pass to Tillman, and the shifty quarterback snared it and galloped for the victims' first marker. Then Bell made his presence known again by detouring an aerial and romping 60 yards for the final Center counter. This time Partridge was the target for an extra-point pass. Down but far from out, Research came back to notch its second touchdown on a swift drive downfield. Stockstill finally scored on a five-yard Jesse Owens-like end sweep, and English lugged the extra point across on a reverse. Only adroit defensive play by Royster prevented the losers from a last-second tally, as the ace Center back twice broke up Tillman-to-Stockstill passes just as the latter

was about to snatch the pill in end zone. Too much credit cannot be given to the hard-charging Center line, paced by Guy Knapp, Bob Marchand, Anderson, and Partridge. Knapp was particularly outstanding on defense, while Marchand turned in his usual top performance. Statistically, Center had a definite edge. The winners completed 26 of 43 passes attempted, while Research had a .333 mark with 8 completions of 24 tried. There were only six first downs in the contest, four by Center. A sailor on leave in New York got a complimentary ticket to a Broadway musical. Entering the theater, he was taken in tow by an usher who led him skyward, ramp by ramp to the top balcony where he stopped and pointed upward in the darkness. Said the usher, "You'll find your seat up there somewhere. This is as far as I can go. Above this level my nose begins to bleed."

Robbin's Eggs In Ammo Truck

Dahlgren, Va. (SEA)—When naval officers found robin eggs in a nest in an ammunition truck, they ordered them left where they were. The eggs hatched and the young robins, in training for their first "test flight," seem to show no fear of the ordnance center's heavy guns booming regularly less than 100 yards away. (SEA)—Bone is the white foam created at the bow by the forward motion of a vessel. She is said to carry "a bone in her teeth" or "mouth." (SEA)—A mariner who was versed in navigation in the olden days when the practice of the science was considered an accomplishment was called an artist.

Premiere Portrait

(Continued from Page 1)

thought embodied in a verse of William Watson's poem entitled "The Things That Are More Excellent." "The grace of friendship—mind and heart Linked with their fellow heart and mind; The gains of science, gifts of art; The sense of oneness with our kind; The thirst to know and understand, A large and liberal discontent; These are the goods in life's rich hand, The things that are more excellent." In accepting on behalf of the Naval Medical School this portrait—this splendid portrait, this enduring tribute and symbol of erudition, I am afforded a most treasurable privilege and I am mightily honored. That this memory may be perpetuated needs no such reminder, but this portrait will glorify the memory of this man whom the Navy has for long been justly proud—a man who has for long been first on a number of counts—so many counts in fact that their recital would constitute a chronicle of achievement and merit unsurpassed by any other member of his Corps. Suffice it to say that by no means the least important of these counts is the esteem with which he is held in the hearts of a multitude of friends. When worthiness and genuineness of quality and character among individuals comprise the woof and warp of friendship, sustained fidelity is its hallmark. It is gratifying to see such fidelity manifested here. Perhaps no criterion of a man's value is more significant than that reflected by the constancy with which his friends cling to him. This is especially true when his friends compose a group of the calibre I see before me here. A number of this group are former colleagues and associates, tried and proven members of his able and faithful staff of yesteryear. . . . May this portrait of this paragon of enviable values serve as an inspiration to us and to those who come after us. May its symbolic influence be as lasting as it is auspicious and significant and welcome.

Admiral Stitt has left us. He is gone. But, in his departure, he has given to the world his knowledge and his years of work. He has left an everlasting memory as a doctor and as a man. It is with our hearts that we shall remember. . . .

Ground Beetle Battles Pests

(SEA)—Continuing its fight against pests at Pacific bases, the Navy has imported from Africa the ground beetle *Tefflus*, natural enemy of the vegetation-destroying giant African snail becoming prevalent in Hawaiian islands. The beetles will augment the pest-combat program, which includes use of African *Scolia* wasps, enemies of the Rhinoceros beetle, a coconut palm damager.

Gray Uniform Use Extended

(SEA)—Authority has been granted for certain personnel to continue the wearing of the gray uniform until 15 Oct 1949. This pertains only to those aboard ship actually at sea and Reserve personnel not on extended active duty for periods of training duty and drills. The extension was granted by Alnav 61-48 (NDB, 30 Sept. 1948). (SEA)—Bottle Papers are blanks furnished to shipmasters by the Hydrographic Office upon which they state the latitude and longitude, name of vessel and date. They are sealed in bottles and thrown overboard. The date and place of their ultimate recovery furnish valuable information concerning the currents.

Inquiring Photographer

QUESTION: Do you think the service is the place for women?

ALLEN G. JOHNSTON, RMC. Center Communications Office, Responds with:

I am of the opinion that waves in the Service should not interfere with the sea to shore rotation of the male enlisted personnel. The numerical proportion of women to men in the navy is so insignificant that it is possible to employ them aboard stations in a capacity other than military. This should not affect the allotted complement of male personnel in any manner.

WILLIAM J. BERLOVICH, BML, of the N.M.R.I., states:

During the war years the women served their country in an outstanding manner.

The war has ceased to exist and I believe home is the place for a woman. Our Navy has survived for 150 years with men at its helm. I think it not impossible, that it could be so for another 150 years.

ROBERT R. STANTON, HA, Naval Hospital Command:

Women who have enlisted with a navy career in mind and have no intentions of ever marrying definitely have a place in the service. I say this because a woman who is married and in the service will have many more problems to contend with than she would if living in a civilian status. Democracy is based on a home life and it is the mans place to provide for the family. The principle of Marriage is to raise a family and with the wife in the service at one end of the country and her husband at the other end it is not probable that their marriage could last very long. Which has been proven in a great number of cases since the end of the War.

Jennifer Jones Stricken

Jennifer Jones, outstanding Hollywood actress, recently was stricken with an acute attack of appendicitis, and has been making a satisfactory recovery following an operation on November 18. This is of particular interest to NNM personnel, both military and civilian, since the Academy Award winner visited this facility two weeks ago.

Society Hears Lt. Cdr. Denen On Education

Some of the dental officers stationed here are getting to see a lot of the country these days. Lt. Cdr. Denen recently was in Philadelphia where he spoke on Audio-Visual Education at a meeting of the Philadelphia Stomatological Society.

Meanwhile Commanders Oestlering and Frechette were in New York attending a specialized post-graduate course at New York University, and Cdrs. Frates and King were learning the do's and don'ts of chemical warfare at the Army Chemical Center, Edgewood, Md.

Mrs. Ann Jennings, recently transferred from the Hospital Lab at Walter Reed, is the new bacteriologist at NDS.

It's been heard that "Oral Surgery" Baker is now going in for housekeeping and dairying.

Two of the plaster jockeys were mid-wives not long ago in the back of an ambulance, and another one is studying the manly art of Terpsichore. This anonymous customer is doing so well he's winning dance contests already. Another DT makes good!

The other day a nosey news-hound overheard Butler talking about shipping over. As a result of this, many are now looking for the end of the world at any time, but our hero claims that he might "just do that" if he can keep on going down to the National Guard Armory for the dances.

Ask Holland for information on these Beautiful American Marines. The grapevine has it that he's an authority on them. Time to trudge back to the Lab now—but there'll be more next issue.

Readjustment Act Benefits Listed

If you are eligible for the benefits contained in the Servicemen's Readjustment Act of 1944, as amended, because of a discharge or termination of a Reserve-Officer Status, and expect to use these benefits, it should be remembered that eligibility for benefits under this Act is dependent upon your application meeting all the requirements of the law.

Determination of eligibility is made by the Veteran's Administration upon receipt of the application for benefits. Therefore, applications and inquiries should be made direct to VA stations and offices.

In order to furnish Naval Personnel with the necessary evidence of service, Commanding Officers of all ships and Stations were directed to issue a "NOTICE OF SEPARATION FROM US NAVAL SERVICE" (NavPers-553) to Personnel listed in the categories listed below and currently on active duty and it shall also be issued to those who qualify in the future.

(a) Former temporary USN officers who have been reverted to enlisted status, discharged from enlisted status, and reenlisted in USN.

(b) Former temporary USN officers and former temporary USNR officers who have been reverted to enlisted status and were discharged as enlisted men to accept USN permanent commissions.

(c) Former USNR enlisted and USN-1 enlisted personnel who were discharged immediately enlisted on board in USN.

(d) Former USNR enlisted personnel who were discharged to accept USN commission.

(SEA)—Objects whose real names are not known are conveniently called gadgets, when it becomes necessary to distinguish between two gadgets one of them is usually called a gillickey.

WINTER'S approach doesn't seem to bother Barbara Bates, Warner Bros., cinemactress, as she models her new gray and blue swim suit.

Nurses Resign For Careers--As Housewives!

By Eleanor Hullquist

Several more members of the Navy Nurse Corps are currently in the process of leaving the naval service to take up new careers as housewives.

The most recent to be entertained at showers are Miss Jones, who is now Mrs. Peake; Miss Imman, now Mrs. Nelson; Miss Quay, wed Wednesday to Dr. Ventress, and Miss Peterson, who will be married on Dec. 4.

Also, friends certainly haven't missed the wedding ring on Miss Ralston's finger. She acquired this when she went on leave recently.

All of the above are extended heartiest congratulations and best wishes for a happy future.

Another outstanding party was the "Come As You Are" Halloween affair arranged by Misses Schmid and Burda. Who was the ghost that scared the girls into the recreation room without saying a word?

During the party, weird games were played and gruesome stories told. "Witches Brew" was served.

Welcome to the staff is Miss Wolchick, who just reported in from Aiea Heights Hospital, Pearl Harbor, T.H., after 18 months of duty there. She hails from Geanette, Pa., and is working in the Anesthesia Dept. here.

A word of cheer to Miss Morgan, one of our staff nurses now on the sick list.

Eight or ten nurses are singing in the choir which will present a Christmas program next month.

What's happening on the bowling team? It's been said that some of the nurses are in the upper brackets with their scores. Go to it, girls!

Many staff nurses are wondering how much of a tip the auto salesman received for that "job" (new car, allegedly) Misses Hayes and Pohlman obtained. Must have been pretty stiff, since it still takes two to shift gears. Such is life!

Well, that does it until the Dec. 10 issue.

Prisoners Wear 'P' On Garments

(SEA)—Navy and Marine personnel confined in shore briggs will wear an eight-inch white or black letter "P" on their outer garments.

BuPers/Mar Corps Joint Ltr. Pers-52 of 17 June 1948 authorized the letter as a security measure to distinguish confined personnel. The blue and white-striped uniform formerly worn by prisoners-at-large at shore stations has been abolished.

Medical School Wallops Annex Two, Ties For 2nd Place

Annex Two lost its chance to nail down second place in last Saturday's football classic at the Center when it absorbed a 36-13 defeat from Med. School. Carl Norris and his mates ran the opposition frantic with a clever mixture of runs and passes.

Med. School scored at least once in every period, and twice in the first and second frames. Swinko and Caruso each tallied twice as the outclassed losers fell behind, 24-6, by halftime, and never could recover from this deficit.

The top-notch passing, running and punting of Norris, the winner "old pro," stood out as did the play of Leon Burns, Annex Two center, who was a stick-on on both offense and defense.

As a result of Research's loss to Center, loop champ, and Med. School's decisive triumph over Annex Two, Center Command's three closest pursuers wound up in a triple-tie for the runnerup spot, each having a record of three wins and two losses.

The last-place tilt between Naval Hospital and Dental was called neither fielding a team.

Center previously had quelled Med. School's hopes for a title season by grinding out a 38-18 victory over the Lab-men, on November 11, in an Armistice Day struggle.

Royster snagged three touchdowns in that fray, as Bell's chugging, together with the fiery charge of a raging center line, proved much for Med. School, which did manage to score three times.

In another recent contest Research slapped down the Hospital, 27-0, with Stockey and Tillman once again in the starring roles. The patient work Hospital club tried hard but couldn't match the victors' shrewd running game.

Dental forfeited its tiff to Annex Two, the Negro crew's second victory by default this season.

INTRAMURAL FOOTBALL LEAGUE

STANDINGS:

	Won	Lost	Pct.
Center	5	0	1.000
Research	3	2	.600
Med. School	3	2	.600
Annex Two	3	2	.600
Dental	0	4	.000
Hospital	0	4	.000

Sportin' Aroun'

by Clyde Schubert

Another thrill-packed football season comes to a close this Saturday, at least as far as most colleges and universities throughout the land are concerned, and with today's final afternoon of heavy firing on the collegiate grid front comes the annual service classic between the pigskin forces of West Point and Annapolis.

Yep, very soon now the 1948 Army-Navy struggle will be history, and much as this writer hates to say it the Black Knights of the Hudson appear at least two touchdowns better than our hapless Middies in this year's autumnal get-together of the Khaki and the Navy Blue.

Unless Lady Luck frowns angrily on the West Pointers tomorrow it looks like an all-losing campaign for Coach George Sauer's game but too frequently inept Midshipmen.

Anyway, there'll be the usual capacity throng at Municipal Stadium in Philadelphia, and here's hoping the NNM personnel attending the tussle will sit in on one of the year's biggest upsets—yes, you guessed it, a Navy triumph.

In other major grid clashes this Sat. C.S. picks Okla. U. to wind up a great campaign by whipping the Okla. Aggies, Missouri to down Kansas by seven, S.M.U. and Doak Walker to top T.C.U. by one T.D., Michigan State to stop Santa Clara in a close one, and Maryland over West Virginia.

Try your luck on these ten Saturday contests yourselves, mates: Baylor-Rice, Arizona-Marquette, William and Mary-Arkansas, Georgia-Georgia Tech, Miss.-Miss. State, St. Mary's-San Jose State, (watch that one for a surprise!) Tulane-L.S.U., Alabama-Florida, Denver-Wyoming, and Texas Tech-Hardin Simmons.

Here's the NEWS' official NNM intramural football league selection—and I'm ready to run for hills at any moment after you glimpse these.

FIRST TEAM—Linemen: Anderson and Marchand of Center Command—and Burns of Annex Two. Backs: the Center's shifty Roy and "pass-pitchin'" specialist B. along with flashy Stockstill of I. search get the call here. String berths go to forwards M. of Med. School, Knapp of Center and Partridge, another husky Center Command ace. In the backfield are placed Research's Tillman and Swinko and Norris, two notch Med. School ball players.

Maybe this reporter overlooked some other good men, but that's way I see it. Several other spectators at various league games aid in the selections.

Say, those Washington Capitals are certainly burning up the B.A. courts in early-season starts, are they? Don't ask me what happens to Maryland against Justice and North Carolina wrecking crew. Trubbing by Vanderbilt completely disbanded the Terp rootin' tootin' club.

—ODDS AND ENDS—

A big hand to George Roys who led the NNM football circle in individual scoring with 61 points in five frays. Also, we'll long remember Stockstill's stellar halfting for Research all fall.

Have you noticed the horrid number of new post-season Bowl games that are cropping up everywhere? This has got to cease say my observers—even my old school Drake U. got a bid—the Salad Bowl in Phoenix, no less. Oh, my aching back!

Time to dash now—those persistent gents in white coats are heading this way again. Be back with an American college eleven and all-pot teams (both NFL and AAC) next issue. Lack of space prevents printing of collegiate all-American club this time. Bye now!

by Survives Throat Operation

chostomy Operation

removal Of Walnut saves Child's Life

Dianna Kay Bryant, 17 months
daughter of Chief Electrician's
and Mrs. Bruce F. Bryant,
resides at 4 Capstan Green,
Bethesda, Md. She was rushed to the Naval
Medical Center on Tuesday in a serious
condition from what appeared to be
acute bronchitis. The child
arrived on arrival from inability

to breathe. Hurried X-Ray exam-
inations and consultation revealed a
foreign body embedded in the left
lung which was immediately re-
moved by Captain Adrain J. De-
laney, Chief of the Eye, Ear, Nose
and Throat service, by bronchos-
tomy with the assistance of Com-
mander James T. Fowler, Pediatrician.

The recovered object turned out
to be a small walnut kernel which
the parents stated the child must
have eaten Thanksgiving evening.
First indication of trouble came on
Monday in the form of difficult
breathing and slight rise in tem-
perature. By Tuesday morning at
eleven the condition had reached
serious proportion and the child
nearly choked before she could
reach Bethesda and relief.

Chief Bryant has been on duty at
the Receiving Station in Washing-
ton for 18 months as an instructor
in the Electrical Interior Commu-
nications School.

Miss Ella Bullard, ward aid, 4600
Windsor Lane, Bethesda, attendant
shown with Dianna in the above
photo, carried the child in her arms
to and from the clinic where the
operation was performed and acted
as mother and nurse in rendering
post operative care. Dianna had
just completed 24 hours in the oxy-
gen tent when the picture was made.

accompanied by Lieutenant (jg)
John J. Fritz (DC) USN, and Paul
R. Glantz, HN, USN, by quartets,
trios, solos, community sing and by
the Center Orchestra.

Staff Dance Highlights Yule Tide Festivities

The NNMCM rhythm makers will
be swinging it out for the enlisted
men and their guests one more.
They were received with such ap-
plause at their last engagement that
the managers of the swanky club
Gymnastic are booking them for the
17th, a pre-Christmas engagement
offering something sweet, something
swift, full of color, full of fun.

An Exclusive: The curvaceous,
honey-blond songstress, Miss Jean-
nette Vigness, was contracted to
the NNMCM orchestra recently, and
there are good reasons to believe
that she will supply the vocal sup-
port at the coming dance. The way
she handles those notes is terrific!
Music just flows from her lips. When
she sings a torch song, her eyes are
full of "I don't Care Who Knows
It." And the blues—Oh, those ever-
lasting trumpets!—make you want
to stop and cry, but never fear, for
she'll swiftly snap you out of your
trance with a rhythm chucked ditty.
Does she stir your emotions? Come!
See! It's no wonder that the maestro
went all out to engage Miss Jean-
nette Vigness.

What I've heard from various
people: "The band aint bad, aint
bad at all, but that gal—Oh La La."
"Let's dance 'till daylight."

Adm. Swanson Dedicates Lab

Representing the Bureau of Me-
dicine and Surgery at the dedication
of the New Aeronautical Medical
Equipment Laboratory at the Phila-
delphia Naval Base on December
1st, were Rear Admiral C. A. Swanson,
the Surgeon General; Rear Ad-
miral Bertram Groesbeck, Assistant
Chief of the Bureau for Aviation
and Operational Medicine; Captain
H. G. Shepler, Director, Aviation
Medicine; and Captain C. A. Shil-
ling, Director of Medical Science
Division of Office of Naval Re-
search. All were guests of Rear Ad-
miral Pennoyer, Commander, Na-
val Air Material Center, and Cap-
tain J. R. Poppen, Superintendent
of the Laboratory.

After Admiral Swanson, the prin-
cipal speaker, was introduced by
Admiral Groesbeck, Admiral Swanson
spoke on the close liaison be-
tween the Bureau of Aeronautics
and the Bureau of Medicine and
Surgery in connection with the work
performed at this particular labora-
tory.

Major Louis Cukela, USMC

Major Cukela, Marine Hero, Patient Here

Major Louis Cukela, colorful, ex-
plosive, and daring, is a native of
Serbia who came to the United
States in 1913, joined the Army a
year later, bought his way out and
enlisted in the Marine Corps where
he won both the Army's and the
Navy's Medal of Honor for his ex-
traordinary heroism in France dur-
ing World War I. The same act of
heroism also brought decorations
from France, Italy, and his native
Yugoslavia.

The Major, who is a patient on
Tower II at the Naval Hospital,
was born at Spalato, Serbia, on May
1, 1888, a son of George and Johana
(Bubrich) Cukela. The major was
educated in the grade schools of
Spalato, then attended the Merchant
Academy and later, the Royal Gym-
nasium, both for two year courses.
His mother died in 1900 and Major
Cukela immigrated to the United
States in 1913, where he and his
brother settled in Minneapolis, Min-
nesota. His father and three sisters
remained in Serbia.

The major took a course in finger-
printing and Bertillon System oper-
ating and was graduated a qualified
operator. However he soon deserted
that occupation for the U.S. Army,
in which he enlisted on September
21, 1914. He was serving as a cor-
poral in Company "H", 13th In-
fantry when he was honorably dis-
charged by purchase on June 12,
1916.

Seven months later, on Jan. 31,
1917, with war raging in Europe
from a spark touched off in the
major's native Serbia, the immi-
grant enlisted in the Marine Corps.
Following the United States' entry
into the conflict, he went to France
and took part in all the engagements

Xmas Party Scheduled For Kiddies On Dec. 24

Of interest to the Medical Center
Personnel, particularly those with
Kiddies, is the announcement this
week that all preliminary work on
the Children's Party has been com-
pleted. It is anticipated that a large
number of children will be on hand
for the Yule-tide festivities.

If, by chance your child's name
has not been turned into the Chap-
lain's office do so as soon as possi-
ble. The party is for all children of
Officers and enlisted men attached
to the Medical Center; the age limit
is 16.

The party is to be held in the
Main Auditorium on December 24th
at 2:30 in the afternoon and will
last approximately one hour and
half. The schedule includes movie
shorts and cartoons, starring Mickey
Mouse and Donald Duck. Santa will
be on hand to award the children
presents and good things to eat.

Everyone is invited to join in the
spirit of the occasion; come and see
the kiddies as they get their presents
from Santa. Do not forget the time
and date as arrangements are being
made to insure everyone a good time
this happy Christmas eve.

Forrestal Urges Tax Exemption

In a recent press conference
with Secretary of Defense Forrestal
the Army and Navy Register, a
weekly publication of the National
Military Establishment, quoted the
Secretary of Defense in its issue of
20th November, 1948, that he will
ask Congress to continue the \$1,500
military tax exemption until action
can be taken on the recommenda-
tions of the Civilian Advisory Com-
mission on Service Pay.

Officials later stated that the re-
quest will probably be contained in
separate legislation so that it may be
acted upon without delay as soon
as the new Congress convenes. Con-
tinuance of the exemption was con-
tained in an over all tax bill in the
last Congress, but the omnibus mea-
sure did not pass the Senate.

Two Med. School Classes Graduate

The Pharmacy and Chemistry
Class No. 7 held graduation exer-
cises on the 24th of November. A
total of 29 students completed the
six-month course which has won the
reputation of being the toughest at
the Medical Center.

Voice Glee Club Features 'Happy Hour'

Personnel attached to the
Naval Medical Center
component commands will
celebrate a Christmas "Happy Hour"
for all hands and depend-
ents on December 14th at 1900,
from 5 P. M. to all Land-Sailors.

"Happy Hour" is Navy Tra-
dition. In yester-years the "Rec"
encompassed all personnel and
dependents picked talent for a
recreation program. All types
of entertainers were woven into a
program. The show was
presented to the crew. Since
then it had a part in the program,
labeled the "Happy Hour."

The Center falls in with Navy
tradition. Mark a little circle on
your calendar for the 14th of De-
cember and join the season's festi-
val. Special musical features will be
provided by the newly organized
Voice Glee Club, 30 voices, directed
by Hartzfeld, DT3, USN, and

FORTITUDE...

By the time this is read you will probably be "fed-up" with stories about President Harry Truman winning the election, and Navy's football team upsetting Army, but the more I think about it the more I believe we can all take a lesson from these two recent events.

As I sat in the stands at Philadelphia the other Saturday and watched with 100,000 other stunned football fans while Navy refused to be counted out, I thought to myself: this is certainly a lesson for all of us. You can never be blamed for trying and if you try hard enough you can win. All of us have hidden power and strength which we never realize because we never try just quite hard enough.

We seldom begin with a set purpose to win when the odds look too great in front of us. Consequently, although the strength is hidden within us, we never call on all of it. How many times we are licked before we start! Remember the many fights against Joe Louis? Looking back, how many of his opponents beat themselves by fear before they ever entered the ring. And how many times have you fallen down for the same reason. You convinced yourself you couldn't win before you exhausted every possibility of winning.

In the Old Testament there was a "little guy" called David who drew down upon himself the taunts and wisecracks of all, friends as well as enemies, when he said that with a sling-shot and five stones he would knock Goliath's block off. His own king said to him, "Thou art but a boy and he is a warrior from his youth," and Goliath taunted him, "Am I a dog that thou comest to me with a staff? ... Come to me and I will give thy flesh to the birds of the air and to the beasts of the earth." Yet with a flick of the wrist David felled him and cut off his bragging head.

Fortitude is that moral virtue which disposes us to do good in spite of any difficulty. It is made up of many things not the least of which is confidence in ourselves and the refusal to be awed by difficulties. Harry Truman had it during his campaign; Navy had it the other Saturday in Philadelphia, and anyone who succeeds in life must have it. Get your teeth into what you are going after and don't let go until you win.

If you are not strong enough, if things are almost too tough, then there's a Man Upstairs who tells you: "Ask and you shall receive; seek and you shall find; knock and it shall be opened unto you." What you can't do by yourself God will give you the grace and strength to do. He will give you that extra charge when you need it, that extra yard for a first down and carry you through to ultimate victory. Confidence in yourself and your own abilities; confidence in God and His Divine Help, and you will have that fortitude without which you will be a pushover in the game of life.

Michael J. MacInnes, Chaplain, USN, NNMIC

CHEST DRIVE OVER TOP

The DRIVE for 1949 Community Chest funds at the National Naval Medical Center was successfully completed on November 23, ten days ahead of the official close of the campaign, with the following standings by component commands.

	Quota	Total Contributions	Percentage of Quota
NatNavMedCen	\$1,215	\$1,384.87	113.98%
NavHosp	2,630	2,542.12	94.8

NavSchHospAdm	305	311.19	102.02
Totals	\$6,081.00	\$6,123.60	100.7%

Each of the commanding officers takes this opportunity to express his sincere appreciation for the efforts expended by workers in this campaign and for every contribution received. It is particularly gratifying to note the commands worked so closely together as a team toward the common goal, as demonstrated by the individual percentages attained.

The current drive required a longer period of time and considerably more effort than last year to arrive at approximately the same position in the 100% column (1948—100.3%; 1949—100.7%) but the extra push makes victory that much more enjoyable. It is a nice thought that through our efforts we have been neighborly.

Compounding Drugs

Meet Your Commanding Officer: Captain Leslie O. Stone

(This is the second in a series of articles on individual Commanding Officers of the various commands comprising the National Naval Medical Center.)

Currently in his third year as Commanding Officer of the Naval Hospital, largest command on the compound, is Captain Leslie Ogburn Stone, MC, USN, who has better than 30 years continuous service in the United States Navy behind him.

Every day Captain Stone, a tall robust man with administrative ability, experience, judgment, and insight into the problems of others equal to his enviable physical stature, tackles the myriads of tasks confronting him with tremendous energy and enthusiasm for his work, and the way in which he accomplishes things is equally enviable and to be marveled over.

Appointed Lieutenant Junior Grade in the U.S. Naval Reserve Force immediately after graduation from Medical School, he was transferred to the regular Navy as a Lieutenant in 1920. Progressively promoted, he attained the rank of Captain on June 16, 1942.

Down through the years the North Carolina native's individual speciality has been Eye, Ear, Nose, and Throat work, and it remains his first love in the field of medicine.

During his first years in the Navy Capt. Stone served at the Naval Hospitals at Norfolk, Va., and Great Lakes, Ill., and also did duty as a Junior Medical Officer aboard a transport.

Later he was medical officer on the USS BUFFALO in both the Pacific and Arctic regions, and Senior Medical Officer of the USS PALOS on Yangtze Patrol (Chungking), until late in 1923.

Then came service as an EENT assistant at the hospital in Norfolk, and postgraduate instruction in EENT in New York in 1925-1926, following which he served successively as EENT department head at Bremerton, Washington Naval Hospital, aboard the hospital ship USS RELIEF, and at the USNH, Chelsea, Mass.

From 1933-35 he was S.M.O. on the USS NEW ORLEANS and then reported to the University of Pennsylvania for instruction.

V.F.W. Show To Play At NNMIC

A top-flight Variety Show will be presented in the Center auditorium from 6-8 p.m. Wednesday, December 15.

This rollicking, fast-moving extravaganza, sponsored by the Military Order of the Cootie, Pup Tent No. 5, Silver Spring, Md. Post of the V.F.W., will feature the music of Howard Williams and his orchestra.

As yet other acts in the show, which has a running time of about two hours, have not been announced.

Officer: "Have you swabbed the deck and polished the brightwork?"
Sailor: "Yes sir, and I've swept the horizon with my binoculars."

N. H. Pharmacy Fills 6000 Prescriptions

What goes on in the Hospital Pharmacy? This department is very swift and smooth sailing ship and is manned by a very courteous and conscientious crew—Ambrose, Wilkinson, Martin, Hickey, Pruitt, Dunnock, and Cowley. Eager and hard-working Harry Welinski is on leave and upon termination of the furlough, he will be discharged.

The pharmacy fills prescriptions for all the commands of the National Naval Medical Center, for surrounding activities, and for dependents that are referred to the hospital. About six thousand prescriptions are filled monthly. To cope with the great demand for medicines such as alcohol, tincture of green soap, elixirs, and cough medicines, liquids flow nearly as free as does the Potomac River. Fifty gallons of tincture of green soap, sixty gallons of alcohol, gallons of cough syrups, tinctures, and elixirs are dispensed weekly.

A complete reference library of pharmaceutical subjects is available and current literature pertaining to new and experimental drugs is maintained in the pharmacy file.

Whenever anyone is in doubt as to where or how something is obtained, he calls the pharmacy. From cleaning gear and wrapping paper—to a date with a blonde, "Call the pharmacy, they'll tell you."

Four States Approve Bonus For Veterans

As a result of action taken by 11 voters on November 2 in certain States veterans of World War I claiming legal residence therein may be given a bonus if the States concerned later vote the money.

In the case of Iowa veterans may be given \$10 for each month of domestic service; \$12.50 monthly for overseas service; maximum, \$50. A minimum of 120 days' service between September 16, 1940, and December 31, 1946, is required. Veterans must have had legal residence in the State for at least six months immediately before entering service. Provision for a flat \$500 to war widows is also included.

In the case of Louisiana overseas veterans may be given \$250 if they served between January 1, 1941, and March 1, 1946. For domestic service payments run from \$50 to \$150. War widows may be paid \$1,000. Legal residence at time of induction is required.

In the case of South Dakota a minimum of 90 days' service between December 7, 1941, and September 2, 1945, is required. Veterans may receive 50 cents a day for home service up to a total of \$500 and 75 cents a day for foreign time up to a total of \$650. Legal residence of six months in the state prior to entering service is required.

In the case of Washington state veterans may be paid \$10 per month for domestic service, \$15 for overseas time, all between December 7, 1941, and September 3, 1945. One year of residency immediately before entering service is required. Apparently at this time the law enacted for the Washington state veterans requires some interpretation as eligibility hinges on men re-enlisting after discharge.

Veterans desiring further information on the matter of bonus payments should communicate with The Adjutant General of their state whose office is located at the capital city of the state concerned.

Patients' Corner:

Watch Your Etiquette at Movies

By Thomas W. Burke

Although Managing Editor Bill's recent editorial advice that "etiquette is Golden" in the movies intended primarily for NNMC personnel, it is our belief that we and VA patients should take it as well.

It is recognized that a movie palace constitutes a large scale social problem and has developed a type of individual commonly known as the "Movie Jerst."

Oddly enough, it was a Navy vet who recently sounded off on various humans who make life miserable for the average theater patron.

In an interview with the Associated Press, this veteran, himself a theater manager, listed the following "Jersts":

Knee Nudger—He likes to shinny the back of your seat with his knees. By the end of the show you are as though you've taken a vibration course.

The Barker—This bush-league jerk-it-all has to comment on the picture. He's the guy who says "You'll be sorry," in the middle of a tender wedding scene, smacks his lips noisily when the stars go into a clinch).

Seat Arm Monopolist—He demands full right to both seat arms and will jab you until he gets his

Spinn Prankster—This lame brain takes pleasure in leaving chewing gum on seats so the next squatter gets stuck. The offense should be made a felony.

The Shifter—He's the guy in the middle of who does a sitting Vitus dance.

Seat Sprawler—This lanky lad takes a diameter of three seats in all directions. He should be given a foot.

And here are a few from our own book:

Laughing Hyena—After a humorous sequence, he undergoes a spasm of laughter that drowns out the dialogue for the next full minute. Quiet is only after the familiar warning from the MA—"Knock it off."

The Critic—When a film doesn't live up to his approval, this would-be intellectual loudly announces his criticism to the audience by booing, whistling or giving forth with a few chosen remarks.

High Hurdler—When this lad sees his buddy sitting three rows behind him, he shows off his athletic prowess by vaulting over the intervening rows to join him.

Bit Stampeder—Ten seconds before the feature ends the boy charges up the aisle, touching off a lit fuse that creates a bottleneck of exits and prevents wheelchair patients from being moved out first. Well, let's not worry about it, for we aren't movie jersts.

MAJOR CUKELA

(Continued from page 1)

which the Fifth Marines fought. He was awarded both Medals of Honor for the same action near Iwo Jima, on the morning of July 18, '45, during the Soibei engagement. The 66th Company, Fifth Marines in which Major Cukela was a gunnery sergeant, was advancing through the Forest de la Cruz when it was held up by a strongpoint. Despite the efforts of his men, the gunnery sergeant crawled out from the flank and advanced alone towards the

Upper left hand picture shows Lt. R. F. Hooper, MSC, USN personnel officer. Upper center, Shirley Harman and Mr. C. E. Holmes (ex-Sailor). Picture on upper far right is Miss Patricia McCarthy, secretary to Lt. Hooper. Lower center picture (left to right) Bennie Maestas HM1, John L. Karrer, HM1, Claude T. Frasier, HMC, and Wendel McLaughlin, HM1. Lower picture Herman Campbell, HMC, USN.

New Personnel Unit Combining All Commands Proves Success

On 1 June, 1948, the duty stork proudly brought forth the latest "Baby" of the National Naval Medical Center in combining all of the personnel offices attached to the Center. This baby, which on the first day of December proudly celebrates its Anniversary of six months, was duly christened the Consolidated Personnel Office.

Along with the Christening ceremonies, Lt. R. F. Hooper, MSC, USN, was welcomed as the Personnel Officer, and Lt. (JG) E. J. Morel, MSC USNA, as the Assistant Personnel Officer. Both of these officers came well qualified to launch the career and set the course for the new offspring, having held similar positions in the past with much credit to themselves.

The functions of the Consolidated Personnel Office, are many and varied, but comprise all of the work for each individual person of each command, as was formerly done in the commands themselves. This of course, embraces some 1200 enlisted men and 450 Officer and Nurse Personnel. The type of work is similar to all personnel administration and includes for enlisted men, leave, foggie increases, reenlistments, separations, transfers, receipts, reimbursement orders, medals, commuted rations, some forty reports covering daily, weekly and monthly periods. Important too, but more desirable among the reports, the old ogre of sea duty reports comprise

the general phase of work. In the execution of these there is always leave, and in most there is always some type of pay or subsistence involved.

At the present time there are five Chief Petty Officers, six Hospital Corpsmen First, one Hospital Corpsman Second and nine civilian employees attached to and working in the Consolidated Office.

The office handles all six of the National Naval Medical Center Commands and is divided into eight sections. These sections are: the Officers Section wherein we find Carl E. Holmes, formerly of the Medical School, DT1 Anthony Mustyan, formerly of Dental, Mrs. Eileen White, also from Medical School and Mrs. Helen T. Tew, from the U.S. Naval Hospital. The separation Center and Reenlistment sections finds HMC Russell Alfonso Valentine Alexander, Jr., and HMC Lyle J. Richards hard at work shipping 'em over or letting 'em go.

The transfer Section brings into view HM1 Bennie Maestas an NMRI alumni with able and capable "Jerri" Andrus alongside. The receipt section has two eager beavers in Mrs. Bernice L. Wadas and HM2 Clayton W. Goodman. Both Miss Andrus and Mrs. Wadas are from Dental, and Goodman speaks the Medical School language.

If you suddenly get a notice to run up to room 300 in Med School for a quick Tetanus or Cowpox booster,

you have only HMC Claude Frazier to thank since we find and pass him hard at the task in the Health Records Maintenance section.

HM1 Wendel McLaughlin, Mrs. Mildred Swank and Miss Shirley Hartman have the task of keeping up these little yellow HC-3 Cards, and the HC-4 monthly reports. Mac is the NNMC contribution to the Office, while Mrs. Swank came to us via the Naval Hospital. Miss Hartman just sort of sneaked in by the simple expedient of catching a Washington (DC that is) bound train from Iowa.

The BuPers section is well under control of HM1 John L. Karres ex Naval Hospital, Miss Mary Jane Koerner ex Med School, and Mr. John R. Astern, formerly USN now retired. The Diary desk, a part of this section is under the typing hands of Mrs. Ann Digeon, formerly of NSHA.

So now we have arrived at the enlisted General File room where we see sitting, and uh, filing, none other than HMC H. Edwin Campbell, known as "Ding How," who came to us via Tsingtao, China.

For last, we have saved the most important to us the man who, on naval stations and aboard ship is affectionately known as the "Leave Yeoman," of course here in the Consolidated Personnel Office we simply refer to HMC Lyle S. Schmitz as "Our friend Smitty"—this of course automatically means Leave. . . .

Gray Ladies Help Patients With Shopping

By Eleanore Borland

If you are a bed patient and you are wondering how you are going to get your Christmas shopping completed let us help you solve that problem. Almost every day and several evenings each week you will see the crafts gray ladies on the wards with their carts filled with crafts samples and materials for patients to make many interesting articles.

Now for Dad you might get a pair of leather slippers and Mother would be pleased with a set of lacy string table mats which are made quite easily on a metal frame.

Aunt Susie would love a pair of shell earrings and a lapel pin and Uncle Bill may need a new billfold or a sport belt.

For all the young ones in the family including teen-agers the felt monkeys, bambis, ponies, camels, and elephants are most welcome.

There are many other simple but attractive projects. Everyone appreciates a handmade gift and people are becoming more and more interested in crafts or hobbies so now is your chance to acquire a new one.

The crafts gray ladies will be glad to give you instructions for the gifts you wish to make and the materials are supplied to you by the American Red Cross.

Beckman Takes EEG Training

Another new face around the hospital is that of Lt. E. L. Beckman, MC, USN, who reported aboard from the Naval Air Station, Pensacola, Fla.

Dr. Beckman will undergo a six-months course in Electroencephalography under Dr. Robert Cohn of the Naval Hospital.

Arriving November 22, Dr. Beckman and his wife have found a home in Silver Spring, Md., and are planning to live there during his period of instruction.

record of either wound at the Navy's Bureau of Medicine and Surgery, he was never awarded the Purple Heart. The first wound was suffered at Jaulny, France, in September 16, 1918 during the St. Mihiel engagement.

His last years in the Marine Corps were spent at Norfolk, where he served as the post quartermaster. Retired as a major on June 30, '40, he was recalled to active duty on

July 30 of the same year. During World War II the major served at Norfolk and Philadelphia. He finally returned to the inactive retired list on May 17, 1946.

The Marine hero was married to Minnie Myrtle Strayer of Mifflintown, Pennsylvania, at Washington, D.C., on December, 22, 1923. The couple have no children. They make their home at 5508 Johnson Avenue Bethesda, Maryland.

Admirals Drop First Three Tilts

By Clyde Schubert

Courage and fight proved poor substitutes for experience and ability as the NNMCC cagers dropped their first three contests of the season recently, falling before Quarters "K", the powerful Quantico Marines and Walter Reed Hospital, in that order.

Despite good performances by Paul Harmer and Jack Levi, the only two consistent scorers on the Naval Medical squad to date, Coach F. E. Frates' green ball club proved no match for Quantico but did somewhat better against its other two early-campaign opponents.

Off to a slow start, the NNMCC five came back with a spirited second-half drive against Walter Reed's rangy crew but still emerged on the short end of a 55-38 count. Harmer notched 14 points and "Black Jack" Levi 11, but the rest of the home boys couldn't locate the hoop.

The night before, all creation broke loose on the Admirals as Quantico's well-drilled quintet slaughtered a gallant NNMCC outfit, 102-19, in what wasn't too bad a game at halftime, at which point the Marines led, 40-16.

But then came the tornado. Only a field goal by Levi and gift toss by Harmer prevented the Fratesmen from being completely blanked in the nightmarish last two periods. All in all, it was a great evening for the star-studded Marine Corps juggernaut.

On November 30 the Naval Med. basketballers launched what promises to be an interesting if nothing more 1948-49 court campaign here by bowing 80-43, to a flashy, fast-breaking Quarters "K" aggregation that ran the locals ragged with a withering bucket barrage.

Trailing, 36-24, at the intermission, the inexperienced Center courtsters fell farther and farther behind in the late stages as Quarters "K" connected from all angles. Tops for NNMCC were the alert Harmer with 15 tallies, and Levi, who made one less.

Another stickout in a losing cause in the initial three frays was Pat Partridge, burly guard, who fought his heart out on rebounds, and turned in commendable floor games.

Rec. Station Clips Admirals, 56-36

Tiring badly in the last five minutes, the NNMCC Admirals dropped a 56-36 decision to a rugged Receiving Station five there Tuesday night, for the losers' fourth straight loss of the season.

The score by quarters was 15-10, 24-17, and 36-26, NNMCC never leading, as a fourth-frame drive wilted the Naval Medical club. It was only 32-26 late in the third stanza of the PRNC loop contest. Paul Harmer notched 15 points to pace NNMCC, while Funk and Glunz rebounded well throughout.

Last night the Admirals battled the Marine Corps Institute cagers here. Tuesday they travel to Anacostia to test a strong Naval Air Station quintet, then entertain Patuxent River NAS Thursday.

GRADUATION

(Continued from page 1)

Also holding graduation exercises at the Medical School was the class in Medical Photography which graduated the first of December. Six students completed the six months course of intensive training in all aspects of medical photography. Top man in the class was John M. Simms, HMC, USN.

N.N.M.C. Admirals sink a basket in their game with Quarters "K" as players from both squads watch. Quarters "K" won, 80-43.

Kaplan's Kapers

By Jerry the Joker

Greetings gates, let's congregate—around this kolyum, that is.

Best we get down to the business at hand—Shoot, you're faded.

Three rough 'n tough rustlers just in from the badlands, strode noisily into a Tombstone cafe. A Waitress hove into view, and here's how the conversation went:

1st Cowpoke: "Gimme a steak—and make it raw."

2nd Wrangler: "Make mine a steak, too, and twice as raw as his."

3rd Cowhand: "Just cripple a calf and run it through this joint slow like—I'll get my own."

★ ★ ★
Les McCabe: Boy, is my girl ever a knockout.

Wild Bill Walter: "Remember, beauty is only skin deep."

Mad Man Mc.: "Yeah, I know, but who wants to date skeletons?"

RIDDLE CORNER—Here's a 4 star one—What color is a very young ghost? *ANS.*—Baby boo, of course. And, what color is a loud belch? *Easy*—Deep Purple. Here's another one—What did the first casket say to the second casket? *ANS.*: Is that you, coffin? (Thanks, Dr. Nies).

★ ★ ★
Confucius say: A sailor is the only person who rolls when he walks. Others do it from a kneeling position.

★ ★ ★
Lover Levi: "I've got plenty of women just pulling their hair out to go out with me."

Muscles McGehee: "How come you never date any of them?"

What-a-man Levi: "Who wants to run around with bald-headed women?"

In case anyone is dissatisfied with any of the foregoing material or has any complaints or libel suits to register against me kindly correspond with the author at the following address: C.W.K., Ser. No. 1234567, Outpost 1.4, Oasis 678, Camel 3, French Foreign Legion, c/o Anaheim-Azuza-Cucamonga, Syria Robusta. No COD's accepted. I hate fish.

Eleanor Wants Xmas To Come In A Hurry

By Eleanor Hallquist

Won't Christmas ever get here? I can't stand the perpetual drumming of "leave," "leave," "leave," "Christmas leave," "duty on Christmas leave," "duty on Christmas—NO!!" "duty on New Year—NO!!" that confronts me every time I draw the Iron curtain at the Nurses Quarters. These are the topics devulged, discussed, and re-iterated lately. On the discussion list there is also the arrival of a new nurse that gives rise to much interest.

For the benefit of the girls who haven't been introduced to the new nurse, I will attempt a little case history. Her name is Miss Marsha Forsythe, a native of that ever popular Jersey City. She received her education, at the Snyder High School. After graduation, Miss Forsythe entered the Christ Hospital School of Nursing. Upon completion of her course and receipt of her diploma, she entered the Navy Nurse Corps.

October 1942 saw her reporting to the U. S. Naval Hospital, Brooklyn, N.Y., for her indoctrination period. From that month up to her arrival at the Medical Center, Marsha's Navy career has been variegated and colorful. She has travelled far and wide, serving at almost all the Naval Hospitals in the country, plus 18 months at Milne Bay, New Guinea.

After such a long and exciting career, we hope she will enjoy her stay here at the Naval Hospital.

Miss Antoinette Jameaga will spend "Christmas in Connecticut" with her family.

I close the curtain of mystery at the Nurses Quarters until the next issue of the NEWS.

CAPTAIN STONE

(Continued from page 2)

After that he was head of the EENT departments at Norfolk, and Canacao, P.I., and the Naval Dispensary, Washington, D.C. The early months of World War II saw him at the Naval Air Station, Bermuda, as S.M.O.

Then back to the States he came, first as Executive Officer of the USNH, New River, N.C., and the next year as S.M.O. at the Sub. Base, New London, Conn.

Detached from New London in July of 1944, he later was MOIC at the Naval Hospital, Pearl Harbor, T.H. until after the Japanese surrender. He was awarded the Legion of Merit for exceptionally meritorious service from August 17, 1944, until September 2, 1945, at that hospital.

After some 10-11 months as MOIC at the USNH, Aiea Heights, T.H., he came here to take over his present post, on September 6, 1946.

He and his wife, Irma Rose, whom he married in 1938, reside at Quarters "C", NNMCC, and list their official address as Kittrell, N.C. Both are very devoted to Pooch, a sprightly wire-haired terrier, who was born in September of 1938, in the Philippines.

Dr. Stone is a member of the American Medical Association; a fellow of the American College of Surgeons and the American Academy of Ophthalmology and Otolaryngology; and a member of the Board of Otolaryngology.

Once a highly-regarded first baseman on the baseball diamond, the 53-year-old Commanding Officer has gone in more for tennis and golf in later years, and has a "fair golf game."

More recently he has replaced his activity in these sports with a consuming interest in vegetable gardening, and likes to "just putter around, you might say" a great deal.

Left to right—Mrs. Charles L. Helwig, and her baby boy, Mrs. Pearl and holding the birth certificate is Miss Fogarty.

Life Begins At N.N.M.C.

"A baby in the house is well-spring of pleasure, a messenger of peace and love, a resting place for innocence on earth, a link between angels and men."

R. W. Crow, HMC, of the Bio-Chemistry Department became a proud father of a seven-pound, 15 ounce baby boy on 29 November. Chief Crow was so excited over the event that he went out of his way to pass out candy and cigars to his friends.

How's Your Diction? Well Try This!

Any intern, resident, or staff medical officer in the hospital whose answer is a justified, unqualified "yes" might stop reading here.

For others who believe they might say it better, it is of personal interest to know that a speech course, designed to help the doctor improve his vocal personality and professional effectiveness, is now in progress as a part of the Graduate Training Program in the Naval Hospital.

The first of a series of such courses, conducted by Professor Stevens of the Speech Department, George Washington University, is now in progress. This class meets each Wednesday evening from 1800 to 2000, and the course consists of ten such two-hour sessions.

All medical officers under training will take this course, and it is anticipated that staff officers, including nurses, will be interested in this excellent opportunity to improve their speech abilities. The present plan is to repeat the course throughout the year as a regular part of the training program.

The beginning of the next speech course will be on or about January 27, 1949. The enthusiasm of the first class taking the course is manifest even though it does consume a few of those rare free-evening hours.

As an example of current successes in this class, we think you should know that in his presentation of a talk designed to explain clearly in three minutes some duty or hobby, one of our Neuropsychiatry residents did an excellent job of telling the Why, When and How of three-cornered pants for the "juniors" at home. Congratulations, Dr. Burnham!

(SEA)—The watertight compartment in which the rudder head works is called the rudder well.

It's better for a sailor to get something in his eye and wink than to wink and get something in his eye.

Dental Grads Return Here For Courses

Many of the graduate students in general dentistry have returned here for a course in prosthetics. There are many new faces added to the old, but, to new as to old, we spread the carpet of friendship, and to a heart-felt WELCOME.

Dr. F. E. Jeffreys, now attending a post graduate course in dental prosthetics at N.Y.U., visited us recently. Prosthetic students will remember him for his able handbooks pertaining to the subject. By simplifying the intricate techniques, Dr. Jeffreys presented comprehensible as well as interesting material to the student. May he soon return to us.

Success to Dr. K. R. Pfeiffer in his new endeavor. The doctor will present a clinic entitled, "Use of Elast Impression Material for Gold Inlays, Crowns, and Fixed Bridges at Louisville, Ky., where he will be guest of the Louisville Dental Society.

The Christmas spirit seems to be surging in the minds of most men here. If I could peer into their minds I imagine I would discover good natured warmth in rooms decorated in green and red gurgaws, smelling of spruce and savory things to eat, with soft carols filling the atmosphere.

A Merry Christmas and a Happy New Year

Adm. Willcutts Extends Xmas Greetings At Happy Hour

The Christmas "Happy Hour" program, which was held here at the Medical Center on 14 December, proved to be a huge success. One of the highlights of the occasion, which commenced the yuletide festivities, was the Christmas Greetings by Admiral Morton D. Willcutts.

This Christmas Happy Hour is a delightful occasion. We thank to our good chaplains who conceived the plan, and who, with the help of various committees in our component commands, developed so well this program.

Understand the program will feature the National Naval Medical Center orchestra, our glee club, and a variety of solos, quartets, trios, and organ duets, as well as community singing.

We are honored by the presence of the Cheverly Community Church. We are indebted to directormeister.

The Happy Hour idea is unique in the Navy, so early in the Yuletide season, start our celebration of the Day that marks the birthday of

(Continued on Page 3)

Special Xmas Services In Auditorium

In anticipation of the Feast of the Nativity of Our Lord, the following program of Catholic and Protestant Religious Services is

There will be a Solemn High Mass at midnight, Christmas Eve, and Masses on Christmas Day, all in the Auditorium. Masses on Christmas Day are scheduled for 8:00 and 8:30. Staff personnel, and visitors are cordially invited to attend.

A sermon at the Midnight Mass will be preached by the Reverend Father Hilary Hobrecht of the Order of Friars Minor, of Santa Barbara, Cal. Father Hobrecht will present a student in the Speech

(Continued on Page 4)

St. Nick Has the Duty

'Twas the night before Christmas, the barracks was still.
The sailors were sleeping as most sailors will.
The seabags were hung by the lockers with care
In hopes that St. Nicholas soon would be there.
The men were all peacefully dreaming in bed,
As visions of liberties danced in each head.

The chief in his skivvies and I in my sack
Had just come from town with a quick midnight snack.
When out on the deck there arose such a roar,
I ran to the porthole to find out the score.

I pulled up the shade and I started to shout,
"Just what in the heck is this noise all about?"

A moon made for boondocking shown on the snow
It was pretty cold out, about 7 below.

What I saw looked like one of those carnival floats,
'Twas a rainbow drawn smartly by four Navy goats.

In the boat was a man who seemed quiet and moody,
I knew in an instant St. Nick had the duty.

As quickly as Monday, his billygoats came;
He whistled and shouted and called them by name.

"Now, Perry, now, Farago, Dewey and Jones."

"What's the matter, John Paul, you got lead in your bones?"

A little to starboard, now hold it up short,
No fluffing off now, or you'll go on report."

As a squeegee goes over a new coat of wax,
Leaving a wide shiny path in its tracks.

So out in the moonlight, the little boat stopped.

St. Nicholas stood up and the anchor was dropped.

The goats' breath was white in the frosty night cold.

They made quite a sight dressed in blues trimmed with gold.

I opened the porthole quite narrow and round,

The old Saint hopped in with a leap and a bound.

He was in his dress reds, and they fit like a charm.

Had lush marks that covered the length of his arm.

The gifts to be issued were all in his pack.

Beat me how he got in with that on his back.

His eyes—they were watering, his nose caked with ice,

He wiped it with Kleenex, then sneezed once or twice.

He opened his mouth and started to yawn,

It looked like the sun coming up with the dawn.

The stump of a pipe he held tight in his teeth,

And took a small nip from a bottle beneath.

He wasn't so big but he must have been strong

I figured. He'd been in the service so long.

He was chubby and plump, a right jolly old tar.

He said, "Evenin' matey, here have a cigar."

He filled every seabag with presents galore,

Tossed a whole pile of discharges there by the door.

Then out through the porthole and into the night.

The snow had stopped falling. The landscape was bright.

With an "Anchors Aweigh" he climbed into his place,

A broad smile was creeping all over his face.

One look at his watch and he started to frown,

"This night shift is certainly getting me down.

Merry Christmas," he said as he drove on his way.

"Now I'll finish my rounds and sack in for the day."

Turkey, Ham Feature Big Christmas Day Menu

For the benefit of all personnel who will be on hand to join in with the Christmas festivities here at the Medical Center, Lt. W. W. Smith, Commissary officer, is pleased to announce the Yuletide Menu, which is listed below:

Olives, pickles & Celery Curls
Cream of Tomato Soup
Saltines
Roast Maryland Turkey
(basted with wine)
Roast Virginia Ham
(with wine and raisin sauce)
Savory Stuffing Giblet Gravy
Cranberry Sauce
Candied Sweet Potatoes
(home style)
Fresh Frozen Lima Bean in Butter
Hearts of Lettuce
1000 Isle Dressing
Hot Rolls Butter
Rum Raisin Ice Cream
Brandied Fruit Cake
New England Mince Pie
Asst. Fruits Asst. Nuts
Hard Candies Cluster Raisins
Cigars Cigarettes
Coffee

Doctors Marsh And McNamara Join Staff

Two recent acquisitions to the staff of the Naval Hospital are Cdr. Dr. Wm. C. Marsh, MC USN, and Cdr. Dr. Philip J. McNamara, MC USN, both of whom arrived here for duty early last month.

Dr. Marsh comes here to head our Dermatology and Syphilology department, while Dr. McNamara is specializing in General Surgery.

Brand new to the NNMCMC, having arrived on November 10, Dr. Marsh is 34 years old, married, and has three children.

They and his wife Ellen came here with the doctor from the University of Pennsylvania, where he completed eight months of graduate training in Dermatology and virus diseases of the skin.

Dr. Marsh, who someday hopes to head a teaching service in his chosen field, is one of three Diplomats of the American Board of Dermatology and Syphilology in the Navy at this

Christmas 1948 . . .

It is CHRISTMAS. It is the time of cheery greetings when the warm glow of love spreads abroad. It is the time when, more than any other, we appreciate home and wish to be with our families; the time when we see less of bad and more of good in our fellow-men; the time when peace comes briefly to a world that knows no abiding peace.

On this day we hasten to Bethlehem, we kneel beside the manger, we worship the infant Jesus, and then . . . ? Alas, Christmas ends right there for some people. How limited their pleasure must be, how incomplete their joy.

There is more to Christmas than the rosy emotion stirred once a year by thoughts of a child born in a humble stable. We could feel that way about any normal infant. What is needed here to put the manger scene in proper perspective is *belief*. The full measure of gladness comes only when we *believe* that this particular child is the Son of God, that He was sent to redeem us from sin, to restore unto us the joy of salvation through His Gift on Calvary.

Belief is an active thing. It will not let us be content with keeping this great news to ourselves. We read that the shepherds "made known the saying which had been told them concerning this child." He was

*The Patriarchs' Joy, The Prophets' Song,
The heavenly Dayspring, looked-for long.*

This was news the world had waited ages to hear. Moreover, the angel had said the tidings were for all men so the shepherds told it wherever they went.

Now, in this year of grace, Christmas comes again. On this day we hasten to Bethlehem, we kneel beside the manger, we worship the infant Jesus, and then . . . we *believe* that unto us is born a Saviour, and we tell the story until *all* men believe that He Is Christ The Lord, The Prince Of Peace. THIS IS CHRISTMAS.

Chaplain, U. S. Navy

Normal Duty Tours For Navy Personnel At Overseas Bases Range Up To 2 Years

Tours of duty for naval personnel at overseas bases have been set from six to 24 months in length, according to the bases to which personnel are assigned.

The number of months established as a normal tour of duty at an overseas base does not include time in transit to and from the establishment.

The chart shown below lists the lengths of tours at various installations.

Area	Locality	Months for Normal Tour
Alaska	Kodiak	18
	Adak	18
	*Attu	6
	Pt. Barrow	12
Japan		24
Marianas	Guam	18
	Saipan	18
	*Kwajalein	12
Okinawa		18
Philippines		24
Samoa		18
China		24
Hawaiian Is.	Oahu	24
	Midway	18
Greenland		9
Argentina		18
Bermuda		24
Caribbean and Panama		24

NOTES

* Although the length of a normal tour of duty at Attu and Kwajalein are 6 months and 12 months, respectively, personnel will be rotated to another locality in those areas until 18 months have been completed.

• Line officers assigned duty with Island Government Activities will complete a normal tour of duty of 24 months.

• A normal tour of duty in the

Eastern Atlantic and Mediterranean area is 24 months in all localities except Bahrain. Officers assigned duty at Bahrain will have a tour of duty of 18 months. Enlisted personnel will be rotated between Bahrain (Arabia) and Cairo as directed by Commander in Chief, Naval Forces, Eastern Atlantic and Mediterranean.

• Enlisted men assigned duty within a Trust Territory will have a normal tour of duty of 12 months with the exception of those listed above.

• Enlisted medical and dental personnel attached to Fleet Marine Force and all other branches of naval service serving in any Pacific Ocean areas will serve a normal tour of duty of 24 months. This does not apply to medical and dental personnel serving in ships in the Pacific.

• Tours with naval attaches, naval missions and other special groups will be established individually. These categories will not be affected by the table above.

A one-year extension beyond the normal tour of duty will be granted normally to those officers and enlisted men who apply for such to the Chief of Naval Personnel or the Service Force Commander. In such

Women In U.S. Navy

Capt. Vincent Hernandez Anticipating Retirement

The long and colorful naval career of Captain Vincent Hernandez, Executive Officer of the Naval Medical School and son of the late Hon. J. C. Hernandez, Chief Justice of Porto Rico, will come to a close soon, as he plans to retire from active duty, in the near future. Captain Hernandez has completed over thirty years of active Naval service.

Because of his ability to speak the Spanish language fluently, Captain Hernandez has made many contacts and acquaintances, both personal and in the line of duty, among officials and dignitaries of South American Governments. In 1941, he accompanied a group of officials consisting of the Chiefs of Naval General Staffs of eleven South American Republics on a ten-week tour of military and industrial installations in the United States. He served as Medical Officer for the group and as aide to the Admiral of the Uruguayan Navy.

Captain Hernandez graduated from the Georgetown University Medical School in 1918 and served his internship at the U. S. Naval Hospital, Brooklyn, N. Y. He also served at the Naval Hospitals at Chelsea, Massachusetts, and Washington, D. C. During World War I, he served on the transports U.S.S. Huron and U.S.S. Pocahontas. In addition to duty on various destroyers, cruisers and tenders, Captain Hernandez served at the Naval Mine Depot, Yorktown, Virginia; with the Second Marine Brigade in Nicaragua; and at Navy Yards in Washington, D.C. and Boston, Massachusetts. He is a former editor of the BuMed News Letter and was at one time attached to the Research Division of the Bureau of Medicine and Surgery. He also was Executive Officer at the Naval Hospital, Newport, Rhode Island. During World War II he served as Force Medical Officer, on the staff of the Commander Air Force, Atlantic Fleet.

Captain Hernandez is a member of the American Medical Association, the Southern Medical Association,

cases, the individual's commanding officer or officer-in-charge must certify by endorsement that the individual is physically and psychologically fit for the extended tour of duty and that the extension is in the best interests of the service.

All periods listed in the table are considered to be the maximum length of a tour of duty in the locality concerned. Under certain conditions, variation may be made, but adherence to the table will be maintained as closely as possible.

tion, the Association of Military Surgeons, the American Society of Tropical Medicine, the Phi Beta Pi Medical Fraternity, and a Fellow of the American College of Physicians. He has attended many post-graduate schools among which are: the School of Tropical Medicine, University of Porto Rico; the Rockefeller Institute for Medical Research in the Treatment of War Wounds; and the School of Aviation Medicine, (Flight Surgeons), at the Naval Air Station, Pensacola, Florida. Besides various area campaign medals, he holds the Bronze Star, the Second Nicaraguan Campaign Medal, Victory Medals I and II, the Nicaraguan Medal of Merit, and the Star of Abdon Calderon, Second Class, (Ecuador).

Captain Hernandez is an ardent collector of coins, and he also considers himself an authority on the subject of horticulture. He takes pleasure in giving advice and useful hints to prospective gardeners. In his words: "One of my most apt pupils has been Captain Stone, who attributes a great deal of his success in gardening to my council and advice."

Captain Hernandez is a remarkably energetic person. The wear of thirty years in the Navy hardly show on his features. His jovial and pleasant personality has a noticeable effect on those about him, and anyone in his presence immediately feels at ease. The Naval Medical School and the entire Navy will suffer a loss when Captain Hernandez begins the life of retirement which he so richly deserves.

NNMC Waves Sign Over To Regular Navy

After six years of proving their mettle through valuable service to their country during War and Peace, Waves are now in the regular navy under the provisions of public law, 625, the women's armed service integration act of 12 June 1948.

Recently the navy announced a selection of 288 women officers for transfer to the regular navy. Selections were made among women officers on active and inactive duty according to the law, the officers will be sworn in increment of approximately six months apart, the first large group consisting of 40% of the maximum strength which will be attained over a period of two years. From among the first 288 selected, eight officers were sworn in recently, at a formal ceremony the Secretary of the Navy's office with the Judge advocate General administering the oath of office.

The officers participating in the ceremony were chosen by seniority in grade and precedence of commission. Among the first eight wave officers that were sworn in at the ceremony were Miss Doris Cranmore LT, MSC and Miss Ellen Ford LT, SC, representing the Medical Center.

LT. Doris Cranmore, entered active service at the U.S. Naval Reserve Midshipmen's school, Northampton, Mass. on 9 Jan. 1943. She received her commission as an ensign on 9 March 1943. Miss Cranmore reported for duty at the Naval Medical School, NNMIC on March 1943, and has been attached to the Medical School up to the present date. Here at the school she is in charge of the Hematology Department.

Miss Cranmore was born and raised at Ann Arbor, Mich. She received the Bachelor of Science degree from the University of Michigan.

Lt. Ellen Ford, entered the service on 22 December 1942. She was commissioned an ensign on 15 Jan. 1943, at Northampton, Mass. After receiving her Naval Reserve commission she was ordered to the U. S. Navy Supply Corps School, Boston, Mass. for ten weeks training. After receiving her course of instruction she was assigned to the NAS, San Diego, Calif. Counting the many changes of duty that Miss Ford had in her Naval career, even with the waves, the old adage "join the navy and see the world" still holds true. After serving at stations in Texas, Hawaii, and South Carolina Miss Ford reported to NNMIC for duty as Disbursing Officer on 2 August 1947.

Miss Ford received her A.B. degree from Cornell University, N.Y. and a B.S. degree in Economics from Simmons College in Boston. She spent her childhood in Birmingham, Michigan and now makes her home in Wilmington, Delaware.

The three other Wave officers of duty at the Medical Center are LCDR Margaret Diehm, MSC, USNR; LCDR Mary Sproul, MSC, USNR; and Lt. Elton Dalier, W, USNR.

After receiving her B.S., M.S. and Ph.D. degrees at the University of Pennsylvania Miss Diehm taught the biological sciences at Drexel Institute of Technology in Philadelphia for eleven years. She entered the service in September 1942 and is now officer in charge of the Blood Collecting Department at the Medical School.

Miss Sproul who is in charge of the Blood Plasma Department at the Medical School became a Wave during December 1942. After taking her B.S. and M.S. degrees at George Washington University she worked as a medical technologist at the Army Medical School in Washington, D.C.

Patients' Corner Bring Yule Cheer to N. H.

by Thomas W. Burke

Left to Right is the Executive Officer of the Naval Medical School, Capt. Hernandez, welcoming aboard Comdr. J. M. Amberson, Dr. M. Schwarz, Civilian Ethologist and Comdr. Trenton K. Rulbush.

Red Cross Offices Move Back To Hospital

The Red Cross offices have been moved from the Recreation Building back into the hospital proper. Although it will take a few days to finish the painting and "setting in," the regular program will go on as usual.

The *Central Administrative Offices* are at Room 109, which is on the main deck central corridor, right next to the Crew's Library. All inquiries and referrals should come to this office where there is a switchboard connecting with the other offices. The telephone extension is 621.

The *Recreation Workers*, for the medical and surgical wards, have their desks in Room 102 which is near Ward 3B on the main deck. Telephone calls and messages reach them through extension 621.

The *Social Workers* have their desks in Room 11. This formerly was the Fever Therapy Room and is across from the G.U. Clinic on the side corridor of A Deck. Be sure to telephone extension 621 as the operator will find out for you if the particular social worker you want is at her desk or out on the wards. If she is out, the operator will take a message and have the social worker contact you.

Farewell Party Held For Asst Chief Nurse

A party was given by the nurses in honor of Margaret Haley. It is with much regret that we say she leaves for Panama to fill the capacity of Chief Nurse, after being assistant chief nurse here since reporting aboard in December, 1947.

Talk about atmosphere for dining and dancing! Yes! The rugs were rolled up and the floors were beautifully waxed—everything was just perfect. Holly, ribbons, mistle toe, and a well decorated tree were displayed in a very artistic manner.

Indeed, no fault could be found with the decorating committee, all your work was not in vain. What a beautiful table was set before us. A word of appreciation goes out to the refreshment committee for all the luscious food prepared. Thanks also to those who served so ably in the check rooms.

Already the Christmas Spirit seems to be off to a terrific start. Mrs. Pfeiffer, the former Carol Perry, recently left Phila. Naval Hospital and has reported for duty along with the following indoctrinées: Katherine L. Johnston from New Orleans, Betty J. Field of Washington, D.C., Emma L. Carroll from Rocky Mount, N.C., Lillie Mac Frank of Rice, Virginia, Eunice B. Ireson from Danville, Virginia, Geneva E. Walker of Shaw, Miss Dorothy J. Hurley for Birmingham, Ala., Dorothy E. Moore of Demopolis, Ala., Mary E. Frew from Huntville, Alabama, and Jacqueline J. Marsh who comes from Quincy, Michigan.

The *Gray Ladies* are operating out of Room 105A. This is located on the side corridor between wards 4B and 6B on the main floor. The housing lists are kept there and the shoppers have a place to sit down and figure out their chits. Just across the hall in the solarium, the Gray Ladies are wrapping Christmas presents. Don't wait until the last minute to get yours done!

Mrs. Borland, the *Crafts Worker*, has moved into the same office with the Recreation Workers for the N.P. Service. They are still in Room 205A, right near Ward 6C on the second deck, side corridor.

DR. MARSH

(Continued from Page 1)

time. His office is located opposite Ward 5-B.

His hobbies are gardening and a keen interest in professional sports, especially football and basketball. He attends such contests whenever time avails, and prefers them to college games.

Maintaining an office on Tower 12 these days is Dr. McNamara, practitioner in general surgery, who is a mighty hard man to catch, owing to the many wards he covers.

The soft-spoken, white-haired doctor came here on November 1 from the Lahey Clinic in Boston, where he held a fellowship in general surgery for 14 months.

During his time in the Navy he has served at the old Naval Hospital, Washington, D.C., on the USS WASP, at the Naval Hospital in Annapolis, Md., aboard the USS VINCENNES from 1943-45, and at the Naval Hospital, Philadelphia, from 1945-47.

A fellow of the American College of Surgeons, he also is a Diplomat of the National Board of Medical Examiners.

Dr. McNamara served with cruiser division 14, of a fast carrier division operating with the 3rd and 5th Fleets during the last war.

In the past Dr. McNamara has made his home in Winchester, Mass. off and on for several years. He likes to play golf, tennis, and badminton, but "I really have time for little more than my work these days."

Navy Scientist Back From Africa With 100 Chests Of Specimens

Ending a 21,000-mile expedition through 15 countries of Africa, a group of Navy scientists from the National Naval Medical Center returned here last week with nearly 100 chests of valuable medical specimens.

Commander J. M. Amberson, of the Naval Medical School, said that the specimens included malaria-carrying snakes and turtles. This data will be classified soon, and a report will be submitted to the Navy's Bureau of Medicine and Surgery.

Med. Center's X-Ray Mobile Unit On Tour

The Medical Center's X-ray Mobile Unit number three departed for an extended tour of the Potomac River Naval Command area the 29th of November. The unit will visit all naval activities in the PRNC district and perform routine chest X-rays of naval and civilian personnel attached to the stations.

Mobile Unit number three is under the direct supervision of J. W. Hooper, LT JG, MC, USN. Enlisted men attached to the unit are R. N. Johnson, HM1 and A. G. DePaemalaere, HM3 of the Naval Medical School here at the Medical Center. Mobile Unit number six, with A. S. Capidaglias, LTJG MC USNR, R. Bell, HM3 and B. R. Bonds, HM2, has been surveying the Third Naval District for the past two months and is due to return in the not too distant future.

Strictly speaking, the X-ray Unit sounds like good duty. It seems an ideal way to combine work and travel, with subsistence pay and the opportunity to visit many places of interest. More like a vacation with pay than just a routine job to perform. Maybe that's what those recruiting posters mean when they say "Join the Navy and see the world" (from the window of a Mobile X-ray Unit!)

Merry Christmas Long Distance

Again this year the Baltimore News-Post & American is saying "Merry Christmas" to patients in this hospital by providing Active Service and Veteran patients an opportunity to telephone long distance to loved ones, Mother, Father, Brother, Sister, wife, sweetheart, or friend.

Calls may be made between December 15 and January 2. They are limited in time to three minutes and in number to one per eligible patient. To be eligible means that you are not getting Christmas leave from the hospital.

You may place a call to any loved one within the United States but if you are planning to call outside the United States, your loved one must be a close relative. To take advantage of this opportunity, ask your Red Cross social worker for a card so that your call can be scheduled with the telephone operator.

ADM. WILL CUTTS

(Continued from page 1)

Jesus Christ, the great character who almost two thousand years ago instituted the age-enduring concepts and happiness of Christianity.

This hour may be considered a rally, a mass meeting devoted to group enthusiasm for the inauguration of another Christmastide, the most joyous of all seasons.

It is a pleasure to greet you and to join with Mrs. Willcuts in extending sincere greetings for the Merriest Christmas to you all."

With Doctor Amberson on the mission which returned from Cape Town, South Africa on the cruiser, U.S.S. Huntington, were Commander Trenton K. Ruebush MSC, USN (Bacteriologist) of the Naval Medical School; Doctor M. Schwarz, (civilian Ethologist); Harley Francis Cope, Jr., Photographers mate second class, U.S. Navy; and Deane K. Lawless, Chief hospital man, (Medical Research Assistant) U.S. Navy.

Dr. Amberson said the expedition accomplished three major objectives:

(1) The effect of tropical medicine on human life was studied, not only through test tubes, but through actual operations and treatments on natives.

(2) Material was gathered for the teaching of tropical medicine to medical officers of the Armed Forces and for the future training of hospital corpsmen.

(3) A liaison was established between the United States and African research workers and medical institutions.

Asked how the African natives reacted to the navy scientist, Dr. Amberson stated, "They were quite friendly but appeared to be curious about the white man's intentions." "Most of the natives carried spears and arrows," he said, "but we found out later from Missionary Fathers that they were used primarily for protection and hunting."

Dr. Amberson added that the large number of missionary workers in the vicinity in which they traveled were most helpful.

These missionary workers furnished the doctors with dictionaries which they had written to interpret the many different dialects spoken throughout Southern Africa. In one area 58 different languages were encountered; and without the help of the missionaries, it would have been impossible to understand them or attempt to try to administer any kind of medical treatment.

Dr. Amberson was queried as to the extent the expeditions' relations with the African people helped better the positions between the United States and Africa. "Through medicine the United States has made many friends in and throughout Africa," he declared. There is a greater need for many more foreign expeditions that will express the good will which this country is trying to spread."

The National Naval Medical Center contingent which represented the Naval Medical section of the University of California African expedition left Bethesda in the midst of a snow storm last January 16. Its equipment for the journey which covered the area from Port Said to Cape Town, South Africa, consisted of two 2½ ton trucks, two open jeeps, and a jeep station wagon, loaded with camping supplies and a varied assortment of scientific apparatus.

—NNMC WAVES—

Continued from page 2)

Miss Dalier who is the Women's Reserve Representative, the Educational Services Officer, and the Civil Readjustment Officer entered active naval service during November 1943. After receiving two degrees at the University of Alabama she taught for five years at Perkinston JC in Mississippi.

Pay Port Delayed

Appears that it will be well into next year before the report of the Advisory Commission (Hook Commission) on Service will be made public.

One of the factors that is delaying action is the far-reaching laws other than pay laws recommendations of the Hook Commission would have. It is understood that the civilian commission recommended that there be voluntary retirements unless a man has had twenty-five years of service and that there be no voluntary retirements unless an officer has thirty years of service. Such recommendations, if adopted by Congress, would completely wreck the selection system and would require extensive revision of the reenacted personnel law.

Any event, the report of the Commission will be of wide interest and will require diligent study before all the ramifications of its recommendations can be determined.

Tower Topics

by George Royster

A pat on the back to the girls who work at the Naval Hospital Ship Service. They face the deluge of coffee drinkers day in and day out and always are ready with a cup of "joe." They do a swell job all day long so let's give them a well-deserved "Thanks."

The word from the Main Quarters is that after the first of the year those new washing machines may become a reality. There are now four in good order but a few more larger machines would be welcomed.

While on the subject of Main Quarters what about a big hand for Chief Lovelace? The Chief does a fine job of seeing that our quarters are ship shape and he deserves a lot of credit.

And then there was the sailor who thought that a Santa Claus was something new in grammar.

Over heard in the N.P. dorm: An inferiority complex is a different kind of sentence.

"Welcome back" is extended to the seven hospital corpsmen who returned recently from a two months period of TAD. The men went to the Philadelphia Naval Yard to assist in the securing of two hospital ships. The men are: T. W. Williams HMC, A. Tabor HM1, J. A. Fariello HM1, H. W. Wheaton HM2, L. N. Deese, J. J. Filipiak and T. A. Tubergen, all HM3.

On a recent survey made throughout the Naval Hospital the NEWS found that a great amount of difficulty is encountered in the receiving of each issue. So that this may be eliminated it was decided that all ward mail boxes will receive copies and also that each staff quarters will be supplied with the paper.

"Why don't you have more pictures?" "I think more sports stories would make the paper better." "You need more gossip about the compound." These are just a few of the comments that the staff of the Naval Hospital made when asked: HOW DO YOU LIKE THE NEWS?

In general the staff thought that the NEWS was a good station paper and compared favorably with papers of other Naval Units. However, we want to print what you would like to read. This is your paper! Let us hear more of your suggestions. Room #23 in the recreation building is the place to which all suggestions should be sent.

POEM OF THE WEEK

Jingle bells, jingle bells
Jingle all the way
Oh, what fun it is to do
EEG's all day.

Rumor Has It: That Pete Petrillo has found his "ovle life" in Kitty.

That "Gun Boat" Anderson is the only man in the Navy that can wear bell bottom trousers at both ends.

That the crew would like more stage shows like the one last week.

That Bill Richards shoe size is 10 but 11 feels so good he buys 12's.

That's all for this time—see you next issue.

Merry Christmas and a Happy New Year!

SPECIAL XMAS

(Continued from page 1)

and Drama Department at the Catholic University of America.

The singing will be by the Franciscan Choir of Holy Name College of the Catholic University of America. They will sing Christmas Carols before Midnight Mass, the Mass will be sung in Latin by the Choir.

It has been announced by the Protestant Chaplains that their Christmas ceremonies will commence at 2300 on the 24th of December in the Main Auditorium. On Christmas Day services will be held at 1000 in Protestant Chapel.

Intramural Football Champions

In center of picture is Captain Elias Jay Bell receiving trophy from LTJG J. O. Atkinson, Recreation Officer. Left to Right is Robert Morris, David Anderson, William R. Moore, Michel McCarthy, George Royster and R. Marchand.

'Happy Go Lucky' To Play Here On Jan. 5

There will be music, mirth and magic at the Naval Medical Center on Wednesday, January 5 at 1800 when "Happy Go Lucky," a Veterans Camp Shows variety revue, takes the stage.

With Evelyn Farney as its singing, dancing, fizzing "femme-cee," "Happy Go Lucky" is a swift 75-minute package of top-flight entertainment. Audiences who've already sampled this package tagged it something special in the song and dance field.

The LEE FOSTER QUARTET—accordion, violin, bass viol and guitar—will weave their special magic around such tunes as "Fiddle Faddle," "Holiday For Strings," "Tico Tico" and "Cool Water."

NORMA KRIEGER works with razor blades and needles, but she isn't going to shave you nor do any sewing. It's all part of a "hand-is-quicker-than-the-eye" routine that's done so slick and fast you'll believe you too can do it. And Norma will

give you a chance if you accept her invitation to join her on the stage.

There's no other act like ARTHUR DICK's on the Hospital Circuit. Arthur is the good man you can't keep down. In solo and with his pretty partner (MRS. ARTHUR DICK), he dances, roller skates and does acrobatics with a skill and polish that will leave you amazed at the manner in which he makes one leg do the work of two.

HANK SIEMAN & COMPANY is ventriloquism at its finest and funniest. The verbal shenanigans of Hank and his stooge will set you rocking and rolling with laughter.

Navy Manual Now Available

The first revision of U.S. Navy Regulations since 1920 is now being distributed. U. S. NAVY REGULATIONS, 1948, has been published in the form of a loose-leaf manual, size 8 inches by 10½ inches. New style large print, "stand-out" headings for the various sections, divisions and subdivisions, plus a new "easy-to-find" index combine to give "Regs" a really "new look."

Personal copies may be obtained from the U.S. Government Printing Office at a cost of \$1.50.

Admirals Nip Anacostia, Fall Before Patuxent

Showing vast improvement over early-season efforts, the NNM Admirals split even in their last two PRNC loop tussles before the holiday layoff.

Fired by the 21-point output of Paul Harmer, clever blond guard, the Naval Medical courtmen edged out Anacostia Naval Air Station, 66-63, in a thrilling battle on the losers' floor December 14, but then were larruped by Patuxent River NAS, 71-39, two nights later.

The high-scoring spine-tingler with Anacostia was nip and tuck all the way, after the Air Station quintet overcame a 20-13 first period deficit to gain a 37-33 halftime margin.

Still trailing, 51-49, entering the final frame, the Admirals came through when the blue chips were down, hitting 10 points in two minutes and then stalling out the frenzied last 60 seconds.

George Funk, rangy center, hit 14 points for the winners, and "Black Jack" Levi snapped out of a slump to bag 13. Pat Partridge, Carl Norris and Nelson of NNM all turned in good floor games, Norris fouling out midway through the second half.

After lagging only 31-28 at the intermission in the Patuxent River tilt here, the host five collapsed like a punctured balloon in the last 20 minutes, as the visitors ran wild.

Paced by Bernie Scott, shifty colored forecourter, the Air Station lads hit a torrid scoring pace in the third and fourth stanzas to bury NNM under an avalanche of baskets. Scott notched 23 points in all.

Sportin' Aroun'

Staging a comeback after forced vacation last issue because of space limitations, this columnist is with you once again just in the nick of time to wish each and every NEWS reader an exceedingly Merry Christmas and a Happy New Year, and that goes for the entire staff of the paper.

Not many fellows on the compound bother to come out and see the Naval Medical court squad play—not just because it has gotten off to a slow start this year as many chronic grippers would have naive souls believe, but primarily due to the universal ailment on this station—INDIFFERENCE!

I'm not shooting in the dark when I say that nor am I being radical by adding that the deplorable lack of enthusiasm for various events, not only those of an athletic nature alone, is a shocking condition prevalent here that only increased interest in NNM doings by every one of you can remedy.

A vote of thanks from this reporter and a few other broadminded persons who haven't lost the sort of spirit that everyone is imbued with during their school days, to the NNM Admirals for showing a type of courage and fight that is to be commended highly.

And now let's take a look at the national sports scene; here's hoping the rival professional football leagues, the NFL and AAC, settle their differences and have successful campaigns in 1949.

We here in this area are lucky in that score—the old aerial artist himself, Slingin' Sam the Redskin man, and his Washington teammates have loads of spirit and just finished a good year, while those insuperable Baltimore Colts are another pro club that's chock full of that old "college try."

Rebounding well, the locals were in arrears 14-13 as the first quarter ended, and kept pace throughout the next canto. But they were colder than an Arctic iceberg in the final half, while Patuxent seemed couldn't miss, with its nifty shots and sizzling fast break working to perfection against the befuddled Admirals.

Loss of Funk, who notched tallies before his premature departure, via the five-fouls route in the third session all but ruined val Med, under the boards, although lanky Paul Glunz, who managed nine points, fought heart out in a futile cause.

Harmer, Levi and Norris were "off" on their shooting in the second half, and no similarity between the Admirals and a good ball club in the final two periods was apparent to the small gathering.

In a pair of earlier frays the Admirals dropped a PRNC circuit contest to the Marine Corps Institute cagers, 56-41, on Dec. 9, then lost to the Navy Department, 52-41, in a non-league affair here the following evening.

Against the Marines, NNM had a bad second stanza to trail, 30-13 by the half, and never could make up the difference. Ragged passing shots by the winners, sank the mirals.

The December 10 tiff saw Naval Medical behind, 26-15, at the halfway mark, and never quite able to close the gap. Funk and Reid topped the NNM pointmaking. To date the Admirals have dropped five of six PRNC games, but aim to wreak vengeance on several loop foes second-half campaigning after the holidays.

Now for my all-American selections—make of them what you will, but C. S. will stick with them, nonetheless.

My first-team line includes Renburg of Michigan and Poole, the Mississippi ace, at end; Minnesota Nomellini together with the great Bill Fischer of Notre Dame in the tackle slots; Cal's Rod Franz and Bill Healy of Georgia Tech guard, and Charlie Bednarik, a time Penn great, at the pivot.

In the backfield I place Ch. Justice, North Carolina flash, Dartin Doak Walker of S.M. along with Norm Van Brocklin, Oregon's Cotton Bowl eleven, and Georgia's fine Johnny Rauch.

Here's Hoic I See the Big New Year's Day Bowl Battle Throughout the Land

—ROSE BOWL—
Northwestern by 14 points

—SUGAR BOWL—
North Carolina to win by 7 points

—ORANGE BOWL—
Georgia by 13 points

—COTTON BOWL—
Oregon to tip S.M.U.

I also like the East Stars over the West by two touchdowns, Missouri to clip Clemson in the Gator Bowl, Villanova over Nevada in Harbor, Drake to whip Arizona the Salad (sentimental bet, one!), Texas Mines to trip Wake Virginia in the Sun, and Wake Forest over Baylor by a T.D. in the Dixie tussle.

There'll be a good intramural basketball league going at NNM next month so don't forget to get your team entries in right away if you haven't already attended to that.

Come Watson, let's take off like scalded dogs and solve the mystery of that Maryland football team. There must be a clue or two lying around—we'll look up Charlie Justice first.

NATIONAL NAVAL MEDICAL CENTER, BETHESDA, MD.

14 JANUARY 1949

Dr. Cole Named New Director of N.M.R.I.

Dr. Kenneth S. Cole, professor of physics at the University of Chicago, has been appointed Scientific Director of Medical Research at the Naval Medical Research Institute.

Dr. Cole holds a Ph.D. degree from Cornell University, and was a research fellow at Harvard University and the University of Leipzig, Germany. He also attended the Institute for Advanced Study at Princeton, New Jersey, and was engaged in theoretical research in biophysics.

Since finishing his formal education, he has been active in the fields of physiology and biophysics at Columbia University and the University of Chicago.

In his new assignments, Dr. Cole will be responsible for the policy and general direction of all fundamental research and scientific investigation at the N.M.R.I., which is the largest activity for medical research in the Navy.

The institute's mission is to foster fundamental research in medicine and allied fields. It also makes available the results of its investigations for the improvement of Naval services in the protection of personnel from injury, the prevention of disease, and treatment of the sick and injured.

W. A. Patient Donates Eyes To Aid Blind

Mr. William H. Hallows, while a patient on ward 6-B donated both eyes to the Eye Bank for sight restoration.

Even though a young man he knew he was suffering with an incurable malignancy, he and his generous wife decided that even in death he could help another fellow sufferer.

Immediately after death Mr. Hallows was transferred to the operating suite and each eye was removed under the same sterile precautions as any eye operation. The eyes were placed in sterile refrigerated containers and transported by special messenger to the Wilmer Eye Institute at Baltimore, Md.

Eyes which are donated in this manner are used for corneal transplantation to another individual who cannot see because of corneal opacities. This is at present the only way in which these blind persons can be surgically cured and permitted to see again.

The central agency for this service is the Eye Bank for Sight Restoration, Inc., 210 East 64th Street, New York, N.Y.

March of Dimes Drive Starts Here Today

The Annual March of Dimes campaign to fight Infantile Paralysis, will get under way here at the Medical Center on January 14, 1949.

How did the drive begin, what are its purposes, how has it helped the lives of American people, and what does the foundation expect to do in the near future? The answer to these questions is a very interesting one and we would like to pass it on to our readers.

In the golden days of late summer, 1921, after swimming in the cold water of the ocean near his Canadian camp in New Brunswick, Franklin D. Roosevelt, a stalwart man of 39, came down with Infantile Paralysis.

Three years later he came in a wheelchair to the run-down summer resort of Warm Springs, Georgia, to try swimming in the warm waters for improvement of his weakened legs. There, in 1927, having tested the idea of an after-care center for Infantile Paralysis victims, Roosevelt and a group of friends formed the Georgia Warm Springs Foundation, a non-profit-making institution exclusively for Infantile Paralysis victims.

From this sequence of events was born the National Foundation for Infantile Paralysis. For, in 1934, when the American people danced

Med. School Opens New Chemistry Class

A chemistry school for enlisted personnel will convene its first class on or about January 9 at the Naval Medical School.

This chemistry school, recently approved by the Bureau of Medicine and Surgery, will provide the Navy with chemistry technicians for duty in departments of the Naval Medical School, Naval Medical Research Institute, and various Naval Medical Supply Depots and any station where chemists may be required.

Under the direct supervision of LCDR O. C. Western, MSC, students will be taught by himself and LT E. E. Ozburn, MSC, of the General Chemistry Department, NMS.

The twelve months course will cover about four years of college chemistry and will include the following subjects: two months of elementary basic chemistry and mathe-

Pres. Truman Backs Proposed Pay Boost For Armed Forces

President Truman has approved the proposal to grant members of the Armed Forces a substantial pay boost, it was announced recently by Washington news sources. It is based on the recent Hook Commission report, which will be submitted to the 81st Congress during the coming session. We hope this month.

The overall effect of the recommendations on the active duty payrolls of the military services is estimated to average an increase of about 15 per cent.

In making its recommendations, the Commission stresses the career aspect of the military service to attain the principal objective at which it has aimed—to attract and hold in the services personnel adequate in numbers and capabilities. This objective is sought, the report states, by providing military compensation and promotion opportunities on parity with comparable civilian responsibilities.

Career Aspect Emphasized

Promotion and responsibility are made paramount factors for pay increases. Longevity is given less importance. Higher relative increases are recommended for executive and leadership positions in both officer and enlisted categories.

The pay for Grade 7, the lowest enlisted grade, would remain at \$75 a month.

Explaining its recommendation to retain the \$75 a month pay rate for Grade 7, the Commission states three reasons: (1) cost of living is taken care of by free clothing, shelter and food; (2) desirable personnel are not expected to stay in that grade for more than four months when promotion is automatic, and (3) the \$75 a month pay, along with free food, shelter and clothing, is better than comparable pay in industry and future opportunities are more promising.

The top three enlisted grades (noncommissioned officers) under the proposed scales should average about one-third increase over present pay and they would receive allowances comparable to those provided for commissioned officers.

"Fogies" (in-grade increases based on length of service) would be more rapid—every two years up to 18 years and then every four years—and on a flat scale instead of percentages.

Pending passage of legislation making equitable adjustment of compensation, the Commission recommends that the present income tax exemption for military services personnel, which expires on December 31, 1948, be extended. This exemption is for the entire pay of

(Continued on page 3)

Mid-Winter Staff Dance This Month

A mid-winter staff dance is planned on January 21, with festivities slated to begin at 2000 and end around 2330. After that everyone will be on his own.

As usual it'll be a "drag or stag" affair and a large number of girls from Arlington Farms are expected to be on hand. The Recreation Department has announced that there will be plenty of food and drink for all who attend.

In preparation for this event the NNMC orchestra is holding long practice sessions and will be in top form for its initial appearance of 1949.

Three members of the band leave for duty elsewhere this week and among them will be J. R. Hildebrand, alto sax player and leader of the band up until now. These men all were in the Lab School class which graduated yesterday.

C. P. "Fatso" Foreman, tenor sax man, is assuming direction of the Naval Medical music makers. The band has a lot of new members and has been readying them for this month's staff "jump."

Several novelty tunes are being rehearsed as are a wide variety of popular selections. Waltzes, fast tunes and the always-demanded slow, dreamy songs are included in the musicians' repertoire.

The enlisted men's committee is in charge of arrangements for the dance.

Admiral Leahy Patient Here

Fleet Admiral William D. Leahy, Chief of Staff to President Truman, underwent an operation for a genito-urinary tract condition here last week, and has been convalescing uneventfully since then. He is a patient on Tower 17.

Admiral Leahy, 73, entered the hospital on January 3 and underwent surgery two days later. Captain H. J. Cokely, Chief of Urology, performed the operation.

Editorial . . .

With the beginning of the new year we are reminded not only of the many opportunities of the days before us but we are also conscious of the heritage, which is ours from the past. Part of that heritage is that sense of authority and discipline by which members of the naval profession are distinguished from the non-military citizens of our country.

In a general sense, the United States has always been regarded as a Christian country, appealing to the Creator as her help in the Declaration of Independence, and acknowledging as a nation that the national sovereignty is subject to the higher and final sovereignty of God.

This conception of sovereignty has led to the American conception of life wherein the church, the family and the state are each supreme in their separate spheres and each subject to the higher authority of the supreme Ruler of heaven and earth. This American viewpoint is distinguished from that of other philosophies, where the separate spheres of family, or church, or nation have been usurped by one of the others and a dictatorship of one kind or another has destroyed the rights and the thinking of the individual. When the liberties of men are being attacked today on every hand we should awake to the dangers surrounding us that we may defend the heritage of liberty that has been given to us.

While defending the rights of the individual, reserved to him by the Creator, we should be mindful that we are yet under authority. The state has its responsibilities as the agent of God and the Navy has its duties as the agent and servant of the state, and we have our duties and responsibilities as those who are under the authority of the Navy. Our performance, then, should not be something done in a careless fashion for the sole and selfish purpose of receiving pay or making a living, but it should be the glad obligation and service which we have assumed as citizens of this nation and children of God.

As all authority finally comes from God and as our knowledge of Him comes from the Scriptures so we ought to renew our fidelity to Him by acquainting ourselves with those precepts and commandments which are written therein. Submitting ourselves to that holy discipline we shall find that the new year is not a future of bondage and chains but a time of true liberty and full freedom and the Navy a place of genuine service.

New Arrivals At N.N.M.C.

Nurses commissioned as Ensigns, Nurse Corps, U. S. Navy, early in December and assigned to the Naval Hospital, Bethesda, Maryland, for their indoctrination and first duty:

Left to Right, First Row: Betty J. Field, Katherine L. Johnston, Mary E. Frew, Emma L. Carroll, Dorothy J. Hurley. Second Row: Eunice B. Ireson, Geneva E. Walker, Dorothy E. Moore, Lillie M. Frank, Jackaline J. Marsh.

Magic With Glass

Pictured above is Mr. Arthur D. Mack, Glass Apparatus Technician at NMRI, in the process of blowing a glass bulb from a simple tube of glass.

Glass Blowing Plays Vital Role at NMRI

"First of all, we would like to see the glass-blowing demonstration." These are familiar words whenever the Naval Medical Research Institute opens its doors to the public. Always it seems the Glass Apparatus Department holds some mysterious attraction which the other departments lack. Whatever this attraction may be it soon becomes apparent to the guides during "Open House" that all roads lead to Mr. Mack.

Mr. Arthur D. Mack is now recognized as one of the country's finest glassblowers and one of a rapidly diminishing profession. Few men are qualified to carry on research glass blowing for the long years of necessary apprenticeship seem to stop young men from entering this particular field.

Mr. Mack learned the fundamentals of glass-blowing technique in a Boston plant which manufactures X-ray tubes. As the years passed he perfected techniques in making vacuum tubes, rectifying tubes and complicated physical and chemical apparatus.

Now he spends his time at the Institute developing and designing glass apparatus which is used in the various departments by the many scientists. He assists the members of the staff in an advisory capacity in the design, modification and repair of scientific glassware.

When his day at the Institute is finished and his professional duties, which indeed are many, are set aside Mr. Mack engages in glassblowing as a hobby in a basement laboratory in his home. Here he makes novelties for his family, his many friends, and for his own pleasure. Christmas is a busy time for Mr. Mack for then he goes into full scale production of glass Christmas tree ornaments.

The tools of his profession are very few and simple—a gas and air burner, a pair of tweezers and his hands. Probably the most important of these are his hands. The years of training were spent primarily in the development of the skill and dexterity in these hands.

MARCH OF DIMES

(Continued from page 1)

for the first time on the birthday of the man who had become 31st President of the United States, it was clear that the fight against Infantile Paralysis must be spread to all parts of our land.

The National Foundation, created with the dimes and dollars of millions of people, went forward. From an ideal set down on paper it has become an active, potent force in the life and health of our nation.

Eleven years, in world history, is only a moment. To mothers and fathers it is half their children's lives as children. What can we do now, while we await the eventual success of scientists, to improve conditions for Infantile Paralysis patients?

First, of course, we can supply the means, through our contributions, by which scientists may push their enlarged quest for knowledge and patients everywhere may receive the best available care.

In short, the job is far from done.

Now, as the National Foundation begins its twelfth year, we can re-dedicate ourselves to its work with renewed faith and increased vigor. The record of the recent past inspires future achievements.

MED SCHOOL

(Continued from page 1)

matics through trigonometry, one and one-half months of qualitative analysis and physics, and two and one-half months of quantitative analysis.

Also, one month of colorimetry, bio-chemical procedures and the care and use of scientific instruments, two months of organic chemistry, and three months of toxicology and the determination and estimation of poisons in bio-chemical samples.

As planned, the course will consist of 541 didactic and 1,379 practical hours of study. Students will work with the most modern equipment and will study latest techniques.

Red Cross Offers Many Facilities to NH Patients

By Eleanor Borland

Christmas and New Years have come and gone, so we start the New Year with lots of new resolutions and plans for the future.

For the benefit of you readers who are newcomers to the NNMRI, we will give you some highlights of the Red Cross recreation department's activities for patients.

We have in the music line a selection of records, semi-classical, classical and popular. A patient may check out a record player and a choice of records in Room 102, the recreation office. There are a few small radios which may also be checked out to bed patients in private rooms on wards.

16 mm. movies are shown in your wards once or twice each week by a patient or staff projectionist. Scheduling of movies, training of projectionists, and daily checking of projectors is supervised by Mr. Osborne, recreation worker in Room 102.

Entertainment and hostess groups come to this hospital four or five days each week and are scheduled on the wards by the recreation workers who check with the medical officers on the wards.

Flowers are received for distribution several times each week and these are distributed to the bed patients by Gray Ladies and recreation workers.

Trips are scheduled and tickets are available for seasonal sports, concerts and other activities in Washington and adjoining communities. Recreation workers take requests on the wards several days before the activities are scheduled so that a patient may get his doctor's permission to attend.

Craft carts are on the wards once or twice each week and patients may select one of several projects to keep them busy during their stay in hospital.

BuMed Aides Convene Here Jan. 28-29

The joint meeting of Honorary and Reserve Consultants to the Navy's Bureau of Medicine and Surgery, to be held here January 28 and 29, will bring to NMRI many of the nation's outstanding doctors, including the presidents and presidents-elect of the American Medical and American Dental Associations.

During the two-day meeting the Honorary Consultants will assist in formulating future policies for the Medical Department of the Navy. Meanwhile the Reserve Consultants will advise and evaluate the present graduate medical training program as well as the present status of the Medical Corps Reserve.

These Honorary Consultants, appointed by the Secretary of the Navy, act as an advisory board to the Surgeon General. The Reserve Consultants, many of whom are former Naval Reserve officers, are appointed by the Surgeon General and represent the specialties of the various American specialty boards.

They also assist the Navy in establishing and maintaining a program which will provide training that meets the standards of the boards.

Tower Topics

By George E. Royster

After a swell holiday leave we are back with you again, so let's look over a few New Year's "bests."

Best Toast—Here's to the ships of our Navy.

Here's to the girls of our land May they always be well-rigged. May they always be well-manned.

Best Resolution—"I won't ever go to the Whippet again."

Best Drink—"Alka Seltzer."

★ ★ ★

Cupid's Work—Congrats to Paul Harner and Doris Fhebus who were married Christmas Eve, and also to Bill Breon and Marie Newman who announced their engagement Christmas Day.

★ ★ ★

Five men recently reported here from the Hospital Corps School at Great Lakes, Ill. They are: F. V. Wardjak, W. F. Megan, J. J. McLaughlin, R. A. Penczynski and T. E. Byres, all HA's.

★ ★ ★

About the Compound—Jerry Grass and June Mason seem to be a lot of fun together—also "Andie" and "Corky" make a cute couple. AND, R. E. Pascoe is devoting a lot of time to the study of "Greek" these nights.

★ ★ ★

We understand that the NNM orchestra is spending a lot of liberty nights practicing for the big "mid-winter" dance due later this month. The band is losing three men, but they are going to be replaced shortly and the gang will soon be at full strength again.

The fellows in the station band rehearse long and hard and they deserve a lot of credit, so let's give them a big turnout for the next dance.

★ ★ ★

In the Educational Office, Ford tells us that a large number of states still give credit for the G. E. D. Tests.

Anyone who has completed at least one year of high school work may take these tests. If the tests are successfully completed you may receive from your state a High School Equivalency diploma.

Even though your state may not recognize the G. E. D., they will at least recommend your placement, so that you may start USAFI courses for your diploma.

Poem of the Week THE EGG AND I

I had a little chicken,
And it wouldn't lay an egg.
So I poured hot water
Over it and down its leg.
That little chicken just cried and begged,
That little chicken laid a hard boiled egg.

How about some of you rabid sports fans getting down and watching the television over in Main Quarters more often? There's always a top-flight basketball game, wrestling card or boxing match on in the evening. C'mon, fellows, about it.

The New Year brought only one unpleasant thought—from now on servicemen will have to pay income tax. Oh well, easy come—easy go!

Stull for now—see you next issue.

Upper Left Picture: (left to right) L. E. Useison, HMC; James Thomas, First Cook; Edwin Cross, Cook; L. Cleckley, Cook; James Campbell, Cook; and Edward Thomas, Cook. Naval Medical Center Commissary Serves 195,000 Meals Monthly

Except for an occasional spud locker job (usually for disciplinary reasons), the majority of navy men have had little contact with the operation of the activity loved only next to the pay office—namely the Commissary Department. This article is intended to present a picture of the processes necessary in feeding the Navy.

At an average cost of \$1.12 per day for each person and the serving of 195,000 meals per month, the average monthly expenditure to furnish chow at this activity ranges from \$73,000 to \$75,000 per month.

Provisions are obtained from the following sources: dry stores from Navy Marketing Center at Norfolk, Va.; meats, poultry, fresh fruits and vegetables from the Navy Marketing Center, Richmond, Va.; and items unobtainable from Federal sources are purchased on monthly contracts through the Supply Officer, Naval Gun Factory, Washington, D. C.

Rigid accountability is maintained until the day's food is actually issued at the preparation center. Only the actual cost of food consumed is charged to that particular day's ration cost.

An average of 700 patients, 300 of which receive special diets, are served daily in the wards on forty electrically heated food carts which are cleaned and serviced by commissary civilian personnel and handled by ward personnel after leaving the Commissary.

Menus are made by the Commissary Officers and the stewards, on a weekly basis. Many things affect the preparations of a menu; for instance the season of the year, availability of the items and the cost.

After the menu is considered a finished product by the Commissary Department, it then must be ap-

proved by the Commanding and Executive Officers of the Naval Hospital.

The special diets are prepared by a staff consisting of seven cooks and twenty-seven mess attendants, under the supervision of three nurses and two hospital corpsmen.

The regular diet menu is used as a basis for preparing all special diets, certain foods being substituted to conform with the specific diet. Special diets are distributed to the north and south wing wards by civilian mess attendants.

Tower diets, both regular and special, are served from electrically heated tray-type carts. All others are served in the enlisted men's mess hall if the patient is ambulatory.

Lt. W. W. Smith MSC, USN is at the present time the Commissary Officer and is assisted by LTJG J. T. McDonald. Smith's additional duties other than running this large organization include acting instructor in Commissary technique to the officers who attend the school of Hospital Administration here at the Medical Center.

The general opinion of the crew is that the chow here is better than that at the average Naval base throughout the country.

We of the NEWS would like to say on behalf of all NNM personnel that this swell job of feeding us is highly appreciated.

PAY BILL

(Continued from page 1)

enlisted personnel and \$1,500 for commissioned officers.

Three Special Pays Retained

Elimination of virtually all special pays, including so-called "fringe" pays which have been added to basic pay from time to time because of a generally inadequate pay structure, is recommended. However, continuation of allowances for subsistence and quarters is recommended, because of the current economic conditions, particularly the housing shortage, until the general situation permits the inclusion of such allowances in basic pay rates.

Of the approximately 50 current types of special pay, only three are recommended for retention. They are: (1) hazardous duty, (2) sea and foreign duty (for enlisted personnel only), and (3) inducement pay for doctors, surgeons and dentists (except interns) on active duty.

(In the next issue of NEWS other aspects of this NEW PAY BILL will be discussed.)

Crews Library:

Smith's Latest Brainstorm Now in Library

Books sometimes have deceiving titles and the champion of all misleading title-choosers probably is H. Allen Smith. Those who remember his former brain storms will not be surprised to find that H. Allen's latest book is called LARKS IN THE POPCORN. Yes, that "mildewed New Yorker" moved into a house in the country. But he includes in his book no urge to Return to the Soil—just his usual humorous collection of screwballs.

AFTER DINNER SCIENCE by Swezey is a book of fascinating and recreational scientific experiments that can be performed with ordinary household materials and no special scientific knowledge. It's stimulating and entertaining for an evening at home.

THE ANATOMY OF PARADISE by J. C. Furnas is the result of years of traveling over countless miles of ocean. It tells the story of the white man in Hawaii and the South Seas, mingling fact and fiction, information and fascination, so pleasantly and wittily, as to give you a delightful reading experience.

THE CROSSROADS OF AMERICA by Garwood tells the story of Kansas City, Mo. There it was where the West began and the wagon caravans, trails and river boats met. We see a parade of colorful personalities such as Kit Carson, Fremont and Benton, John Brown and many others who are part of the fiber of our country's history.

Welcome And Farewell

Among four medical officers who recently arrived for duty at the Naval Hospital here is CDR. James G. Bulgrin, who came to this station on December 7 and is currently in his third year of a residency in Radiology.

Just arrived (on Jan. 6), is LTJG Charles O. Parker, Jr., MCR USNR, who can be found in the hospital Ophthalmology department these days. LTJG Mitchell S. Matuszko, MCR USNR, came to NNM on December 28 and is in Surgery, with offices across from Ward 4-C.

Fourth recent addition is LT R. S. Herrmann, MSC, who came here from Great Lakes on December 14, and is on Psychology.

Several doctors said goodbye to friends at the Naval Medical Center in recent weeks and departed for new duty stations.

LTJG Joseph E. Rankin, was detached December 10 and is now medical officer on the USS Grand Canyon (AD-28), while LTJG Keith D. Powelson left last week for duty at the Naval Training Center, San Diego, Calif.

Another doctor, LTJG Donald L. Burnham also set out for sunny San Diego not long ago, for duty in Psychiatry at the Naval Hospital there. LTJG George S. Ellis, who left early in December, now is Division Medical Officer with Destroyer Division 41—operating out of Norfolk, Va.

Last month CDR John C. Dunn went to James W. Riley Memorial Hospital in Indianapolis, Ind., for a civilian residency.

Now medical officer aboard the USS Manchester (CL-83) is LTJG Albert C. Marland, Jr., and LTJG Joseph L. Whatley journeyed to San Diego after being detached from here January 3, and now is with Destroyer Division 71 in the Pacific theater.

Sportin' Around

By Clyde Schubert

Our varsity basketball men, the Naval Medical Admirals, have fallen upon bad times lately, what with running up against a bunch of tough outfits such as the dreaded Quantico Marines, fiery Quarters "K," and a suped-up Receiving Station offense, but amazingly enough the team's spirit hasn't been broken.

Loss of some of the squad's best ball hawks in the last couple of weeks has been a stunning blow, but the local ball club has carried on in the face of almost the worst kind of adversity imaginable.

And so it is that the NEWS wants to let our NNMCM courtmen know that their station paper is behind them one hundred per cent all the way.

Due to a hopelessly overactive Indifference Gland, many good men choose to indulge in their sole recreational activity—LIBERTY—and then can't for the life of them figure out "why our basketball team is so poor."

No military compound is any better than the enlisted—yes, I said ENLISTED—men on it, and the general run of sailors on this base deserve a lofty 2.2 (in other words, you flunk completely!) on interest in station activities.

The truth is that many of the squad members are in the Naval Hospital command, and constantly stand port-and-starboard duty of the most demanding sort. To them a heartfelt "thanks for sticking with it, and keep battling!"

Looking around the nation from a basketball aspect: Easy Ed MacAuley and his astounding St. Louis U. mates are setting the collegiate courts afire this winter as many Midwesterners expected, while both Illinois, led by Dike Eddleman, and flashy Notre Dame, with its all-American guard Kevin O'Shea, also are showing power.

In the East N.Y.U. and Long Island appear as tough as ever, while offense-minded Rhode Island State's star seems to have fallen. Also, watch Canisius, a really good five.

This writer is anxious to find out what teams you readers think will be tops among the country's college quintets this year, so let me know those you like.

Of course, Kentucky's Wildcats will be hard for anyone to conquer while Tulane looms as a distinct threat to all Southeastern Conference comers. Howard Manuel of the Naval Hospital says the Green Wave will be among the nation's best in 1949.

Here's a pretty fair sports joke: One day a few seasons back the football forces of L.S.U. and Mississippi were doing battle, and the game soon resolved itself into a succession of wild passes, fumbles, interceptions and long, electrifying runs.

Seated in the stands was Wallace Wade, venerable grid coach and long an advocate of sound, straight football. Asked by a friend what he thought of the game he was witnessing, Wade leaned back and drawled, "Well, all I can say is basketball sure has speeded up since they eliminated the center jump."

HERO (almost) OF THE WEEK: Jzy "Sausage" Bell who tallied 10 points against Quarters "K" recently, after having donated a pint of blood the day of the game. Another Center Commando makes good!

And that wraps it up until the 28th. Let's all you NNMCM "Hank Lusettis" get set for the coming intramural campaign. It ought to be a good league!

FAMOUS GERMAN RELIC

Commodore Vardaman Gives Crucifix to Chapel

The Catholic Chapel at NNMCM has recently been presented with a beautifully carved Crucifix to be hung over the main altar of the chapel. The Crucifix is a gift from Commodore James K. Vardaman, USNR (Ret.).

Commodore Vardaman is at present a member of the Board of Governors of the Federal Reserve Commission and during World War II served with distinction on active duty in the Naval Reserve. After being for a time on the staff of Admiral Stark in England he participated in the North African and Sicilian invasions, following which he occupied various duty stations in connection with amphibious operations.

After serving at various activities in the ETO he participated in the Okinawa invasion in 1945. Later after the cessation of hostilities he was executive officer for civilian affairs on the staff of the Commanding General, Tenth Army. In May 1945 Commodore Vardaman was made naval aide to the president. Since May of 1946 he has been a member of the Board of Governors of the Federal Reserve Commission.

The history of the Crucifix is saliently given on a small plaque which hangs in the chapel. It reads as follows: "The striking Crucifix hanging over the main altar is a gift to the chapel from Commandore James K. Vardaman, USNR (Ret.). Fifty years ago it was carved by the Christus of the Oberammergau Passion Play.

After occupying a place in a small chapel in Germany until that edifice's destruction, it passed into the hands of the American forces and was returned by them to the Germans. They, in turn gave it to the civil authorities of the occupation forces who finally presented it to the commodore.

It was presented by him to the Catholic Chapel here in December 1948.

Cage League Starts Soon

This year's NNMCM intramural basketball league activity is slated to get under way the last of January, as soon as the varsity cage campaign closes.

The Naval Medical Admirals finish their season on January 27, and it is hoped that intramural hard-court competition can continue throughout February and the early part of March.

All entries in the loop MUST be in the Rec. Welfare Office at the Recreation Building no later than next Friday, Jan. 21. Squad rosters may number as high as fifteen players. Center Command, a perennial title contender, also will enter a club as will the Steward Mates of Annex Two and Medical School. One or two other outfits also are expected from the Naval Hospital.

Advance information indicates that almost every command on the base will be represented this year. Dental, Research and the Neuropsychiatric Service of the Naval Hospital have all been drilling since early December.

Members of the varsity will be eligible to take part in the intramural circuit after the Admirals' season ends.

Admirals Lose Key Players

Several members of the NNMCM Admirals, including two key performers, are no longer with the squad for various reasons.

Paul Harmer, regular guard and top scorer on the team before his departure, dropped out last week for personal reasons. Harmer had been a consistent pointmaker and outstanding floor man, and his loss has been keenly felt in recent games.

Another first-stringer, George Funk, went on night duty January 5 and is out for the rest of the campaign. A good shot and excellent rebounder, Funk was counted upon heavily by the scrappy Admirals.

Paul Glunz, lanky guard and tip-in specialist, also has left the team. A member of this month's graduating Lab School class, he is due to go on leave this week.

Courtmen Finish Season During Next Two Weeks

Badly outplayed and outmanned in many of their games this season but seldom outfought, the NNMCM Admirals close their 1949 court campaign with four tussles during the next two weeks.

Last night Naval Med battled a red-hot Receiving Station five here, and next Tuesday travels to Henderson Hall, Arlington, Va. to encounter the Marine Corps Institute. Two nights later NNMCM plays host to the Naval Air Station club from Anacostia, D. C.

The week after next a back-breaking schedule will be finished when the Admirals travel to Patuxent River, Md. NAS, on January 25, and then close shop by entertaining Headquarters Marines from Arlington on the 27th.

Going into last night's contest, NNMCM had captured only one of nine Potomac River Naval Command loop tilts, that lone victory being over Anacostia Naval Air, 66-63, prior to the holidays.

Crushing player losses, together with scarcely any drills before the PRNC circuit began, have sent the Admirals reeling but squad spirit has remained unbroken through it all.

Playing without the height, point-making and sorely needed rebounding strength furnished by Paul Harmer, George Funk and others during the first several frays, the short-handed local cagers have had tough sledding preventing recent foes from running the score out of sight.

In their first two outings after a fortnight's holiday layoff, the dead-game Medical Center basketballers were dealt disheartening setbacks by Headquarters Marines and Quarters K, last week.

A sharp-eyed band of Quarters K courtsters notched their second triumph of the season over NNMCM on January 6, 75-40, in a ragged, oftentimes wild and woolly tiff on the winners' floor.

Sparked by Nugent, cleve-ward, the victors broke a 9-9 deadlock after seven minutes of action, accrue a 16-9 quarter margin and ran their lead to 30-15 by halftime.

Trailing by 29 points at the four period opened, the Medical crew employed several different combinations in the late stages and fought desperately to keep down the tally.

Jay Bell, big center, topped NNMCM with 10 markers. The loser had a particularly poor night at the hoop, missing swarms of shots during the first three stanzas.

Headquarters Marines of Arlington, Va. licked Naval Medical, 63-39, there on January 4, in a ragged contest that reflected the holiday layoff of both clubs.

The Green and White of NNMCM lagged only 7-5 at the first quarter mark, but it was 30-16 when the game ended. After narrowing the score to 36-26 soon after the intermission, the losers went cold and the defense crumbled before the Marines' onslaught.

For NNMCM Paul Harmer made points and "Shorty" Dennler while Carl Norris and speedy Lee Burns turned in good floor game. Gainey dumped in 20 for the Marines.

BUNDLE OF CHARM

The little blond hair and brown-eyed beauty you see above is Miss Janet Mary Stringer, age five years. The Vital Statistics we would like to give when she is about 13 years older. This is January! What more can we offer in the "Girl of the Month" series than our "Bundle of Charm" Janet is the daughter of LT. and Mrs. Stringer, one of the many families here at the Medical Center.

Harry S. Truman

Sailor, Father of Triplets, Adjusts Self To Three-Times-Everything Situation

By Ships' Editorial Association

"Gosh, three of everything!"

These are the words uttered by an astonished—but intensely happy—sailor whose wife gave birth to triplets at U. S. Naval Hospital, Oakland, Calif. But the sailor, Raymond Camardella, AE1, USNR, was speaking of the cost when it comes to shopping for diapers, booties and other pink things for his newly acquired daughters.

The new arrivals remain a source of amazement to Camardella as he contemplates that chances for birth of triplets are one in 8,346. Camardella, on duty at Naval Air Station, Oakland, even now can "hardly believe it" although Navy doctors had told him months in advance to expect a triple "blessed event."

Weighing less than eight pounds in all at birth, the identical girls were born 30 Nov. 1948. At the end of a month each of the girls had gained more than a pound.

The infants are named Lorraine and Jeanne after Mrs. Camardella's given names and Rita after the father's sister. They join a half-sister, 9-year-old Catherine.

Birth of the triplets was the first for the Oakland naval hospital. During their stay at the hospital they were the pride and joy of staff members.

The problem of just who will do the family washing in the Camardella home looms large. But, however that question is solved, there's not much doubt as to who will have the necessary "floor walking duty," according to Sailor Camardella as he ruefully observes, "Gosh, three of everything."

Canadian Attends Lab. Class Here

At the request of the Canadian Government, Robert Breakell, Leading/Sick Berth Attendant/(Laboratory) L/SBA(L) of the Royal Canadian Navy is attending laboratory class at the Naval Medical School here. He was recommended to attend the school by Lt. Anne Chalmers, RCN, who spent about three months studying methods used by the laboratories here.

Breakell has been a member of the Canadian Navy for nine and one-half years and is currently stationed at Halifax. His home is in Oshawa, Ontario. He is married and has two children. During the war, he was stationed in Newfoundland, Ireland, and served in the battle areas aboard the HMCS Warrior.

Robert is greatly impressed by the Medical Center, and he hopes to do well in school so that other fellow-countrymen might follow in his footsteps.

Navy's Honorary And Reserve Consultants To Meet Here Today

A joint meeting of the Bureau of Medicine and Surgery's Honorary and Reserve Consultants will be held here today and tomorrow. Rear Admiral C. A. Swanson, the Surgeon General, has planned an extensive program. This meeting will bring to Washington forty-three of the nation's outstanding doctors, including the presidents and presidents elect of the American Medical and American Dental Associations.

The conference, with Read Admiral Lamont Pugh, Deputy and Assistant Chief of the Bureau of Medicine and Surgery, acting as chairman, will be opened with an address by Admiral Swanson, the Surgeon General. Speakers from the Bureau of Medicine and Surgery will also include Rear Admiral J. T. Boone, who will report upon the work of the Committee on Medical and Hospital Services of the Armed Forces and of the Hoover Commission; Rear Admiral A. H. Dearing, on the Medical Department's Personnel Situation, Present and Projected; Rear Admiral C. J. Brown will discuss the Navy's Medical Research Program; Rear Admiral C. V. Rault on the Dental Corps; Captain E. R. Hering, will speak on Field and Amphibious Medicine; Captain L. R. Wylie, on the Reserve Organization and Medical Training Program; Captain L. R. Newhouser on the Postgraduate Training Program, Its Present Status and Future Aims; Captain Nellie J. DeWitt, The Present Status of the Nurse Corps.

The Medical Service Corps will be represented by Lt. Cmdr. D. J. O'Brien, who will speak on the "Medical Service Corps, Its Development and the Road Ahead"; Cmdr. R. R. Sullivan, Cmdr. W. P. Briggs, and Cmdr. A. P. Webster will represent the optometry, pharmacy, and allied sciences sections respectively.

Tonight at the conference of Honorary and Reserve consultants, Commander J. M. Amberson, MC, USNR, Officer in Charge of the Department of Tropical Medicine, Naval Medical School, Bethesda, will be the guest speaker at the National Naval Medical Center, reporting on the Navy's recent medical mission in Africa. Dr. Amberson recently returned with the Naval Medical Unit which accompanied the University of California's archeological research expedition in Africa. Dr. Amberson, with the Navy group, traveled some 21,000 miles from Cairo to Capetown, studying tropical diseases, collecting specimens, supervising the taking of still color photographs and the shooting of several thousand feet of movie film. This material will be used to provide scientific information and records for the staff and students of the Naval Medical School in their quest for information on tropical diseases peculiar to Africa. The lecture will be illustrated with still photographs taken by the Navy group. The meeting will be open to members of the local and nearby Medical Societies, faculties of medical schools and hospitals, as well as Medical Officers of the Army, Air Force, Navy, Public Health, and Veterans Administration. This is the fifth of the 1948-49 series of guest lectures which are sponsored by the Naval Medical

Angel Street Play Date January 31

The Washington Hospital Committee of the American Theatre Wing, will present a three-act play in the auditorium Monday evening at 7:30, Jan. 31, entitled "Angel Street," a victorian thriller written by Patrick Hamilton.

The entire action of the play occurs in a house on Angel Street, located in the Pimlico district of London, along about 1880. "Angel Street" was first presented under the title "Gas Light," by Gardner Davies, on Dec. 5, 1938, at the Richmond Theatre, London, England.

It tells the demoniacs story of the Mannings of Angel Street. Under the guise of kindness, handsome Mr. Mannings is torturing his wife into insanity. He accuses her of petty aberrations that he has arranged himself, and since her mother died of insanity she is more than half convinced that she, too, is going out of her mind.

While her diabolical husband is out of the house, a benign police inspector visits her and ultimately proves to her that her husband is a maniacal criminal suspected of a murder committed fifteen years ago in the same house, and that he is preparing to dispose of her. Then starts the game of trying to uncover the necessary evidence against Mr. Mannings. It is a thrilling and exciting melodramatic game.

School, Captain Melville J. Aston, MC, USN, Medical Officer in Command.

Broadway Hillbillies Scheduled Here Feb. 9

A neat package of Broadway entertainment tied with colorful, folk-songs will be opened for sampling by the patients at The Medical Center Hospital when the Veterans Hospital Camp Shows' variety presentation, "BROADWAY HILLBILLIES" plays here on February 9.

Whether it's comedy, dancing, singing or instrumentalizing that particular dish, or a filling combination of all four, you'll find "BROADWAY HILLBILLIES" to be the entertainment menu for pleasure.

Comedy is served fresh and fast by HERBIE FAYE, an established star on the USO-Camp Shows circuit. Visual comedy is skillfully provided by the juggling "This Is The Army" star, LARRY WEEKS, now playing a return engagement on the Hospital Circuit. Servings of dancing that will delight you, GERALDINE & JOE spin through their tricky, comic act that was a hit in the big and night spots of three continents.

The popular section of the song department is hauntingly served by distinguished alumna of the USO-Camp Shows, SUZANNE WHITE, who adds her own special touch to the songs you want to hear. Songs with the folksy, funny, and lively touch are lustily offered by LARRY & BONNIE WEST.

2 Cent Charge to See Movies

Beginning February 1, 1949 a charge of 12 cents will be made for entertainment motion pictures shown in the NNMC auditorium. To relieve the congestion before movies in the lobby of the auditorium, advance sales of tickets will be made daily from the cashier's office from 1400-1500 Monday through Friday beginning January 19, 1949. Regular sale of tickets will begin at 1715 for the 1800 show and at 1930 for the 2000 show.

Due to the difficulty in making change involving the charge, all patrons are urgently requested to bring the right amount of money when purchasing tickets. The order to charge for seeing motion pictures originated from the department.

EDITORIAL

Someone has said that "a prime temptation of every man is to be like the tailor—always taking the measure of other men and never taking his own." Such a man does not gain the respect of his fellows even though he may be in a position to exact obedience.

There are those in positions of honor and trust who have the respect of all their associates. Yet others take advantage of their offices to exact humiliating obedience, destroying respect for themselves and the offices they hold. No organization can long maintain its efficiency where obedience is expected at the expense of respect.

Likewise no individual can long maintain the respect of his fellows when his actions belie his words. To put a man on report for "brown bagging" a pound of butter does not give one the right to turn around and do the same thing when he knows he can get away with it.

Many men will be discharged from the Navy. You may be one of these. The pattern of life you have led here will follow you when you return to civilian life. If you have come to respect your fellows for what they are, you have made a start toward a satisfactory readjustment as a civilian.

But remember also to take stock of yourself—take your own measure. Admit your faults and weaknesses.

God expects obedience from his people—but not at the expense of respect. The business executive as well as the day laborer. Certainly we can expect no more from our fellows in the affairs of men.

Thomas W. Burke, VAP 'NEWS' Advisor, Leaving

Thomas W. Burke, soldier-journalist, O.S.S. man and editorial advisor to the "News," will be leaving the Medical Center in the next few weeks.

Although he is a wheel chair patient, Burke has played a vital role in the re-organizing of the station publication. Without his assistance the present paper could not have made the progress that it has.

The Medical Center personnel complement does not include a journalist.

Burke realized this when he offered his services in an advisory and teaching capacity. He has spent many of his valuable hours instructing the staff of the "News" on the principles of Journalism. His teaching has been so extensive that we can carry on in his absence. His understanding and patience while teaching, is to us something which money could not buy.

Although Burke is leaving, the results of his good work will remain evident in the writings of those he has trained on the staff of the "News."

Burke as yet has not regained his full health. We of the "News" staff wish him a speedy recovery and success in any job he undertakes.

Lab. Class Graduates

Graduation exercises were held for Laboratory Class No. 10 on January 15 at the Naval Medical School. Honor man in the class of 44 students was R. A. Nygren, HMC, and close behind came Herick, D. K., HM3. Both men have been assigned to duty at the Medical School. Other men retained for duty at the Medical School from "Lab 10" were: Coble, J. E., HN; Van Derveer, C. L., HN; Foreman,

Lt. Cheverfils Receives Good Conduct Medals

Lt. F. A. Cheverfils, MSC, USN, Administrative Assistant to the Commanding Officer of the Naval Medical School, received his fifth and sixth awards of the Good Conduct Medal on January 6. The awards were presented by Captain M. J. Aston, MC, Commanding Officer of the NMS.

Lt. Cheverfils first entered the Navy on December 8, 1924 and has over 22 years of active service to his credit.

C. P., HN; Glunz, P. R., HN; Niner, P. J., HN; and Schroer, R. L., HM3.

Crew's Library

Pictured above (left to right) is Mrs. O'Donnell and Ronald J. Bourgea HM2 checking library cards and books, also in picture, shows Mrs. Bean head librarian recommending books for the patients to Mrs. Ross T. McIntire, who is on the Gray Ladies staff.

Library Handles Over 40,000 Books Yearly

Nothing could be more fitting than a library to be placed close to the Ships Service for one feeds the brain and the other takes care of the gnawing pains. After reading for an hour or two, a coke tastes mighty fine, and vice-versa, a bit of light reading on top of a cheese sandwich helps digestion.

"Who wrote Leviticus?" "Could you give me the spelling of Hypopolysylabysesquipadalian?" "Is there such a thing as a Dodo bird?" These are all good examples of the questions that a librarian must face each and every day. But it's fun! For in helping the people, he gains knowledge himself.

The library is a natural place to address these questions. Its shelves are well stocked with books on all subjects: from algebra to zoology. And for the fanciful, there are countless volumes of fiction. There are, in all, 8700 books in the library covering almost any subject in which a person can be interested. For short readings, the library receives issues of 80 different magazines and three daily papers.

On the lighter side of working in the library comes the usual confusion over the titles asked for. With only a vague memory of its name "Leave Her to Heaven" became "Lever to Heaven," "40 Days of Musa Dagh" changed into "40 Ways to Amuse a Dog," "The Sun is My Undoing" was called "My Son is My Undoing," and "Berlin Diary" wound up as "Irving Berlin's Diary."

Mrs. Bean, the librarian, is capable and well informed. She graduated from the Wisconsin Library School, and served in the following public libraries: Buffalo, N.Y.; Detroit, Michigan, and Sherrygan, Wisconsin. Mrs. Bean has been with the Navy since 1942, serving in the library at the Naval Hospital NOB, Norfolk, Va., until it closed in May 1947.

Assisting Mrs. Bean is, Mrs. O'Donnell, a graduate of George Washington University. She majored in Psychology.

Last year, your library issued a total of 40,961 books. The patients accounted for about three quarters of the demands. In top demand, were fiction, and biographies, and history and travel holding a close second. This is in itself a proof that your library has been a help and a pleasure to many in the past, as it may become for you in the future.

(SEA)—Four to nine months of formal schooling will be available to one-year enlistees of the Marine Corps.

Expansion of service school facilities and quotas in both ground and aviation fields will permit a desired ratio to be reached. Recruits will attend basic training and then, receive leave. Upon return, they will be assigned schools in the following fields: clerical, engineer, ordnance repair, automotive repair, supply-clerical, photographic, electronics, aviation, and cooking and baking.

The Dental Explorer

By Morton L. Rodman

The staff and students of the Naval Dental School were out in full force for captain's inspection on January 12. The crew received a mark of 4.0, thanks to CDR F. E. Frates and Chief F. I. Whiting who are constantly enforcing the navy regs., and reminding the men that they are in the regular Navy.

Scuttlebutt has reached the ears of a few people here at the school that a large number of personnel attached to the Medical Center are interested in attending the Dental School. The following paragraphs will give you a brief outline of the Dental Graduate Technician course.

The length of the D.G.T. course is eighteen weeks. Subjects covered during this time included Dental Anatomy, Anatomy and Physiology, Elementary Chemistry, Dental Materia Medica, Therapeutics and Toxicology, Oral Bacteriology and Pathology, Oral Hygiene, Roentgenology (X-Ray) Operating Room Assistant, Clerical Procedures, Typing, First Aid, Hygiene and Sanitation and Prosthetic Lab. Procedures.

In studying the prescribed subjects the dental department has split them up into two categories, theory and practical hours of study. 154 hours during the 18 weeks is set aside for theoretical study of dental procedures, and during this time 395 hours are spent in practical work. To a new hospital corpsman the subjects might seem too hard to digest, but actually they are not as tough as they sound. The doctors are always on hand to help you with your work and help make it easier for you.

If you think that you would like to attend this school, the procedures are simple. First you must be recommended by the doctor you work for. After receiving his recommendation, submit a formal letter to the Bureau and when the next class convenes if there are not too many on the waiting list you will in all probability receive your orders to attend. That is about all there is to tell you about the school for now. In coming editions of the NEWS you will see the dental department in action and attending school, this will give you a clearer view of things.

Patients' Corner

By Robert V. Griset

STORY ABOUT JOEL

Plucky is the word for Joe. O the hospital records, Joe is Joseph C. Plowden, Veterans Administration patient, on Ward 3A. However, to the staff, patients, and even visitors in his "sphere of influence," he is just Joe.

A patient here since April, 1947, Joe suffers from chronic arthritis. When admitted, the only part of his body that he could move unassisted was his head. Now he can move his left arm to the extent where he can smoke alone, once the cigarette is lighted for him and the ash tray placed conveniently. The other arm and legs are also responding slowly.

The amazing thing about Joe is his unfailing good humor. For, so completely crippled and so long hospitalized, Joe has put many "shorttimer" and complainer to shame.

A native of Leonardtown, Md., Joe has lived in Washington for the last 28 years. As a technician fifth grade, Joe served in England, France, Belgium, The Netherlands and Germany during World War I and rates four combat stars on his ETO ribbon.

His table top reflects Joe's many interests. There is a picture of his sister, Ada, his only regular visitor; his Red Cross radio; a plastic Santa Claus, gift of a retired chief, former patient, and a covered jar of tiny plants.

At Christmas time, there were also a score of cards, mostly from former patients and corpsmen. Incidentally, the gayest group on the ward Christmas Eve was that gathered around Joe's sack.

The daily trips to Physio-Therapy and occasional expeditions to the plaster room are Joe's only opportunities to look about the hospital. It is then that Joe's "public" sometimes people he doesn't even know, yell "Hi-ya, Joe!"

His splendid spirit, fortitude, patience, high good humor, and immense courage are an inspiration to all. The great battle for good health he has waged so far and continuing to fight, far outshines any of his wartime combat experiences and calls for our best wishes for his continued improvement and the hope that he will be able to walk again much sooner than he expects.

P.S. Joe has a birthday coming up on February 5.

"WINGS OF AN ANGEL"

By Harry K. Barton, Jr.
That gray wagon with "Sho Patrol" scrawled on the side makes an ambulance look like a red convertible! A great big Boatswain Mate jumped out and barked "Fever over your Liberty card swabbie!" I searched for what seemed hours, knowing all the time that I did possess such a valuable article (you guessed it—I crawled in—(correction)—was pushed in. O, no! "Attention!" sez he—"What that silly smirk off your face", etc., then to the cell—Pushed again. What are civilized folks doing these days??

WARD NEWS

By Jesse Wakefield
It gives us, "patients and staff" great pleasure to enter our column in the NMMC News. We will try to keep you posted on the local happenings in our ward.

Seems a certain chief named R. Smith likes our ward; he spent seven months up here last spring and is now back with us again. Can't win, can you chief?

Bob Norton is still singing "I want for Christmas is my two front teeth" but our opinion is he needs more than two front teeth. Best luck, Bob. We hope to see you soon with all your teeth.

From all of us to all of you, your next edition.

Red Cross Keeps Patients' Morale High On N.P. Wards

Red Cross offers the same type of program on the Neuropsychiatric Service which is available on all wards. Gray Lady, recreation worker, and social worker each offer specialized skills which combine to give overall Red Cross service. There are certain differences between various wards in the hospital and therefore in the needs of the patients which affect ways of making the program available. One such difference on the N.P. Service is that the majority of the patients do not have the freedom of the hospital. They cannot therefore, for example, attend to many matters of personal business—nor can they attend some of the normal recreational outlets available to other patients.

The men like to play active games such as ring toss, table shuffleboard. Some are very industrious at crafts, turning out square knot belts, pyrolace belts, leather slippers, stuffed animals, etc. For those who like art work, finger-paint, water colors, oil paints, and charcoal are available. Group games such as Anagrams and Pit, as well as all kinds of quiz games are popular. The patients make recordings both vocal and instrumental, and at various times have had regularly scheduled dancing and bridge instruction.

Evening recreation consists of weekly parties complete with hostesses, games and refreshments, two weekly movies, and entertainers—singers, instrumentalists, and variety shows.

Much of the time of the social worker on N.P. is given to work with relatives of patients who tell the social worker facts about the patient's past personality and behavior. This is called a social history. When relatives come to the hospital, as they frequently do, to give social history information, social workers offer them the opportunity to discuss their own worries and concerns about the patient's illness. When they wish to stay over night, the Gray Lady Housing Service finds them a nearby room.

Continental U. S. and abroad. A partial list includes the USS MINNESOTA; FRANKLIN; LAMSON; OZARK; BIRMINGHAM; RELIEF and TOMAPAN.

Others include the Medical School Hospital; Hospital Corps Training School (under instruction and later as instructor); Naval Affairs—Red Cross Liaison, Navy Medical School, and Bureau of Medicine and Surgery, Navy Department, all in Washington, D.C.

In addition, the Receiving Ship and Navy Yard, both in Norfolk, Va.; Inspector of Construction, USS RELIEF, Philadelphia, Pa.; Service d'Hygiene, Haiti; Naval Hospitals at Washington, D. C.; Norfolk, Va.; Chelsea, Mass.; Portsmouth, Va.; Great Lakes, Ill.; and Portsmouth, N.H.; and as Instruction Officer at Hospital Corps School, Portsmouth, Va.

Commander Lyon's appointment as Officer-in-Charge of U. S. Naval School of Hospital Administration marked the first time in the U. S. Navy that a Hospital Corps Officer was placed in command of an independent Naval activity.

As for his selection of a permanent duty station when his retirement is effected on May 1st of this year, the Commander plans to investigate Southern California, Arizona and Florida. He will probably decide on the spot where the bass are as plentiful as the ducks.

Naval School Of Hospital Administration Highlights Naval Medical Training Program

Meet Your Commanding Officer Comdr. Glenn F. Lyon

The U. S. Naval School of Hospital Administration here was formerly designated as the Hospital Corps Officer School and functioned under command of the Naval Hospital, NNMHC, from July 12, 1943 to August 2, 1945.

On September 5, 1945, the school was officially established by the Surgeon General of the Navy, VADM Ross T. McIntire, MC USN, as subordinate command under the National Naval Medical Center, with G. F. Lyon, MSC, USN, as the first Officer-in-Charge.

The initial function of the school is to provide a concentrated course of instruction for officers of the Medical Service Corps and Hospital Corps and Hospital Corps senior petty officers in the various fields of hospital administration.

The intermediate course of instruction is of ten months' duration and consists of didactic and practical instruction in the following subjects: general and cost accounting; internal hospital accounting; procurement and accounting of medical department property, and office management and hospital personnel administration.

Also, veterans' affairs; safety engineering; legal procurement and law; public speaking; commissary administration; maintenance methods, and special subjects are taught.

The tenth and present officer class in hospital administration commenced on September 7, 1948. With the graduation of the ninth class on February 28, 1948, a total of 456 officers have completed the course in hospital administration.

The first enlisted class in Medical Administrative Procedures commenced on October 1, 1948, with fifty-seven enlisted Hospital Corps and Hospital Technician men forming the student body.

Upon graduation on June 30, 1949, they will have completed 1,296 didactic and practical hours of comprehensive instruction in such subjects as property and accounting; clerical procedures, commissary procedures; business English (general review of English grammar); fundamentals of naval justice, and veterans' affairs and educational services.

In addition, naval organization; military customs; leadership (petty officer qualifications); Naval Reserve components and retirement act; industrial safety engineering; maintenance methods; medical records; medical procedures, and military drill and formations must be studied. Certainly this is a long way from the days of "ye olde" Handbook of Hospital Corps.

Beside subjects dealing with Naval administration, the courses are made more scholarly by employing the services of civilian professionals to teach several special subjects contained in the curricula, viz., engineering, essentials of English, business law, accountancy, and similar arts and sciences.

In short, shipmate, the mission and objective of the U. S. Naval School of Hospital Administration is to provide adequate training in hospital administration for officers of the Medical Service Corps and the Hospital Corps, and in basic medical administrative procedures for senior petty officers of the Hospital Corps and for Dental Technicians.

Commander Glenn F. Lyon was born in Johnson County, Kans. on April 9, 1887, and at an early age he began what was to become a long series of "transfers." Moving to Stillwater, Okla., in 1891, he attended public schools and completed one year (1904-1905), at Oklahoma A & M College.

He then transferred to Purdue University in Lafayette, Ind., from which he was graduated in the Class of 1908. He briefly ventured into the business world at French Lick Spring, Ind., but the lust for adventure and the sea beckoned. Thus commenced a career in the United States Navy which is now in its fortieth year.

Commander Lyon enlisted in the U. S. Navy on March 11, 1909 as a Hospital Apprentice First Class, which rating at that time was the equivalent of what is now our Petty Officer First Class.

As he reminisces, CDR. Lyon informs us that the scale of pay was \$33.00 per month. He was ordered aboard the USS MINNESOTA, under the command of the then Commander "William S. Sims", a proud battlewagon from "way back then".

In 1910 he was appointed Hospital Steward, comparable to the current rating of Chief Petty Officer, with the then unheard of salary of \$66.00 per month, a miniature fortune in those pre-inflation days.

This income provided enough money to venture into another sea, the Sea of Matrimony. The knot was tied on March 26, 1913 at Campbellsburg, Ind. And so began another career, that of "Mr. and Mrs. Glenn F. Lyon," which is now in its thirty-sixth year.

Immediately following the United

States' entry into the first World War CDR Lyon was appointed Pharmacist. In 1919 he was appointed a Chief Pharmacist, a rank which he held for the next twenty years because no provision was then in effect for high commissioned rank in his chosen field.

With the establishment of commissioned Hospital Corps ranks during World War II, CDR Lyon's promotions culminated in his present rank of Commander, first in the Hospital Corps and later in the Medical Service Corps.

Commander Lyon has served in many commands at sea, in the con-

Sportin' Aroun'

By Clyde Schubert

As the college basketball season moves into its biggest month of rim-raiding — February — several quintets throughout the nation are beginning to show opponents that they possess the stuff of which conference champs are made.

Out in the Midwest a power-loaded band of Minnesota Gophers has been setting the Big Nine courts afire with the great play of its stars Jim McIntyre and Whitey Skoog. And right with the Minneapolis club ranks Illinois, another torrid Western Conference contender.

Down in the Southern circuit North Carolina State and William and Mary, with its ace pivotman Chester Giermak, appear the classiest crews. N. C. State crushed North Carolina U., 67-36, last week.

Watch unheralded Nebraska's Cornhuskers in the unpredictable Big Seven chase, although both top-rated Kansas State and scrappy Oklahoma are displaying power. The K. State Wildcats nipped the Sooners, 47-45, recently, for Okla.'s initial league loss in five forays.

That second Okla. Aggie - St. Louis U. meeting later in the campaign ought to be some struggle. Last weekend's amazing 29-27 overtime triumph by Oklahoma A and M proved just how well ball control sometimes can pay off.

Bradley's outstanding five also should be worth watching from here on in. Up until this week the Peoria, Ill., ballhawks had notched 17 scalps in 20 attempts.

In the Big Six Utah and Wyoming are battling it out head and head, while Cincinnati tops the Mid-American heap after flailing runnerup Western Michigan the other night, 75-57.

Washington State's lanky outfit is running in the Pacific Coast loop's North League, with 18 victories against a lone setback this season, and Stanford, with a 15-2 mark, heads the South League at this writing.

Big games this Saturday will be Kentucky-Notre Dame at Louisville, Okla. A. and M. versus DePaul in Chicago, Loyola of Chicago, another rugged quint, meeting Duquesne in Pittsburgh, and Villanova's Wildcats tackling Georgetown down in D. C., at the Armory.

Western Kentucky, of course, remains red-hot, while Hamline, up in St. Paul, should stay unhaltered until the Pipers clash with the mighty Phillips Oilers on February 17. Then—look out!

That brings forth the old saying, "some guys never get the word." Hardly anyone has gotten the word on why our NNMCM activities such as basketball and baseball so often fall flat. The NEWS has information on the matter, but SECURITY (?) prevents our printing either facts or opinion on the issue. Seriously, our hands are tied!

If nothing else our Admirals should at least get their names in print—for staggering through a heartbreaking schedule, while bucking the most impossible of odds. The cards were stacked against them.

Members of the Naval Med cage squad who stuck it out to the finish include: Leon Burns, Carl Norris, Jack Levi, George Funk, Jay Bell, Willie Young, Earl Dennler, "Pete" Stanley and Paul Murray. Thanks for staying with it, men.

FINAL THOUGHT: Met'inks the Wash. Times-Herald sports section falls far below the standard set by its rivals, the Post and Star. As a whole, the paper is a scandal sheet, pure and simple. Yet of the three, the Times-Herald seems to be easily the "best seller" at NNMCM. Strange, isn't it?

Watch That Wristlock

Bill Richards, N.N.M.C. center is fouled by an unidentified Quantico player as he attempts a lay-up shot against the Marines. Jack Levi, Admirals forward, comes in to aid his team mate while Fournier (No. 16) of Quantico watches. The Marines won 83-21 here Jan. 11.

Tower Topics

By George E. Royster

Everybody is still talking about the dance last Friday night. It seems that all hands had a swell time. Those "gownless evening straps" were just what the doctor ordered. If that's the new look I'm for it.

What's this I hear about the nurses being a little shy? Someone said that they never want to see their names in print. Come on, girls, that "Iron Curtain"—should be raised.

Last week we dug our way through a few holes of golf with the following results:

I think that I shall never see a hazard rougher than a tree,
A tree o'er which my ball must fly if on the green it is to lie;
A tree which stands that green to guard and makes my shot extremely hard,
A tree whose leafy arms extend to kill the mashie that I send;
A tree that stands in silence there while angry golfers rave and swear.

Niblicks were made for fools like me, but even I can't miss a tree.

A problem which must be settled soon is the better backing of our N.N.M.C. activities.

The band does all of its practicing on its own time. The men are given no time off and must get together late in the evening if they are to practice. Couldn't they be allowed a few hours off in the afternoons each week so that they could really be proud of their accomplishments?

Of course, this is only one thing. The basketball team had the same trouble all season. Working port and starboard, they could never put the same team on the floor twice in a row. You all know the results. Let's see if something can't be worked out for the coming baseball season.

The March of Dimes is now in progress. It's the worthiest of causes so how about everyone giving until it hurts?

That's it for this time. Don't forget to mail those Valentines, folks.

Intra. Court Play Begins

An eight-team intramural basketball league started play here this week, with hard court action slated to continue through February, and part of March.

Expected by many observers to be the two toughest clubs in the circuit are the Main Quarters and Neuropsychiatric Service "Cold-packers" quintets, both of the Naval Hospital command.

The Main Quarters squad is headed by varsity cagers George Funk, Pete Stanley and Willie Young, while the N.P. lads boast such men as Paul Harmer, Jack Levi and speed boy George Royster.

A definite dark horse is Center Command, headed by burly Jay Bell, regular NNMCM Admirals center the latter part of the varsity campaign. The Center courtmen are the tallest in the loop.

Others entered are Research, Dental No. 1 and Dental No. 2, X-Ray and Med School. Little is known about any of these teams except Med School, which will be led by Carl Norris and John Swinko and may well prove the top five in competition.

Annex two failed to enter a club. The colored boys were rated top contenders but their team failed to materialize for league play.

The NEWS will publish results and highlights of all games played in the loop, beginning with the February 11 issue.

Admirals End Cage Campaign

Our Naval Medical Center varsity cage squad brought its campaign to a whirlwind close this week by matching baskets with Patuxent River Naval Air Station, Anacostia NAS and Headquarters Marines on successive nights.

The Admirals made their final Potomac River Naval Command league road jaunt of the season Tuesday when they traveled to the Patuxent River NAS, then entertained the Anacostia Naval Air's courtsters the next evening and battled the Marines here Thursday.

Prior to this week the NNMCM quintet had played 11 PRNC contests, winning only one of them. Despite discouraging player losses through transfers and men going on night duty, the Naval Med squad has given a good account of itself against most foes.

A furious fourth quarter rally fell short as NNMCM dropped a 56-47 decision to the Marine Corps Institute at Henderson Hall on January 18.

With George Funk, Jack Levi and Earl Dennler leading the way, the Admirals cut a 14-point lead down to 52-47 with one minute left, but couldn't quite overtake the M.C.I. five.

Jay Bell hit seven baskets in the

first half for the losers, scoring 13 points during the game. Dennler notched 13, the aggressive Fournier nine and Levi eight. NNMCM trailed by quarters 16-9, 32-25, and 45-3. Feemster's 13 tallies pacing the Marines.

The highly-regarded Receiving Station courtmen from Anacostia D.C., found the second-division Admirals easy pickings for three star games here January 13, but were badly outplayed in the last 10 minutes by a battling Naval Medical basketball club.

The Rec. Station's regular front line amassed 45 points as NNMCM sprawled, 58-42, in what resembled a longshoremen's brawl more than a basketball game near the finish.

Forward Spurgin collected 21 for the victors. His running mate O'Brien, the winners' sparkplug, hit 11 and Amburgy, big pivotman, meshed 13. It was all Rec. Station until the bruising fourth frame. Score reading 21-8, 34-15 and 48- by periods.

Three Strikes and a Spare

Group Picture of the NNMCM Duck Pin Bowling League (left to right) Christina Lund; Mary Jane Koimer; Jean LeBlanc; Chief LeBlanc; Bill Brumbaugh, HM3; E. H. Hancock; and M. C. Mellor.

Battleships Set Pace In NNMCM Pin League

Second half timber-toppling in the NNMCM Bowling league got under way on January 3, the loop being composed of ten five-man teams. Each squad is made up of service and civilian personnel working here at the Medical Center.

In keeping with Naval tradition league teams have assumed names of ship classes, which include: Battleships, destroyers, aircraft carriers, etc. A spirit of keen competition, prevalent throughout the first half maple-mauling, also is expected to prevail during the remaining weeks of rolling.

At present the top four teams are staging a battle royal for first place. The current runnersup are only one game out of the lead, while close behind come the third and fourth-place clubs, who are tied at this time.

The Battleships are the proud holders of most league laurels now, sporting the high pin fall, high team set, and boasting several of the

league's top individual bowlers in their lineup.

Mary Jane Koimer is tops among NNMCM women lumber-larrupers at this time. She possesses the high individual feminine average of 90 for 68 games, has accumulated 51 spares and is tied with Mrs. J. LeBlanc for the honor of high game, 130, rolled by any of women keglers.

Leader among the men is Kirby of the station fire dept., who is averaging 111. He is on to compound's pace-setting pin team and also leads in three individual departments besides having high game average. His 156 is high game to date.

Mr. Dewitt, also on the first-place squad, has collected some 25 strikes in his 68 games to lead in the category.

League competition will continue until April 11, after which a big league party will be staged. Periodical loop standings will be printed in the NEWS from time to time.

N.M.R.I. Aids In Navy's Research Work

The Naval Medical Research Institute, the largest activity for medical research in the Navy, was established in 1942. Its mission is to further medical and allied research for the purpose of improving naval practice in regard to protection of personnel versus injury, the prevention of disease, and the treatment of sick and injured. In conjunction with this mission, special consideration is given to the training of personnel in research methods and to the provision of opportunities for naval officers to participate in research.

The staff includes civilian and naval scientists and technical assistants. The Institute functions as a unit to accord the individual investigator the greatest possible freedom in prosecution of his research projects.

Research undertaken at the Institute embrace such projects as the medical aspects of ionizing radiation, characteristics of the body that enable it to withstand high impact forces encountered in aviation, development of a vaccine for the prevention of scrub typhus, the biological effects of vibration, investigation of the causes and means of control of diarrheal diseases and dysenteries, dietary elements influencing dental caries, studies of the cerebral circulation by means of the lucite calvarium, studies of the sleep wakefulness cycles employing the techniques of neurosurgery, facilitation of learning in lower animals and man, and the histopathological effects of gas bubbles following rapid decompression from high pressure atmosphere and too-high altitudes.

The Institute's many laboratories are designed for research in such basic medical sciences as bacteriology, biophysics, chemistry, parasitology, pathology, pharmacology,

physiology, psychology, and virology. There are facilities for work in the fields of dentistry and experimental surgery. In addition, there are installations including pressure tanks for research in aviation and submarine and diving medicine, and psychometric rooms for physiological and environmental investigation. In conjunction with these laboratories, there is an animal building with modern facilities for breeding animals and with air conditioned laboratory suites for studies requiring controlled environmental conditions. Technical shops, including glass blowing and instrumentation laboratories manned by skilled craftsmen, are available for the design and construction of laboratory apparatus. The laboratories are especially well equipped for biological research and contain such items of special apparatus as the electron microscope, apparatus for X-ray diffraction and electrophoresis, an ultracentrifuge, and ultraviolet, infrared and mass spectrographs.

RADM Morton D. Willcutts Commands Center During Seventh Year

Seven years ago the National Naval Medical Center was but an idea on an architect's blueprint. Today it stands as a monument describing to the people of our great nation the advancements which have been made by the Medical Department of the Navy.

Currently hard at work during the celebration of the Medical Center's seventh anniversary we find RADM Morton D. Willcutts, Medical Officer in Command, at the helm of the navy's largest medical institution. Admiral Willcutts took command of the Medical Center in the latter part of 1948, relieving RADM T. C. Anderson.

Since his arrival here at the Medical Center Adm. Willcutts has gained the respect and friendship of all the personnel under his command. The NEWS feels his progressive policy, especially his ability in mapping changes and seeing these innovations through to a successful completion is to be lauded.

Admiral Willcutts zest for and consuming interest in his work is in keeping with the policy first established by the late President Franklin Delano Roosevelt, through whose foresight and efforts the National Naval Medical Center became a reality.

Captain L. O. Stone Pending Advancement to Rear Admiral

Yes, those rumors you've been hearing lately are true. Captain Leslie O. Stone, MC USN, Commanding Officer of the Naval Hospital, has been recommended for promotion to the rank of Rear Admiral in the Medical Corps of the United States Navy.

Now in his third year as MOIC of the largest command on this station, Captain Stone is expected to be officially elevated to Rear Admiral around June of this year, as soon as the necessary vacancy is created.

Upon his actual promotion to Rear Admiral, he will leave here for duty elsewhere.

Able to look back proudly on more than 30 years continuous service in the Navy Medical Corps, Capt. Stone transferred from the Naval Reserve to the regular Navy as a Lieutenant in 1920, and climbed the ladder step by step until he attained the rank of Captain on June 16, 1942.

Dr. Stone, an Eye, Ear, Nose and Throat specialist, is a member of the American Medical Association; a fellow of the American College of Surgeons and the American Academy of Ophthalmology and Otolaryngology, and a member of the Board of Otolaryngology.

A tall, impressive-looking man, the 53-year-old Captain came here

Hospital Corps Now CO-ED

Rear Adm. C. A. Swanson, the Surgeon General, has announced that the Hospital Corps School at Great Lakes and San Diego will now function as co-educational institutions. For the first time since the establishment of the Waves, a selected group of 28 women have been assigned to the schools. They will receive the same curriculum as the male hospital corpsmen, a 12-week course of instruction in the basic fundamentals of nursing, pharmacy and chemistry, laboratory technique, ward management, operating room procedure, materia medica, first aid and minor surgery.

as C.O. of the Naval Hospital on September 6, 1946, from a position as MOIC of the USNH, Aiea Heights, T.H.

US Naval Hospital, Bethesda, Md., 1942-1949

N.S.H.A.

Established
Here in '45

From 1943 to 1945 the Hospital Corps School functioned under the command of the Naval Hospital, National Naval Medical Center, as a training center for administrative officers. On 5 September 1945 this school was designated as the U.S. School of Hospital Administration and was established as a separate command of the National Naval Medical Center.

The School functions as a training center for Medical Service, Hospital Corps officers and higher petty officers ratings in the enlisted mens bracket, training them in the various fields of hospital administration.

The current course of instruction requires 10 months to complete and consists of classroom work and practical laboratory instructions, plus the many other subjects which were outlined in the last issue of the station NEWS.

Besides subjects dealing with Naval administration, the courses are further made more scholarly by employing the services of civilian professors to teach several special subjects contained in the curricula, viz, safety engineering, essentials of

Left to Right Vice Admiral Ross T. McIntire, Rear Admiral Charles E. Riggs and Rear Admiral Clifford A. Swanson. This picture was taken of the Surgeon Generals of the Navy, at the recent Joint meeting of the Bureau of Medicine and Surgery's Honorary and Reserve Consultants, that was held here at the National Naval Medical Center.

English, business law, accountancy, and other similar arts and sciences.

In short the mission and objective of the outstanding school is to provide adequate training in Hospital Administration for officers and enlisted men, showing that the Navy takes great pains and money in teaching the modern sailor to be professional and not just a plain sailor.

N.D.S. Highlights Navy's Educational Advances in Dentistry

The Naval Dental School was placed in operation in 1923 by Admiral E. R. Stitt, then Acting Surgeon, but it was not until 1936 that this school was organized as a separate command by the Secretary of the Navy and became a unit of the National Naval Medical Center. It was moved to its present location in Bethesda in 1942.

It functions primarily as a school for postgraduate instruction to naval officers but also trains enlisted dental technicians, offering courses in three specialties: dental technology (general), dental technology (prosthetic), and dental repair. Two courses are offered to naval dental officers:

Basic Indocrinal Course. This course is designed for newly commissioned officers and gives special emphasis to Naval Customs, Navy Regulations, Naval Courts and Boards, and the Manual of the Medical Department.

General Postgraduate Course. Designed to acquaint experienced officers with recent advances and newly developed specialized procedures, this course includes oral diagnosis and roentgenology, operative dentistry, periodontis, oral bacteriology, endodontis, biochemistry, crown and bridge prosthesis, partial and full denture prosthesis, dental property and accounting, and dental administration.

Maxillofacial prosthesis and ocular prosthesis are provided for all patients requiring such treatment. The Navy's plastic eye was developed at the Naval Dental School in conjunction with illustrators from the staff of the Naval Medical School.

In addition to these services, the Naval Dental School provides routine dental treatment for patients of the Naval Hospital and the staff of the National Naval Medical Center, and prosthetic dental treatment for all patients in the Potomac River Naval Command, except those at the Naval Gun Factory.

SECDEFN Okays Higher Pay

The Secretary of Defense, this week, endorsed a proposal to give members of the Armed Forces an average 15 per cent pay increase as per the Hook Commission Report.

The proposal now goes to the Bureau of the Budget, where it presumably will be cleared for submission to Congress. President Truman already has included an estimate of \$400,000,000 in his fiscal budget to cover the cost.

Secretary of Defense Forrestal said he had approved most of the pay raise recommendations made recently by a special commission headed by Charles R. Hook, Ohio Industrialist.

The Secretary of Defense also recommended that a study be made of the possibility of allowing additional survivor benefits for service men.

The recommendations, if approved, would tend to completely overhaul the present retirement system.

N.M.S. Postgraduate Institution Commemorates 47 Years of Progress

Although the Navy's first Surgeon General W. P. C. Barton, as early as 1809 recommended the establishment of a training school for naval medical officers, there were no definite steps taken toward such establishment until 1878 when a 2-year course of formal instruction for junior medical officers of the Navy was inaugurated at the U.S. Naval Hospital Brooklyn, N. Y., under the direction of Surgeon General William Grier. Credit for the establishment of the first bona fide U.S. Naval Medical School, however, is usually given to Surgeon General Tryon, who in 1893, issued an order creating an instructional course of three months' duration at the U. S. Naval Laboratory and Department of Instruction at Brooklyn, New York.

The principal activities of the Medical School include: regular instruction courses, consultation and physical examinations, research and investigation, testing materials and providing methods, production of reagents and biologicals, liaison with government and civilian institutions, diagnostic and medico-legal service with examining boards, maintenance of a reference library, printing, photography and reproduction.

The Naval Medical School publishes laboratory manuals, which are produced by the officers in various departments, together with manuals published by members of the Hospital Staff. These receive wide distribution throughout the Navy, and a number of copies are sent to other Federal agencies, as well as to medical schools and civilian hospitals.

Red Cross

(Continued from page one)

the actual fighting period, this hospital patient population consisted of about 40 per cent battle casualties and 60 per cent of illness not connected with actual fighting. Red Cross social service then as now concerned itself with working with patients on personal and family problems, getting social histories, participating in verifications of need for emergency leave, dependency discharge, etc., and counseling on post discharge planning for disabled servicemen returning home.

Reminiscing from the long-time staff members brings forth nostalgic looks and colorful stories of the hectic war years. The newer arrivals are looking forward, however, to the chance to do an even better job in getting to the patients and the staff, the services of their Red Cross.

Century of Effort Adds Distinction To Nation's Capital

The present United States Naval Hospital here is the result of more than a century of effort to establish a Naval hospital of distinction in the nation's capital.

In 1812 the first hospital facility for Naval personnel in Washington was set up later being succeeded by one established at the Navy Yard. This second installation was discontinued in 1843.

For several years thereafter this new hospital was known as the Naval Medical School Hospital. When the "old" Naval hospital near the Navy Yard was discontinued in 1911, this latter institution became the U. S. Naval Hospital, Washington, D. C.

This hospital was transferred to Bethesda in 1942 as part of the National Naval Medical Center.

An active and vigorous residency and inter-training program is carried on at the hospital. Also, train-

ing of Medical Department personnel is carried out in connection with administration of the Naval Hospital to meet special needs of Naval Service.

Since 1942 the professional services of the Medical Center have expanded and multiplied to keep abreast of medical progress and service demands.

Formerly under the X-ray department, the Department of Physical Medicine became a separate department in 1943, embracing electrotherapy, hydrotherapy, fever therapy, and occupational therapy.

Another addition made in 1942 was an education service, including instruction in high school, college and special courses, this service being established as a part of the rehabilitation program at that time.

ADM. ASS'T.

(Continued from page one)

Lieutenant Commander Charles L. Crawford has all of these qualifications. When some one says "I am the Administrative Assistant to the Medical Officer in Command," it sounds like a politician's job. But there is more to it than what meets the eye. LCDR Crawford has several other jobs along with being the Admiral's Aid and Assistant, namely, Public Information Officer, Communications Officer, Postal Director, Voting and Security Control Officer.

With all these jobs to do, it is easy to understand why the sailor remarked, "I wouldn't want his job for all the tea in China!" LCDR Crawford came to the Medical Center three years ago to serve as the assistant to Rear Admiral Anderson, recently when Admiral Anderson was relieved by Admiral Willcuts, the question came up, whether or not the new Admiral would bring his own aid? But as you can see, Sam Crawford's hard work under Admiral Anderson found favor with Admiral Willcuts, and to date he has retained his position for nearly three years.

He has contributed in large measure to the successful and efficient management of medical department affairs throughout the years separating World War I and II by his untiring efforts, and loyalty to his superiors he received the Bronze Star award for meritorious service as assistant to the fleet medical officer, 8th Fleet, in the African Mediterranean Area during 1943-1944.

He considers his present assignment the most interesting and important of his naval career; enjoys baseball, fishing and carpentry during off duty hours; expects to return near a golf course in Iowa; where he can concentrate on the pursuit of his principle ambition.

you all are on hand for the festivities of the evening. We know that you will leave saying that you had a good time.

Valentines Dance on February 17

The Recreation Department working with the enlisted mens committee have arranged a Valentines Dance to be held on the 17 of February over at the Recreation building.

In keeping with the Valentine Holiday spirit refreshments will be served to meet the taste of all, and the connoisseurs of good drink shall have their fill. Music will be furnished by the Navy School of music. In the past the Navy Orchestra has been a highlight in making the dances at NNMC a huge success.

The enlisted mens dance committee are making preparations to decorate the dance hall so that it will have all the beauty and color of Valentine Celebrations. From what we have heard the decorations will be so good that it will be impossible to recognize the Rec. Gym.

We are sorry to say that the station band will not play, but due to the shortage of men on the station and the quick turnover in personnel they will be unable to play. We hope that they can get organized soon as we all enjoyed their efforts and ability to produce music under the circumstances that arose while they were playing.

All of the enlisted staff and their guests are invited to attend. So remember the time, and be sure

Pictorial Story of the National Naval Medical Center

The National Naval Medical Center is located approximately one mile from Bethesda, Maryland, on Rockville Pike (U.S. Route 1), opposite the National Institute of Health. More than 80 sites in the District of Columbia and adjacent Maryland and Virginia were inspected before the present site consisting of 243.7 acres was selected.

The buildings, with the exception of the officers' quarters, are of Structural steel, faced with precast-exposed aggregate concrete panels. At a distance the dark spandrels, vertically situated between the windows, serve to give the main building the appearance of having lofty square columns.

The tower of the Administration building, which is set on a bluff

facing the Rockville Pike, dominates the landscape for many miles in all directions. It rises to a height of 558 feet above sea level and 270 feet above the Rockville Pike, and is devoted to wards and sick rooms. The entire 18th floor is given over to lounge and solarium for patients. The Medical Center consists of a central group of buildings which

house the administrative offices, laboratories, classrooms, a surgical pavilion, two ward buildings, commissary, and an auditorium with a seating capacity of 600. All of these facilities may be said to be under one roof, as they are all intercommunicating. Separated from the above enumerated buildings are utility

buildings, officers quarters, nurses quarters and hospital Corps quarters, Naval Medical Research Institute, Naval School of Hospital Administration, Occupational Therapy building, and Recreation building. The landscaping is accomplished with trees native to this country, such as oaks, elms, sycamores and magnolias.

NNMC Five Drops Final Three Tilts

The NNMC Admirals brought their 1948-49 basketball season to a close recently, bowing to three Potomac River Naval Command foes in as many nights.

Patuxent River, Md. Naval Air Station, the Anacostia, D. C. Air station cagers, and Headquarters Marines of Arlington, Va. whipped the hapless Naval Medical five, to give NNMC a final mark of one victory in 14 PRNC contests.

An outmanned Admiral squad gave Patuxent River's speedy crew a good battle for 15 minutes there January 25, then fell rapidly behind to drop a lop-sided 65-28 decision to the Airmen.

After battling the Naval Air reserves to an 8-8 snarl in the first quarter, Naval Med wilted midway through the second stanza to trail, 29-16, by halftime.

Jay Bell, Carl Norris, and Leon Burns of the losers all fouled out long before the game's end, as Pat. River ran wild. Bud Penecole's 19 points paced the victors, with Jack Levi notching 12 for NNMC.

Anacostia NAS finally chalked up its first and only triumph of the PRNC loop campaign here on January 26, after suffering 12 straight setbacks, by squeezing past the Admirals. 47-44.

Playing erratic ball, the Medical-men never led from late in the initial period until the final minutes, although Anacostia's shooting and ball-handling was hardly sensational.

The Air Station held a narrow 14-12 edge at the quarter, and increased its surplus to 27-17 at the intermission. Anacostia was out ahead, 38-25, at the three-quarter mark.

Rallying desperately in a feverish attempt to salvage its second league win, NNMC finally moved in front, 44-43, on a long, one-handed shot by Levi with 90 seconds remaining, but Valentine then connected for Anacostia and the losers couldn't come back again.

Bell tossed in 13 tallies for NNMC, and Paul Glunz made 10. Absence of George Funk, rangy center, hampered Naval Medical considerably, especially on rebounds.

A dismal hardcourt campaign ended on the home floor January 27 when the Headquarters Marines squashed NNMC, 64-43, mainly on the strength of an explosive second-half offensive.

Off to a fast start, the hosts grabbed a 16-12 first-session lead, but were down, 27-22, by halftime. It was 50-22 as the fourth frame began, and a spirited late-tilt rally by NNMC fell far short.

The great hoop-hammering of Gainey, elusive little Marine forward who totaled 22 points, proved the losers' downfall. Bell, with nine markers, was Naval Med's best bet. Missing from the Admiral lineup were regulars Jack Levi and Paul Glunz.

Neuropsychiatric Quintet Spills Trio of League Foes

The well-regarded Neuropsychiatric Service "Gazelles" of the Naval Hospital got away to a good start in their bid for the compound's intramural cage title by zipping past their first three opponents, Research, Med. School and Main Quarters.

Encountering stubborn resistance from the latter two quintets, N.P. was forced to come from behind both times to trip the Lab boys and Main Quarters on successive nights.

Winless Research couldn't hit the bucket until it was much too late in its opener with the Gazelles, lagging, 22-6, halfway through the second quarter. It was 28-13 at intermission.

Paul Harmer, deadeye guard, paced the winners with 22 points, while Clyde Schubert bagged 11, all in the first half. Benny Maestas turned in the best game for Research.

Trailing almost the entire tilt, N.P. rallied amazingly in the closing minutes to sidetrack Med. School, 29-25, after looking like a junior high five for three stanzas.

With the count 21-16 and only six minutes left, Med School's defense came apart as the shooting of Harmer and Jack Levi pulled the Gazelles through.

The losers, paced by Lind with 11 points, notched only two field-goals, those by Paul Glunz and Canterbury, in the fourth canto, after maintaining a 21-14 surplus at the three-quarter station.

Never in the van by less than five points until its final-frame collapse, Med. School controlled both bankboards most of the game. Levi, whose firing kept ice-cold N.P. in contention until its late flurry, rifled home 15 tallies, while Harmer posted nine.

Unbeaten N.P. kept its slate clean by halting the previously undefeated Naval Hospital "Ducks," 19-16, on February 2, in a bitterly-waged defensive tussle.

With its starting five of Forwards Levi and flashy George Royster, Center Iver Kipp, and Guards Harmer and Schubert going all the way, the Gazelles accrued an 8-3 halftime margin and led, 12-10, as the third frame ended.

Main Quarters shot ahead, 16-12, with seven minutes to go, but went scoreless thereafter as Harmer radared two goals and a free throw, and then Levi's lay-up clinched it with 15 seconds left.

This one will slay you—apologies to Dr. Lowery:

Mr. Wong's wife went to the hospital to have a baby. Mr. Wong hurried over and paced up and down the waiting room for two hours, and then was approached by a nurse who said, "Mr. Wong, your wife just gave birth to a 7-pound boy—but he's white." "Oh well," sighed Mr. Wong, "Occidents will happen."

Tower Topics

By George E. Royster

First off this time let's catch the latest changes in staff personnel around the hospital.

Four men, C. H. Pichon, R. G. Porter, P. C. Watson and J. T. Hawkins, left early this month for other duty stations. Some new faces on the compound are D. B. Donaghy, an HA who came here from Norfolk, and R. F. Curry, HN, and H. J. Steffek, HN, in from Philadelphia Naval Hospital. Thanks, Bowers!

While down in Bethesda the other day it was learned that the Blue Ribbon Laundry is going to start a "Navy Day" of its own. All clothes brought in on the 20th of each month will be given around a 10 per cent discount. Sounds pretty good.

Good luck to Ruth Mitchell and Ray Campbell, HM1, who are going to tie that knot later this month.

SEEN AROUND THE COMPOUND

Carl Norris attending to his Sunday afternoon "business." Stuart Baltimore taking pictures of everyone—even me. Guy Knapp and Paul Murray asking for us to please put their names in the NEWS. Satisfied, boys?

Jerry Snodgrass and those "Golden Earrings"—last Friday night. "Baby" Dennler, the Tower 6 playboy, finding those Harmer parties rough.

Spins and Needles: Johnny Mercer came along with "Would Ya"—a pretty sharp little thing that's up to his usual waxings. One by Jo Stafford and Gordon McRea that is going strong these days is "Till String Along With You."

King Cole's "That's a Natural Fact" is also in demand. One that's breaking all popularity records around here is "The Cutest Little Dingey in the Navy." Buy it, you can't go wrong!

That winds it up for now, except to send a very special Valentine's greeting to a certain Miss P. in Cleveland.

N.P. Gazelles Trample Center Cagers, 103-61

Sparked by the brilliant shotmaking and floor play of Paul Harmer, Jack Levi and George Royster, the N.P. Gazelles moved within on ship by crushing Center Command, 103-61, on February 4. It was the highest scoring intramural court tilt in Naval Med. history.

The Center Commandoes jumped into an early 11-6 lead, but were far behind, 32-13, at the first quarter's conclusion. NP continued to pour it on the rest of the way, leading, 46-17, at the half.

Miles out in front going into the last period, 65-33, the winners kept up a torrid pace in the waning minutes. The Gazelles broke up a Center attempt at freezing the ball in the final 60 seconds to pass the century mark.

Employing a sizzling fast-break from start to finish for the first time, N.P. completely befuddled highly-rated Center again and again.

Rated underdogs against the Center five by many neutral observers, the speed-mad Gazelles were hotter than the proverbial four-alarm blaze as they quickly found the range and connected from all angles as the tilt proceeded.

Harmer was N.P.'s high point man with 29, Royster pumped in 28, and Levi meshed 26. Pat Partridge chalked up 19 for the Center, while Bell netted 15 and Bann one less.

Other recent first-half tiffs saw Naval Hospital rout Dental, 58-24, and squelch Med. School, 39-22, and the Labmen rebound to subdue Research, 47-29.

Earl Dennler hammered the hoops for 18 points and George Funk 17 in Main Quarters' easy win over Dental, while Miller's 14 paced the Hospital triumph over Med. School. Lind rammed in 27 while Lab was downing Research.

Center Command, unbeaten until it was ambushed by the pace-setting Gazelles, used superior height and rebounding to clout Research, 48-23, after rallying to measure Dental, 51-42, in its first outing. Bell, Partridge and clever Ben Springs spearheaded the Commandoes in both tilts.

Battle Wagons Lead Pin Loop

A tight six-way struggle for first place in the NNMC duckpin league is currently being waged, with the loop-leading Battle Wagons slight favorites to cop top honors.

Mr. Kirby is easily the top kegler among men rollers to date, with high individual average of 112, high game of 156, high set of 382, tops in spares with 117 and No. 1 in strikes with 27.

Mary Jane Koiner has the high average among the feminine bowlers, with 96, and Jean LeBlanc boasts the top game of 130 and has high spare total of 60. Mary Lee is far ahead in strikes with 18, and Dean sports the top women's individual set of 338.

NNMC BOWLING STANDINGS (As of January 31.)

Team	Won	Lost
Battle Wagons	38	16
Tin Cans	36	18
Tankers	35	19
Net Tenders	34	20
Tugs	33	21
Transports	33	21
Subs	25	29
Cutters	24	30
Cruisers	22	32
Mine Sweepers	19	35

W. Milton: "I always did say—half a living is better than none."

Patients' Corner

Have you ever followed a Red Cross girl around the Wards? I so, then agree with us that the girl deserve the Legion of Merit—For instance: "Nurse Watyacallit, ma, we have a party on your ward this afternoon?" With an obvious frown of disapproval she sometimes grunts "I suppose so"—After that's what the girls are hired for. After planning games and preparing the cookies and cokes—the R. girl arrives with a hostess gown and how is she greeted? "I thought you said the hostess group was cute—what beasts?"—or "Don't you have any orange juice" or "What lousy records—don't you have an hillbilly?" Isn't it remarkable that the girls have hair? I would have pulled mine out long ago—or would have lost my job for brainining a patient!

Paul and Monty were just returning from chow. I asked the what was the menu—the answer were something to this effect:—

Monty: "Hell, we stood in line for forty-five monutes before we could get in—I wasn't very hungry and asked for a small piece of steak—I got two big pieces—Paul asked for a little more, (as his was about the size of a half-dollar) and practically got the girls fork in his stomach!"

Paul— "I forgot to notice the menu and asked what kind of soup that greenish-yellow stuff was, the waitress was about to offer to pass my way through school, at least to the point to where I knew how to read"—I suppose things are tight all over, aren't they???

By Harry K. Barton, J.
Ward 10

Ward 6C has indeed gone to the —Animals. A veritable Ar full of pandas, monkeys, bears, bambies, and elephants, all made in miniature and of multi-colored fel are in various stages of completion by C. Burns (SA), R. Rose (SN) and R. Rector (VAP), to mention only a few patients occupied in the interesting hobby. R. Clary, EM, has an innovation of his own in the form of a loom, small enough to hold in one hand, on which he weaves bright colored scarves. O a larger loom Bob has woven a soft thick rug of white wool.

Two paraplegic "Walk-a-Chairs" were presented to TE2 "Play the record again" Palmer and P. "Schmoo" Howell by the American Legion on Sunday, 31 January 1949.

Even though patients do spend all morning scrubbing down shower stalls with steel wool and buffing down decks to the tune of a salt chanty sung by beauteous "Blond whip" Blair, the morale of 6C remains high as always.

We all miss the cheerful, spoken Dr. Ledyard who is confined to sick bed in Tower 14. Here's a "Get well soon" from all the patients and nurses.

RESERVE OFFICERS STUDY ATOMIC MEDICINE

'Operation' Surgery Training Films

Medical Motion Pictures are shot at the National Naval Medical Center and used for instruction purposes. The above picture illustrates the technique used by Lt. J. T. Stringer and his crew of the Naval Medical School.

Attend Special Course On Radioactive Isotopes And Special Weapons

One hundred seventy-five Naval reserve medical officers, including three Women Reserve Doctors and six Canadian Naval medical officers comprised the second class for the five-day course in Medical Aspects of Special Weapons and Radioactive Isotopes, which convened here February 14.

Capt. Behrens Addresses Med. Society Meeting

Capt. Charles F. Behrens, Medical Officer in Command of the Naval Medical Research Institute, Bethesda, Maryland, was one of the high ranking Medical Officers who, recently met at NAS Quonset for the Rhode Island Medical Society's semi-annual meeting.

More than 200 Rhode Island physicians from the Society met there for the first time, when professional doctors discussed new medical science developments. Capt. Behrens spoke on "Medical Aspects of Atomic Warfare."

Captain Melville J. Aston, MC, USN, Medical officer in Command of the Medical school, announced that the special teaching staff included civilian consultants to the Navy, representatives from the Atomic Energy Commission and Oak Ridge, Tennessee, United States Public Health Service, Army as well as Naval medical officers who specialize in the use of radioactive isotopes and representatives from the Navy Radiological Safety Laboratory, San Francisco.

As part of the course, there were visits to the cyclotron at the Carnegie Institute at Chevy Chase, the National Cancer Institute, the National Institute of Health and the Naval Medical Research Institute.

Speakers from the Naval Medical center included Rear Admiral Morton D. Willicutts, Medical Officer in Command of the Center (welcoming address) Captain Aston and Captain C. F. Behrens, Medical Officer in Command of the Naval Medical Research Institute.

From the Bureau of Medicine and Surgery, Rear Admiral C. A. Swanson, the Surgeon General; Rear Admiral C. J. Brown, Assistant Chief of the Bureau for Research and Rear Admiral Bertram Groesbeck, Assistant Chief of the Bureau for Aviation and Operational Medicine.

Commemorative Stamp To Honor Minnesota

The Medical Center Postal Department will issue a 3-cent stamp on March 4, 1949, to commemorate the one-hundredth Anniversary of the creation of the Territory of Minnesota.

The central design of the stamp depicts a pioneer moving westward with a Red River ox-cart. The bottom border is formed by a dark panel, which is the working "3-cent U. S. Postage, in white Gothic. In the upper left portion of the stamp arranged in four lines of dark Gothic is Minn. Territorial Centennial 1849-1949.

'Turn To The Right' John Golden Comedy To Play Here Mar. 2

When John Golden, Broadway's famous producer, revived his comedy hit, "TURN TO THE RIGHT," this Spring to tour a school circuit that he's building around New York City, a Veterans Hospital Camp Shows director saw it as produced by the Equity Library Theater. He and Mr. Golden financed its visits to five Army, Navy and VA hospitals near Manhattan just to see how veterans and servicemen would go for it.

The response was so warm that it was promptly written into Veterans Hospital Camp Shows' Fall schedule and will be offered at the Naval Medical Center on 2 March 1949 at 1800.

Labeled recently by Billy Rose as "the comedy hit of its generation," with a record of having 14 companies playing all over the world at the same time, "Turn to the Right" is one of ten units which will tour 109 hospitals on the Camp Shows' circuit to give 100,000 men a fresh show every three weeks.

The "turning to the right" that the comedy chronicles has to do with the effect that a shelffull of "mother's peach preserves" and the lovelight in the eyes of three village belles for three young adventurers, lately out of jail.

Between complications built by getting the money to clear the traditional family mortgage, softening the deacon, who held it and getting the girls married off right, the production offers an hour of hearty laughter.

Fr. Michael J. Mac Innes Transferred To USS Fargo

On 12 February 1946 Father Michael J. Mac Innes OFM, Lieut. Chaplains Corps, arrived for duty at the National Naval Medical Center. Last week on 12 February 1949, three years later he was detached for sea duty, thus spending the longest tour of duty of any chaplain at the institution since its beginning.

Father MacInnes came to the Medical Center from almost two years of sea-duty aboard an attack transport which carried him into four major landings during the recent war.

He now goes aboard the U.S.S. Fargo (CL 106) for a tour of cruiser duty.

Father Mac is hoping to see the Holy Father Pope Pius XII as well as the members of his Own Order, the Franciscans, who are engaged in missionary work in the near east and Palestine.

(Continued on page 2)

ADA Inspects Dental School

The Secretary of the Council on Hospital Dental Service of the American Dental Association announced last week that the U. S. Naval Dental School has been inspected and found to merit ADA approval both as a hospital dental service and as a dental intern training activity.

The Naval Dental School is part of the National Naval Medical Center here and is commanded by Captain Lewis D. Mitchell.

Mexico Doctor Donates X-ray Unit To Navy

Doctor Sanchez-Perez of Mexico donated an X-ray machine at the Medical Center recently which culminated fifteen years of research in the field of brain and heart roentgenography.

The unit is called the Sanchez-Perez serigraph and automatically-controlled serial roentgenograph and has made it possible for the first time to outline a brain tumor by ray. It will also accurately locate disturbances in the cardio-vascular system—varicose veins will be much for the surgeon with this X-ray apparatus.

The machine is being produced by the Yates Manufacturing Co. of Glendale, California to market for under hundred dollars.

The first unit completed and only the first to be placed into operation was donated to the Navy by Doctor Sanchez-Perez.

He performed two operations at Bethesda Naval Hospital to demonstrate the product of his fifteen years of hard work.

Enter Corpsmen Advance To Higher Ratings

The NEWS is printed commercially from non-appropriated funds at no cost to the Government and complies with Sec. Nav Ltr EXOS, AO (Pub) WBW, lmc'd, dated 12 November 1945. The NEWS is a member of the Ship's Editorial Association and uses editorial material credited to SEA.

The NEWS is published on the second and fourth Friday of every month. Contributions solicited, news items and other communications may be submitted to the Recreation Office, Building No. 23.

This Can't Go On Forever!

The members of the NEWS' editorial staff are well aware of the shortcoming of their bi-weekly publication, exceedingly more so than even the most bitterly critical of you readers.

We know that one sentence in the last issue contained 114 words (that's right!), and that some of our straight news stories have had a tendency of turning into features, because the pronouns "I" and "you" were erroneously employed.

Yes, these and quite a few other mistakes in grammar, spelling, make-up and so on have been detected too late—after the paper came out.

Only one man, W. R. Butt, HM2, works full time on the NEWS, just trying to keep things running smoothly occupies all his time.

In November of last year we began printing a regular, tabloid-sized bi-weekly station paper. A very, very few of us have devoted many of our precious liberty hours to putting out YOUR paper ever since then.

Because such a scant few must do all the work on each issue from beginning to end, certain errors are bound to slip through from time to time. An appeal for additional reporters has brought a scatter of promises but no actual aid.

Everyone seems to be living in a shadow. They are afraid to make a sudden move for fear of angering some mythical monster that seemingly will swallow them if they attempt to shake off the curse of indifference.

Maybe it's impossible to fight something you can't see. But even allowing this editorial to be printed would prove that the authorities here at NMMC wish to face the facts squarely, and want the average sailor to know just how matters stand.

If you have had any news writing or reporting experience and would like to work on the NEWS, or even if you only wish to learn news writing and reporting, here's your chance now.

Anyone interested in reporting for the NEWS or helping copyread and proofread material is urged to get in touch with Bill Butt, Managing Editor of the NEWS, in the Welfare-Rec. office at the Recreation Bldg. (Extension 577).

We want some men to help run down stories and make the NMMC newspaper the success it can well be. At present there is only one man with previous journalistic experience on the paper, so all those with any previous newspaper training will be warmly welcomed by the NEWS staff.

If enough men are interested in learning news writing and reporting, it might be possible to organize group discussions to study Station and Ship newspaper work.

You aren't being promised fame and fortune. You won't even get off at any time during working hours to work on the NEWS—But should you want to help us with the NEWS, we think you won't regret going over to see Bill Butt.

If it's more convenient, contact Assistant Editors Clyde Schubert (Ext. 362) or George Ryster (Ext. 251). We're one outfit on the station that isn't too proud to issue a plea for assistance. Give us a hand, will you men?

"MIKE"

Tony Canedo

Meet Your Commanding Officer:

Capt. Melville J. Aston

Captain Melville J. Aston, MC, USN, the MOIC of the Medical School has had a long and very active career in the Naval Medical Corps.

Captain Aston entered the Navy with the rank of Assistant Surgeon on the 12th of February, 1917.

His first tour of sea duty was aboard the USS North Dakota followed by service aboard various battleships, cruisers, mine layers, transports, and most recently, the USS Solace, a hospital ship.

He was the Senior Medical Officer aboard this famed ship for 2 years during the early days of World War II.

While on tours of shore duty he has served at the Naval Hospitals in Chelsea, Mass., Portsmouth, Va., and the Panama Canal Zone.

He has been the MOIC of the Naval Hospitals at Norfolk, Va., and Philadelphia, Pa., as well as District Medical Officer of the 3rd Naval District, N.Y., and many others.

Captain Aston received his M.D. from the George Washington University Medical School in 1914 and after internship at Garfield Hospital, Washington, D.C., he practiced Medicine in West Virginia before entering the Navy.

His first Post Graduate training in the Navy was at the Naval Medical School and later he studied at the University of Pennsylvania and Johns Hopkins University.

Captain and Mrs. Aston have three children; a married daughter and two sons William J. Aston, a Midshipman at the Naval Academy, Annapolis, Md., and Melville J. Aston, Jr. in the Air Force.

FR. MICHAEL

(Continued from page 1)

Many of the crew here at the Center will miss that smiling Irish face, that has smoothed over their troubles in the past. We hope that all who come in contact with this young Franciscan will like him and appreciate that warm smile as we have. Bon Voyage "Father Mac."

Crews Library

New Books By Favorite Authors Here

Those who have a favorite author are always on the look-out for his latest title so here is up-to-date news on some of the old stand-bys. NEGOTIABLE is Manning Cole's latest and this time our old friend Tommy Hambledon is on the track of a counterfeiting ring in a fast moving, adventure packed story.

Max Brand's fans will welcome THE BANDIT OF THE BLACK HILLS in which grim faced men with guns for action move in on a new character called The Duke.

Those who enjoyed The Purple Plain by H. E. Bates will want to read THE JACARANDA TREE, a suspense filled story of Burma.

Costain's latest book is HIGH TOWERS in which the LeMoyn family attempt to build a great empire in the New World for France.

THE GRAND DESIGN is John Dos Passos' new title, with Washington in New Deal days the background for jealousy, scheming, politics and personal ambitions.

Tower Topics

By George Royster

It has been brought to my attention that the NMMC orchestra is having a great deal of trouble rounding up enough men to form a new band. About half of the orchestra got their orders last month and as yet the remaining boys have met with little success in acquiring new members.

Certainly within the six commands there are enough musicians capable of giving the Medical Center a top notch dance orchestra. The boys are in dire need of some trumpet men but anyone with dance band experience will be welcomed.

Dept. of Hurrah: To the men of the Recreation Department for the swell job they did on the Valentine's Day Dance. The gym was the nicest we've ever seen it.

★ ★ ★

PHOOEY: To those "few" innocent souls who berate and boycott all of the NMMC activities.

★ ★ ★

Dept. of this and that: A tip of our hat to Bob Bahr for the swell job he does in the handling of our mail. What about more of the same, Bob?

★ ★ ★

Did anyone ever hear what happened to those new washing machines? It's about time someone looked into the matter; the ones over at Main Quarters are just about ready to be surveyed.

★ ★ ★

Seen Around the Compound: Pete Stanley telling all hands about Ohio State upsetting St. Louis Toney Tabor giving all the boys the scoop over in Main Quarters.

"Corkey" Meyers needing a blood transfusion after giving the N.P. patients their morning calisthenics. Willie Gowen and those "bleeding eyes after a Saturday night liberty. S. A. Johnson telling everyone his initials stand for "sex appeal."

★ ★ ★

Did you ever stop and think of the many recreational activities we have here at the Medical Center. We have a gym, swimming pool, softball diamond, tennis courts, and pretty soon there'll be a regular hole golf course. It's too bad that more of the above is not used to better advantage. I guess Bassett offers too much competition.

That does it for this time, see you again in two weeks.

Pa. Legislature Approves Bonus

The Pennsylvania Legislature, this week approved a \$500,000,000 Bond Issue in connection with the payment of a bonus for World War II Veterans. The vote of 207 to 0 by the State House of Representatives, was on a bond issue which had been approved also by the 1947 State Legislature, as required by constitutional requirements.

Each veteran who served more than sixty days between December 7, 1941, and September 12, 1945, will get \$10 for each month of service in the U. S. and \$15 for each month of overseas service, to a maximum of \$500.

The bond issue amendment which will authorize the State to borrow \$500,000,000 for the bonus, must be approved by the people by referendum vote at this November's election before it is adopted. So the fate of the measure hangs with the voters of Pennsylvania.

Patients' Corner

Marines Come Through As Gurney Techs.

By Patients

There has been any speculation of the fast flow of patients to the Marine patients who have entered as gurney runners.

It is quite a change for a Marine because he is usually more efficient with instruments that they live rather than with those that save them. But in the best tradition they have well adjusted themselves to this new work.

When you see a gurney, pulled by a Marine dressed in green robe, whizzing at high speed down the hospital corridors, you are witnessing one of the Marine O.R. Techs. carrying out his job with speed and dispatch.

By R. R. Montgomery
Ward 3-C

If you have been in our ward, you have probably noticed the great display of animals we have. Our best is a penguin, which is our ward mascot. We owe it to Russ States, who is a great stress as well as a good pa-

We are glad to see Cpl. Joe Lang, who seems to be very popular and the hospital and is well liked in the ward, up in a wheel chair. Everyone hopes to see you walk and going on liberty soon.

Everyone looks so different these days. The barber has been giving long haircuts. A little early for spring, but nothing is surprising up here.

We recently lost our ward nurse, Fritz, through transfer to the Coast. We all hated to see her go and wish her the best of luck. She's as well liked at her new station as she was at NNM. We'll see you in the next issue of NEWS.

Upper Right Hand picture was taken during an Audiogram Test (ear test) on a NH patient by Joseph J. Filipiak. Center picture describing technique before entering surgery as R. D. Hochstetler and W. E. Jones prepare for Mastoid operation. Lower Left is Captain A. J. Delaney MC, USN, Chief of Service in this department. Lower Right picture was taken while Dr. William Ray True was adjusting a Phoropter on a patient for an Eye refraction in clinic.

Eye Ear Nose and Throat Staff Too Busy, 'To Take Five', As Patients Roll In

If you have ever noticed a dreamy-eyed, industrious-looking individual walking around the compound he is probably an Eye, Ear, Nose and Throat man, dreaming of the work he loves.

This is an actual fact. The EENT Clinic can boast of almost one-hundred percent loyalty among its staff.

Everyone says the EENT is one of the busiest clinics on the station. This may or may not be true, but it cannot be too far wrong, for when the facts and figures are added up the number of patients treated and examined averages

about seven thousand per month.

The EENT group are all willing to take the time to learn their specialty. They regard the clinic as a true college of knowledge in its own right. Among the former EENT corpsmen discharged from the Naval Service in the past fourteen months, three are now medical students with EENT ambitions for the future.

Essentially the clinic is divided into two departments; ophthalmology, and otolaryngology. Both departments work under full steam thirty six hours a week.

Probably one of the most dramatic operations performed in the clinic is the relatively new Fenestration Operation done by Capt. A. J. Delaney, Chief of service in this department.

This operation is done on patients who are stricken with otosclerosis or "Stapes Deafness." This disease is merely a chronic progressive deafness in which the labyrinth and middle ear becomes indurated and overgrown.

The operation has many hazards, such as traumatizing the facial

nerve which would give the patient a facial paralysis. The doctor must have a master's knowledge of what he is doing and must have developed a technique suitable for such a dangerous undertaking.

After the "fenestra" or window is opened, Dr. Delaney tests the patient's hearing by whispering a word or phrase and having the patient repeat the statement.

Some of the phrases used are "Santa Claus, Philadelphia, Cincinnati" and anything that the patient might not expect to hear. If the patient answers correctly the operation to this point has been a success.

Such departments as Eye, Ear, Nose and Throat are a definite credit to the Medical Center and help it to maintain the high position which it enjoys in the field of modern medicine today.

Fiddler's Green

Imagine doing duty at a place where there's no reveille, lots to eat all day long, plenty of shore duty, and everything is free.

There is such a place, restricted to sailors only.

Called Fiddler's Green, this ethereal paradise is the sailor's traditional conception of heaven. Fiddler's Green is believed to be the only heaven claimed by an occupational group as its own.

You never wait in line at this gay place, where everything is strictly non-regulation. Here the main pastime is dancing with lovely ladies and singing all day long.

Every good seaman hopes to go to this happy land when he dies.

DIVINE SERVICES

PROTESTANT
Sunday—1000, Morning Worship, Main Auditorium.

CATHOLIC
Sunday—0600, Mass in the Main Auditorium.

Sunday—0830, Mass in the Main Auditorium.

Daily—1205, In Catholic Chapel. Confessions are held before each Mass.

Movie Carts Added To Red Cross Section Eases Work

Our thanks to the NNM machine and carpenters department which designed and built those new quiet movie carts for us and did such a splendid job. On them the Red Cross rolls its four RKO 16 mm projectors to the wards.

Two movies are provided each week by the American National Red Cross motion picture department, making available between 38 and 41 ward shows each week.

Films are shown by six patient projectionists and five staff members who pinch hit when the patients are unable to work. Patients interested in showing movies contact Miss Osborn in Room 102.

Here each week instruction for the operation, care of projectors, splicing reels, and the scheduling of movies are given. Patients have volunteered their services but the Red Cross pays fifty cents for each film shown and at the end of the week projectionists discover they have accumulated a few extra dollars besides having provided entertainment for many bed patients.

Movies on each ward are scheduled with the ward medical officer's approval. Cancellations may be necessary due to critically ill patients but we try to maintain a regular weekly schedule which is posted in Room 102; the Red Cross recreation office.

Ward movies scheduled for the week of February 28th are "Dead Reckoning" and "A Foreign Affair".

Waffle Supper Heads 'Y' Cottage Activities In Feb.

The "Y" Cottage Program Planning Committee under the direction of Lou Coraisso has planned a variety of interesting events for the month of March.

But first, before we usher in March let's not forget THE WAFFLE SUPPER at the Cottage, Saturday, Feb. 26—Waffles will be served from 5:30 to 8:30 p.m., so drop in at the most convenient time.

The Junior Hostesses are sponsoring this affair, so fellows, they will all be there. Following the eating of Waffles there will be movies and slides to look at or card playing or dancing, etc.

There will be a charge for this affair as it is the one event of the month scheduled to replenish the treasury of the "Y" Cottage Club. As you probably know, the "Y" Cottage Club is buying the coffee, paying for magazines, newspapers, etc., and this is one time they need your help.

Sunday nights at the "Y" Cottage are becoming famous; supper at 6:00 p.m., cooked and served by sailors and hostesses (and some of those civilian men hanging around).

Following suppers Miss Naldi Poe is bringing us a variety of entertaining programs, Feb. 27 The Newcomb Bethesda Community Singers will present a program. March 6, Brooke Johns, famous Bethesda showman is going to be present with his guitar.

The regular Dance will be held March 8, Tuesday night, at the Bethesda Chevy Chase Recreation Center, Norwood Drive. Instead of a Can Can Dance this is to be a "Bring a Record" Dance—so bring a Record or the price thereof for admission.

The calendar of events is posted on the Bulletin Board by the Mess Hall or call OLiver 7803 if you desire further information.

Naval Medicine in Bygone Years.....

by a contemporary artist

Baseball Players Meet March 3

A meeting of all personnel interested in playing on the NNM varsity baseball team this spring will be held in the Athletic and Recreation conference room at the Rec. Bldg. next Thursday, March 3, at 1500.

Pre-season workouts will be held in the gymnasium during coming weeks, under the direction of Chief Harris of the Center Command.

As soon as the new diamond across from the Recreation Bldg. is ready and the ground is sufficiently dry, outdoor drills will get under way, Harris said early this week.

All men on the station with any previous baseball experience are urged to attend next Thursday's meeting.

Med. School Quintet Out To Get Revenge In NPMC Cage Loop

Shotmaking in the second half of the 1949 NPMC intramural hard-court campaign got started this week, with two well-regarded clubs determined to prevent first-half champion N. P. from repeating.

Both the dangerous Medical School and polished Naval Hospital fives have vowed to wreak vengeance on the N. P.'s "iron man" squad, which consists of only seven men.

The unbeaten Gazelles had to rally furiously in halting the Hospital cagers, 19-16, and dumping Lab Schol, 29-25, in a pair of torrid first-half finishes.

If N. P. wins all five of its tussles this half, thus giving it a record of 10 victories and no defeats, there will be no need for a post-season playoff as the Psychiatric courtmen will have whipped all the other five teams in the loop twice apiece.

Dental's fast-breaking five may yet spring some upsets, while neither Center Command nor Research is

rated much chance of placing first or second this half.

Outstanding individual performers during the first-half struggling included Talbot and Maestas of Research, Bell of Center, and Dental's Hessman and Hopkins.

Other were the clever Lynn, Glunz and Canterbury from Med. School, Main Quarters' Dennler, Funk and Miller, and N. P.'s brilliant Harmer and Royster.

As planned, the top two clubs in each half will get together in a round robin playoff series early in March. N. P. and Naval Hospital already are assured of playoff berths, and Med School is out of luck if it drops two contests of its remaining five tiffs.

If In Doubt Call "Mac"

Agronomy Expert

Jack of All Trades Master of Many

One of the most outstanding personalities about the station is H. T. McGahren, better known to his friends as "Mac".

If you were introduced to "Mac", quite possibly your first impression would be, "this guy looks like a rough and tough foreman who's plenty hard to get along with". But in McGahren's case as in many others, appearances are deceiving.

He came to the Medical Center back in 1942 to supervise the landscaping and give the station the scenic appearance it has today. "Mac" was a close friend of the late President Roosevelt, having previously worked as a gardener at the White House.

During the building of the Medical Center Roosevelt and McGahren would ride round the compound in a jeep and the president would point out just how he wanted the Center to look in regard to landscaping.

"Mac" states that Roosevelt desired extra trees in order to provide

for any loss in the future. As he expressed it, "you can always take them out, but it's not so easy to put them in. And McGahren adds that is something for even an expert to remember.

A rugged Irish-American, "Mac" was born in Wilkes-Barre, Penna., and attended college at Fordham and Penn State receiving his degree in Agronomy at the latter institution.

In 1917, during the first World War, he entered the Navy, and after the fighting was over returned to his profession of Landscaping.

McGahren's task here at the Medical Center is truly a monumental one. It includes the developing of 248 acres of land here on the station. At the present time under his supervision 110 acres of lawn area have been developed. All this land had to be cleared, graded, seeded and landscaped.

Under McGahren's direction are

And A Good Time Was Had By All

The time was 2000, and in a few minutes from this hour the Valentine's staff dance will have gotten under way. The sailors stood at the gangway of the Rec. Bldg. waiting for the girls to come aboard.

As the damsels stepped over the gangway, the gobs stood and observed the crowd. The characteristics were well proportioned: largely small, tall, short; skinny and fat.

Unbeaten N.P. Courtman Snare First Half Title

The N. P. Gazelles romped off with the first-half title of the NPMC intramural cage loop by subduing a battling Dental quintet, 28-17, recently, for the fifth victory in as many games.

Bitter Battle Being Waged For Pin Crown

The front-running Battle Wagons continue to maintain a slim lead over their closest pursuers, the second-place Tin Cans, in the NPMC duckpin circuit, with four other teams all in hot pursuit, as the season nears a close.

Tied for third, just one stride back, are the Tankers and Transports, while neither the Tugs nor Net Tenders are yet out of the race for loop laurels.

To date the Battle Wagons have the high team set of 1,558, while the Cutters boast a 1,475 set and the Tugs one of 1,471.

Top team game of 563 also belongs to the Battle Wagons, while the Tin Cans have totaled 537 and the Net Tenders 531.

Still top male bowler in the league is Mr. Kirby who sports the high individual average, high game, high set, most spares and greatest number of strikes having 124 spares and 29 strikes so far.

NPMC BOWLING STANDINGS (As of February 14.)

	Won	Lost
Battle Wagons	43	17
Tin Cans	40	20
Tankers	39	21
Transports	39	21
Tugs	36	23
Net Tenders	35	25
Subs	27	33
Cutters	27	33
Cruisers	23	37
Mine Sweepers	19	41

250 members of the NPMC maintenance ground force, who do everything from clearing snow to putting up decorations for parties.

"Mac" is very well liked by all those who work for him. One good reason for this is that he always gives credit to his men where credit is due and seldom takes it himself.

When asked what he thought about his position here at Naval Medical McGahren commented, "I really consider it a great honor to have the job to do. I only hope I will be capable of carrying out the plan of our great departed leader, the late Franklin D. Roosevelt, in regard to how he would have wished this Medical Center to look."

Although never behind, N. P. missed swarms of seemingly easy shots and had trouble controlling the rebounds against its lightly-regarded foe.

The losers played inspired ball but like their conquerors were frigid at the hoop, trailing 8-1 at halftime. Paul Harmer and Iver Kipp each notched 10 points for the Gazelles, with Hopkins getting 9 for Dental.

The Naval Hospital Ducks (Main Quarters) sewed up second place in the first half by outscoring surprisingly stubborn Research, 45-37, and taking a forfeit from Center Command. The Center hoopsters failed to show up for their tilt with the Ducks.

Earl Dennler was Naval Hospital's high point man against the victory-starved Research club with six baskets, while Talbot, fiery pivot performer, poured in 20 tallies for the victims.

Don Lynn meshed 20 points for the Labmen, and his mates Canterbury and Glunz hit 17 and 14 respectively. These three hot shots accounted for all 51 Med School chalkers. Hessman was Dental's big gun with 18.

The smooth-working Lab boys tore a shaky Center Command defense to ribbons as Lynn rifled home 22 markers and Canterbury collected 11. Jay Bell, brawny center, was a hero in overwhelming defeat, dropping in 17 of Center's 25 points.

Dental took the measure of Research, 43-36, to escape from the cellar. Hessman, big blond forward, plunked in 16 tallies, eight in each half, and Erwin sank five buckets, to pace the winners. Talbot, with a 12-point output in the final two periods, topped Research with 14.

INTRAMURAL CAGE STANDINGS (First Half)

	5	0	1,000
N. P.	4	1	.800
Hospital	3	2	.600
Med. School	2	3	.400

"Mike"

In feature Picture of young boy the model is Michael Edward Boonstra, son of Dr. Boonstra who is on the Naval Medical School Staff.

Sportin' Aroun'

By Clyde Schubert

Life is really worth living the days, at least for local sports fans.

All the various conference basketball races are nearing their completion, our Washington Capitols are far ahead in the Eastern Division of the B. A. A., and base fans are already eagerly looking forward to that first clarion call of "Play Ball" in April.

While this column was benching for the anniversary edition of the Medical Center the collegiate firing was continuing unabated all fronts throughout the nation.

Kentucky's veteran Wildcats continue to dominate the Southeast loop, and N. C. State is a Southeast circuit juggernaut. Out in the lands Minnesota and Illinois are slugging it out for Big Ten honors while Bradley U. cleans up among the independents.

Tony Lavelli of Yale is easily this writer's choice for the National college court star of 1949, and his Bulldog mates are doing very well, thank you, in the League battling.

Those B. A. A. playoffs promise to be of tremendous interest locally since those Caps, god bless 'em, will be hot after the first-placash, and the D. C. club is mighty tough to top when the blue checks are on the line.

Professional rasslin' (no relation to the legitimate sport of wrestling) is popular in this area, but Washington promoters usually have to import good fighters to make any money on their weekly box cards.

Note to Mike Uline: May I please join many others in beseeching you to ditch that incredibly awful Washington hockey team (?) of yours. Too much is too much, especially in the AHL, where the competition is way too tough for your crippled band of skaters. The Lions (well, an insult they are to the king of the animal kingdom), give the nation's capital a Grade A black in hockey circles.

WHY IS IT DEPT.: Why is it that NPMC didn't have a team this winter's Potomac River Naval Command bowling league? O duckpin loop here is dandy, hardly a replacement. Why couldn't the NPMC Cagers have been given some consideration in regard watches so that the Admirals could have been more than merely a pickup outfit on several occasions?

As a parting shot this time predict that American U. will win the Mason-Dixon Conference tourney. Watch and see! Will back on March 11 with more sport scuttlebutt.

11 MARCH 1949

NATIONAL NAVAL MEDICAL CENTER, BETHESDA, MD.

I, NO. 37

More States Now Offer Bonus Pay for Veterans

More states approved bonus payments for their World War II veterans in the general election of November, 1948, which brought to 17 the number of states and territories which have voted favorably on bonus payments thus far.

States voting favorably include Indiana, Louisiana, Minnesota, South Dakota and Washington. Four other states—Missouri, Nebraska and Wisconsin—have not yet had a chance to vote on a bonus law already passed in the session of the state legislature since Keystone State Law requires that legislation must be passed by two sessions of the legislature before being submitted to a popular vote.

Five states and two territories had already approved bonuses. They include Connecticut, Illinois, Massachusetts, Michigan, New Hampshire, New York, Rhode Island, Vermont, Alaska and Hawaii.

Payments up to \$500 will be provided by a bond issue of \$100,000.

Indiana—Voters approved the principle but further action by the state legislature is necessary to make the payments a reality.

RI Pathologist Addresses Academy

DR. John L. Tullis, MC, USN, was guest speaker at the Academy of Medicine in Wilmington, Delaware. He spoke on "The Pathology of Ionizing Radiation Injuries."

In his address Commander Tullis discussed the effects observed in experimental animals and in the human following total body irradiation produced by one million X-rays and atom bombs, respectively.

Chief pathologist aboard the USS RLESON during the Able and Baker atomic bomb tests at Bikini, R. Tullis now is head of the Division of Pathology at the Naval Medical Research Institute here.

After returning from Bikini he has been observing the effects on experimental animals exposed to the bombs and has conducted numerous experiments designed to observe the effects of one and two million volt body x-irradiation.

Above is Rear Admiral Herbert L. Pugh, Deputy and Assistant Chief of the Bureau of Medicine and Surgery, leaving the NSHA after addressing a general assembly of staff and students, in commemorating another important step in the progress of the Medical Service Corps of the U. S. Navy.

NNMC RED CROSS CAMPAIGN OPENS

During the month of March, the American Red Cross is brought to our attention in a different way than during any other month. This is the month we are asked to contribute funds.

A significant difference between this drive for funds and drives of other welfare agencies is that, by donation we become members of the organization. With membership, we earn the privilege of voting for officers and policies through the chapter organization that our donation reaches.

The American Red Cross is a private organization assigned by law to represent the United States in various international relief activities and to perform many national and local services in this country. Its relations with the Armed Forces during wartime are established by law.

Servicemen in World War II found the Red Cross usually had anticipated many of their needs by establishing services to cover unusual situations.

They learned that Red Cross means many things; coffee and doughnuts, an emergency loan, aid for their dependents, help in getting a leave, entertainment and recreation, cigarettes, Christmas boxes, contact with home, and others.

At various times we have discussed Red Cross services on this station and will do so again in the future but now we should like to call attention to some of the broader national services supplied by Red Cross.

During the War, Red Cross collected and processed 13,325,000

(Continued on page four)

Medical Service Corps Receives First Top Administrative Billet

Good news for the Medical Service Corps of the Navy was forthcoming here several days ago.

Effective March 1, the title of the Officer-in-Charge of the Naval School of Hospital Administration here was changed to Medical Service Officer in Command, thus giving the MSC its first top administrative billet.

Cdr. Glenn F. Lyon, Officer-in-Charge, and Lieut. Cdr. Bernard F. Duwel, Assistant Officer-in-Charge since the school was established in 1943, have been redesignated as Medical Service Officer-in-Command and Executive Officer, respectively.

The school functions as a training center for Medical Service and Hospital Corps officers and enlisted hospital corpsmen of the upper brackets, teaching the several phases of hospital and general medical department administration.

From 1943 to 1945 the school was operated as an entity of the Naval Hospital and on September 5, 1945 was designated as an individual command, a component of the Naval Medical Center on a level with the Naval Hospital itself.

Rear Admiral Herbert L. Pugh, Deputy and Assistant Chief of the Bureau of Medicine and Surgery, addressed a general assembly in the school March 1 in commemorating another important step in the progress of the relatively new Medical Service Corps.

His talk outlined in broad terms the current status of the Navy Medical Department and the road ahead, and specific details of the history of the Hospital Corps.

Desperate NME Med. Shortages

The entire National Defense program may be gravely handicapped unless sufficient physicians and dentists volunteer for service with the Armed Forces, Secretary of Defense James Forrestal said yesterday.

He told a press conference yesterday that the situation with regard to doctors and dentists is "critical" and will get worse as 400 young doctors, trained at government expense, will complete two years active duty within the next few months.

Sternly, Secretary Forrestal warned that if sufficient volunteers do not come forward, the NME will be forced "to resort to more drastic means, such as holding men in the Service beyond their normal time or asking Congress to pass a draft law."

Here's Information About Latest Uniform Changes

The Secretary of the Navy has approved certain uniform changes which are now being printed as Change No. 5 to the Uniform Regulations. This change will be published to the Naval service in the near future. Pending publication, however, the following advance information in regard to these changes is furnished for guidance:

Navy Nurse Heads West With Hubby

By Anne Jarzyk
LTJG Eleanor A. M. Hallquist, NC, USN, will be married to CDR. Donald R. Newby, USN Retired, of Vallejo, Calif., this afternoon at Covenant Congregational Church in Washington, D.C.

Miss Hallquist, who entered the Navy in May of 1945, currently is awaiting her orders to the U.S. Na-

(Continued on page two)

The designation of uniform tables for male personnel has been standardized as much as possible in order that various groups of male officers and enlisted personnel and officer candidates who wear similar uniforms may use the same designations. The following changes in designation of uniforms have been approved:

Blue and khaki (tropical worsted or other lightweight wool fabrics) uniforms worn by chief petty officers and stewards are now designated service dress, blue and khaki, respectively, conforming to the designations currently authorized for commissioned and warrant officers.

(Continued in next issue due to lack of space)

Civilians Here Receive Safe Driver Awards

Safe driver certificates and lapel buttons recently were awarded by the Commanding Officer of the Medical Center to 45 employees who regularly operate government vehicles.

Of these awards 33 were for not having been involved in an accident while operating a government vehicle for a period of two years and the other twelve were for one year no-accident records.

Of the Center's 31 full time chauffeurs, 29 of them were in the group commended, an outstanding achievement by the transportation department.

In addition, 16 of the awards went to employees in shops and about the grounds who are qualified and authorized to use official vehicles in carrying out the work of their units.

Want Duty On Samoa?

Extra! Read All About It, Hot Dope On Pacific Isle

When orders are received for overseas duty, we break out maps, consult the "Old Salts" and dig into the pages of scuttlebutt. Maybe—moa. The former billets are represented by substantial spots on the maps, many "Old Salts" have been there, and the scuttlebutt is most informative. The latter, little Samoa, is but an accidental (so to speak) spot on the map, a few "Old Salts" have been there, and the scuttlebutt only describes the pre-war era. Here is some hot dope on the latter spot, little Samoa.

Duty-Corpsmen are assigned to the Samoan Hospital, 300 beds, fully equipped, newly constructed, or Naval Dispensary complete as a unit, District Samoan Dispensaries as District Health Officer—available for Chief and First Class Petty Officer with families; Medical Officers and Dentists are assigned to the Naval Dispensary, Samoan Hospital or Bush Clinics by the Senior Medical Officer; nurses are assigned to the Hospital and Dispensary.

Comment of duty—this duty is excellent. Recommended for enlisted personnel and officers alike. The quarters are good, adequately furnished. Food is not as costly as in the U.S. and there are no department stores, etc. to spend money. In fact most men and families save money in Samoa. Experience—you are able to gain a great deal of experience in your particular field and fields of talent. Generally speaking, the writer, who spent 2 years in Samoa 1946 to 1948, feels that this duty is highly commendable to corpsmen and medical officers. The writer will show movies (color film) taken in Samoa at a future date.

"Would you like to see some moa of Samoa?" Good duty.

Chaplain Frank R. Morton

Varied Events At 'Y' Cottage All This Month

Sunday night suppers are one of the always popular functions at the "Y" Cottage. In addition to the tempting chow which is served each Sunday for the small "share-the-cost" sum of 50 cents, plans have also been made for after dinner entertainment each Sunday evening.

On March 13 a Folklore Guitar Player will entertain, on March 20 Mrs. Gilbert Grosvenor, wife of Dr. Grosvenor, Editor of the National Geographic Magazine, will speak, and on March 27 the Barbershop Quartet which has performed at the Cottage on many occasions in the past will return for an evening of real barbershop harmony.

STAFF DANCE

Just before going to press the Rec. Dept. announced that Howard Williams, Hotel Roosevelt Orchestra, have been booked to play at the Staff Dance, March 17th.

Wedding Bells Ring Out

The Bride couldn't wait until June so another sailor bit the dust. The guy with the look is T. Jefferson Benn, HM2, of the Finance Department here at the Center, and his bride is the former Miss Gloria Joanne Shepard of Jackson, Michigan. Wedding vows were taken at the First Baptist Church in Bethesda. The couple is now living in the vicinity of the Medical Center.

The Dental Explorer

By Morton Rodman

Once again another graduation has come and gone. On the 23rd of February 40 Dental Prosthetic Technicians graduated from the school as so many have done before them, and most of them departed for new duty stations.

Doctor H. R. Superko, (LCDR DC USN) who is head of the Prosthetic School, deserves a lot of credit for his fine work in teaching these men.

Credit also is due to CWO F. K. Shaw, D. J. Lynch, DTC, J. J. Smith DTC, and E.L. Murphy, DTI, who so ably assisted Dr. Superko in his work

The top three men in the class were J. A. Gaskins, DTC, D. P. Harrold, DTI, and L. Sitterson, DTI. On March 14 a new Prosthetic class will convene, so Welcome Aboard to members of the new group.

Our Dental School basketball team lost most of its members through graduation, incidentally. Among those leaving were "Stretch" Hopkins, "Stumpy" Ennis, "Whiz" Powers and "Legs" Lewis, to name only a few. However, "Hercules" Hessman and "Speedy" Evans carried on.

Sorry there isn't more gossip this time, but as the little mouse said to the Elephant who was kidding him about being so small and puny, "I've been sick".

See you again next issue!

BONUS PAY

(Continued from page one)

Louisiana—A bond issue of approximately \$60,000,000 will provide bonuses up to \$250.

Minnesota—The voters approved the bonus in principle and authorized the state legislature to provide for it.

South Dakota—Voters approved a maximum bonus of \$650 for a veteran with overseas duty and \$500 for domestic duty.

Washington—A bond issue of \$100,000,000 will pay bonuses based on \$10 per month for domestic duty and \$15 per month for foreign service.

Frates was doing the tango as guest of General Peron in the Argentines. Now very soon he will be at the Royal Hawaiian Hotel, with BuPers picking up the check. Quite a racket if you can get it!

The Patients' Corner

'It's Sure A Small World' Say Local Dental Tech.

You've heard the old one about this being a small world. Thompson, a local Dental Tech., is sure of it now. This story, though somewhat outdated, just recently came to light and it proves the old saw.

Tommy was home for New Years and hitch-hiked to the Sugar Bowl at New Orleans to see the big football game, ignoring the small item of not having a ticket. Being of a rather athletic build, he and a buddy afforded an entrance to the stadium that was reminiscent of some of their childhood escapades.

Selecting two unoccupied seats, they enjoyed the classic immensely although shrinking every time an usher or member of "The Law" passed by.

Back at Bethesda, Tommy was telling his experiences to the girl who works in the Chaplains' Office. Turned out that she also was at the Sugar Bowl that day, had entered legally, possessed two extra tickets, and had sat just a few rows above where Tommy squirmed! How about that?

(Incidentally Tommy is a fine example of the new generation growing up in the south. Skin pigments are non-existent to him.)

★ ★ ★

As Catholic Mass ended in the auditorium a couple of Sundays ago, a man sitting in a wheel chair in the rear uneasily contemplated the short, steep ramp leading from the wheel chair deck to the exits. The congregation filed past in front of him, apparently oblivious to his plight.

Just as the last churchgoers left, the patient felt his chair roll into motion and ride easily down the ramp. He glanced around to see four gold stripes on the cuffs of his helper. The high-priced pusher who wasn't in too much of a hurry to help the stranded man was the Hospital Exec., Captain B. W. Hogan.

The NEWS regrets that one of its regular columns, Tower Topics by George Royster, does not appear in this issue.

Royster, an Assistant Editor of the paper, was called to Florida last weekend by an illness in his family.

Crews' Library:

Sinc. Lewis' 'God Seeker' Now Available

Whether or not you are a great admirer of Sinclair Lewis' writing, you must admit that a new book written by him is always an event. Unlike his previous novels, THE

GOD SEEKER is not an attack on modern life or a satire, but instead his first historical novel. In it Lewis tells of Aaron Cad, a carpenter who volunteers as a missionary to Sioux Indians in Minnesota around a hundred years ago.

Frederick Wakeman, author of The Hucksters and Shore Leave, gives further proof of his versatility in THE WASTREL. It's the story of a man shipwrecked with his sons on a West Indian Island. Through the flashback method he examines his relationship with his wife and his whole, pleasant, pointless life.

Kinsey Report

Woman: "Doctor, our family is getting too big for my husband's support—can you give me any advice?"

Doctor: "Why yes, I believe so. Do you like oranges?"

Woman: "Yes, I do."

Doctor: "Well then, eat a lot of oranges."

Woman: "Er-r-r, when should I eat them—before or after?"

Doctor: "Instead."

There was the mountaineer who put a silencer on his shotgun because his daughter wanted a quiet wedding.

A generous woman had noticed that whenever she went along a certain street a down-and-out man stood in front of the pool room.

One morning, feeling sorry for him, she slipped a dollar into his hand and whispered, "There's hope."

That evening, the same man stopped her and handed her \$60.

"What does this mean?" she asked.

"It means, mum, that The Hope came in at 5 to 1."

WAC: "Listen, girlie, the sailor run after my kisses."

WAVE: "Yeah? Well, after me they line up."

She: Every time I come to Canada I have to change to my head undies. You know, I'm from Florida.

He: That so? I'm from Mississippi.

NAVY NURSE

(Continued from page one)

val Hospital, Mare Island, Calif.

Prior to coming into the service she was head nurse in the Children's Ward of Memorial Hospital, Seabrook, Mass., from which Hospital School of Nursing she graduated in 1944.

Commander Newby, a Navy man during World War II, served in the North Pacific Area and is recently retired from active duty. He is a graduate of Reedley Junior College in California.

The above picture was taken at the recent reception honoring Captain Stone, in center of picture; Left to right are Joseph R. Renard and William P. Slaughter

Hospital Staff Celebrates Capt. Stone's Promotion

Captain and Mrs. Leslie O. Stone recently were honored by the staff of the Naval Hospital at a reception here, honoring Captain Stone for his selection for promotion to flag rank.

Among the guests attending the event were Rear Admiral Glenn B. Davis, Commandant of the Potomac River Naval Command; Rear Admiral Clifford A. Swanson, Surgeon General of the Navy; Rear Admiral Herbert L. Pugh, Deputy Surgeon General; and Rear Admiral Morton D. Willcutts, Commanding Officer of the Medical Center.

Captain Hogan in his presentation speech viewed Captain Stone as a man of the soil, as well as a man of the sea.

Picturing him as a thinker, theorist and adventurer, combined with the priceless faculty of, "good common sense." Stating, "when we have the combination of both these types in the personality of one man, then, that man stands out above his fellows."

Captain Hogan also paid tribute to Mrs. Stone, whose encouragement and generous understanding over the years have contributed greatly to his successful career.

Frates To Referee Navy Cage Finals

Cdr. F. E. Frates, DC USN, flew to Pearl Harbor, T. H., yesterday to be referee-in-chief at the all-Navy basketball finals, beginning March 21.

An Eastern Intercollegiate Conference official, Dr. Frates also is well known in the Navy as a coach. The powerful Quantico Marines, who play in the Potomac River Naval Command loop, will compete in the all-Navy cage tourney.

This time last year Commander

Very beginning interns are given every chance to learn. Here the young doctor adjusts intravenous apparatus

Part of intern training includes the recognizing of smears and tissue under the microscope

Interns "write-up" many patients during their course. Above intern percusses lung during physical examination

Clear sight in the Orthopedic service is the one pictured above of intern applying leg cast

The Navy Intern

By Tony Canedo

Each year the hospitals of the U. S. Navy graduate some 250 interns into well-trained medical officers. They join the many physicians, surgeons, and specialists already practicing in the United States Navy in providing medical care for the men of the fleets and their dependents.

These new medical officers have undergone an arduous year of internship similar to that at the Naval Hospital, Bethesda, Maryland—where these pictures were taken. It's a grind, because learning to be a doctor isn't merely a matter of studying textbooks and attending lectures.

Medicine is mastered by practice—the practice of combining bed-side training and theory.

At the beginning we find the new doctor going into the wards and clinics, first as an observer and later with patients of his own to work with, under the careful supervision of senior medical officers.

All in all, the intern enjoys a well-rounded year of training and rapidly finds himself in the ranks of a field of medicine that is prominent throughout the world.

The stethoscope becomes an intern's best friend. Especially in the heart ward, where it is in constant use.

In the trained eye of veteran medical officers the new doctor soon becomes confident in doing the tricky spinal on his own

A tedious job, but very necessary is the one pictured here. Some interns find surgery fascinating. Many go on to specialize in this field

Professional touch an intern gazes into the depths of the oral cavity on routine check-up of a patient suffering a throat condition

After many hours of lectures, wards, surgery, and clinics, some interns find time to go over some of the subjects learned in medical-school

L. 1. NO. 38

RC Drive Hits All High Level at NNMCMC

As this is being written Red Cross membership contributions at NNMCMC totaled \$2,631 (87.7 per cent). Still have \$369 to go in order to reach our quota of \$3,000.

Our contributions reach the chaplain of Red Cross and help to support two of the most costly and important services of the organization. These two services, Home Service and Disaster Relief, are obligatory for every Chapter.

Home Service is the name covering the broad program of Social Service to servicemen, veterans and their families in their home communities.

Disaster Relief is set up to relieve men suffering following such disasters as earthquakes, floods, tornadoes and hurricanes, explosions, and other disasters.

Each Red Cross Chapter has a committee which sets the machinery of disaster relief in motion. Chapter Funds are called upon to meet immediate needs.

The disaster is a major one involving many people. Area personnel and Funds are rushed to the scene to supplement the local resources.

This helps to explain why the first accounts of almost any major catastrophe are likely to "Red Cross Forces are already at work on scene."

Former NNMCMC Man Killed in Japan

Donald C. Schoenborn, HM3, who left the Naval Medical School last September for duty at U. S. Naval Base, Yokosuka, Japan, was killed in an automobile accident near there on February 17. It was learned by his ex-shipmates here this week.

Schoenborn died in the line of duty. He was killed when the automobile in which he was riding was involved in an accident on the outskirts of Yokosuka.

'Y' Cottage Activities Get Under Way April 1

Backyard barbecues, hayrides, weiner roasts, hikes, and horseback riding are on the "Y" Cottage calendar for the month of April.

Deadline Near For Vets Bonus In 3 States

Veterans of World War II who are natives of Michigan, Connecticut, and Illinois are advised that the deadline for filing their bonus applications forms is drawing near.

In Michigan, the deadline is March 20, 1949, and all applications must be notarized and mailed to the Adjutant General's Office, Lansing 1, Michigan, before that date.

Connecticut and Illinois officials have set July 1, 1949, as the deadline for the filing of applications. Veterans of Connecticut may write to the Treasurer, Veterans Bonus Division, State Armory, Hartford, Connecticut, and Illinois vets may contact the Service Recognition Board, 301 W. Adams St., Springfield, Ill., for blanks and information for filing.

Another state, Louisiana has announced that bonus forms are now being distributed, and it is expected that the money from this state will

(Continued on page 3)

Arnold Phillips, chairman of the Outdoor Activity Planning Committee, announced at a recent meeting that the committee composed of servicemen, hostesses, and veterans of the community has a varied program that will appeal to all enthusiasts of the out-of-doors.

There will be picnics at historic Great Falls, fishing trips, and if there is sufficient demand an opportunity will be provided to climb "Old Rag"—one of the rugged peaks in the Blue Ridge.

Saturday afternoons during the month of April are reserved for these outings, so don your hiking clothes and be on hand at the Cottage, 8410 Wisconsin Avenue.

Joy Of An Editor

Getting out this paper is no picnic. If we print jokes, people say we are silly; if we don't they say we are too serious; if we clip things from other papers, we are too lazy to write them ourselves, if we do not, we are stuck with our own stuff.

If we stick close to the job all day we ought to be hunting news. If we get out and try to hustle, we ought to be on the job in the office.

If we don't print contributions, we don't appreciate true genius, and if we do print them, the paper is filled with junk. If we make a change in the other fellow's write-up, we are too critical, if we don't we are asleep.

Now like as not, some guy will say we swiped this from some other paper. We did.

Projected Service Pay Boost Based On Civilian Earnings

Congress to Act On Services Proposed Subsistence Pay

Pay structure for a serviceman should offer initial compensation and progressive increases comparing favorably with what he could expect in other professions and occupations requiring similar abilities.

Chaplain Has Role In Task Force Movie

(SEA)—Commander Alve O. Martin, ChC, USN, will play the role of a chaplain in a sequence in Warner Bros.' forthcoming movie, "Task Force".

The heroic Navy chaplain is serving on the aircraft carrier USS ANTIETAM (CV 36) which was used as a background for many of the shots to appear in the film.

Chaplain Martin was with the Third Marine Division on Iwo Jima and was in the first group to reach Mt. Suribachi. Before reporting aboard the ANTIETAM, he was senior chaplain here at the Medical Center.

Bio-Chemistry Dept. Has New Flame Device

The bio-chemistry department of the Medical School has added a flame photometer to its already impressive array of instruments and gadgets to help the technician put out more work in less time.

This large, rather cumbersome-looking affair with its many knobs, dials, and acetylene flame, is the very latest development in clinical chemical determinations. The instrument makes the technician's life easier by providing a means of determining calcium, potassium and sodium levels of the blood and other fluids in a few minutes where previously it took several hours or even days to make these determinations.

The machine measures the light emitted by the metals when solutions of the metals are burned in acetylene. Since the intensity of the light emitted depends primarily on the concentration of its atoms in the flame at any given instant, a measurement of the light intensity produced by a given element makes

This was the broad underlying principle set by the Hook Commission, known technically as the Advisory Commission on Service Pay, in recommending the first general overhaul of pay schedules since 1908.

Recommendations Studied

The Armed Service recommendations for pay revisions, based on the Hook Report, is presently before Congress for legislative action.

Basically, the committee reported that present pay scales do not provide sufficient incentive to the serviceman and that a new program should be related to compensation in industry; be formulated on the principle of pay for responsibility, and provide incentives for advancement.

Pay Determined by Grades

The pay incentive should be the differential between grades rather than the accumulation of longevity.

The distinguishing characteristics of the proposed compensation for length of service, as distinguished from the current "longevity" plan are:

The new length of service increases would be known as "in-grade" increases. They would be paid on a flat rate of increase, rather than on a percentage basis, and they would be paid at intervals of two years.

In-Grade Increases

The increases would cease in each grade when it is reasonably expected that the individual should have advanced to a higher grade. Once the individual is promoted, however, his eligibility for additional in-grade increases would continue uninterrupted until he has reached the maximum in that pay grade.

In-grade increases would be made every two years up to 18 years, where they would be made every four years.

The Commission said that laws relating to promotion of officers should offer the same career opportunities in all the services.

possible the quantitative determinations of that element.

The machine is being set up and calibrated by William Eliades, HM3 of the Medical School Staff, under the supervision of Dr. H. C. Sudduth of the bio-chemistry department.

"You Can't Have Your Cake And Eat It, Too"

To those associated with the medical profession it would seem commonplace to remark that Nature always hits a balance.

The little boy who eats green apples must suffer the consequent stomach ache — The Bacchanalian reveler who carouses on New Year's Eve will wake up on the first day of January with an ice bag on his head.

Nature always seeks its own equilibrium, and the point of the whole matter is that "you can't have your cake and eat it."

The age in which we live has often been termed a "pleasure-seeking age," and the fact that it is continually searching for pleasure is ample indication that it has not yet found it.

Millions of dollars are poured into emporiums of entertainment annually, and one would be inclined to think that we have received the short end of the bargain in the Happiness market.

For after all, practical minded Americans are well cognizant of the fact that everything has its price—you get nothing for nothing, and you pay through the nose for everything you get.

The same principle is true in the supernatural order, and the saint does no more in the sphere of the spiritual than we do in the temporal.

Yes, the principle is still the same, little for little, much for much, and all for all, for barter always implies the forfeiture of something of less value for something of greater value.

The season of Lent, therefore, with all its penance and mortification, is to the practical Christian not so much a forty-day endurance contest, or an opportune occasion to apply the doctor's advice relative to curtailing excessive avoirdupois on physique or figure.

Rather, it is a "down-payment" on spiritual security, an investment in personal happiness; a sincere endeavor to accompany our Divine Saviour through the somber mournfulness of his Passiontide in order to come with Him to the glorious dawn of His Resurrection.

JOHN P. FAY
Chaplain, U.S.N.

Meet Your Commanding Officer:

Captain Louis C. Mitchell

Captain Louis D. Mitchell, DC, USN, was born and raised in LaGrange, Georgia, and attended the University of Georgia Pre-Dental School. Graduating from the University of Tulane Dental School in 1926, he then returned to Georgia and practiced there until his entrance into the Navy in 1927.

His first duty station was Parris Island, South Carolina, and then came various shore stations in the United States. Next came sea duty on such ships as the Raleigh, Milwaukee, Canopus, and Trenton.

Following this, Captain Mitchell was on the staff of the Yangtze Patrol in China. During the war, the Captain served at the Naval Air Station, Jacksonville, Florida, and as the Fleet Dental Officer for the Seventh Fleet in the Southwest Pacific Area.

It was during his tour in the Pacific that he was elevated to his present rank.

Before coming to the NDS, Captain Mitchell was Senior Dental Officer at the Marine Barracks, Quantico, Virginia. However, this is not the first time he has been at the Dental School.

In 1928 he was here for the Indocination Course and then in 1938 and 1939 he was on the staff here.

Although the Captain won't give a specific preference of duty he states that he enjoyed very much the sea duty in China and then in

Europe in 1939-40, at the beginning of World War II.

Captain and Mrs. Mitchell now live in Bethesda with their two daughters, ages 5 and 2.

His recreation consists of photography (he has his own enlarging equipment), and baby sitting. He has taken this up to replace tennis, which he enjoyed in his younger days.

During his present tour of duty as Commanding Officer, Captain Mitchell has done much to make the Naval Dental School stand out in the ranks of United States Dentistry.

Pictured above, left to right, are Jack Anderson, "Butch" and Richard Funk, all prominent members of the "Y" Cottage.

The Patients' Corner:

Staff Works Long - Hard, So Patience, Patients!

by William B. King

There's not much that can be done about less patients, but there is a great deal that we can do about more patience if we fully understand how much of a load the staff of the hospital is carrying.

Just look at the hours the corpsmen have. We feather merchants, (Max Shulman's term for civilians) and gold bricks (anybody's term for a service patient) would quit the union or the Navy if we had to work nine or ten hours on weekdays and fourteen-and-a-half on Saturdays and Sundays.

Butch, Mascot Of 'Y' Cottage, Has New Home

'Twas a sad day indeed, the 11th of March, when members of The "Y" Cottage family said farewell to Andy, secretary and custodian of The Cottage, and to Butch, the Cocked Spaniel who had wagged greetings and friendliness to servicemen over the past years.

Because of staff retrenchment at the Cottage, Andy decided to go back to his home in Milwaukee and it was agreed by all that Butch should go with him as he is in his declining years and needs special care.

Without a doubt the spirit of Butch will prevail over the Cottage for a long time to come and the beautiful oil portrait presented by the artist Mrs. Verna Allen will help to retain that spirit.

These long weekend hours are necessary so that the corpsmen can have liberty every other weekend, but it means a double load on the half of the staff that remains on duty.

The nurses who are on night duty put in nine hours every night for twenty eight nights in succession. For instance, Lt. Burta was responsible for 16 wards and 571 patients on Tuesday, March 15. Even at that, on Ward 107 only 6 of the 34 beds were occupied.

This may sound a little like Pollyanna but we all know there will always be a few people who get away with doing as little as they can.

However, it would help all around if the next time we remember that there may be someone sicker than we are whom they are about to help.

Then if our request is forgotten in the meantime no one will mind if we ask again because we'll be showing some patience, patients.

FORMER NNM MAN KILLED

(Continued from page 1)

Born in Mohomen, Minnesota, the likable HM3 was 23 years old at the time of his death. Before going to the Orient he was on duty in the Master at Arms office of the Med. School.

He served in the USNR during World War II, seeing overseas duty at Pearl Harbor and Puuloo, Oahu, T. H. Later, while on board the USS BURROWS, he earned the Navy Occupation Service Medal (Asia Clasp).

Also, Schoenborn was awarded the Good Conduct Medal, American Campaign Medal, Asiatic-Pacific Campaign Medal, and the World War II Victory Medal.

Discharged from the USNR in April, 1946, he enlisted in the regular Navy three months later and was transferred to the NMS here.

He is survived by his wife, Mable, who was awaiting passage to Japan to join her husband when she learned of his death.

G. L. Shankle, DAV Officer, To Be Here Every Wed.

Here's good news for veterans as well as those servicemen about to leave the armed forces.

George L. Shankle, a National Service Officer of the Disabled American Veterans, will be here at the Naval Hospital every Wednesday to assist veterans with their problems.

He can be reached on that day of the week at the Veterans Administration contact office, located in Room 133, Bldg. 1, Phone Ext. 300.

The D.A.V. offers a complete veterans service, and vets do not have to be members of the organization in order to seek its assistance on matters such as pensions, affidavits, special claims, and so forth.

Any serviceman who has a service incurred disability is eligible for membership in the D.A.V., Shankle said. He emphasized that such disabilities need not necessarily stem from wounds incurred in combat, and that they may be either incurred in or aggravated by the line of duty.

Veterans of any war who have service-incurred disabilities may join, as well as servicemen who have re-enlisted since the end of World War II. Injuries incurred or leave are considered as being in line of duty, Shankle remarked.

All Purple Heart wearers are automatically eligible for membership in the D.A.V. One need not be drawing any compensation in order to join.

The D.A.V. is the official voice of the disabled veterans of this country and the only such organization authorized to speak for disabled vets, and recognized by Congress.

Any veterans or servicemen who are eligible for the D.A.V. would like to join, as well as those who merely wish the group's assistance in some regard are urged to contact Shankle at the VA contact Office on any Wednesday.

Contact Men Ready To Aid All Veterans

Do you know where the Veterans Administration contact office is here at the Medical Center or who the men are that are there to assist with your problems? No? Then lend an eye to this.

The VA office here is in Room 133 (Bldg. 1), with phone extension 300.

There to help you are three men: Francis P. Kelly, E. W. Pinkham and James F. Fitzpatrick. Kelly is an Army veteran while the other two saw service in the Navy.

They are there for your benefit—feel free to see YOUR VA representative here if there is any problem pertaining to pension claims and the like in which you feel they can be of assistance.

CivRecs Make Plans For Mid-May Dance

The NNM Civilian Recreation Association is planning a dance for Friday, May 13, to be held at the National Press Club Building in downtown Washington.

Tiny Meeker and his orchestra will provide the music and admission will be \$1.50 per person. Dress will be optional.

Those attending the affair are asked to use the 14th Street entrance to the building, between "F" and Pennsylvania.

all for this time. I'll see two weeks from now.

Pictured on the left is H. J. Johnson BTC USN using lathe for spindle turning. In the picture on the right is Miss Jane Kerr OTR, instructing patients L. B. Gossett, IC2 USN and R. S. Kling PFC USMC in leatherwork. The purpose of this procedure is restoration of function to the fingers. In the center picture is Lt. Ann Davidson instructing patient T. O. Massey AA, USN, using Arm Sling suspension (for support of muscles too weak to sustain working position).

Occupational Therapy Department Helps Rehabilitate N. H. Patients

If you were to visit the Occupational Therapy Department in the Naval Hospital you would find there a warm welcome for visitors and a staff which is always glad to show you the shops and equipment and explain the work that is being done.

The department is located in Building 144 and is reached by way of the corridor which passes Ward 130.

Patients are referred to Occupational Therapy by their ward medical officers or by Lt. G. E. Vaupel, MC, USN, the Chief of Physical Medicine, for the treatment prescribed is often correlated with treatments being given in Physical Therapy.

The Occupational Therapy Department divides its work into three phases according to the needs of the patients: functional work for those patients with orthopedic or neurological disabilities; neuropsychiatric work for patients from both closed and open wards of the N.P. service, and diversional work for patients who do not need specific exercise but require interesting and productive activity during convalescence.

The department is headed by LT. Ann Davidson, NC, USN, and the

staff consists of two nurses and four civilians who are registered occupational therapists, and three hospital corpsmen who are graduates of the Navy School of Physical Medicine. The members of the staff are assigned to the various shops within the department to instruct and help the patients in choosing and executing their projects.

When you first enter the building you will see a showcase where articles made by the patients are displayed. Perhaps you will be surprised at the quality of the work done, in many cases, by people who have had no previous training or experience in manual activities.

Although careful workmanship is always encouraged and an attractive finished project is to be desired, the chief aim of the therapists is not the object being made but the benefits which the patient may derive from its construction. This fact will become more apparent as you visit the several shops and see the patients at work.

Carpentry, radio repair, leathercraft, weaving, ceramics, and photography are the activities located on the main deck and there is also an art room for patients who are interested in painting, sketching, or mechanical drawing.

The carpentry shop is equipped with power tools and hand tools, and the patients are taught woodworking methods by Mr. E. Robert Kanning,

one of the civilian occupational therapists.

This work is of great interest to many patients and the possibility of constructing large and useful articles, such as lawn chairs, bookcases, and tables, makes it especially interesting to ambulant patients who must remain in the hospital a long time.

R. C. Wagner, HM1, is in charge of the radio shop where patients may do repairs on their own radios or learn the fundamentals of radio repair by working on the hospital earphones or other radios brought in for repairs.

The printing shop, where R. E. Owen, HM2 works with the patients, has both a foot press and a hand press and the patients learn to operate the presses and to set and lock up the type.

Occupational therapy work for diversion and specific exercise is carried from the department to bed patients on some wards by Miss Caroline Norfleet. This work is naturally more limited in scope and patients should be encouraged to use the facilities of the shops when they can walk or come in wheel chairs.

It is the hope of Miss Davidson and her staff that personnel from other parts of the hospital will find the opportunity to inspect the Occupational Therapy Department and become acquainted with its aims and methods.

Advance Information On New Uniform Changes

Uniform changes continued from last Edition are as follows:
White gloves, instead of gray gloves, are now authorized for wear by commissioned and warrant officers with service dress blue.

The following additional changes in the uniform regulations have been approved.

Commissioned officers, warrant officers, chief petty officers, and stewards are authorized to wear khaki shirts made of tropical worsted (or other lightweight wool fabrics) with service dress, khaki, as an optional item.

A lightweight khaki raincoat and rain cap cover have been approved as optional items of uniform for officers, warrant officers, chief petty officers and stewards for wear with white and khaki uniforms. Specifications are now being prepared by the Bureau of Supplies and Accounts, and it is expected that this raincoat and rain cap cover will be available for purchase about June, 1949.

Provision is included for chief petty officers and stewards to wear rating badges consisting of blue embroidered eagle and specialty

marks with blue chevrons on the shirt of the khaki working uniform.

A rating badge consisting of silver embroidered eagle and specialty mark with blue chevrons has been approved for wear by chief petty officers and chief stewards on service dress, khaki.

Provision is included for aviation cadets to wear gold shoulder marks with service dress, khaki, in lieu of the coat-collar anchor insignia heretofore prescribed. The garrison cap device is changed to a gold metal anchor pin-on device (same as worn by aviation midshipmen).

The designation of uniform tables for women officer and enlisted personnel have been modified to prescribe the wearing of white gloves with service dress, blue, B, and to prescribe the wearing of white gloves with service dress, blue A, on formal or social occasions.

Wave Whisps

by Betty Bookis

Sorry to let ya' down, fellas. Here I've been out of "boot" seven whole weeks already and STILL NO PROMOTION! Jus' what does a girl have to do aroun' this place to make CHIEF anyway? (No, not that!)

Yeh, I've heard a few of the remarks about Waves. Struck me funny at first, but now—well, I guess I'm slowly becoming immune to the wisecracks.

You can say what you please about us, but brother—we gals are finally going to fight back—in black and white. The power of the press is terrific!

"Go ahead and write a column," they tol' me. "Doesn't have to be fancy. Just tell us what you and the other girls think about. The boys might be interested." So here goes; if you're bored, feel free to skip over to something else. I won't mind.

In the first place, WAVES ARE WOMEN—whether you believe it or not. At times you wouldn't think so, from the way people stare. We're human, we walk and talk just like everybody else.

Some of us like the Navy; some of us don't. All a matter of opinion, I suppose. Personally, it's a little early to say. Time will tell. Have been doing everything from playing disc-jockey to scoutmaster so far, and it hasn't killed me yet.

According to Lieutenant B. E. Dalier, our official representative, there are twenty-three Waves at the Center, twelve officers and eleven enlisted women.

All of us live off the base on a Quarters-Commuted Rations basis. That probably sounds good but it definitely has its share of disadvantages, strange as it may seem.

About the only time one Wave comes in contact with another is in the pay line a couple times a month. Since they're practically strangers, it doesn't make much difference anyway.

Although there are plenty of recreational facilities available here, the ladies, being so greatly outnumbered, feel a trifle "out of place" using the swimming pool or the bowling alleys unless escorted.

Consequently, they seek entertainment elsewhere, and you see very little of them. They're not high-hat; just normal people, that's all.

We hope in the future, through this column, to bring to light several odds and ends pertaining to women in the service—especially those here at the Center. Perhaps, you'll get to know and understand us better. Anyway, let's give it a try, huh?

STATE BONUSES

(Continued from page 1)

be ready by late March or early April. Bonuses will be paid to Louisiana citizens who served in the armed forces between January 1, 1941 and March 1, 1946.

Louisiana veterans may obtain their blank forms from Parish or American Legion Service Officers, and eligible out-of-staters may get theirs by writing Mr. Thomas C. Glaze, Bonus Administrator, Baton Rouge, La.

Hospital Stuns N.P. Captures Court Title

Naval Hospital is the 1949 intramural basketball titleholder of the Medical Center.

The smooth-working Main Quarters quintet upset the dope bucket by clipping favored N. P. in two straight playoff games, 46-32 and 43-41, capturing the latter contest on George Funk's basket just before the final whistle.

Sportin' Aroun'

By Clyde Schubert

Have you joined a Pyramid Club yet?

That seems to be the number one question in the D. C. area these days—yes, even among sportsmen. The other night at the Wash. Caps-Minn. Lakers cage battle everyone this writer talked to asked him that question.

Incidentally, personal experience as well as assorted scuttlebutt indicate that those Pyramid Parties are THE THING. But enough of that.

Several persons thought I did wrong in placing Kentucky's Wallace Jones on my all-American college quintet. One thing's for sure, though; those gents who picked Bob Erickson of Illinois for Colliers' all-American missed the boat, overlooking a number of better all-round courtmen.

Wow! The favorites really bit the dust in quarterfinal-round action of the recent National Invitational cage tourney at New York.

Kentucky, vaunted St. Louis, the Utah Redskins and Western Kentucky all took it on the chin. Most observers, including myself, gave San Francisco's crafty outfit little chance of winning the tournament.

Too bad colorful Bradley U. didn't quite have it either against Loyola or Bowling Green's giants. The NCAA finals coming up should be terrific, with Oklahoma A and M still in the running.

PRO PLAYOFFS: Guess our Washington Caps (am writing this on the 21st), are out of luck in the BAA post-season playoffs, what with both Fred Scolari and playmaker Bob Feerick sidelined. Alas!

I like the Chicago Stags, a great ball-handling club paced by dead-eye Max Zaslofsky and Gene Vance, to take the Western Division playoffs and battle the Eastern Division's New York Knicks for the championship.

Incidentally, the Caps couldn't lick N. Y. last Saturday, but won an easy decision in the late-game fisticuffs. Guess that demonstrates that there's more than one way to LICK an opponent.

Those ancient gags about whiskey currently being pulled on Pitcher Paul Calvert down at the Washington Senators' training camp in Orlando, Fla., must make the ex-Cleveland flinger a trifle disgusted at times.

Fear that our Nats are, without a doubt in for a bad year. I like the Boston Red Sox to beat out the Indians and Tigers in the A. L. in '49, with Pittsburgh taking the Senior Circuit flag, despite the presence of the Braves and effervescent Dodgers—no soap for Durocher's dandies, the Giants.

Back to basketball for one final effort: Here's my all-BAA selections. My first team includes Chicago's Max Zaslofsky, Bob Davis of Rochester, Philly's Joe Fulks, Bob Feerick, steady Washington captain, and of course, George Mikan of Minneapolis.

Second team berths go to Arnie Risen, rangy Rochester center, forwards Bones McKinney of the Caps and St. Louis' Bob Logan, and Guards Gene Vance from Chicago, and Connie Simmons, Baltimore ace.

After winning eight games in a row during the regular season, the N. P. Gazelles were ambushed by Naval Hospital, 41-40, in a second-half tussle.

Later, however, N. P. rallied to nip Med. School, 37-35, to prevent the Labmen from getting into the playoffs.

In the first playoff tilt Main Quarters jumped into an early lead and led throughout. The score by quarters was 9-7, 22-15, and 34-23.

With lanky Ted Echols, who towers 6-5, and burly George Funk, 6-3 pivotman, snatching most of the rebounds, the Ducks proved too speedy and sharp-eyed for their highly-rated foes.

Main Quarters raced out in front, 13-6, early in the second playoff tilt, but then N. P. caught fire and hit four quick field goals to nab a 14-13 first quarter advantage. Hospital stayed cold during the second session and trailed, 22-15, at intermission time.

The rangier Ducks began to rally in the third session but were still in arrears, 34-31, as the final frame opened. Shortly thereafter Jack Levi, ace forward of the losers, fouled out, aiding the Ducks' cause considerably.

Sparked by Paul Murray, unheralded forecourter, the Gazelles then sped to a 39-33 margin. Hospital suddenly went into a pressing man-to-man defense and the N.P. attack bogged down.

Funk's cool play and accurate shooting helped the winners tie the count at 39-all before Murray connected again to make it 41-39, N. P. Once more Funk hit, knotting matters at 41-41.

With 10 seconds to go Funk was fouled as he snagged a rebound. He missed the gift toss but got the ball off the bankboard and let fly a one-hander. It bounced around on the rim, and then dropped through the net just as time ran out.

To the added all-star position of Fireman I name Kenny Sailors, the former Wyoming U. flash who now stars for the Providence Steamrollers.

Hope that the Medical Center can sport varsity golf and tennis teams this year—only time will tell, but the NEWS is all for it. Time to breeze now, but will have more sports slants for you next month.

In Keepin' With The Wearin' Of The Green

Pictured above is one of the many groups who were in attendance at the St. Patrick's Day Dance. Highlighting the evening's entertainment was the music of Howard Williams' Orchestra, pictured on the right.

Featured vocalist with the band was the very lovely and charming Mary Lou Brewer. The festivities came to a close with Williams' orchestra playing its theme song, "On the Sunny Side of the Street," which has made his name well-known in the Washington Area.

NNMC Cagers Top Grain Belt

The NNMC All-Star basketball team whipped Grain Belt of Washington, D. C., 58-41, in an exhibition game here Monday night.

Off to a slow start, the Medical Center club held an 11-8 first period lead, and was ahead, 23-21, at half-time.

However, in the final two frames the All-Stars began to rebound better and clearly outclassed Grain Belt in the late stages. The score was 55-31 shortly before the finish.

Topping the winners' scoring were George Funk and Paul Harmer with 11 points each. Bud Lind and Ted Echols dumped in nine apiece, with Fox and Cookson pacing the Grain Belt attack.

Paul Glunz, lanky guard, stood out with his rebounding, while Jack Levi and Pete Stanley turned in good floor games.

All-Star Five Halts Ducks

With warm weather coming on, the NNMC Admirals plan to launch full-fledged outdoor drills next week if possible, in preparation for the coming 1949 Potomac River Naval Command baseball season.

All men on the station interested in playing for the Admirals this year are urged to start working out on the diamond across from the Recreation Bldg.

Battle Wagons Still On Top Of Pin League

Still rolling along on top of the Medical Center duckpin bowling loop standings are the Battle Wagons, with the Tin Cans and Tankers still in hot pursuit of the leading five.

The Battle Wagons sport the high team game of 563 and also the top team set of 1,558.

Mr. Kirby continues to pace the male keggers, while Jean LeBlanc and Mary Jane Koiner head the women timber-toppers.

Kirby has the high game average of 113, high individual game of 156, high set of 382, and ranks first in spares with 147.

Harrington's 32 strikes leads the men in that department.

Jean LeBlanc has high game of 130 among the feminine firers and has accrued 77 spares. M. J. Koiner boasts the best individual game of 96, and M. Lee has notched 21 strikes.

Admirals Start Outdoor Drills

The curtain came down on NNMC intramural hardcourt campaign March 15 when an NNMC All-Star squad squeezed past Naval Hospital cagers, stadium champs, 56-54, in a nip-and-tuck struggle.

Playing as a unit for the first time the All-Stars displayed a surprisingly polished floor game and hit several sensational shots. Meanwhile Main Quarters, minus rangy Ted Echols, played its usual cool-headed game, and kept the winners busy with a furious fast break.

The All-Stars forged into a seven-point half-time lead, and stayed in front the rest of the way. Spearheaded by Jack Stanley, shifty forward who topped the scorers with 20 points, Hospital closed the game to two points at the game's end.

Members of the All-Stars included Bud Lind, Paul Glunz, Canterbury of Med. School, Tall of Research, N.P.'s Jack Levi, He man from Dental, and Jay Bell Center Command.

Trophy At The Rainbow's End

Pictured above are the undisputed champions of the NNMC intramural cage league, the Naval Hospital shotmakers. Left to right are Earl G. Dennler, Richard F. Ramsey, Paul E. Stanley, George Funk, John H. Stanley, and Chief C. H. "Bucky" Harris, representing the Recreation Department. Harris is holding the championship trophy.

Capt. Gatlin Reports As New Senior Chaplain

Captain H. Grady Gatlin, Chaplain, U.S. Navy, reported aboard the NNMHC on 28 March and assumed the duties of Senior Chaplain.

Prior to present duty, Chaplain Gatlin served as Force Chaplain, Marine Force, Pacific Ocean Area with headquarters at Pearl Harbor, T. H. In this capacity, Chaplain Gatlin was responsible for the Chaplains' activities among the Marines and the twenty Chaplains assigned to the area.

Chaplain Gatlin has served thirty-one and one half years as a Chaplain in the U.S. Navy. He was the Senior Naval Chaplain assigned to Pearl Harbor, has served at the Naval Hospital, San Diego, California when it was filled to capacity and recently served at the Treasure Island Naval Training and Distribution Center.

The National Naval Medical Center is happy to welcome Chaplain Gatlin aboard. Many of ship's company have been shipmates with Chaplain Gatlin during previous tours. The Naval Medical Center is favored in having Chaplain Gatlin whose cruises have taken him all through the U.S. and who can lend his experience in directing the Chaplains' activities at the Center.

Happy Cruise with us, Chaplain

Captain H. Grady Gatlin

April 'Cancer Control Month'

The President has issued a proclamation calling upon all citizens to bring this vicious disease under control.

Lieutenant Commander Charles L. Crawford will act as chairman at the Naval Medical Center for solicitation of staff and patients who may care to contribute to the program.

There is no definite quota to shoot for in this campaign. The chairman contemplates a sizeable collection, however, having taken the measure of the fund's popularity at the station from previous years' records.

Easter Dawn Services To Be Held At NNMHC

The Chaplains' Division of the Naval Medical Center announces the Easter Dawn Divine Service which will be conducted here on 17 April at 0630.

The Ministerial Association of Bethesda, Maryland is cooperating in this community-wide celebration and observation of the Resurrection.

Captain Stanton W. Salisbury, Chaplain, U.S. Navy, recently selected for Rear Admiral, Chaplain Corps, will present the Message of the Day. A unit from the Naval Musicians' School has been invited to play at the service.

All Protestant Naval personnel, patients, civilian workers, and friends are invited to join with Bethesda, and adjoining communities on this Holy Day.

Fleet Admiral Chester W. Nimitz

Admiral Nimitz Visits Center

On March 25 Fleet Admiral Chester W. Nimitz visited the Medical Center to pay his respects to friends before leaving to view elections in the state of Jammu-Kashmir, India.

Admiral Nimitz was named recently by the United Nations to administer a plebiscite in the princely state of Jammu-Kashmir.

The vote concerns affiliation with either Hindu India or Moslem Pakistan by the northernmost state in the Indian Republic.

Adm. Willcutts Extends Joyous Easter Greetings

Easter time again, the White Festival, liturgically symbolic of sanctity, joy, light and purity. It is the happy period for renewal of faith and belief in the resurrection of the martyred Christ.

The simple yet mightiest sentence ever spoken—"He Is Risen"—established forever the central foundation of the Christian Faith.

Regardless of personal faith or religion, we must agree that the first Easter marked the greatest event in all Christian history and fixed indelibly a basic source of everlasting goodness and glorious religious philosophy.

We have here many seriously sick and wounded. Many different creeds and faiths are represented, but to each the Easter commemoration may mean contentment, assurance, joy and light.

To all members of our great Medical Center, both naval and civilian groups, my sincere Easter Greetings!

Full Moon Sets Easter Sunday Date

(SEA)—Although the exact date for Easter, the annual commemoration of the resurrection of Christ, has caused much dissention and dispute in Christendom, the date of Easter Sunday in modern times is calculated according to the phase of the moon at a certain time of year.

Easter, the date of which varies considerably, is always the first Sunday after the first full moon on or after 21 March (the vernal equinox). The "vernal equinox" is that time of the year when the sun's center crosses the equator, and day and night are everywhere of equal length.

For example: this year, the first full moon after 21 March occurs on 12 April, and the first Sunday after that is 17 April—Easter Sunday for 1949.

Navy Flies Emergency Smallpox Vaccine To Cuba

Captain Vincent Hernandez, MC, USN, Executive Officer of the Naval Medical School here, was aboard the airplane which flew a supply of smallpox vaccine to Havana, Cuba, Tuesday, March 29, from New York City.

That country reported its first case of smallpox in more than 20 years. With no vaccine available for persons who desire treatment there, a request for immediate assistance was made by the Minister of Public Health.

It was found that the Navy had the only large amount of vaccine available for immediate shipment and Rear Admiral Clifford A. Swanson, MC, USN, Chief of the Bureau of Medicine and Surgery ordered the assembly in New York of 200,000 points, enough to vaccinate upwards of 500,000 persons.

A point is a capillary tube containing a small amount of vaccine, hermetically sealed. The vaccine was taken from present stocks.

The Navy Plane left LaGuardia Field, New York, late Tuesday for Miami and from there continued to Havana early Wednesday morning.

Army To Hold Celebration In Wash., April 6-9

Army units throughout the world will celebrate Army Week from 3 to 9 April, highlighted by varied ceremonies on Army Day, 6 April, founded 32 years ago by the Military Order of the World Wars and sponsored subsequently by that famed patriotic organization.

In Washington, an Army Day parade will feature Army, Navy, Air Force and Marine Troops and National Guard and Organized Reserve Corps participation.

In the European Command, Army Day will be celebrated as a special

(Continued on page two)

Volunteer Reserve Units Attend Course Here

A special course for Commanding Officers of Volunteer Reserve Units will convene at the Naval Dental School, here April 25 and will have a 14 days duration.

It is anticipated that Volunteer Dental Units throughout the United States will be represented by the commanding officer of the unit, if available, or by the executive officer or next senior dental officer.

The curriculum for the first week will cover the medical aspects of special weapons and radio-active isotopes and will be given in conjunction with a group of reserve medical officers.

During the second week the reserve dental officers will meet independently and the time will be devoted exclusively to the problems of administration of Volunteer Dental Units and Dental Departments.

Prize Awarded for 'Secret Land' Picture

(EA)—The Navy has won an award of the coveted annual Academy Awards of the motion picture industry was presented the Navy's "The Secret Land," selected as the best documentary production of 1948. "The Secret Land," a documentary of the 1947 Antarctic expedition from Navy motion picture

'To Hell And Back' Brings Live Action In World War

By Mildred C. Bean

A list of new titles added to Crew's Library during March is posted on the bulletin board. into the habit of consulting this each month so that you will be to keep up with our growing collection.

You will notice that we have received the latest volume WHO'S WHO IN AMERICA the 1949 WORLD ALMANAC INFORMATION PLEASE. ALMANAC to help with reference questions. Also, there are two fine books on RADIO and three PHOTOGRAPHY.

Among the war narratives are as interesting as fiction:

TO HELL AND BACK—

by Audie Murphy

America's most decorated G gives us a simple human record of the little men of the infantry in the dugouts and foxholes during the invasion of Italy and the rope.

MASTER OF THE GIRL PAT—

by Osborne

The arm chair traveler can relax while the author plunges from one incredible adventure another from the time he went sea at the age of 14 through European and Pacific theatre World War II.

The Message Of Easter - That Peace The World Cannot Give

The night that Christ came into the world, Divinity manifested itself from a cave, when the voice of God was heard in the cry of a child.

On the day that Christ rose from the dead, Divinity manifested itself from the grave, when the author of Life conquered the specter of Death.

It is significant that these two events should have transpired beneath the crust of the earth. This is so because the moral and social upheaval that was to take place as a consequence of the Son of God living with the sons of men, was to shake the world to its very foundations with the impact of its doctrine and the force of its mission.

On the night that Christ was born an angelic choir proclaimed "Glory to God in the Highest, and Peace on Earth to Men of Good Will."

The day of His Resurrection, an angel revealed that "He is Risen; He is not here." The message of Easter is the same as that of Christmas—Peace.

It is peace, however, that comes from proximity with Divinity, and Divinity is not found in whitened sepulchers that are full of rotteness and dead men's bones.

On this Easter morning the prayer of the Christian world might well be directed towards the alleviation of "man's inhumanity to man" and contradict that shibboleth with the realization that man can sometimes exhibit a bit of divinity by a small display of humanity.

With such a reflection Easter will not be merely an epilogue to the somberness of Lent, but a prologue to a triumphant era of Christian peace.

In every truth it can be a glorious dawn that breaks a new day with "that peace which the world cannot give, with the peace that comes only from Divinity, and which alone can penetrate the blackness of the human heart, and permeate the darkness that envelopes the heart of the world."

John P. Fay, Chaplain, USN

To Mr. And Mrs. North America, Around The Globe, Ships At Sea

One of the many small units which put in a hard day's work every day here at the center is the Communications office. The word communications probably will not register to the average bluejacket on the base.

'Words-Music' to Play Here On April 13

"WORDS AND MUSIC," a super-slick blend of music, comedy and dance, will be unbottled for the men at NNMCM on April 13, at 1800, in the Main Auditorium.

From the opening act to the show's close, this Veterans Hospital Camp Shows revue captures the happy, carefree appeal of the best in variety entertainment, for the acts have been carefully selected to offer the maximum in listening and viewing pleasure.

The lyric words and music are smoothly handled by DENNIS & THOMPSON, a boy-and-girl duet that clicks from the first notes of their stanza which includes such favorites as "Summer Time," "Beyond The Blue Horizon," and melodies by Kern and Gershwin.

A comedy embellishment in the words-and-music department is provided by that PETTY gal—first name, RUTH. RUTH and her original songs and special arrangements was a USO-Camp Shows favorite in theatres of war on three continents. In this country, she was a "find" of Billy Rose, and has been a headliner in leading show spots.

The instrumental part of the show's lineup are handled by JERRY CASSELLA and BILL ZERCHER. JERRY is a versatile performer on the accordion and trumpet, and BILL does a sweet job on the ivories.

When it comes to the revue's dance department, keep a sharp eye on petite PEGGY McCUE, and keep an eye and ear on FRANKIE CONVILLE and his chic chick of a partner, SUNNY DALE. FRANKIE is another veteran performer on the USO overseas circuit.

And getting back to the gals, you won't want the comedy acrobatic team of MANN & ROSS to leave the stage.

ARMY DAY

(Continued from page one)

holiday, with only essential activities in operation.

In Hawaii, Alaska, Korea, Japan and other bases in the Pacific, troops will participate in special Army Day functions, similar to those within the United States.

To elucidate on the subject, the Naval teletype exchange and Western Union, combined, form the Center's Communication system.

The Comm. office NTX machine runs continuously, handling approximately 60 messages every twenty four hours, seven days a week. Messages dispatched through this office travel over wire to all points of the globe, and are received in the same manner.

We have heard many remarks passed about the station to the effect that "those guys sure have a racket."

Along with their Comm. job the men handle the daily newspaper exchange throughout the base. All in all, if you were to work at their job for only one day your attitude would change, especially when you are broken-out three or four times during the night to send priority dispatches.

Patients' Corner Adds Life And Sense Of Humor To NEWS

With any Medical Center newspaper such as ours there is always a great deal of interest in the patients' column. The NEWS supplies ever-popular ward gossip through its Patients' Corner.

The Dental Explorer

By Bob Thompson

... The glad hand to LT Robert S. Leopold, MSC, USN, who arrived for duty in the new Dental Biochemistry lab, and also to the "Coach," CDR F. E. Frates, Jr., who returned from Hawaii after refereeing the All-Navy basketball finals there.

Au revoir to Drs. Nutting and Conant who are in Los Angeles for a dental meeting. And a fond farewell to John Butler as he makes his way to Jawjuh (Georgia to you Yankees), after three years in the Navy.

PLASTER JOCKEY NEWS... Prosthetic class 2-49 under the tutelage of J. J. Smith, DTC, has progressed so far that now they have time to pull liberty in such exclusive places as the Kit Mar and Brinkly's.

Paced by "Lover Boy" Raver, with stocky, good looking Syverson running second, and "Lonesome Pal" Nutter on the rail, all are pulling their charms on the local belles. Good liberty while it lasts.

TOAST... Here's to the New York bartender and his five-cent beer. May he live to start the two-for-a-nickle kind.

Gotta go now, but I'll be back again on the 22nd.

Such a column plays an important factor in any paper, providing humor and news in a lighter vein. Here's more of that sort of read matter for you.

There's a good deal for you you are going to have a birth while in the hospital. I know, cause I had one of the most enjoyable ever, right here at Bethesda last summer.

One hot, sultry afternoon, three days after extensive surgery had been performed on my foot, sweet little Red Cross lady stopped the cart she was pushing, right in front of my bunk.

I raised up as best I could to see a huge cake, candles, etc., in front of me. I did not realize what the deal was. Bunk mates from over the ward gathered around, a recording machine was set up.

A mike was passed around a hurriedly appointed master ceremonies and the entire expressed their congratulations through the mike. Then the record was turned over and all lustily sang "Happy Birthday." The cake cut and served along with some good refreshing cokes.

Then the record we had made played over and over again. I have the record and every once in a while we get it out just to show our friends that you can have a happy birthday even though you're hospitalized.

NAVY AWARDED

(Continued from page one)

film by Metro-Goldwyn-Mayer for theatrical release.

At the time of the picture's release in late 1948, SecNav cited the picture as "evidence" of the skill of the producer, writers and film editor in presenting one activity of the peacetime Navy to the public in a dramatic, informative documentary.

"The Secret Land" stars "men and ships of the U. S. Navy." James Forrestal, then SecNav, as well as Admiral Chester W. Nimitz, USN, Chief of Naval Operations at the time, have the only speaking parts in introductory scenes. There are no professional actors in the picture, but it is professionally narrated by actors Robert Montgomery and Robert Taylor, both Naval Reserve Officers, and film star Van Heflin.

Performing routine abdominal surgery

SURGERY

By William Butt with photographs by A. Canedo.

Surgery practiced today at the Medical Center represents the optimum in medical science and professional skill.

A far cry from earlier days when it was not unusual for patients to die of pain or to bleed to death during an operation. The surgeon's operating room was often in dripping shambles, echoing with shrieks of the dying.

Much of the horror of surgery has passed away. Modern anaesthesia, like magic, transports the patients through the dreadful drama of the operation without knowledge and without pain.

The surgeon of today in comparison to that of a century ago "is clothed in purity, as the lady in Comus was arrayed in chastity"; and he unhesitatingly opens the abdomen or the skull to operate upon any organ that may demand it.

With seeming miracles a daily occurrence all about us, we feel sure there are those in surgery, and other departments of our great institution who have turned their backs on unlimited opportunities in civilian life for the call of service to their country.

Naval Med. Center Nine Preps For PRNC Opener

Chief C. H. "Bucky" Harris is sending his Naval Medical Center baseball prospects through lengthy afternoon drills all week long these days, for the Potomac River Naval Command diamond opener isn't far off now.

Jay Bell, outstanding pitcher-outfielder on last year's squad, is once again expected to be the bellwether of Harris' mound corps, while Lefty Cox also has been looking exceedingly good among the hurlers reporting for practice regularly.

Bruce Tillman is his old self at second base, and George Funk appears the class of the NNMCC catchers.

Tall and husky, the ambitious Funk hits a long ball, has a good arm, and has been exhibiting plenty of hustle. He is doped to be the No. 1 backstop this summer.

Pounding the pellet to all corners of the field in recent batting sessions has been a daily habit with several of the potential regulars, both infielders and outfielders alike, Harris states.

Competition for almost every position remains stiff, with healthy interest being demonstrated by the squad lately, as the season inaugural draws near.

It is hoped by the club that its good chances for the 1949 PRNC championship will not be wiped out by the dreaded port-and-starboard duty, enigma of the Hospital Corps, and that players can get relieved to play on the days loop tilts are scheduled.

More information on standout prospects, as well as actual dates of coming contests, will appear in the NEWS' April 22 edition.

MORT WILLCUTTS, JR. WINS TWO-MILE RUN

American University's track team opened its season with a 79½ to 46½ victory over Gallaudet College last week at Wilson High School.

A. U.'s Mort Willcuts took the two mile run from the favored Schaffer of Gallaudet. Time: 11 minutes, 20.4 seconds.

Morton D. Willcuts Jr. is the son of Admiral Morton D. Willcuts, MC, USN, Medical Officer in Command of the Medical Center.

New Navy Nightingales

On March 18 eleven Ensigns in the Navy Nurse Corps reported here for active duty. Pictured above, they are, first row, left to right: Helen M. DeWitt of Buffalo, N.Y., Carolyn J. Shearer of Greenville, Pa., Geraldine L. Newstrom of New Eagle, Pa., and Mary P. Kaminski, officer-in-charge of Indoctinees. Second Row, left to right, Anna G. Hart of Petersburg, W. Va., Edna L. Archbald of Baltimore, Md., Nancy J. Crosby, of Baltimore, Md., and Betty L. McDonald of Brilliant, Ohio. Third Row, left to right; Wanda C. Bowman, of Follansbee, W. Va., Regina M. Alko of Pittsburgh, Pa., Ina A. Gibson of Sharpsville, Pa., and Mary Cerrato, of Apollo, Pa.

Sportin' Aroun'

By Clyde Schubert

Spring has come, the grass has riz; I wonder where my ball play is.

And with that shifty little poem we're off like a scalded dog, hammering away at another kolyum.

That reminds me. It's not strange at all that so many fellows around the station seem a bit odd lately. After all, look at the balmy weather we've been having.

It hardly seems possible that the major league baseball teams already are en route north, and that very soon now (April 19) the big league campaigns will once again be under way. Already the eager beaver Pacific Coast circuit is well along on its first month.

Is my face red! Those ambitious Minneapolis Lakers not only pulverized the Chicago Stags in the current BAA playoffs but went ahead to riddle the tough Rochester Royals as well.

All we loyal Wash. Cap fans hope and pray that our heroes can make Mikan and Co. in the best four-seven set for the playoff title. I will to win means anything "Old Bones" McKinney and his mates will turn the trick. See you at tonight's game!

Blastin' Bill Butt and several other NNMCC golfers are anxious to get a team organized here. Join them in looking forward to many, many swell weekends on the links this year. Hand me my brassie, caddy.

Still am trying to figure out where a person is going to play softball around here. It develops that the field of the diamond across from Annex Two is right on the edge of one of the golf course greens.

Maybe the hardball field over by the Rec. Bldg. doesn't run into the adjacent softball grounds, but one wonders.

Oh well, if your team is getting whipped in softball some afternoon you outfielders can always enjoy the baseball drill going on right behind you.

Word direct from the horse's mouth has it that our Naval Medical Center baseballers will put in a strong bid for the Potomac River Naval Command flag. Don't laugh, skeptics. The boys definitely are shaping up well in practice.

The station duckpin loop has been a real success, with the Battle Wagons leading the pack home. Much interest was shown in the bowling league—a good sign and maybe an omen of better things to come. Could be!

Jay Bell claims he can throw a baseball as far as the eye can see—provided, of course, that all witnesses to the feat have perfect 20/500 vision.

PREDICTIONS: That night baseball will never replace Sex in the American way of life (according to my recent poll); that Be-Bop is here to stay; that the swell weather ahead will bring out the Bohemian element in all of us, and that its time to mount my sturdy camel and ride off into the gathering dusk—Off Humpty, to the Red Fox oasis—Gung Ho!

Both teams were cold from last night but managed many tip-in goals apiece in the bitterly-waged melee under the bankboards.

Whitey Lindeman, lanky guard, potted 17 tallies for NOL, while Felters netted 13. For NNMCC George Funk bagged 10, Paul Harmer 9 and Bud Lind 8.

Future Hunter

"SKIP"

by A. Canedo

Battle Wagons Lengthen Lead Over Pin Foes

The league-leading Battle Wagons recently stretched their lead in the Medical Center duckpin bowling loop to six full games, and now have won 56 while losing 22.

Next in line are Tin Cans, with 50 games won of 78 rolled. Behind the runnerups, closely packed, come the Tankers, Transports, Net Tenders and Tugs, with the Subs and Cruisers far back bringing up the rear.

Still tops among the men pin-pounders are Kirby, Shiber, Robey and Harrington, while LeBlanc, Koiner, Dean, Lawrenson and Lee are the best five women lumber-larrupers.

Golf, Tennis Teams Planned

Plans are being made for the Medical Center to have varsity golf and tennis teams this spring, it was announced by the Recreation Department early this week.

At present a tennis tournament, open to both enlisted and officer personnel, is being arranged, while already many NNMCC linksmen have started touring the various public courses in the D.C. area, in anticipation of the coming season.

All men on the station interested in playing on the Naval Medical golf or tennis squads this year are asked to leave their names and station phone extensions where they can be reached, at the Rec.-Welfare Office in the Recreation Bldg.

Tower Topics

By George Royster

Hello again: Have you noticed the new change in the hospital and the station itself? Every place we look seems to be a beehive of activity.

The new baseball field is rapidly rounding into shape and the golf course is nearly completed. On top of all this, the new Ship Service is going to be quite the thing with all new fixtures. No spring fever around here!

Over a hundred men reported aboard last week from HCS, Great Lakes, Ill. Due to space limitations we won't be able to print their names, but I would like to say "Welcome Aboard" on behalf of the NEWS.

Looks as though the Pyramid Clubs fell through with a loud THUD. I might add—"I told you so."

Seen Around the Compound

Jay (seven million women can't be wrong) Bell giving the new HA's the scoop on Washington women. Clyde Schubert and his newly found "social life." Frank Hilman and his luck with "figures." Don Sheldrick a born (?) comedian!!

We would like to say so long to Paul and Doris Harmer. They are leaving this week for Mare Island, California where Harmer will be staff (N.P. Clerical) at the hospital there.

STORK CLUB: William Morre, HMI, recently became the "Papa of the week". His wife, Delores, gave birth to a boy the 26th of March. Congratulations, Bill!

Chief C. B. Lovelace is now a patient on Ward 104. He claims he just got tired of the same old mattress over in Main Quarters.

Spins and Needles: Foggy Mel Torme has come up with a couple of mighty fine tunes. His "Careless Hands" and "Blue Moon" are as good as the "Velvet Fog" has released. The team of Jo Stafford and Gordon Mac Rae has scored once again with the sharp "A, You're Adorable" and the dreamy "Need You."

That winds it up once again, so see you next issue.

Grain Belt Five Subdues NNMCC

The NNMCC All-Stars closed the station cage campaign here March 31, bowing to a strong Grain Belt five from Washington, D.C., 56-50, in a hard-fought encounter.

Neither club could find the hoop in the opening period, but in the next stanza the All-Stars increased their 11-9 first-quarter edge to 27-22 by halftime.

Throwing a fiery fast break at the home quintet after intermission, Grain Belt came battling back to move ahead 36-29, and the surprised All-Stars never grabbed the lead again.

Working feverishly to catch up, the NNMCC courtmen closed the gap to 39-37 at the third canto's end.

However, they didn't quite have enough in the final session as Grain Belt stalled from time to time in the late stages to protect its lead.

Outstanding for the All-Stars was Bud Lind, aggressive forward, who hammered home 22 points, while Jay Bell, Pete Stanley and Paul Harmer turned in sparkling floor games.

Rangy Whitey Lindeman, Grain Belt player-coach, paced his squad with a 19-point output, Cleveland potted 15 and Cragin, speedy forward, notched 14.

Naval Ord. Lab Tips All-Stars

After winning the first two games they played as a unit, the hastily-organized Medical Center All-Stars fell before the Naval Ordnance Lab gaggers of Washington, D.C., 52-46, at the Center gymnasium recently.

Having previously whipped the Naval Hospital and Grain Belt clubs, the host five made a valiant try for its third straight, but the scrappy NOL shotmakers had too much height and rebound strength in the long run.

The All-Stars were two points in front at the quarter, but lagged 28-23 at halftime, and never could go ahead in the last two periods. The score stood 39-36 at the third canto's close.

From Far Away Places

Left to right are, Miss Davis, Red Cross Field Director here; Abdon, of the Philippine Islands; Antonio A. Maceda, also from the Philippines; Mrs. Helen Klovstad of Norway; Nenei Vasunta of Finland; Norway's Arnfim Brekke; K. A. Ruokonen from Finland; Mrs. Louise Hienbaugh of the Montgomery (Md.) County Red Cross; Johan Ronnevig of Norway; and Miss Walker, NNMCC Red Cross worker.

Commander Lyon Retiring After 40 Years Service

Commander Glenn F. Lyon, MSC, USN, will be placed on the retired list on May 1, 1949, after more than forty years active naval service. He will receive the distinction of being appointed Officer in Charge of the Naval Medical Corps Administration here, the first time that a Medical Corps Officer was given command of an independent naval activity.

This title was changed to Medical Corps Officer in Command, effective March 1, 1949.

DR Lyon was born in Johnson County, Kansas, in 1887 and was educated in the Public Schools of Oklahoma. He attended Oklahoma A. & M. College for one year after which he transferred to the University where he graduated in 1908 with a degree of Ph.D. Later, on March 11, 1909, CDR Lyon enlisted in the Navy as a hospital apprentice, first class. In 1910 he was appointed Hospital Steward (CPO). During World War I, he was appointed Pharmacist and in 1919 was promoted to rank of Chief Pharmacist, which he held for twenty years.

With the establishment of commissioned Hospital Corps ranks during World War II, Commander Lyon's promotions culminated in his present rank of Commander, first in the Hospital Corps and later in the Medical Service Corps.

Examinations for advancement to ratings of HM3, HM2 and HM1 will be conducted here on April 30. Good luck, men.

Reserve Officers Study Atomic Medicine Here

Approximately three hundred Naval reserve medical and dental officers and six Royal Canadian reserve naval medical officers will attend the third class for the five day course in Medical Aspects of Special Weapons and Radioactive Isotopes, convening on April 25, at the Naval Medical School here.

Navy Urges Strict Measures To Curb Improper Conduct

(SEA)—Because of continuous and increasing reports of improper conduct by certain naval personnel on trains, buses and other public carriers, the Navy has issued strict orders for vigorous preventive and corrective action in such cases.

A Bureau of Naval Personnel directive cites the increasing frequency of naval personnel who annoy other passengers, create disturbances, deface and damage carrier equipment, are intoxicated, use profanity, or engage in other conduct which brings discredit on the Navy. To curb these incidents, rigid supervision has been directed by BuPers Circ. Ltr. 34-49 (NDB, 28 Feb. 1949).

(Continued on page two)

Staff Frolic Next Friday Will Feature Williams' Orch.

Coming up next Friday, April 29, is the first staff dance of the spring.

Howard Williams and his well-known orchestra will provide the music and as usual soft drinks and other light refreshments are to be available free of charge.

This month's staff hop is to be another one of those popular "drag or stag" affairs and a great many young women from Arlington Farms will be here to help make the evening a success for those bluejackets who come alone.

Dance contests to determine the best waltzers as well as jitterbugs are planned, and the presence of Williams' highly-regarded band should assure everyone who attends a good time.

The time: 2030 to 2330. The place: the Center gymnasium. Uniform of the evening: Dress Blue Baker—no exceptions.

OUR LEADER

John L. Sullivan
Secretary of the Navy

From Bluejacket To Top Naval Rank

(SEA)—Secretary of the Navy John Lawrence Sullivan of Manchester, N. H. . . . born 16 June 1899 . . .

Sworn in as SecNav 18 Sept. 1947 succeeding James Forrestal.

Previously had served as Ass't SecNav for Air from 1 July 1945 to 17 June 1946, taking oath under war-alert conditions while at sea on board carrier USS Shangri-La (CV 38) off Japanese mainland . . .

Became Under SecNav 17 June 1946 . . . lawyer by profession and bluejacket veteran of World War I.

He graduated from Dartmouth College in 1921, Harvard Law School in 1924 . . . an important figure in New England Democratic circles . . . in 1939 became assistant to U. S. Commissioner of Internal Revenue . . . was Ass't Secretary of Treasury 1940-1944 . . . is married, has three children.

Navy's Industrial Health Staff Holds First Nationwide Conference

The Navy's Industrial Health personnel representing the major Naval industrial activities in the United States, the Territory of Hawaii and the Canal Zone, recently held their first annual nationwide conference in conjunction with the 34th annual meeting of the American Association of Industrial Physicians and Surgeons in Detroit, Mich.

Foreign Delegates Visit Med. Center

Recently welcomed to the Naval Medical Center and to the Naval Hospital here were eight teachers from four foreign lands, all of whom have come to the United States as study visitors under the auspices of the American Red Cross' International Activities Division.

These teachers are studying the Junior Red Cross organization in this country to observe some of the methods, principles and accomplishments of such a nationwide youth program in this democracy.

New Diagnostic Nomenclature Goes Into Use In Navy June 1

A diagnosis nomenclature of Diseases and Injuries, with a list of Surgical operations, has been published for use jointly by the medical services of the Army, Navy and Air Force.

The new system of listings becomes effective in the Navy on June 1, 1949, for the recording and reporting of diagnoses and surgical operations on Medical Department records and reports.

All diagnoses established and all surgical operations performed after 31 May shall be recorded in terms provided by the joint system.

Those patients on the sick list on June 1 who were admitted prior to that date may be carried under the old diagnostic titles until the termination of their current diagnosis, but any new diagnosis established on such patients shall be in terms of the new nomenclature.

NavMed—Fa then will reflect the old nomenclature for diagnoses established on and after June 1. Patients re-admitted after 1 June with disabilities for which they have previously been taken up under old titles shall be taken up as RA under the appropriate new titles.

The monthly Morbidity Report (NavMed-582) has been revised to conform to the classification and nomenclature changes and an initial distribution of the revised form will be made available for reports following 30 June, covering the month of June.

The accomplishments of the Navy's Industrial Health program during the past two years were reviewed and suggestions for improvement discussed.

Highlighting the program was the presentation and discussion of a paper by Capt. C. F. Behrens, MC, USN, concerning the hazards of radiant energy as may be encountered in industrial establishments.

Among the other problems discussed at the two enthusiastic sessions were improvement of industrial health, and the standardization of organization and administration of industrial health in the typical Naval establishment.

MOTHERS' DAY

In an age where the physical attributes of feminine pulchritude are appraised in terms of a low, double syllabled whistle it is a comforting reflection to realize that on one day of the year we can take the picture of "Whistler's Mother" out of mothballs, and that picture will provoke no whistle.

Usually the philosophy of an age can be discerned in the attitude of the citizens of that age towards its women.

Perhaps this concept can best be illustrated with an analogy; By reason of its pontoons, a seaplane has something in common with water. But if it remains in that element long enough it will be battered to pieces by the fury and violence of tempestuous seas.

In the air the seaplane finds its natural element, but there too it is subject to the caprice of foul weather, and its flight is oftentimes rough.

If, however, the seaplane is equipped with supercharges and oxygen apparatus it can leave the atmosphere of normal flight and soar into the stratosphere where its course is even and swift.

Now apply the analogy: In a purely natural society a woman is reduced to the status of an inferior creature; a chattel and slave to the ruthless rule of superior masculine strength.

In a natural society, the position of a woman is elevated somewhat on the basis of a natural ethic that assures her of some protection by reason of natural and social justice.

But it is only in a society that is established on a supernatural foundation; in a society that sinks its roots deep into the twin virtues of Christian Justice and Charity, that woman comes into her own, and achieves her complete emancipation.

The reverent theme of Mothers' Day as expressed in Whistler's painting of his mother, might well evoke sentiments of veneration in regard to all mothers, whether their cherished memory is symbolized in a carnation that is red, or the blessing of their presence is signified in one that is white.

But it should also impress the citizens of the twentieth century with the inherent dignity with which God the Creator invested all women, a dignity that demands respect and implies Chivalry, a dignity that reflects from the Mother of God Herself and so distinguishes civilization from barbarism.

JOHN P. FAY, Chaplain, USN

Happy Holiday

Pictured above are Mr. and Mrs. R. Bruce Tillman and their son, Scott, who was christened on Easter Sunday here at the Naval Medical Center. The ceremony was conducted by Chaplain Frank R. Morton.

Meet Your Executive Officer:

Capt. Bartholomew W. Hogan

Truly a man well worth meeting is Captain Bartholomew William Hogan, MC, USN, Executive Officer of the Naval Hospital, largest command on the station.

The 43-year old native of West Quincy, Mass., can look back proudly on a long and eventful career in the Navy Medical Corps that started in 1925-26 when he took his internship at the U.S. Naval Hospital, Boston, Mass.

Holder of an Honorary LLD Degree from Mount St. Mary's College in Emmitsburg, Md., awarded him in 1945, Captain Hogan graduated from the Tufts College Medical School in 1925, receiving the Phi Lambda Kappa Medal for highest achievement.

His post-graduate training has included work at St. Elizabeth's Hospital in Washington, D.C. and courses in atomic, chemical and other medical welfare problems.

A psychiatrist, Capt. Hogan's professional experience in his specialty has included positions as Chief and Assistant Chief of Neuropsychiatry at the Naval Hospitals in Philadelphia; Annapolis; Washington, D.C.; Queen Hospital, Honolulu. (Continued on page four)

Tower Topics

By George Royster

Wow! Don't know about you readers but I'm still trying to thaw out after the cold Easter weekend. This Maryland and D.C. weather has really got me "snowed". I've even gone so far as to write a few lines about same, a poem no less!

Spring has sprung;

Fall has fell;

Yep, spring is here,

And it's cold as—heck.

The grapevine has it that the Commissary party last Saturday night was quite THE deal. Guess everyone had a great time. The shindig was given at the Elks Club down in Washington.

Last issue we mentioned that Mel Torme had released a number of fine records recently.

Well, here's your chance to see the "Fog" in person. Next week he will lead an all-star show at one of the downtown theaters. Let me know how you like him.

Question of the Week: Can you ride "Big Sid"? Yes, that circus huckster's back again.

Seen Around the Compound

Jack (Toni Wave) Stanley with-out a comb. John (Lou) Swinko and his big cigar. Iver Kipp, the undisputed marble champ of NNMC. Earl Dennler with those love-sick eyes. Jack (Loverless) Levi asking, "Wha happen?"

Glen Echo opened last week and another big summer season is expected. For those of you who are new here, I'll endeavor to give you some straight scoop on the place.

In the park there's a swimming pool, dance hall, and around fifty rides and other amusements. It's about a 45-minute street car ride from here, and you'll find it worth your while to pull a liberty or two there.

For a final word I'd like to remind all of you to give to the Cancer Fund. Let's all pitch in and help make a good record for the Medical Center in the current drive. 'Bye now!

Gavin, Seroka Selected For Advancement

By Anne Jarzyk

Three of the nurses here recently were advanced in rank from Ensign to Lieutenant Junior Grade. Now sporting spanking new LTJG gold braid are M. R. Cavey, E. S. Gillette and M. C. Brooks.

Our best wishes are extended to LCDR H. C. Gavin who has been chosen by the Selection Board for promotion to Commander. Also, congratulations to N. P. Seroka, recently selected for elevation to Lieut. Comdr.

There were four persons who chose promotion from the rank of Navy nurse to that of housewife. Best of luck to LT Hazel Nyhus, ENS G. Vassilakos, ENS T. Clark and ENS P. Clark. Yes, both Pat and Theresa Clark have left.

As winter goes out, new orders come in. Guess the Bureau thinks the weather is safe for travel.

So, a fond cheerio to Lieutenants E. Hux, M. A. Kloetzhi, A. M. Fortune and E. M. Allem, and also to LTJG J. I. Pohlman.

Miss Hux went to Quantico, Va. for duty, Miss Pohlman to Memphis, Tenn., LT's Kloetzhi and Fortune are bound for Guam, and LT Allem has left for Mare Island, Calif.

Red Cross Has Tickets For Washington Home Games

Spring is really here in all glory and one hears the ever familiar phrases, "It's too nice to be inside", "Wish I could be playing golf," "I'd like to get at my garden etc."

If you are a patient at this time of year, you may get permission from your ward medical officer to attend some of the outdoor activities in this area.

These tickets are made available through the American Red Cross and the recreation workers go to the various wards to obtain the names of patients desiring to go and who can secure the approval of their medical officers.

Transportation to and from the ball park is furnished by the Montgomery County, Prince George's County and D.C. Red Cross Motor Corps. All trips check out from the Red Cross recreation office, Room 102, between Wards 3-B and 5-B.

A little later on there will be golf tournaments, tennis matches, picnics and outdoor concerts. Keep in touch with your Red Cross recreation worker if you are interested in attending some of the scheduled events. They will be glad to put your name on the lists.

The Dental Explorer

By Bob Thompson

The softball gear came out of the mothballs last week as Chief Harmon started to organize a team for NDS. Behind our star pitcher Howard Stephens, the men look like they will present a good front this year. And by the way, the nurse who asked about playing is welcome but she'll have to bring her own team.

In the "Glad to have you aboard" section, greetings were extended to M. H. Beck, DT1, and C. W. Buchanan, DT2, who reported last week for duty. Under TAD orders are Drs. Towle and Losee who are at Edgemore and Yale, respectively. Oops, pardon me. I meant Harvard.

Joining the ranks of the "old timers" last week was Chief Ne of the Main Prosthetic Lab who now is wearing three gold hash marks. Gosh, I almost saluted him the other day.

The line forms to the right for Additional Instruction at the Student Prosthetic Lab. Seems that Birdsall is teaching the "Gluek Makers of Bldg. 122" the art of class discussion while further on down Miller is giving classes on how to pull liberty with fifty cents.

But the honors go to Cedatol. He is larnin' the men to leave their phone numbers in conspicuous places so the girls can pick them up—the phone numbers, that is. They never win, but give them time.

NAVY URGES

(Continued from page one)

The letter re-emphasizes powers and responsibilities of officers, chief petty officers and petty officers while in charge of drafts. It also covers naval personnel in all types of travel status—whether on leave or in drafts.

Breaches of the peace, disorder, or any act bringing discredit to the armed services, will result in strong disciplinary action, the directive states.

EDUCATION

by W. R. BUTT with photographs by A. CANEDO

One of the most thriving departments at the Medical Center is the Educational Services Office, now located in Building 102.

This department, under the direction of Lieut. B. E. Dalier, (W) USN, offers to both patients and staff personnel many opportunities for study and educational development. The Educational Services Office is staffed by R. W. Gardner, HMC, and Ruth Quire, HMI.

For those who plan to make the Navy a career, this means an opportunity to study work related to their Navy rates; for those who plan to return to civilian life, it means education pre-occupational training designed to facilitate their readjustment to civilian life.

Alertness Saves Lives

by W. R. BUTT with photographs by A. CANEDO

To the average individual a hospital is hardly the place to expect any material degree of danger to life from fire. He enters a hospital with no thought of such danger.

Yet a study of the fire record of hospitals and similar institutions, as compiled by the National Board of Fire Underwriters, indicates that fires occur in such institutions at the rate of more than one a day, and the annual loss exceeds one million dollars.

The Naval Medical Center Fire Department is headed by Chief Schweitzer who is a veteran of 29 years experience in fire fighting and fire prevention, both with the D. C. Fire Department and Federal Fire Service.

There are 17 men in this civilian department, all of whom work 72 hours each week. They all have received special fire department training at various schools in addition to the constant brush-up exercises practiced each day in the fire house.

By the apparatus door stands a ticker tape, in readiness to receive an alarm that might be sounded at any point on this reservation. Only an experienced person can realize the prime importance of sounding an alarm when fire is first discovered.

A tribute to the established efficiency of the NNMC Fire Department men is the fact that within three to four minutes after an alarm sounds anywhere on the base, they can be at the sight of the fire, ready for action in extinguishing the blaze.

Shortage of Moundsmen As Naval Medical Nine Begins To Take Shape

Although its Potomac River Naval Command loop inaugural is still a month off, the Naval Medical diamond nine already is taking shape. The Admirals have the makings of a penant-contending ball club, but at present a critical shortage of pitchers exists.

Only Jay Bell, ace NNMC moundsmen, last year, and Lefty Cox, whose portside-propelled curve ball has been fooling batters in practice, appear to have anything on the pellet. Both possess good control.

Since Bell hopes to play left field when he isn't hurling it appears that Coach "Bucky" Harris must scavenge around for a good relief pitcher or two.

Chief Gardner is the No. 1 catcher now on the squad, but young George Funk is challenging the long-hitting Gardner for the receiving job.

St. Clair seems to have third base sewed up, while Kovarik has been looking great at shortstop in early workouts. Bruce Tillman, Pat Partridge and John Swinko are battling it out for second base, and Walters will probably get the call at first.

Cash appears a starter in center field, with George Royster, John Garrison, Partridge and several others all out to snare regular outfield berths.

The Admirals open their PRNC season against Anacostia Naval Air Station here on May 24 and journey to Quantico to play the power-laden Marines two days later.

Andrews Field Falls Before Admirals, 3-2

Outfielder George Royster's timely single in the eighth inning, coupled with steady pitching by Jay Bell and Lefty Cox, gave the NNMC Admirals a 3-2 triumph over Andrews Field here Wednesday, April 20.

With two out in the last of the eighth and Pat Partridge on second base, Royster lined a hit to right field, bringing home what proved to be the deciding run.

Outhit seven to four, Andrews Field took the lead twice, once in the fifth frame and again in the top of the eighth. But Royster's clutch blow whipped the Army nine.

Cox was nicked for only one run and two hits in five stanzas on the hill, while Bell, the winning twirler, was equally as stingy, and fanned five batters in his four-inning stint.

Lone Admiral extra-base blow was a double by Cash, hard-hitting center gardener.

The line score:

	R	H	E
NNMC	000	001	11x-3 7 3
And. Field	000	010	010-2 4 3

Admirals Launch Campaign By Dumping Kensington

Blasting two enemy hurles for a total of 21 hits, the Naval Medical baseball team pried the lid off its 1949 seasons recently by shellacking Kensington, Md., 18-7, there in a seven-inning contest.

CAPT. HOGAN

(Continued from page two)

lulu, T.H., and the Hospital Ship USS RELIEF.

He has also served as Chief of Medicine at the USNH, Annapolis, Md.; Senior Medical Officer on the Hospital Ship USS TRANQUILITY; Executive Officer of the Naval Hospital, Annapolis; Exec. at the USNH, Philadelphia, Penna., and his present post at NNMC, which he has held since 27 June 1947.

Awarded the Silver Star for service aboard the USS WASP in 1942, Dr. Hogan also holds the Navy and Marine Corps Medal, for work on the USS DUNCAN in the same year.

In addition, he is a holder of the Order of the Purple Heart and five Battle Stars, along with the Atlantic, Pacific, and European Area ribbons.

Captain Hogan's wife, Grace Gloninger, holds a B.A. from Mount St. Joseph's College, Emmitsburg, Md.; an M.A. from Johns Hopkins, and a PhD in Child Psychology from Columbia University.

They have two sons, Bart, age 14, and Thomas, age 10, and one daughter, Mary Ledlie, age three.

The elder son is a scholastic leader at Georgetown Prep, where he is in the Fourth Form, while Tom is a baseball and football star at St. Angela Hall.

Dr. Hogan describes his daughter as a "delightful and loveable little blond."

Among the popular Exec.'s hobbies are fishing, gardening, teaching and golf. He describes his links game as "none too good" but will admit his drives and long iron shots "aren't bad."

Jay Bell, Cash, Gardner and Kovarik led the Admirals' batting barrage with three safeties apiece, while Tillman banged out a pair of triples and Partridge bagged two bingles.

The Kensington batsmen were stopped cold by Bell, a big right-hander, and Lefty Cox, but a third NNMC chucker, Marceau, was punished by the losers. He was pounded for seven runs and eight hits in two and a third stanzas.

Cox, who started and was the winning pitcher, struck out three while granting no runs and just three hits. Bell whiffed five men and yielded only one score and three bingles.

Chief Gardner, husky catcher, smacked two doubles and a triple for the winners, while Cash, center-fielder, collected two two-baggers.

The summaries:

	R	H	E
Naval Medical	18	21	5
Kensington	7	14	4

All during his time as Exec. here Dr. Hogan has taken a keen interest in the welfare of the hospital corpsmen, and has attempted to mete out justice "firmly, but always fairly and impartially."

He believes that an Executive Officer's concentration on the training and problems of the corpsmen and junior officers under his command is one of the most important parts of his job.

Captain Hogan is a member of the following professional societies: Fellow of the American Medical Association; Fellow, American Psychiatric Association; Fellow, American College of Physicians; Diplomate, American Board of Psychiatry and Neurology; St. Elizabeth's Medical Society, and Director, Washington School of Psychiatry.

Personalities At NNMC

Charles K. DeWitt Ass't Foreman Mechanic

A real self-made man is Charles K. DeWitt, Assistant Foreman Mechanic at NNMC and one of the best liked civilians on the compound.

Of French, English and Irish descent, the ruddy-complexioned DeWitt is in charge of the electrical shop, refrigeration, air conditioning, pipe-fitting and all plumbing here.

The good natured, 51-year old foreman has held this particular job at the Medical Center since 1942. Since he has been here there has never been a single accident in the electrical maintenance section of the station, a genuine tribute to "Charley's" efficiency.

DeWitt, who hails from Ravena, N.Y., has been a Civil Service employee for approximately ten years.

The mechanical wizard's family includes his wife, Laura F., and two sons, Kenneth and Edward. The DeWitts are the lone civilian family living on the base, their address here being Qtrs. C-2, NNMC.

Gen. Wainwright Commands DAV

At Christmas dinner in Cincinnati in 1919, one hundred wounded veterans of World War I gathered to discuss urgent problems.

From this meeting grew the determination to form an effective organization to help the wounded, injured and disabled servicemen. Thus was born the Disabled American Veterans.

The DAV is now a major veterans' organization with more than 1,700 chapters throughout the nation. It is a cooperative patriotic group that is non-competitive, non-partisan and non-sectarian.

General Jonathan M. Wainwright, hero of Bataan, is the National Commander of the Disabled Veterans of America.

The DAV has its national headquarters in Cincinnati, Ohio now, and the national service headquarters is located at 1701 18th Street N.W., Washington, 9, D.C.

A national employment department is maintained at the latter headquarters, and works closely with both Civil Service Commission and employers throughout the country.

Also, a national insurance director and staff is maintained in the Washington office to assist disabled

Sportin' Aroun'

By Clyde Schubert

With all the basketballs and waling togs now securely stowed until another winter rolls around, baseball, track, tennis and golf bounded onto the sports scene this area and once again the outdoors beckons to the sportsman in bewitching fashion.

There's nothing quite so relaxing as a tranquil stroll through woods or if one would rather, a fast set of tennis or a fiery "per game."

Life seems intrinsically just a little more worth living when spring comes around each year who enjoys being out in the open any more than a sports lover.

Which brings me to something more concrete. This writer recently left himself wide open with a remark in print that Detroit might well cop the American League pennant. The Bengals just don't like it!

Be that as it may, here are predictions on how the big league standings will look at the end of season.

I pick the up-and-coming Pittsburgh Pirates in the National League with the rest of the finishing in this order: Brooklyn, New York, St. Louis, Philadelphia, Chicago and Cincinnati.

Over in the American League Boston Red Sox appear a better bet than Lou Boudreau's Yankees from Cleveland to my way of thinking, with Connie Mack's Athletics destined for no worse third.

The Yankees, although deteriorating like an empty house, should stagger in fourth, followed by Detroit, Washington, St. Louis and hapless Chicago White Sox, in order.

Almost all the minor circuits will be under way before very long so the baseball-thirsty sportsman can have his diamond cocktails exactly as he wants them.

LOCAL ITEM: Appears as they're going to tear down backstop of the softball field behind Annex Two any day. However, plans are being made to have a diamond somewhere on wide expanse of recently-leveled ground across from the Recreation Bldg.

Already the Stewards Mates in Annex Two have battled Der School in a three-game series, with the Negro club emerging on top.

The cage campaign ended with this perplexed prognosticatoring out of action but good with BAA playoff predictions.

I picked the Caps to trim the neapopolis in six tussles. After the locals had managed to halt the Lakers twice in a row, my reaction to that final 77-56 battering by Midwest five was about as close related to pleasure as a rhinoceros is to a rhubarb stalk. Shed a last tear for the Caps.

As a parting shot, William Glen Bryan I believe it was who wrote (in his Thanatopsis), him who in the love of nature communion with her visible form—but speaking of "farms" I remembered an important appointment. Gotta' run—see you next month.

veterans in their insurance problems.

For further information on DAV contact George L. Shankle, the VA contact office here Wednesday.

Shankle, a DAV representative will be here every Wednesday and is anxious to have all veteran servicemen here who are interested in the DAV get in touch with him.

NATIONAL NAVAL MEDICAL CENTER, BETHESDA, MD.

13 MAY 1949

Iowa Vets To Receive Bonus Soon

The State of Iowa will soon start paying service compensation to eligible veterans of World War II.

Application forms on which the veterans may file claims for service compensation will be ready about May 1. Bulk distributions of blank forms will be made to all county courthouses within the state.

Those veterans who now reside outside the state of Iowa may obtain necessary forms on which to file claims by writing to: Executive Secretary, World War II Service Compensation Board, 124 Des Moines Street, Des Moines 16, Iowa.

Persons on active duty in the armed services may obtain blank forms through their local headquarters if the Commanding Officers of Posts, Camps, Stations, or Ships will make request to the address shown above for the number of forms required for their eligible personnel.

Applications for the Iowa service compensation must be filed later than December 31, 1950.

Savings Bond Drive Will Be Conducted During May, June

(SEA)—All Navy and Marine personnel not now regularly participating in one of the Navy savings bond purchase plans will be encouraged to enroll during a seven-week campaign in May and June.

Intensive savings bond campaign will be conducted by each shore station sometime during the seven-week period beginning 16 May and 30 June, the date established by the President. Military personnel — officer enlisted — who do not have savings bond allotments will be urged through personal interviews to participate.

Reaffirming his belief that "physical fitness is a necessary adjunct to the mental, moral and spiritual fitness of all personnel," the Secretary of the Navy announced the Navy-wide campaign on May 42 (NDB, 30 Apr 1949).

Future Doctors of America

The Medical Center recently played host to the above pictured group of first year medical students from Howard University, Washington, D. C.

Medical School Library Honors Admiral Stitt

The Medical Library at the Naval Medical School here was designated on April 22, by the Surgeon General, Rear Admiral C. A. Swanson, MC, USN, as the Edward Rhodes Stitt Library.

This honors the late Rear Admiral Edward Rhodes Stitt, MC, USN, who was the Surgeon General of the Navy from 1920-1928.

His widow, Mrs. E. R. Stitt, presented a collection of the late Admiral Stitt's civilian scientific medals, fraternal and honorary keys to the Library where they will be placed on permanent display.

Appropriate ceremonies dedicating the library will be held in the near future.

Noted Dentist Lectures Here

Herbert D. Coy, D.D.S., Director of the Dental Clinic and Professor of Operative Dentistry, Medical College of Virginia School of Dentistry, Richmond, Virginia, will be the guest lecturer at the Naval Dental School, today.

The topic of his lecture will be "The Effect of Investing Technique upon the Accuracy in Casting Satisfactory Inlays".

All service dental officers (both active and inactive) and others who are interested in this subject are cordially invited to attend.

Pioneer Flight Surgeon Ends Colorful Navy Career

Rear Admiral John C. Adams, MC, USN, a pioneer Naval Flight Surgeon, was transferred to the retired list recently, after more than thirty years active naval service.

A veteran of two wars, Admiral Adams was first appointed in the Medical Corps of the Navy in 1917 and served on many ships and stations throughout the world.

In 1937, he became Chief of the Division of Aviation Medicine, Bureau of Medicine and Surgery, Navy Dept., Washington, D. C.

During his administration the original organization, consisting of a few flight surgeons, was expanded until it became numerically larger than the entire Bureau establishment prior to the national emergency.

In addition, he crusaded for research, helping to establish a Division of Medical Research in the Bureau of Medicine and Surgery, and assisting in the original planning and development of the Naval Medical Center.

For outstanding services as Flight Surgeon in charge of the Division of Aviation Medicine Bureau of Medicine and Surgery, prior to and

LCDR. Duwel Relieves Comdr. Lyon, Assumes New Command At NSHA

On the afternoon of May 5, 1949 LCDR Bernard F. Duwel, MSC, USN became the second Medical Service Officer in Command of the Naval School of Hospital Administration here. Since the school became an independent naval activity LCDR Duwel has been its Executive Officer.

Bronze Star Medal Awarded Chief Pharm.

Chief Pharmacist James Augustin Pfeiffer recently was awarded the Bronze Star Medal by Rear Admiral Morton D. Willcutts in the staff conference room of the Medical Center. Mrs. Pfeiffer and a group of former shipmates witnessed the ceremony.

Mr. Pfeiffer, with 29 years of service, was retired physically following an extended period of hospitalization and rehabilitation which he required after release from a Japanese prison camp.

A native of Buffalo, N.Y., Pfeiffer enlisted for the first time in May 1918 and is a veteran of both

(Continued on page four)

In his brief acceptance speech LCDR Duwel commented that little did he realize when entering the naval service over a score of years ago that someday he would assume a command post.

Especially optimistic about the future of the Medical Service Corps, LCDR Duwel feels the enlisted hospital corpsmen of today are in a more favorable position that they were twenty years ago.

Dental Officers Finish Atomic Med. Course

Old friends renewed acquaintances and many new ones were made during the training course for Reserve Dental officers which ended last Saturday morning at the Naval Dental School. Eighty-seven officers attended the course, coming from all parts of the United States.

This course, suggested only last year by Capt. Larry Dupuy, DCR, USNR, of the Eighth Naval District, was the first of its kind and was convened for present and prospective commanding officers of Naval Dental Reserve Units.

Included in the training were a course on the Medical Aspects of Special Weapons and Radioactive Isotopes, made possible through the cooperation of Captain M. J. Aston, MC, USN, MOIC of the Naval Medical School, and a course in Naval Dental Administration.

First Waves Serve Aboard Navy Ships

(SEA)—Naval tradition has been changed by two officers who became the first Waves to serve as members of ship's company aboard Navy ships.

The women officers did not stand deck watches or perform similar military duties during their two-week Reserve training cruises to Pearl Harbor. Their duties consisted entirely of administrative work, doing paper work connected with transporting naval dependents aboard the ships.

First to ship on board was Lieutenant (junior grade) Clarice L. Pierson, USNR, of Oakland, Calif. She served on board the transport USS General H. W. Butler (AP-113). A few days later Lieutenant May N. Karns, USNR, of San Francisco, Calif., shipped out in a simi-

Tower Topics

By George Royster

I know that this is just a little bit off my beat but I can't help saying a few words about those Washington Senators. They are the talk of the town!!

They recently won nine straight games (up to the time this was written) and there seems to be no end in sight. The team has really shown fine spirit inasmuch as it got off to such a bad start this season.

It seems to me that every time I look around someone has gotten a new car. Some of these people aren't satisfied with one car, they have two!! What does a peon do?

Seen around the Compound: Chief Renard giving out with those Arthur Murray steps at the last staff dance. George (Big George) Funk telling all about Pittsburgh women . . . Paul Murray acquiring the name of "Smiley" . . . A new HA dashing all over the hospital looking for a pitcher of diabetic ice water . . .

And don't forget our NNM golf course will be open for play soon. That's all for now; see you again on May 27.

— DAN THE PAINTER —

Television Set Given Patients On Ward 106

A television set recently was presented to patients on Ward 106.

Representing the Naval Hospital during the presentation ceremonies was Captain L. O. Stone, Commanding Officer.

The gift was given the patients by the Jerry Antel Memorial Fund. Mr. Bernard H. Conn presented the set after a short address.

Contributions are made to the fund for the purpose of memorializing one who has departed.

The proceeds of such contributions are used exclusively for the aid and comfort of disabled veterans.

WAVES SERVE

lar capacity on board the transport USS General W. A. Mann (AP 112).

It was the first time in naval history that women were regularly assigned to duty on a Navy vessel other than hospital ships. By law, women are prohibited from serving in a duty status on combatant vessels.

Bringing Laughter To Patients

Captain L. O. Stone, MOIC, NH, is shown above receiving from Mr. Bernard H. Conn a Television Set on behalf of the patients of Ward 106.

ARC Clarifies Info. On Emergency Leaves

Many servicemen misunderstand the Red Cross' part in arranging emergency leaves. The Red Cross cannot grant leave to servicemen; only military commanders have this authority.

However, the Red Cross does play a definite part in such matters. It obtains the information needed by the commander so that he can determine whether the request is justified.

As in the case of requests for emergency loans, the regulations concerning emergency leaves are designed to help everyone concerned. No commander is likely to refuse leave when he has been assured by the Red Cross that a definite emergency exists.

The Red Cross, with the permission of the serviceman, gives the commander the facts; it does not suggest whether or not the leave ought to be granted.

Incidentally, one very strict rule applies to all Red Cross reports about individual servicemen and their families: the information remains confidential.

Only the Red Cross and the commanding officer have access to

these reports. No serviceman or woman who has asked the Red Cross for help needs to fear that his private problems will become known to unauthorized persons.

Both Red Cross and military personnel are bound by regulations to exercise great care in this respect.

The Dental Explorer

By Bob Thompson

Wednesday of last week, eight officers and three men of NDS attended the Maryland State Dental Meeting in Baltimore. Yours truly happened to be one of them so here is a first hand report.

The meeting was held in the Sheraton-Belvedere no less and table clinics featured the afternoon. CDR Oesterling, Turner, Lesney, Frechette, Wohlfarth, Colby, King, and LT Conant presented clinics for NDS.

At noon, lunch in the form of delicious steaks was in order at the House of Welsh under the viaduct. Honestly, those would have made Duncan Hine's mouth water. And only a buck for a sirloin. You'll have to go far to beat it.

Reporting aboard to paint eyes after Hartzfeld is discharged was Ernest B. Beile, DT1, who came from Philly last week. Greetings, chum.

While attending another convention Coach CDR F. E. Frates, Jr. coined a new phrase.

He thinks we should be called Burr Jockeys and says that we might quote him. A burr, all you good people, is the drill that plays so much h— in your mouth. Thanks, Coach.

"Seventeen pounds off in ten days" says Chief Whiting after completing a Miracle Diet. But where did it come off, Chief? Was it in the middle?

On this hot, sultry afternoon I wish I were Dr. Pfeiffer who is now probably floating around in the Gulf on the west coast of Florida. Would be some life, huh?

But since I'm not there and this heat is too much for me, I'll go try to find a fan now. See ya.

Crews' Library:

New Approach To Paring The Course

By Mildred Bean

Light reading for spring wear may be found at the Crew's Library and here are a few new titles specially chosen for your enjoyment.

THE DOCTOR WEARS THREE

FACES—Bard

A doctor's wife with an incurable sense of humor "operates" on a medical profession; the result is very satisfying entertainment.

TILL FISH DO US PART—Co

The confessions of a fisherman's wife and her marriage to a man who promised to love, honor and obey—that Izaak Walton impulses AND ONE TO GROW ON—Gou

The story of what it meant to be a boy in Maine a few decades ago, told in John Gould's special Down East manner. It's salty, hilarious and mellow.

GOLF — A NEW APPROACH

Mangrum

Learn better golf from the game's top money winner. His "visual approach" will show you how you can improve your stance, backswing and follow through.

Patients' Corner

The recent play, "Love and the Poor Man", was enjoyed by the patients, and especially by Robert Vavrek, who seemed to be the biggest laugh.

Well, it looks like Joe Longti will be getting his discharge in the next few days. Joe has been carried on C of G for about nine months and Uncle Sam says it's time for him to get out. He's still being carried as VAP in the hospital.

Ward 5-C has a patient, a very talented accordion player, by the name of JULIUS PENNA, who has his shoulder operated on and we are looking forward to having him play for us when the shoulder is in condition.

By J. R. Martin

Ward 5-C

After riding a Navy Transport for 21½ years as a member of the crew and then a few years later traveling aboard the same ship as an enlisted passenger, one forms a different opinion of the ship.

The same applies here in the hospital. Having been a member of the staff for some time and then changing to a patient status, one also sees things in a different light.

The very efficient treatment received has been most gratifying. Then, too, there is that certain good feeling to a "staff patient" when he hears all the complimentary remarks about the medical officers, nurses, corpsmen, and treatment in general.

If one really wants the scoop on the hospital, here at the Medical Center, you can get it through a patient's eyes.

A Staff Patient

Ward 103

FLIGHT SURGEON

(Continued from page one)

during World War II, he was awarded the Legion of Merit.

In addition to the Legion of Merit, Rear Admiral Adams has the rank of Honorary Commander of the Military Division of the Most Excellent Order of the British Empire.

He received the "John Jeffries Award," presented by the Institute of Aeronautical Sciences for outstanding contributions to aviation in Medical Research, for 1945.

Mention any Admiral or Captain in the Medical Corps and Dan will take another puff on his cigarette and then say "I knew him when he was a JAY GEE." Old Ironsides, the Mighty "Mo", and Dan the Painter—all are Navy institutions.

“THE PRESS”

Photographic Scenes Behind the Center News

To the average man on the base the Center News comes out on the second and fourth Fridays of the month. They read it, criticize it, and some even praise it. Many just read the headlines hoping it will tell the whole story, while others look at the pictures. Some may ask “who puts this paper out? How does it operate, and who does the editing, layout and writing?” A. Canedo, staff photographer, illustrates in pictorial form the process behind the whole operation.

There is a great deal involved in putting together the News, but we will not bore you with technicalities. However, after all the news stories and pictures are gathered there is the job of laying out the material to conform with accepted standards.

When this is completed the copy is sent to the printers where galley proofs are made. The pictures are sent to the engravers in Washington. Later both are returned to the News staff, who get together and proofread the copy, make the necessary corrections and do the page makeup. The issue is then sent to press.

Journalism is a far cry from caring for the sick, yet all members of the paper are hospital corpsmen. Managing Editor W. R. Butt (right) has a full time job in running the Center News. The rest of the staff have regular details, but manage to find time to help put the paper out. They don't accept the job as a burden, but rather as an after-hours diversion from their regular duties.

Assistant editor Clyde Schubert (above) handles all the sports copy for the news. Here he argues a point with editor on length of story to be used in coming issue. Schubert is the only man on the staff who has had any formal schooling in the field of journalism.

Correspondent Harry Fallers (below) gives suggestion on question that has come up during the proof-reading process. At this stage of the paper there are no formal discussions; decisions are made on the spot in order that the paper will be at the print shop in time for publication.

Top picture was taken at one of the weekly staff meetings while the editor was “blowing off steam” about past issue. People representing most of the news sources on the base are present. Minutes of the meeting cover every line which is printed, along with financial position of the paper, and why stories were cut or not used at all.

When meeting is over, the entire staff starts work on the next issue. The News is a never-ending job. Why? We do not know! But on the second and fourth Fridays it has to be “on the streets” for your reading pleasure.

Photographs by A. Canedo

or talks over specifications necessary for coming issue. Dick Price (center) manager of the Press in Bethesda. The sets a deadline date so that it will be “on the streets” to read with contract. Columnist George Royster ponders over headline he is writing. Columnists write their own news whenever possible. Discussions are common incidents each edition. Correspondent Harry Fallers (center) and Bob Johnson (left) talk over policy editor as they plan for coming issue. During these talks which end up in debates, staff members consolidate ideas and discuss opinion. At a table in the foreground of material four members of the staff (right) pose for photograph. They are (left to right) Butt, George Royster, Bob Johnson and Harry Fallers.

NNMC Finds Going Tough With Men On Leave

After capturing its first two exhibition games of the season, the Naval Medical baseball team has found the going much rougher lately.

Six recent contests saw the Admirals win a close one from the Metropolitan Police, 7-6, tie the Indianhead, Md. Proving Grounds Marines 7-7, in an abbreviated tilt, and drop four other tussles.

Pat Partridge's line-drive single over the shortstop's head broke up a tie ball game with the Policemen in the last of the seventh.

The husky NNMC third sacker's clutch blow came with the score knotted, 6-6, and the bases loaded and one out in the final frame.

A few days before this victory the Med. Center nine had suffered its first loss bowing to Gaithersburg, 6-0. It was a Sunday afternoon tiff and the patchwork Admiral lineup managed only three hits while playing shoddy ball afield.

On Sunday, May 1, the Irish War Vets blanked Naval Medical, 1-0, in a pitchers' duel that was rained out in the sixth inning.

Three days later NNMC and Indianhead battled to a five-inning deadlock. The visitors arrived here over an hour late, and nightfall cut short the slugging match.

A two-base error by Rightfielder Byrne on Partridge's lofty fly with two on and two down in the Admiral fifth tied the score 7-7, but George Funk fanned, leaving his teammate stranded with the potential winning tally. Funk had homered earlier in the game.

The following day, May 5, the Receiving Station nine outclubbed an invading NNMC ball club, 8-5. Chief Harris chucked five frames for the losers and showed good stuff but was wild at times.

A six-run explosion in the fifth inning at the expense of Jay Bell, ace Admiral righthander, gave the D.C. Fire Department an 11-5 triumph in another seven-inning fray here May 6.

PRNC Tennis Tourney Set For Late May

The All-Navy tennis tournament will be held at the U.S. Naval Academy, Annapolis, Md., during the week of July 17, it was announced recently.

In order to select a team to represent the Potomac River Naval Command, a qualifying tournament will take place the week of May 29.

The date for the PRNC tourney to begin and the number of days it will run will be decided after all entries have been received. Site of the meet will be the public courts at East Potomac Park, Washington, D.C.

Each activity will be permitted four singles and two doubles entries. For purposes of the Commandant's Trophy Competition, two singles and one double entry will be considered a full team.

The winners of the PRNC meet will compete against the winners from the 5th, 10th, and 15th Naval Districts and the Severn River Naval Command.

All entries must be received by the Commandant, PRNC, prior to May 12. The NNMC team will be picked from among entrants in the station intramural net tourney, now in progress.

Spring! Enchantment Sweet and Hot

Spring dances are always in fashion, the Naval Medical Center has ushered in the balmy days and cool nights with several dances. Above are pictures taken at recent staff hops.

Softball League Being Formed

Plans are being laid for this summer's Medical Center softball circuit, which will get under way as soon as the new diamond across from the Recreation Bldg. is ready.

Already several teams have engaged in practice games on the field across from Annex Two, and it looks as though competition between the various commands will be keen.

The present diamond must be done away with since it is too near the first hole of the golf course, which will be open for play soon. The backstop is to be torn down in the near future.

League entries are expected from the Annex Two Negro team, Dental School, Med. School, Physical Medicine School, the Neuropsychiatric Service of the Naval Hospital, the Hospital's Operating Room crew, and possibly X-Ray School.

At present the Med. School and O.R. nines appear strongest, with Dental School a definite darkhorse.

It is hoped that a six or eight-team loop can be set up soon, with play beginning in June and continuing throughout the summer months.

Quantico Site Of Golf Play

The Potomac River Naval Command golf tourney, from which will be selected a team to represent PRNC in the forthcoming All-Navy golf tournament, will take place at the U.S. Marine Corps Schools, Quantico, Va., June 21, 22 and 23.

The Navy links finals are to be held at the Marine Corps Recruit Depot, Parris Island, S.C., during the week of August 7.

Each participating activity will be allowed to enter six men in the PRNC meet, with four men comprising a full team for purposes of the Commandant's Trophy Competition.

The four best scores for 36 holes of medal play will determine the team to represent PRNC in the All-Navy golf meet.

Appropriate awards will go to the individual winner and runner-up. No more than two players from the same station may play together in one foursome at any time.

Entries must conform to the rules of the U.S. Golf Association governing eligibility for amateur classification. All entries in the tourney should reach the Comdt., PRNC, no later than June 1.

Med. Center Diamond Nine Launches Loop Season

With better than a month of pre-season practice behind it, the Naval Medical baseball team launches its 18-game Potomac River Naval Command campaign here Tuesday, May 24 against the Naval Air Station nine of Anacostia, D.C.

Two days later the Admirals make their first road trip of the year, tackling the power-laden Marine Corps Schools club at Quantico, Va.

At present the NNMC ball club is in dire need of more pitchers, as most of the moundsmen on the squad have sore arms. Also, several other players have had to drop the sport because of the press of outside activities, and outfield candidates still are welcome.

Coach C. H. "Bucky" Harris expects to start either Jay Bell or Lefty Cox against the Anacostia Airmen, and if necessary probably will do some relief hurling himself.

Dadich, a Marine stationed here, is the Admirals' first-string catcher, with Chief Gardner and George Funk also slated to see action behind the plate.

Chief Weldon is the regular first baseman, with Bruce Tillman at second, St. Clair handling the

shortstop duties, and Pat Partridge holding down third.

Net Tourney In Progress

The station tennis doubles tournament, currently in progress, now has moved into the semifinal round of play.

In the first-round matches R. E. Baker and P. L. Austin whipped R. N. Shelley and F. E. Weldon, 6-1, 6-1, while A. C. Franzman and P. K. Hamilton won by default from B. R. Talbot and R. C. Durant.

R. B. Bingham and W. K. New downed W. E. Watson and W. J. Sird in straight sets, 6-2, 6-3, while W. A. Dinsmore and J. F. Berry have yet to face P. L. Bates and J. W. Peabody in another opening round match.

Battle Wagons Maintain Lead

With the Naval Medical Bowling League season drawing to a close, the pace-setting Battle Wagons appear headed for top honors. They are four games in front with only six left to roll.

Mr. Kirby, the Fire Fighter and number one duckpin dumper in the loop still is burning up the circuit with his uncanny accuracy. He leads the male keggers in every individual department except one.

Mary Jane Koerner continues to head the feminine wood-wallopers, and her present game average is one that many of the men bowlers in the league would like to own.

Minus their top woman pin-pounder, Mrs. Mable Dean, for the past month, the front-running Battle Wagon team has stayed ahead of its closest pursuers the Tin Cans and Tankers, but has missed her high scoring considerably.

At present the high team game, high team set and high pinfall departments all are led by the Battle Wagons, with the Tin Cans not far behind.

Poole has the most strikes, 42, among the men, while Kirby and Harrington boast 40 apiece, and Robey 37. Among the women Owens is tops, having 28 aces to her credit.

BRONZE STAR AWARDED

(Continued from page one) World Wars, having served aboard the transport HENDERSON and with the 2nd Provisional Brigade, U.S. Marine Corps, at Santa Domingo.

He is enjoying fairly good health by playing golf and is a member of the Argyle Club at Wheaton. His wife is on duty at the Naval Hospital as a Navy nurse. They make their home in Takoma Park, Md.

PRNC Baseball Schedule

NNMC Versus	Home	Away
Naval Air Station, Anacostia, D.C.	24 May	23 June
Marine Corps Hdqrs., Arlington, Va.	31 May	30 June
Naval Res. Organ. Brig. W-1, Wash.	2 June	5 July
Naval Air Sta. Patuxent Riv., Md.	9 June	12 July
Marine Barracks, 8th & I St., S.E., Wash.	16 June	19 July
Marine Corps Schools, Quantico, Va.	28 June	26 May
Naval Air Res. Train. Unit, Anacostia, D.C.	7 July	7 June
Naval Barracks, Quarters I, Wash.	14 July	14 June
Naval Receiving Sta. Wash.	21 July	21 June

Naval Quarters "T" Home Games will be played at the NNMC diamond on the following dates: May 26, June 7, 14, 21, 23, 30 and July 5, 12 and 19.

Sportin' Aroun'

By Clyde Schubert

One hardly knows what to make of those insupportable Washington Senators of ours, bless 'em. To a miserable start, the frisky N suddenly began to wallop home all over the place and now look

Maybe by the time this gets in print our heroes will have cooled down somewhat but it still is a wonder what they did to Cleveland last Sunday. Must be a case of early-season pennant fever.

Calumet Farms really gave its followers something to ponder a week ago in the Kentucky Derby. Ouch, what a pun! Guess old B. Jones is a little too slick for the other horsemen. That makes for Derby winners in nine years Warren Wright's stable.

See where Mel Patton, humor version of The Flash of comic book fame, scorched the cinders for a new 220-yard dash mark. O too strong a tailwind down that straightaway prevented his astounding time of 9.1 seconds for the tury from also going into the record books.

Great little weekly newspaper that SPORTING NEWS. Recent issue had a lively column about L. Warneke, former National League pitching great and now a neophyte umpire in the same circuit.

Also, was amazed to read that Myril Hoag, ex-big league outfielder is now pitching in a Class D league and that Clint Hartung, slugger Giant hurler, has a terrific pick move to first base. The S.N. ways is packed with tasty tidbits baseball news and gossip.

Seems that Mr. Kirby, number one bowler in the NNMC duckpin circuit, has been stepping out character by burning up the loop every Monday night these past months.

He's often so hot on the alleys all but commits arson without aid of any inflammable—yet he's member of the station Fire Dept. Leading a double life perhaps.

"Again, this couldn't happen again." Probably that's what the members of last winter's hapless Med. Center cage squad thought about the woeful lack of support they received, and the few fellows who came out for the team.

But history repeats itself in hurry. The baseball team can draw flies to its games and most of the self-styled Ted Williams Bobby Doerrs and Bob Fellers at the station never quite got around to showing up for practice.

What say you plan now to be a hand for the team's PRNC opener here May 24 and make it a point to see several games this year? The boys need your support—and wait it. Let's not let them down!

Who do you turfmen like in the Preakness this weekend — Capote Old Rockport or maybe Ponder? I take Palestinian. No more space so that's it for now. Be back again in two weeks.

NATIONAL NAVAL MEDICAL CENTER, BETHESDA, MD.

27 MAY 1949

Eleven Men Cited At R.M.I. For Good Work

April 14, 1949, Captain C. F. Stone, Medical Officer in Command, Naval Medical Research Institute, cited eleven hospital corpsmen before the assembled personnel of the Institute, for the valuable work they played in the carrying out of a large scale study on the efficacy of typhoid vaccines in the prevention of epidemic bacillary dysentery. The men cited were: Biggers, R. M.; Culp, J. M.; HMC; Durant, HMC; Fee, W. G.; HM1; Holman, B. S.; HM2; Hranilovich, HMC; Hartlieb, D. G.; HM2; Kirk, J. T.; HN; Samsell, J. E.; Selman, O. L.; HM, and Wey, E. P.; HM2.

A citation which was made a part of these men's service records in part:

For your devotion to the investigation frequently required extending your efforts far beyond the working hours, often necessitating the exercise of ingenuity and sound judgment to carry out the program under adverse circumstances, and always demanding intelligent leadership, and professional skill in your ratings.

(Continued on page four)

Medical Officers Will be Assigned to U. S. Air Force

Applications for temporary assignment to the U. S. Air Force are being received from medical officers of the Navy. The Secretary of Defense has directed that one hundred medical officers be assigned temporarily to the Air Force for duty. Officers will not be commissioned in the Air Force but will serve therein as Naval medical officers.

Naval Vessels Awarded To Receive Unit Commendation

(A)—The Navy Unit Commendation has been awarded to 70 ships, including three submarines, the 22nd Marines for participation in various actions in World War II.

Periods for which the award is authorized are listed in BuPers Ltr 48-49 (NDB, 31 March 1949). Active duty personnel are authorized to request authorization to wear the NUC ribbon from their commanding officers.

Eligible personnel will receive, at the date of individual authorization from BuPers as well as a ribbon. Only in doubtful cases should individual application be made to BuPers for authorization to wear the NUC ribbon.

It is contemplated that if not already qualified as flight surgeons or aviation medical examiners they will be instructed at Randolph Field for four weeks in techniques of aviation examination and then ordered to Air Force facilities within the continental U. S. for duty.

They may request overseas duty. Officers must be available for assignment to the Air Force prior to July 31, 1949. Maximum tour of duty is to be two years. Applications may be forwarded by dispatch to BuPers Info BuMed not later than June 15.

MEMORIAL DAY

It is a great privilege for the active service to pay tribute in order to commemorate the memory of our departed shipmates and former comrades in arms.

Their patriotic devotion to duty, their inspiring deeds in combat leading in thousands of cases to the final supreme sacrifice, are written indelibly upon the historic pages of our National existence. So let us pause this Memorial Day in humble, solemn reverence and homage to these beloved dead.

We owe them so much, they ask so little. Mutely, silently, yet eloquently their graves plea that we carry on the Good Cause, that we preserve and guard this Best Nation in whose defense they so bravely died.

M. D. Willcutts

M. D. WILLCUTTS
Rear Admiral, MC, U. S. Navy
Medical Officer in Command

Capt. Stone, C.O. of NH, Elevated To Rear Admiral

Now it's official. Rear Admiral Leslie O. Stone, Commanding Officer of the Naval Hospital, who recently was elevated to flag rank, was sworn in at official ceremonies here May 21.

Swearing him in was Rear Admiral Morton D. Willcutts, Medical Officer in Command of the Medical Center.

Present at the ceremonies, held in the Hospital Board Room, were Captain M. J. Crawford, Captain V. Hernandez and Commander W. S. Burr.

Also in attendance were Lieutenant R. F. Hooper, Lieutenant J. P. Soltysiak and Lieutenant Commander J. J. Glawson.

Admiral Stone's temporary appointment became effective on April 1 of this year. He has been "C.O." of the Naval Hospital here since September 6, 1946, and is expected to leave this station for duty elsewhere sometime in the near future.

Dunninger Makes A Prediction

Here is one prediction the renowned mental marvel makes without the slightest chance of error! —that every man and woman in the United States who invests in U. S. Savings Bonds will receive four dollars for every three in just ten years —and that by signing up for the Payroll Savings Plan you will find it the best method of regular, automatic savings ever devised.

Atomic Metal Used On Bone Cancer Here

Experimental use of a potentially radioactive metal, gallium, to localize and treat bone cancers was reported here recently by CDR Horace C. Dudley, biochemist at the Naval Medical Research Institute.

The little used metal, made radioactive in the atomic ovens at Oak Ridge, Tenn., burrows into the bone and bathes the tumor with its cleansing rays, Dr. Dudley disclosed.

Already the isotope is being used cautiously on selected human cases at the Naval Hospital here and more widely in animal experiments.

Bone cancers now are almost always removed by surgery, with amputation of affected limbs more a rule than an exception, the cancer specialist stated.

Dr. Dudley told of the project in a paper presented to a meeting of the Washington Section, American Chemical Society, recently.

"For a look into the future, and perhaps a prediction or two," he summarized, "radiogallium gives

MARCH OF FREEDOM

By James Patrick McGovern

Our valor now makes live each yesterday
Of bitter struggle wreathed with heroes' deeds,
Since first our fathers blazed their dauntless way
Through virgin tracts and sowed their hearths
new seeds.
Our homes then grew in beauty, love and peace
Within the fortress of our fruitful land,
Which promised that our state would never cease
As long as justice ruled the heart and hand.
But freedom is an ever restless sea;
It must be always wooed and won again.
To change is life, to strive is destiny;
The rust was never deep for sword and pen.
Our future thus must give our past its due
Of victory again, of peace more true.

Building Trades Foreman

Personalities at NNM

Mr. Irwin, a Skilled Artisan

Mention "The Big Bull" around the compound and any old timer as well as many newcomers will know you're talking about Mr. Robert Lee Irwin—master tradesman, lover of flowers and monkeys.

With the Civil Service title of assistant foreman, Mr. Irwin supervises seven building trades here at the Center: carpentry, painting, plaster, brick laying, machinist, sheet metal work, and roofers.

He is tough and exacting but likeable, and enjoys the respect and loyalty of those under his supervision. The tall, heavy set, bronze-faced

foreman entered the Army in 1917 and served therein until 1919. After leaving army life behind he decided to go to work for the Navy, and since that time has been with Civil Service and the Navy for 30 years.

During 1946 he received a citation from Rear Admiral T. C. Anderson, then Commanding Officer here at the Center.

At present Irwin is a patient on Ward 3-B, but is expected to be back on the job shortly. Incidentally, he's one of the most popular bachelors on the station.

Hard Work Brings Two Stars

Rear Admiral Morton D. Willcuts (above left) swearing in Captain Leslie O. Stone (at right) to the flag rank of Rear Admiral

Straight Dope on Financial Aid Obtained from Red Cross

Financial assistance by the Red Cross is sometimes provided, either as a loan or an outright grant. The circumstances of each case are considered to determine if they fall within the well-defined policy set up for such aid.

Each Red Cross Field Director is allotted a limited amount of money for these emergency loans and gifts, and is responsible to the Red Cross organization for its proper use.

A serviceman or veteran cannot reasonably expect to walk into the Red Cross office and be given money simply because he happens to be "broke" and wants to spend an evening in town, or go home on weekend liberty.

That is not the kind of emergency the Red Cross can handle. But he

(Continued on page four)

Tower Topics

It looks as though summer is really on its way. The swimming pool is doing a booming business and every afternoon you can see a huge mass of flesh lying in the grass over by Main Quarters.

There is a definite plan under way to have an intramural golf tourney. Some of you Ben Hogan's might start forming your teams now so that there will be no last minute rush.

The boat can be chartered until October 15 but requests should be made well in advance of the date desired. A fee of ten dollars will be charged to help pay for the cost of each cruise. Here is your chance to go "Cruising Down the River."

Once again it is "poemtime" in the old kolyum. So hold your hats; we're off!

I've taken up the game of golf;
I drive my mashie with such force,
I heard a jealous person say,
I'm also taking up the course.

SEEN AROUND THE COM-
FOUND: Pete Stanley walking down the passageway singing something that sure sounded like "Careless Hands." Wonder why? Jerry Snodgrass almost a nervous wreck from counting the days until his discharge. Harry St. Clair telling us that Glen Echo is quite the place—seems as though he found something very, very interesting out there. Pete Petrillo in good voice down at the "Famous" not too long ago.

That brings us just about to the end once more, except to remind you to get behind this Bond drive. Let's use a trite expression and say bye, bye—Buy Bonds!

Chloroform

By John McKeon

SCENE: Aboard ship. A sailor receiving a medal for saving crew of the ship.

1st SAILOR: "What did he do to save the crew?"
2nd SAILOR: "He threw the chloroform overboard."

WIFE: "I'm always having trouble with either my husband or furnace."

VISITOR: "How's that?"
WIFE: "Whenever I watch one other goes out."

SAILOR: "How about a little honey?"
SHE: "I can't, my lips are chapped."
SAILOR: "Aw, come on, one chap won't hurt you."

A sailor is describing his girl one of his buddies.
"She's pretty as a picture and in such a beautiful frame, too."

And did you hear the one about the cross-eyed professor who could not straighten out his pupils?

Why is a rabbit's nose always shiny?
Because his powder puff is on the other end.

Meet Your Executive Officer:

Capt. M. J. Crawford, DC, USN

Chairman of the NNM Golf Course Committee and one of the avid enthusiasts of the game here at the Center is the Executive Officer of the Naval Dental School, Captain M. J. Crawford, DC, USN.

He received his early education in Huntington, W. Va., and went on from there to study at DePaw University, Greencastle, Ind., taking a Liberal Arts course there.

Receiving a Doctor of Dental Surgery degree after four years at Louisville Dental School, he then underwent an internship of two years and also practiced Oral Surgery for two years before entering the Navy.

In 1931 Captain Crawford began his Naval career and, being an Oral Surgery specialist, his tours of duty have been mainly at Naval Hospitals here and abroad. Some of these were League Island, Penna.; Canacao, P.I.; Mare Island, Calif.; Honolulu, T.H., and Corpus Christi, Texas.

Eleanor Willett became Mrs. Crawford in 1934 at ceremonies held in Canacao. They now reside on Sleaford Road in Bethesda.

Besides his golf, the Captain also enjoys fishing and bird hunting very much. As chairman of the Golf Committee, he has been instrumental in the development of the six-hole course which is now under

construction at the Center.

In his four years as Executive Officer of the NDS, Capt. Crawford has done much to round out school as a valuable mode of instruction to dental officers and dental technicians alike, and to provide an important service to the officers and men of the Navy.

Noted Doctor Speaks Here

Henry A. Swanson, D.D.S., Chairman of the Council of Dental Museum and Registry of the American Dental Association, will be guest lecturer at the Naval Dental School, at 2 P.M. today.

The topic of his lecture will be "Allergic Manifestations in the Oral Mucosa." All regular and resident dental officers and others who are interested are cordially invited to attend.

ATOMIC METAL

(Continued from page one)

promise as a new approach to the study of bone tumors of those diseases which may be aided by radiation of bones and their associated tissues.

He stressed, however, that the search is still in the laboratory stage; that treatments can be given only under highly safeguarded conditions, and that the work with human patients has just begun.

the branches of these plants.

Nature and Her Children

In the last few years the United States has become increasingly conscious of the sheer beauty of nature and her children. The people are returning to nature just as they did in the days of Emerson and Thoreau.

The Navy, too, appreciates this return to nature and has a full program in progress here at the Medical Center. Mr. David Ayers and his assistants, all of whom are trained in this field, are busy the year around.

Their program is scheduled a year in advance so that all flowers and plants bloom at the appropriate time of the year.

At the present time the Medical Center greenhouse contains 42 porch boxes and many flower beds. These are used all year long, producing various flowers throughout all four seasons.

The Medical Corps realizes the important psychological role flowers play in the recovery of patients. Therefore, one of the main functions of the greenhouse is to furnish flowers for the sick.

The greenhouse also supplies flowers and plants for chapels, libraries, and various other activities here at the Medical Center.

Two Home Games Booked For Admirals Next Week

Three of the Naval Medical Center baseball team's next four Potomac River Naval Command loop tussles will be played here, with home games slated for May 31, and June 2 and 9.

Next Tuesday NNMCM will be host to the Headquarters Marines nine from Arlington, Va., and two days later the Admirals entertain the Naval Reserve Organized Brigade of Washington, D.C.

The following week Coach Chas. "Bucky" Harris' charges tackle the Naval Air Reserve Training Unit (NARTU) club at Anacostia, D.C. on Tuesday, May 7, and the following Thursday play host to Patuxent River, Md., Naval Air Station.

In their PRNC opener here May 24 the Admirals fell before Anacostia Naval Air Station, 8-2, in a contest cut to six innings by rain. The Airmen hammered Jay Bell, NNMCM hurler, for six runs in the first two innings and coasted in.

Little John Swinko's single to right field with two out in the sixth and runners on second and third brought home NNMCM's only two tallies of the contest.

Fuchs, crafty Anacostia twirler, limited the home nine to three safeties, a ringing double to left by Bell, and singles off the bats of Swinko and Catcher Dadich.

Bell had trouble with his control and in addition was hampered greatly by shabby fielding behind him. Bell himself fouled out to the third baseman with the sacks loaded and two away in the fourth stanza.

In recent exhibition games the Admirals tied Naval Air, 7-7, in a hard fought 10-inning battle, and lost to the D.C. Fire Department, 7-0. Naval Med. garnered only three hits in the latter tilt, two of them by Pat Partridge.

Animal Keeper

Warrant Officer B. E. Jennings of the Medical Research institute gives twenty-three-year-old pony haircut, which is part of his daily work at the Research Animal House.

UNIT COMMENDATION

(Continued from page one)

"Your splendid accomplishments in this meritorious service have justified your designations as Medical Research Assistants and reflects high credit to your branch of the Medical Department."

The Dental Explorer

By Bob Thompson

In the recent exams for advancement in rating, eleven Dental Techs, we are proud to report, made the grade.

Getting two stripes were Hartzfeld, Donahue, and McGonagle, while Bevan, Burkinshaw, Anhier, Wark, Sherman, Pritchard, and Dees got their first crow.

And leave us not forget Baker who made the really tough one, DT1. To all, and especially "Bake," CONGRATS.

At this writing we are contentedly puffing on one of the cigars Stephens passed out for the arrival of the new addition to his family, a bouncing baby boy. Good work!

Looking around the campus further, we note that Shiffman is acquiring that hen-pecked(?) look as he gets ready to walk alterward on the 28th. Also, Allison is starting to pack to go home about the first of June for nuptials.

As Hartzfeld and Groce are due for discharge the first part of next month, we'll take a minute now to bid them Bon Voyage.

tells us that Chief Harvey will soon be here at NDS for duty after finishing his course at NSHA.

Must go now but I'll see you again in the next issue.

Kindness is Priceless

Mrs. Ferguson Cary, representing the Alpha Sigma Sorority which donated eight radios to the patients of Wards 109 and 110; here on May Nineteen. Also shown in photograph is LTJG James F. Berry and patients of Ward 109.

Capt. Raines To Represent Navy In Indiana

Captain George N. Raines MC, USN, Chief of Neuropsychiatry at the Naval Hospital here, will represent the Medical Department of the Navy at the first scientific meeting of the American Academy of Neurology.

The meeting is to be held June 1-3 in French Lick Springs, Ind. Capt. Raines is graduate of the Northwestern University Medical School.

Medical School Chiefs Receive College Degrees

Two Chief Hospitalmen on the staff of the Navy Medical School will be awarded academic degrees during the month of June.

Raymond A. Nygren will receive a B.Sc. in Biology from Willamette University at Salem, Oregon. Chief Nygren will receive his degree in absentia.

William C. Coles will graduate from Montgomery Junior College on June 10. He is to receive an Associate in Arts in Biology. Chief Coles has attended the local college for evening classes and during summer sessions.

During his naval career Chief Coles has become a Clerical, Physiotherapy, and a Clinical Laboratory Technician. For the past two and a half years he has been an instructor in the Lab. School here.

Play Begins In Soft Ball Loop

Action in the nine-team NNMCM intramural softball circuit got under way last week when Med. School nipped Annex Two, 3-2, and the Naval Hospital tripped Dental, 10-6.

Members of the league include the above-mentioned four outfits, Physical Medicine School, EENT Clinic, N.P. Service, Med. School Lab., and Commissary.

Monday, May 23 Phys. Medicine nipped Annex Two, 8-7, for the losers' second straight setback by one run.

Wave Whisps

By Betty Bookis

Ah, at last!!! Another chance to blow my top! Honestly, this keep-in' quiet business hurts ME more than it does YOU.

Jus' to be different this time—promise not to gripe about a single solitary thing. (So I DIDN'T make Chief! Always someone who does not get the word).

First of all, we welcome aboard ten—yes, TEN new WAVES, bringing the number of our happy little family up to thirty-one, twelve officers and nineteen enlisted.

In case you haven't been properly introduced, here they are: Margaret Bosco, HN; Augusta Denker, HA; Sheila MacVicar, HA; Virginia Nausedas, HA; Joy Shrader, HN; Maude Bosarge, HMC; Margaret Heinzman, HM2; Edith Rush, HM1; Patricia Smith, HM2, and Leonora Hill, HN. Any sign of a barracks, Miss Dalier?

Verna Gnall, HM3, was the name of the cute little "feather merchant" who graced Center Files on 2-week training duty a while back.

"Disc-jockey" Bookis appreciates those suggestions for the chimes, Mr. Buettner, but gee—Beep Bop—well, I don't know???

When we gonna have another picnic? Several of us "blessed" with the duty missed out on the Rock Creek deal the 18th. Speakin' of picnics—

What was that we heard about the one on the Med. School lawn? Sixteen fellas can't be wrong, Pat.

Sportin' Aroun'

By Clyde Schubert

At the time this kolyum was ing pecked out on a helpless ty writer it was a warm, pleasant May day night, but all was not well for the Senators had just dropped another tight ball game.

Yes, after watching the Nat to pot in the late innings again Chicago Sunday afternoon and the gazing morosely at ye olde television screen while they repeat the performance against the dratted White Sox the very evening, one can hardly think words to express his disappointment.

By now Joe Kuhel's charges er will have bounced back to clear the staggering Cleveland Indians else their downhill course will be continued. Let's hope the local late-inning fortunes take a need turn for the better—but soon!

Washington being strictly American League 'city, let's take a brief look around that cuit as June hoves into view.

The Yankees still look aw good and if Joltin' Joe DiMaggio returns to the lineup regularly it will definitely be the team to watch.

Detroit seems just a little shy top flight pitching, while Boston Red Sox likewise need some bet chucking to back up their ace M Parnell. Chicago, amazing enough, will bear a lot of wat ing, while our Nats must I more clutch hitting if they figure be contenders.

What in the world has happen to Cleveland? Unless it sta pounding the pill the Tribe is out luck but good. St. Louis has sad assortment of moundsmen poor catching as well. The Browns are Grade A cellar material.

Last but far from least come Mack's Philadelphia Athletics, erently hotter than the Sahara Desert at high noon. Those Mackn can cop the flag if their twirling mains strong and will be well worth keeping an eye on.

What about the National League? We'll give the senior circuit the once over next issue, as well taking a look at various Class A and AA minor loop races.

Plenty of interest is being show in the station softball league. anybody's guess as to which will take top honors.

Those Battle Wagons, of course, who else, won the NNMCM duckp crown. The News will carry a picture and windup story on it ne time.

How about you readers lettin me know what you'd like to see my column in the future? I'd appreciate it. Here's dreaming of Washington wins over the Yan Memorial Day and saying so for now.

"WELL, I'M WAITING," says Lynn Merrick, Columbia Pictures' starlet who looks quite capable of paddling her own canoe. Only thing is, she's fresh out of canoes and is waiting to "net" a companion.

10 June 1949

NATIONAL NAVAL MEDICAL CENTER, BETHESDA, MD.

Red Cross Gray Ladies Hold Grad. Exercises

The 15th and 16th classes of Gray Ladies to be trained at this hospital were graduated May 31st. After an invocation by Chaplain Kerrigan, Miss Davis, Red Cross Field Director, presented the group to Admiral Willcutts who warmly welcomed them and spoke of the continuing need for Gray Lady services. Mrs. Zimmermann, Chairman of Gray Ladies, administered the Gray Lady pledge.

Admiral Stone, in accepting the classes, praised the tradition of Gray Lady Service in this hospital. Then, following the presentation of certificates and pins by representatives of the District of Columbia and Montgomery County Chapters, Chaplain Gatlin closed the ceremony with a benediction.

The newest Gray Lady service is a story hour on the children's ward for those lonely children whose parents may be as far away as Trinidad or Guam.

Surgeon General RADM Swanson Receives Doctor Of Law Degree From Michigan

The degree "Doctor of Laws" (honorary) will be conferred upon the Surgeon General, Rear Admiral Clifford A. Swanson, MC, USN, by the Northern Michigan College of Education on June 18, at Marquette, Michigan, for his outstanding contributions in the field of medicine.

A native of Marquette, Michigan, he was graduated from the Marquette High School (Gravert) as Salutatorian and in 1921 received the Life Certificate from Northern State Teachers College, Marquette, Michigan.

In 1925, he received the degree of Doctor of Medicine cum laude from the University of Michigan. In the same year he was appointed Assistant Surgeon in the U. S. Navy with the rank of Lieutenant junior grade. He pursued graduate studies at the Naval Medical School, at Harvard, and the University of Pennsylvania.

During World War II, he did valuable research on night vision, color vision and the effect of pressure and oxygen on the eye. These subjects proved valuable to aviation and submarine medicine.

He is a Fellow of the American College of Surgeons; Fellow of the American College of Physicians; Member of the Board of Governors, National Board of Medical Examiners; and Fellow of the American Academy of Ophthalmology and Otolaryngology.

Dental Photographer Assigned To Embassy

William E. Groce, DT2, USN has received orders for duty at the Embassy in Cairo, Egypt and will report there by the 15th of July.

As the only Dental Clinical Photographer in the Navy, Groce will have duty as a Dental Technician and also be the shutterbug for the embassy.

Due to ship over next week, he will go on leave for a month and then report to the State Department for clearance then on to Cairo.

N.N.M.C. Golf Course Now Open For Play

Under the management of the Recreation Department the NNMC course is now open for play. The course consists of six holes with more holes under construction.

Green fees are 35 cents for officers and 25 cents for enlisted personnel. Playing time will be from 8:00 a.m. to sundown seven days a week.

Professional instructions will be given by the course pro. G. W. HMC, USN is now acting as caddy. Arrangements for continued on page 2)

Navy, Marine Corps Personnel Get Occupation Medal Soon

Distribution of the Navy Occupation Service Medal starts 1 June to members and former members of the Marine Corps and Marine Corps Reserve who are eligible to receive the award.

New Modern Ship's Service Fountain Open

Like spring it was a little late in coming; of course all the good things do not come first. So it has been with our new Ship Service Fountain. It is here, and to say the least, attractiveness is the order, with stainless steel counters, plush booths of red and those open air patios would go to anyone's head.

If you find the service wanting, be patient. The fountain manager and the Ship Service Officer have been contributing many hours overtime in an attempt to figure out an efficient system where-by your desires may be filled with the least

(Continued on page 4)

The medal is for personnel attached to and serving with organizations of the U. S. naval service occupying enemy territories during World War II. Distribution of the medal to Naval personnel is expected to commence about 1 July or shortly thereafter. Detailed plans for Navy distribution will be announced later.

To be eligible for the medal, Marine Corps personnel must have had occupation duty in organizations on and after 8 May 1945 for the European-African-Middle Eastern area. Occupation duty is credited to organizations in the Asiatic-Pacific area for duty performed on and after 2 Sept. 1945.

Navy Relief Drive Under Way Give To This Worthy Cause

Navy personnel are still being called upon to contribute to Navy Relief. The success of this campaign will depend upon all hands knowing about Navy Relief, what it is, what it does, and how it works.

Medical Center Officer Receives College Diploma

Chief Warrant Officer Don H. Lillie will graduate from South Eastern University on June 8, 1949 with a degree in Accountancy.

Mr. Lillie has been attending the local college at evening classes for the past fourteen months.

Since his arrival here about fifteen months ago he has been the Officer in charge of the Electrical Medical Repair unit which operates in this area.

If you are the average among Naval personnel you are not at all familiar with any of the above. You have contributed, yes, with just a slight amount of protest. This is attested by the grumbling when you are approached for contributions.

Without a doubt you have tuned in on many a sea story in regard to the misuse of Navy Relief Funds. Have you ever followed through on these tales of woe to get the other version? In all probability refusal of loans to the subject of these tales was justifiable.

The Navy Relief Society is a well organized society with headquarters located in the nation's cap-

(Continued on page 2)

ADM. Willcuts Presents Navy Canada

Admiral Morton D. Willcuts will represent the Medical Department of the Navy at the 1949 meeting of the Canadian Medical Association.

The Association's 80th session will be held at Saskatoon, Saskatchewan, Canada from June 13 to June 17.

Admiral Willcuts will discuss the use of Atomic Ionizing Radiation in Blood Cell Development in the session on behalf of the Navy. An exhibit from the Bureau of Medicine and Surgery will be on display during the meeting.

RADM Willcuts Praises ARC Gray Ladies At Graduation

In his address at the Gray Ladies graduation exercises here May 31, Rear Admiral M. D. Willcuts, MC, USN, praised them for "helping us in our efforts to keep paramount the management and care of the patient."

During the course of his talk the Medical Center's MOIC commented, "the patient enters the Naval Hospital without choice or selection of doctor, but with strong faith that his wounds or malady will be healed. 'The friendly presence of a Gray Lady helps much in inducting the 'homeless' patient to our hospital regime.'"

In concluding Rear Admiral Willcuts remarked, "You Gray Ladies

have a great task, an important, peaceful and morale-building mission. For surely the morale of our American fighting youth sick in hospitals must be maintained.

"With your sublime, womanly and matronly graciousness you do much in stimulating and maintaining hospital standards in keeping with time-honored Navy Medical Department policy for the care of the sick."

Waves, Wacs Keep Best Dressed Title

(SEA)—If six women fashion authorities have their way—and, being women, they probably will—feminine military personnel will continue to help maintain America's reputation of having the best dressed women in the world.

The six clothing experts have been named by the Quartermaster General as an advisory committee to serve as consultants on development of uniforms and clothing for women members of the Army and Air Force.

They will carry out a long-range study of clothing needs for women in military service. Appearance as well as usefulness of uniforms is to be given consideration.

In the past the Navy has called on a civilian fashion authority to assist in designing women's uniforms. The blue uniform, designed in 1942 for Waves, has been modified slightly and will be worn by all Waves and Navy Nurses.

The summer grey working uniform for women in the naval service also has been re-designed.

N.P. Clerical, ECG Students Finish School

Four hospital corpsmen completed a four months course in Neuropsychiatric Clerical Procedures at the Naval Hospital here on June 7, while five others graduated from Electrocardiograph and Basal Metabolism School this week.

Receiving their certificates as N.P. Clerical Technicians were Curry, R. F., HN; Hughes, J. L., HN, McKeon, J.V., HN; and Prevette, E. H., HA. Curry will go to the Naval Hospital, Mare Island, Calif., for duty, McKeon to Oakland, Calif., and Hughes and Prevette to Philadelphia Naval Hospital. Curry was top man in the class.

Maddox, L. A., HM3; Kreps, F. W., HM3; Steffek, H. J., HN; Wolodarsky, W., HM3, and Naugle, H. H., HM3, finished their four months course of instruction in ECG and BMR techniques on June 7.

On their way to the USNH, Long Beach, Calif., for duty are Kreps and Steffek, Wolodarsky is going to Oceanside, Calif., NH, Maddox to the Naval Hospital, Memphis, Tenn., and Naugle will remain here for duty.

NAVY RELIEF

(Continued from page 1)

ital and auxiliary offices on practically every Naval station. The program of Navy Relief is designed to provide service and assistance to all naval personnel and their dependents in time of need.

Special emphasis has been placed on giving assistance in a way that will help servicemen to help themselves, and maintain dignity and self respect. Courteous and efficient attention is given to each request.

The nature of the problem and the assistance necessary is determined. With this accomplished Navy Relief is ready and willing to assume its duties without delay.

NNMC GOLF

(Continued from page 1)

instruction may be made by phoning Ext. 577.

It is anticipated that in the near future intramural golf play will be introduced with handicaps for those who need them. Trophies will be awarded covering different events.

A Golf Committee has been appointed and is headed by Captain M. J. Crawford, DC, USN, of the Naval Dental School. Golf Supplies may be obtained through Ships Service. Golf clubs are available at the Golf Shop and are loaned out by the course manager at no cost.

Sailors "Joe" Time at NNMC

Shown above is a typical group of sailors enjoying morning coffee in the recently opened new Ship Service fountain. Nothing quite beats "taking ten" for a good hot cup of Java.

Dental Man Receives Unit Commendation

Robert P. Walker, DT3, recently was awarded a Navy Unit Commendation Ribbon at a Dental School Personnel inspection.

Making the presentation was Captain L. D. Mitchell, Jr., DC, USN, Dental Officer in Command, with Captain Walter Rehauer, DC, USN, and all hands of the Dental School looking on.

The ribbon was awarded the USS CRESCENT CITY for action against Japanese forces in the South Pacific area during World War II and Walker's recently was forwarded to him.

Captain Rehauer, attached to the Dental Division of BuMed, congratulated Walker and expressed his satisfaction with the inspection and drill which followed the award.

The Dental Explorer

by Bob Thompson

Glimpsed in passing . . . Jenkins and Miller sporting their new Chiefs' uniforms at muster . . . "Lead Shield" Buchanan taking off for work at Whittlesey's . . .

"Romeo" Farrington gazing skyward, dreaming . . . "Coach" Frates back from Randolph Field, winging his way on a jet bomber . . . Gonzales tearing out from 123 in that car(?) of his.

Straight from the horse's mouth . . . Swedberg, Knudson, Cowles, and Guerrero to Prosthetic School . . . Room 170, "Hollywood", will be kept busy for some time as a site for movie writing . . . Groce to be in Cairo, Egypt by 15 July for duty at the Embassy.

Last and perhaps least, let me get in a word of praise for those "Wondrous Nats." Although a dyed in the wool Indian fan, I think the locals are going to be up there next September battling it out.

But Cleveland, *what happened?* And speaking of sports, Rosecroft has been having some fine races. Some of the better trotting horseflesh in America has been there and the crowds have been wild about it. But I'll take Ponder in the Belmont.

Here's the bottom of the page so will see you in the next issue and thanks for the wonderful support to the Navy Relief Campaign.

Wave Whisps

by Betty Bookis

"WHAT'S IT LIKE IN WAVE BOOT CAMP?" Well, since ya' twisted my arm—o.k. Here's the scoop.

"SIBERIA, U.S.A.," as we used to call it, better known as GREAT LAKES, ILLINOIS, now accepts volunteer women recruits at the rate of about 160 every 5 or 6 weeks. There're always two companies of approximately 300 girls at Camp Paul Jones—an advanced group, and of course, the beginners—all sweatin' it out together in an area about 2 city blocks long.

Training lasts 10 weeks. During this period WAVES abide by traditional Navy rules and regulations, the same as the men, maintaining a full schedule of classes in addition to their extra cleaning details and barracks watches.

Visitors permits are issued after the third week of training, one 6-hour liberty pass after the 5th week and two 12-hour passes before graduation. "Boots" must always be accompanied by another when at liberty on the Base—even within the restricted area, barred to men at all times.

So there you have it. No pampering or privileges—but PLENTY of what it takes!!!

Chloroform

by John McKeon

CAPTAIN: "Sailor, I'm ashamed of you walking along the street half drunk."

SAILOR: "I'm very shorry shir, I ran out of money."

DENTIST: "You have acute pyorrhea."

VICTIM: "Save the compliments for later doc and look at my teeth."

MESS CHIEF: "Who the blankety blank put the flowers on the tables?"

H.A.: "The Captain did, chief."

MESS CHIEF: "Look nice, don't they?"

MARINE: Eyeing a girl on a dance floor. "What do you think of her dress?"

SAILOR: "It shows everything but good taste."

What is horse sense? Something that horses have that keeps them from betting on people.

CREW'S LIBRARY

Best War Novels Now at Library

The library has received the latest and the most re War Novels. The current best *Naked and the Dead*—Mail is still on a waiting list and available in this way.

The veteran writer Irwin St has written a subtle expose of War titled—*The Young Lions*

From the City, From the Pl Baron, takes in the advanced pre-invasion struggle of an Eng battalion, before it is plunged the foray in Normandy. Sul charming, a bit unwar-like, no gic, alive.

I'll be Right Home, Ma—Der it starts with a punch, ends a kiss. The chronicle of a li heavyweight's rise to titledom; psychological facts that make a killer; the simple traits of cacter that make your heart go to him.

Nancy Flyer—Poole. "This thrilling story of the lifelong b between a man and a woman home and the road, a coach an inn." This is an epic of coa and their fight for survival ag the coming of the train.

AT LAST!—The new Ships S ice opened last week. I had told almost every week it we open "around the first of the we I was getting a little discoura until they threw open the door let me have a look see. I need say I liked what I saw. It was worth the wait. Here's hoping those "C.C.C.'s (Chief Coffee C mando's) get their share of beloved "joe".

What's this? The golf co opened too? Yep, this was a b week at the NNMC. By the w we played a little golf this w and did real well. Had a two and you know that's a record. not a twenty for the six holes just the first one! I had a li trouble with my putting, in f I didn't even get on the green putt. I am expecting better th in the future, though. I just g new book "Golf in 10,000 Easy I sons" by Mother N. Law. I'll res start blasting them now.

SEEN AROUND THE CO POUND: The crew going for th "BOUNCY" seats in the new Co Club. An HA wanting to know the new coffee cups came fr Plastic Surgery. Everybody wa ing to know why we don't have a other dance!!? Chief Miller a li camera shy. All hands talking tramural softball.

Dept. of This and That: Lo Prima recently out at Glen E and other top bands are book Wonder what ever happene to t NNMC orchestra; the Rec. Bu ing has been too quiet on Sund afternoons. Gosh, that "eoke" r chine over at Main Quarters is u usual. You can get almost a thing out of it but a "eoke."

We see that the ping pong tabl get a good workout every d Would anyone be interested in sta ing a tournament? There seems be plenty of good material arou Best I stop now as I am just abe out of room. Bye, now.

Plastic Eye Technique

The close of World War II found the Navy Medical Department with a great number of sailors, ex-sailors and veterans in its hospitals as casualties of that war, without arms, legs and even eyes.

It was the Navy's job to rehabilitate these casualties by artificial restorations, and help return these wounded men to active duty or to civilian life, unhampered by the inhibitions that result from deformities and disfigurements.

Ens. David H. Tilly, USNR, (Ret.) (featured in our pictorial story) lost his left eye during the invasion of Saipan. He was returned to the states to receive treatment and upon completion of his medical care was furnished with a plastic eye.

This was in 1944. Since that time he has returned here at different intervals to see what degree of advancement has been made in the plastic eye field.

During one of his recent visits Doctor H. J. Towle, Jr., decided to furnish him with a new eye made possible by the advancement in this field. Mr. Tilly consented to let the NEWS photograph different phases of the technique used here at the Naval Dental School.

(Photographs by A. Canedo)

Earl G. Hartzfeld, DT2, USN, Acrylic Eye assistant and illustrator.

LCDR Herbert J. Towle, Jr., DC, USN, Officer in Charge of Plastic Eye Clinic.

While the patient is still standing about, the doctor observes (without the patient being aware of it) the mid-line or "normal" position of the remaining eye.

Taking the Alginate impression; the Doctor injects the soft creamy mix, with minimum pressure, slowly "flowing" the impression material into any undercuts that may be present, until the cavity is full.

Preparing the stone working mold from which a wax pattern is made.

Pattern being contoured and fitted to the patient's eye socket

The Iris being located on the Sclera part of the Eye.

Earl Hartzfeld, illustrator and assistant to the doctor, paints the Iris with oil pigments. During this process the patient sits directly in front of the artist so that he can work using the good eye as a guide.

Towle trims and polishes the almost completed plastic eye

The complete Prosthesis (or plastic eye) is held in hand for the patient's inspection.

The final phase is completed as the patient poses with new plastic eye inserted.

Four More Rough Foes Block Path of Admirals

Anxious to snap out of their early-season slump and move up in the Potomac River Naval Command baseball league standings, the NNMC Admirals face four more rugged opponents during the coming two weeks.

Next Tuesday, June 14, Quarters I of Washington, D.C., acts as host to the Naval Medical nine on the NNMC diamond, and the Med. Center ball club entertains Marine Barracks, 8th and I Streets, S.E., Washington, two days later on June 16.

Then Coach Charley Harris' men hit the road for PRNC tilts at the Naval Receiving Station in Washington June 21, and Naval Air Station, Wash., Thursday, June 23. The Admirals dropped their league opener to Naval Air, 3-2, here May 24.

With Pat Partridge, regular third sacker, on leave, Harris has shuffled his infield around somewhat and plans to use Bruce Tillman on third and John Swinko at second base. Harry St. Clair stays at short-stop and Husky Lou Kovarik at first.

The outfield is expected to consist of John Garrison, speedy Dental Tech, in left, Jay Bell in center, and Fred Willard or Red Howard in right field.

Dadich, sure-armed Marine, will do most of the catching, with Lefty Dick Cox and Chief Harris bearing the brunt of the pitching burden. Bell will be employed in the role of relief hurler when needed.

In an effort to improve the team's infielding and hitting, Harris has been drilling his inner defense hard on grounders and conducting long batting practice sessions.

Just Before the Battle

Coach Charles "Bucky" Harris of the NNMC Admirals is shown above talking over game strategy with his charges as the Naval Medical nine prepared to take the field for a PRNC game here recently.

Naval Medical Nine Surprises Patuxent River NAS, 4-2

Behind the steady hurling of Lefty Charley Harris, the NNMC Admirals stunned highly-rated Patuxent River NAS, 4-2, here Thursday, for their first victory in six PRNC league starts.

Bearing down all the way, the veteran curve ball artist spaced out nine safeties and struck out 11 men. All but one of the losers' hits were singles. Pat. River scoring lone runs in the second and ninth innings.

Naval Medical garnered only six bingles, but two tallies in the fifth, giving them a 4-1 edge, turned the trick. Jay Bell drove in two NNMC markers with a single and a squeeze bunt, while Chief Gardner rapped out a double and a single.

Tuesday, June 7, the Admirals bowed to NARTU of Anacostia, D.C., 11-10, on the winners' diamond. The Airmen broke a 10-all deadlock with two down in the ninth to capture the contest.

Greenskeeper, Linksmen and Pro

John M. Leavell (above left) is head greenskeeper of the NNMC golf course. He has been a professional greenskeeper for more than 20 years. Two Medical center staff corpsmen (center) prepare to tee off on the first hole. George W. Dillon, HMC, USN, course professional (right) stops while giving a lesson to "watch the birdie." Dillon is one of the top linksmen on the station.

Hospital Nine Leads League

Currently heading the station's intramural softball loop pack is the well-balanced Naval Hospital nine, which has lost only one game.

Sparked by Pitchers Joe Renard and Duane Smiley and First Baseman "Beanpole" Richards, the Hospital club, comprised mostly of Operating Room personnel, appears the class of the league.

Still in contention are Med. School and Dental School, while the N.P. Service outfit is definitely to be reckoned with. In their first start June 6 the N.P. men bowed to Med. School, 17-16, in an exciting, free-scoring tussle.

The Lab students recently forfeited to Commissary's weak team due to a confliction with their schedule in a Bethesda circuit. Wednesday the Hospital and N.P. forces squared off in an important contest, with N.P. winning, 6-5.

NNMC Errors Prove Costly In Loop Play

Committing costly errors at crucial moments, the Medical Center diamond forces dropped two hard-fought PRNC struggles here last week, falling before the Headquarters Marines from Arlington, Va., 6-4, and bowing to Naval Reserve Organized Brigade, Washington, D. C., 10-8.

This ran the Admirals' loop losing streak to four straight games.

Coming from behind with four runs in the do-or-die ninth inning, the Marines ruined a brilliant eight-frame pitching performance by Chief Charles "Bucky" Harris in overcoming the locals here May 31.

His sweeping curve ball working to perfection Harris hurled one-hit ball for eight stanzas, fanning 11 batters in the process. The only bingle off the portly leftie came in the first inning on a long fly to center field which Jay Bell misjudged. It fell behind him for a triple and two runs scored.

Thanks to a four-run explosion in the sixth chapter, NNMC went into the top of the ninth with a 4-2 lead. Then the dam broke.

A hit batsman, base on balls, three-base hit down the right field foul line by Shortstop Pia and another walk routed Harris.

One man was erased at home on an attempted double steal, but Willard's four-base error on a low, sinking liner to right off Bell, NNMC relief chucker, gave the Marines a 6-4 edge and the ball game.

Just 48 hours later the Admirals lost another heartbreaker here on ninth-inning miscues, and this time Naval Reserve copped the verdict.

Lefty Cox of the home nine was battered hard during the four stanzas he toiled, but relievers Harris and Bell held the visitors at bay as Naval Med. wiped out an 8-3 deficit and tied the count at 8-all.

Then in the ninth Harry St. Clair became the goat. He fumbled a grounder and then threw wild to first. Later his throw home to cut off a tally was bad and skipped past Catcher Al Dadich. Another runner streaked for the plate and Dadich put the ball on him, only to drop the pellet.

Center fielder Garrison's perfect throw to the plate on a long fly prevented a third run from counting but the damage was done. Big blows for NNMC were Pat Partridge's two-run homer in the first, and Harris' long double to center in the late innings.

On May 26 the Med. Center nine met with disaster in its initial road jaunt, getting overpowered by the powerful Quantico Marines, 10-1.

Battle Wagons Cop Pin Title

Front runners all season, the steady Battle Wagons captured the NNMC duckpin league championship by five lengths, winning 68 of 102 games rolled.

Second place went to the Tin Cans, who took 63 games while dropping 39. Three teams, the Net Tenders, Tankers and Transports, tied for the third spot with 61-41 records.

The Tugs finished sixth with a 53-44 mark, and the Subs (42-60) and Cruisers (41-61) brought up the rear.

High team game of 563 and top team set of 1,558 both were bowled by the Battle Wagons, with Mr. Kirby of the champs chalking up the best game average of 113.6.

Robey's 199 and Kirby's 193 led the men maple-maulers in spares, while Poole notched 47 strikes, Kirby 45 and Harrington 43. Kirby accrued more honors with his high set of 382 and high game of 156.

Among the women pin-pounders Mary Jane Koiner's game average of 95.75 beat out Lawrenson's 94.19, Jean LeBlanc and Koiner each sported a high game of 130, and Dean's best individual set of 338 was two sticks better than Lawrenson's 336.

Owen connected for 29 strikes and Lawrenson notched 1211 spares, 20 more than were marked up by any other woman.

SHIPS SERVICE

amount of delay.

Perhaps you have noticed along with the pleasant atmosphere, the pleasing fact that prices have taken a tailspin. Many of the former unattainables, such as the good old hot dog, and hamburger are now on sale throughout the day and evening.

If your putting is bad and your

Sportin' Aroun'

By Clyde Schubert

Greetings again, loyal reader. The uncomfortably warm weather we've been having lately has spired me to adopt IT'S TOO DAMN HOT as my theme song and want to go CRUISING DOWN THE RIVER on a moonlight voyage the humid June nights.

The other day ye olde thermometer read just like my golf score—way up in the high eighties. Which reminds me the Potomac River Naval Command links me isn't far off now, and your intrepid columnist has been battling desperately to get his approach shot down pat in preparation for the affair.

As was the case last year, PRNC tourney will be played the arduous Quantico Marine Corps Base course—and that layout more difficult to take apart than Chinese Ring Puzzle.

Ah yes, that reminds me. Didn't know that Satan (of "get thee behind me" fame) isn't a bad golfer. He plays in the low Hades. The pungent pun was contributed by L. McCabe, one of the ace "goon squatters" on our N.P. Service hyarabou.

Early this week the softball edition of the N.P. Gazelles launched their bid for intramural laurels in a "pitchers' battle" with Me School. The future Draulas nipped us at the wire, 17-16—no I didn't say basketball—but a jolly affair was had by all. Not many games (?) teams can take two hours play seven innings.

Getting back to the ancient Scottish sport of golf for a moment, it sure swell to have a six-hole course right here at NNMC. Many thanks to those who made our dream come true.

Earl "Just Call Me Cueball" Denler says when he plays the heavily wooded Medical Center obstacle course he finds himself humming the same tune Charlie McCarthy sang on Mother's Day—TREES.

My new nickname is "Buddy Dope". My favorites in the National League, the disappointing Pittsburgh Pirates, still are bounding about in the lower regions of the loop standings. Right now they're busier than a swarm of bees trying feverishly to make some player deals. Woe is me!

Wonder if the Cardinals will come through—or will it be Boston—Brooklyn—or New York? The Shadow knows! I could use his advice on this Saturday's Preakness Race. FLASH: This filly follows picks Palestinian providing the runs. My horses always seem to think why run when walking is much easier.

Will save a look at the top minor leagues until next time because I'm fresh out of space. Don't forget—the Nats return home on the 14th. As Freddy, my favorite gravedigger says—time to be shoveling off now.

drives dribble just drop in to the new fountain and sweeten your disposition with a cool coke or perhaps a cherry float.

RELAXING on her diving board is Virginia (the Vision) Maye, taking in some sun between "takes" at Warner Brothers' studios.

Lab Chiefs Cited For Service As Instructors

Seven enlisted chiefs received a letter of commendation from Captain M. J. Aton, MC, USN, Commanding Officer of the Naval Medical School here, for their service as instructors at the Medical school. They were, Cloyce P. A. Strome, HMC, USN, Lewis J. Reber, HMC, USN, Frederick R. Henry, HMC, USN, Edward L. Elworth, HMC, USN, William G. Coles, HMC, USN, Erwin G. Allison, HMC, USN, and Eugene S. Alcott, HMC, USN.

The letter of commendation reads as follows: "The Medical Officer in command takes pleasure in commending you for your outstanding services as instructors in the course of Clinical Laboratory Technic at the Naval Medical School, National Naval Medical Center, Bethesda, Maryland.

You have demonstrated exceptional initiative and perseverance in performance of your duties and in maintaining the quality of instruction at a high level. Your energy, ability, and cooperation are highly commendable and reflect credit on yourself and the Navy service."

Captain W. M. Silliphant, MC, USN, Director of Laboratories here, signed the commendation to the seven instructors, on behalf of the Medical Officer in Command.

TJG Sinclair New Personnel Officer of NH

TJG J. E. Sinclair, MSC, USN, recently reported aboard for duty as personnel officer at the Naval Hospital. He came here from the H. Aica Heights T. H., where he served as maintenance officer. Mr. Sinclair was born in DuPont, Pa., where he enlisted in the Navy as an apprentice seaman in 1935. His first duty station was at the Norfolk Training Center where he received his "boot" and Hospital School training. From Norfolk he went to the Naval Hospital, Annapolis, Md., where he launched his real Naval career.

Throughout his 13 years in the Navy, Lt. Sinclair has attended numerous Naval Schools, among them the Pharmacy and Chemistry School and the School of Hospital Administration here at the Medical Center. During World War II he

(Continued on page 2)

Pictured above (left to right) are Cloyce P. A. Strome, Frederick R. Henry, Edward L. Elworth, William G. Coles, Lewis J. Reber, Erwin G. Allison, Eugene S. Alcott and Director of Laboratories, Captain W. M. Silliphant, MC, USN.

Enlisted Personnel Graduate From New M.A.T. School Here

The first class of Hospital Corps enlisted personnel, to be designated as Medical Administrative Technicians, will graduate on July 1, 1949, from the Naval School of Hospital Administration here. The class is composed of 56 Hospital Corpsmen and Dental Technicians.

This new course began October 7, 1948 and combined the former courses given at the School that led to the individual designation of Property and Accounting Technician, Clerical Technician, or Commissary Technician. Future classes of enlisted personnel will convene on the first day following Labor Day and will graduate about June 15, the following year.

The curriculum consists of 44 class hours per week—total 1440 hours. This is the most comprehensive and intensive service instruction course among those available for enlisted personnel of the Medical Department.

Candidates for this course are selected from Chief Hospital Corpsmen and Hospital Corpsmen first and Dental Technicians of corresponding ratings.

HC Handbook Now Being Distributed

(SEA)—Copies of "The Handbook of the Hospital Corps, United States Navy, 1949," are being supplied to all hospital corpsmen in the Regular Navy. Distribution is being made from the Publications Distribution Center, Norfolk, Va. No requisitions for the handbooks are required except as may be necessary to supplement an insufficient initial distribution.

C.P.O. Waiting List Issued With 3,220 Names In 35 Rates

(SEA)—A total of 3,220 first class petty officers are on a waiting list for CPO, acting appointment, and chief steward, acting appointment. They are the persons who passed service-wide examinations last December for advancement but who did not stand high enough on the multiple computation list for appointments.

Now being distributed to all ships and stations are the names and service numbers of these men and women in 35 rating groups who have been placed on a waiting list. The names are listed within each rating according to the final multiple standing within the rating.

Although there are no plans for advancement of personnel on the list, selection for promotion would be made from it if it becomes necessary—or possible—to make any additional advancements before the next competitive examination.

If any advances are to be made, separate letter authorizations will be issued in numerical order within the rating group on the waiting list, according to BuPers Circ. Ltr. 91-49 (NDB, 31 May 1949) which contains the list as an enclosure.

(Continued on page 2)

Naval Medical Center Savings Bond Drive Nears Final Goal

The "Opportunity Drive" Savings Bond Campaign conducted at the Naval Medical Center from June 1 to June 15, was gratifying, according to results released early this week.

Of the 1,643 members of the Armed Forces on board at NNMC, 841 now have savings bond pledges. This represents an increase of 96 over the total of such pledges before the drive, and the percentage of participation among service personnel now is 51.1.

Among the 1,022 civilian workers on the compound, 351 now have savings bond pledges, for a participation percentage of 34.3. Ninety six new pledges were obtained during the recent campaign.

Rear Admiral M. D. Willcutts, MOIC of the Medical Center, and the Navy Department Bond Officer have expressed their appreciation of the cooperation of all hands at NNMC in conducting a successful campaign.

Another bond drive is planned for around October 1 and if the proposed service pay raise goes through another substantial increase in the percentage of participation here is expected.

RADM L. O. Stone Praises All Hands In Farewell Letter

On Thursday 23 June 1949 Rear Admiral Leslie O. Stone was detached from his command as commanding officer of the U. S. Naval Hospital here. Admiral Stone will assume the duties as District Medical Officer, First Naval District, Boston, Mass.

Before leaving for his new assignment Admiral Stone issued a letter of thanks to all hands here at the Medical Center, which reads as follows:

"When the time for departure comes, one may be permitted to risk the danger of sentimentality in trying to voice a word of appreciation and profound gratitude to his friends.

In taking my leave of the Naval Hospital and the National Naval Medical Center and its complement of personnel, it is impossible to repress the nostalgic sense that always accompanies a reluctant farewell.

My tour of duty here has been a happy and satisfactory one, due chiefly to the mature guidance of

Audiences Here To "Jive On Down" With Dixie Jubilee

Audiences at NavMed Center will have themselves a ball on 29 June when the singing-dancing funfest, "DIXIE JUBILEE," takes over the entertainment reins. This Veterans Hospital Camp Shows production presents the gayest and trickiest in dance, music, songs and comedy by top professionals.

The CLAUDE HOPKINS QUARTET is one of the country's foremost playing-singing swing combines. With Hopkins, eminent composer-arranger at the piano, Jimmy McLin at the guitar, Prince Robinson on clarinet and sax, and June Cole on bass, the group will provide accompaniment for the other acts, and will feature in solos several of their numbers which made them famous via Hopkins recordings—"Lady Be Good," "The Blue" and "Three Little Words."

Ex-Coast Guardsman STRUT FLASH, whose furious tap-dancing has made him a nightclub, vaudeville and TV topnotcher, makes his Hospital Circuit debut in this production. His name is also his trademark, for his hoofing combines balance and rhythm with a touch of gymnastics—all in an ingenious style and at a jet-propelled pace.

JOHN W. COOPER, ventriloquist extraordinary, is a veteran of show business. His fifty years on the stages of the country's leading vaudeville "times," in nightclubs and on the air, have established him as one of the most accomplished of the voice manipulators.

THE FOUR STEPPERETTES are an unusual combination of gals who pack into their hoofing the sharp precision of a Music Hall line and the style of skilled solo steppers.

Captain Behnke Lectures In Pa.

Captain A. R. Behnke, Jr., MC, USN, Executive Officer of the Naval Medical Research Institute here, will give a talk on "Research Activities" before the newly formed Volunteer Naval Research Unit at Pennsylvania State College, State College, Pa., on June 28.

Major I. A. L. Millar of the Royal Canadian Dental Corps, Canadian Army Air Force, poses for a News photographer while at work in the Prosthetic Lab at the Naval Dental School here. He finishes a Post Graduate course for officers on July 1.

Canad. Officer Ends Dental Course Here

Major I. A. L. Millar, RCDC, C.A.(A.F.) will complete a Post Graduate course for officers at the Naval Dental School here on July 1.

Said to be a born fisherman, he is a native of Quebec but now a resident of Nova Scotia. The Major graduated from Dalhousie University in Halifax, and practiced in Liverpool, N. S. before entering the Canadian Army in 1939.

Since then he has had duty in England and Northwest Europe as well as in various parts of Canada. He and his wife and two small children drove here from British Columbia in December of 1948 so that he could attend the post-graduate school at the NDS.

In expressing keen satisfaction with the course, Major Millar commented, "the facilities are so good and the school is so well equipped. I am grateful to have had the opportunity to attend."

Baseball Tickets Available To Pts. Through Red Cross

Play ball! This is a familiar cry to many patients here who attend the home baseball games of the Washington Senators. Tickets to these games are donated by Mr. Clark Griffith of the Washington Baseball Club and are distributed to patients throughout the hospital by Red Cross.

Each Tuesday and Thursday night, and Saturday and Sunday afternoons and evenings when the Senators are in town, fifty patients are transported to Griffith Stadium by the Red Cross Motor Corps.

When night games are scheduled, transportation leaves from the ambulance entrance at 1900 and returns to the hospital at approximately 2330. On weekends the trips check out at 1300.

Any patient who has liberty is eligible to attend these games. If you are interested, please see the Red Cross recreation worker on your ward or sign up in Room 102 which is located on the first deck between Wards 3-B and 5-B.

The Dental Explorer

by Bob Thompson

Seen around the Campus . . . Moore, the only Dental Tech who has shipped over in China, praising his ability as a fisherman . . . how long was the big one that got away?

Two new family men, Varner and Shiffman, coming in in the morning just in time to make quarters. . . Stephens, a new father, looking bleary eyed from the night before. . . And Nick also, but not from walking a baby.

Via the grapevine . . . Whiting might be leaving soon from his duties as CMAA to sea . . . That Jere and Dotty are eagerly awaiting the arrival of Chief Harvey for Personnel Work . . . That everyone knows somebody who knows something about the pay bill . . . That we are due for some more Dental Techs, male and female, who just finished school at the Lakes.

A big welcome to Carpenter, a San Diego man, and to the new Prosthetic class which convened Monday.

Failed to mention previously a big blowout some of the men had on the cabin cruiser "Catherine" a while back. They reported a good time although most of them looked like huge lobsters the morning after.

By the way, it is available to anyone in the district merely by applying to the Recreation Officer and the charge is very nominal.

Guess that is it from the Painless Corner so will see you in the next issue. Be sure and get on the Savings Bond Bandwagon.

ARC Field Director Speaks In Cleveland

Miss D. Elizabeth Davis, Red Cross Field Director here, was in Cleveland last week for the National Conference of Social Work. It was a real honor to Miss Davis, and recognition of her contribution to the Social Work Profession, that she was selected to be on the program of this Conference.

The National Conference of Social Work is an annual event where Social Agency Administrators and Workers, Schools of Social Work, and other interested community organizations evaluate progress and trends and consider future goals.

Crews' Library:

Library Now Offers Latest Books For Sports Minded Fans

Some sports enthusiast will never admit that it's too hot for a fast game of tennis or baseball. There are others who prefer lounging in the shade to read all about their favorite game.

New books in the Crew's Library are:

SATURDAY EVENING POST SPORTS STORIES—

Stories about baseball, boxing, football, golf, tennis and horse racing by authors such as Ring Lardner, H. P. Marquand, Corey Ford, James Thurber.

HOW TO WIN AT TENNIS—

Jack Kramer

Kramer has been called the greatest player in tennis today. Through unrelenting practice he has perfected every phase of his game and step by step, with action photographs, he shows the beginner how to acquire skill.

LOW AND INSIDE—

Ira L. and H. Allen Smith

Oddments—episodes—anecdotes collected by Ira L. Smith and written up in H. Allen's own hilarious way. If you're curious about a dead man that once scored a run or the pitcher who tested his bats by biting them; or umpires who used to carry guns, here are the answers.

PLAYER MANAGER—

Lou Boudreau

One of the greatest shortstops in baseball tells of his career and all of the desperate struggle of the Cleveland Indians to win the World Series in 1948.

Tower Topics

by George Royster

WOW! This hot weather we have been having is really getting everyone down. Looks like the only thing to do is to drink copious amounts of that "green death" and try to stay cool. At least now you have a pretty good excuse.

Down at the carnival (KC) Bethesda we saw quite a number of people from the hospital who were eyeing that new 1949 Chevy. One Guy was so sure he was going to win that he even offered us a ride back to the hospital. Needless to say we enjoyed our walk.

I'm really not much of a movie fan but that picture, "The Champion", was a real thriller. Kim Douglas did a fine job of playing the Champ and the feminine scenery was wunnerful. Too bad we don't have more of the same kind of pictures around here.

You can stop reading now—I've got another joke. A moron stood on the street corner with a knife in one hand and a revolver in the other. Said a policeman, "What are you doing?" The moron replied, "I'm trying to make up my mind whether to cut around the corner or to shoot across the street. Take it easy now, that was just a fun."

SEEN AROUND THE CORPUS CHRISTI: "Pearshape" Anderson, the best bench jockey in the PRN baseball loop. Chief Lovelace ready to use the rake and hoe in the flower beds over in front of main quarters. Cars with holes in the windows the size of golf balls.

Everyone trying out new systems as how to get waited on first class service. No startling results so far! Ruth Quire aiming to be the best woman golfer at the NNM links. Our sports editor trying to undermine the fighting Cleveland Indians; love that team. The futurity of learning to play golf.

Every Day Is Commencement

Some students, as they look back over the years which they have spent in gaining their education, regard the idea of their just commencing at graduation time as an insult.

It seems to them a contradiction in terms to have followed for twelve, sixteen, or more years the laborious paths of education only to have that wearying distance referred to as the background for commencement only, with little stress upon it as an achievement in itself.

But truly the end of one hour is the beginning of the next one; the completion of one era, the beginning of another. The child is father of the man. The student is the ancestor of the skilled workman, the homemaker, the citizen.

Nothing is finally finished, nor wholly new. We are what we have been becoming. We are becoming what we shall be.

Subject to change as we ourselves are, what are we to be? What are we to become amid the shifting of thought and ways in these days? Our hope lies in a daring new commencement. It is useless to moan for the old ways. We must help to produce the new age. "Behold, I make all things new."

Soules, HM1; John Latham, Jr., HM1, and Marvin E. Mellor, HM1. Second row (L to R) are Robert H. Carstens, HMC; Jack Madden, HMC, and Harry Alters, Jr., HMC.

CPO WAITING LIST

(Continued from page 1)

The published waiting list is to be cancelled as of 1 Dec 1949 or on the date selected for the next competitive examinations throughout the Navy. The last CPO examinations were held on 1 Dec 1948 from which successful candidates were named for promotion in BuPers Circ. Ltr. 64-49 (NDB, 15 April 1949).

Sinclair New Personnel Officer

(Continued from page 1)

served aboard the submarine "Ship-jack" and made six war patrols with that ship.

The new NH personnel officer likes Bethesda and believes that his duty here will be pleasant. The affable lieutenant already has made many friends here, and with his pleasing personality he is sure to be well liked by officers and enlisted men alike.

Medical School Laboratory Isolates Rare Bacteria

On May 19, 1949 a patient was admitted to the Naval Hospital with meningitis of unknown origin. In order to definitely establish the cause of the disease a spinal tap was made and a specimen of spinal fluid was sent to the Bacteriology Department for study. Microscopic examination of the specimen showed the presence of bacteria. When the specimen was inoculated upon nutritive mixtures, and allowed to grow at body temperature for twenty four hours, further evidence was obtained. Definite growth of the bacteria was seen.

Another microscopic examination revealed that this growth was similar, if not identical, to the first bacteria noted. With this to work on the bacteria were re-grown upon special and differential media. Also, special biochemical and physical studies were carried out so that exact identification would be possible.

Simultaneously, the bacteria were injected into experimental laboratory animals to determine what effect, if any, the bacteria would have on these animals. Rabbits and white mice were used. From all of these studies the evidence was accumulated and given evaluation. Initial identification pointed to a bacteria known as *Listerella Monocytogenes*. This organism has been reported as the causative agent in about twenty to thirty cases of meningitis with a known mortality of seventy per cent. These cases showed no sensitivity to the antibiotics such as penicillin and streptomycin. This particular organism was sensitive to both penicillin and streptomycin at certain levels. Thus, the treatment was instigated to maintain these levels in the patient in order to combat the organism. That this was done successfully is shown on the patient's clinical chart. The patient was discharged from the hospital on June 11 as well.

In the picture on the left (above) blood agar plates (a solid bacteriological media) are being poured under sterile conditions. The flame will be used to kill any air-borne bacteria which might fall on the media while it is being poured.

The specimen of spinal fluid (above) is being streaked upon a blood agar plate in order to determine whether or not any organisms are present. At the end of twenty-four hours definite growth could be seen.

The inoculated blood agar plate (above right) is being placed in an air tight jar prior to being put in the incubator which is kept at body temperature. The candle burns using up oxygen and increasing carbon dioxide in the jar. This aids the growth of most pathogenic bacteria.

Lab Tech. Myers (left) examines special tests and records the results in his protocol. The identification of an unknown organism sometimes requires several series of tests.

Myers (right) is seen selecting media for special tests from the storage refrigerator where all of the prepared bacteriological materials are kept at cold temperatures.

The enlisted men in the Bacteriology Department of the Medical School are, (left to right) Harry R. Fallers, HM2; Frank H. Spofford, HMC; Donald M. Myers, HM2; and Douglas G. Draper, HM3. These men are under the supervision of Captain D. H. Davis, MC, USN.

A mouse (above) is inoculated with the unknown bacteria to determine the virulence or ability of the bacteria to cause disease. This particular organism was proven to be highly virulent.

Donald M. Myers (right) is seen with a plate of the organism which rarely has been isolated and identified from cases of spinal meningitis. The name of the organism is *Listerella Monocytogenes*. Myers found the organism in a specimen of spinal fluid taken from a patient suffering with meningitis.

Medical Center Nine To Battle Quantico, Other PRNC Foes

Our luckless NNMCM Admirals run into the hottest article in the Potomac River Naval Command baseball league Tuesday, June 28, when they clash with the power-laden Marine Corps Schools outfit from Quantico, Va. on the Naval Medical diamond.

Currently undefeated in PRNC battling, the hustling Quantico nine is heavily favored over Naval Medical's "hitless wonders." NNMCM bowed to Quantico, 10-1, in a previous meeting.

One day before the Quantico tilt, the Admirals entertain Marine Barracks, 8th and Eye Sts., Washington, D.C., on June 27. That game originally was scheduled for June 16, but had to be postponed because of rain.

The following Thursday, June 30, Coach Charley Harris' proteges journey to Arlington, Va. for a loop tussle with Headquarters Marines, early-season 6-4 winner over the Admirals.

Then come a pair of contests with weaker foes. The NNMCM ball club faces Naval Reserve Organized Brigade, Washington, D.C. on the Receiving Station diamond July 5, and plays host to Naval Air Reserve Training Unit (NARTU) of Anacostia, D.C. two days later.

The Reserve Brigade holds a 10-8 decision over Naval Medical, while NARTU nipped the Med. Center,

11-10. The locals saw both those games get away in the fatal ninth inning.

Jay Bell, leading hitter on the team with a .291 mark in PRNC competition, is now on first base, John Swinko back at second, Lou Kovarik has moved to shortstop, and Harry St. Clair now mans third. Thus, Kovarik and St. Clair have shifted positions.

Fighting it out for outfield berths are John Garrison, Fred Willard, Chief Gardner, Pat Partridge, and Lefty Martin. So far Garrison's .277 is the second best batting average on the club, with Bruce Tillman's .272 good for third.

Quarters I of Washington nipped the Admirals, 5-4, here on June 14. A three-run eighth inning NNMCM rally fell one tally short of tying the count.

Jay Bell, whose mighty triple to deep right field with none out had sent home the fourth marker, was left stranded as Dadich, pinch-hitter Harris and Partridge all struck out. It was NNMCM's sixth setback in seven league tiffs.

Paxton Awarded Citation

Arthur W. Paxton, HMI, USN, is pictured above about to receive the Navy Unit Commendation ribbon for his service aboard the USS HARRIS during World War II. Paxton received the award on June 14. Presenting him with the award is Rear Admiral Leslie O. Stone, MC, USN, then acting MOIC of the Naval Medical Center. (Photo by McClain)

Sportin' Aroun'

By Clyde Schubert

What a life! The weather kept getting hotter and hotter and do Royster's beloved Cleveland Indians, while my favorites, faltering Senators, are beginning to fade off the pace.

Five American League teams, Yankees, Tigers, Red Sox, Athletics and Indians, all are challenging fiercely for first division spot this time, but (SOB!) them droons (?) Nats are having much trouble.

Sunday afternoon this writer watched Virgil Trucks and F. Hutchinson make the Senator batters look like bush leaguers. The locals couldn't shove a run across in 18 innings of trying, and the other hand the Bengals rapped the pill to all corners, but off

Reminiscent of Mickey Vernon feeble stickwork with the Griffs, I summer was the futile swinging Eddie Robinson. Senator big and supposedly the top first sacker in the A.L.

Over in the National League Phillies are moving faster than brush fire, but Boston, Brooklyn, St. Louis and New York are very much in contention. My p-Cubs—shed a tear for Frank Frisch and the rest of the Bruin club.

Four Medical Center linksmen were slated to participate in the PRNC golf meet at Quantico last week. For info on how the NNMCM team made out see Bill B or Chief Dillon.

Here's hoping more enlisted men start using the NNMCM golf course. It only costs 25 cents to play all day and you just have to furnish balls as the Rec. Dept. will supply clubs.

One of the chief reasons our hardball team has lost so many close games has been the woe lack of clutch hitting. Some of the regulars' averages are atrocious, one "slugger" even pounding a ball at a .062 clip.

Many times the strategy employed in various situations may have seemed a trifle questionable but weak hitting has done great damage than anything else.

This columnist hopes, however, that if some of the first stringers persist in their poor work at the plate that other prospects will be given a try. On a losing team even one should get a fair chance at changes should be made continually until a winning combination is found.

I WONDER: Why "Muscle" Schroer doesn't get that Lab. ball team of his on the ball—how "Jo" Glunz's Midnight Golf has been coming lately—why everyone knows but no one boosts around this play—who's tough enough to stand against "What A Man" Gearhart HMC. "Shanghai" is the Naval Hospital adonis.

What's this we hear about the nurses playing softball over in their quarters? You just can't be co-educational competitive sports. Since our nurses correspondent was FORCED to resign from the staff we don't hear much about "Nightingales" anymore.

Ralph Dalessio just came brandishing a saber. He said something about reviewing the troops and "on to Stalingrad." Guess the heat's getting everybody.

Here's my parting thought for this time. Stay Loose. Must dash off for a quick swim now—Splash!

Wave Whisps

By Betty Bookis

Hi again, guys and gals. Here we go with another column.

Been noticing scads of beaming faces around lately. 'Spose everyone's highly elated about all this "overseas" business finally coming to light. Incidentally, WAVES in the very near future may, upon request, be assigned to England, Alaska, Hawaii, the Canal Zone, Puerto Rico or the Marianas. Wonder how many of us'll be around this time next year, if such be the case.

Congrats to Margaret Bosco on the recent promotion. (What's your secret, Peg?) . . . Anyone even remotely interested in swatting a golf ball—kindly contact Ruth Quire, for Heavens sake . . . Ruthie, by the way, informs us that Pat Smith's still on the sick list. (Now see what my little ol' column's gone and done! Tch! Tch!)

Adrienne Martal has up and flown the coop—this time—off to Quantico for duty . . . Strictly confidential and under your hat, NNMCM now proudly (?) boasts of 22 enlisted WAVES—all seen and accounted for.

The threesome who reported in the other day were Nadine Calhoun, HMI, Betty Barley, SA and Gloria Supino, SA . . . What's this? Do we hear wedding bells or just rumors about a couple of the local belles? Leave us not knock each other out gettin' to the altar, hear?

Apologies to Buettner who absolutely DETESTS beep bop. OOPS—sorry, my mistake! . . . Once and for all, the rating badge is JOURNALIST STRIKER—quill and SCROLL, that is.

Now 'nuf's enough, printshop . . . Speakin' of print, what happened to all the library magazines? TWENTY EIGHT, mind you, have mysteriously evaporated into thin air! Going into business, somebody?

Intra. Golf Tourney Scheduled For July

Here's a chance to demonstrate your prowess on the golf course.

An intramural links tourney is in the offing. Plans are being made to start a station tournament around the first week in July.

A handicap will be assigned each shotmaker. The size of the handicap given each player will be based on his or her average score for the six-hole NNMCM layout.

Plans Laid For Second Half Softball Play

Next week play will get under way in the second half of the NNMCM intramural softball season, with the Naval Hospital and Med. School nines cast in the role of favorites.

A six-team loop is being set up for the second half, with Hospital, Lab. School, N.P., Dental School, Commissary and Med. School Lab. expected to comprise the circuit.

Unofficial first-half champions are the Hospital sluggers, who dropped only one contest. That was a 6-5 upset loss to N.P., and the titleholders have vowed to gain revenge for that one.

Dental School edged out N.P., 12-11, Hospital soundly whipped Med. School, 8-2, and N.P. socked Commissary, 12-3, in other recent contests, as the first half ended.

There were many forfeits during the first half as three clubs quit the league. Physical Medicine and EENT dropped out unexpectedly, while Annex Two's colorful team fell apart when all the Steward Mates living there were suddenly shipped out.

It is hoped that a double round-robin schedule which will find each squad tackling every opponent twice, for a total of 10 games, can be worked out. Games will be played on all weekday evenings except Fridays.

RADM Stone Departs

(Continued from page 1)

Rear Admiral Willcutts, Commanding Officer of the National Naval Medical Center, and to the professional competence of my colleagues in the field of medicine.

At the same time it is almost an impossibility to measure the ready cooperation of the Medical Service Corps; the patient labor of the Nurses, Waves, and Corpsmen; the untiring zeal of the Chaplains; the unstinted service of the Red Cross and Grey Ladies; and the efficiency of the civilian personnel.

I deem it a privilege to have worked in such an atmosphere of friendly and cooperative activity; in an environment that has contributed greatly to my own personal success; in surroundings that have been an inspiration to all who have come in contact with the National Naval Medical Center, and which have formed another chapter in the glorious traditions of the Navy.

Navy Women In White

Shown above are five neophyte Navy nurses who recently reported here for duty. Currently undergoing their indoctrination course are, First Row, (left to right) Barbara Ann Fredette of Washington, D.C., Dorothy Louis Gero of Boston, Mass., and Marie Jean Keiss of Garden City, N.Y. Second row, (L to R) are Dorothy Marie Culbertson of Chicago, Ill., and Helen Elna Jarvi of Detroit, Mich. (Photo by McClain)

Khaki Raincoat Authorized For Wear By Officers, Chiefs

The Navy Uniform Shop representative at the Medical Center has received notice to submit orders for the newly authorized khaki raincoat for officers and chiefs:

"The garment shall be a nylon raincoat weighing approximately twenty ounces, of the standard khaki shade, water-repellent material, double-breasted, single row of five 45-line plain khaki-colored buttons down each forepart, and shall have convertible collar similar to overcoat.

"It shall be loose fitting, full

skirted, length one-third the distance from the kneecap to the ground, full belt fitted with a khaki-colored buckle, and shall have a shoulder strap on each shoulder fastened at the collar end by a 22½-line khaki-colored button attached to the raincoat."

Estimated delivery date at Bethesda is four weeks—cost \$25.00.

Vet. Camp Show 'Gay Nineties' Will Play Here

The old-timers will take over the entertainment reins at the NNMCA Auditorium on July 20, and with the song, dance and comedy of "GAY NINETIES" will recreate a turn-of-the-century variety show. It is now a fond memory to father and grandfather.

To the "youngsters," this Veterans Hospital Camp Shows production will be a show-casing of entertainment material and talent that can still charm in the days of movies, radio and TV.

Emceed by WILL OAKLAND, veteran of World War I, this nostalgic revue recreated the days of the great minstrel and vaudeville circuits. WILL, whose voice was among the first to popularize phonograph records, and in the early '20s established him as radio's "King of the Air," will sing the songs that have become as sweet as cider and as traditional as the Saturday night dunking.

LILLIAN ASHTON, who entertained for the troops of two World Wars, and established an international reputation for her comedy songs and patter, demonstrates through her repertoire of English, Scotch and Irish comedy numbers, the charm and the talent that made her "grandfather's pin-up girl."

Procedure For Entry of Alien Wives To U.S.

(SEA)—Before alien wives of Navy men may enter the U. S., requirements must be fulfilled. This caution is issued to naval personnel who contemplate requesting permission for admittance to the U. S. of their alien wives or prospective brides.

See your commanding officer first, as CO's of ships operating in foreign waters are kept informed of latest regulations, which vary from time to time.

Get advice from the nearest American consul's office, stating that is desired and requesting information on necessary procedures.

Procure an affidavit from an interested party in the U. S. indicating that living accommodations are prepared for the alien wife and her care.

Navy men also are reminded that only the first three pay grades (EPOs, PO1s, and PO2s) are entitled to government transportation for their dependents and only in connection with a change of permanent duty station.

Speakers at the recent graduation exercises for Dental Officers were: (left to right) Chaplain H. Grady Gatlin; Rear Admiral Clemens V. Rault, DC, USN; Brigadier Harold E. Tabor, C.B.E.; Captain Louis D. Mitchell, Jr., DC, USN; Dr. Daniel F. Lynch, and Rear Admiral Morton D. Willcutts, MC, USN.

Medical Department Captains Being Retained

President Truman on June 25 signed Public Law 131, which amends section 312 of the Officer Personnel Act of 1947, to provide for the retention on the active list of certain officers of the Navy's Medical and Dental Corps.

Under the 1947 Act, Staff Corps captains who had completed 31 years of service faced the possibility of involuntary retirement.

The act specified that only 22 officers in the Medical Corps and 12 in the Dental Corps from this group could be recommended for continuation on the active list by a selection board and could only be so continued until the report of the next succeeding selection board was approved. The remainder were to

(Continued on page four)

Chief Whiting Transferred

Chief Whiting, M.A.A. of the Naval Dental School here for more than two years, has received his orders. In the near future he will report to the West Coast for further transfer to Guam.

On Monday, June 27, Whiting was given a meritorious mast for his services while acting in the capacity of the school M.A.A. since January 1946, when he reported aboard at NNMCA.

Also, on Wednesday, June 29, at the Dental Quarters, he was presented with a leather briefcase by the personnel of the school, as a token of their appreciation of the excellent work he has done here.

The staff of the NEWS joins many others in saying, "Farewell, Chief Whiting; we wish you the smoothest of sailing."

Naval Dental Officers Complete Post-Graduate Course Of Instruction

Graduation exercises for dental officers completing the six months post-graduate courses and the special two weeks course for Reserve dental officers were held in the main auditorium of the Medical Center on Friday, July 1.

Ten officers of the Naval Dental Corps and one Royal Canadian Dental Corps officer completing the six months courses, and thirty-eight Dental Corps Reserve officers completing the special course were awarded certificates.

Speakers for the occasion were Rear Admiral Clemens V. Rault, DC, USN, Assistant Chief of the Bureau of Medicine and Surgery (Dentistry) and Chief of the Dental Division, and Dr. Daniel F. Lynch, Reserve Consultant to the Surgeon General of the Navy and Member of the Medical Advisory Committee to the Secretary of Defense.

The certificates of graduation were presented by Rear Admiral M. D. Willcutts, MC, USN, MOIC of the Naval Med. Center.

History of ABC Warfare Studied By NSHA Class

A new course has been added to the curricula of the Naval School of Hospital Administration here.

The senior class (class 10) attending the school departed July 4 for the Chemical Corps School, Army Chemical Center, Edgewood, Maryland, to receive two weeks intensive indoctrination in the history of ABC warfare. This is the first class in the history of the school to receive this type of instruction.

The class, composed of 26 Medical Service Corps and Hospital (Continued on page four)

160 Vacancies Now Exist In Medical Service Corps

The Surgeon General of the Navy has announced that 160 vacancies exist in the Medical Service Corps.

Qualified civilians are eligible for appointment in the Pharmacy, Optometry and Allied Sciences sections. The grades of Ensign and Lieutenant (junior grade) are open for both male and female candidates who may apply for these appointments. Of the 160 vacancies, 50 are in the Pharmacy section, 10 in the Optometry section, and 100 in the Allied Sciences section.

Waves Plan Big Reunion

(SEA)—The seventh anniversary of the Waves will be marked by the third annual national reunion to be held in Boston 30 July. Active duty personnel, officer and enlisted, as well as former Waves now in civilian life are invited. For information concerning reservations and other details, Waves may write to Waves Reunion Committee, Box 302, Back Bay Post Office, Boston 17, Mass.

Army, Air Force To Adopt Navy Pay System July 1

(SEA)—Back in the latter stages of World War II the Navy introduced a new method of paying its officers and men. Intervening years have proved it to be an efficient and less cumbersome pay system.

Now, that system is to be employed by the Army and Air Force. Commencing 1 July, the Army and Air Force put into operation pay systems patterned after the Navy's tested one which permits sailors, soldiers and airmen to draw their wages promptly anywhere in the world.

As in the case for naval personnel, pay data of airmen and soldiers is to be centralized on a single pay card. The serviceman can draw all his money, or only what he needs and let the remainder stay in his "drawing account" if he so desires. His pay card will accompany him upon transfer.

Capt. Hogan New M.O.I.C. Of Hospital

Captain Bartholomew W. Hogan, MC, USN, now is Commanding Officer of the Naval Hospital here. On June 23 he replaced Rear Admiral Leslie O. Stone, MC, USN, who was detached as of that date.

The affable 48-year-old medical officer had been Executive Officer of the Naval Hospital since June 27, 1947.

A psychiatrist, Captain Hogan has nearly two and a half decades in the Navy Medical Corps behind him.

Dr. Scanlon Studies E.E.G.

LCDR. W. E. Scanlon MC, USN, reported aboard June 25 for the annual two week Naval Reserve training cruise.

Dr. Scanlon, a member of the staff at Duke University Hospital, is attached to the Electroencephalography department of the Naval Hospital.

He came into the Navy in 1940 and during World War II served on the USS ALABAMA (BB60) in the Pacific Area, and was on the staff at the Naval Hospital here.

Dr. Scanlon now makes his home in Durham, N. C., with his wife and three children.

Naval Personnel Share In NSLI Dividends

By Ships Editorial Association

Naval personnel who will share in a \$2,800,000,000 special National Service Life Insurance dividend will be able to get application blanks from their commanding officers probably sometime in August or shortly thereafter. Arrangements have been completed between the Navy and Veterans Administration for distribution of the forms to all naval district and river command commandants, and major fleet commands for further distribution to ships and stations throughout the world.

Suitable announcement will be made when the application forms are ready. Naval personnel on active duty in continental U. S., like naval and marine Reservists on inactive duty and veterans, may also get the applications from any post-office, veterans' organizations or VA office.

Up to Individual

Once eligible personnel have received the three-fold card, the rest is up to the individual. The form, expected to be distributed next month, contains blanks for policy or ex-policy holders to fill in his full name, service number, insurance policy numbers and address.

One third of the card, which contains instructions, will be retained by the serviceman with the other two portions being mailed to the VA. The VA in turn will return the acknowledgment portion of the card

to the servicemen to inform him that VA has received the application.

Letters should NOT be written regarding the dividend payments, it has been emphasized. Any letter writing would only serve to delay processing the applications.

Average Payment \$175

About 16,000,000 World War II veterans and active service men and women will be eligible to receive the dividend. Amounts individual veterans will receive are not yet known as individual calculations have not been completed, but it is believed the average payment will be approximately \$175.

Carl R. Gray Jr., Administrator of Veterans Affairs, said that he "hoped distribution of the checks could be started sometime in January.

Children Are Fun

Arnold Hildebrandt, HA, hands one of the many small patients on Tower 6 a glass of orange juice during his daily work on the children's ward. Hildebrandt, a tall, handsome, blonde-haired corpsman, hails from Arlington Heights, Illinois.

CDR Frates Named Athletic Officer Here

Commander "Coach" F. E. Frates, Jr., DC, USN, has scored again. On 28 June 1949 the effervescent Navy Dentist was officially design-

nated as physical training and athletic officer of the Naval Medical Center.

It is expected that CDR Frates will soon install a full scale physical fitness program for staff personnel of all activities at NNMC. It looks like mighty grim days are ahead, men.

Slumber Time Guy

Shown sawing wood (baby size) in the above picture is Michael Denis Baranski. Born here on April 12, he is the son of Joseph Baranski, HMC, USN, and was five weeks old when this photo was taken.

Movies Shown On Wards By Hospital Patients

A familiar sight along hospital corridors is a 16 mm. movie machine being pushed by a patient to assigned hospital wards. This means that some bed patients are going to see a movie.

Wave Whisps

By Betty Bookis

Don't look now, but ol' "Bell-bottom" Bookis is at it again—just snoopin' aroun' . . . meandering up and down passageways in search of news . . . dropped in to see Ruth Flora on Ward 128—nuthin' cookin' . . . lounge deserted.

Oh yes, Pat's up and about—concentrating on San Diego, I spect . . . and Margaret Heinzman is carrying on all by her lonesome over at Phys. Med.

Bumped into Guard Mail Bransford who, incidentally, isn't a WAVE. Thought I oughta' mention his neat appearance, that's all. Have ya' ever seen the guy when he didn't look as if he'd just stepped out of a handbox? The same goes for Rose's slick shoeshine. How d'ya do it, Joey?

Sorry to hear about the transfers. Will miss LCDR Diehm and LT Dalier, both off to far away places—and Father Fay too . . . Speaking of traveling, that Hill girl oughta' be back by now. Pretty lucky, gettin' a hop all the way to her ol' Kentucky home!

Say, the "Rotation" plan for WAVES sounds good, doesn't it? According to Capt. Hancock's talk over at Quarters "B"—it won't be long now—WE'LL ALL BE GOING TO SEA!

Oh no! Has Nausedas moved AGAIN? Egad—THREE times she has done it! Landlady trouble, more than likely. Ardent bridge enthusiasts frequenting the "Y" Cottage might do well to investigate Record Office's Nadine Calhoun. Me thinks the Iowa girl is capable of giving 'em some mighty stiff competition! . . .

Joy Shrader's too busy for swimmin' these days—studying for 3rd class, ya' know . . . Vicki MacVicar, another fellow "boot," leaving Ward 126, reluctantly, that is . . . "Sarge" and Rush still struggling to keep their heads above water and out of study hall . . . And what's this—Gussie OFF NIGHT DUTY? Oh happy day! Let's celebrate!

That's about all. See ya' later, folks.

Each week twenty-two movies supplied by the Red Cross are shown on wards. These are scheduled with approval of the ward medical officer at a time most convenient to each ward.

Movies seem to be a favorite type of recreation judging by the frequent telephone calls that come from patients inquiring about the title of the movie and what time it will be shown on a particular ward.

These movies are shown by hospital patients, with occasional aid from the staff. Some patients are experienced projectionists, but many only recently have learned how to operate our RCA machines.

Rarely do projectionists fail to report to show a movie at the time it is scheduled. Often they give up hours of liberty in order to show a picture on a ward which otherwise would miss seeing it.

They truly merit praise for the splendid job they are doing.

The Dental Explorer

By John Garrison

Not long ago rates again were being passed out at the Dental School as Varner, Wells, Porter and Harry were promoted to second class, and Peters made third.

To the Dental officers who completed their post-graduate course at the school last Friday, July 1, we'd like to say "congratulations and so long;" incidentally, the reserve officers also finished their two-weeks course on the same date.

Staying here as staff from the post-graduate class are CDR Kaires and LT Peters. Welcome aboard, gents.

J. E. (Hosey) Pohler will be discharged from the Navy on the 11th, and this reporter gets out today. Back off leave are B. B. Allison, DT3, and A. G. Benton, DTC.

Your regular Dental correspondent, R. L. Thompson, DT3, still is enjoying his "vacation" down Mississippi way.

Bob will be back on his "bur jockey" beat next time, and I'm glad to have had the pleasure of subbing for him. Well, time to shove off for Georgia now—goodbye and best of luck to all.

Crews' Library

Msgr. Sheen's 'Peace of Soul' Now In Library

A sampling of the newest book in Crew's Library shows, as always, the variety of reading tastes which we cater:

For light reading we recommend *PLEASURE ISLAND*, a novel by William Maier; imagine a tropical island Paradise where 1200 Marines and 500 Seabees find a gentleman the old school and his three beautiful daughters.

For the serious minded there's *Msgr. Sheen's PEACE OF SOUL*—a Message of inspiration for troubled who are beset by men and conflict and frustrations.

Clyde Davis' newest is *PLATE TIME IS OVER*, the story of a dietician of fortune, lover of women, man of action, whose career included participation in three wars afloat and ashore.

HUNTER'S HORN by Arnold captures all the sights and sounds of a little world in the Kentucky Hills. Hunts, fires, parties, brawls are described with ear-splitting humor and affection.

TOMORROW WE REAP continues James Street's story of the Doney Family. The story begins in 1893 with the scene, Lebanon, Mo. and it is fast moving and romantic.

Tower Topics

by George Royster

From what we hear most of the crew spent an uneventful 4th of July. Pay day just couldn't seem to fall on the right day. But take heart, men; maybe Labor Day will bring better things.

★ ★ ★

The Commissary crew is in line for a tip of the hat from all of us. They are the only group around here who show enough interest in having parties for the whole crew. So, to Petrillo, Dunlavy, Holman, McCarty, and all the rest, a very low bow.

★ ★ ★

Some of you music lovers who also night owls, might tune in on Eddie Gallaher's "Moon Dial." It starts at 11:25 p.m. on WTOP, playing most of the current top records, and also has a fine selection of "Oldies."

★ ★ ★

TEEING OFF: Chief "Bo" Dillon is the number one man on the N.N.M.C. links. His Par 23 for six holes is still the best effort turned in yet. Here's a real challenge for some of you better golfers to lower that mark.

Greenskeeper John Leavell is having a tough time trying to keep the greens in top shape. With no rain in many a moon, the carpets really are being "burned up," literally that is!

★ ★ ★

Bill (cat o' nine tails) Butt, our esteemed editor, just gave me the word. Best I get this over to the office pronto. Keep the ice cubes handy and "play it cool." See you at the local "pub." Ding-How!

Can't Build Your Future Like This ► but Constructively Speaking, How's This?

"Sure, I've been around. Just call me 'Joe.' There's not much I haven't seen or done! I've hit every port from New York to Hong Kong. I've bought enough beer to float the 'Mighty Mo.' Good time Charlie, that's me. Money—why save it? You can't take it with you, that's what I've always said.

I can't see being like that kid Bill who was always chipping his teeth about saving a little dough to buy a home and raise a family. I wonder how he made out? He's probably just like me, in love but broke. What's that old saying aboard ship? 'The Golden Gate in '48' and the headline in '49'. Yeah, that's what it amounts to in my books."

★ ★ ★ ★

There was nothing sharp about "Bill," he was just an everyday American. He was the kind of a guy you might meet in any big city or small country town.

It was aboard a Tin Can that he met "Joe," a guy with personality. At their first meeting, Bill was doubtful about Joe and his bragging all the time.

However, after a few months at sea they became better acquainted. On the nights when they both stood the 12 to 4, Bill would try to lead Joe on to tell a little about his past, and what he expected to get out of life.

Usually Joe would make a big joke out of it. But, when Bill began talking, he always spoke seriously about the future. He was thinking of Ann, the little blonde back home. He wanted to marry, raise a family and have a little security to boot. "That's what I'm out here for," Bill would always say.

Well, Bill got the little blonde and the cottage too. He had enough foresight to save for the future, by taking out a savings bond every pay day. Look ahead! Which will you be, "Joe" or "Bill"?

Sportin' Aroun'

By Clyde Schubert

Oh, somewhere a band is playing, and the children sing and shout. But, there's little joy at NNMC, where the athletes are left out—in the cold, that is.

Chief Charley Harris, coach of the Medical Center baseball team, gathered his men together for a road game last Tuesday afternoon, and when all the noses had been counted it developed that a grand total of nine players (including himself) were on hand.

As Jimmy Durante would so aptly phrase it, "What a revoltin' development" that was. But the boys went along to the Receiving Station for the contest—and lost—after managing to carry a one-run lead into the eighth inning.

It was a pretty fair display of pure, unadulterated GUTS — yes, that's the vulgar, shocking word I employed—GUTS!

You see, one of the regulars had the watch and couldn't get a stand-by—that's always happening to our teams around here. Another player, for some reason, had chosen to go swimming instead of playing—and still another had quit the team in disgust because he didn't get to play in a recent fracas.

This particular performer—gentle reader—was pounding the ball at a tremendous clip—something less than .100 at best—and hadn't been showing any hustle whatsoever in the field—and was benched—so he dropped the sport.

But wait a minute. Maybe he was stupid to have stayed out for the team as long as he did. And perhaps a good swim does beat being a member of an NNMC varsity athletic team.

Yes, maybe they all should have given it up as a bad deal long ago. You think so? Well I don't. And here's why.

The mere handful of fellows who are sticking out a terribly disappointing and disillusioning baseball season to the end are 4.0 in my book.

Men like Kovarik, Swinko, Cox, Gardner, Willard, Martin, Bell, Dadich, Garrison and a few others have been playing because they love the sport and would like to see NNMC win games—and have stayed with it despite what seems to be a rather obvious attempt to stifle the competitive spirit.

Perhaps this writer is dead wrong in the foregoing statement — and maybe, too, the fact that any individual who has the fortitude to help try and get the athletics here back on their feet is scorned, ridiculed and too often lied about behind his back means nothing.

Many persons on this station indulge in about as much extra-curricular activity, so to speak, as a Zombie might.

Yet they always are the ones who try feverishly to tear down, by malicious word-of-mouth maneuvering, what little good others have, through great efforts, succeeded in doing.

The Admirals' home games, it would seem, are of such infinitesimal importance that they aren't even worth publicizing in our Daily Bulletin.

Rather than working together we keep pulling against one another—if ever we are to have the sort of teams this station is capable of producing then we must face the facts squarely and proceed to take constructive steps toward the remedying of the situation's various ills.

I sincerely hope that someday—someday very soon—matters will be straightened, and that our plea (and I speak for many, not myself alone) will not be ignored.

Eyeing The Fence

Pictured above just before they took the field for a recent home game are five members of the NNMC Admirals. They are, left to right, Sam Gardner, John Garrison, Fred Willard, John "Tiger" Swinko, and Cloutin' Cliff Kovarik. Garrison was discharged from the Navy today.

Naval Medical Ball Club Encounters Rough Going

You guessed it. The news about recent Naval Medical doings in the PRNC baseball league isn't good—but at least it's quite interesting. Here's how the Admirals fared in six recent games.

1. Tuesday afternoon, July 5, Naval Reserve Organized Brigade shelled Jay Bell, NNMC twirler, from the mound with a five-run explosion in the eighth inning, thus overcoming a 4-3 deficit and romping home with an 8-4 victory.

Charley Harris finally came in to put out the fire. Lefty Martin's timely single with the bases loaded in the seventh earlier had driven in two Med. Center runs.

2. Although Bell scattered 11 enemy hits rather effectively, his mates couldn't score at all as Headquarters Marines of Arlington, Va. blanked the Admirals, 2-0, at Fort Myer June 30.

3. Quantico battered Charley Harris for five tallies in the fifth stanza as they shut out the locals, 8-0, here June 28. Pitchers Kohler and Russo restricted NNMC to four safeties. The contest was called at the end of six frames because of darkness.

4. Naval Medical captured an 11-inning marathon struggle from Marine Barracks, Wash., D. C., 16-15, here June 27. NNMC scored nine times in the first inning and blew a four-run lead in the ninth. The endurance contest lasted almost four hours.

5. Unable to get anybody out in the fatal ninth inning, the Medical-men dropped a 15-14 slugging match to the Anacostia, D. C. Airmen at the Air Station June 23. The victors pulled it out of the fire with five tallies in the final session as NNMC's Bell picked a bad time to run out of stuff.

6. Charley Harris' comedy routine, both on the hill and at the plate, stole the show as the Receiving Station rallied for two runs in the ninth to edge out Naval Medical, 12-11, on the winners' diamond June 21. Al Dadich, NNMC catcher, was ejected from the game, for arguing, by the plate umpire who "should have stood in bed."

That's all—well, isn't it enough?

MED. DEPARTMENT

(Continued from page one)

have been placed on the retired list on June 30, 1949.

The new law provides that a certain number of captains, to be determined by the Secretary of the Navy, shall be continued on the active list to meet the needs of the service.

There are at present over 40 officers in the grade of Captain in the Medical Corps eligible for recommendation for continuation on the active list.

Doctor True Takes Blind Bogey Honors

The first tournament to take place on the six-hole NNMC golf course was held over the July 4th holiday weekend, with 45 links enthusiasts participating in a Blind Bogey affair.

Winner of the tourney was Dr. W. R. True of the Hospital's EENT Clinic who had a net 18-hole score of 75. Three others also finished with totals of 75, but Dr. True took top honors by having the lowest handicap, 10 strokes, of the four.

Others who ended up with 75 were C. J. Eastman, G. C. Smith and Ruth Quire. Eastman's handicap was 12, while Smith's was 25 and Quire's 40 strokes.

CDR W. D. King had the low gross score for the 18 holes of medal play with a 77, eight over par. Hot on his heels came W. R. Butt with a 78.

The NNMC golf team is slated to play a Federal Golfers Association match at Argyle Country Club today. Regular members of the Naval Medical squad are George Dillon, John Level and Bill Butt, all of whom consistently shoot near-par golf on the local layout.

Med. Illustration Students Graduate

Walter E. McLaughlin, HMC, and James P. Walsh, HM3, were graduated on July 2 from the Medical Illustrating class of the Naval Medical School. Both received certificates designating them as Medical Illustrating Technicians.

The six months' course began January 1, 1949. Otho Hon, HM2, was the instructor in charge of the course which taught methods and techniques dealing with medical illustrating for publication and teaching purposes.

Chief McLaughlin has received orders to report to the Naval Medical Research Unit Number Three at Cairo, Egypt, while Walsh has been assigned to duty at the Naval Medical Research Institute here.

Undermanned Admirals Face Last Four Foes As Loop Season Ends

What once gave promise of being a highly successful 1949 Potomac River Naval Command diamond season for the NNMC Admirals came to a close during the coming two weeks, as the cellar-dwelling Naval Medical nine takes on its last four foes of the campaign.

Going into yesterday's contest here with the Naval Air Reserve Training Unit, (NARTU) Coach Charley Harris' charges possessed a far-from-enviable PRNC record of two victories and eleven (count 'em and weep) defeats.

Only Patuxent River, Md. Naval Air Station and Marine Barracks, Washington, D. C., have fallen victim to the hapless Med. Center ball club, and both those teams get a chance to wreak vengeance on our basement tenants in the very near future.

Next Tuesday, July 12, Patuxent River NAS plays host to the Admirals, and on July 14 Naval Medical entertains Quarters "I" of Wash., D. C. NNMC upset Pat. River, 4-2, and fell before Qtrs. "I", 5-4, in previous tussles with those two outfits.

Then come the last pair of PRNC encounters for the local diamond crew.

In their last road jaunt of the year, the Admirals journey to Marine Bcks., 8th and Eye Streets, Wash., D. C., on Tuesday, July 19, and 48 hours later they wind up a disappointing season by battling the Receiving Station nine on the NNMC field.

Johnny Garrison, reliable outfielder, was discharged from the Navy this past week, and Bruce Tillman, "Tiger" Beckley and Pat Partridge all quit the squad recently, leaving Coach Harris only a skeleton crew with which to complete the campaign.

Al Dadich, who has been the regular Med. Center backstop all season, leaves here to be discharged from the Marine Corps late next week, so Sam Gardner must come in from the outfield to catch the last couple of tilts.

Still around are Pitchers Jay Bell and Harris; Infielders Lou Kovarik and Harry St. Clair; Outfielders Gardner, Eddie Martin and Fred Willard; and Utility Men John Swinko and Dick Cox, both of whom are Jacks of all Trades on the diamond.

Six Teams In Second Half Softball Play

Second half play in the Medical Center intramural softball league is slated to get under way the early part of next week, after having been delayed somewhat by a recent siege of almost unbearably hot weather.

Six teams are entered in the second half competition. They include Med. School, Naval Hospital, Commissary, Dental School, Med. School Lab. and the N. P. Service.

Cast in the role of favorites are the Hospital and Med. School ball clubs. Loser of only one game, Hospital captured the first half championship. Rated definite dark horse threats are the Dental School and N. P. Service outfits.

Play will be on a double round robin basis, with each team meeting every other squad in the loop twice. Contests will be played at 1730 and 1900 each weekday evening.

Comd't Trophy Awarded To Quan. Marines

Final standings in the Potomac River Naval Command Commandant's Athletic Trophy Competition for the fiscal year 1948-49, released early this week, revealed that Naval Medical Center placed with a total of 44 points.

Points were scored for softball, basketball, swimming, wrestling, pistol shooting, boxing, tennis, golf, bowling and photography.

Topping the PRNC heap, as it was, was Marine Corps Schools of Quantico, Va., with a point output of 197. Patuxent River, Md. Naval Air Station finished a strong second with 180.

Then came the Receiving Station, Washington, D. C., with 115, Quarters "K", Arlington, Va., 83, Dahlgren, Va. Proving Ground, 83, and Quantico, 75. Individual certificates of participation were awarded to all who represented their station in PRNC competition.

Comm. Plans Second Picnic At Lake Seneca

All hail the unsung Commissary crew—small but mighty.

Why all this cheering for Commissary men you wonder? Because they were the instigators of a top-notch picnic held recently nearby Seneca Lake.

Nearly sixty persons attended the shindig, and apparently everybody had a swell time. At least one single soul expressed any displeasure or disappointment about June 24 get-together.

Because the recent outing proved such a big success, the enterprising Commissary fellows are planning repeat performance, which is for the evening of Friday, July 1.

Cost of the picnic is a reasonable three dollars per man, and there's no charge for any woman accompanied by a male escort. So get the planning committee.

For the very nominal sum of mere 300 coppers those who attend the coming frolic will be furnished with transportation (by chartered busses, no less) and all the food, drink and witty conversation they desire.

It's strictly "stag or drag" but costs no more to take along a dame than to play Lone Wolf, and all NNMC staff personnel are invited.

Tickets can be obtained from the Commissary man, and payday comes just before Seneca Lake Expedition No. 2. It looks like a good deal around so let's all plan to be there.

HISTORY OF ABC

(Continued from page one)

Corps officers of the Navy, and Medical Service Corps officers from the Army and Air Force, return to the school upon completion of the course and prepare for graduation on July 20.

Director Of Medical Services Inspects Center

CAPT. FREDERICK C. GREAVES

Greaves To Be C.O. Of Naval Hosp.

Captain Frederick C. Greaves, MC, USN, has been under orders since May for duty as Medical Officer In Command of the Naval Hospital as relief of Rear Admiral L. O. Stone who was detached last month.

He is expected to arrive and assume the responsibilities of his new office the later part of this month. Capt. B. W. Hogan Exec. Officer of the Hospital has been in command during the interim between the permanent assignments.

Captain Greaves entered the service in 1923, after graduating from the University of Iowa. He served with distinction before and during the last war on the U.S.S. Relief and as Executive Officer of the NMS, Washington, D.C. He also served as Fleet Medical Officer of the 8th Fleet during the Tunisian, Sicilian and Southern France campaigns, and as Fleet Medical Officer of the U. S. Pacific Fleet.

He holds the Bronze Star for exceptionally meritorious conduct in performance of outstanding services in Northwest African waters and the Gold Star for professional skill in evacuation to base hospitals of wounded during the invasion of Southern France.

Beam Obtains B. S. Degree At Penn State

In November of 1947 the Bureau of Medicine and Surgery announced a program to provide training in universities and colleges for qualified Hospital Corpsmen. Such training was to be in "practically any subject of value in the performance of their duties."

One of the first to take advantage of this program was Walter A. Beam, HMC, of the Bacteriology Department of NMRI. He had had three years of college work when he entered the Naval Service in August of 1942.

In 1943 he was sent to the Naval Medical School here for a course in Epidemiology and Sanitation. He completed his training in August 1943, and was sent to the Western Sea Frontier for duty. At a later date, he served with the Epidemiology Unit No. 106, at Pearl Harbor, T. H.

Following his return to Bethesda, Chief Beam applied for a year's

(Continued on page two)

Pictured above (left to right) are Rear Admiral Morton D. Willcuts, Dr. Richard L. Meiling, Dr. Raymond B. Allen, Rear Admiral Clifford A. Swanson, Rear Admiral Joel T. Boone and Captain Bartholomew W. Hogan.

Makes First Official Visit For SecDef

On July 7, Dr. Raymond B. Allen, Director of the Medical Service, from the office of the Secretary of Defense, Dr. Richard L. Meiling, his Deputy, Rear Admiral Clifford A. Swanson, Surgeon General of the Navy, and Rear Admiral Joel T. Boone, Medical Department Inspector General, visited the National Naval Medical Center.

Dr. Allen and Dr. Meiling were recently sworn into their new positions and this was their first official inspection of a military hospital.

The party was met by Rear Admiral Morton D. Willcuts, Commanding Officer of the NNM, and Captain Bartholomew W. Hogan, C.O. of the Naval Hospital, who escorted them to the Admiral's boardroom.

There they met Captain L. D. Mitchell of the Dental School, and also the chiefs of the various clinical services of the Center.

Admiral Willcuts described the various activities pertaining to patients' care and their functions, while a thorough description of the Hospital Resident and Intern-Training program was given by Captain Hogan. Captain Aston and Captain Mitchell also gave short resumes of the functions of their respective schools.

Later in the afternoon Captain Hogan took the official party and their distinguished guests on a tour

(Continued on page two)

Zimmerman To Relieve Duwel At NSHA Helm

LCDR Bernard F. Duwel, MSC, USN, long a strong advocate of higher education for hospital corpsmen and who stresses continuously, "there is no easy road to education," will be detached as officer in command of the Naval School of Hospital Administration on August 4.

He then is to become Executive Officer of the Hospital Corps School in Portsmouth, Va.

Duwel sees a bright future for those who take advantage of the educational opportunities offered through in-service training, USAFI courses and civilian formal education.

LCDR Duwel will be relieved at NSHA by LCDR M. E. Zimmerman, MSC, USN, formerly stationed at Norfolk, Virginia.

Famous Tennis Pros Give Exhibition Here Monday

Pauline Betz Addie, internationally known feminine tennis star, and Harris Everett, seventh-ranking professional nationally, will play an exhibition singles match and conduct a court clinic here at 1630 on Monday, July 25.

Dudley Heads BuMed Allied Science Group

Commander Horace C. Dudley, MSC, USN, Head of the Bio-Chemistry Division at NMRI, has been assigned additional duty as Head of the Allied Medical Science Section of the Medical Service Corps of Bu. M&S, relieving Commander A. P. Webster, MSC, USN.

M & S, relieving Commander A. P. Webster, M S C, USN.

Commander Dudley's principal duties in this new assignment will be in connection with the procurement and replacement of Medical Allied Scientists. He assumed his new duties on June 24.

(Continued on page four)

Rating Exams Being Held On July 30

Examinations for advancement in rating to pay grades two, three and four (HM1, HM2 and HM3) will be conducted in Ward 135 at 0800, Saturday, July 30. So look sharp, feel sharp, be sharp.

After the match, which will take place on the courts across from the Recreation Building, the well-known racquet wielders will give a group lesson. Suitable bleachers will be provided and Mr. DeWitt of the Center Maintenance force promises a loud speaker system for the event.

Mrs. Addie, gained worldwide net fame as Pauline Betz before her recent marriage to Bob Addie, sports writer for the Washington Times Herald.

She captured the coveted Wimbledon women's singles crown in 1946, was national outdoor champ in 1942, 1943, 1944 and 1946, and won the women's indoor title in 1939, 1941, 1943 and 1947.

Everett, a Navy flier in the Pacific Theatre during World War II,

(Continued on page four)

Leave, Commuted Rations To Remain At \$1.05 Per Day

(SEA)—Leave and commuted rations for enlisted personnel of the Navy and Marine Corps will continue to be \$1.05 a day during the fiscal year which began 1 July. This is the same ration value as has been in effect during the past 12 months.

The ration value for Regular Navy Midshipmen, aviation midshipmen and naval aviation cadets remains at \$1.20. The only change made in values is the hospital ration which has been reduced to \$1.11 from \$1.14.

Doctor Knight Returns From Arctic Survey

Have you ever been bitten by a mosquito? Then you should be interested in the following story:

Cdr. Kenneth L. Knight, MSC, Entomologist at NMRI, returned recently from a six weeks survey of mosquitoes in Quebec province in Canada. He was a member of the Division of Arctic Research—a panel of the Canadian Research Board—which conducted the survey at Great Whale River, on the east coast of Hudson Bay, and at Moose Factors, on James

Cdr. Knight has been working on mosquitoes for several years for the past two made studies in the Arctic. He was a member of the Division of Arctic Research—a panel of the Canadian Research Board—which conducted the survey at Great Whale River, on the east coast of Hudson Bay, and at Moose Factors, on James

(Continued on page two)

Ward Corpsmen On Section Watch; Nurses To Leave

Last minute flash: On Thursday, July 21, a three-section watch system was inaugurated for ward corpsmen of the Naval Hospital. Everyone still is a little confused at the entire affair at present, but it's expected to prove a good thing for the wardmen.

LSO, word has just been received that the Marine detachment NMCM will leave the Center on July 29, being replaced at that time by Marine guards.

Revised Public Law Provides New Benefits

The 81st Congress passed Public Law 108 on June 20, 1949. This Law provides that all officers, nurses, warrant officers and enlisted men of the U. S. Naval Reserve and Marine Corps Reserve who are ordered to active duty in excess of 30 days will receive all the benefits that are extended to regular personnel.

This also means that those who suffer from disease, disability or death in the line of active or inactive training duty of any period and their beneficiaries shall receive the same pensions, compensation, death gratuity, retirement pay, hospital benefits and pay allowances as do those of the corresponding grades and length of service in the regular Naval and Marine Corps service.

RADM Willcutts Starts Second Year At Center

One year ago Rear Admiral Morton D. Willcutts took command of the nation's largest Naval medical institution. During his one year stay the sixty-year-old "Hoosier" has brought about many innovations here at the Center.

He was the driving force and instrument which brought a new recreation program, ship service, golf course and a larger station newspaper, and anticipates a new officer club and CPO club in the near future.

It is his extraordinary enthusiasm and zest that has made him outstanding throughout his Naval career.

A typical example of the popularity of the affable doctor was displayed on a cold November day last year. During an informal visit

to one of the enlisted men's quarters, the Admiral and his aide encountered a group of sailors making a "pot of joe." Needless to say, the sailors were startled.

The distinguished Admiral handled the situation with his usual poise. "Go on making your coffee lads, this is your home. I want you

DOCTOR KNIGHT

(Continued from page one)

Our distinguished Entomologist studied and collected about ten species of mosquitoes in the Hudson Bay area, some of which had never been recorded before. Their party had excellent weather conditions for studying the habits of these insects and a good collection was made of them.

The area in which the survey was made was the interlap between the Indians and the Eskimos. The Hudson Bay representative, his wife, and an Anglican Missionary were the only white people there. The plane which carried the party to the Bay region on June 16, was the first outside contact, other than radio, they had had since March 15.

Chaplain Fay Transferred To Atlantic Fleet

Father John Patrick Fay, LTJG, CHC, USN, was recently transferred to Commander Destroyer Division, Atlantic Fleet. The jovial Irishman came to Bethesda in January of this year and almost at once became popular. An infectious smile, coupled with a fine personality, won Father Fay a host of friends here at the Center.

The Irish Father was born in Country Antrim, North Ireland and attended Providence College in Rhode Island. He also studied at Louvain University, Belgium, and Saint Bernard Seminary, Rochester, N. Y.

The NEWS, on behalf of all the staff and patients, wishes Father Fay a smooth cruise and the best of luck in his new assignment.

to consider it so." That, is our commanding officer!

Admiral Willcutts was born in Carthage, Indiana, on March 10, 1889. He attended Indiana Normal College and Indiana University where he received his Bachelor of Science degree in 1914 and Doctor of Medicine degree in 1916.

He entered the Naval Service in 1917 with the commission of Assistant Surgeon. Later he served throughout World Wars I and II, subsequently advancing through the grades to the rank of Commodore on April 1945. His promotion to Rear Admiral was approved by the President in December of 1946. His date of rank was September, 1942.

Throughout the past decade the gray-haired Admiral has seen most of the world. His duty at the American Legation, Peiping, China was very adventurous, for there he was one of the first navy doctors to be called upon to treat victims of Japanese aggression. He was decorated by the Chinese government for his outstanding services during this period.

In 1941 he was transferred to the Naval Hospital, San Diego, Cal. During his four-year tour of duty there he gained world-wide recognition for his efforts as administrator, surgeon and medical authority.

Although having traveled to the four corners of the globe, the Admiral still found time to meet and marry the charming Marie Barbara Collins of Napa, Calif.

They have four children, two boys and two girls. At the present time they all reside here at the Medical Center.

Clarify Position Of Enlisted Men Holding Commissions

(SEA)—The status of Navy enlisted personnel who hold temporary appointments as officers is clarified in a new BuPers directive. How such persons will stand upon termination of their temporary appointments is established in BuPers Circ. Ltr. 69-49 (NDB, 30 Apr 1949).

The directive emphasizes that it is not an authority to revert such officers to enlisted status. It also points out that voluntary reversions are not desired because of the letter,

She Walks In Beauty

NEWS Photographer A. Canedo has captured all the charm, beauty and poise of this "Dream Girl." Her name is Betty Jo Phelps, and she's 19 years old, 5 feet 6 inches tall and weighs 115 pounds. This dark-haired, brown-eyed beauty has a 25-inch waist, 34-inch bust and 34-inch hips.

Big Lab Shakeup Sends Many To New Stations

During the past two weeks orders for transfer have arrived for nineteen Laboratory Technicians of the Naval Medical School Laboratories. Several will go to overseas shore stations, some to ships of the fleet, and the remainder will take up their new duties at naval hospitals throughout the country.

Keep An Eye Open For ARC Craft Carts

When its hot and sticky so that lying in a hospital bed seems especially dull and miserable, keep an eye open for the appearance of the Red Cross craft cart.

Manned by Red Cross Gray Lady volunteers, it makes its rounds daily so that each ward is visited at least once and, in some cases, twice each week.

The projects offered are all simple, easy ones which may be completed quickly, and which appear to be much more professional when finished than they actually are. They include articles which the patients may make for themselves or their families and friends.

Included are woven rugs and scarves, knotted belts, earrings of colored shells, key cases, coin purses, wallets of leather, belts, earrings, and bracelets of woven plastic thread, stuffed animals, and models trains, airplanes and ships.

All materials are supplied by the Red Cross free of charge and the Gray Ladies offer instructions and assistance. Many times this colorful cart helps the patients forget that it's much much too hot to be in a hospital!

CHIEF BEAM

(Continued from page one)

work at Pennsylvania State in order to obtain his degree. He was graduated June 6, with a Bachelor of Science degree in Bacteriology, and now returns to NMRI for duty in that department.

Chief Beam is a native of Pennsylvania and makes his home in Silver Spring, Md., with his wife and two-year-old daughter, Lynne.

Reporting aboard for duty were three chiefs and one medical officer who will take a residency in Pathology.

Going to Guam, M. I., are Lewis J. Reber, HMC, and Albert E. Soper, HM3 Frederick R. Henry, HMC, will go to Pearl Harbor, T. H., and William Eliades, HM2, will go aboard the APA 30, the USS THOMAS JEFFERSON.

Donald Myers, HM2, will report to ComBatCruPac for further assignment, while Raymond A. Nygren, HMC, has been ordered to the Naval Hospital at Chelsea, Mass.

Three Lab. Techs. will report to the Naval Medical Research Institute on this station for duty. They are James T. Waddell, HM1, Richard N. Cox, HN, and William H. Dodge, HN.

Michael Lasco, HMC, will be transferred to the Center Command and Thomas E. Peeks, HMC, will enter the next class at the Naval School for Hospital Administration.

Dale K. Herrick, HM3, and Douglas G. Draper, HM3, will report to the Naval Hospital at Long Beach, Calif. for duty.

George E. Ford, HM3, will go to the Naval Air Station at Norfolk, Va., and William E. Diederick, HM3, will go to the NAS, Patuxent River, Md. Francis A. Teague, HM3, will report to the Naval Hospital at Jacksonville, Fla.

Reporting for duty in the Medical School Labs were George W. Tetzlaff, HMC, Chester F. Blakemore, HMC, and H. Stanley Alwood, HMC. LTJG Raymond J. Leffler, MC, USN, has begun a residency in the Pathology Department.

Director of Med Services

(Continued from page one)

of the various wards and clinics, where they met residents, internes, nurses and staff corpsmen. They also talked with patients and observed ward procedures.

Crews' Library:

Library Offers Wide Range Of Travel Books

Perhaps your vacation trip has been indefinitely postponed this summer, but arm chair travel is always a possibility if you have a hand a collection of books like those in the CREW'S LIBRARY.

John Gunther's BEHIND THE CURTAIN is a report of his recent tour of Central Europe and of what he saw and heard there in interviews with important persons and the personalities of those in power. Reliable and informative as well as reasonable in tone.

HIGH JUNGLE will take you to the mountain forests of Venezuela with William Beebe to watch strange birds, rare flowers, and beautiful tropical insects.

In OVER THE REEFS AND FAR AWAY, by Robert Gibbins you will see the way of life in Samoa, Tahiti and other South Islands, and will become well acquainted with the fish, birds, turtles and flowers but best of all with the people themselves.

If you prefer to travel in your own country, try "THIS IS SAN FRANCISCO," the city with a personality so definitely its own. Robert O'Brien has captured the glamour and romance of the city and tells many good yarns as well.

Wave Whisps

By Betty Bookis

HOW BAD CAN IT GET—when WAVES are as scarce as hen's teeth and gossip for columns—ten times worse—when Alma Albrecht absolutely refuses to ship over, leaves high and dry and says "goodbye forever . . ."

At the NNMC barracks when fella's so cheap he swipes another guy's toothbrush (No foolin', it actually happened!) . . . the mess where you invariably get blown bits emptying your tray and practically suffocate with heat prostration at the tables . . . and of course scorching hot coffee on scorching hot days . . .

This infernal damp weather which, according to Holmes, has regard for sticky carbon paper and I might add, DROOPY HAIRD . . . when characters like "Hansome" Hausherr and "Curly" Frederick beg to have their names appear in print and nobody cooperates; same goes for the gang across the Post Office, the barbers, those poor, lost souls in cloister the Print Shop . . .

When Joy Shrader has nothing better to do than sit around on the porch and watch the world go by with one less bachelor in West Union—namely Alvin W. Rea—married Ellen May Reichert of Clinton at the Chapel on the . . .

Night duty and watches that continuously interfere with WAVE digs . . . for ALL women at NN now that Disbursing's Betty Phelps has arrived . . .

When beautiful numbers "Star Dust" and "Deep Purple" sound from the tower on only EXPERIMENTAL basis . . . Ship's Service fountain when throw up your hands so many times in desperation and finally end having the door slammed in your face around 9 P.M. . . .

EDITOR'S NOTE: You have deepest sympathy, Betty. Why have a chat with the chaplain this week? It's always darkest just before the dawn.)

Physio Therapy

During the last half century medicine has more and more come to employ mechanical and physical measures in the diagnosis and treatment of diseases.

Seen through the lens of Photographer A. Canedo's camera, on this page, is a cross section of the work done regularly by one of the most active units of the Naval Hospital, the Physical Therapy Department.

Physical Therapy itself can be defined as the management of disease by means of physical agents such as light, heat, cold, water, electricity and mechanical agents.

It is one of the oldest branches of medical science, but only in the past five or six years has it begun to be recognized as an integral part of regular medicine.

When primitive man first crawled out of his cave into the sunshine to receive the benefits of its soothing warmth he unwittingly started the practice of heliotherapy.

Likewise, when our forefathers bathed a wound in a pan of water they unknowingly instituted hydrotherapy and by rubbing a sore arm unconsciously induced massage.

Morning schedule (above) is checked in A.M. for number of treatments to be given throughout the day as Lieut. Ella Mae Vick, Chief Moore and Jack G. Fiddes, HM1, receive their assignments for the day.

Patient is being treated for a fractured hip. Quadriceps exercises for this type of injury. Their purpose is to strengthen the muscles.

Patient goes through Bohler exercises (above) with balance weight on head. This treatment is for back reconditioning.

Paraplegia patient (above) receives underwater exercises. Corpsman Cooley assists with treatment.

Whirlpool baths (above) are used. This treatment applies heat by the use of water.

Above new Microtherm Therapy treatment is applied. This is a specialized form of Diathermy used for deep heating.

Admirals, Down In Cellar, Finish PRNC Schedule Despite Player Shortage

Firmly entrenched in the loop cellar, the undermanned NNMC Admirals bring their Potomac River Naval Command diamond campaign to a close Sunday when they tangle with Marine Barracks, 8th and Eye Sts., S.E., Washington, D. C. on the Leathernecks' field.

That contest was originally slated for July 19, but the Marine aggregation played a game at Charleston, S. C. that day, so NNMC's final road tilt of the season was set back to Sunday.

Yesterday, July 21, the Med. Center outfit was booked to tackle the Naval Receiving Station of Wash., D.C., on the Admirals' home grounds, while today Quarters "T" of the nation's capitol comes here for another PRNC fracas.

Previous loop tussles with these three foes saw Naval Medical bow to the Rec. Station, 12-11, fall before Quarters I, 5-4, and nip the 8th and Eye Marines, 16-15, in a long, drawn out 11-inning struggle.

Expected to start for NNMC in the last two league forays are Ed Martin at first, John Swinko second, Lou Kovarik shortstop, and Harry St. Clair third base.

In the outfield it'll probably be Harold Bonds, Fred Willard, and Dick Cox or Jay Bell, with either Cox or Bell doing the hurling.

However, Coach Charley Harris may twirl one of the final games. With Al Dadich, regular backstop, discharged from service this week, Outfielder Sam Gardner must don the catcher's pads for a time or two. That's all—there aren't any more men left on the squad.

Before the Admirals turn in their uniforms and call it a year soon, it is hoped that contests with Walter Reed Army Med. Center and several D. C. and Maryland semipro nines can be arranged.

The Med. Center team split even in two recent PRNC frays, nipping NARTU of Anacostia, D.C., 5-4, here July 7, and dropping a 7-6 nod to Patuxent River, Md. Naval Air Station, there July 15.

Dick Cox, smooth-working port-sider, went the distance for NNMC against NARTU. Shoddy fielding by the losers' infield proved their downfall, only two Admiral tallies being earned.

A ninth-inning NARTU rally fell one run short as Cox whiffed Third Baseman Sutton with the tying and winning markers on base.

Chief Harris twice dissipated three-run leads as Pat. River gained sweet revenge for a previous 4-2 loss to NNMC. The Admirals couldn't get a man on base against Albaugh, third NAS pitcher, in the last four stanzas.

After deadlocking matters at 6-all with three scores in the fifth frame, NAS got the deciding run in the seventh when Melosky tripped to deep right center, sending Daniels home.

The Dental Explorer

By Bob Thompson

"I have returned," quoted Thompson, and so with thanx to Mr. Garrison, ex-USN for the last time, here goes everything.

What about this choir Chaplain Gatlin is trying to organize? Last year we had plenty of nice times at rehearsals, a nice Christmas program, and the satisfaction of doing something. Only about six have turned in their names thus far. You don't know what you're missing.

Carousing around... Chief Benton, our only Wave, patiently waiting for dinner in SS. Claimed she had only been there 25 minutes... Chief Neu, new CMAA, busy at his many and varied duties.

Big John Pennington and Buchanan looking for new pastures since their favorite quit serving those famous box lunches... Preston with his newly acquired auto having a little trouble wit dem D. C. inspectors.

Just found out I've been appointed to the Dance Committee. Wonder when the next dance will be? Perhaps I should go find out. Be looking atcha'.

Dudley Heads Science Group

(Continued from page one)

Doctor Dudley's recent work at NMRI on "Radio-Autographic Techniques in the Study of Gallium in Normal and Neoplastic Bone" is a great contribution to the field of Bio-Chemistry. He intends to continue his research on Physiological Characteristics of Gallium and other radio-active isotopes.

Famous Racquet Wielder

Pauline Betz Addie, well known feminine tennis star shown above, and Harris Everett, seventh-ranking professional nationally and an ex-Navy flier, will play an exhibition match and conduct a court clinic here Monday, July 25.

Lieut. Kentner Shatters Local Course Record

Lieutenant Robert Kentner of BuMed recently set a new course record for the six-hole NNMC layout by negotiating the distance in 21 strokes, two under regulation figures.

Previously several persons, including Kentner and George Dillon, Med. Center club pro, had been tied for the course record, each having carded an even par 23.

While breaking the old record, Lt. Kentner covered himself with additional glory by sinking a hole in one on the 185-yard, Par 3 sixth hole here.

Two other linksmen, both Naval officers, also have entered golfdom's hall of fame by canning their tee shots on that hole. They are Lt. Cdr. H. C. Rodin from BuShips and Comdr. P. J. MacNamara, NNMC surgeon. All used irons in turning the trick.

NNMC Golf Tourney To Be Held In Aug.

A. B. Edelmann, Naval Medical golf "professional," is making arrangements for a station links tournament, to be staged sometime during August.

The NNMC golf champion for 1949 will emerge as winner of the championship flight, while there will be other flights so that everyone qualifying for the tourney gets to take part in match play.

According to present plans, individual trophies will be awarded first, second and third place winners in each flight.

TENNIS PROS.

(Continued from page one)

is tennis pro at the Army-Navy Country Club in Arlington, Va., while Mrs. Addie is professional at Belle Haven C. C., Alexandria, Va.

All staff personnel, their guests and dependents are invited to attend the match and clinic.

Hospital, Med. Staff Head Softball Pack

Second half play in the NNMC intramural softball league got under way last week, with highly-rated Naval Hospital the only club to remain undefeated after the first several contests.

In the initial two games on their 10-tilt schedule, the Hospital sluggers stunned in-and-out N.P., 15 to 7, and trampled Commissary, 25-3, as Earl Dennler, Jim Jackson, Duane Smiley and Co. made things mighty unpleasant for enemy hurlers.

A well-balanced Med. School Staff nine captured two of its first three starts, outslugging Commissary, 17-10, and then drubbing faltering N.P., 13-3, behind the steady chucking of Chief Thomas.

However, in between those two victories Med. School's hustling squad nipped the Labmen, 7-6, in a hard-fought encounter, thus handing the heavy-hitting losers their first setback.

After dropping its second half inaugural to N.P., 10-6, Dental struck back to halt favored Med. School, 12-6, July 18.

To date Hospital (Operating Room), Med. School Staff and Dental appear about even in strength, with Med. School just a shade behind, and N.P. a big disappointment due to shaky pitching and miserable fielding. Commissary, although undermanned, has hopes of springing a few upsets before the season's end.

Sportin' Aroun'

By Clyde Schubert

What happened to those stumbling, fumbling and grumbling Senators of Joe Kuhel's in St. Louis last Sunday shouldn't even be a barracks master at arms, eh me?

Gorgeous George Royster, NEWS' irrepressible Cleveland natic, remarks that he thinks Washington possibly could make American Association's first division this year. How can he be cruel!

Incidentally, the author of Topics says he's going mad, mad as his beloved Indians chafrantically after the front-running Yankees.

Meanwhile, McLaughlin of Center Command, a loyal Yank root to the end, nervously paces the deck after evening chow whenever stalwarts have an afternoon game anxiously awaiting word, via Phico, on how Joltin' Joe and Associates made out.

And over at Main Quarters, J. Reardon sweats out Detroit's current slump, while John Egan confesses that his favorites, the Athletics, don't seem to have the goods this year.

"No comment," snaps big J. Kelly, rabid Red Sox booster, as despairingly wads his Post sports section up into a ball after reading of another BoSox loss.

From the basement: Upon hearing of the Browns dealing Wash. double setback Sunday Gerald (Bie) Kaplan (a native of St. Louis) screamed, "I told you, class, tell." Sad case.

Big men in Sports at NNMC (No. 1 of a series): Currently catching for Med. School Staff in the stat softball league is Carl Norris, BMI who works in the Print Shop and was married not too long ago.

He captained Med. School's tough football squad last autumn and was a regular guard on the Center's varsity cage squad. On the diamond Norris is a shrewd, ever alert receiver with a rifle arm. He's also a pretty fair batter. All in all, Carl is one of our finer athletes.

Noticed on the softball field "Nose" Palluzzi of the Hospital (O.R.) team coming up with some great plays at third—George lost of MSS also looking good at the hot corner—Chief Thomas fooling the youngsters with his hook—Commissary wondering who to pitch next—N.P. committing errors in the gross (better keep away from that Schlitz, Wargo).

ALSO—McTier telling the boys that a luscious blonde on the sidelines impaired his pitching efficiency—Earl Dennler of NH fleet as an antelope in the outfield—Dental decked out in snappy blue and white NNMC uniforms and full pep—Paulson of Med. School bawling out the umpire as usual—the cute gal of Gilman's watching the N.P. games.

Ah yes, one could go on forever—but there's no more room. Okay, look for the new feature column in our August 12 issue. It may surprise you. 'Bye now!

25 Hospital Corpsmen Pass Examinations

New Choral Group Being Formed Here

Frady H. Gatlin, senior chaplain, announced that he very much would like to see a NNMC choir organized in the near future. The desired choral group would consist of ten voices, its size depending on the support of as many shower room interest.

No definite plans have been made yet regarding practice hours or types of music to be sung. However, there will probably be two practice sessions a week with a library consisting of all types of music from classical and sacred music to popular numbers such as Fred Astaire arrangements.

Naturally the primary duties of a choir would be to sing at the church services, but other than that there are unlimited possibilities, Chaplain Gatlin commented.

The Chaplain is anxious to obtain support of as many shower room members, tenors and baritone as possible. All interested persons are asked to stop in or phone the Senior Chaplain's office at their earliest convenience.

Med Marine General Now NNMC Patient

They say everyone has a story to tell. Brigadier General Frank White, a Marine Corps Retired, is a man who could certainly tell a lot of exciting ones if he chose, and many more they would all be true. Now a patient at the Naval Medical Center, the much-remembered officer had a veritable career in the military. He served in two wars, China, and Nicaragua, and one that was as adventurous as it sounds.

The tough-looking but kind-hearted General served with distinction while attached to the 5th Regiment in France during World War I, participating in many major engagements.

He was wounded in action twice and was awarded the Navy Cross, Distinguished Service Cross and Croix-De-Guerre with Gold Star, and cited in Second Division.

(Continued on page two)

Staff Sergeant L. A. Cleboski of the Marines hands over the security keys to F. W. Poole, BM2, petty officer in charge of the Seaman Guard unit now at NNMC, as the Marine Corps detachment prepares to leave the Center. The Navy took over the reins on July 29.

Tax On Ship's Service Items Now In Effect

In accordance with a three-service agreement recently approved, Ship's Service Stores started collecting the 20 per cent Retailers' Excise Tax on August 1.

Major items to which tax applies are as follows: JEWELRY: Over \$5.00 — 10% tax (watches and alarm clocks included.) Over \$65.00 — 20% tax. LEATHER GOODS: Billfolds, utility kits, key cases, handbags, brief cases, wallets, purses, etc., 20%.

LUGGAGE: Footlockers, fur-lough bags, etc.—20% tax. PRECIOUS METALS: Sterling silver, all silver plated hollowware, but not silver plated flatware; pens and pencils if gold band on cap over 3-8"—20% tax.

TOILET PREPARATIONS: Cosmetics deodorants, after shave lotions, hair oils, powders, toilet waters, etc., 20% tax.

Lieut. Jacobs Leaves Dental, Goes To NSHA

On August 10, Lt. Joseph J. Jacobs, MSC, USN, was detached from the Dental School for a course of instruction at the Naval School of Hospital Administration here.

Assuming Jacobs' duties as Administrative Assistant will be CWO P. L. Allers, HC, USN, property officer at present. Allers will be

(Continued on page four)

EENT School To Be Offered Hosp. Corpsmen

Well, we see where the Eye, Ear, Nose and Throat department of the Naval Hospital plans an EENT school for Hospital Corpsmen.

The school, with sessions to be held in the clinic, will be under the direction of Capt. A. J. Delaney MC, USN, Chief of the EENT service here.

As yet the school has not been approved by the Bureau of Medicine and Surgery, but as soon as all the details are worked out and approval of the school is forthcoming from BuMed classes will get underway.

Capt. Delaney states that "all men completing the course will receive a technician's rate in the EENT field." The course will be divided into two parts, practical work and theoretical study, the entire course covering a total of 960 hours.

Qualifications for attendance will be completion of Hospital Corps School, and a high school education or its equivalent under the GED standards. An announcement as to when applications for this specialized school will be accepted is expected to be made in the near future.

Come Through In Quest Of Higher Ratings; 75 Hurdle HM3 Test

A total of 125 enlisted personnel attached to various commands of the National Naval Medical Center on July 30 successfully passed examinations for advancement to the next higher rating.

Mont. Junior Offers Courses In September

The Educational Services section of the Medical Center has announced that courses will be offered in the later part of September at Montgomery Junior College in Bethesda.

Although Mont. Junior was established as a permanent institution to serve the educational needs of Montgomery County young people, one of its immediate objectives is to provide college educational opportunities for service men and women.

The college has obtained approval of its courses by the Veterans Administration and has completed arrangements for training vets.

Personnel of the NNMC have been authorized to carry courses at the college at the expense of the Navy, and also through the GI Classification. These subjects may be taken after working hours. The college is glad to cooperate in making this experience a profitable one for Naval personnel at the Med. Center.

The Veterans Counselor of the college will assist veterans and service personnel in straightening out any matters pertaining to their relationship with the Veterans Administration and personal or academic problems.

For further information those interested are asked to contact Chief Gardner in the Education Services Office, Room 103, before contacting the College.

MSC Officers Complete Hosp. Admin Course.

Thirty Medical Service and Hospital Corps Officers recently completed a nine-months course in Hospital Administration here at NSHA.

Graduation exercises were held the latter part of July. Principal speaker for the occasion was Rear Adm. Morton D. Willcutts, MC,

(Continued on page four)

The list that follows is merely one of all those who passed the tests. The number of men actually to be rated in the Potomac River Naval Command has not as yet been determined, but official information will be forthcoming on or about the 16th of this month.

Of the 11 men passing the test for advancement to HM1, six are in the Naval Hospital command, three in Center, and two in Research. Twelve passed the second class exam, eight of them being Hospital personnel, while three are in Med. School and one in NMRI.

Of the 102 successfully negotiating the HM3 test, 66 of them are Med. School men, and 28 are in Hospital. Five from Center passed, as did one from Research and two from NSHA.

Several of those hurdling the HM2 barrier will not meet the service requirement of one year in pay grade four (HM3) until 16 November 1949, and will be placed on the Commandant's waiting list.

Since so many passed the third class test probably all of them will not be rated this month, as the quota allotted NNMC is not sufficiently large.

(Continued on page two)

Fr. Martineau, Cath. Chaplain, Reports Aboard

On August 1 Fr. Edward Martineau reported aboard to assume the duties of Assistant Catholic Chaplain. The Irish-Canadian Father served at the Marine Base, San Diego, Calif., before coming to the Center.

The young, energetic "Padre" was born and raised in Bridgeport, Conn. He attended the University of Florida, St. Benards College in Alabama and St. Benard's College in Canada.

He entered the Service in 1944, and has served aboard the USS General Hayes, Hermantage and Randell, later serving with the Fleet Marine Forces in the Pacific for a period of three years. During this time he met Chaplain Gatlin, Senior Chaplain here, in North China.

Some of you will remember that

Corpsmen Pass Examinations

(Continued from page one)

It is anticipated, therefore, that an additional quota later will be requested, with a view toward advancing the remainder of those eligible in September if at all possible.

All those already on the Comdt's waiting list for advancement, if they meet all requirements at this time, are expected to be advanced this month.

The following men passed the test for promotion to Hospital Corpsman First Class: All names are listed alphabetically, and not by marks obtained.

ANDERSON, David V.; BOURGEA, Ronald J.; BUTT, William R.; COLLINS, Wilbert B.; DANDRIDGE, Marvin M.; HOLDERMAN, Barton S.; KEITH, Irwin E.; PHELPS, Robert W.; RICHESON, Glen W.; SKUDLER, Harry C.; SWEENEY, Edward P.

The below named 12 men passed the test for promotion to Hospital Corpsman Second Class:

ARMSTRONG, Dean E.; BENSON, Leland W.; CARLSEN, Robert A.; EVANGELISTA, Leoncio E.; JACKSON, James K.; JOHNSON, James H.; KAY, Charles R.; KIPP, Iver R.; O'BRIEN, Paul B.; SAMPSON, William T.; WALDIE, William J.; WARGO, Edward J.

The below listed 102 Hospitalmen passed the test for promotion to Hospital Corpsman Third Class:

ADAMS, Frank R.; AGUILAR, Epimanio M.; ANDERSON, Lloyd D.; BAKER, Glenn E.; BAXTER, Joseph B.; BEAUDOIN, Norman E.; BOWERS, Willard M.; BOYER, Carroll W.; BRABANDER, Wayne J.; BRADSHAW, Walter L.; BUNCH, Ira G.; CAMPBELL, Donley E.; CANTWELL, Robert B.

Winnie Becomes NH Personnel Officer, Succeeding Sinclair

The Naval Hospital command had another switch in personnel officers not long ago, when LTJG Roy E. Winne, MSC, USN, replaced LTJG Harry E. Sinclair, MSC, USN, at that post on July 30.

Winne, who already has begun tackling his work here with a great deal of energy and ingenuity, came to this station from the USNH, Philadelphia, Penna., where he was Officer in Charge of the Personnel Division.

Sinclair, in leaving NNMC, was assigned to the position of Adm. Assistant to Rear Admiral Herbert L. Pugh, Deputy and Assis. Chief of the Bureau of Medicine and Surgery.

Pray tell me, Chunn, what is this going on in Ship's Service every morning? I hear tell that it is purely platonic but that cup o' joe is certainly binding, isn't it? See ya in the next issue.

Remembering Years Past

Shown above is Harold B. Pollock, Technical Sergeant in the Marine Corps, working intently on a clay model of a Leatherneck in battle uniform. Pollock, a patient here who has nearly 10 years Marine service behind him, has entitled the model, now completed, "Follow Me." The finished product finds the Marine carrying a Tommy Gun in his right hand.

Meet Your Executive Officer: Capt. A. R. Behnke, Jr.

Since its establishment in 1942, the Naval Medical Research Institute has had a driving force in its Executive Officer, Captain Albert R. Behnke, Jr., MC, USN, found in but few men. His profound interest and enthusiasm for the advancement of medical research in the Navy has been comparable to the spirit of a college man for his alma mater.

He has been more than an "Exec," since he served as Scientific Director following the departure of Dr. A. C. Ivy from that position in 1943. His unfaltering concern and indefatigability in the performance of his duties has been instrumental in the establishment and development of NMRI to its present high position.

Captain Behnke has a wide interest and knowledge in research, but his contributions in the field of applied physiology have been most outstanding. Due to his record in this field, he was chosen to participate in the rescue and salvage operations incident to the USS SQUALUS disaster in 1939.

More recently he has conducted investigations in the applied physiology of respiration under deep sea, surface, and high altitude conditions. His outstanding achievements in this field have made diving operations possible at greater depths under safer conditions than ever before. He was awarded the Sir Henry Wellcome Medal in Military Medicine in 1940.

Famed Marine General

(Continued from page one)

General Orders for gallantry in action.

He commanded the Marine Detachment of the USS ROCHESTER from August 1929 to July 1931, and served ashore in the Nicaraguan campaign. He served as Brigade Quartermaster, Second Marine Brigade, Shanghai, China, from August 1937 to April 1938, and upon his return to the States he was assigned to the staff of the Army Industrial College and later assumed the post as Commandant of the College.

During World War II he served in the Plans Division of the Office of Chief of Naval Operations.

Our "Exec" makes his permanent home in California. He received part of his undergraduate training at the University of Pennsylvania and completed the work required for his Bachelor's degree at Whittier College. He graduated from the Stanford University Medical School in 1930. Yale University awarded him a Master of Science degree in 1942 for investigations in Aviation and Submarine Medicine.

LTJG Hewitt New Personnel Officer Of Cen. Command

On August 1 LTJG Wayne B. Hewitt, MSC, USN, relieved LT Robert F. Hooper, MSC, USN, as Personnel Officer of the Center Command and of all civilian employees at NNMC.

Hewitt, who recently completed a course of instruction at NSHA, was formerly attached to Naval Medical Research Unit #3, Cairo, Egypt.

Marine Unit Praised For Service At Med. Center

Rear Admiral Morton D. Willcuts recently commended the Marine detachment which was withdrawn from the NNMC on July 2 for its splendid record at the Medical Center over a period of seven and a half years.

The Marines performed a great many services that were not included in the orders outlining their headquarters. They raised and lowered colors, and accompanied the paymaster on trips to the U. S. Treasury for funds which to pay the crew and patients.

Their regularly assigned duties have for some time been restricted to the guarding of hospitalized patients and manning of two posts in the vicinity of the Research Institute where the presence of highly classified material has required rigorous security measures.

"The combined staffs of the Medical Center join me in this expression of gratitude for the very fine services rendered to us by the Marines and a sincere wish that they be turned in and when exigencies of service may permit," Admiral Willcuts stated in praise of the Marine detachment.

Wave Whisps

By Betty Bookis

By golly, it sure is nice to know SOMEONE reads this stuff! So I boost the ol' morale—havin' he-lers to heckle the heck out of girl. But time's a-wastin', so— WITH THE COLUMN!!!

Say, what's this about Bosa and a "lost weekend"? Too much "elbow-bending," according to some, but we know better, don't we "Sarge"? Incidentally, the lady was the only NNMC representative at the WAVE reunion in Boston this year.

And look who's apartment-hunting, as if we didn't know—R. Quire and company. In case you have been trying to locate the girl, inquire at Chief Nurse's office, fifth deck. Miss Quire recently switched over from Center Command to Hospital, if you recall.

Our heartiest congratulations and best wishes to Peg Bosco, now Mrs. Robert P. Alvey. Chin up, ol' girl, after all, there ARE worse places than GREAT LAKES, though this is purely one person's opinion.

By the way, Western Union has taken over Miss Dalier's former office across from the Information Desk at the main entrance. LCI Sproul, our newly appointed WAVE representative, may be contacted at the Blood Bank, Room 149, Extension 382.

Out looking the place over the other day were Bair, Hill, Hardin and Ray from Quarters "B," Washington. It's a shame we were unable to extend them the same sort of hospitality usually shown to girls on weekends spent at the F. Tomac Park Barracks. Visiting WAVES are housed there free of charge and pay only for meals when on commuted rations at their own stations.

Pleased as punch (and who WOULDN'T be?) is Gussie Denkin these days over her recent promotion to HN and transfer to Hematology. She's tickled pink.

The Dental Explorer

By Bob Thompson

The Leech Cup, symbol of tennis supremacy among the Armed Forces, was won last Saturday by the boys from the B-36's, bless 'em. The Navy did walk away from two matches victorious and one of these was won by LTJG Charles Anderson, DC, USN, who will soon be here at NDS for duty.

Dr. Anderson showed much power and reserve energy in downing his opponent 6-1, 6-1. Although he and his partner lost a doubles match, he was by far, I think, the best on the courts.

And speaking of tennis, have you noticed how much the courts are being used since the Betz-Everett exhibition last week?

Changes around the North Wing sent Rodman over to the barracks, Swedberg back to the movies, and Chief Michelson and Farthing over to the Rec. Building for temporary duty.

"Fifteen ball in the corner pocket" is this Naval Medical corpsman's goal as he lines up a tough shot on the pool table. Five tables are available to enlisted men in the basement of the Rec. Bldg., and many aspiring NNMCMen while away leisure hours there.

Across a pedestrian bridge and up a winding walk, partly hidden by a mass of picturesque green foliage, one comes upon the Med. Center Recreation Bldg., which houses a college-size basketball court, swimming pool, and a host of other facilities for sports.

A left-handed swinger prepares to sock his drive off No. one tee on the six-hole NNMCM golf course. Action generally is heavy all day long on the local links, which opened for play in June, and will be a nine-hole layout in 1950.

CDR F. E. Frates, DC, Athletic Officer of the station, and LT J. O. Atkinson, MSC, Recreation Officer, map plans for the Center's tennis singles tournament, which got under way Thursday.

Four "highways" that lead to happy days are the quartet of bowling alleys in the Rec. Bldg. here. Toppling timber with large black balls has become a popular pastime on this compound.

With cautious step and a rubber life ring tightly clenched in her hand, this young miss is about to embark on a cooling voyage across the NNMCM swimming pool. Local splashers appreciate our new-fangled "swimmin' hole" as much as a Polar Bear would these torrid days.

Recreation For Sailors

In years past, as "Old Salts" in the Navy will tell you, too often a sailor's recreation program consisted of two beers and a swim on some lonely island.

Well, those stationed here at the Medical Center have far better things to look forward to in their free hours.

That is true at almost all shore stations now as the Navy has more and more come to realize the need for a well-organized recreation set-up, including both individual and group activities.

Recreation, as we know it, takes many forms. Some persons find theirs in playing baseball, football, golf or tennis—or often in swimming. Others prefer good music, an exciting book, or a long hike in the country.

Here at NNMCM the recreational facilities are virtually unlimited. Every time you go to the movies, see a Vets camp show, or watch television shows on the set in your quarters, you are utilizing one of the host of diversional facilities, at your disposal.

One might define recreation as any activity indulged in that is outside the regular routine, as something that is entered into for the joy of participation.

It can be mentally refreshing in many ways, may be physically beneficial, and usually provides for emotional release, an important factor in maintaining an even keel in our swift-paced world of today.

In its next issue the News will carry a story citing the various recreational facilities available on this station.

Hospital Softball Nine Nears League Title; Rips Lab Staff, 10-4

As a result of its 5-2 triumph over scrappy Dental School Monday, August 8, a hustling Naval Hospital ball club needed only victories over Med. School and Dental in its last two loop games later this past week to capture the NNMC softball championship.

NNMC SOFTBALL STANDINGS

(As of August 8)

	W.	L.	Pct.
Naval Hosp. (O.R.)	7	1	.875
Med. Sch. Staff	6	2	.750
N. P. Service	5	4	.556
Med. School	3	4	.427
Dental School	3	5	.375
Commissary*	1	9	.100

*Dropped out of league, and forfeited all remaining games.

Combining air-tight hurling by Dwaine Smiley with steady fielding and clutch hitting, the Hospital forces recently subdued Med. School Staff, 10-4, in the top tussle of the year.

A previous 9-4 winner over the loop leaders, MSS sorely missed Chief Thomas, ace chucker, as it suffered its second defeat of the second half season.

With Thomas absent, Med. Staff sent Jay Bell, top-notch hardball pitcher, to the mound, and Hospital hammered him for all ten of its tallies in the first two innings.

In other recent contests the Hospital squad, composed mostly of Operating Room personnel, nipped Med. School, 10-9, and overcame N.P., 6-4, in a pair of well-played affairs.

Chief Thomas outdueled Smiley in MSS's first meeting with NH as

the top team in the loop absorbed a 9-4 beating for its lone setback in second half play.

Another Med. Staff tiff saw the second-place outfit nudge Dental, 9-7, in a hard fought fray. In another game played recently Med. School snapped its losing ways by dumping Dental, 13-8.

After dropping two games each to Hospital and Med. Staff, N.P. struck back to notch three straight victories and climb into the third spot.

Rated a pre-season darkhorse, the Neuropsychiatric outfit dumped Dental for the second time, 10-5, the day after pummeling mercurial Med. School, 23-11. Darrell Gilman, N.P. twirler, needed relief against Med. School despite an early 16-2 lead but went the route against Dental.

Commissary, boasting a lone 15-8 upset win over Med. School, later was trampled by N.P., 21-6, and fell before Dental, 17-14. The Dental contest had to be called because of darkness in the midst of a spirited Commissary rally.

Disgruntled when several of his men failed to show up for a game the following week, Manager O'Donnell disbanded the Comm. team, thus forfeiting all his team's remaining games.

Station Tennis Champs

Everybody seems pretty happy about the entire affair as Rear Admiral Morton D. Willcutts, MOIC of the Medical Center, presents trophies to winners of the recent NNMC tennis doubles tourney. Shown above, left to right, are Frank E. Weldon, HMC; CDR R. N. Shelly, MC; R. B. Bingham, HM3; and RADM Willcutts. Weldon and Shelly downed Bingham and W. K. New, HMC, in the final match.

Sportin' Aroun'

By Clyde Schubert

It's pretty tough for many a sports fanatic to decide just what to read first on the sports page these days, with the torrid Dodger-Cardinal battle raging in the National League, pro football teams releasing reams of copy on pre-season prospects, and some cash-crammed big time golf tourneys like the recent Tam O'Shanter taking place every week.

With Brooklyn and St. Louis locked in a bitter struggle for the senior circuit lead while four other N. L. clubs tussle furiously for third place, and four American League outfits all after Casey Stengel's fast-moving Yankees, now seems a good time to go out on the limb and predict the final outcome of the pennant races.

From this angle it looks like Brooklyn over the Cards, with Boston finishing third, Pittsburgh (yep, that's right) fourth, New York fifth, and the Phillies sixth.

Over in the other loop I like the Yanks by five lengths or better when they hit the wire, with Boston second, Cleveland a close third, and the Athletics edging out Detroit for fourth-place money.

Many of those clubs which you noticed were bringing up the rear in the various Class AA and AAA minor league chases a month ago are right in the same spot now—with the end of the season only about a month away in most cases.

Judging from the above, a good many managerial changes probably will be made in the higher classification minor circuits between now and next May.

Blastin' Bill Butt, my boss on this sheet, says he's selling his new set of golf clubs to Ralph Dalessio, local dub, cuz the game's gotten too easy for him. Also, he says I'd better quit now—and so I will. Bet your dough on the Yanks and Cards, men.

LIEUTENANT JACOBS

(Continued from page one)

relieved of his duties as property officer upon the arrival of CWO W. D. Meeks, HC, USN from NS-HA.

Mr. Jacobs came to the Naval Dental School over a year ago as Administrative Assistant and while here acquired the worries of Personnel Officer also.

Tower Topics

By George E. Royster

I missed the boat last issue, I'm back again with some more of the latest scuttle-butt.

A staff dance is due to come the latter part of next month. I have heard a number of people express the opinion that something "New" should be tried to stimulate more interest in the dances held here at the Medical Center.

Some of the men feel that there is not enough emphasis placed on individual prizes for the different dances. Still others think that good M.C. with a well-planned program would bring around the "wall-flowers."

The enlisted men's dance committee would do well to think over a few of these proposals and try for a new high in interest.

After a brief period of indignation most of the men of the Naval Hospital feel that the new watch system is a "good deal." The men aren't working such long hours now and have more time for recreation and other off duty activities that were missed with the old method.

SEEN AROUND THE CO-POUND: "Hop Along" Willcutts having a tough time getting around with his bum leg. Jean Kipp and Clyde Schubert running one another in the "Jacks" contest held at a recent party. Pinochle the most popular card game over at Mess Quarters.

Its time to close for this time. We'll miss the issue of the 26th as it is getting to be leave time on again. See you after that!

Coming Events At 'Y' Cottage

The weeks of August 9 to August 23, the "Y" Cottage group will stay at home. Regular Sunday Night Suppers are an important feature.

Saturday, August 13, meet at Cottage at 1 p.m. for a swimming party, followed by a supper at Cottage. August 17, at 7:30 p.m. there will be a watermelon feed at the Cottage.

If you want to go dancing, join August 19, when we go out to G. Echo.

There's also ping-pong, ho shoes, and classical and popular records at your disposal, and much good companionship. Drop in soon won't you?

Having A Wonderful Time

All work and no play, they say, makes life a very uninteresting proposition. Realizing this, a lot of folks had a big time for themselves at a recent "Y" Cottage party on Brooke Johns' farm. Making with the smiles, above, left to right, are Winnifred Brooks, a Civilian Employee at NNMC, Brooke Johns, and Bruce Talbot, a Seaman stationed at the NMRI here.

FATHER MARTINEAU

(Continued from page one)

in the latter part of 1947 an attack was made on the Fifth Marine Regiment, 1st Marine Division at Tan-kua Bar, North China. Present during the rebellion which cost the lives of five young Marines, Chaplain Martineau was on hand to cover the situation and keep peace among the men who were wounded.

The new Chaplain is looking forward to a long tour of duty here at the Center and has already made many new friends and encountered a number of old ones.

MSC OFFICERS

(Continued from page one)

USN, MOIC of the Center. After the graduation address LCDR Bernard F. Duwel, MSC, USN, Commanding Officer of the school, gave a short farewell address followed by the presentation of certificates by Rear Adm. Willcutts.

SHIP'S SERVICE TAX

(Continued from page one)

There will be no tax on tobacco, radios, household appliances, candy, men's wear, ladies' wear, toys, stationery, and other items not falling in the categories listed above.

In or out of the water, actress Rita Daigle is always in the swim.

Center To Hold C.P.O. Exams Dec. 1

Qualified and eligible first class petty officers—men and women—are being advised to start studying if they expect to be ready for the Navy-wide competitive examinations for advancement to chief petty officer, acting appointment.

The Bureau of Naval Personnel set Thursday, December 1, 1949, the date for the second service exams to be held since the end of World War II in the present enlisted rating structure.

Examinations will be given throughout the Navy—on continental U. S. shore stations, on ships overseas—in all ratings. Preparatory to the examinations, BuPers has issued two directives outlining procedures to be followed in administering them.

A deadline of September 6 has been set for nominations to be forwarded by CO's to the convening authorities. Actual grading of the examinations will be done by the Naval Examining Center at Norfolk.

Computations of multiple tests will be handled in the Bureau of Naval Personnel which will announce results as speedily as possible.

The date of the examinations is August 1, 1949, all existing waiting for CPO, acting appointment, will be cancelled.

BuMed-Surg. Marks 107th Anniversary

Next Wednesday, August 31, 1949, marks the 107th Anniversary of the establishment of the Bureau of Medicine and Surgery.

Before the title of Surgeon General was established in 1869, the Bureau of Medicine and Surgery was conducted for twenty-seven years by four Chiefs, with the title Surgeon, in succession from

they were Surgeon William P. C. Harris, who served until 1844; Surgeon Thomas Harris, 1844-53; Surgeon William Whelan, 1853-65; Surgeon Phineas Horowitz, 1865-69.

The first Surgeon General was William Maxwell Wood, serving in relative rank of Commander, who was Chief of the Bureau from 1869 until 1871. Successors until 1922 all served in the relative rank of Commodore.

Since that time the rank of Rear Admiral has prevailed. The present Surgeon General is Rear Admiral Alfred A. Swanson, who has held the office since 1946.

Shown above are (left to right): LCDR H. C. Gavin, Chief Nurse; Captain and Mrs. B. W. Hogan; Captain and Mrs. Greaves; and Rear Admiral and Mrs. M. D. Willcutts, in the receiving line of the recent reception honoring Captain Greaves, new C. O. of the Naval Hospital.

Captain Greaves, New C. O. of Naval Hospital, Honored At Reception

Captain Frederick C. Greaves, who recently assumed command of the Naval Hospital here, and Mrs. Greaves were honored on Friday evening, August 19, at a reception given by the combined staffs of the Medical Center.

The party was held at the nurses' quarters, with an orchestra from the Naval Gun Factory furnishing music.

Among the noted guests present were Rear Admiral and Mrs. Clifford A. Swanson, Rear Admiral and Mrs. Glenn B. Davis, and Rear Admiral and Mrs. H. Lamont Pugh.

The new Commanding Officer is a native of Ladora, Iowa. He entered the service in 1923, at the age of 26. Before arriving here at the Med. Center he was Fleet Medical Officer of the U. S. Pacific Fleet.

Captain and Mrs. Greaves have two sons, Richard, 25, and Thomas, 21. Both sons are with the parents at present, and enjoy an occasional round of golf with their father.

The sons will return to California next month where Richard is a third-year medical student at Stanford University, and Thomas is a junior at Occidental College in Los Angeles.

The Greaves also have one daughter, Bobbe, who is in Honolulu with her husband, LTJG Edward Cooke, currently attached to the submarine service.

Dr. Amberson Makes Trip To Europe

In order to further identify, classify, and catalogue the large amount of scientific material collected during the recent African expedition by the U. S. Navy Medical Science Group, Cdr. Julius M. Amberson, MC, USN, head of the Department of Tropical Medicine of the Naval Medical School here, recently left for a two-months tour of Europe.

He will visit Germany, France, Belgium, Holland, Switzerland, Italy and England.

Follies of 1949 Stage Show Coming Here on August 31

"Follies of 1949," a super-slick blend of comedy, song, dance and magic, will be uncorked for the audience at the Medical Center at 1800 on August 31, 1949 when this Veterans Hospital Camp Shows musical revue plays here.

From the opening curtain to the show's finale, this revue, in the format of the "Scandals or Vanities"—captures the happy, care-free appeal of the best in variety entertainment, for the acts have been carefully selected to offer the maximum in listening and viewing pleasure.

Contributing strongly to the show's swift movement, and providing deft accompaniment for the soloists is the Milton Sherman Quartet (piano, trumpet, clarinet or sax, and drums).

Dancing her way through novel taps, pretty Joan Terry will delight you with her specialty called, "Rhythm Tap in Pirouette." She will spin her way through popular tunes with the act that servicemen from coast to coast have applauded.

Enlisted Dance Committee Holds First Meeting

A new enlisted men's dance committee has been formed and a special meeting was held on August 18. Each of the different commands were represented by one man.

The committee planned the next dance that will be held September 22 in the Recreation Building. They discussed various ways to build up more interest in the dances and also appointed Morton Rodman, DT3, to M.C. at the coming dance.

Lieut. Dunn Retires After 30 Years of Naval Service

Lieut. Dunn of the Naval School of Hospital Administration here soon will retire after thirty years active duty with the Hospital Corps of the Navy.

He first enlisted in the Navy as a Hospital Apprentice second class on April 3, 1919 at Columbia, S.C., and has remained on active duty since that time.

Mr. Dunn received gradual promotions through Navy wide competitive examinations when vacancies occurred and was appointed a Chief Pharmacist Mate in February of 1932. In those days that was the goal of all hospital corpsmen.

Upon the declaration of limited National emergency in 1939 he decided to remain on active duty instead of transferring into the Fleet Reserve. Lt. Dunn took the Navy (Continued on page four)

Corpsman Dove Attends Indian Confab In R.I.

On the second Sunday of August the Indian tribes of North America held a "pow wow" in Charlestown, Rhode Island. The affair took place on the Narragansett Reservation which was built in 1700.

Prot. Chaplain Paul Raynor Reports Aboard

On July 30, Chaplain Paul Jesse Raynor, U. S. Navy, reported aboard the NNMCM for duty. Chaplain Raynor was formerly attached to the Naval Air Station, Kaneohe Bay, Territory of Hawaii, and the Naval Air Station, Johnston Island.

Born in Kenya Colony, British East Africa, where his parents were missionaries, Chaplain Raynor arrived in the United States as a youth, to be educated at Wheaton College and Princeton Theological Seminary. He was commissioned a Chaplain in the U. S. Navy on May 27, 1944.

Recently Chaplain Raynor served in the Pacific area, and at the Naval Hospital, Seattle, Wash. Prior to entering the Navy, Chaplain Raynor was assistant Pastor at the First Presbyterian Church in Ardmore, Penna. Welcome aboard, Chaplain; pleasant cruise with us.

Editor's Note

In one of its recent issues the News ran a personality story on Mr. Robert Irwin, assistant foreman at NNMCM, who was then a patient in the Naval Hospital here. Mr. Irwin wishes to express his most sincere appreciation for the kindness he received from the staff and civilian personnel of the station during his hospitalization. As Mr. Irwin states: "Kindness is priceless."

'THE LAWS OF THE NAVY'

This poem, "Laws of the Navy" was presented to the News by Vice Admiral A. B. Cook, USN, now a patient here in the Naval Hospital.

Now these are the Laws of the Navy,
Unwritten and varied they be;
And he that is wise will observe them,
Going down in his ship to the sea;
As naught may outrun the destroyer,
Even so with the law and its grip,
For the strength of the ship is the Service,
And the strength of the Service, the ship.

Take heed what ye say of your seniors,
Be your words spoken softly or plain,
Lest a bird of the air tell the matter,
And so ye shall hear it again.

If ye labour from morn until even
And meet with reproof for your toil,
It is well that the guns should be humbled,
The compressor must check the recoil.

On the strength of one link in the cable
Dependeth the might of the chain,
Who knows when thou mayest be tested?
So live that thou bearest the strain!

When the ship that is tired returneth,
With the signs of the sea showing plain,
Men place her in dock for a season,
And her speed she reneweth again.
So shall thou, lest perchance thou grow weary
In the uttermost parts of the sea,
Pray for leave, for the good of the Service,
As much and as oft as may be.

Count not upon certain promotion,
But rather to gain it aspire;
Though the sight-line may end on the target,
There cometh, perchance, a miss-fire.

If ye win through an antarctic ice floe,
Unmentioned at home in the Press,
Heed it not, no man seeth the piston,
But it driveth the ship none the less.

Can'st follow the track of the dolphin
Or tell where the sea swallows roam;
Where leviathan taketh his pastime;
What ocean he calleth his home?

Even so with the words of thy seniors,
And the orders those words shall convey.
Every law is as naught beside this one—
"Thou shalt not criticise, but obey!"
Saith the wise, "How may I know their purpose?"
Then acts without wherefore or why.
Stays the fool but one moment to question,
And the chance of his life passeth by.

Do they growl? It is well: be thou silent,
So that work goeth forward amain;
Lo, the gun throws her shot to a hair's breadth
And shouteth, yet none shall complain.
Do they growl and the work be retarded?
It is ill, speak, whatever their rank;
The half-loaded gun also shouteth,
But can she pierce armour with blank?

Do the funnels make war with the paintwork?
Do the decks to the cannon complain,
Nay, they know that some soap or a scraper
Unites them as brothers again.
So ye, being Heads of Departments,
Do you growl with a smile on your lip,
Lest ye strive and in anger be parted,
And lessen the might of your ship.

Dost think, in a moment of anger,
'Tis well with thy seniors to fight?
They prosper, who burn in the morning,
The letters they wrote over-night;
For some there be, shelved and forgotten
With nothing to thank for their fate,
Save that (on a half-sheet of foolscap),
Which a fool "Had the honour to state—"

Dost deem that thy vessel needs gilding,
And the dockyards forbear to supply;
Place thy hand in thy pocket and gild her,
There be those who have risen thereby.

If the fairway be crowded with shipping,
Beating homeward the harbour to win,
It is meet that, lest any should suffer,
The steamers pass cautiously in;
So thou, when thou nearest promotion,
And the peak that is gilded is nigh,
Give heed to thy words and thine actions,
Lest others be wearied thereby.

It is ill for the winners to worry,
Take thy fate as it comes with a smile,
And when thou art safe in the harbour
They will envy, but may not revile.

Uncharted the rocks that surround thee,
Take heed that the channels thou learn,
Lest thy name serve to buoy for another
That shoal, the Courts-Martial Return.
Though armour, the belt that protects her,
The ship bears the scar on her side;
It is well if the court shall acquit thee;
It were best hadst thou never been tried.

Now these are the Laws of the Navy,
Unwritten and varied they be;
And he that is wise will observe them,
Going down in his ship to the sea.
As the wave rises clear to the hawse pipe,
Washes aft, and is lost in the wake,
So shall ye drop astern, all unheeded,
Such time as the Laws ye forsake.

By CAPTAIN HOPWOOD, Royal Navy

Hey, This Is Really Good!

Looking over the latest project of the Army-Navy Pictorial Publishers is Bill Heymann, HMI, a student in the Med. Photography School here. Well, he was glancing over the book until a photographer showed up. In the early part of October this firm will complete a pictorial study of the Naval Medical Center.

Patients Hold Chess Games From 'Frisco to Washington

The fate of the chess players who grew long gray beards pondering over the next move need never have happened if they had been part of the hospital chess players who operate on a cross country basis.

Tower Topics

By George Royster

It looks as if the golf course has really come into its own. Over the past weekend the course was packed and the old familiar cry of "fore" could be heard all over the compound.

Les McCabe, that huge hunk of flesh from old Pa., is spending most of his liberty time working on his "new" car. To those of you who haven't seen it (you must be blind!) it's that red and black job with some poor lady's table cloth used for windows. Mac likes to show off his steering wheel; it's the kind you can pull off and hand to those talkative backseat drivers while dashing along at a 30-mile an hour clip.

He is trying to find a suitable name for his beloved auto and is offering 100 autographed pictures of himself for the best name submitted. Address all entries to "Club 131", Main Quarters.

SEEN AROUND THE COMPOUND: "Humphrey" Dunlavey, the cashier technician of the Commissary crew, actually doing something besides eating! Mark Kaiser having trouble in pinochle and worse luck at ping pong. Bill Waldie at last admitting that the Indians are the best team in baseball. I'll be sued for slander for that one!

Tabor, Holstein, and Sesto still doing everything in the book to win at the pinochle table. It seems that whoever keeps score always wins. John Egan keeping the old Navy lingo alive with such expressions as "Hackie," "watchstanders' liberty" and many other salty terms.

The typewriter ribbon is worn out and that's exactly how I feel, so we'll secure for now. My leave ends on the 12th so until then I remain your New York correspondent Walter Winch—wait a minute, that's the wrong one. See ya later.

Letterman Hospital in San Francisco, California has an extremely active chess club whose members have challenged patients in other hospitals to long distance games. Everett Conary, VA patient on Ward 5-B, is currently playing two members of that group.

If and when a patient leaves a hospital he can either transfer his game to another patient or continue on his own. The American Red Cross Recreation Department act as liaison, handling the correspondence between the various individuals as long as they are patients.

In addition to Letterman General Hospital, the Naval Hospital at Oak Knoll has begun a similar "correspondence chess".

Any patient at NNMC interested in participating in this program may get details from any Red Cross Recreation Worker in Room 102A.

The Dental Explorer

By Bob Thompson

In recent exams for advancement in rating, twenty-five dental dillies made the grade and fourteen were rated. Two seconds have now sewn on their next to last stripe, namely "Spider" Cain and Dick Tuttle.

Replacing Cain and Tuttle as seconds were Bill Peterson and Don Preston, while ten got their first crow. These were Koepp, Chunn, Cobb, Crawford, Browning, Winkleman, Gartner, Carson, Moffett and Farthing.

Captain Crawford was present at quarters the morning of the 18th to congratulate those who made their rates.

Old Man Scuttlebutt says we are due for some direly needed replacements, this time about five. Hope he's right for a change as he's been full of it in the past.

Afterthought: Just glanced at the new All Hands and noticed the pictures of the PO Club at Charleston. Wouldn't it be nice if we could have something like that here? Ah hates to leave ya now but Ah'll see ya next month.

Crews Library:

Great Many Best Sellers In Library

A great many best sellers candidates for the best seller are to be found in Crew's Library. It is impossible to list all of them but a few noteworthy additions.

NINETEEN EIGHTY-FOUR George Orwell has just arrived written with power and compass this book portrays life in a completely totalitarian country. Reading it may not be a pleasure but an intense experience not to be missed.

TWILIGHT ON THE FLOOD is Marguerite Steen's sequel to still popular The Sun is My doing; like the former book the theme is still the slave trade, variations. Virile, vast and full of tropical richness.

In FRATERNITY VILLA Ben Ames has gathered together the best of the short stories about spot in Maine which he has made famous for the last thirty years. The talk around the big stove to dogs, guns and trout, strung mixed with gossip, local color, character.

Wave Whisps

By Betty Bookis

By the time this reaches you news of a WAVES barracks opened at NNMC will probably be, speak, "old stuff."

However, a few minor details from this end may prove enlightening to those of you who haven't yet gotten in on the scoop.

According to a recently issued memorandum effective the first part of September, the enlisted men, numbering 21 in all, will be housed in the east wing of Building 123, now being occupied by Department personnel. These same quarters during the war, it will be remembered, once teemed with WAVES who were on duty at various activities of the Center at that time.

Upon closing of the barracks, few women at the Center remaining in service after the emergence. They were paid quarters subsistence money and had to seek sleeping accommodations elsewhere in private homes, where they've been quartered up until the present time.

Consequently, in order to "be even" or "make ends meet," it came necessary for WAVES to employ certain methods of economy to remedy the situation.

In some cases, due to unavoidable poor eating habits and living conditions, the health of the individual suffered, thereby affecting to some degree, the quality of work and general outlook on life. Without a doubt, SOMETHING HAD TO BE DONE!

Official action was taken the morning of August 17, when WAVES officers, CDR Dunn and LTJG Crews, Bureau of Naval Personnel, were summoned to the Medical Center for a conference with Admiral Willcutts regarding availability of additional Corps WAVES to the hospital.

To those of us living out, who have been enjoying a certain amount of extra freedom and privacy along, the news will perhaps come as a terrific blow indeed. However, after a short period of readjustment we feel absolutely certain that our barracks will prove itself an answer to our prayers in more ways than one.

With his work in the background, instructor Otho Hon, HM2, poses for News photographer A. Canedo. Hon has been in charge of the Medical Illustration Department here for the past two years.

Our Own Greenwich Village

It is often said that great artists die before their work is ever truly appreciated. In the city of New York lies Greenwich Village, a small universe all in itself. Here artists from many different fields of endeavor live and help each other along the rocky road to success. Similar to those in "Greenwich Village," the men in the Medical Illustration section of the Center work in a small room, on the third deck of Bldg. 2. This closely-knit group of artists, under the able supervision of Otho Hon, HM2, carry on their work for the benefit of doctors, surgeons, and research workers of the Medical Department.

The term medical illustration brings to mind copy work, which is done through medical books or specimens. Some people have the mis-conception that no creative ability is

needed in the performance of such duties. If they could see this group of men in action, these persons might be inclined to change their attitude.

One of the many things which the medical illustrator is called upon to do is sketching and drawing certain organs of the body during a surgical operation.

This type of work often proves his creative ability. While sketching the desired organs he must have a clear picture of all the essential details in his mind in order to complete the assignment.

The Med. Illustration School was established in 1948, and since then has come to be regarded as a vital unit in the function of the Medical Center.

While working on the World Medical Atlas, Mrs. Margaret Palmer civilian medical illustrator, stops to answer one of the many questions asked her each day by students.

As in other fields, theory plays an important role in the training of students. Arthur Chain, left, looks on with Phillip Petty as instructor Otho Hon describes the different aspects of a drawing.

Often called upon to do detailed work with a microscope, the artist shown above is drawing with the aid of a Spencer Camera.

Eyes alert, Arthur Chain stands ready for the surgeon to begin an operation. The artist will try to sketch with his pencil, the different phases of the operation.

Color illustrations are just another job to the men of the M. I. Dept. Completion of the particular drawing pictured above required much research as well as a good background in Anatomy.

Crafty Hospital Club Plays It Cool, Nabs Intra. Softball Title

Although losing its final contest to revitalized Med. School, 8-1, on August 19, Naval Hospital literally breezed to the NNMC softball title by capturing the second half crown with a mark of eight wins and two losses.

Med. School's hustling squad came out of nowhere to take its last three games and tie Med. School Staff for second place in the final standings.

Sparked by the steady chucking of McTier, curveball artist, the Lab. School crew handed N. P. a 9-4 setback, took a forfeit from Med. Staff, and then dumped the Hospital.

Although most of their top performers had the duty, the Hospital swingers were able to field a team against Med. School, but couldn't turn the trick with their patch-quilt lineup.

In other final-week tussles the hard luck Dental School aggregation upset Med. Staff, 7-2, and then dropped a heartbreaking 5-4 decision to Hospital in a hotly-contested extra inning struggle that went nine stanzas before O.R. squeezed through.

Med. School's near meteoric rise came as a big surprise to other league teams. A previous 23-11 loser to N.P., M.S. seemed destined to finish in fourth or fifth place, but shackled N.P. in their second meeting and went on to a second spot tie. This week a round-robin tourney,

with Med. School, Hospital, and N. P. competing, found the Hospital swatters copping the meet-opener Monday, August 22, from fading N.P., 7-1.

Dwaine Smiley fashioned another one of his smooth, low-hit performances while timely base knocks, coupled with several fielding miscues by the losers, made it easy for the league champs.

Wessells, N.P. catcher who socked two doubles, ruined Smiley's bid for a shutout by sliding home after a mate grounded into the second out in the seventh frame.

Britt of Hospital homered with one on in the fifth after an N.P. bobble with two away put a man on first. The winners made only one earned run—but they all count.

NNMC SOFTBALL STANDINGS

	W.	L.	Pct.
(Second Half — Final)			
Naval Hosp. (O.R.)	8	2	.800
Med. School	6	4	.600
Med. School Staff	6	4	.600
N. P. Service	5	5	.500
Dental School	4	6	.400
Commissary	1	9	.100

ANOTHER SAILOR SHIPS OVER

Raymond Campbell, HMI, is congratulated by Captain B. W. Hogan, Exec. Officer of the Naval Hospital, recently after re-enlisting in the regular Navy for a three-year period. A Commissary technician, Campbell has six years of Naval Service behind him.

Chief Warrant Officer A. C. Lembeck and his wife stop at a sign post and check over their maps while hiking in the Shenandoah National Park of Virginia. Both are members of the Potomac Appalachian Trail Club of Washington, D. C. CWO Lembeck is stationed at the NMRI here. (Photographed by John Horan for the Washington Sunday Star Pictorial of August fourteen.)

Oh, Happy Day! Fifty-Seven Corpsmen Advance in Rate

A total of 57 hospital corpsmen stationed in various commands at NNMC were advanced in rating on the 16th of this month.

All told, three men made HM1, seven HM2, and 47 gained their first crow. 125 men passed the tests for advancement given July 30, but only 57 actually were rated this time.

It is possible that more will be rated next month, if an additional quota is assigned NNMC later.

The three men promoted to HM1 were Irwin E. Keith and Marvin M. Dandridge of Naval Hospital, and Edward P. Sweeney of Research.

Making second class were Leonard M. McCabe, Paul B. O'Brien, George E. Royster and H. C. Schubert of the Hospital, along with Med. School's Dean E. Armstrong, Leland W. Benson and William T. Sampson.

Weldon Gains Singles Finals; Golf Play Set

Only three men remain in the running for the NNMC men's tennis singles title, with Ruebush, Cummings and F. E. Weldon now left to battle for the diadem.

In a semifinal round singles tussle Weldon whipped Bingham, 6-1, 6-2, while Cummings and Ruebush now will meet, with the winner tackling Weldon for the victor's trophy.

Both match and medal play tourneys are planned for the Med. Center golf course over the Labor Day weekend, and the usual Blind Bogey also is slated.

CORPSMAN DOVE

(Continued from page one)

Sitting with the medicine men of all the tribes was Phillip Dove, Hospital Corpsman First Class, from the Medical Center. The two day meeting was very colorful, Dove stated; "a typical North American Indian Village was erected with all the members wearing the traditional costumes of their ancestors."

Frates Maps Plans For Cage Season

It is reported that Commander F. E. Frates, DC, USN, Athletic Officer of the base, will coach the varsity basketball team at NNMC this winter.

Usually reliable sources also have it that intramural basketball will start much earlier this year than last, and it is hoped to pick part of the Admiral squad from among the best players in the intramural court circuit.

Further information on the expected varsity and intramural cage setup for the 1949-50 season will be forthcoming in future issues, as it is released.

LIEUTENANT DUNN

(Continued from page one)

nation wide competitive professional examination for the Warrant rank of Pharm., to which he was appointed in February 1941, and he was commissioned a Lt. in the Medical Service Corps in July, 1944.

During his long and active career, Mr. Dunn served and visited almost all the countries of the world. His duty with the Naval Research Unit No. 3 in Cairo, Egypt, was his most educational, according to this worldly man of the seas.

His most recent and last assignment has been here at the Naval School of Hospital Administration. He has been an instructor in the subjects of civil readjustment, Naval organization, Naval hospital military customs and traditions, Naval reserve and retirement at Naval Hospitals, and maintenance methods.

Sportin' Aroun'

By Clyde Schubert

You know, there's been a lot talk about that Washington Senators baseball team lately? No, not because of its great accomplishments in recent weeks, but simply owing the Nats failure to do one thing and that is winning a ball game every once in a while.

Seriously, guys and gals, this ARE getting pretty bad when major league club can't do a better than come out on top four of 39 games.

One is naturally led to assume that something is radically wrong with any team that is unable make a decent showing against other squads in its league.

Earlier in the season we sidled experts often found fault with strategy employed by Joe Kuh Washington manager, in various situations. However, we always had to admit that he knew more baseball than we ever would.

But now it has progressed to a point where the D.C. aggregation finds itself the door mat of American League—and it appears that even the St. Louis Browns finish ahead of Clark Griffith's collection of individuals.

When one thinks about how Gr purchased Lloyd Hittle, promising young lefthanded hurler, from Oakland some time ago for a reputed \$50,000, (and apparently as many pitchers as the Oaks need) he can help but be a bit angry.

Last winter Tom Ferrick, reliable Nat relief twirler, was peddled to St. Louis. Then, in the now notorious Hittle folly, Milo Cand and Forrest Thompson went w—to Oakland.

Then, the genial (or is it SIMPLY these days?) Senator prexy fired Mickey Haefner, plucky portside for "indifference", later getting awful Al Gettel in a deal that sent Haefner to the White Sox.

Gettel was pretty bad as a Wash reliever and now has gone back to the minors—to that same shrewd Oakland outfit. Meanwhile the "different" Mr. Haefner has not chivalantly gone about pitching for ball for Chicago.

Now the Senators have been using a pair of outfielders—named two guys, named Robertson and Mele—in their infield; their hitting, or complete lack thereof, has been atrocious, and Eddie Yost youthful third sacker, often ad downright ancient.

Suffice to say, the Senators had better get a full-fledged AA farm affiliation, as well as some others with lower-classification clubs,—BUT, SOON.

LOCAL DOINGS: They've been having Blind Bogey tourneys regularly this summer on the NNMC golf course. Many folks don't have any idea how a Blind Bogey works. So here's some scoop on it.

In such a meet, everyone is assigned a handicap, depending on his or her average score. Each person plays 18 holes and his final net score is his gross score with his handicap subtracted from that. Then the lucky winning number is drawn from a hat. In case of a tie, the shooter with the lowest handicap takes the cake.

Incidentally, Captain A. J. Delaney, Chief of the EENT Department here, recently made a hole in one on the second hole, a rough 180-yard par three. It was the first ace recorded on that hole. Congrats, Dr. Delaney!

Well, have to catch that train west in a short while now. I'll leave time again—thank heavens. Column next time will come from the great Midwest—he back with a Waterloo, Iowa dateline on the 9th.

Howard Williams Orchestra Highlights Staff Frolic

Capt. M. J. Aston MOIC of the Naval Medical School presents Capt. Hernandez a desk pen set on behalf of all civilian and staff personnel of his command as a token of appreciation.

Capt. Hernandez New MOIC of Naval Hosp., Newport, R.I.

On August 15, 1949 Captain Vincent Hernandez, Executive officer of the Naval Medical School here, received his orders to report to the Naval Hospital, Newport, R.I. and assume the duties of Medical Officer in Command.

Before the captain left for his assignment the staff and civilian personnel of the Medical School presented the likeable Executive Officer with a desk pen set as a token of appreciation for his consideration and friendship during his tour of duty as executive officer of the Naval Medical School.

Captain Hernandez is a remarkable energetic person. His jovial and pleasant personality has a noticeable effect on those about him. Anyone in his presence immediately feels at ease.

It is known that the personnel at the Naval Hospital in Newport, will relate the Captain as much as they have enjoyed having him here as executive officer.

Enlistments Dropping Over Now 4 or 6 Years

(A) — Terms of enlistment and enlistment in the Regular Navy. Personnel now are for four years.

regulation, which went into effect September, renews pre-war enlistment terms. It eliminates the previously permitted three-year enlistments and re-enlistments which began in effect since 1948.

A Patient's Ingenuity

From Pot-Holders To Handbags, What Next!

Among the many interesting personalities that come and go here at the Medical Center is Mr. Nicholas Bombardier down on ward 3B. An ex-sgt from World War I. Mr. Bombardier has whipped the old "time on my hands" problem with a hobby that pays dividends in more ways than one.

Through his own ingenuity, Mr. Bombardier has created a handbag from a pattern of the old potholder mother had hanging in the kitchen.

Strange as it may seem this energetic man of 54 first began this work in May after entering the hospital for treatment. To him it is fun and a wonderful diversional activity. (Continued on page two)

Forrestal Tribute Donations Wanted

As a lasting tribute to the late James V. Forrestal, it has been suggested that a bronze bust of the first Secretary of Defense be placed in the Pentagon Building in Washington for his achievements as a public servant and a friend. (Continued on page four)

Surprised Mast Brings Giragosian, Commendation

Like a "bolt of the blue" came the summons that ordered A. J. Giragosian, HMI, USN, NMS, to appear before Captain's Mast recently.

With much kidding by the crew, Giragosian donned his regulation whites muttering all the while; "what in the heck have I done now?"

Captain M. J. Aston, MC, USN, Medical Officer in Command, Naval Medical School conducted mast in the usual formal manner. But instead of passing out a court martial or two, the following commendation was read:

"The Medical Officer in Command takes pleasure in commending you for your services at the U. S. Naval Medical School, NNMC, Bethesda, Maryland.

During your tour of duty in the Department of Physiological Chemistry you have demonstrated commendable loyalty, cooperation, and enthusiasm in the performance of your duties.

Civ. Workers Get Citation For Accident Prevention

The office of Industrial Relations department of the Navy has awarded nine shops and eight supervisors here for their outstanding achievements in accident safety prevention, during the calendar year of 1948.

The shops that received the award were; the Animal Laboratories, Dental Repair and Maintenance School, Fire Department, Lithographic Reproduction Division, Machine Shop, Maintenance Shop, Research Institute, Pipe Shop, Paint Shop and Metal Shop.

Among the supervisors of the different shops several received individual citations. (Continued on page four)

100 Hostesses Will Be On Hand Here September 23

With summer about over and the cool fall nights approaching everyone at this time of the year looks forward to dancing. The first fall dance here will get under way September 23.

One hundred lovelies from Arlington Farms will be on hand at 2030 on the 23rd over in the recreation building. The evening festivities will close about 2330 Navy Time.

Howard Williams' Orchestra will highlight the evenings' entertainment and will feature the lovely Miss Mary Lou Brewer as vocalist.

The dance committee states that Morton Rodman, fast ad-libbing Dental Technician, will act as master of ceremonies along with several acts that will be added to the show scheduled. At intermission chow will be served along with cold drinks.

As an added attraction two dance contests will be held, Jitterbugging and the all-time favorite Waltz. Prizes will be awarded each event. The uniform of the day will be dress blues or whites. Remember the date gents and don't keep the young ladies waiting, September 23 at 2030 in the Rec. Bldg.

Ships Service Tailor Shop Keeps Busy

Now under new management the medical centers ship service tailor shop is open for business. The male tailor in charge would like to inform the staff personnel that he desires to build up a large trade here by lowering prices and doing the work much faster than it has been in the past.

With October almost here and Blues coming into effect as the uniform of the day. This notice should help all hands in getting squared away for the winter months.

There has been some talk about moving the tailor shop which is located in the basement of the Recreation Building. If this is true the NEWS will keep you posted. The tailor shop is open from 0830 to 1700 daily during the week.

Interlude

Five cents in my pocket and tomorrow payday. So I sez to myself why not a cup O'Joe? OK, I'll take 15 and make a run to ship's service.

Bouncingly seating myself, I asked the waitress, "May I have a cup of coffee with cream, please?"

"Ain't got none made", was the answer I received.

"Do you think you might have some soon?"

"Dunno".

"Could I have a cup when you get some?"

"Reckon".

Even at this apparent failure I did not give up hope of getting a cup in the 15 minutes I had. But when the waitress gave a cup to the fellow sitting next to me I thought I had better say something.

"Do you have the coffee made yet?"

"Nope".

"Well, where did he get his from?, Heaven?"

"It's stale, but he said he didn't mind."

With that she walked away. Ten to go, but I am not one to give up easily. By this time I had scrounged a cigarette and a light from the fellow sitting next to me, enjoying a feeling of revenge for him getting the Joe. Suddenly I decided to try a change of tactics.

"Gimme-a-cup O'Joe," I yelled.

"You'll get it when it's made," was the curt reply.

"OK," was all I could get out. Then still employing my strategy I carefully moved over to the next fountain.

As the time had gone by I had become weaker by the minute. But I still had the energy to ask politely for a cup of coffee with cream. With visions of steaming coffee passing down the counter I slipped into dreamland. Awakened later, by the exhilarating announcement of; "Here's your coffee bub, Five cents please."

Till The End Of Time

Recently A. B. Edellman of the Medical Center staff was wed to Miss Miriam E. Musser of Washington. The wedding ceremonies were conducted by Chaplain Ernsmeyer. The maid of honor was Eleanor Perman and best man Dave Reeder from the Center. Above is a group picture, photographed by Chief Nielsen.

A Patient's Ingenuity

(Continued from page one)

tivity for one who will be a patient for some time.

In one month he has made 37 bags of various colors and styles. His new creations cover everything from table settings to a diaper bag. The diaper bag goes to one of the doctors who recently acquired the title of "pop."

Mr. Bombardier was born in Hudson Falls, N. Y., and since World War I has made his home in Washington, D. C. He has two sons and two daughters, all grown children that admire their father very much.

We invite you to stop by Ward 3B and see for yourself how to make handbags out of pot-holders. Mr. Bombardier says if you are not in a hurry and can furnish the material, he will be happy to make one for you.

It Pays To Play Safe

Rear Admiral Morton D. Willcutts says hello to William F. Rule, an old friend and Head Auto Mechanic, here at NNMCC after awarding him a citation for four years of safety prevention, on behalf of the Office of Industrial Relations in Washington.

ARC Plans Recreation Program For NH Patients

Although the Welfare and Recreation Department handles all the recreation facilities for hospital personnel, it is the responsibility of the American Red Cross to furnish recreation for the hospital patients.

In planning this program the Red Cross works closely with the doctors so that all their activities are medically approved before they are made available to the patients. Since each illness places a certain limitation on patient participation, the recreational activities are planned separately for each ward or group of patients which means, of course, that the program varies from ward to ward.

However, an average weekly two movies, one or two entertainment groups which may consist of a singer, pianist, magician or brief variety acts, a hostess or birthday party with games and refreshments, a quiz program with small prizes, and handicrafts taught by Red Cross volunteers.

For the ambulatory patients, in addition to the above, there are trips to baseball and football games, depending on the season, and to the theater.

New Choral Group Holds First Meeting

On the last of August, the newly-formed choral group held its first meeting in the Protestant Chapel in Building 2. CAPT. H. G. Gatlin, ChC, presided as preliminary business was discussed. Twenty-five persons representing all commands were present along with Chaplains Gatlin, Kerrigan, and Raynor.

During the course of the meeting, it was decided to form a choral group made up of both Protestants and Catholics and later on form two choirs.

Approximately 40 applications were received but probably due to conflicting watches some failed to appear. This problem, Chaplain Gatlin said, will be worked on in order for more to be present. Rehearsals are to be every Monday and Wednesday at 1800 lasting about an hour.

Wave Whisps

By Betty Bookis

Been hearing rumors that NN "lothario's" can expect those long anticipated "new" WAVES within the very near future. Eight have already put in an appearance—chiefs, Gertrude Bollhorst and Jean Starke and six HA's—Rue Olsen, Bernice Rodway, Rose M. Saunders, Velda Smith, Jean Suckomski and Sarah Woodward. More are due to arrive momentarily.

Pat Smith's orders for the West Coast have "finally" come through. We'll miss that little girl, 'deed will. The same goes for Margie Heinzman, who leaves around 17th for the First Naval District after completing a course in Physical Medicine.

Barrack's MAA's might investigate the possibility of making lions selling grandstand seats. WAVE washday. We notice that much talked about lattice work in the clotheslines hasn't as yet come into existence, and the girls, no less to say, are beginning to wonder just HOW LONG their supply of "unmentionables" will continue to hold out.

Our new Summer uniforms are ready in use at the Center. According to Lucille Berstler, the dress will be of the same grey seersucker material as the old "jobs" but instead open down the front and have buttons and a belt, items which are now lacking on present styles. Miss Berstler, incidentally, recently switched over to Center Command after being assigned as master arms to the new WAVE quarters in Building 123.

While on the uniform subject WAVES stationed at Bethesda have long been in dire need of a SMALL STORES on the compound. Perhaps something can be arranged now that our number is increasing by leaps and bounds.

Chief Benton's up and about after a terrific siege of "misery" down Ward 128—doesn't plan on moving aboard for a while yet.

The rest of us are busy battling our brains out tryin' to make ourselves at home in the place. 'scuse me, folks; gotta see who's goin' on 'round here.

The Chaplain's Corner

Lt. (jg) Edward R. Martineau, ChC, USN

"Hey, where ya goin', Joe?"

"Golly, I don't know—just lookin' around."

"Well, you must be goin' somewhere."

"No, just haven't decided."

"C'mon, Let's go to the Beach."

Strange as it may seem, there are actually a lot of folks on this station as well as elsewhere who just don't know what to do with themselves. Of course, there's the financial angle which has to be considered and many cases it is a good one. But, just to get to the point, there are a lot of things to do here on the station as well as off the station. When a person goes on liberty he should have in mind the purpose of re-creating so as to come back to work refreshed. "Getting off the Station," is a good idea and should be done with a healthy, refreshing purpose in mind. There are plenty of means here on the Station which could be used—from a quiet hour in the library to an exhilarating time in Station Bowling Alleys.

"Hey, where ya goin' Sunday?"

"Don't know—maybe to the beach."

"When you leaving?"

"Gosh, I don't know—want to come?"

"Yeh—let's leave early, okay?"

Whether you go to the beach swimming, hiking, or fishing; no matter what you have planned, do you fit God in on your schedule? When God said in his Commandments to keep the Sabbath holy, He intended exactly what He said. It is for the purpose of sanctifying the Sabbath that we are free. That is why we don't ordinarily work on Sunday. So, in planning that week-end or that day at the beach, aren't we bound to recall why we have Sunday off in the first place? Use your week-ends well, go on liberty and enjoy yourselves, but, whether you're on liberty or on the station, remember why it's called the Lord's Day.

God Bless you and love you!

There's An Art In Living and Learning

A NOTED WRITER of a popular magazine once stated, "there is a sharp line of distinction between merely making a living and the art of living itself." This, also is true in the Navy, although it is expressed in a form of varied opinion. As the old saying goes "there's the wrong way . . . and the Navy way."

One who can convert a mere policy into a living reality rather than into a drab routine, is turning his job into part of a theory that is concerned with the art of living. Many hospital corpsmen endeavor to do this. Most of them succeed!

In learning, "the tricks of the trade," one usually starts from the bottom. Therefore beginners in the hospital corps usually find themselves working on wards.

To help our readers survey the present-day hospital corpsmen we asked, George W. Jarrett, Robert L. Scooneas, Pete Heim and Leo Lavalley, to assist us in bringing to you this pictorial essay.

These four hospital corpsmen work on ward 5B. Laboring through long hours daily, and actually enjoying their work. The nurse on this ward remarked, "they all work together as a team helping and teaching each other the ropes." Thus proving our point. "Sailors making an art out of living itself."

Regardless of age that sharp Navy appearance requires a shave every day. George Jarrett (top left) starts his day at 0630 in order to be on the ward by 0700 for duty. Chow down is a familiar cry on the ward three times a day. Robert L. Scooneas and Pete Heim (above) prepare food for patients which is brought from a special diet kitchen. There's a technique in doing everything, corpsman Scooneas demonstrates a routine hypodermic injection. "In the right manner it's like taking an aspirin. When the smoking lamp is lit," states Bob Scooneas, so the boys light up, at this time conversation usually turns to Navy politics, girls and dates that have been discussed on off duty hours.

With a smile for the start of a new day, Bob Scooneas (top right), looks on after taking an early morning shower. George Jarrett grins as he reads patient's temperature. Corpsmen always feel a sense of accomplishment when sick patients start to recover from a serious illness. Medications play an important role in the recovery of patients. (above) corpsman Scooneas starts to prepare morning medications for the sick. Pete Heim (below) applies warm boric acid packs to patients eyes. This is done on the hour throughout the day.

Photographs by A. CANEDO

19 Year Old Seaman Tops Navy Golfers; Mid-Atlantic Group Takes Team Honors

By Ship's Editorial Association

A 19-year-old seaman has proven himself king of Navy and Marine Corps linksmen by winning the individual championship of the 1949 All-Navy Golf Tournament, and a foursome of club swingers representing the Mid-Atlantic Group of the Navy's athletic divisional system annexed team standing honors.

Scene of this year's drive-and-putt contest—the Navy's second annual links' tourney—was Marine Corps Recruit Depot, Parris Island, S.C.

A Good Day For Knight

Carding a 72-hole total of 298 on the 6,567-yard Parris Island course, John R. Knight, SN, USN, sweated out a two-stroke lead for the title. Knight, serving in the seaplane tender USS *Curtiss* (AV 4), came to the tournament as a member of the Pacific Fleet Group. His home is in Omaha, Neb., where he attended secondary schools prior to entering Oklahoma Agricultural and Mechanical College at Stillwater, Okla. He held the Nebraska State High School Championship for four years, won the Pikes Peak Open Tournament in 1944, and took the Oklahoma Men's Amateur Championship in 1946. Enlisting in the naval service in September 1948, Knight received his recruit training at Naval Training Center, San Diego, California.

Sportin' Aroun'

By CLYDE SCHUBERT

WATERLOO, IA.—Leaving Bill Butt, NNMC's own Horace Greeley, to toss together this issue of the NEWS singlehandedly your careworn sports columnist has been having a big time for himself here in the Tall Corn State. You guessed it—annual leave. Love it!

In an effort to get a late-season line on the various home state minor league baseball clubs, I've seen Waterloo and Davenport of the Class B Three-Eye League in action, as well as Cedar Rapids and Burlington of the Class C Central Association.

My beloved Chi-Cubs, dubs that they are, came up with nine runs in one inning against Pittsburgh Sat., and eight in a single stanza today (the 4th). Such power; such luck.

All right, so I was wrong. Those pitcherless Pirates now seem a cinch for sixth place, no higher, while Detroit almost certainly will take fourth in the American League over Philly—providing the Tigers don't go ahead and edge out Cleveland for third. AND, can the Yanks stave off you know who?

NNMC Notes: Word from the station revealed that Center Command wasn't too sure it would defend its intramural football diadem.

Black Jack Levi of N.P. says he'll field the toughest club in the loop, bar none, but there are some who mutter that they'll have to be showed.

Pleasing odors are wafted this way from the kitchen, as it comes time to partake of what we sailors term evening chow. So, with a passing thought about what fun lies ahead in Chicago next week—while en route back east—your wayfaring leave-addict says so long.

Oh, yes, the Naval Hospital lads copped the intramural softball title—post-season tourney and all. Honorable mention goes to Medical School's scrappy outfit. Be back with you (at NNMC) on the 23rd. Play it cool until then.

Shootin' The Sea Breeze

Keeping white uniforms clean, even under the most normal of situations, is an ever present problem. But along come a host of enemy agents in the form of coffee, tea, fruit juices, grease, tar, mud, etc., to further complicate the bluejacket's program of cleanliness.

Laundry people—and they ought to know—offer helpful hints for removing some of the stains and blotches with which sailors are most apt to come in contact—or vice versa. For instance, to remove:

- **Coffee** — (Whites) Launder. Bleach remaining stain with Javelle water. (Blues) Sponge with lukewarm water. If spot remains, sponge with carbon tetrachloride.
- **Ink** — (Whites) Use hydrosulphite, rinse, then apply oxalic acid. (Blues) Sponge with alcohol.

[Ed. Note: Next week, stains from lipstick, ice cream, mustard, paint, rust, etc., will be discussed.]

CIVILIAN WORKERS RECEIVE CITATION

(Continued from page one)

vidual awards for their efforts covering a number of years in accident prevention. Mr. Charles J. Dickson, Head Laborer, received his citation for three years of safety prevention.

Mr. Ernest E. Gramatte, Chief Lithographic Representative received his awarded for one year of safety. Mr. Jesse Malatesta, Head Painter for two years, Mr. William F. Rule, Head Auto-Cheanic for four years, Mr. Frank L. Schweitzer, Fire Chief, for three years, and Mr. Edward Smallwood, Head Laborer, also for three years of safety prevention here at the center.

Rear Admiral Morton D. Willcuts, Medical Officer in command of the Center, awarded citations to all the men on September 2, on behalf of the Office of Industrial Relations.

SURPRISED MAST BRINGS COMMENDATION

(Continued from page one)

Your perseverance and habitual diligence in the performance of clinical laboratory procedures, has resulted in a valuable contribution to the health and care of patients at the Naval Hospital here.

On December 6, 1948 you demonstrated keen judgement, tact and technical ability as a clinical laboratory technician by aiding in the diagnosis of an early malignancy in a patient at the hospital here. Due to your knowledge and subsequent surgical procedures this patient in a great part owes the remaining years of his life to your efficiency.

By your example of loyalty, cooperation and proficiency you have created a desire in others to emulate your performance. Your technical achievements are in keeping with the highest traditions of the Medical Department of the U. S. Navy.

Sharping Up For Tournament

As the NNMC Club Tournament draws near, many of the station linksmen are spending long hours practicing on the course. (above left) Dr. True of the Naval Hospital lines up a long putt while his guest stands ready to drop a short one. Photo by CHIEF SCHMIDT

Touch-Football Plans Drafted; As Season Campaign Nears

Ready?, one, two, three, hear those echos resounding of late? Yes, it's the "pigskin parade." Fever is running high throughout the command as the coming intramural Touch - Football season reaches its embryonic stages.

Information has it that six entries have been registered with the Recreation Office and one or two probabilities are highly possible.

Plans have been drafted for the placement of goal posts, to be erected in the outfield of the baseball area. Rules for the governing of play have been completed and equipment for play is heading our way.

Within the immediate future a meeting of all team captains will be held to iron out any obstacles for the efficient management of the coming campaigns.

Have you failed to enter your team? If so, the deadline for entering has been extended for another week. Should you desire to submit an entry do so via the Recreation Office.

Two of the expectant stronger aggregations, Center Command last season champions, and the N.P. Departments gridders have held several practice sessions in the past two weeks. The two teams show a decided edge in passing offense with the Center command squad showing a much faster ground attack than was prevalent in the championship squad of last season.

Now we ask you very confidentially, "Ain't she sweet!" It's Joan Diener, who, at the wee age of three, was chosen Cleveland's "Shirley Temple" in a national contest. Today she appears in Broadway musicals, and in spare moments sprinkles sparkle on NBC television shows.

Jewish High Holy Days

Rosh Hashanah (New Year), begins on Friday at sunset, September 23, and ends at sunset, Sunday, September 25. Yom Kippur (Day of Atonement), begins at sunset on Sunday, October 2, and ends at sunset, Monday 3, 1949.

For those who will be unable to go to their respective homes, a special invitation is extended by the Washington Armed Services Committee for attendance at religious services and for home hospitality.

All persons of Jewish Faith are requested to leave their names at the Chaplains Office.

'Pigskin Parade'

Throughout the coming season the Recreation Department and the Center News will publish the Pigskin Parade for your enjoyment. Selecting Ten of the top Intercollegiate and Professional Football games each week, giving you the reader, an opportunity to match your football know-how with fellow contestants.

RULES FOR CONTESTANTS

Draw a circle around your choice as winning team. Print score of game indicated as Tie Breaker. Print Name, Rate and Department telephone number clearly in space at bottom of sheet. Cut out and give it to one of the staff members in the Recreation Office.

Entries will be accepted at the Recreation Office only. All entries must be in on or before the day preceding the playing of selected contests. No contestants will submit more than one entry for each week. The winner of the contest will receive Two cartons of cigarettes with one ton going to second-place.

The Dental Explorer

By BOB THOMPSON

Cool days appear to be on the way back so sweaters will probably start popping up again. I mean girls will start sporting them—I mean that—oh, heck! Let's with some local news.

Dental's tennis-loving prosthodontist, Jack Cummings and you truly tried to gang up on Cl. Ruebush in the Center tennis final but failed and so the good doctor from Parasitology will tangle with Chief Weldon in the finals. I only heard about Weldon's play so I hesitate to make any comment but I will say that I believe Cl. Ruebush will furnish plenty of position.

Turning toward the lighter side of NNMC activities, the first day of the season, which is to be September, should offer some new and varied entertainment. Mr. Rodman has graciously consented to do this after twisting our arm for the nomination. Howard Williams for dancing and eats a Galle.

Bell, Boyce, Hawley, Ronald and Ford turned out to be the five staff men we have been awaiting. All reported in last week from Lakes and are now under the Coaches wing in 122.

In closing, let me say that any of us here don't mind a few fellows sharing our barracks but why do that sign "WAVES" have to go right over the front door? This is Mr. Thompson saying so long till next time.

FORRESTAL TRIBUTE

(Continued from page one)

Those of us who were privileged to work with Mr. Forrestal and who learned to respect and admire his tremendous capacity for public service and his unselfish and flagging energy in the service of our country, are delighted to know that we now have this opportunity to express our appreciation and admiration for all that he has accomplished.

Mr. Charles S. Walsh, finance officer (Room 210, Bldg. 2) is designated as the employee to receive donations at the Naval Medical Center.

Navy Cuts Down Enlisted Personnel Strength

College Credit Given Naval Personnel Now

Naval Personnel can earn one or more years of college credit for "in-service" purposes by successfully completing tests recognized by the Navy as the equivalent of either one or two years of standard college study.

Men on active duty, 21 years of age or over, who have completed one year of college or who have successfully completed the college level SAT general educational development tests are eligible to take the

Those who achieve a passing grade on this test will be considered to have the equivalent, for all in-service purposes, of 2 years of a standard college course.

The college GED tests may be taken at any Navy, Air Force or Marine Corps GED testing center. The 2CX examination, however, must be applied for individually. Description of the tests, minimum passing marks and methods for applying for them are contained in Educational Services Office here at the Center.

The advantage of having the successful completion of the tests in service record, BuPers examination, is its possible bearing on selections for billets or promotions.

Dramatic Story Unfolded As Doctor, Corpsman Operate

In a routine report recently made to the Navy Department by the commanding Officer of the USS VOGELGESANG, a dramatic story was told of an emergency operation performed by the destroyer's doctor and his chief hospital corpsman, on an injured merchant seaman on board a fishing craft, Edward J. McKeever, off Block Island on the night of September 1.

Doctor Rivers To Speak At Meeting

The first of the 1949-50 series of lectures, sponsored by the Chief of the Naval Medical Center, will take place next Friday.

Thomas M. Rivers of the Rockefeller Institute for Medical Research, New York, N. Y., will

The new Ship's Service Store opened with a bang recently. The above photographs were taken on opening day. Sales girls (left) await the rushing crowd. In the center picture Rear Admiral Morton D. Willcutts, MOIC of the NMMC, congratulates LTJG F. H. Engstrom, Ship's Service Officer, and LCDR Richard A. Williams, head of Ship's Services in the Potomac River Naval Command. Shown on the right is a section of the new store.

Latest Data On Pictorial Review Job

Field Photographers of the Army and Navy Pictorial Publishers of Baton Rouge, Louisiana, are here at the Medical Center taking activity photographs and individual photographs of all personnel—commissioned, enlisted and civilian.

All photographic material will be compiled in book form, with the complete text telling the story of the National Naval Medical Center—past and present.

These Pictorial Reviews will be offered for sale to all personnel, through Ship's Service, at the time the individual photograph is taken.

Pictorial Reviews are featured as recordings of service and as a means of informing parents and friends of personnel of the type of training, duty and activities in which they are engaged.

The publishers will prepare books in mailing cartons, for delivery to addresses as furnished by subscribers, via Parcel Post, Insured—prepaid. This is your book—Order Now.

RADM Hague Opens Safety Engineering Course At NSHA

Rear Admiral W. M. Hague, USN, Chief, Office of Industrial Relations, Executive Office of the Secretary of the Navy, delivered the opening address in presentation of the course of Safety Engineering at the Naval School of Hospital Administration here on September 8.

Admiral Hague, accompanied by Commander A. W. Zobel, Director, Safety Division, OIR, EXOS, was introduced by Rear Admiral M. D. Willcutts, MC, USN, MOIC of the Medical Center. Component Commands from the Center were represented by their respective commanding officers.

Entering the Naval service as an apprentice seaman in 1915 Admiral Hague was a member of the first group of enlisted men to be appointed to the Naval Academy at Annapolis, graduating at the top of his class in 1920. He attended Post Graduate School at the Naval Academy for a course in Naval Architecture and received his Master of Science degree at the Massa-

(Continued on page 4)

'Boot' Padres Learn The Ropes Here

Reporting to the Medical Center here last Tuesday, September 13, were three fledgling chaplains, LTJG's, Homer T. Connolly, Garson Goodman and Eugene W. McCarthy.

The "Boots" will be here for three weeks training under the watchful and paternal eye of Senior Chaplain H. Grady Gatlin, Captain, USN. Their period here will be devoted to orientation in Hospital Administration and functions of a chaplain in Hospital Work.

After their stay here, the three chaplains will go to other Naval activities in the area for indoctrination—and, later on this year, will receive regular duty assignments in the Navy.

It is interesting to note that young Chaplain Goodman is the third of three Hebrew chaplains now in the Navy. The News, in the name of all its readers, wishes the three men a pleasant tour here and lots of luck and fruitful work in the Navy.

Directs Only Qualified Men Be Retained

Anticipated budget limitations necessitate an immediate and sizeable reduction in enlisted personnel strength of the regular Navy.

Regular Navy enlisted personnel whose enlistments expire on or after 15 Oct. 1949 and who do not intend to re-enlist or extend their enlistments on board or who will not be recommended for re-enlistment now can be discharged three months earlier than the normal date of separation.

All persons attached to ships and stations of the Continental United States shall be transferred for separation in sufficient time to effect discharge not less than one month in advance of normal date of expiration of enlistment.

Recruit quotas already have been reduced to absolute minimum.

Early discharge of regular Navy enlisted personnel three months or less prior to normal date of expiration of enlistment is authorized for individuals not being recommended for re-enlistment and for those not signifying intention to re-enlist or extend their enlistment on board.

Such enlisted personnel on board all ships and stations will be transferred for early discharge to the maximum extent practicable.

In order that the Navy may maintain the best possible level of high caliber and well qualified career men, those who repeatedly commit petty offenses or are habitual shirkers, and men with unclean habits will not be recommended for re-enlistment. If you want to ship over, keep your record clean.

Navy's Health Rate At Highest Peak Since 1850

The Navy's health rate is higher than at any time since complete medical department records were started in 1850, Rear Admiral C. A. Swanson, Surgeon General of the Navy, reported recently.

Incidence rate for diseases, injuries and poisonings among Naval personnel dropped during the 1948 calendar year to the lowest ever recorded—442.8 per 1,000—and summary reports to date this year indicated the improvement trend is continuing.

An incidence rate of 446.7 per 1,000 for all causes in 1938 was the previous low.

The rate ranged between 436 and 495 per 1,000 during the period

(Continued on page 2)

Atomic Medicine School Under Way

The Naval Medical School here will open its course in Medical Aspects of Special Weapons and Radioactive Isotopes for Naval Reserve medical and dental officers today.

The Chaplain's Corner

Lieut. P. J. Raynor, ChC, USN

One of the most outstanding virtues that man can possess is Sincerity. It is a worthwhile quality in the lives of all men, but it should be particularly the possession of all who claim to be the children of the living God.

The statement of a self-styled atheist gives clarity to this fact. "Did I firmly believe, as millions say they do, that the knowledge and practice of religion in this life influences destiny in another, religion would mean to me everything."

I would cast away earthly thoughts and feelings as vanity. Religion would be my first waking thought, and my last image before sleep sank me into unconsciousness.

I should labour in its cause alone. I would take thought for the morrow of Eternity alone. I would esteem one soul gained for heaven worth a life of suffering.

Earth, its joys and its griefs, would occupy no moment of my thoughts. I would strive to look upon Eternity alone, and on the immortal souls around me, seen to be everlastingly happy or everlastingly miserable.

I would go forth to the world and preach to it in season and out of season, and my text would be, "What shall it profit a man if he gain the whole world and lose his own soul?"

It seems that this is the only consistent attitude for us to exhibit, not only toward things which we refer to as Eternal, but toward the duties of everyday. I wonder if such sincerity toward our daily activities would bring more healthy results.

"WHAT A DOLL"

Photograph by A. Canedo

A Song Instead Of Pills:

Musicians Bring Gladness At Ward Variety Parties

Recently the Red Cross ward parties here have had more variety, thanks to the talent and generosity of three accomplished musicians who are temporarily on the compound and who give freely of their time to entertain patients. They have willingly contributed to the program with community sings, musical quizzes, and record making.

Two of these musicians are patients. Everyone on the station is probably familiar with Mr. J. H. Rhodes—referred to quite often as "Dusty" by himself and those who know him best. He not only keeps patients in stitches with his wit and music, but he also makes the organ keys talk before the movies each night in the theater.

Also there is T. H. Jasorkowski, MUSA, who is so versatile that he can manipulate either an accordion or a piano with equal ease. He, too, is a patient and has added spice to many parties recently.

The third talented musician is Karl Wulff, HA, a hospital staff man.

The Red Cross always is interested in locating such talented people to aid in its program. Anyone who would like to volunteer his or her services will get a warm welcome from the Red Cross Recreation Department.

Navy Wins Award, Leads Bond Drive

On September 14 the Department of the Navy received the U.S. Treasury's Distinguished Service Award in recognition of the Navy's number one position in the Federal payroll savings program and its participation record in the recent savings bond Opportunity Drive.

Secretary of the Navy Francis P. Matthews was presented the award by Vernon L. Clark, assistant to the Secretary of the Treasury and Director of the Savings Bond Division of the Treasury Department, at a ceremony in the Pentagon, attended by the chiefs of Navy Department office and bureaus.

The Treasury's award was the 1st to be presented to a Government agency in connection with the Opportunity Drive.

The Dental Explorer

By BOB THOMPSON

After the mid-quarter quota came through, 9 more Dental techs found themselves with a higher rate.

Four of these, Stephens, Healy, Bilbo and, by heck, yours truly, got their second stripe, while Cowles, Williams, Knudson, Swedberg and Holmes passed out the cigars for the first time.

Out in the backyard in an off moment, Mills and Teet declared that the Dental Dukes will bear watching in the games coming up.

Our first defeat at the hands of the Center boys came at a time when we had very little practice but a lot of grid drilling has been going on since.

Mills and Teet, along with Pless, make up the new Dental Repair Class which started recently.

Another new arrival we failed to report was Chief Stinson who sailed in from Cuba several weeks back. The Chief is now hard at work with his headaches in 122.

"Long John" Pennington is now on leave and since Chief Benton is off the sick list we once again have a member of the fair sex on the Appointment Desk to listen to all your troubles. But, thank goodness, the waiting list is being trimmed down right along now.

Nothing new to report re: the newly renovated quarters. However, I shall try to keep up with all the latest developments and give you a first hand report next issue.

Right now, since this typewriter is getting contrary and won't work any more, I'll run along and scout around for something next time. See all of you at the Staff Dance on the 23rd.

Shown walking happily down the aisle just after their marriage Sunday, September 15, are Mr. and Mrs. Forrest Fulton. Fulton is a Hospitalman First Class on the staff of the X-Ray Department here, while his wife is the former Miss Ruth Taylor of Washington, D. C.

HEALTH RATE AT HIGHEST PEAK

(Continued from page 1)

1943-1947, with the result that the last five years constitute the longest period during which the annual incidence rate for all causes remained below 500 per 1,000.

The death rate among Naval Personnel for all causes in 1943 was minutely higher than previous year standing at 2.04 per 1,000 average strength as compared with 2.03 in 1947. However, the Navy's death rate was lower than in 1947 and 1943 in only two years.

DRAMATIC STORY—

Doctor & Corpsman Operate

(Continued from page 1)

McKeever was made in a small boat in the darkness of night under very adverse conditions of high swells and a choppy sea.

Dr. Bender reported that the injured seaman, John Parks, had suffered a laceration of the left wrist with severed artery and tendons and that his life was saved by the timely first aid given by shipmates in stopping the flow of blood.

The doctor and HMC Carden performed an emergency operation and administered plasma brought aboard the fishing boat from the destroyer. Details of how the accident occurred are not known.

Crews' Library:

Van Praag's Novel 'Day Without End' Best Seller

DAY WITHOUT END, by V. Praag, will be contrasted with old combat novels. Altho its language may offend conservative readers, is a straight-forward account of infantry warfare.

All three of the bulletin board in CREW'S LIBRARY have been dressed up with a bright array of attractive covers of the latest books to allure the reading public.

Among these we find:

THE ASPIRIN AGE, edited by Leighton, is a collection of stories by representative authors of some of the most significant and fantastic news events from 1919-1941.

THE RUNNING THREAD, by Mayrant. Here the lover of historical novels will see Charleston in its pre-war elegance, followed by the terrors of Sherman's march, occupation and the running of a blockade. Romance is provided by an Irish girl and the two men loved.

THE EGYPTIAN, by Walter. There has been nothing quite like this as a picture of ancient Egypt. A powerful novel.

Tower Topics

By GEORGE ROYSTER

Once again back at the old grid your leave-loving columnist is trying to settle down to work, quite a task, but here goes.

Miss Betty Jo Phelps, the NN beauty queen, has scored again. It seems that the Montgomery County Volunteer Firemen's Association selected her as their "Fire Fighter of 1949." This is a personal opinion but it seems to me that she is more apt to start a fire than fight one. Right, my friends?

The grapevine has it that a party is being planned for the 1st of October. Plenty of food, coffee and beer are promised to all who attend. It's been many months since the last NP party and if what I hear this should help me up for lost time. Say no more.

Due to the all-too-short leave I took place the first part of month I wasn't here to officially welcome the Waves aboard campus. Now that they are present, it seems to me that I should have a little "get acquainted" party. What about it girls, in the crew?

On September 24, dear readers, that epic movie "The Kid From Cleveland" is being shown here at NNMC. The plot centers around the World Champion Cleveland Indians and their climb to the 1st championship. A really great treat. Keep still, Schubert; remember your blood pressure!

Seen Around the Compound—Bill Johnson, NNMC's gift to women, says he has at last found "the" girl. At GWU of all places Sam Kiem with that ever-present smile. Guy Knapp with his multi-colored shirts. The whole crew lining up for the camera with the zealous movie stars.

George Funk going back "seconds"—in the pay line. I did you make out, big George? T. Levi, the Indian from Iran, do his best to talk Center Comm out of a recent football game. What happen, Jumpin' Jack?

That's all the room I have this time, people. But don't shed tears, for I'll be back with the next issue.

Freedom Train Exhibit Now Open At Nat'l. Arch. In Wash.

The Freedom Train exhibit, visited by 3,500,000 Americans on its month tour of the United States, begins a new "run" Saturday at the National Archives, Jess Larson, Administrator of General Services, announced today.

The exhibit, opened to the public at 9 a.m. Saturday, the exhibit includes documents, rare books and flags in the display cases in which they were shown on the Freedom Train.

Scheduled to be continued until January 1950, the exhibit may be seen from 9:00 to 5:00 Mondays through Saturdays and 1:30 to 5:00 on Sundays and holidays. It is planned to have the exhibit open at least one night a week for group and individual attendance.

At 3 p.m. Friday there will be an exhibition preview to which Cabinet members, Members of Congress, Government officials and representatives of civic and patriotic organizations will be invited.

Included in the exhibit are an 14th century manuscript of the Magna Carta, Thomas Jefferson's original draft of the Declaration of Independence, the Treaty of Paris of 1763, in which Great Britain recognized the independence of the United States, and George Washington's own copy of the Constitution and his first inaugural address.

Also in the exhibit are the Bill of Rights, President Monroe's address containing the Monroe Doctrine, the Emancipation Proclamation, Lincoln's Gettysburg Address, the 19th Amendment giving women the right to vote, and this Government's copy of the United Nations Charter.

A logbook of the best loved ship in the United States Navy, the Frigate Constitution, better known as "Old Ironsides," Francis Scott Key's original manuscript of the "Star Spangled Banner," documents owned by Lafayette, Benjamin Franklin, Daniel Webster, Robert E. Lee, Theodore Roosevelt, Franklin D. Roosevelt and Harry S. Truman, the World War II surrender documents are also part of the exhibit.

Lt. Chevrefils At Harvard; Wiltshire Assumes New Job

On September 15 Lt. Francis A. Chevrefils, MSC, USN, left for Harvard University to take a course in Public Health. He was Administrative Assistant to the MOIC of the Naval Medical School here at Annapolis.

A popular officer came into the service on December 3, 1924, worked his way up through the ranks and on July 15, 1942 he was commissioned as a Chief Pharmacist. He has had many interesting experiences throughout his career but his work with the Brazilian Air Force was particularly noteworthy. He holds three commendations from that country.

He was born in Worcester, Mass. on

August 25, 1905, Lt. Chevrefils (above) graduated from South High School there in 1923. He attended Northeastern University until his enlistment in the Navy.

While losing a fine officer in Lt. Chevrefils, the Medical School is gaining another in Lt. Marshall J. Wiltshire, MSC, USN (above, left). He reported aboard September 14, to assume Chevrefils' former duties.

They're Tops When It Comes To Tennis

Ensign Dorothy Hurley, NC, is shown about to receive a tennis trophy from Rear Admiral Morton D. Willcutts, MOIC of the Medical Center, in the large photo above. Miss Hurley finished second to LCDR Mary Sproul of the Waves (lower left) in the women's singles tournament. CDR Trenton K. Ruebush, MC, (circle) won the men's title by defeating Frank E. Weldon, HMC, (lower right) in the finals.

Ruebush Trips Weldon For Net Crown; Sproul Women's Champ

CDR Trenton K. Ruebush captured the NMMC men's tennis singles tournament by trimming HMC Frank E. Weldon recently, in a four set final round match, 6-2, 6-2, 3-6, 6-4.

The women's singles championship went to LCDR Mary Sproul, a Wave officer, who downed ENS Dorothy Hurley, NC, 6-4, 6-3, to cop the feminine crown.

Ruebush's accurate placement shots proved too much for Chief Weldon to cope with in their title match.

After dropping the first two sets

Weldon rallied to win the third one, only to see the eventual champion come back to close out affairs with a 6-4 triumph in the fourth session.

Ruebush lost only one set in gaining the Med. Center diadem. The titleholder clipped Goldstein, 6-1, 6-2, Bob Thompson, 6-1, 6-1, and Cummings, 6-3, 6-3, in reaching the final.

Weldon moved past Oesterling and later Bingham, 6-1, 6-2, in the lower bracket, in finishing second.

In women's court action, Miss Sproul outstroked Misses Kenyas, Bowdel and Bahr before stopping

Miss Hurley in the final tussle.

Miss Hurley took the measure of Misses Crosby, Cimina and Ann Bahr in the lower bracket. Sproul, Hurley and Bahr took part in a semi-final round-robin, with both the winner and runner-up subduing Bahr.

Miss Kenyas, rated one of the top women racket wielders at NMMC, had the misfortune of drawing the steady Miss Sproul as her first round foe. Otherwise she might have gone much farther in the tourney, according to other players.

It's A Truck-It's A Tank-A Chow Cart!

By WILD WOODY

A nurse, two doctors and five hospital corpsmen huddled against the bulkhead. They trembled in fear as a loud rattling noise came closer and closer. None dared to breathe. Silently they watched as it went by them. Then with a sigh of relief, they continued on their way. The chow cart had passed.

Anyone who is at all familiar with the hospital knows the dangers involved in trying to do anything but hide from these metal monsters.

If in your travels through the passageways you should happen to see a doctor trying to squeeze himself into the bulkhead or a corpsman swinging on an overhead light don't be alarmed—simply follow suit. This means that a chow or dish cart is coming and usually at record-breaking speed.

In case you happen to be new here and don't know the ropes here are some suggestions which should prove helpful. (1) When walking down a passageway look for all nearby exits. (2) Be certain you are in good physical condition as

(Continued on page 4)

RADM Roper BuPers Chief; Sprague Goes To ComAirPac

(SEA)—Rear Admiral John W. Roper, USN, is the new Chief of Naval Personnel and Chief of the Bureau of Naval Personnel. He succeeds Vice Admiral Thomas L. Sprague, USN, who this month was advanced to the new grade in his capacity as Commander Air Force, Pacific Fleet.

The appointment of Admiral Roper was made by the President and must be confirmed by the Senate as must Admiral Sprague's promotion to vice Admiral coincident with his designation as ComAirPac.

The new bureau chief moves up from Deputy Chief of Naval Personnel to the top BuPers post. He had served in that capacity since February 1947, the same time at which his predecessor became Chief of Naval Personnel.

Named to the deputy chief office is Rear Admiral Frederick W. McMahon, USN, who has been serving as director of aviation personnel in the Office of Chief of Naval Operations.

When Admiral Sprague assumes his duties in his San Diego, Calif., headquarters he will relieve Vice Admiral Harold B. Sallada, USN, who has requested retirement effective early next month.

As head of BuPers, Admiral Roper will direct a huge organization charged with the job of recruiting, training and administering naval personnel throughout the world.

Atomic Med. School

(Continued from page 1)

Center, will give the opening address. He will be followed by Rear Admiral C. J. Brown, M.C., USN, who will speak on Medical Readiness of our country and its part in the field of Atomic Medicine.

This course is expected to last about a week with diplomas being awarded to all who attend. Highlighting the long series of lectures and presentations will be Capt. H. H. Haight's Evaluation of Atomic Bomb Effects and a movie on Atomic Medical cases treated and research data as accumulated in Japan during World War II.

'Pigskin Parade'

By JAY BELL

This is the second edition of the News' Pigskin Parade for the 1949 gridiron season. You only get a crack at this super-duper football contest twice a month, so break out the ouiji boards, you Monday Morning Quarterbacks.

All entries must be in the Recreation Office no later than Friday, September 30, and no contestant may submit more than one entry in each week's contest.

The winner of each contest will receive two cartons of cigarettes, with the runnerup getting one carton. Don't delay—get YOUR entry in as early next week as possible. Sept. 30 is the absolute deadline.

Hot scoop from the sports staff. I like George Sauer's Middies over those Tigers on Oct. 1, while Schubert says he goes for the Gophers over Northwestern on the 8th.

Center Commanches Batter N.P., 43-18, In Football Inaugural

Scoring five touchdowns in the last half, the highly-regarded Center Commanches rallied from an 18-12 deficit to trample a heavy N.P. squad, 43-18, in the intramural touch football loop opener Monday, Sept. 19.

Out to successfully defend the championship it won last fall, the Center ball club held a 12-6 lead at halftime, then fell behind, 18-12, before coming to life and running the losers ragged in the fading minutes of play.

The victors, most experienced team in the league, drew first blood late in the first quarter on a scoring pass from Jay Bell, Center Command aerial ace, to George Royster, speedy back who ran away with the circuit's individual scoring title in 1948.

Each outfit tallied once in the second quarter, as Earl "Baby" Dennler sparked a surprisingly strong N.P. offensive attack. The underdog Gazelles then snagged a 18-12 edge on two quick thrusts early in the third stanza.

Trailing by a touchdown, a new experience for the champs, the Commanches roared back to quickly overtake and go ahead of Coach Jack Levi's squad.

Scoring through the air lanes three times in rapid succession, Center raced out in front, and was just too much for N.P. in the final frame. Pat Partridge, fiery Commanche fullback, intercepted a pass and ran it back 75 yards for a T.D. in the closing moments for the best play of the contest.

Bell, Royster, Partridge, Guy Knapp and George Funk all stood out for Center, with Dennler and

Eister N.P.'s best bets. The Gazelles had the weight, but poor quarterbacking proved disastrous for them on several occasions.

Although blanked, 32-0, by the well-drilled Center club in a practice tilt recently, the Dental Dukes are expected to field a strong team during the regular loop season once they get in additional practice and acquire more polish.

Seven teams are entered in the intramural grid circuit this fall, and league games will be played every Monday, Wednesday and Friday through early November. After the season ends, a three-team playoff is planned, with the playoff winner later tackling a loop all-star squad.

Since the D.C. area no longer has the benefit of Daylight Saving Time, the early fall of darkness in Oct. and Nov. may cause many weekday games to be pushed back to Saturday afternoons.

At present Coach Bell's Center Green Wave appears the class of the loop, but Jarrin' John Swinko predicts that he and his Print Shop mates will haul off the trophy this year, and Commissary also intends to make things tough for all its opponents.

Others in the seven-club circuit are Dental, N.P., Naval Hospital and the Operating Room. Wednesday Dental stunned Print Shop, 14-13, while Friday Operating Room tangled with Commissary.

Pictured above is the Dental Dukes touch football team as it polished its offense in a recent scrimmage. The Dukes, intent on dethroning the Center Commanches as station gridiron champions, have been drilling behind their quarters almost every weekday afternoon during the last few weeks.

IT'S A CHOW CART

chusetts Institute of Technology. His tours of duty have included service aboard the battleship USS Oklahoma, at various ports of the United States including the Navy Yards at Brooklyn, Puget Sound, Mare Island and Norfolk, as a

A 'Heil' Of A Deal

Munich, Germany (SAE) — A pachyderm with a fuhrer complex has caused no end of embarrassment to animal keepers who are trying to break a zoo elephant of the old trick of saluting with his trunk when he hears the words "Heil Hitler." And to complicate matters, the zoo also houses a parrot that persists in shouting the once-popular greeting despite repeated efforts to break the habit.

member of the Governor's staff in Panama Canal Zone, and as Commander of the Naval Shipyard at Boston.

He holds the Legion of Merit and Gold Star awards for exceptional meritorious conduct in the performance of outstanding services to the U.S. Fleet.

James Jackson, HM3, captain of the Operating Room softball team which captured the NNMCM championship, receives the victors' trophy from RADM. M. D. Willcutts, MOIC of the Center. Shown above, left to right, are Captain B. W. Hogan, Exec. Officer of the Naval Hospital, Donald Polizzi, RADM Willcutts, Roy Dahl, Albert Hays, Jackson, Charles Harbaugh, Robert Kaufman, Bill Sanders, Mark Kysar, Fred Caps, Earl Denler and Captain F. C. Greaves, Hospital C.O.

NNMC Golf Tournament Starts; Ford Medalist

Those cool, exhilarating September days are excellent for golf, and at the present time play is under way in the first annual Naval Medical Center club championship links tournament.

Chief Ford captured medalist honors by carding a five over par 74 for the 18-hole distance. Close on his heels came Dr. Fitzgerald with a 75, and Dr. W. D. King, who brought in a 76.

Number one "white hat" was William R. Butt, who had a 79. Others in the eight-man championship flight are Lesney, Creeden, Norman and James. Lesney and Creeden each shot 81, while Norman and James had 83's.

Just missing the top flight were Drs. True and Parker, with 84 totals, and McClenathon, who had a 85. Others in the first flight include Kline 86, Huston 87, Dinsmore 87, Cross 88, and Blanchard 88.

A total of 21 others shot 18-hole qualifying rounds for the tourney, and all entrants will be placed in flights according to their medal scores, with eight golfers to a flight.

The winner of the club championship and the runnerup will receive trophies, as will the first and second place winners in each other flight.

Duckpin League Starts Play; Kirby Loop Sec.

Many members of the NNMCM Duckpin Bowling League found their bones a bit stiff and their muscular coordination a little slow, as the 1949-50 station duckpin loop got under way Tuesday night.

Operating under rules of the National Duckpin Association, the league will bowl its games at the Bethesda Bowling Center on Georgetown Road, near Wisconsin Avenue, every Tuesday night throughout the next several months.

Ten teams are entered in the league this year. All squads will be given names of certain class ships of the U. S. Navy, as was the case last season. Teams, composed of five members each, are comprised of both civilian and military personnel working at NNMCM.

The popular "Fireman" Kirby has been selected to fill the post of loop secretary, a position he also held last year. Mr. Kirby, the circuit's top kegler during the 1948-49 campaign, found the going a little tough Tuesday.

Navy Gridders Launch Season Against U.S.C.

The Naval Academy's ever popular football team opens its 1949 season this Saturday, September 24, against Southern California's powerful Trojans on the Los Angeles Coliseum turf.

Probable Middle victims include Wisconsin, Columbia, and possibly Princeton. The complete Navy schedule is as follows:

Sept. 24—U.S.C. at Los Angeles
Oct. 1—Princeton at Baltimore
Oct. 8—Duke at Annapolis
Oct. 15—Wisconsin at Madison
Oct. 22—Penn. at Philadelphia
Oct. 29—Notre Dame at Baltimore
Nov. 5—Tulane at New Orleans
Nov. 12—Columbia at Annapolis
Nov. 26—Army at Philadelphia

"AND WHERE would you be going, my pretty maiden?" The photographer just happened by as Suzi Crandall tossed a pert over-the-shoulder peek in his direction.

Sportin' Aroun'

By Clyde Schubert

Once again the football season is upon us, and millions of chair coaches throughout the nation are busy second-guessing the various college and pro grid mentors and trying to pick the winners of those big pigskin 'classics' every Saturday afternoon.

Already considerable interest has been generated in the NEWS' regular fall feature, the Pig Parade, which each issue offers experts on the station a chance to pick up some free smokes merely by selecting ten victors and coming closest to the final score of each issue's Tie Breaker.

Early season predictions: Wake Forest and the Big Red of Cornell in the East, with Villanova's Wildcats a definite dark horse threat.

Down Dixie way the vaunted North Carolina Tarheels and the great back Charlie Justice appear the class of the Southern Conference, with Tulane and the Vanderbilt Commodores tops in the already tough Southeast circuit.

Over in the Southwest Conference, usually the worst loop in the country when it comes to selecting winners, Oak Walker and Southern Methodist mates are regarded as "the team to beat."

However, both Texas Christian and the Texas U. Longhorns have designs on the Mustangs' crown.

The Western Conference finds four outfits, Minnesota, Ohio State, Northwestern and, of course, defending champion Michigan powerful this year.

This writer sees Minnesota finishing just a nose ahead of the Buckeyes, with Northwestern and the Wolverines slight disappointments. Iowa's Hawkeyes may prove dangerous.

There's no denying that Oklahoma will be awfully hard to beat in the Big Seven, with Missouri probably second best. Nebraska and Colorado should be worth watching, though.

California's able Golden Bears must ward off the challenges from Southern Cal. and UCLA to snag Pacific Coast laurels. Washington Huskies and rejuvenated Stanford will have their say in things, too.

Upon asking the Editor if you truly should select an all-American team this time, I was told, "Go lost, or better still—Drop Dead! So that settles that."

NNMC Jottings: Center Command looks downright monstrous in the intramural touch football loop here. Print Shop's initial loss to Dental caused a lot of commotion. Little is known about O.R.—if the Surgery boys are half as good in softball, opponents had better take cover.

The NEWS staff will start printing college and pro grid predictions next issue. It's still a little early for us amateur experts to crawl out on that shaky limb.

Last minute flash: Our baseball sleuth, Rudolph Smoechopp, says he'll take the Yankees over the Cards in six games come World Series time. Queried about the Red Sox and artful Dodgers, the insufferable Rudy lisped, "They're off it—the tramps." And, Roys says the Indians DID NOT quit the American League.

DR. RIVERS TO SPEAK

(Continued from page 1)

speak on "The Relationship and Reactions of Host Cells To Viruses and Rickettsiae."

The meeting will be held at 8:30 p.m. in the auditorium of the NNMCM and is open to members of local Medical schools, as well as medical officers of the Army, Air Force, Navy, Public Health and Veterans Administration. Refreshments will be served following the lecture.

Armed Services Career Compensation Act Passed

First Medical Dept. Command Pennant Is Hoisted Here

The recent hoisting of Rear Admiral Willcutts' personal flag at the Naval Medical Center established a precedent for the Medical Corps of the Navy.

Made up of a white field and blue stars, this flag is flown from the main NNMCC flag pole and symbolizes that this station is under the command of an officer of flag rank.

At the present time there is no other command in the Medical Department of the Navy that has an Admiral as its Commanding Officer.

A personal flag has recently been authorized for flag officers of all the staff corps for use in accordance with the prescribed regulations.

Rear Admiral Willcutts' flag will be lowered only upon his detachment, temporarily or permanently, from the Center, and when a flag officer who is senior in the chain of command may happen to visit the Medical Center in an official capacity.

Hosp. Exec. Officer Bids Crew Farewell

It is with mingled sentiments of pride and regret that I take my leave of Bethesda, of pride because of having been given the opportunity to serve at this grand Institution of the National Naval Medical Center. It is an honor to have helped with the guidance and progress of this truly great Hospital.

Secondly, it is with sincere regret that I leave the close associations and genuine friendships which I have enjoyed during my tour of duty here. Each of you has given of himself that others may have of your knowledge, your kindness, and your care.

I enter upon my new assignment fortified in spirit by the kindly thoughts and well wishes of my friends and associates at this Medical Center, and with the hope that God will bless my efforts in the care of the sick—both of mind and of body.

With deep sincerity I wish to thank the doctors for their excellent work; the Medical Service Corps for its cooperation; the Nurses,

(Continued on page 6)

Medical Center Senior Staff Officers stand at attention as Rear Admiral Morton D. Willcutts' two-star flag is raised. They are (left to right) LCDR Zimmerman, NSHA; Capt. Mitchell, Dental; Capt. Enyart, representing the MOIC of Medical School; Capt. Greaves, Naval Hospital; Capt. Behnke, Research Institute, and Rear Admiral Willcutts.

Community Chest Drive Under Way At Center

On October 11, the 1950 Community Chest Federation Fund campaign got under way at the Medical Center.

The annual campaign will close late in November, but it is hoped that at least fifty percent of the NNMCC quota will be attained prior to the first report meeting on November 2.

Although the 1950 quota is somewhat higher than last year, it is based on corresponding increased numbers of personnel on board rather than larger individual contributions expected.

The NNMCC quota of \$6,356 for the Fund Campaign is apportioned among the several activities as follows:

NNMCC	\$1,300
NH	2,800
NMS	615
NMRI	756
NDS	615
NSHA	450

Radar Device Detects Objects In Body Tissue

A new technique for detection and localization of gallstones or other foreign bodies lodged in the soft tissues of the body has been developed by Dr. George D. Ludwig at the Naval Medical Research Institute here.

Although no adequate clinical trial of the method has been made on humans, experiments in animals have proven highly successful.

Disburs. Office Clarifies Issues Brought Up By Staff Sailors

Great News! The Disbursing Office will make every effort to change as rapidly as possible all pay records to conform with the new pay bill.

It is expected that by the end of October all accounts will have been changed to show the new rates.

The cooperation of each individual is essential if the task is to be accomplished within this time limit. Telephone calls or individual interviews requesting personal information should be eliminated as should all questions which arise from rumor campaigns.

These take up valuable time of the Disbursing Office personnel which could be better used on the pay records. So all questions should be saved until late next month when everyone—including the Pay Office—will know a lot more of the answers.

No changes in allotments should be made unless they are absolutely essential. It is to be noted in this connection that no new allotments are required to cover the increase

(Continued on page 2)

Capt. Hogan Commands Mare Island Naval Hosp.

Captain Bartholomew W. Hogan, MC, USN, who has served both as Executive Officer and Commanding Officer of Bethesda Naval Hospital since June 1947, expects to be detached during October for transfer to the West Coast; he has been designated as commanding officer of the Naval Hospital at Mare Island, California, as his next tour of duty.

The combined staffs of the several activities comprising the Medical Center honored Capt. and Mrs. Hogan at a reception on Friday evening 7 October 1949.

The party was held in the main lounge of the Nurses Quarters on the station, with music furnished by a Navy orchestra from the Naval Gun factory.

Wednesday night October 12th the enlisted men held a staff party honoring the departing NH Executive Officer.

The Hogans, with sons Bartholomew Toner, 15, and Thomas Francis, 11, and daughter Mary Ladlie, 3, reside in quarters on the station, and the family will be truly missed by neighbors and their wide circle of Navy and civilian friends.

NNMCC Active In Bethesda Trade Show

By Ralph Dalesion

During the recent and very successful Trade Show held in Bethesda on the 29th of September the Medical Center was on the spot with an enlightening and very interesting exhibit which included Navy Films, "Operation Crossroads" and "Tale of Two Cities" exploiting the effects and the actual detonation of the "A" Bomb.

(Continued on page 6)

Two star flag shows a Flag Officer in Command

Navy Nurses Take Over On Army Ships

The Surgeon General, Rear Admiral C. A. Swanson, MC, USN, states that Navy nurses will replace Army nurses on vessels of the Military Sea Transportation Service, which will be formally established on October 1, 1949.

Admiral Swanson further stated that approximately 50 sea duty billets on transports are available to active members of the Nurse Corps, U.S. Naval Reserve, in the grade of Lieutenant and Lieutenant Junior grade).

Applications are desired now from inactive naval reserve nurses residing within the continental United States to volunteer for this particular duty for a minimum period of one year.

Staff Dance Scheduled Here On Oct. 28th

On October 28 the next staff dance for all staff personnel attached to the Naval Medical Center will be held. Howard Williams' Orchestra has been engaged for the evening's entertainment.

Refreshments will be served and many young ladies from Arlington will be on hand. The uniform has not been announced, but promises to be a bigger success than the last dance.

The Chaplain's Corner

'Get Hep To Yourself'

By D. R. Kerrigan

You've heard the old story of the man who had never seen a looking glass. He happened to find a mirror one day and looking into it, exclaimed: "Why it's a perfect picture of my old grandpap!" The rest of the tale goes that when his wife was rifling his pockets that night she came upon the mirror and said vehemently: "So! That's the old hag he's been running around with."

That's about as near as the average man comes to knowing himself. When he listens to a lecture or a sermon in which his faults are minutely pointed out, he says to himself: "What a picture of old McGutzky!" or, "Somebody's been reading Jones' mail!" But he never applies the words to himself, never says; "Can I use this with profit in my own life?"

Human nature is a funny thing. Every man stationed here can do a good job of pruning and remodeling his neighbor's character. He knows just what's wrong. He knows, too, all about running mess halls, about giving lectures, about administering discipline. But he can't correct himself of the puniest fault because he doesn't really know himself.

You know the type that appears very humble. He says a lot of hard things about himself in the presence of others. He blames himself for this fault and that. But if one of his companions says the same thing about him, he's ready to fight!

Then there's the "he-man," the masculine type. He prides himself on his punch and verility. But he if he gets a pebble in his shoe, his account of the resulting blister brings the doctor at sick call to tears—almost. He mutters imprecations at the MAA when he has to drag himself out of the sack in the morning. He can't control his profane tongue. He can't do a day's work—without crying.

If we really knew ourselves the battle would be more than half over. If we could take ourselves apart like a watch and find the flat wheels, the broken cogs, the weak springs, we could do some intelligent repair work.

Tough Job To Tackle:

LCDR. Zimmerman

Now MSO In C At NSHA

Editor's Note:—This is another in the News' series of "Meet Your Commanding Officer" stories.)

Now Commanding Officer of the Naval School of Hospital Administration at the Medical Center is LCDR Max E. Zimmerman, MSC, USN, who entered the Naval Service in 1913 as a hospital apprentice second class.

On August 4 of this year he completed 36 years of continuous service in the Navy. LCDR Zimmerman was appointed Pharmacist on April 20, 1918, and Chief Pharmacist in July of the following year.

He made Lieutenant Junior Grade (HC) on December 1, 1940, and was elevated to his present rank of Lieutenant Commander in the Medical Service Corps on April 1, 1944.

During his long and adventurous Navy career, the NSHA's present helmsman has had overseas duty at Tutuila, Samoa and Pearl Harbor, and sea duty on battle-ships, transports and hospital ships.

Also, with the USS NORTH DAKOTA Unit of the Seamen's Brigade at Vera Cruz, Mexico in April of 1914, he was aboard the USS VERMONT and USS ORIZABA in the war zones during World War I, and on the USS RELIEF in the American Defense Area.

He has had duty as Personnel, Record Finance, Maintenance, Commissary and Ship's Service Of-

ficer at various Naval Hospitals during his long and illustrious career. LCDR Zimmerman has had duty as Exec. Officer or a comparable position at the Hospital Corps Schools in San Diego, Great Lakes and Portsmouth, Va.

While at San Diego HCS, students were increased from 200 to better

(Continued on page 5)

Farewell With A Smile

Capt. and Mrs. B. W. Hogan cut farewell cake at recent reception held in their honor, before leaving for Mare Island Naval Hospital.

As Winter Grows Near:

Hospitalized Patients Take Up Hobbies For Diversion

The recreation workers noticed a lull in the program last week while all eyes and ears were focused on the 1949 World Series. However the Gray Ladies who take the craft carts to wards have found that they are able to offer interesting and diversional activity to the bed patients and this work does not interfere with their favorite radio programs.

Wave Whisps

By Betty Bookis

Couldn't help but notice . . . energetic Betty Barley displaying remarkable skill with a football and later keeping in trim wearing a path to the phone booth . . . Lenora Hill going into the silverware business heart and soul . . . Ruth Quire bragging about her extraordinary job with "CNO"—CHIEF NURSE'S OFFICE, that is.

Virginia Nausedas nonchalantly cruising around town on a brand new bike . . . Joy Shrader limping from a bad case of "baseball-itis" acquired at a recent WAVE picnic—also considering seriously the "overseas" idea in a big way.

The new green paint job on the walls in the quarters and girls sleeping on mattresses piled three deep on the floor (MATTRESSES, not GIRLS) . . .

The SA who conveniently borrowed a chief's jacket for picture-taking purposes, only to find out later that the crowd didn't show. (Who dat?) . . . Gussie Denker blindly feeling her way into the mess hall the morning after the night before . . . the tricky bustle (or was it a booby trap?) trailing Nadine Calhoun at the dance.

Peg Bosco Alvey planning to join her hubby in Pensacola and Bosarge knocking herself out for transfer to same—still ending up with Jacksonville, no less; Rush off

(Continued on page 3)

Crews' Library:

George Howe's Experiences In OSS Give His Novel Punch

CREW'S LIBRARY has just received volume four in Morrison History of U. S. Naval Operations in World War II, entitled Coral Midway and Submarine Action, May to August, 1942. Here we have the first of the great carrier action of the war and the decisions, planning and preparations for "Operation Shoestring."

CALL IT TREASON is the Christopher Award novel by George Howe, an architect with an office in Washington, D.C., and a farm in Maryland. It is based on the author's experiences in the OSS and is an adventurous spy romance.

FLYING TACKLE is another Brone Burnett story by McCormick but is a football story this time, swift paced and true to life, with football strategy and solid coaching furnishing much inside, hot-to-play information.

THE PURPLE SHAMROCK Dinneen is the biography of the famous and controversial figure Boston politics, the Hon. James Michael Curley.

Charge Of The Light Brigade Here

By Ronald Bourgea

You think those dark, ominous chow carts are bad, huh? Well, let me tell ya' . . .

Yesterday I saw the "charge of the light brigade"! Yeah, right here in this very hospital. Although there were no actual horses, they might as well have been. I never was so scared in all my life.

I'm an ordinary guy. I go about my business complaining like everyone else. I sometimes walk down the passageways like, yes, must admit, everyone does. But this ain't safe anymore. It ain't it ain't, it ain't!

Yesterday I was out for a walk when down the passageway I heard the clatter and clink of shoes, like far away hoof beats. I looked out the window. No snow. It couldn't be Santa's reindeer. Then the phantom shapes came closer . . . They couldn't be Ichabod's mysterious riders—they all wore heads on their shoulders.

"Half a league, half a league onward." With a thunderous roar three wheel chairs turned backward, and propelled by pushing feet, sped by me. Beads of cold perspiration stood out on my forehead. Someone asked me, "What's a matter doc, you sick?" "No," I said, "just recuperating."

Very soon the patient-wheel chair-horsemen pulled up at Ship Service. They laughed heartily and goodnaturedly. I felt like taking over one of their chairs. I wondered what elixir (from the fountain of youth) they had been drinking.

I heard one of the patients complaining that he couldn't get enough speed. He was talking sending home for his outboard motor.

Actually, there is no moral to this tale, except, maybe, a lame horse is not altogether out of the race.

(Editor's Note: You said it, look at those Yankees.)

Tower Topics

By GEORGE ROYSTER

The past week was really hectic. The new pay raise was passed and the World Series was going full force. To add to the excitement, the boys up Annapolis way were going great on a two-game winning streak. Something has to break! Let's talk about that staff dance that was such a big success. The top dances ever held here at NNMCMC. Everyone was talking about it and saying the whole thing was "cool."

As usual, the music was good but the big change noted was more people dancing and the absence of those professional wallflowers. All the coming dances could be similar if the same cooperation is always exhibited. Let's do it again, and make the dance of the 28th even better.

During the past few weeks the Medical Center has been the subject of the Pictorial Review and all its cameramen. Judging from the other editions of the Review, it should make a fine album to help you recall the "old days at Bethesda". That six dollars they're asking for it is pretty steep but what's six bucks to us now that we have that pay raise? No wise cracks from you recruits.

Plenty of interest is being shown in all commands in the Center's Choral Club, and a highly successful year is expected. If you would like to learn a little more music and have a lot of fun too, contact Chaplain Raynor who can give you the full details.

Paul Murray, the Kentucky speedster, really went all out to set a new record for driving around a regular city block. It seems that "OPM" spent sixty-five minutes trying to circle a downtown block, with a Buick yet! Says bashful Paul, "I got lost and besides there were two red lights."

SEEN AROUND THE COMPOUND: A very large number of the staff suffering from different forms of football "hurts." The Orthopedic department is doing a booming business. No wise cracks, either.

Pete Stanley is back with his smiling face and long hair after a month period of duty aboard "Mo". W. D. Martin enjoying the farm section of the different newspapers. J. C. Woods tells me that his fan mail situation became such a problem that he was forced to take a job in the mail room.

One last word before we secure for this time. Charles "Fatso" Foreman and his associates are trying to start another station orchestra. They need the cooperation of all the fellows in EVERY command. You men who play an instrument are asked to contact Foreman so that a band can get under way in the near future.

WAVE WHISPS

(Continued from page 2)

Oakland, which isn't too far from home in Oregon.

Those endless comments from the shop gang, as usual, regarding unmentionable "unmentionables." SILLY BOYS! As if we'd ever divulge our womanly secrets! ... the thoughtfulness of some people like Margaret Heinzman, who will be remembered by many in more ways than one.

And last but not least—ALL THE WEDDINGS—Velda Smith, Bernice Rodway and Glory Supino. May we go so far as to predict at least a few more group marriages among the little group within the next few months? Wait and see! Well, so long for now—got a date with the photographer, if ya' know what I mean.

Personalities, Opinions About The Center

Wave Thinks Her Duty Here Is Okay

Over on Ward 126, Miss Virginia G. Nausedas, HN, spends most of her day working with patients who are dependents of service personnel.

Miss Nausedas is very much interested in sports and recreation. At present she likes the Medical Center but believes that there are not enough recreation facilities available for Waves. Of course, the Wave unit only recently arrived here and arrangements now are being made to cope with this problem.

She was born in Chicago, Ill., is 21 years of age, and was attached to Great Lakes Naval Training Station before coming to the Center.

Each issue of the News will contain pictures of and stories about various NNMCMC personnel. The staff hopes that everyone will cooperate in this new series of articles.

Med School Scuttlebutt

After being sidelined for about two weeks, the old tennis pro A. Giragosian has been seen on the courts trying to make a comeback. "Give me two weeks and I'm ready for anybody," is his favorite cry.

Welcomed back from TAD orders aboard the USS Missouri was Tiny Schroer, now working in the Pathology Lab. He had quite an enjoyable trip, with liberties in Paris and other ports of interest. I wonder if Barbara has heard the sea stories yet?

A new addition has been added to the MAA force in Pappy Kearns, who up to recently was working in the lab. He took over that pleasant job of trying to please everyone by keeping them off a weekend watch list. Quite a job with a pack of screaming lab techs always around.

Everyone wishes Harry Fallers, who just returned off a 30-day convalescent leave and is still a patient on ward 109, a speedy recovery.

"Those school bells are breaking up that old gang of mine" seems to be the leading item of interest in Med School lately. Donigan and Meeder, the two friendly mailmen, going to Phys Med and Lab School, and Swinko, Fulton, and Littleton getting ready to make that long journey to I.D. School at Portsmouth, Va.

Within the last few days, the Pharmacy & Chemistry, Phys Med, Blood Bank, X-Ray School and Lab Class 12 have all departed for duty at various hospitals around the country. Best of luck to all the fellows in their new assignments. New classes will soon start in all of the above schools with many new fellows already checking in.

Congratulations to two proud

(Continued on page 6)

HM2 Enjoys College Work Now Offered

While wandering around down by the Naval Hospital Pharmacy, we bumped into M. S. Fernandez HM2. Like all sailors, Fernandez had a lot to say. In answer to a question about the pay bill, he replied:

"In my opinion the new pay bill has boosted a lot of morale in the services. It has changed the attitude many persons have toward staying in the service. I haven't as yet definitely decided to make the Navy a career due to my desire to study."

Fernandez is 23 years old, and was born in Manila, P. I. After entering the service in 1945, he served aboard the U.S.S. Repose and in China.

The likeable Filipino said that thus far his duty here has been very interesting and commented, "I enjoy working at the Pharmacy where I have a chance to learn the functions of Pharmacy procedures."

Nurse Says, 'I'll Take The Navy'

Selected for interview, as the News began a series of articles on personalities at the Medical Center, Miss Jean Hart, ENS, NC, was approached and asked several questions pertaining to her duties here and what she thought about the Navy as a whole, as well as the new pay bill.

Miss Hart is of the belief that the Naval Service has some advantages over civilian life and work. She did not tell us her conception of what these advantages were, so we did not press the question.

She went on to say that the new pay bill has not changed her ideas about making the Navy a career. Miss Hart entered the Regular Navy in March of 1949. She was supervisor of the O. R. here in 1943.

At present she is working in Surgery and is very happy with her work. No doubt she is looking forward to a long and interesting career in the Naval Service.

Jimmy Palmer, HM3, and Mrs. Palmer smile as they prepare to leave on their honeymoon. Picture was taken here by Photographer Miller after reception at the "Y" Cottage in Bethesda.

'Y' Cottage Plays Host To EM At Wed. Reception

In a ceremony performed by Captain H. G. Gatlin, Miss Flora Ivie, daughter of Mr. and Mrs. Ralph Ivie of Gary, Ind. and George "Jimmy" Palmer, HM3, of the Medical Laboratory School here were joined in marriage at noon on Saturday, October 8, in the NNMCMC Chapel.

Following the ceremony a reception was held at the "Y" Cottage. It was attended by members of the "Y" and friends of the bride and groom.

In attendance at the wedding party were Ralph Ivie, Jr., brother of the bride, (best man) and Miss Margaret Pennington, maid of honor. The ushers were Johnny Lorig, MH3, Bill Rummell, HN, and

Don Sabean, HN, of the Med. School staff.

Refreshments and the traditional wedding cake were served. This was the first wedding reception ever held at the "Y" Cottage and everyone agreed that it was an outstanding success.

After much feasting and gaiety, the newlyweds left on their honeymoon trip.

The Dental Explorer

By BOB THOMPSON

What's that son, you say six pages is not enough? Tell you what I'm gonna do. Oops, where's Sid Stone?

Before this gets too zany let me welcome our new arrivals, WAVES that is, Elenore Karge, Phyllis McPeck, and Dorothy Lowden all from Great Lakes. Glad to have you aboard, girls. And speaking of Waves, Ruth, what happened in that softball game last week?

LT Goldstein has just been passing out cigars for that other half-stripe that came through. Doctor Goldstein, a former EM, is taking a post-graduate course here and is well liked by everyone.

I have been wondering what the feature story of the paper will be—the fact that we now have six pages, the pay raise, or Royster's cast? I know the Center boys lost a good man but maybe that will give us a better chance.

Now all we have to do is break Bell's leg. But Mills says we are certainly going to come up with something. The squad has been hard at work out back of the quarters and something is in the making.

Incidentally, I hear that the Redskins are trying to get our star DRM pupil, especially for the games that are televised.

Recent changes around the North Wing sent "Skinny" Baker over to the Storeroom to replace Klingensmith who, along with our fair haired boy, Chunn, went to the FMF at Camp Lejeune.

Farthing came back from the Rec Building to labor with CDR Turner, and Dental's clown, Mort Rodman, went over to take care of the red brick building.

Rodman, who failed to be with us at the last dance as threatened, will probably SEE ACTION at the next one. Wonder if he knows how to hang up coats?

Pennington came off leave to take over Baker's job at the Master at Arms desk and Hawley is over from 122 working with Dr. Rogers. A new prosthetic technician for the hospital ship, Consolation, is Chief Jenkins, formerly of good ole NDS.

I guess this should be about enough for now. Hope Blast! Bill says it's okay. See you again in a couple of weeks.

Loaded On 5th; Broke On 15th

By O'Gene EuNeill

The following is a "quickie" of a one act, two scene drama. Is it "true to life," you wonder? Well, read on and see for yourself.

Date: October 5, 1949

Scene: Ship's Service

"Cigarette, Ed?"
"No thanks, Hal; I have a pack. Want a cup of coffee?"

"Sure. Here, let me pay for it."
"No, no, I have plenty of change right here."

"Say, Ed, let's go up town and take in a movie."

"That sounds good to me. I'll pay. I think I owe you some money, anyway."

Ten days scurry by and then:

Date: October 15, 1949

Scene: Ship's Service

"Got a cigarette, Hal?"

(Continued on page 5)

Outstanding among the varied specimens on display are the above Snakes which are preserved in a Formalin solution used at the Museum.

Many steps are involved in preparing a specimen to be mounted. James Hutchison (top) takes the first step in the process. The Medical Technician employs many different chemicals in his work below. Hardy applies chemical to section of a Human Brain. Middle picture shows a completed Museum specimen.

Pathology At Its Best

Technical Training Produces Scientific Museum Exhibits

It's a known fact that the greater Washington area boasts a great many museums of various sorts, and probably one of the most unique of them all is the little-publicized Pathological Museum here at the National Naval Medical Center.

Wesley S. Hardy, HMI, and James T. Hutchison, HMC, work in this department of the Naval Medical School, and their job is to handle, prepare, and mount medical specimens for exhibit.

Because of their efforts, many physicians and surgeons in the Navy have the opportunity to study preserved specimens, thereby gaining a better understanding of the anatomical and physiological functions of the human body.

Much credit is due Hardy and Hutchison, who have been engaged in this work for some time, making it possible for young doctors to acquire technical knowledge that was not available to them a decade ago.

Wesley S. Hardy, Medical Technician in charge of the Medical School Museum, shows preserved specimen to visitor who is interested in the work.

Chief Hutchison washes specimen to be preserved.

Technician Hardy places specimen in glass container for mounting.

Cross section of a Heart being displayed.

Hardy makes with the smile as photographer A. Canedo watches him place a finished product on the shelf.

NSHA Notes And Quotes

By Benny Bernard

After a welcome Labor Day holiday, the second class of Medical Administrative Technicians settled down for some real "book-larnin'". From the far reaches of Subic Bay, 1ST, CVB's, Navy Yards, Recruiting Stations, Retraining Commands, Naval Air Stations, and what have you came students, one hundred in all, of which 105 are (2), one WAVE chief, and sergeants from the U. S. Army. Of the sailors, 10 are dental technicians who—get this—intend to set a scholastic record for future DT students of this school to shoot at. Just thinking of this scholastic feat gives your writer the DT's!

With a bit more than a month of schooling under their belts, the students seem to have the swing of studying, but all hands emphasize something called "midnight oil"—no doubt something new on the supply table.

MAT-2 class has its own wrestling champions here, too. Seems there's a couple guys named McKinsey and Noble who are throwing all comers. At least they give the students a fair work-out.

There's only one complaint, though. Something called "Cranial ositis"—acute, no doubt. If it means what I think, the instructors of MAT-2 will have a merry time trying to teach those ruckleheads!

The class was divided into 4 sections, with section leaders and a class adjutant—just like Boy Scouts and with so many students the division was a necessity. Assistant Scout Master—Class Adjutant that is HMC T. P. Fitzgerald, who, incidentally, became a poppa for the 2nd time on Sept. 5 when his (and a local medico) presented him with a 8½ lb. girl. The guy has the 2 a. m. feeding fits in with his homework (studies—his).

Chief "Jim" Crowe is adjutant of Section One, Chief C. F. Dinwiddie (old NH-6 fame) of Section Two, Chief J. Parrish of Section Three, and Chief H. D. Tannehill of Section Four. (There's talk of forming a section with M Sgt John T. Main, USA, as leader so the students won't be slighted.)

(Continued in col. 5, this page)

Linksmen Battle It Out In Tournament

Staff Cameraman Miller catches some of the color and drama in the recent NNMC Golf tournament. Such action-packed golf was common-place on the NNMC links during the tournament play.

Fitzgerald Beats James For NNMC Golf Title; Dinsmore Wins 1st Flight

Whipping Dr. P. R. James in the championship flight final, Dr. J. E. Fitzgerald stroked his way to the Naval Medical Center golf crown, in the recently completed NNMC club tournament.

His accurate approach shots and deadly putting proving too much for his foes, Fitzgerald thumped Dr. I. V. Norman, 7 and 6, and won from Chief W. C. Ford by default to gain the final round.

Ford, tourney medalist, and Fitzgerald, runnerup for medalist honors, were seeded No. 1 and 2 respectively, but through an error in

making the pairings both landed in the upper bracket.

Dr. James trimmed W. R. Butt, 7 and 6, and Dr. T. A. Lesney, 4 and 3, to move into the finals against the eventual victor, Fitzgerald. Ford had downed Chief Creeden in his first engagement.

Butt, smooth-swinging HMI, was conceded a good chance of copping top honors, but those old "hangover blues" did him wrong in his losing effort against James. Lesney tripped Dr. W. R. True, another dark horse threat, 3 and 2, in his opening match.

The first flight diadem went to W. H. Dinsmore, who clipped W. R. Kline 1 up in the final. Dinsmore previously had zipped past three earlier foes with relative ease, side-tracking Dr. Thompson, 5 and 4 in the semifinals.

Kline had a tougher time of it, but got by Dr. Parker in the semis.

Two linksmen who were far off form in the qualifying round, Dr. P. L. Bates and CDR F. E. Frates, Jr., DC, had to settle for action in the second flight, but both gained the final round there with ease.

(Continued on page 6)

Diaper Derby Brings Out Vital Statistics

Here we go with the first edition of the NNMC Diaper Derby, an exclusive feature of the News.

For an initial attempt at this sort of thing, we've got seven announcements to make. Each one, natch, is about the arrival of a Bundle of Joy, the coming of one of those cute little wiggly rascals called babies into some lucky family's life. And here we go.

On October 1 Nancy TILLMAN gave birth to a 7 pound, 13 oz baby girl. The father is Bruce TILLMAN, HMI, NMRI, and they've named the new addition Toni Sharon.

Also, on October's 1949 opening, Chief and Lillian RASMUSSEN became the parents of an 8 lb., 8 oz. boy. "Ras's" potential fullback of tomorrow is named Peter Clarke. All right, huh? Chief RASMUSSEN works in the Naval Hospital's Personnel Office.

Still another Stork paid a visit to the home of a Naval Medical staff man on October 1, as Edward and Martha MARTIN had a 7 lb. 4¼ oz. boy, whom they have named Christopher. Ed's a Pharmacy man from way back.

The next day the wife of CDR Merriel WHEATCROFT of NMRI presented her husband with a 7 lb. 10½ oz. boy. He's named Alan Holmes. What's the mother's name? Lenora.

On October 3, LTJG William RIORDAN and his wife Priscilla became the parents of an 8 lb. fellow they've named Malcolm Yonge. And on the 4th of this month LCDR Fred T. LOSEE, DC, became the father of new twins and their monickers are Charmaine and Celeste.

The 5th saw HMC Clement KEMPER of the Med. School and his wife Joan become the parents of a 9 lb. 12½ oz. boy named John Paul. What a lineman that fella should make some day. And that does it until the next issue.

Battle Of Century' Sees Nurses Tip Waves, 17-14

By Our Gal Sal

In at least one respect the evening of Thursday, October 6 will live infamy as far as sports-minded NNMC Waves are concerned.

It was then that the Medical Center Nurses overcame the Waves, 17-14, on the field of friendly strife, TBALL, that is.

In darkness crept over the field, Nurses made the final putout register a three-run triumph over their foes. Longest blow of the contest was ENS S. Hyle's run for the winners in the 2nd inning.

Another expert "blocking" by the first base guardian, who refused to remain anonymous, hindered Wave base runners considering their attempts to reach second base on hits or enemy errors. Schrader, HM3, Wave first baseman, was knocked off her feet several times as Nurses insisted on running into the initial bag. She picked up limping to the barracks with an injured knee, but should be back for action again soon.

Several acute cases of deflated morale were reported among the Wave following the gruelling tussle.

However, no one had to be admitted to the sick list. The Wave squad is determined to beat the Nurses aggregation when next they collide on the diamond.

ENS N. J. Crosby captained the victorious Nurses, while Ruth I. Quire, HMI, piloted the losers.

LOADED ON 15th

(Continued from page 3)

"Sorry, Ed, but I've only got a few left and they have to last me. Say, Ed, I'm fresh out of change. Will you pay for the coffee?"

"Can't, Hal. I've only got enough left to pay for the movie."

"By the way, Ed, don't you still owe me a little money?"

"Yeah, I do. I'll have to give it to you payday; I just haven't got it right now."

This, as most of you know only too well, happens twice a month—twelve months a year. THE END.

'COME ON DOWN and we'll go in for a swim,' says Kathleen Hughes, sunning herself during a recess from her movie-making duties at the studios of 20th Century-Fox.

LCDR. ZIMMERMAN

(Continued from page 2)

than 3000, finally averaging a weekly turnover of 750. The HCS at Great Lakes had 1100 WAVES under instruction during his duty there.

Center Command Stays Undefeated On Gridiron

Those Center Commanches are scalping one opponent after another as they continue on the warpath, toward their second straight NNMC touch football loop title.

Fighting off a stubborn Dental team, the Green Wave recently chalked up its second league victory by an 18-13 margin.

Later the Commanches rolled to another victory by dumping Print Shop's loosely-knit squad 20-6 thereby maintaining their loop lead.

Battling desperately throughout the first half, the Yellow Jackets held Center to a 14-0 halftime count. But the victors' deceptive running game then took its toll as the Commanches racked up 31 points in the last two stanzas to trample O.R., 45-0.

Truly a man of varied talents is LCDR Zimmerman. He has had duty at a Naval Gun Factory, Naval Hospitals, Naval Training Stations, recruit and intermediate Hospital Corps Schools, Naval Stations, at the District Medical Office and now at NSHA.

NSHA Notes and Quotes

(Continued from column 1)

Felicitations are in order for three enlisted members of the staff—E. J. Kaiser and J. M. Heald Jr., for advancement to HM3, and to HMC J. R. Doyle for reenlisting for four more dull years. (Boy! some guys just don't care what they do!) But really—none of the rest of us would trade our billets with anyone anywhere—unless it was to trade for shore duty anywhere else in the United States.

And so before "finis" is written, we wish to say in all seriousness, we do love our Alma Mater—actually—because the officers and students are a swell bunch—considerate, helpful, and a credit to the United States Navy.

So, as the dachshund said as he met his rear after encircling a tree, "Why, this is the end!"

Sportin' Aroun'

By Clyde Schubert

It certainly was a bad, bad weekend of the 8th for those sports lovers who either bet on the Dodgers or had half as much trouble picking the college football winners as yours truly did.

Yowie! Army's Black Knights of the Hudson throttled Michigan but good, George Sauer's sweet Navy ball club dehorned the Duke Blue Devils, my Iowa Hawkeyes were upset by unheralded Illinois, Penn. State made hash of favored Boston College, and Maryland gave much-praised Michigan State a great battle.

Say, how about that red-hot Kentucky outfit? The Wildcats fooled many folks (this guy included) by stomping Georgia, 25-0. In the third quarter Coach Bear Bryant's charges marched through the Bulldogs a la Sherman in the 1860's. Imagine G. U. Coach Wally Butts wonders "wha' happened?"

Am disgusted with supposedly terrific Vanderbilt's failure to show anything exceptional, as well as with Ohio State. Thought the Buckeyes would floor Southern Cal., but that one ended in a draw instead. Curses!

Quickly a look at the powerhouses around the nation: Army and Cornell possess the goods in the East, with snarling Villanova still belting its foes around, too. Tulane has its eagerly-awaited rendezvous with the Irish (?) of Notre Dame this weekend, and that the result of should go a long way toward determining the Green Wave's full potential. Kentucky? A tough cookie.

Will it be S.M.U. or the Texas Longhorns in the Southwest circuit—Or will Baylor foul up pre-season predictions? Hard to tell, but Southern Methodist must face Kentucky and Texas U. on successive weekends. So I like Blair Cherry's lads over Matty Bell's Mustangs this autumn. Drop the gun, Louie.

BASEBALL: Many people believe that Burt Shotton, venerable Dodger boss, exercised mighty poor judgment in using a still-weary Don Newcombe in the fourth Yank encounter, and again in not jerking Rex Barney, known to be hopelessly wild on occasion, sooner in the fifth and final struggle.

Hate to criticize the old gentleman, but I agree. Starter's role for Lefty Joe Hatten might have been a shrewder move than employing him solely in relief. Too bad Preacher Roe couldn't hurl again—wonderful how Allie Reynolds produced in the clutch—and didn't you guess that Joe Page would come through.

Right hyar at NNM, varsity basketball practice is slated to begin next week. Many men have vowed to do everything possible to give the Med. Center a really good court squad this winter.

ON THE SHELF: George Royster, Center Command's ace seat back and pass snatcher, was lost to the Commanches for the rest of the tough football season when he sustained a broken wrist recently—and in a scrimmage session, of all things. The cast doesn't come off until sometime in December at the earliest. Tough break for El Cid.

Also, Earl Dennler, fleet N.P. backfield man, is laid up with torn shoulder muscles—suffered in a practice game last weekend. He may be back before long, though. Jim Jackson, O.R. quarterback and passing star, has a bum knee now, according to reports. Who'll be next?

Paul Murray, the EEG Dept.'s Kentucky horseman, had better stick to the boss flesh. Recently a five-minute trip around the block by auto—down in Northwest D. C.—took Poor Paul 65 MINUTES. Que pasa?

Dancing The Night Away

With these smiling faces, need we say more? A wonderful time was had by all at the last staff dance.

Gazelles Romp Over Comm. Comets, 26-0.

Bouncing back after their ing defeat at the hands of the erful Center Commanches, the proved N.P. gridlers trounce scrappy Commissary squad, recently.

Scoring through the air to the accurate chucking of Jack Levi, the Gazelles drew blood, tallying twice in the quarter.

The Comets were no match the smooth N.P. team, which sparked by the outstanding play of R. B. Barker and the liant running of "Baby" Dem speedy back.

It wasn't until the second that the Comets dug in and hornly held the Gazelles to only T.D.

Cage Tryouts Start Shortly

Candidates for the Naval Medical Center's 1949-50 varsity basketball team will be asked to report for tryouts next week, according to CDR Frank E. Frates, Jr., DC, Athletic Officer of the station.

Frates anticipates that the first court drill of the season will be held Monday, October 17. He has urged that all men planning to vie for berths on this winter's Admiral cage club obtain all needed practice equipment as soon as possible.

Several performers are back from last season's NNM squad. They include George Funk, Indian Jack Levi, Carl Norris, Pete Stanley, Paul Glunz and Earl Dennler. Thus, this year's outfit won't lack for courtmen with previous Potomac River Naval Command loop experience.

NNMC GOLF

(Continued from page 5)

Bates nipped "Fearless Frank," 1 up in 20 holes, in their exciting final battle.

Bates captured his initial match, 10 and 8, took the second by default, and grabbed Dr. A. J. Delaney, 6 and 5, in the semifinals. Meanwhile Frates was polishing off his trio of opponents by respective counts of 7 and 6, 7 and 5, and 8 and 7.

Charles (Jolly Cholly) Harris, an HMC in the Center Command, had little to be happy about in his lopsided semifinal round beating by Frates. Both Bates and Frates might have gone a long way in the first flight had their qualifying scores been slightly lower.

Trophies went to the winner and runnerup in each flight.

Dental Dukes Edge Printers By 14-13 Count

Three minutes after the opening kickoff, the Dental Dukes marched at will through Print Shop's defense to chalk up an early 6-0 lead.

Throughout the remainder of the first stanza and the early part of the second neither team was able to exhibit any offensive punch. Midway in the second period the Dukes scored on a pass play to give them a 12-0 halftime margin.

Dental's kickoff to start the second half saw the crowd electrified by Don Poluzzi's 72-yard jaunt to pay dirt, behind excellent blocking.

The Printers then went on to dominate the second half of play and score late in the fourth period. However, they were unable to overtake the Dukes, who had capitalized on a Print Shop lapse in the third quarter.

At that time Jarrin' John Swinko was trapped in the end zone for a safety after receiving a Duke punt, by linemen Rose and Mills. Thus, the final count was 14-13, Dental, and the Dukes had their first victory.

MED SCHOOL SCUTTLEBUTT

(Continued from page 3)

fathers in the X-Ray Department on new additions to their respective families. Symond's the proud father of a boy and Chief Scales a proud father of a girl, both born recently here at NNM. (Plug for the O. B. Service).

That does it until next time.

'Pigskin Parade'

By Jay "Sausage" Bell

Greetings again, gridiron fanatics. If the games played on October 8 didn't make you give up trying to pick football winners, then you should remain undaunted the rest of the 1949 season.

Unless considerable interest is shown in the News' "Pigskin Parade" Football Contest this time, there won't be any more of them. So circle your choice to win in each of the dozen contests listed below and put the score down for the Tie Breaker. Entries must be turned in to the Rec. Office by Friday, October 21.

And here are the twelve brain busters, plus the super-duper Tie Breaker, for this issue.

Games of October 22
DARTMOUTH VS. HARVARD
WAKE FOREST VS. WILLIAM AND MARY
TEXAS CHRISTIAN VS. MISSISSIPPI
STANFORD VS. OREGON STATE
PENNSYLVANIA VS. NAVY
MICHIGAN STATE VS. PENN. STATE
MINNESOTA VS. MICHIGAN
NORTHWESTERN VS. IOWA
SAN FRANCISCO VS. ST. MARY'S
CORNELL VS. PRINCETON
MARYLAND VS. NORTH CAROLINA STATE
RICE VS. TEXAS

Tie Breaker: KENTUCKY _____ SOUTHERN METHODIST _____
NAME _____ RATE _____
PHONE NO. _____

O.R. Bows To Hospital Club In 13-0 Game

In their seasonal opener, the Hospital Browns and the O. R. Yellow Jackets fought ferociously throughout the first and second quarters, battling to a scoreless stalemate at halftime.

The hospital squad showed definite superiority throughout the third session, scoring its first T.D. three plays after the interception of a stray O.R. aerial.

It wasn't until the final chapter that the Yellow Jackets displayed any offensive power. Marching deep into Brownie territory, plucky O.R. was thwarted as the winners regained possession of the pigskin on another pilfered pass.

After a sixty-yard sustained drive, Hospital registered its final touchdown to blank the Yellow Jackets, 13-0.

Hospital Exec. says Adie

(Continued from page 1)

Waves, and Corpsmen for the tient labor; the Chaplains for untiring zeal; the Red Cross Grey Ladies for their unservice; and the civilian perso for their efficiency and good

It is my parting wish that favor my relief, Doctor Bra with the same spirit of coopera that I have enjoyed at Beth

My wife, young sons, and girl join me in all of these sments, and in the hope that shall meet you soon again on West Coast. The Hogan Wel Mat will be out at the Mare Is Naval Hospital for you all.

Unbeaten Combination So Far

Lineman Deloache digs in as Center Commanche quarterback Jay Bell waits for screen play to get under way; George Royster, halfback, catches pass for a first down in recent game with the Dental Dukes.

Hospitalized Patients take up Hobbies

(Continued from page 2)

Some of the patients are interested in leathercraft and E. Malysko, H-M3, learned that before he could make a wallet, it was necessary that he make a key case or comb-case to learn the lacing process. Wallets and slippers are very popular leather projects.

Seaman Donald Graff and Veteran J. E. Crutchfield have made several felt animals for their friends and they have given "some" to the craft carts for samples.

Clear at the end of the ward in a corner is Robert Gandre, AA, who was making model boats but soon learned that his felt animals were popular with the pretty nurses. Can you blame him for switching projects?

Would you like something to do during the leisure hours you spend while a patient? Then watch for the craft cart when it is scheduled for your ward.

NNMC ACTIVE IN TRADE SHOW

(Continued from page 1)

MOIC, NNM, RADM. M. D. W. cuts, MC, USN in the party who lead and CDR. F. E. Frates, USN executing the entire parade as Grand Marshall.

Two hundred of the Medical Center's Enlisted Men formed a Battalion and with little previous doing received the praise and applause of the officials and the crowd which lined the path of the very colorful parade.

The Bethesda Merchants had various floats with some well-chosen girls who later competed for title of Miss Bethesda.

The combined parade and show was a huge success, with the Institute of Public Health, which presented a large and very interesting exhibit, and nearly all organizations, Merchants, and Business Firms the area contributing largely to the success.

New Bank Opens Here For Staff

The Bank of Bethesda opened the doors of its new banking facility at the Naval Medical Center, on Monday, October 17, 1949, in brief commissioning exercises attended by officials of the bank, representatives of the U. S. Treasury Department and officers of the Medical Center. Mr. Frank Puhr of Washington assumed management of the facility with Miss Frances Stevens, Bethesda, to assist him as teller. Captain Frederick C. Greaves, Commanding the Naval Hospital, performed the ribbon cutting ceremony for Rear Admiral Morton D. Willcutts, who was in Chicago as a member of the board of Governors, American College of Surgeons, holding its annual meeting, and would not permit any deviation from the opening schedule previously announced by the bank.

S. Walter Bogley, Bank President, presented an orchid to Mrs. Willcutts, the first customer to appear at the teller's window. Living on the spot gave Mrs. Willcutts a slight advantage over the others who waited in line for the doors to open.

(Continued on page 2)

International Relations

Two Turkish Naval Officers inspect the sterilizing section in the main operating room. Shown left to right are: LCDR Safa Karatay, Istanbul Naval Hospital, Istanbul, Turkey; Lt. Nell P. Seroka, NC, USN, Supervisor of Operating Room; LCDR C. L. Crawford, MSC, USN, Admin. Assistant to Commanding Officer; RADM M. D. Willcutts, MC, USN, MOIC, NNMC; and CAPT Rekiş Kuntol, Chief of Medical Department, Turkish Navy.

Military Surgeons of U. S. Hold Meeting in Wash. Nov. 10

The Annual Meeting of the Association of Military Surgeons of the United States will be held November 10, 11, and 12 in the Hotel Statler, Washington, D.C.

Active and inactive officers of the medical, dental, veterinary, medical service, nurse and women's specialty corps are cordially invited to attend whether or not they are members of the Association.

A program of forum lectures and panels of the widest scope and of the highest character will be presented by most eminent authorities from the civilian profession as well as the regular military establishment and will be of interest to each of the various services attending.

Every corps in the Government Service will have representation on the program. A special program will be conducted by Reserve Officers of the Armed Forces entirely devoted to the affairs of the Reserve components on Saturday morning, November 12.

13 Navy Nurses Start Training Program Here

To augment their previous nursing experience, which included graduation from an approved school of nursing and registration in the States where they were practicing, thirteen new Navy Nurse Corps officers started a six week indoctrination course here October 14.

Under the instruction of Lt. E. Shields, NC, USN, they are receiving practical ward experience. In addition, they will become acquainted with naval hospital organization, navy nurse corps organization and general naval procedure.

Chief Nurse Advances To Rank of Commander

By RALPH DALESSIO

Miss Helen Catherine Gavin, Chief Nurse at the Naval Hospital here, recently received notification of her promotion to the rank of Commander in the Navy Nurse Corps.

This appointment became effective on March 16, 1949. Of the eight nurses advanced to Commander on that date, she is the senior "three striper."

A native of New Richmond, Wis., Miss Gavin came here from the USNH, Mare Island, Calif., on August 23, 1948. A Navy nurse since December 9, 1924, she was first appointed a Chief Nurse in 1939.

Miss Gavin, who now calls St. Paul, Minn., home, took her nurses training at St. Joseph's Hospital in St. Paul.

She considered her duty in the Philippine Islands outstanding because of the opportunities for travel it afforded.

Medical Center Host To Turkish Navy Med. Chief

Captain Refik Kuntol, Chief of the Turkish Naval Medical Department and his assistant, CDR Safa Karatay, inspected the NNMC during the past two weeks on their tour of U. S. Naval Hospitals under the American Mission for Aid to Turkey program.

Navy Medical Department Senior Officers to Attend Surg. General Symposium

Meeting Here Will
Take Place Nov. 7, 8, 9

A symposium of the Surgeon General with the Medical Department of the Navy will be held in the National Naval Medical Center auditorium on November 7, 8 and 9, 1949.

NH Chief Edits Books For Wards

Recently a book giving information on drugs and preparations available at the Bethesda Naval Hospital pharmacy was written by Edward A. Ambrose, HMC.

It is expected to prove extremely valuable to all medical officers, nurses, and ward corpsmen in their dealings with the pharmacy. Chief Ambrose recently left this station for duty with ComServLant.

Rear Admiral H. L. Pugh, MC, USN, Deputy Chief of the Bureau of Medicine and Surgery, will act as chairman of the meeting.

Rear Admiral M. D. Willcutts, MC, USN, MOIC, NNMC, will deliver the address welcoming senior field medical department officers.

Practically all naval hospital commanding officers, district medical officers, and many other senior field officers will attend.

The symposium will be highlighted by an address by the Surgeon General of the Navy, Rear Admiral C. L. Swanson, MC, USN, following the welcoming speech.

The Director of the Medical Division, Office of the Secretary of Defense, Dr. R. L. Meiling, will deliver an address in the closing afternoon session concerning Joint Medical Problems.

During the symposium, administrative policies involving both medical and dental problems will be presented followed by panel discussions by all departments of the Bureau of Medicine and Surgery.

Pertinent subjects will cover not only hospital and field administration problems but special emphasis will be directed to the personnel situation, reserve program, graduate training, medical research, and budgetary considerations.

(Continued on page 3)

Navy Dentists Attend A.D.A. Meeting In SF

The following dental officers attached to the staff of the Naval Dental School here participated in the professional program of the American Dental Association Meeting held in San Francisco, Calif., during the latter part of October.

They were: Captain L. D. Mitchell, Jr., Commander A. H. Grunewald, CDR B. W. Oesterling, CDR A. R. Frechette, CDR F. E. Frates, Jr., CDR T. A. Lesney, CDR R. A. Colby, CDR C. E. Meyers, and LCDR F. L. Losee.

Also attending the convention were Commander C. A. Schlack, Commander J. A. English, and Chief Dental Technician B. L. Taylor of the Naval Medical Research Institute.

When asked what she thought about Navy Nursing Miss Gavin commented, "As a career, I think it is the best offer for women."

The Captain, whose post corresponds to the American Surgeon General of the Navy, is attended at the Ankara Naval Hospital. CDR Karatay, an EENT specialist at the Istanbul Naval Hospital, earlier took post-graduate work at Presbyterian Hospital in New York and spent nine months doing cancer research in this country.

The Medical Department of the Turkish Navy has only 52 doctors at present, CDR Karatay said. Physiotherapy and surgical supplies, in-

Spins And Needles

By DICK HUFFMAN

Hey cats, let's scan this column news and views of all platters. First off, our subject is the George Shearing Trio. Their latest is 'SEPTEMBER IN THE RAIN.' Really a chick arrangement with English accent. Hit scout for: Pretty Patty Andrews has a killer that's going berserk. It's I CAN DREAM, CAN'T I? What a seductive selection. Perry Como's DREAMER'S HOLIDAY, sentimental but sweet, is really terrific. Also, red-haired Frank Warren just released a sultry ditty called ENVY. It's got an Afro-Cuban beat that's sweeping the country.

Grapevine has it that sweet sax solo will re-release Glenn Miller's albums. Here come those old memories. Watch for it. Remember if it's Miller, it's mellow. Maggie Whiting is now doing duets with Roy Acuff. Newest is 'PIN' AROUND. Look for it. Here's a hot flash on "Bop." Buddy Herman is leading the pack with LEMON DROPS. Charlie Ventura is placing with I'M FORGETTING TO BLOW BUBBLES, and it's INDEED, two oldies with the sugar-mop beat.

NNMC and Bank of Bethesda officials at ceremonies opening the banking facility here are shown at the left. On the right, Bank President S. Walter Bogley presents Mrs. M. D. Willcuts with the first pass book.

The Chaplain's Corner

LT. EDWARD R. MARTINEAU CHC USN

"So, now I'm restricted for a week—what can I do about it?"
"Well, I guess you'll stay restricted."
"You mean you can't do anything about it?"
"Why should I? There's no emergency, is there?"
"Well, it wasn't my fault."
"What do you mean, it wasn't your fault?"
"Well, I didn't do it purposely."
"Maybe not, but the responsibility is yours."
"So?"
"So, you stay restricted—and be a good sport about it."

The same old song and dance—without the fiddler. There are some people—even in a Naval Hospital, who can feel mighty sorry for themselves and then come screaming to the Chaplain about injustice. And, here's one bugaboo which is common—and only a crazy man would make an effort to help out.

There are certain rules which everyone in the Navy should already know about. How he learns it has been outlined. Navy Regulations, General Orders and Bulletins; all these are a means for communicating rules, etc., to officers and men. And there's the old reliable, the bulletin board.

If we don't get the word, it's our own fault—and if, as a consequence, someone gets restricted as the self-pitying friend in paragraph one, he should take it like a man. After all, who's to blame?

"How many Navy men read their contract before signing it?"
"I don't know—I read most of mine."
"You didn't read it all, though, did you?"
"No, I can't say that I did."
"Do you know everything in your contract?"
"Gosh, I never thought about that."
"Well, look it over sometime—see what I mean."

It's absolutely amazing how many Navy men actually did not read their contracts before signing on the dotted line. They agreed to fulfill a contract and did not know what they agreed to. The old gag about the ten-percent which doesn't get the word is absolutely true—but it could be changed to ninety per cent in this case.

In a survey made on another Navy base, we found that more than ninety per cent of the men had never read their contract in full. It's unbelievable but it's true! Is it any wonder then, that many of us find ourselves in sad situations?

How many of us read that bulletin board faithfully? How many of us listen to the occasional announcements with attention? This may not be a religious matter, but if it helps to keep you out of trouble—okay!

Don't be among that percentage which fails to get the word. It'll pay to know what you're supposed to know at the right time.

God bless you and love you!

They Can Check My Pulse

New Nurse Corps officers reported for duty 14 October to take a six-week indoctrination course. Shown left to right are: (back row) Ens. Dorothy B. Keller, NC, USNR, Belmar, N. J.; Ens. Rodgers, NC, USNR, Brooklyn, N. Y.

The Dental Explorer

By BOB THOMPSON

From the top of the tower to the sub basements, if any, everyone I am certain must be talking about the Kigmies. Proclaimed a boon to mankind, they seem to be a panacea for all the ills of this human race which certainly needs an injection of some sort.

These "lovable lil' critters" have nothing in their hearts but goodness and the desire to bring cheer to others.

Already they have pleased some of the more infamous hotheads of this world and they stand ready to help you with all your troubles in your hour of need.

So if your anger should ever get the best of you just think about the little Kigmies and their mission of bringing gladness to all of us and should you really fly off the handle please address a note to me and I'll try to get you one of the little darlings to kick around.

Now for an informal look around at the Dental Dillies, as the end of October comes in view. That means another Form K to fill out but that's life.

A now familiar figure at the Hotel Roosevelt could be none other than Smilin' Boy Plaske, our candidate

Introducing Clem, The Night Owl

By J. C. WOODS

The clock struck twelve and a cold wind lashed against the barracks windows. Inside everyone was sleeping peacefully, that is everyone except Clem Lockerocker. Clem has just returned from the local roller rink and with skates in hand he tiptoes up the stairs as quietly as a herd of enraged elephants.

Clem isn't a malicious fellow and he tries to be silent as he creeps into the dorm and knocks over a G.I. can. Retaining a vertical position, he gropes his way slowly down to his rack, where he brings into view umpteen billion keys and proceeds to look for the one to his locker.

After hours of tedious research Clem's quick mind tells him that he has either lost or misplaced the key. But this doesn't discourage our young hero. Quickly he dashes down to the lower deck and awakens the night M.A.A.

A few minutes later and in the same fashion as before Clem returns to his locker. Grinning broadly, he commences to manipulate a large pair of cutters on the lock, as quietly

(Continued on page 4)

Med School Scuttlebutt

By FRANK A. ADAMS

Did you happen to see that straggly right arm pitching of Lt. Barbara Butterfield, of the blood bank, in the last Nurses vs. Varsity softball game? Maybe Clark Gable should check up on some of the local talent in the next game.

Med School's famous fourso: Smith from Pathology, Parker Magan of the MAA force and person of Blood Collecting, may be holding tryouts for the radio show "Can You Top This," judged from the latest stories heard around the quarters.

Why is it Dodge, from Blood Chemistry, always seems to be on the verge of collapse when he reaches the barracks? Could it be he's thinking about field day?

Speigle of Blood Collecting may have struck a gold vein instead of the usual blood, judging from the flashy 1949 Ford Convertible he has been seen driving.

What's the story behind a lot of the Med. School Staff buying the local supply of road maps, looking for Web City? How about it, Pappy?

It's rumored around that Giggles of Blood Chemistry is trying to have 1st Class rating badge sewed on his scivvies. Any comment, John?

That loud noise everyone probably heard recently around building #112 was caused by that man working party assigned to take out the single beds and replace them with those already famous double deckers. It's a long way up from now on.

Well, that about covers it this issue. See you all in 2 weeks.

Local ARC Social Workers Praise Community Chest

As Social Workers working in one Red Cross Station, NNMC, we would like to point out that we know from experience that Community Chest agencies in numerous cases are of direct benefit to service personnel in this area.

We frequently call upon Chest Agencies to render specific service to families of servicemen known to us. We have found that they cooperate with us and seek in every way to help work out problems as presented. Some case illustrations of what we mean by this follow: (Names and Places are changed to prevent identification):

Anna Margaret, a 19-year-old daughter dependent of a retired Navy Chief, was sent here from Florida for extensive medical treatment. Upon her recovery her doctor recommended that she remain in the Washington area away from her family and make her own way.

Since this was Anna's first experience away from home, and she was without funds, she requested Red Cross help to get started. Red Cross was able to furnish financial help to her and put her in touch with appropriate Community Chest agencies.

They assisted her to find employment and gave job counseling. They helped with the problem of getting acquainted in the community and provided counseling service to her personal problems.

Chow Down at 'Y' Cottage Link Sausage with Waffle

Six-thirty o'clock waffle supper was served to young adults in the Recreation Room of the "Y" Cottage, last Saturday night. Places were set family style at a long red-checked table for twenty-five.

BETHESDA BANK

(Continued from page 1)

Convenience of the facility will be greatly appreciated by the total population of the Center, about 3,600, and save the Government considerable time in man hours previously lost by employees.

Heretofore they had been required to queue up for cash pay or be excused from work to go to the nearest bank, a half mile away through a congested traffic area, to have their checks cashed.

The bank officials are already looking forward to expansion of the facility to accommodate employees of the National Institute of Health nearby.

Miss Bullard, executive director of the "Y" Cottage, and assistants from the club members-cooked link sausages, waffles, and coffee for the group.

Most of those present had previously attended the three o'clock wedding of Miss Betty Platt and Mr. William Sickles at Our Lady of Lourdes Church, and the following reception held for wedding guests at the home of the bride's parents, Mr. and Mrs. Karl Platt, 4543 Montgomery Avenue, Bethesda.

Miss Betty Doyle had caught the bridal bouquet of white roses tied with white satin ribbon, which the bride tossed from the front steps of her parents home.

Tower Topics

By GEORGE ROYSTER

The first sign of winter has come upon us these past few days and along with the cold came a new variety of virus "Z". Virus "Z" is just a little worse than virus "X".

Dr. R. U. Cold, eminent ENT man.

Latest word for you golf fans is that work has begun on the final holes of the local NNMCMC. The additional holes will be NNMCMC one of the better golf courses in this area.

No definite date has been set for the completion of these last three holes, but the task should be accomplished sometime early next spring.

SEEN AROUND THE COMPOUND:

"Bones" McCarthy putting on a show about a "boot" Wave and her troubles going through a line. Don Poluzzi taking the usual remarks about his nose with a smile. Ralph Dalessio taking great pride in showing his favorite girl the NNMCMC... she's his father.

Hahn back at his old post on the commissary beat after 30 days leave. Les McCabe says he has an efficient horn on his car... it doesn't give a "hoot." The "first class" tables in the Commissary are outstanding... mainly because nobody uses them!

The last payday had everyone in the air over the changes that took place. It seems that some people noticed an increase in pay while others continued at the same old rate.

(continued to col. four, bottom)

Personalities, Opinions About The Center

A secretary in the legal office, Miss Leonora Hill, HM3, considers piano playing and bowling with the Naval Medical league her favorite pastimes.

Miss Hill, who was born in Campbellsville, Ky., re-enlisted in March after three years' service in the USNR.

The reason—"I enjoyed my duties in the Navy on my first enlistment at Charleston, S. C., and my two weeks training duty in the Board Room of the Naval Medical School inspired me to re-enlist in the WAVES."

On liberty, Miss Hill usually wears civvies, although her outfit depends on the occasion, she says. As for the future, the WAVE claims her plans are indefinite.

Philip Vendetti, an HN who hails from Kearny, N. J., can see no reason for a change in sailors' uniforms. "The Navy has always been in its own class, with the bell bottoms. Why change? Besides, who wants to look like a soldier?" he asks.

On the subject of women's

clothes, Vendetti claims the new look makes most young girls resemble females from the 1800's instead of 20th century gals.

This ward corpsman on 3-B came to NNMCM from the Great Lakes Naval Training Center where he attended the Hospital Corps School. He enlisted on July 6, 1948.

Vendetti is a graduate of Kearny High School.

Upon being encountered on Ward 3-C, her present duty station, Miss Virginia Marie Olko, ENS, NC, USN, smiled questioningly at the News' roving reporter and remarked, "Whose idea was it to take my picture, anyway?"

When informed that she had been selected as one of this issue's personalities, she blushed slightly and then commented, "Why me, when there are more than 130 others to choose from?"

ENS Olko hails from Pittsburgh, Penna., and took her nurse training at Homestead Hospital in Homestead, Pa. Two and a half years after becoming an R. N. she decided to come into the Navy.

One of seven children in her family, the pert little redhead was sworn into the Navy on March 18, 1949. She has worked on Wards 3-B, 4-C and 3-C of this hospital since then.

When asked about her work, the friendly Navy Nightingale replied, "I've really enjoyed it an awful lot and have learned a great deal. I prefer busy wards where there is a lot doing and always something new to learn."

Miss Olko voiced a special preference for general surgery. Queried about her opinion of the new pay bill, she laughed, "No comment on that."

SURGEON GEN.

(Continued from page 1)

Exhibits will be presented displaying Army, Navy, and Air Force Medical Department hospital and field equipment.

Following the symposium, the U. S. Armed Forces Medical Procurement Agency will meet here from November 14 through 19.

Crews' Library:

Grace Tully's 'FDR My Boss' Rated Highly By Reviewers

A book of great interest locally, is THE EDGE OF DOOM by Leo Brady, a member of the faculty of Catholic University. This tragic story is not for the squeamish but its unpleasantness gives the book added force and augments its realistic atmosphere.

Of all the recent books on Russia, one of the most important is STALIN, A POLITICAL BIOGRAPHY, by Deutscher. The author has done much painstaking research and gives us a thorough and objective presentation of the man Stalin as well as a background of the political development of Russia.

Anyone interested in adding to his knowledge of Franklin Roosevelt will want to read the latest book written by one of his entourage: FDR MY BOSS, by Grace Tully, his private secretary.

She is frank to say she automatically disliked everyone who disagreed with him and her tone is always affectionate and admiring.

If you are collecting odd titles, you will take note of THE MAN WHO CARVED WOMEN FROM WOOD, by Max White. The scene of this entertaining and somewhat eerie story is the French Quarter in New Orleans and you will be absorbed with the strange and mystic characters created out of the shadows. Sounds like a good choice for Hallowe'en, doesn't it?

Waves Upset Nightingales, 4-8, To Deadlock Series

Gaining revenge for a previous 17-14 loss to the Nightingales, NNMCM Waves outscores the Med Center Nurses, 14-8, in a five-inning softball game, October 17.

SHA Notes and Quotes

By BENNY BERNARD

A task for this issue is to put SHA "on the map." Some one has to do it, so just look for us in the Fire Bill, Zone 8, Building

After roaring out ahead, 6-1, in the first inning, the Nurses lost their punch while the vengeance-minded Wave team picked up momentum as the tilt progressed.

Trailing, 8-6, the Waves shoved across seven tallies in the last of the fourth to sew up the contest. Dottie Delangelette and Hernandez smacked home runs for the winners, both blows coming in the second stanza.

LTJG S. B. Butterfield and Betty Barley, an SA stationed at Research, hurled for the Waves, while ENS M. S. Hyler went the route for the losing club. Rusty Olsen, HA, caught for the winners, and ENS S. Savage was the Nurses' backstop.

The two squads enjoyed an "after game" party at the Nurses Quarters and agreed to a third game, to take place in a week or two.

Score by innings:

Waves	132	71—14
Nurses	602	00—8

several students who had, after a period of naval service, acquired German Goitre—ice-box muscles—tavern belly—call it what you will, and since the start of the term, "lakoby" has caused those erstwhile protuberances to subside to such an extent that the owners have begun to look quite chic. See what studying will do? (Just imagine a six-foot-two, 250-lb.-sailor looking chic!).

This has gone far enough (from the ridiculous to the sublime) as a man once told me—"nuff's unff and too much is a dog's dish. Until next time, Pax Vobiscum.

Students interested in botany will note the grapes symbolizing National Wine Week. The other stems belong to Pat Hall who seems to have got herself named Queen for the occasion.

Capt. John L. Enyart New Exec. Officer at NMS

A long and distinguished career follows Captain John L. Enyart, MC, USN, the new Executive Officer of the Naval Medical School. Replacing Captain Vincent Hernandez in this position, Captain Enyart has 22 years of Naval medical experience.

While interning at St. Elizabeth's Hospital in Washington, D.C., after graduating from Northwestern University Medical School, the young medico came under the influence of the now Admiral Pugh. After finishing his internship, Dr. Enyart entered the Naval Service in June of 1927.

Serving at sea and in hospitals here and abroad during his career, Captain Enyart has had duty aboard the USS WEST VIRGINIA, and at the U. S. Naval Hospitals in Pensacola, Fla.; Guam, M.I.; Philadelphia, Penna.; and San Diego, Calif.

During World War II he was Medical Officer in charge of the Royal Naval Medical College Hospital, Dartmouth, England, and was Staff Surgeon with A. G. Kirk, Commander Naval Forces, France.

After the war, he was Executive Officer at the Naval Hospital in

Philadelphia and from 1946-1948 he was Staff Surgeon with the Naval Advisory group in Nanking, China.

Married in 1922 Captain Enyart has one son, a lieutenant junior grade naval aviator at Portsmouth, Va.

Recipient of many decorations, Captain Enyart wears the Bronze Star, the French Legion of Honor and Croix de Guerre, the Chinese Government Order of Yon Heui (Cloud and Banner) and ribbons of the various theaters in which he served.

Although reporting aboard at the Medical Center on June 14, 1949, he assumed his new position just last month.

The career and experience which Captain Enyart brings to his new position at the Medical School will enhance both the value and prestige of that organization. Welcome aboard, Captain.

TOWER TOPICS

To add to all of the confusion, the clothing allowance was paid and you really had to be a mathematician to figure the whole thing out. Maybe by next payday things will be squared away. Let's hope so.

The past week proved just one thing, that the so called football "experts" are made of the same stuff as everyone else. One national "expert" missed 7 out of 10 in his predictions. Here I go with one as I sign off. Navy to beat the Irish this Saturday. If they can do it I can too!

Gazelles Edge Out Dental, Outscore Print Shop; Center Stays Unbeaten

Coach Jack Levi's N. P. Gazelles moved into the NNMC touch football loop spotlight recently by overcoming two well-regarded foes, in their bid for a playoff berth.

Levi himself rifled four touch-down passes to rangy Ed Corrian, glue-fingered end, to personally take care of a battling Print Shop squad, 24-13.

Shifty Carl Norris, alert Printer quarterback, accounted for both of the losers' markers by flipping scoring aeriels to John Swinko and Dick Waters. Both Print Shop six pointers came on the ancient "sleeper" play.

Russ Barker and Jay Jowett played good defensive games in the Gazelle line, while Lou Kovarik stood out in the Printers' forward wall.

On Saturday, October 22, N.P. edged out a tough Dental club, 7-6, in one of the season's top contests. After a scoreless first half, Dental struck pay dirt in the third period on a well-executed 30-yard pass play.

Outrushed and outgained almost all the way, N. P. stormed back early in the final frame, thanks to some nifty running by Earl Dennler and a couple of helpful penalties against the Dukes.

Levi, his passing far off form, finally hit Dennler with a bullet pass in the end zone to tie the count at 6-6, with ten minutes remaining. Then, on a fake place kick, he fired another pass to Dennler for the all-important extra point.

Dental, led by Charley Fries, fought back desperately after the ensuing kickoff but not until the final play of the bitterly-waged struggle did the losers penetrate the Gazelle 40-yard stripe again.

Jowett and Paul Murray looked good in the victors' line, but the surging Dental forwards definitely outcharged N. P. The Dukes clicked on 13 of 35 attempted passes, with N. P.'s Levi and Pete Stanley completing only 6 of 27.

Center Command's unbeaten powerhouse clinched a playoff spot by blanking Commissary, 32-0, in a dull tilt, for the Commanches' fifth straight triumph.

Jay Bell, Center star, tallied twice, on runs of 45 and 53 yards, and passed to Big George Funk for the other three Green Wave chalkers. Deloache's blocking sparkled for Center, and Tom Brothers stood out for Commissary.

Prior to their loss to N.P., the Dental Dukes shut out previously unstoppable Hospital, 20-0. Dischinger, the losers' passing wizard, had no luck while the officer-sprinkled Duke lineup pushed over a trio of tallies.

Operating Room took a forfeit from Commissary for the Yellow Jackets' first win, and Hospital forfeited to the Print Shop. It was also the Printers' initial victory. In each case the losing team did not show up to play.

This past week's schedule called for Center to tackle the Hospital Browns, and N.P. to tangle with O.R.

A three-team playoff will take place after the regular season ends. The top three outfits will meet one another in round robin competition to determine the 1949 NNMC intramural league champion.

TOUCH FOOTBALL STANDINGS (As of October 24)

	W.	L.	Pct.
Center	5	0	1.000
N. P.	3	1	.750
Dental	2	2	.500
Hospital	1	2	.333
O. R.	1	2	.333
Print Shop	1	3	.250
Commissary	0	3	.000

Basketball Practice Begins

Chief Sharon, assistant coach, gets an intra-squad scrimmage under way as the NNMC Admirals start preparations for their 1949-50 PRNC cage campaign.

DENTAL EXPLORER

(Continued from page 2)

for rat catcher of NNMC. Those Interstate Dances are quite the thing said B.T. just before he went whirling off to the dance floor with a lovely lass Friday nite.

Our Man Saturday Night Carpenter is another who has been giving the girls a break but he can't understand why that girl from Oregon Hall at the Farms speaks with a Southern accent. Don't fight it, J.S.

Then, of course, there is the one and only, Dangerous Dan Junior Holmes, likeable motorcyclist and singer whose entire repertoire seems to consist of one song, "That Lucky Old Sun." As far as the motorcycling goes—you can have it, I don't want it. But the Waves seem to love it, especially when C. J. revs the bike up out back.

And so it goes, but before I leave let me say it's been grand, rally it has, rally, rally—what's this? A football game?—Be lookin' at'cha.

Winners in the NNMC golf tournament are presented with trophies like the one in the center. Shown on the left are Dr. W. R. Kline, Capt. M. J. Crawford, representing the Dental Command, and Dr. J. E. Fitzgerald. On the right are RADM M. D. Willcuts, who presented the awards, Dr. P. R. James, Chief W. C. Ford, Capt. F. P. Kruez, representing NH command, and Dr. P. K. Bates. Two other winners, Dr. W. H. Dinsmore, on leave, and CDR F. E. Frates, Jr., on temporary duty in San Francisco, were absent when the pictures were taken.

'Pigskin Parade'

By POLECAT PETE

Thanks to some skulduggery by the football forces of Michigan, Iowa and Southern Methodist, local pigskin prognosticators found picking all the winners in last issue's "Pigskin Parade" contest an impossible task.

B. E. Moore, DT2, won first prize (two FREE cartons of cigarettes) by having only two losers and picking S.M.U. over Kentucky, 21-14. That took the cake.

Second place and one carton of smokes went to Richard B. Murray, YN2, a patient in the hospital here, who also had two losers. However, he missed the actual score of the Mustang-Wildcat battle by a wider margin than Moore did.

Our contest editor informed me that no one else had less than three losers. If you insist you did better than that, consult your Senator on the matter.

Now for this issue's contest. Entries must be turned in to the Rec. Bldg. by Friday, November 4. Circle your choice to win each game, and write in predicted final score for the Tie Breaker.

Games of November 5:

CLEMSON VS. BOSTON COLLEGE
GEORGIA TECH VS. TENNESSEE
HOLY CROSS VS. COLGATE
ILLINOIS VS. INDIANA
LOUISIANA STATE VS. VANDERBILT
MARQUETTE VS. SOUTH CAROLINA
MINNESOTA VS. IOWA
OREGON VS. WASHINGTON
PENNSYLVANIA VS. VIRGINIA
SOUTHERN CALIFORNIA VS. STANFORD
WAKE FOREST VS. DUKE
YALE VS. BROWN

Tie Breaker: TEXAS _____ BAYLOR _____

NAME _____ RATE _____

PHONE NO. _____

Coach Frates' Court Squad Hard At Work

Formal varsity basketball drills started this week as Coach Frank E. Frates, Jr., began readying a group of Naval Medical hardcourt hopefuls for the coming Potomac River Naval Command campaign. Several holdovers from last winter's team reported for practice, as did a number of promising newcomers. CDR Frates urges that all NNMC personnel desiring to try-out for the Admirals come out for workouts as soon as possible.

Already many teams have contacted the Med. Center cage mentor in an attempt to book pre-season contests with the local club.

Andrews Field, Fort Myer, the Naval Gun Factory, Montgomery Junior College, Fort Meade and D.C. universities' freshman teams are anxious to scrimmage the Admiral courtmen in the near future.

At this time Coach Frates is keeping mum about NNMC prospects, merely following a cautious policy of drilling his charges hard on fundamentals and hoping for the best.

It is hoped that during the PRNC season at least one non-league tilt can be played each week, thus giv-

Introducing Clem:

(Continued from page 2)

as could be expected . . . of Clem.

At 0418 Clem Lockerocker has gained access to his now mangled locker, and another bottle of hair tonic bites the deck. By this time the heavy sleepers have taken refuge under their blankets and the light sleepers have all short circuited. Clem then makes a startling discovery; he finds he hasn't room in his locker for his new roller skates.

To the average American this would produce only a simple problem and involve but a few alterations, but Clem believes his only course is to rearrange his locker.

Thus in the wee hours of the morning an awesome battle takes place between Clem and the locker (an even match) and ends some time later with the skates secured neatly away.

A cold wind still lashed against the barracks windows and everyone was sleeping peacefully again; all but poor Clem.

The dawn found him swabbing up the hair tonic and wondering what to do with his shaving kit which, after all rearrangements, he could find no room for.

ing the reserve valuable game experience.

Tuesday night, the NNMC cagers play host to Quarters K, in their first pre-season fracas.

Sportin' Aroun'

By CLYDE SCHUBERT

What a sad state the Washington Redskins and Baltimore Colts, area's pro football teams, find themselves in. Last Sunday the 'Sk hit a new low as they were all plucked clean by the high-soar Phila. Eagles, while those Colts, from frisky, couldn't even get Chicago's Hornets a decent run for their money.

Was strictly reguistated v Baltimore as I watched John Clement and his Hornet associ buzz to within six minutes whitewashing the Colt clan. never-say-die partisan crowd loose a terrific cheer when Y. Little finally scored for the h forces.

Meanwhile, as one and all kn Sam Baugh and Co. were be pulverized in their "crucial cont with the Eagles. Coach Weld charges not only couldn't do n in the way of touchdown-ma but they tackled and blocked high schoolers as well.

Now there's more talk ab merging the AAC and NFL in single 12-club circuit. I thin would be a horrible mistake drop Baltimore, Buffalo and Hornets, and I recommend a squad loop instead. The hap N. Y. Bulldogs should be the t to go. How about that? No huh?

Of course, many will say New York is better able to sup three pro elevens than is Chic However, the two leagues still not get together at all.

Things are getting mighty ser when we amateur pigskin exp can't even pick the winners of tilts. But look at the October results. The Giants surprised Bears, the Bills the Dons, the L the Cards, and the Yankees gulched San Francisco's vau 49'ers, 24-3. Oh, me!

And such a headache as ti college upsets gave many a "p player. Minnesota's Rose Bowl S cial got derailed by the Wol ines, S.M.U. licked Kentuc Wildcats but good, Iowa shoe Northwestern, Indiana squas Pitt, Kansas (a two-TD underd slaughtered the Okla. Aggies, 14, Rice nipped Texas, and Ark sas nosed out Vanderbilt. E Slippery Rock was tied, 6-6. W about North Carolina losing? QUE PASA!

Here's what I think of the college elevens at this po Georgetown—well coached, lot scrap, may end up with eight v in nine tries. Maryland—can h fine year but must keep improv G. W.—little besides Andy D and Al Du Goff, and is no we beater.

Navy is out of luck entirely fr here on unless the Middies man to top Columbia: Unbeaten V ginia should fall before Penn. lane, and North Car., while Cath U. is just plain miserable. G the last named school is build character again this autumn.

Out of space already. So. Tex Collins, an HMI from do Texas way, would say, "Got te gittin' now."

TURKISH VISIT

(Continued from page 1)

cluded in the American Aid to T key program, are urgently need he declared.

The Turkish armed forces hav unification program, however, commander smilingly pointed Naval hospitals there accept tients from both the army and force, he explained.

Billie Holiday to Sing Here Tomorrow

The well-known negro songstress, Billie Holiday, will appear at the NMC auditorium tomorrow night 1900.

Miss Holiday, voted America's greatest singer of popular music of the time by Metronome Magazine, comes from an engagement at Carnegie Hall, New York, where she broke all attendance records.

During her stay in Washington she is appearing at the Blue Mirror. Her performance tomorrow is strictly voluntary—she wanted to entertain patients and staff members here. A big name in the song world at the age of 12, the sultry songstress won the Arthur Godfrey award four years in succession. She also won recognition from Downbeat Magazine.

Upon completion of her current engagement, Miss Holiday will go on a European tour.

BILLIE HOLIDAY

Foreign Visitors Inspect NNM

"Travel is the highest form of education," or so it has been maintained. How true! And how often we do not find ourselves with a few palm trees and quaint beach villages? Ah, we say, "if only we could visit those places!" Actually, you do not have to travel far to see these places and people. You have only to sit back and let the world catch up to you. Consider the foreign visitors who recently looked over our establishment. . . . Denmark? Yes, Oba Jorgensen, Head of Library for Military defense in Denmark, made a study of our library up in this country. She will actually apply that knowledge in her own country. There! We have just deposited a bit of our men in Denmark.

USNR Officers Here to Learn Aspects of Special Weapons

The sixth course for U.S. Naval Reserve medical and dental officers in the Medical Aspects of Special Weapons and Radioactive Isotopes will begin here today. Leading civilian doctors, who are members of the naval reserve, will come from all over the United States to attend this course.

Doctors, physicists and outstanding men of science are lecturers in the course. Rear Admiral W. S. Parsons, U.S. Navy, member of the Weapons Systems Evaluation Group, Office of the Secretary of Defense, will speak at nine o'clock tomorrow on "Naval Problems of Atomic Warfare." Admiral Parsons was Bomb Commander on the bomber which dropped the first atomic bomb used in warfare on the City of Hiroshima.

Dr. Shields Warren, Chief of the Biology and Medicine Division, Atomic Energy Commission and Professor of Pathology at Harvard University Medical School will speak tomorrow at eleven o'clock on "The Fundamental Biology of Ionizing Radiation."

On Thursday morning at nine o'clock, Colonel James P. Cooney, U.S. Army, will address the group on "Medical Problems of Radiological Safety." Colonel Cooney, who was at Bikini in 1946 and Eniwetok in 1947, and is at present the Chief of the Radiological Branch Military Application Division of the Atomic Energy Commission.

On Friday afternoon at two o'clock a representative from the State Department, Mr. Livingston Satterthwaite, Deputy Director of the Office of British Commonwealth and northern European Affairs will address the group on the subject, "British Commonwealth as a World Force."

The third in the series of guest lectures of the 1949-1950 season will be held Friday evening at 8:15 in the auditorium. The guest speaker will be Dr. William W. Scott, Professor and Head of the Department of Urology of the Johns Hopkins Medical School who will speak on the subject, "The Prostate Gland."

Trailer Carries Portly Arrivals

A pair of 12-ton ladies arrived here late in October via a heavy duty trailer to add a bit of color to NNM.

They're the two 30-foot female American holly trees, technically called *Ilex Opaca*, now flanking the flagpole in front of Building 1.

Hollies, like other species of trees, are either male or female according to Foreman Gardner H. J. McGahren, who supervised the moving job. The ladies bear the red berries.

Plenty of male trees for cross pollination are located slightly to the west of the new hollies, Mr. McGahren said.

The trees, very highly valued, were donated by Mr. and Mrs. James B. Latta of Bethesda. Contractor Frank Murray of Rockville loaned the trailer for the moving.

Transplanting trees, particularly hollies, is a ticklish job, according to Mr. McGahren. A nine foot wall of earth was moved with each tree, he said. The job itself is worth about \$1,000 for each tree.

(Continued on page four)

Transplanting the new hollies (left) required considerable care. At the right one of the beautiful new trees is shown in front of the center entrance.

Five Enlisted Men Begin Navy's First Class In Radioactive Isotopes

Technicians Will Learn Handling of R-A Material

The School of Radio Active Isotopes which has convened for its first class, is believed to be the only one of its kind in the services or in civilian life. It is primarily interested in training technicians in handling radio active material, and acquainting them with the knowledge of the instruments that measure and calculate radiation.

There are at the present time five enlisted students in the class. These men must meet certain qualifications, such as being graduates of the x-ray school, photophluorography, and photodosimetry courses.

It is also required that all are high school graduates, with preference given men having two years of college, stressing particularly physics and chemistry.

Of the five men now attending the school, CDR M. W. Mason, USN in charge of x-ray school, and LTJG R. H. Paddock, MSC, USN, his assistant, said that they hope to keep two graduates to teach here. The remaining three would be sent to diverse places where they are needed.

Presently attending the school are Joseph F. Johnson HM3, Arthur R. Holtry HM3, Donald J. Cummings HM3, James J. Kellner HM3, and Raymond M. Gismondi HM3.

The students were chosen on a voluntary basis from the honor students of the last x-ray class. They will be subject to a six month course of instruction under the tutelage of Commanders Morgan MSC, Dudley MSC, Lieutenant Commanders Chambers MSC, McMurry MC, Lieutenant Bell MSC, HMC Istock, HM1 Bullock, and Mr. Emery.

Civil Worker Here 25 Years

Katherine Lanahan, chief of the procurement division, NNM, celebrated completion of 25 years in federal civil service November 4.

Miss Lanahan received official recognition for her long service Tuesday when RADM Morton D. Willcutts presented the Navy "length of service" award to her and a group of 29 other employees at the center with 20 to 30 years' federal service.

Beginning her career as a stenographer at the old naval hospital at 23rd and E Streets, N.W., Miss Lanahan has continued to work in the naval hospital's records and finance office.

Miss Lanahan graduated from Notre Dame academy in northeast Washington and now lives at 4509 17th Street, N.E., with her sister Loretta. Another sister, Mrs. Marie A. Walsh, also at NNM, has a record of 26 years of service.

Capt. Bradley New NH Exec.

Captain Bruce E. Bradley, MC, USN, arrived October 31 to take over his new duties as executive officer of the Naval Hospital here.

Captain Bradley relieves Captain B. W. Hogan, MC, USN, who departed during October for Vallejo, Calif., where he assumed command of the Mare Island Naval Hospital.

Before coming here, Captain Bradley was executive officer at the Long Beach, Calif., Naval Hospital.

The Captain, his wife, and their two children are now living at Quarters D. here at the center.

Welcome Aboard, Captain Bradley.

(A more complete biography of Captain Bradley will appear in the next issue of the NEWS under the COLUMN "Meet Your Executive Officer.")

The Chaplain's Corner

BE OF GOOD CHEER

By CHAPLAIN FRANK MORTON, USN

"The misfortunes hardest to bear are those that never happen"

—JAMES RUSSELL LOWELL

If doing were as easy as saying, all men would "be of good cheer"—but we know that they are not. Worry is the robber baron that preys upon rich and poor, high and low. Navigators say that all ships leak a little, and if their crews were to give all attention to the possibilities that lurk behind a leak they might never bring their ships to port. All souls have their worries. The test of our religion is, what are we doing with the worries that come our way?

Jesus said, "Be of good cheer." The verb is imperative. It is something we can do. We can put our faith to work. It is a matter of the will.

The mind is its own place, and in itself
Can shape a heaven of hell, a hell of heaven.

Another demon of unhappiness is fear. It is a harder demon to fight. It is a form of borrowed trouble. Of all forms of worry, none is more pernicious than this, because it wastes both body and soul over evils which never come to pass. How true Lowell's words. The ills which most of us fear are many times worse than those we actually bear.

Fear creates worry, and worry induces fear, thus forging a vicious circle that binds its victim with bands of steel. Fear is ever looking backward, calling up specters that will not rest. Worrying over the past will never change it, but if like St. George we slay our dragon, fear, we have already changed our future. Our shield is faith with which we can quench the fiery darts of the evil one. Faith is victory over fear. "Happy is the man that maketh the Lord his trust." His victory is already won.

They Built The Bank . . .

The men who built the new banking facilities line up before their handiwork. Shown (left to right) are: Robert L. Williams, head carpenter; Jesse Malatesta, head painter; Oscar J. Nordstrom, architect, and Robert L. Irwin, assistant foreman.

The next time you stop at the new banking facility near Ships Service to cash a check or stow away a few greenbacks, why not take time to look at the craftsmanship that went into the construction?

Built of solid maple, the facility was designed by architect Oscar J. Nordstrom who has been drawing plans for NMMC during the past four years. He was previously a hospital architect in Panama.

A graduate of Columbia University and Cooper Union in New York, Mr. Nordstrom was in business for himself before he entered civil service nine years ago.

The men who worked on the project give greatest credit to their supervisor, Robert L. Irwin. Mr. Ir-

win is an old-timer in and around the hospital—23 years, in fact. He began as a mechanic when the hospital was downtown and now oversees seven or eight shops here.

Jesse Malatesta, head painter, and his two assistants were responsible for the smooth varnish job and pale green walls. Mr. Malatesta, too, came out to Bethesda when the center was built.

Chief Carpenter Robert L. Williams was assisted by three men on his job. He has been here since the center opened and has been under civil service for the past 14 years.

In Mr. Williams' opinion, the banking facility is the best job the men have ever done in the center.

Army Hero Gets Smokes:

Army Veteran Joseph Plowden on Ward 5C receives a pack of cigarettes from Miss Peggy Heneke, a former Ships Service office employee who is now working for O. G.'s.

ETO Vet is Treated Here

For three years and three months ex-Sgt. Joseph Plowden, a veteran patient on ward 5C, was a soldier in the fighting 101st Airborne Division.

Assigned as a driver, he saw plenty of Europe in those days—England, France, and Belgium. He saw enough to wear the Purple Heart, a Presidential Unit Citation, four battle stars, the Victory Medal, and the Good Conduct Medal.

For the past 19 months, though,

Plowden has been a patient at the Naval Hospital with severe arthritis keeping him bed-ridden. Although still unable to get around, he says he feels "lots better" than he did upon arrival.

Plowden has taken up pocket-book making and other crafts since his admission. He also attends most of the movies.

He is single and lives in Washington. Before he entered the Army, he was a chauffeur.

Tower Topics

By GEORGE ROYSTER

Your rather red faced columnist is still undaunted by his poor showing last week in the Navy selection. Just to prove my unrelenting perseverance I pick Iowa to K.O. the Fighting Irish of Natre Dame! NOTE: The above WAS NOT a paid ad by Clyde Schubert.

Have just come back from a practice game between our own NMMC boys and the Henderson Hall marines. The game itself and the score was of no particular importance to either team. The heartening thing to see at this PRACTICE game was the multitude of interested people.

What a change from last year! At any one of the LEAGUE games last year you could have counted the number of people in the Gym on your fingers. Half of them were probably there to swim.

Now don't get me wrong, there were only about twenty-five people in the stands. The SRO sign was not needed but the turn-out represented more interest than was shown last year.

So drop over at the next game, men, you won't see any Pros, but you WILL see a fine team that will hold its own in the PRNC league this year. Take a look . . . you'll be surprised.

SEEN AROUND THE COM-
POUND: Chief Thomas, a dead eye with a basketball. . . ditto, Swinko and John "the man" Gingsian. . . Bill Butt on nite duty. . . Chief Miller getting Sunday breakfast at 2 pm in the afternoon. . . Everyone talking about Canasta and trying to learn how to play. . . A new coke machine that holds over 10 cokes—now that's too much!

Hear about local Waves all set to lead the cheering section at the first home league basketball game? . . . Jack Levi, a big "hit" at the staff dance. . . Al Hayes, also having a lot of fun at the dance. . . Chief Renard giving his wife an orchid for the dance. . . "GER" getting acquainted with the new girls at Ships Service. . .

Time is running out on me. As you know we have a new editor and he informs me that the copy must be in on time. So when you gotta go, you gotta go . . .

Crew's Library:

Mary By S. Asch Relates Story Of Holy Family

Without torturing you by the old reminder of so many days before Christmas, here is a recommended way to put yourself in the proper frame of mind for the season: read Sholem Asch's new book MARY. This story gives an intimate picture of a devoted family—Joseph, quiet, wholly good; Jesus, the gifted child, with a high destiny obviously before Him; and Mary, the epitome of motherhood as the central figure in the story.

That prolific author Edison Marshall has now come out with a new novel of India and Zanzibar in the days when Queen Victoria's armies were carving out an empire for England. This colorful tale of romance and action is called GYPSY SIXPENCE.

FLAMES OF EMPIRE is a well written historical novel by Peter Bourne. The central figure is Martin Ravenal of New Orleans who becomes involved with Maximilian. Through this means there is excellent background material on Mexico before the scene is shifted to Paris and Austria.

Dentists Speak At MSA Meeting

At the meeting of the Military Surgeons of America held recently at the Hotel Statler, CDR's R. A. Colby, T. A. Lesney, and J. V. Niiranen of the Naval Dental School here presented lectures to a large number of interested professional guests of the Association.

CDR Niiranen, who is one of the pioneers in the field of acrylic eye prosthesis, spoke on Maxillofacial and Ocular Prosthesis. Problems dealing with Oral Surgery were presented by CDR Lesney.

CDR Colby's topic dealt with his specialty, Oral Pathology, and most of his program took up the detection of oral cancer.

Lieut. Ozburn Prefers Opry To Operatics

(Two and a half minute speech given at G. W. University, on Oct. 13, 1949, by Lt. E. E. Ozburn, MSC, USN.)

Ladies and gentlemen, my peeve is operatic music. This I like has developed in me what psychologists would call a "condition reflex". That is, when I hear my hands automatically raise to protect my ears. It was developed in the following way.

I left the red hills of no Georgia as a tender, wide-eyed, innocent youth of seventeen years ahead for the Navy. Shortly after my indoctrination, word was passed that a Miss Elmira Higgenbottom, coloratura soprano, would give a recital for the new batch of recruits, admission free (no fictitious).

Now back home in the mountains, one type of music was known and admired and loved by all. My contact with opera was the Saturday night broadcast from Nashville, Tennessee, called "Grand Opry." I further knew that colored people have a great sense of music and rhythm. I assumed that coloratura was just a Yankee way of saying colored. And besides they lined us up in two's and marched us down anyway, so went.

The lights dimmed, the curtains rose, and Miss Higgenbottom appeared in all of her glory, a little skinny, slightly buck-toothed and white! Her first number was

(Continued on page four)

Betty Bookis Married to A. Sanowskis

Miss Betty Irene Bookis, JOSM, and Anthony Sanowskis, HM1, were married at Sacred Heart Catholic Church in Tampa, Fla., on October 8.

The bride was given in marriage by her father, John A. Bookis of Tampa. She wore an ivory satin gown trimmed with seed pearl embroidery.

Miss Angela Bookis, sister of the bride, was maid of honor and solo attendant. Ben Boraiko served as best man. J. Melvin O'Grady and Fred T. Higgins ushered.

A reception followed at the home of the brides' parents. Rev. E. R. Martineau, S. J., CHC, USN, of NMMC was among the out-of-town guests.

The couple took a wedding trip to Miami, driving back along the east coast of Florida and through the Blue Ridge Mountains.

Mrs. Sanowskis, a correspondent for the NEWS, is assigned to the administrative office. Her husband is a pharmacy technician in the New London submarine base dispensary.

The Dental Explorer

By BOB THOMPSON

"No news is good news" I've always heard, but surely it's good news when some of your shipmates do something that merits a commendation, like Beile, Campbell, and Healy who were awarded the Conduct ribbons last week, or another staff member arrives as Litner and Chief Clinton. Maybe even the news that someone is looking around for an engagement ring could be considered good tidings. Is that true, babe?

So I would like to suggest that we express that oft-used, out of date opinion in favor of something new. Address all suggestions to Benny Abbott, Collector of Useless Information, Bldg. 122. Thank you.

Our personality for the week, is new by the way, is a tall, and first classmen who, of all things, paints eyes! But he's not content with only that, he also takes fingers, ears, lips, and other parts of the facial anatomy.

Ernie Beile (that's two syllables) with his wife Elizabeth and daughter Betsy out Rockville way. One of the two Acrylic Eye Illustrators in the Navy, Ernie's job is to paint the iris and blood vessels of the false eye.

However, since the end of the war, patients have become scarce and Beile also makes the eyes now. He is in the Ocular Prosthesis Department which is closely associated with the Maxillofacial Prosthesis Department. Under that division comes the fingers, ears, and other replacements.

Since there wasn't a great need that department either, the two, NDS, anyway, are considered as and the names run together.

He enjoys his work greatly, plans, of course, to make a career of the Navy, since Chief should be coming his way shortly. It's a service he has provided veterans and servicemen in the past. I know Ernie he will try to do an even better job in the future.

Library Woes

By RONALD BOURGEEA

I'm beginning to feel
I don't care a great deal,
For the library questions I get;
For the queries before me set.
Was Nero a king,
And what made him sing;
Was he tall; was he fat; was he born
In a house, on a street, or a lawn?
I'd like to find out
About tetanus and gout,
Geometrical curves,
Polytechnical swerves,
And what makes a man thin or stout.
I'll establish a clinic
For saint and for cynic,
For psychoneurosis,
Arterial sclerosis,
And for those that are schizophrenic.
I've been asked about Ruth—
Would I tell them the truth—
Was she slender and tall,
Or a Biblical doll
As charming and smooth as vermouth?
I've been asked in a breath the names of the states,
And what fishes are caught with what baits;
To spell names like Poughkeepsie,
Til I've grown quite tipsy—
I doubt if I'll live to be sixty!
Oh, sing me a song,
What have I done wrong
To be subject to such contradiction?
Some think what I say
Is He-Ha and bray,
But there's more truth in this than there's fiction.

Personalities About The Center

Lt. (jg) Sutton

Although he has had a trip around the world, three and a half years in China, and a survey expedition to the Aleutians and Arctic regions during his 19 years in the Navy, Lt. (jg) H. O. Sutton, MSC, most enjoyed his tour of duty in Hawaii. There he found the foreign flavor of overseas service plus the advantage of having his wife and son Jimmy with him.

Mr. Sutton is now a special subjects instructor in NSHA, a post he has held since July 1948. He teaches courses in veterans' affairs, maintenance methods, Navy reserve and retirement, and Navy organization, customs, and traditions.

A native of McEwen, Tenn., he enlisted after holding assembly line jobs at Ford and two other industrial concerns. He came up through the ranks, taking a Bachelor of Commercial Science degree at Southwestern University, Washington, D. C., on the way.

Mr. Sutton feels the present Navy shake-down will be settled to the best interests of all branches of the service. He recalled that a similar situation had existed in England after World War I when the RAF was coming to the fore. Yet, the British Army and Navy came through the dispute without any deep scars, he said.

Chief Miller

"I've always liked administrative work. I've been in it 100 per cent since 1941," declared Chief Wayne C. Miller who aids Lt. M. J. Wiltshire, administrative assistant at NMS. "But it can be a headache sometimes," he smiled.

Miller has been in the Navy 10½ years and at NMS since May, 1947. His office revises and maintains courses, establishes new schools, and handles correspondence. In addition, Miller keeps the OD log book during the daytime.

The Chief hails from Maryville, Mich. He entered the Navy after graduating from high school there. His first assignment was on a ship evacuating American refugees from Lisbon, Portugal, early in the war.

He later served for two years on the Bon Homme Richard, CU31, in the Pacific. He has also been at Brooklyn Naval Hospital, the Bureau of Medicine and Surgery, and the Office of Commissioned personnel.

Married with two children, Chief Miller lives in the Bellevue Naval housing area in Washington.

Capt. White

After 19 months of civilian life, Capt. A. J. White, MC, USN, Ret., returned to the Navy last August. Now in charge of sick call and emergency treatment of the staff and civilians here, he reports that the general health of the command is good.

The captain joined the Navy in 1917 after graduating from Western Reserve College and Medical School. The list of his duty stations is almost long enough to fill a log book.

Since the outbreak of World War II, for example, he has served as senior medical officer on the Lexington, executive officer at Annapolis Hospital, c.o. of the Quantico Naval Hospital, c.o. of a Pacific Fleet Hospital, and staff medical officer in Manila.

A bit of salt also flows through the veins of his children. His oldest son, an Annapolis graduate, is a Lieutenant (jg) on a submarine in the Pacific. One daughter is married to a naval aviator and another to a Marine Reserve flyer. His other two youngsters are in college.

"For the most part, my duty has been pleasant," Captain White declared. He laughingly continued, "And I might add that Mrs. White has withstood Navy life very well."

Meet Your Executive Officer:

LCDR Willgrube of NSHA Has Colorful, Varied Career

Lieutenant Commander Wayne W. Willgrube, MSC, USN, started his long and colorful career in the service of his country as an Army private. Born in Edna, Kansas, just after the turn of the century, he graduated from high school in Warren, Indiana, and served one 3-year enlistment in the Medical Department of the Army. He was honorably discharged on March 7, 1922, with the rank of Sergeant.

Heeding the call of the sea, he enlisted in the Navy in December of the same year, as PhM2c, and was promoted to PhM1c a year later.

In 1930, he and Miss Ruby Alma Ousley of Springfield, Missouri, were married. They have one daughter, Mary Lou, aged 10. Austin, Texas is now their official residence.

Rates were scarce in the later 20's and early 30's and it wasn't until July, 1935, that he was again promoted, this time to CPhM(AA). A year later he received his permanent appointment.

In December 1938, Mr. Willgrube was appointed to the grade of Pharmacist, and shortly after the outbreak of World War II, he began to climb up the ladder of commissioned grades, until, on the first day of this year, he was promoted to the grade of LCDR, MSC, USN.

During his naval career, Mr. Willgrube has had duty in nearly all types of medical department activities: aboard battleships, cruisers, and transports, independent duty on destroyers and submarines, and shore duty at naval schools and hospitals. He qualified as a diver

Med School Scuttlebutt

By F. A. ADAMS

Everyone wishes smooth sailing ahead for Chief DeCrow leaving for the USS Allagash AO 97, which at present is in the Mediterranean, and also for Chief Alcott leaving for duty on the USS Missouri.

Tiny Schroer, our singing hill-billy, got out his guitar and has been entertaining the staff in the lower dorm with many of his famous numbers. If it continues, we'll all be on our way for ear plugs.

Anyone wanting hot tips for the football "Pigskin Parade" should contact Chief Littleton of Blood Collecting, who is apparently making out better than the so called experts.

Basketball seems to be the main topic of interest in the barracks lately with Glunz and Cox discussing the future of the NNMCA Admirals. Every one is looking forward to a great year.

Sperry, MAA of the school barracks (students), still wonders how long it will take until people clean up before leaving for school. That is a 64 dollar question.

X-Ray Mobile Unit under the direct supervision of J. R. Shell, Lt (jg) MC, USNR, has departed on an extended tour of the Potomac River Naval Command area. Enlisted men attached to the unit making the trip are E. N. Johnson HMI, A. G. De Paemalaere HM3 and O. L. Rogers HMI.

Welcomed back to the Medical School recently was Miss Karen Jacobsen, secretary to Captain Silliphant, Director of Laboratories. Miss Jacobsen, recently returned from a summer cycle tour of Europe.

"Lou" Kovarik, well known bachelor of Med School seems to be weakening. Could it be a girl from the Hub City causing the change? How about it Lou?

Well, that about covers it for this issue. So long for now

second class, at the Experimental Diving Unit, Washington, D. C., and aboard the USS Nautilus he qualified for submarine service.

From knowledge gained during his service in the Army and Navy, he is listed as a Medical Technologist, #18, by the American Society of Clinical Pathologists, Denver, Colorado.

NSHA Notes And Quotes

By BENNY BERNARD

On October 22, subsequent to CO'S inspection, Chiefs A. D. Albers, U. J. Bender, T. W. Coles, Jr., R. F. Connolly, C. F. Dinwiddie, W. S. Duffey, and G. T. McAlister were awarded Good Conduct Medals and Clasps for varying periods of splendid service. Congrats, men, on your fidelity, obedience, and zeal (OR for not getting caught!).

NSHA has rung up another FIRST. We now have the first HMC (W) to be enrolled, Jearlean R. Stark. A native of Colorado, Stark entered the service in August 1943 and received "boot" training at Hunter College. She has served in Naval Hospitals at Brooklyn, St. Albans, Sampson, and reported to NSHA from USNH, Bremerton. Her favorite hobby, sports, has been temporarily replaced by the study of APC's, i.e., Accounting, Personnel, and Commissary.

Uncle Fuller, our scrounge in town, reports that the class will be instructed in the Essentials of English. Says it might be a good idea, too, 'cause a few seem to know the essentials of Profanity better than English.

Congrats to Chiefs Duffey, Parker, and Parrish on the births of their offsprings. And heartier congrats to the wives for the magnificent parts they played.

Condolences to Urbush, Davis and Willis for their enforced holiday from studies. It must be rough to be in a nice comfortable bed all day, and not have to listen to the monotonous monologues of instructors.

Rapidly changing the subject (in fear of reprisal), did you know the GI clothing containers (seabags) are not the property of the Naval Personnel to whom they're issued? "This article remains the property of the Government." So states the good book, Uniform Regulations.

We've Noticed: Several of the STEWdents studying to the raucous strains of "I've Got A Right To Cry." Also the "boy" who wore hideous green and yellow socks in class. And Mitchell and Kuratko wearing identical shirts of a violent zinfandel shade (on liberty, of course).

Famous Last Words: (Overheard in NNM), "This time NSHA isn't going to tell me how to run my office!" (Tut, tut, y'awl, watch when our "talking books" begin to speak!)

And now, our thought for the day: School books compare to a wife. If they don't "talk back," no one will know they're around!

And so, signing off with our theme song, Uncle Fuller and I stand rigidly and chant.

"Disgusted with this column?
Don't like the way it's written?
You wish to try it once yourself?
Greetings, RUBE!"

FOREIGN VISITORS

(Continued from page one)

We have also accomplished work in the dental field in that same country. Dr. P. O. Pedersen, Associate Dean of National Dentist's College, reviewed dental research at NMRL. He was especially interested in work done on caries.

Switzerland was represented in the person of Brig. Gen. Hans Meuli, Surgeon Chief of the Swiss Army. Gen. Meuli particularly inquired about the general nature of the NMRI program, with special emphasis on circulatory problems.

Then Canada and Austria were represented by the virologist, Mr. Gernot H. Bergold, from the Department of Agriculture, Canada. He is Austrian, but intends to become a Canadian citizen. He interested himself with technical questions about metabolism in low-

Dance Contest Winners

Smiling faces mark the winners of dance contests at the last NNM Staff Dance held in the gym October 28. Skeletons, orange and black trimmings, and autumn decorations carried out the Halloween spirit.

LCDR WILLGRUBE

(Continued from page three)

Mr. Willgrube attended the Naval Medical School in Washington, D.C., Harvard University, where he took a post-graduate course in Physiological Gas Analysis, the Hospital Corps school in Portsmouth, Va., and the Naval School of Hospital Administration, NNM, Bethesda. He has served in Naval Hospitals at San Diego, Portsmouth, N.H., Chelsea, Treasure Island, and Bethesda.

For duty on the USS Solace at Pearl Harbor on December 7, 1941, Mr. Willgrube wears the Navy Unit Citation ribbon. He also has a Good Conduct Medal with 3 stars, the Yangtze Medal and the Navy Expeditionary Medal for duty in China in 1925, the American Defense Medal with star, Asiatic-Pacific Medal with star, American Theater Medal, and World War II Victory Medal. In addition, the Surgeon General of the Navy and Commanding Officers have both awarded him letters of commendation.

Mr. Willgrube was co-author of a manuscript on "Muscular Response Under Increased Atmospheric Pressure" published in the Naval Medical Bulletin, 1933. He now writes an article for each issue of the Hospital Corps Quarterly under the name-de-plume of "3W."

Upon the establishment of the Naval School of Hospital Administration in September, 1945, our present Executive Officer was appointed personnel officer and instructor of personnel administration. On July 1, 1949, he was relieved as personnel officer to assume the duties of Executive Officer with continuation of duties as instructor in personnel administration for the Officers Class.

His collateral duties for NSHA are: GED testing officer, Historical officer, Recruiting officer, and deputy Fire Marshal.

Graduates of classes 6 through 11, whom he has taught at the Naval School of Hospital Administration are numbered among the host of friends of Mr. Willgrube.

er organisms and in the use of the calorimetry, that study which measures the quantities of heat developed by friction, combustion, etc.

The list is endless. These are but a few of the interesting people who have visited us. But the transaction is continuous. There will be more, later.

News Service Bureau Helps War Buddies Get Together

(AFPS)—Remember the man who sat next to you in silence as the LCI splashed and bounced toward the beach, or the lad who bunked beside you during boot training, or the fellow who flew as your wingman? Vowed to keep in touch with each other as the old outfit was broken up, and you each started in new directions.

Well, have you heard from him lately?

No, and you haven't written him either. Been wanting to though, you say, but you don't know his address. Okay, there's a new Service bureau here that may be able to help you.

It is the National Association of Combat Units, and the address is Postoffice Box 1111, Washington 13, D.C. The new Veteran's Service was set up to handle the estimated 2,000 letters received each week by various government agencies seeking to locate old war buddies.

There is no charge for relaying the information and no stamped envelopes need be sent along. The organization is being financed by contributions from divisional "alumni" associations.

Miss Parks Weds HMC W. Hackman

Miss Nancy Ann Park of Riverdale, Md., was married October 26 at 8 p.m. to Chief William G. Hackman of Center Command at the National Presbyterian Chapel in Washington, Dr. Thomas A. Stone officiating.

Miss Mary White acted as maid of honor and Walter Hackman, brother of the groom, was best man. A reception followed at the couple's apartment in Bethesda.

Mrs. Hackman works with the Ford Motor Company in Washington. Her husband is now at Norfolk Naval Base.

hardly make third place back home in a hog calling contest, unless the hog understood Italian.

Thinking and hoping that this was a mere warm-up, I curbed my impulse to leave and stayed on. And warm-up she did! Rapidly dropping out of the money in hog calling, she finally reached the status of a Leghorn hen announce-

ing to the world at large the occurrence of a barnyard blessed event.

Finally, although not called for here, I feel it my duty as a public minded citizen to leave this opinion with those unenlightened souls who pretend to like this stuff. None of it can be mentioned in the same breath with Roy Acuff and his Smoky Mountain Boys playing "Pins and Needles in my Heart".

Dental Dukes Upset Center

By J. BELL

The twice-defeated Dukes sea the highly favored Center Commanches in one of the seas most amazing upsets, 39-8. Roll to a 20-6 half time lead Dental Dukes were never headed by Commanche squad. Seemingly stunned by the lightning like cision and ferocious blocking, Center's undermanned and injured dled squad failed to show usual brilliance and fell easy times to an inspired Dental Cre.

Displaying an iron clad passense the Dukes detoured 10 manches aerials, turning two them into touchdown jaunts. C lie Fries snatched one Commatoss on the goal line and r the length of the field to pay for the games longest run.

Globe Travelers Visit At NNMC

Maybe the days of dragon-slaying are over, but a real, flesh and blood knight was among the recent foreign visitors at NNMC. He is Lt. Gen. Sir Niel Cantlie, KBE, CB, FRCE, RAMC.

Although he arrived minus the traditional white horse and shining armor, Sir Cantlie strode through the corridors with the military bearing and olive drab uniform garb befitting the Director of the British Army Medical Services. He stopped here on a tour of Canadian, Mexican, and American installations.

Other English visitors were Dr. E. M. Darmody of Portsmouth, and Dr. Peter Quilliam, a lecturer at King's College, London. From the British Commonwealth came Commodore W. Nelson Lay of the Royal Canadian Navy, who dropped by to thank the Admiral for courtesies shown four Canadian Naval Reserve Officers at the recent Atomic weapons school.

Maj. Gen. Johannes Heimonen, Chief of the Finnish Army Medical Service, came from Helsinki to survey the recent progress of American medicine. Another Scandinavian was Prof. Rudolph Skajlund from the Institute of Physiology in Stockholm, Sweden.

From the other side of the world were Sir Sirisinha of Bangkok, Maj. and Major A. P. Ray of the Indian Army. Maj. Ray, who is assistant director of the Malaria Institute of India, spent two weeks at the center studying malaria research.

Prof. G. Bastianelli from the Institute of Malariology in Rome, Italy, was also interested in the mosquito-borne disease. He inspected the parasitology and chemistry facilities here.

Our good neighbors from the southern hemisphere sent Maria Isabel Lopez, Labor Attache of the Argentine Embassy and Dr. Harold Mondarogan, a bacteriologist from Medellin, Colombia. In addition, there were Gen. Martinez Barragan, Commander of the Army Hospital in Mexico City, Dr. Salvador C. Moran of El Salvador, C. A., and Dr. Louis Thomén, Ambassador of the Dominican Republic and former Minister of Health.

NDS Officers Score Triumph In Film Field

Two Naval Dental School officers recently scored triumphs in the motion picture field when films produced under their supervision won awards at the Venice Film Festival for outstanding examples of cinematic art.

NEWS Editor And Photographer Complete Assignment At NNMC

During the month of November, the Center News has lost its managing editor, William R. Butt, HMI, USN, of Center Command, and its ace photographer, Tony Canedo, HMI, USN, of the Naval Medical School. They soon will be leaving for that "cold, outside world."

Although he never had any previous experience in journalism, Butt took on the job of managing editor of the News about a year ago. Time rolled by. His hard work and mounting experience produced newsworthy stories, many good editorials, and even some scoops.

Butt also played a major role in increasing the paper from pamphlet form to its present tabloid size which runs from four to six pages.

He plans to return to his home town of San Francisco next month. There he will adjust to civilian life again and attend college.

With Canedo, photography was an art which began about 12 years ago. As an amateur, he has won many prizes and holds membership in several photographic associations.

For Tony, serving the NEWS was a collateral duty which greatly contributed to the success of the paper.

Medical Group Holds Meeting

No, the Army and the Air Force haven't taken over NNMC. Those G.I. field tents and olive drab uniforms aboard in mid-November were all part of the fifth meeting of the Armed Services Field Medical Material Group.

The joint board held meetings, panels, and exhibits to show the practical effects of unification in medical services.

The three surgeon generals of the armed forces, Rear Admiral C. A. Swanson of the Navy, Major General R. W. Bliss of the Army, and Major General M. C. McGrow of the Air Force, gave the keynote addresses.

The meeting brought together key medical specialists on using, testing, and developing medical activities of the armed forces for an interchange of ideas. Captain L. G. Jordan, MC, USN, Admiral Swanson's chief assistant for planning and logistics, was chairman of the assembly.

Among the guests from other countries were Lt. Gen. Sir Niel Cantlie, KBE, CB, FRCE, RAMC, Director of the British Army Medical Service, Brigadier William L. Coke, OBE, Director General of the Canadian Army Medical Services, Surgeon Captain R. A. Graff of the British Royal Navy, Col. E. M. Wansbrough, Director General of the Canadian Dental Services, Surgeon Captain A. McCallum, Director General of the Royal Canadian Navy Dental Services, and Wing Commander B. R. Brown, Commanding Officer of the Canadian Air University.

59 Corpsmen At NNMC Pass Tests For Ratings Given Here Last Month

Harder Exams Expected In Future According To LTJG G. E. Connell

Fifty-nine corpsmen from NNMC were among the 79 enlisted men in Potomac River Naval Command who passed the exam for advancement in rating given on October 29.

An average of 2.50 or better was required in all subjects for a passing score. A total of 225 men took the test.

The number of men who will actually be rated could not be determined by the time the News went to press.

According to LTJG G. E. Connell, MSC, USN, NSHA Rating Officer, the examination was harder than previous ones. Even more difficult tests may be expected in the future, he said.

NNMC personnel who passed the exam for hospital corpsmen first class are: Levi Goad, Emery Thompson, NMS, Forest Smith, NMS, Ronald Bourgea, NNMC, Robert Kinnan, NMS, Glenn Wooten, NMS, and James Moler, NNMC.

Those who passed the test for second class are: George Ford, NMS, Howard Crutcher, NMS, Lloyd Dedon, NMRI, Richard Worters, NMS, Dennis Sullivan, NMS, Melvin Brumfield, NMS, Richard Foley, NMS, Nelson Wetzel, NH, Harry Reaves, NMS, Oders Hooker, NMS, and John Knight, NMS.

Enlisted men who passed the third class test are: Jerry Lerch, Stephens, NMS, Edwin Golonka, NH, Fred Hardy, NMRI, James

Square Sets Civvies Clothes At Dance Fri.

"Swing your partner. . ."

Civilian clothes — sport shirts, blue jeans, and sweaters—will be permitted at the next staff dance, December 2, for the first time in the history of NNMC. In fact, any outfit goes except full dress dungarees.

Those who long for an old time square dance, will hear "country style" records during intermissions. The decorations will take you back to the ole red barn.

Howard Williams and his orchestra will furnish the music for round dancing. About a hundred girls have been invited.

Festivities are slated to start at 2030. All hands and their guests are welcome.

Ex-Prize Fighter And Navy Vet Is Patient At Navy Hospital

"In this corner, La-a-a-dies and Gen-n-n-t-t-l-l-e-e-men, we have the gr-r-r-r-reat lightweight fighter, George 'Elbows' McFadden. . ."

Right, old "Elbows", whose real

name is Andrew John Tobin, is a patient on Ward 3B.

The ex-battler says he stacked up a record of 385 bouts before he

retired from the ring to enter the Navy in 1908. He claims he was never knocked out and lost only eight matches by decision.

He met such champs as Kid Lavigne, Battling Nelson, Terry McGovern, and Jack McAuliffe. He tells how he fought Joe Gans nine times—135 rounds in all—winning every time but one.

That night the referee gave the decision to Gans after 25 rounds. But sports writers the following morning called the bout McFadden's.

Among his good friends he numbers Jack Dempsey, Jim Jeffries, and Jack Sharkey.

Tobin served in the Navy from 1908 to 1911 and reenlisted when war broke out in 1917. He shipped as a boilermaker on the USS OLYMPIC to Archangel, Russia.

He still bears scars from a head injury suffered there. After he received a medical discharge in 1919, he pugilist just "took life easy."

(b) SecDef ltr AFIE-NY-P 000.76, of 12 Dec 1949

1. The commanding officer takes pleasure in informing you that the station newspaper "NNMC News" has been awarded the Armed Forces Press Service "Pat-on-the-Back" (Honorable Mention) in the states-wide letterpress class for the month of November 1949. This recognition of achievement is awarded monthly to the outstanding Service publication chosen from approximately eight hundred (800) Armed Forces publications.

3. Your outstanding performance of duty as Editor in Chief of the "NNMC News" reflected in the "Pat-on-the-Back" award is considered a major contribution to the morale and contentment of patients and staff of the Naval Medical Center. You, and your entire staff, are commended for your splendid efforts in elevating the station newspaper to its present high standard.

4. A copy of this letter will be attached to your next regular report on fitness.

Editorial

GIVING THANKS

We are humble today. Yet in our humility, we find a great Thanksgiving. And this is life.

How filled with joy and overwhelming happiness these days have been. Each year finds us renewing that thanks. Even our sorrows have taught us. Maybe we have made fewer enemies this year. We are one year older in the teachings of life, and we have had one more year of roses, along with their thorns, to thank You for.

Then, we have the invisibles to thank You for. That morning when we rose from bed with music in our hearts. The time we got that mysterious "push forward" which resulted in a promotion. The little things like clear air to breathe, and lovely parks, and the far away jargonings of birds and cars and waterfalls.

Our hearts are brimming. We feel a great pushing within our chests. We feel all the personal thanks of eyes to see the technicolor of autumn, of ears to hear the thunder in a vibrant sky, of the small warm touch of a baby's hand, of the smell of pungent spring and musty, secluded forests, of the savory tastes of turkey and the special tarts that only mother can make. Oh, we have so much in every day life—So much that we take for granted throughout the year.

We have, of course, our Mother. How she has been taken with a "pinch of salt"! But today, we stop . . . think . . . do homage! To Mom, to Dad, to Wife, to the whole wide world we open our hearts.

We have yet more. We have the pounding city thoroughfare and the little country main street, the roaring plane and the heaving locomotive, the plains and the herds of cattle, the forests and the crowded summer beaches, the quiet fishing spot and the peaceful little white church. . . . Our Country! Our Flag! And, our Liberty!

NSHA Notes And Quotes

By BENNY BERNARD

Well, we did it again. Dear Old NSHA was the FIRST to hit the 100% mark in the Community Chest drive. Our quota was filled on Nov. 1, and our CO extended a "Well Done" to the personnel of the command. The graciousness and liberality with which the personnel contributed to "The Chest" is also to be commended.

That Adams fellow (not the HAT man—the NSHA man) has acquired a nice new green Pontiac and a new girl according to the ALPINE EARS, and some of the local characters are "green" with envy. (Not me, Bub—I'm a married man!)

And speaking of married men—what changes are wrought when the wives appear on the local scene! How much sharper and clearer-eyed the married men become! They're seen no more in the local night spots, and at times those guys appear quite bright! All of which must be due to staying in nights—even as you and I!

Uncle Fuller, our bashful bean about Bethesda, noticed one of our eminent STEWdents (we dassent mention no names) wander into a "diner" down the way, seeking his bunk! Poor guy—he's probably been sleeping in Bldg. 142, and didn't know one box car from another!

And speaking of box cars—the "birds" who painted Bldg 142 last week almost furnished the setting for a Byrd expedition. The coldest night of the season had to be spent with the heat off and the windows wide open.

A few of our quiz kids (always sharp as mashed potato sandwiches) got caught up on catch questions in a recent exam, and you should hear them Yelp! Most prevalent alibi—"I didn't come here to answer catch questions, I came here to learn." How else, except with catch questions, can an instructor tell if you're paying attention, or are just wasting his time and yours? Or maybe that was the day you was settin' and sleepin', Bub! Example of a "could be" catch question: "Idiosyncrasies only effect idiots and crazy people." Laughable to the initiated—a stickler for the novitate!

Our prize question of the week comes from the Commissary Class: Why is Navy coffee ordered from the Naval Clothing Depot? Our answer, as we crawl into the woodwork—Because that's the only place from which to order it!

Captain F. C. Greaves, MC, USN, presented LCDR John Soltysiak, MSC, USN, and Miss Helen Nora Sullivan with a silver platter on behalf of the Naval Hospital, in view of their forthcoming wedding. Present at the ceremony were: Capt. B. E. Bradley, MC, USN; Capt. I. L. Norman, MC, USN; Capt. H. J. Cokely, MC, USN; Capt. H. A. Gross, MC, USN; and CDR H. C. Gavin, NC, USN.

Sugar and Spice

"She's a Navy brat from the start," according to her father, LCDR W. W. Willgrube, MSC. Pert little Mary Lou was born in the Naval Hospital at Chelsea, Mass., ten years ago with Capt. J. R. Thomas, MC, USN, the present District Medical Officer of the Fourth Naval District, doing the honors. She now lives with her parents at 4601 Montgomery St., Bethesda, and is a fifth grader at Lynbrook School.

Red Cross Keeps Up On Times

Red Cross Service to Armed Forces keeps pace with changing times. During a war a greatly expanded Army, Navy, and Marine Corps, along with upheaval of normal way of living, made for a tremendous Red Cross Service expansion. In the aftermath of a great war, it is easy to overlook or take for granted a peacetime armed force of more than six times what it was ten years ago. Red Cross cannot ignore the differences between the Military forces of today and that of 1939.

Red Cross is on a peacetime status for service, but the program of 1939 would no more fit the situation of 1939 than a 1939 automobile body would fit on a 1949 chassis. Conditions to be met are different than they were a decade ago. The Armed Forces numbered scarcely over a quarter of a million in 1939. We are now maintaining approximately one and two thirds million men under arms. Instead of a relatively stabilized professional force, the armed forces are now characterized by a rapid turnover in personnel; about three quarters of a million entered service in 1948 while nearly half a million left.

Another big difference between the military forces of today and those of ten years ago is that the members are now much younger. About half a million of those who entered the service in 1948 were under 21 years of age. Instead of being stationed at posts in this country where life it comparatively

The Chaplain's Corner

By Fr. D. R. Kerrigan

HOW ABOUT A BEER, BU

God made the vine and the fruit of the vine. The discomfort of a young bride in Cana led Christ by His first miracle to turn water into wine for her feast. It's described poetically thus: "The me water saw it's God and blushed". Saint Paul advised the use of little wine for the stomach's sake."

Few people have been hurt by what they drank in the protest of wholesomeness of their own homes. You were allowed to drink at home because moderation has always been the watchword of Catholic home. "In medio stat virtus", said the old scholars. In case you've forgotten your latin word for word that means: "In the middle stands virtue which equals—moderation in everything."

You CAN do without drinking. Frank Curtin was never out of the party but he rarely drank—for the simple reason that he didn't want to. He would pick up his glass and put it down regularly, very few ever realized that he wasn't drinking. Jim Kendrick never drank, and he always seemed to have the best time of anyone at a party. Young people have no more need for liquor than they have for crutches. They have their own innate vitality to furnish the party for a good time. When a crowd of them are together, song should be easy, jokes should fly fast, their feet should fairly itch to dance.

For those who do drink—they can be reminded that drink is to be used with dignity and self-mastery by mature men and women. They are not supposed to find it a trap for their feet, a stutter for their tongue, a cloud for their brains, a snare for their souls. There is nothing but shame for drunkenness. Physically, drunkards are weaklings. Morally they have like fools. For ALL we recommend the "moderation" that Commander Hennessey talked about. Moderation can mean a number of things. For one who wishes to abstain, let him abstain. For one who wishes to drink, let him USE his head about it—not LOSE it. For one who allows alcohol to numb his brain and loses control of himself he is guilty of whatever happens to him, or through him, whatever happens to others. Keep the faith.

uneventful, a significant number of the present armed forces are scattered around the world on duty that, in many cases, more nearly approaches wartime than peacetime conditions.

The peacetime Armed Forces of 1949 need a large staff of Red Cross workers scattered throughout the world to keep them in touch with home and to help with personal and family problems. A large block of Red Cross service to the Armed Forces is found in military hospitals such as this one.

DENTISTS

(Continued from page one)

sion of LCDR Edwin Nutting, DC, USN, won the first award medal in the category, Medical Films—Medical Natural Sciences. "Periodontia" (A surgical treatment for gingival disorders), produced under the supervision of LT. Julian R. Conant, DC, USN, won second place with a certificate of honorable mention.

The Venice Film Festival is an annual competition staged by the Biennale of Venice under the auspices of the Italian Government to attest the work done by peoples of various countries of the world in promoting culture, civilization and the brotherhood of nations through the use of cinematography.

The awards to organizations in the United States and Canada were made in a colorful ceremony held November 21 at the State Department by Counsler Mario Luciolli, who was assisted by the attaches of the Italian Embassy.

Rear Admiral A. M. Pride, U. S. Navy acted for the United States Navy in accepting the two awards for the winning dental films from the Italian Naval Attache. With him at the ceremony were Rear Admiral Clemens V. Rault, DC, U. S. Navy, Assistant Chief of Bureau of Medicine and Surgery (Dentistry) and Chief of the Dental Division and Captain Louis D. Mitchell Jr., DC, USN, C. O. of the Naval Dental School.

Following the presentation of the awards, Doctors Nutting and Conant, together with other outstanding film-makers were presented to the audience and were congratulated on their outstanding efforts.

Critics Choose Best In Recent Book Selection

No doubt you are familiar with all of the glamorous details of an annual contest for "Miss America" but you may have missed the count of another contest; the winners of which have just been announced.

This contest was for Current Books Worth Reading and a recent issue of a literary magazine gives the summary of the choices. Newspaper critics from every section of the country as well representatives of book trade publications. Each person submitted a list of ten titles so you will find a wide variety of nominations; perhaps you will be interested to study the article and make a list of the you would like to read. Only the top choices can be named here:

In non-fiction: THE MATURE MIND by Overstreet and STALLION by Deutscher received the most votes, followed by LEAD KINDLY LIGHT, by Sheean, THE ASPIRING AGE, by Leighton, THE THREAT THAT RUNS SO TRUE, by Jess Stuart, and NO BANNERS, NO BUGLES by Ellsberg.

Barber Takes No Chances On Too Close Shave

You've probably heard of the baker who does not eat bread; of the bar tender who drinks nothing but coke. But did you ever hear of a barber who is weary of the blade he wields?

Charlie King, one of our civilian barbers, apparently will trust himself just so far. He doesn't fail using that long, sharp blade on anybody who happens in his chair, but it is a different matter when it comes to himself.

He just bought a safety razor!

Lt. Barnett Doffs Blues Dons Civies

At last the secret of how LT "Leaky" W. R. Barnett, MSC, USN, who was transferred to the Fleet Reserve from the NH here in August, acquired his nickname is out. While he was all American water boy for the Portsmouth Naval Hospital football team back in the later 20's and early '30's he was dubbed "Leaky Joe".

Lt. Barnett, spent the last two years of his Navy career as administrative assistant to the OOD at NNMC. With 22 years' service to his credit, he decided to try a different way of life minus watches and details.

A native Texan, he enlisted at Dallas in June 1927, and went through boot training at the Norfolk Naval Base. He studied at Pharmacist's Mate School in Portsmouth.

"Leaky's" first assignment was a four year tour of duty at the Norfolk Naval Base. Besides toting water for the gridders, he played center field on the hospital baseball team.

In 1931 he was sent aboard the USS Augusta, flagship for the scouting force. This duty was followed by an assignment on the heavy cruiser USS Chester until December 1932, when he was transferred to the Naval Hospital in Washington for two and a half years.

With the start of the war, Barnett was under instruction at the New London Submarine Base. He then served as one of the 69 crew mem-

(Continued on page five)

Y Cottage Group Elects Corpsmen

Jerry Miller, Photographic Lab School, Edward Sweeney, Research, and Burgess Allison, Dental School, were among those elected to the Young Adult Council of the "Y" Cottage at a recent membership meeting.

The "Y" Cottage is a community recreation center for young people supported by the Montgomery County Community Chest and Council. The services of the Cottage include rooms registry service, kitchen facilities, counseling, a drop-in center, etc.

The program includes Sunday night suppers, horseback riding, card parties, dances, picnics, etc. All service personnel are invited to make the Cottage their home during their stay in Bethesda.

Wave Whisps

By Betty Bookis "Ski"

According to the latest statistics, thirty-four additional WAVES, all told and accounted for, have reported in since our last column. This brings the number now inhabiting the barracks up to a grand total of forty-four.

WELCOME ABOARD—Blanchard, Burton, Cooper, deLanguilliet, deVos, Elliott, Feldi, Fleming, Glendenning, Gruber, Hamilton, Hanson, Heckel, Hernandez, Hopper, Karge, Laskewich, Lawde, Leckie, Meacham, Miller, McPeck, McElfish, Olsen, Petersen, Robertson, Smith, Stark, Suchomski, Trovato, White, Winter, Woodward and Wyka.

Twelve transfers, one discharge and a marriage have also taken place. Off to California were Benton, Berstler, Normington, Rush and Pat Smith. To Patuxent River in October went Loper, MacVicar, Nausedas and Saunders.

Students, Bosarge and Heinzman, to Pensacola and Quonset Point respectively, and the latest—Ruth Quire, to Portsmouth, Va. Needless to say, we'll miss those "old-timers," and it just won't seem the same without 'em. That's a fact!

Discharged recently was Peg Bosco Alvey, now a typical Navy housewife keeping hubby company at Pensacola.

Latest to take the "big step," as if you didn't know, was yours truly, Betty Bookis Sanowskis, who fin-

Soft and Green

Pictured above is the new addition to the golf course. It is the ninth hole. The golf season is almost over, so the addition will probably not be well broken in until next year.

ally "dood it" October 8, way down south in Tampa, Florida. Her better half and the jeep are now attached to the dispensary at the Sub Base, New London, Conn.

Without a doubt, wedding bells will definitely ring for Betty Barley this month. And before long—probably another Betty will be saying "I do!"—who knows, from the looks of things.

The gals are still a bit "upset" over the nasty ol' birdhead of a character who switched sugar and salt shakers on us a couple weeks ago. If there's anything we detest—it's SWEET fried eggs!

Mustn't forget to mention our new Master-at-Arms, Mary Murphy, who relieved Berstler over at the quarters along about November 14, and "Rusty" Olsen, our night owl keeper-of-the-keys. Lucille did a mighty fine job of house-keeping—under all sorts of obstacles—and deserves a great deal of credit for her splendid efforts.

Folks over at the "Y" are wondering why more WAVES aren't patronizing the Cottage. It costs nothing to investigate, so you can't lose. Grace Trovato, who likes horses, and Joy Shrader, our personality kid, can certainly back this up. (P.S. Me too!)

Also—a word of praise for the good people who're responsible for the snazzy new furniture, the television set, ironing board covers, plugs, bicycles, etc.—and for the ones who planned the WAVE party held below in the Recreation Room the first of the month. Why not more of the same more often?

Lest we forget, how 'bout that drill team idea and the basketball squad? To date we haven't done much about either, so let's get going here and start the ball rollin'. Be seeing ya'!

Parked Flivers Make No Quivers

By J. C. WOODS

They auto do pumpin about some of these cars around here. If one should take a quick glance over the parking lot in front of annex two the first impression would be that it is a junk yard. A more careful observation would confirm it. Recently an interview was held with Mr. T., owner of one of these alleged autos. Here are the findings:

The car appeared to be a town and country (mostly country). It was a model X and bore a light green color which could have bored anyone. A test of the motor was suggested and Mr. T., along with the interviewer, entered the car via the radiator, because the doors were sealed to insure safety.

Everything went smoothly until they tried to start the car, whereupon something seemed to be missing. Lifting up the hood the interviewer was horrified to find that it was the motor. An outstanding feature was the brakes, there were some in every part of the car. The owner felt that the only thing necessary was a change of oil and then went on to add that Wildroot was getting rather expensive anyway.

The muffler served its purpose well; it made so much noise that nothing else could be heard. As for the tires, they were all well treaded, it looked as though everyone on the compound had treaded

Be Well Read In Just Ten Easy Lessons

From time to time the national magazines run articles listing books which, if mastered, would metamorphize the reader into the genius category.

Not to be outdone by these magazines, the "News" has decided to print a similar listing. After great consultations with a board of experts, we have come to the following conclusion. To become one of the world's most prolific gentlemen read either of these pairs:

1. Wine of Satan or Come Clean My Love.
 2. The Plague and I or To Hell and Back.
 3. Men of Law or Trial and Error.
 4. Woman's World or War as I Knew It.
 5. The Woman In the Picture or Paradise Lost.
- After five of the above ten titles have been read and mastered, digest all of the following:
1. Bury Me Deep and Dig Me Later.
 2. The Yellow Room and The Lively Lady.
 3. Under the Volcano and Beneath Another Sun.
 4. Marriage is a Serious Business and A Treasury of Science Fiction.
 5. Be Glad You're Neurotic and How To Lose Friends and Alienate People.

on them. If set on a high hill and given a good push, according to the owner, the car could reach the amazing speed of 12.5 mph.

Taking the bumps seemed to be its specialty. Apparently it took and held onto just about every one on the road. This is but one example of the many—er—cars seen on the compound. Any resemblance between these cars and moving ones is purely accidental. Their only chance is believed to be in joining the so popular MULE TRAIN.

Capt. Bradley, NH Exec. Performed Rare Duties

Newest executive officer on the station is Captain Bruce E. Bradley, MC, USN, who arrived October 31 to take over his duties at the Naval Hospital.

Capt. Bradley began his Naval career as an intern at Chelsea Naval Hospital right after graduating from med school in 1926. While the captain was attending the University of Virginia Medical School, two of his classmates interested him in a Navy Career.

Shortly after he finished his internship, Capt. Bradley was assigned to duty with the 5th Marine Regiment in Nicaragua where he remained for two years.

His initial sea duty was one of the most unusual types in the service. He was medical officer on the USS Capella which sailed up to the Pribilof Islands in the Bering Sea to carry back sealskins to Seattle, Wash.

From 1933 to 1936, Capt. Bradley had the job of medical officer on the South China patrol operating out of Canton. This was followed by a tour of duty on the Philippine Islands.

His most interesting assignment, Capt. Bradley feels, was as senior medical officer of a "cub, or advanced Naval base, in Bougainville. There he built up a small, 200-bed hospital in quonset huts into a 600-bed one.

He later became Medical Officer in Command of Advanced Base Hospital, Number 14, at Finchaven, New Guinea.

Capt. Bradley has had three previous assignments in the Washington area at the Naval Medical School, the Naval dispensary, and the planning division of BuMed.

For these and other duties, the Captain wears a series of medals and ribbons. They include, among others, the Legion of Merit, Nicaraguan Ribbon, Asiatic Pacific Area Ribbon with one star, Nicaraguan Medal of Merit, and Yangtze Service Medal.

(Continued on page five)

LTJG GILBERT, MSC, USN

Pictured above is LCDR Hallberg who is interviewing a patient. The tests that are later run on the patient are of great value, but the interview is of uppermost importance in determining the locale and other data pertaining to the appearance of symptoms. This data is also necessary for a proper evaluation of the case in hand.

Shown above is George Jowett, who is intent on apparatus that is necessary in making antigens clinic.

Above is Miss Moniz selecting antigens that are to be used for subcutaneous injections.

Allergy Clinic In Review Staff Shows Initiative In Offering Treatment

Wheezes, sneezes, and watering eyes are all part of a day's work with the Allergy Clinic. LCDR Robert B. Hallberg, MC, USN, who is believed to be the only allergist in the Navy, won't commit himself by saying that he thrives on the ragweed season, but it does bring him a multitude of patients.

But ragweed is not the only complaint that brings patients to the Allergy Clinic. Almost anything from cabbage to molds affects different people.

Assisting Doctor Hallberg is LTJG Mary Anne Moniz, NC, USN, Miss Moniz is remembered best by her patients for her pleasing personality. She is always ready with an unaffected smile. Her understanding consideration for her patients is remarkable.

"My two corpsmen are just HN's, but they rate a chief's uniform for the job they do here," Miss Moniz confessed. The men to rate the compliment are George F. Jowett and Robert G. Rowell. They are both attached to the Naval Hospital.

Jowett and Rowell are kept busy with the multitude of tasks that their assignment demands. They have initiated the job of making their own antigens. Upon seeing the amalgamation of tubes, boilers, and paraphernalia that comes into being while making these antigens, a stranger would be sure to think that a mad chemist is running rampant.

Not all patients react to internal substances. Skin method used in detecting contact allergies.

This patient (below) displays the results of positive tests. Each wheel is indicative of an allergy to the antigen injected.

Robert Rowell (above) is in the act of injecting a small quantity of antigen beneath the patient's skin.

Shown to the right is the complete set of instruments and materials necessary in operating the allergy clinic. Yet, with all this it is still the man behind the job that bring the final success of a "closed case."

The Dental Explorer

By BOB THOMPSON

Victory Song . . . Dental's en-
d basketball team set down the
Dental Officers last week to the tune
of 34-31. Good play by Stevens,
Gryczewski, Littner,
Owen, Williams, and Cowles. For
the tooth jokers, Samuels, Ready,
Goldstein, King, Laskowski, and
Dr. Kline, a regular on the
cor's squad, did the calling be-
cause of an account of an
attraction.

Nostalgia . . . for good ole Navy
or should I mention the term?
Looking ahead . . . McCabe greet-
ing the pediatricians with a cheery
"Good Morning". And Moore feel-
ing low come the morning meal.
Glad to have you. . . The second
round for NDS. This one a male,
and Schwind who must have hated
to leave the school the last time for
his back.

Never say die. . . Should I go
into details, Bell? And how about
Buchanan? As for myself,
I walk.

Be glad when you're gone . . .
"Mule Train" which literally starts
the bulkheads vibrating and so
on in the morning, too.

Don't stop me if you've heard this
one. . . McCabe and Swedberg try-
ing for honors as "King of Corn".
Institute of public opinion. . .
at old question. Will television
place that thing Kinsey wrote
out? I'm not sure but the TV
room is quite a popular place. No
reflections on the video people.

Farewell and goodbye . . . 'til
next time.

Girl Scouts Tour NNMC

A troop of approximately 30 Girl
Scouts from Bethesda and their
leaders visited the Medical Center
on November 14 as a part of the regu-
lar scout training program required
for their advancement to second
rank. The group was shown
through the various departments of
the Center including the observation
ward, the wards, operating rooms
and mess hall.

In November 15 another group
of younger girls, Brownies, from
St. Mary's of Lourdes Catholic
Church, accompanied by Mrs. C. T.
son, their leader, made a similar
tour of the compound. Of particu-
lar interest were the pediatric ward,
demonstration of the NNMC
X-ray system, and the hospital
mess hall where the girls received small
treats of Navy chow before de-
parting.

PT. BRADLEY

(Continued from page three)

born in Raleigh, N. C., on Sep-
tember 29, 1902. Capt. Bradley at-
tended both the University of Vir-
ginia undergraduate and medical
schools. He married Miss Gertrude
Fuller of Lakehurst, N. J., while
on duty at the Naval Air Sta-
tion there.

The Bradleys, who now live at
Arlington, D. C., have two young-
sters, four-year-old Betsey and Bruce, who
were born in the Naval Hospital at
Beach, Calif. Naval Hospital
at the Captain was executive of-
ficer.

Welcome aboard, Captain.

Continued from page one)
Originality is his theme and we
soon have a chance to view
some of his work as a professional.
He is leaving for New York City
where he will assume a job on one
of the country's leading fashion
magazines, *Mademoiselle*.

Personalities About The Center

"Marine Or Sailor?"
Asks M-Sgt. Kendall

"Been in and out of so many
navy hospitals that at times I can't
tell if I'm a marine or a sailor,"
Master Sergeant Leslie M. Kendall
said. He wasn't kidding! Since he
received a shrapnel wound in the
right foot, when returning from a re-
connaissance mission on Saipan, the
Sarge has been a patient at six dif-
ferent naval hospitals. "Just can't
get the darn foot to heal," he said.

Before Leslie's long and colorful
career started, he lived in Mount
Sterling, Kentucky, his birthplace,
and Detroit Michigan. He has a
total of thirteen years two months
in service and will not return per-
manently to either of these cities un-
til that long twenty it up.

Of the nine medals the Sarge
wears he overrides his purple heart
and other star decked medals to
give preference to his Good Con-
duct Medal with three stars.

Upon release from training camp,
Leslie was sent to Guam where he
served as the Governor's orderly
during 1937 and 1938. From there
he was sent to China in '39, where
he did duty with the 4th Marine
Regiment. The war broke out and
found the Sarge with the 23rd Mar-
ines, 4th division, in charge of a
.50 caliber machine gun section.
Then came Roi-Namur. Then Sai-
pan. Then the shrapnel.

The Sarge is married and has a
thirteen year old daughter. Both
mother and daughter are anxiously
awaiting his return to duty.

LT. BARNETT

(Continued from page 3)

bers on the sub USS Greenling,
making three war patrol runs. For
these he received the Presidential
Unit Citation, the Bronze Star, and
the Submarine Patrol pin with two
gold stars.

He was transferred to the USS
Widgeon, a salvage tug, for a year's
duty in December, 1942, followed
by another year at the Naval Gun
Factory diving school and a tour
at the Quantico Naval Hospital.

He first came to NNMC to attend
the NSHA in 1945 and remained at
the NH here.

LT Barnett, his wife Edith, and
young daughter Sara Anne reside
at 4414 West Va. Ave., Bethesda.

BOXER

(Continued from page one)

Navy records list the former
gladiator as 64 years old. "By
rights I'm 73, but I won't tell them
here," he confessed.

Yep, the old battler has his stories
to tell. He can describe the old days
when he lasted through 25, 35, and
40 rounds of sledge-hammer fight-
ing. He can recall the times when
he chalked up knock out after knock
out, many of them in bare-knuckle
fights.

Tobin never used his own name
in the fight game—his folks object-
ed. Yet who knows what premoni-
tion they may have had when they
christened him Andrew, which
means strong and manly.

"20 Yr Woman?" Maybe
Says Gussie Denker

"I think that the Navy offers a
well rounded education, in fact, I
like it so well, who knows, I may
even become a 20 year woman," is
the latest word from Gussie Den-
ker, HN, who works in the Hema-
tology Department of NMRI.

Lab work is nothing new for Gus-
sie who is well acquainted with the
procedure, after being at it for three
years steady. She had previously
graduated from the Paine Hall
School for Laboratory Technicians
in New York City during 1945.

Entering the service October 1,
1948, Gussie took boot training at
Great Lakes where she underwent
the full treatment of becoming
Navy.

After being indoctrinated on rules
and regulations and becoming as
confused with Navy lingo as one of
HOGAN'S GOATS, she was trans-
ferred to hospital corps school.

From the school she came to
NNMC and ward duty for several
months, then to NMRI and lab work,
at long last.

Admiralettes Schedule Full Season Of Play

The much talked of Wave basket-
ball team has finally emerged as
the NNMC Admiralettes with a 14
game schedule in the All Service
Women's Basketball League.

Bruce Tilman of NMRI is acting
as coach and Patricia "Rusty" Ol-
sen is player-manager.

Other team members include
Chief Gruber, Katie Glendenning,
Gussie Denker, Betty Barley, Gloria
Supino, Jo Feldi, "Hamie" Ham-
ilton, Grace Trovato, Regie Wyka,
Eleanor Smith, Phyllis McElfish,
Betty Bookis Sanowskis, and Har-
riet Hanson.

The Admiralettes met their first
opponents, Ft. Myer South Pacific
WACs on November 21. Their
tussle is with the Fort Myer North
Post WAC's in November, played
there.

Y Cottage Schedules Thanksgiving Dance

All NNMC personnel are invited
to attend the "Y" Cottage dance
Tuesday, November 29, 1949, at the
Rock Creek Shelter from 9:00 P. M.
to midnight. Dick Stretton and his
Orchestra will play and the Shelter
will be decorated in keeping with
the Thanksgiving theme.

Tickets are on sale now and may
be purchased from Tony Maienza
of NMS or at the "Y" Cottage, 8410
Wisconsin Avenue, Bethesda. After
the cost of the orchestra is met, pro-
ceeds will go for the "Y" Cottage
expenses.

ASCAP Petrillo Or
Sailor Petrillo

Pictured above is Richard Fran-
cis Petrillo (not the musician). He
is HN and is at present on the NMS
staff. He is MAA of BLDG. 140.
Petrillo, who is known to many as
"Pete", came here from Corps
School, Great Lakes, Ill., in March
of 1948.

Pete is well liked around the
compound, and those who were on
night duty in May should remember
the colorful coffee sessions he held
as Commissary night MAA. "Oh,
those aromatic spirits . . ."

When asked his opinion of the
Navy, his reply was:

"I believe that each person sees
it differently. As for myself, the
Navy has been good to me most of
the time. Staying in for a few years
is alright as far as I am concerned,
but that's all."

Petrillo's enlistment expires in
March of 1950. His plans for the
future are not definite.

Chief And Wife Waltz Many 1st Prizes Away

Chief Julian met Elvi in April,
1943, at Fort Devens, Mass., where
he was on recruiting duty.

Elvi's first love was dancing and
has been since early high school
days. Chief Julian considers his
wife an excellent dancer and she
proved it by winning first prize in
a seven week elimination dance con-
test in Fitchburg, Mass., where good
dancers are abundant.

Julian first explored the dance
floor in Boston in 1942, and after
a few weeks felt bold enough to
venture forth from the corners.

It was after meeting Elvi, though,
that he began taking dancing more
seriously. Competition for the
lady's evening up Fitchburg way
was keen for the guy who couldn't
hold his own on the ball room floor.

The day came when the couple
fox trotted first prize away from a
sizable group at an outing in Fitch-
burg. Of course, the lady was most
graciously ceded the five dollars.
Their second prize (fox trot) was
copped at a Ship's dance in Boston,
after they'd been married about
four months.

At Charleston, S.C., the Julians
waltzed away with two first prizes.
Also, two waltz contests have been
won by them at the NNMC Rec
Hall since their arrival here.

We have their word that the
waltz is the easiest dance to win, be-
cause so few people know how to
waltz. They feel more elated over
winning at fox trot, as there is usu-
ally more competition. Their one
ambition is to win a contest at the
Arcadia Ball Room in New York
City, which in their opinion, draws
the best all around dancers they
have ever seen.

Med School Scuttlebutt

By F. A. ADAMS

The warm weather for this time
of year seems to have everyone
dreaming of Spring instead of a
white Christmas, judging from the
booming business the phone booths
at the barracks are doing. Parker
and Magan will soon be paying
rent if they continue to spend eve-
nings on the phone. Some nights
in the past, it looked like the evening
chow line stretching from the mess-
hall to ward 5-A.

Smith of Pathology, back off of
20 days leave spent in Missouri,
still seems anxious to reach Ship
Service around the noon hour. I
wonder who the main attraction
could be?

Whoever said basketball wasn't
a rough game, may get a strong
answer from Cox, of Serology, who
has been sporting a leg cast, due
to an injury on the courts at a
practice session.

Speaking on the subject of basket-
ball, what has happened to the ru-
mored teams the Nurses and Waves
were thinking of starting? Have
they given up the ship already or
was the baseball season too press-
ing???

The calorie twins, Foreman and
Foley, both from the blood bank,
seen checking the neon signs closely
at meal times in the messhall. Bet-
ter late than never, fellows.

Welcomed back to the Staff re-
cently was Walter Mann, reporting
aboard from the U. S. Naval Hospi-
tal, San Diego, Calif., for duty in
Medical Illustration.

It appears that Brown and Thomp-
son are two more 20 year men after
both just shipping over for 6 more
years. Congratulations.

What could be causing Glunz of
Blood Chemistry, to be whistling
"I'm Falling in Love With Some-
one"? The blonde in blue—Huh?

John "Apple Seed" Giragosian
making that last minute dash to the

apple before bedtime routine of his.
The local fruit markets are having
a hard time trying to keep up with
his demands for more apples.

Lab 13 News Clips

By GLIN WINSTON

Now that all but the last hurdle
has been cleared, the well-deserving
members of Lab 13 can begin to get
readjusted to the normal pace of
existence. All fifty-three members
will undoubtedly take advantage of
this moment to reduce their over-
average blood pressure. After all,
these nine months would give any
man more than that.

This is the first class to come
under the one years course. It was
previously six months. With its
present number, it will be one of the
largest classes to graduate from the
school. Another two weeks and
they will start to work in various
departments in the laboratory, until
their graduation in April. After
graduation, they will be sent to vari-
ous hospitals and dispensaries where
there is need for qualified techni-
cians.

Enviously watching the inevitable
are the eighty-odd members. This
group is officially recognized as the
"plebs." The class will soon finish
Hematology, a prominent landmark
in the course. Under their breath
(as the frosh must do) they are say-
ing "Any thing you can do I can do
better." Fellas, it is not all that.
If Baker can do it (93 average now)
surely you can! With Chief Blake-
more as instructor not only will you
be "in the know" on it, but an AU-
THORITY.

Commanches Edge Dukes 14 To 13 For Title

Tower Topics

By GEORGE ROYSTER

In the past year that I have been writing for the NEWS I have tried to turn in a column that would serve to give a few minutes of very light reading to the men of the combined Commands. I have, for the most part tried to write about the things, people and situations that you seemed most interested in during the various parts of the year. I have made it a point in the past never to reprimand, crusade, reform or ridicule any person or group, but at a certain movie last week the behavior was such that I feel that something should be said.

This particular night, fortunately, the auditorium was not very crowded, but to have heard the cat-calls, loud shouts, and general uproar one would have thought it was a football rally. To add to the melee, a very clever person thought that the organ would blend well with the particular scene and began to play just to insure complete confusion. No, this was not at a kiddies matinee but at a movie where everyone is assumed to be an adult! To a visitor, it was certainly a poor commentary on the movie manners of the PATIENTS (yes, it was the early movie) and the Staff of the NNMC. So from now on children, er pardon MEN, be a little more mindful of the fact that most all of the moviegoers want to be entertained by the movie and care nothing for your personal opinions that are so willfully voiced. In short, knock it off!

Once again your poor columnist did terrible on the football upset of the week. We missed by only three touchdowns. So I can see no alternative other than to solemnly promise never to pick another upset. I have at last learned that when I say a team is going to win its in for a bad game of football. Its the old "kiss of death" story so no more predictions, honest.

Seen Around the Compound: The WAVES out cheering for the Dental Dukes in the recent championship game. Betty Bookis with a black eye and only married a week too!! George Funk worried and about a pea coat and sixty-five cents. Everyone wondering what happen to Billie Holiday. Maybe she was having a little holiday.

That about does it for now except to remind you that the next Staff Dance is December 2 and that for the first time civilian clothes are optional for wear. Hope to see you all there.

Pin Setters Now Available

In recent weeks the Recreation Buildings' bowling lanes have received an overhaul. New equipment has been purchased and installed. Facilities for Ten Pin and Duck Pin bowling are available.

Through the efforts of our Recreation Department, pin setters are now available between the hours of 1000 and 2200 daily. This arrangement has necessitated the initiation of a small fee, where-by the Pin Setters may receive some compensation for their labors. At present the standard charge is 15c a line.

Shooting Stars

Big George Funk, talented and versatile athlete is back with the squad for his second big season. As one of the Centers threats last season he has lost none of the zip which has made him so popular with player and coach alike. A Penn. Stater, from Sunbury, Pa., Big George earned 9 letters in high school, playing three major sports. His 6 foot 2 1/2 inch frame carries around a sturdy 191 lbs. of solidly built muscle, which opponents find extremely difficult to move-out from under the bucket. A boy with a great amount of stamina, Big George will prove a valuable asset to us and a devastating thorn in our opponents side.

Shooting Stars

In this and coming issues of the News we will present a series of photographs and short articles, introducing to you, members of our varsity cagers.

Pictured above, "Prof." Echols, sky-scraping center for the NNMC Squad stands 6 foot 3 inches high, tips the scales at 190 and at present is a student in Laboratory class #14. In present pre-season workouts the "Prof." has displayed a great rebounding game and is no less accomplished in the art of ball handling. Having lettered for three years in Basketball at Fairmount, West Va. High, Echols, matriculated at West Va. State College as a pre-Med. student, playing frosh ball during this period. The addition of "Prof" Echols to our team will aid in giving Coach Frates a measure of height, which was predominantly lacking from last seasons varsity.

Tankers Fight To Maintain Loop Lead

Acting as pace setters in the NNMC Duckpin Loop has been a bitter battle for the Tankers. Maintenance of a leading margin, being a difficult task, with four teams less than 5 games off the pace.

Showing less of the fire which carried them to last seasons League Championship, the Battle Wagons have slipped into the second division, nine games behind the leader.

Fireman Kirby is still the hottest Keggler in the league, sporting a 111 Average which is tops in circuit competition. The old fireman leads in the spare department and runs second in all other individual attainments.

N.N.M.C. BOWLING STANDINGS (as of Nov. 15)

Team	Won	Last
Tankers	19	5
Transports	18	6
Tin Cans	16	8
Net Tenders	15	9
Tugs	14	10
Cruisers	13	11
Carriers	12	12
Subs	11	13
Battle Wagons	10	14
Cutters	10	14

Tough Center Team Takes Winning Point

Rising up in all their might Center Commanches nosed out Dukes 14-13 in a frenzied finish, to cap the league championship. Their way to league honors was not to be denied Centers for Green as they twice came from behind to win a hard fought, see-contest.

Sporting Scenes

By JAY BELL

The middies should tack another coat of armor along their bulkheads come Saturday. Sauers' Boys will in all probability come out of their tiff with the Black Knights a little worse for the wear. Army, Yes, by 14 points. Well drilled and too much reserve for the sailors.

How about Jeff Cravaths Trojans? I'm not Irish understand, but by golly I'll ride the band wagon, sure, an you bet your bottom dollar on that. The fighting Micks by 28 points no less.

Clyde Shuberts gazelles made a hasty exit after their defeat by center Commanches. Forfeiting to the Dukes was quite a trick. What's up Clyde no competitive spirit?

Whipping our Admirals into shape is a problem at present, as the coaching staff so aptly put it, "The same ten men have never appeared at any session". Let's hope that our NNMC cagers are given more consideration in this matter of watch standing. They spent too much time playing with pick up squads last season. Oh yes, this problem can be alleviated.

They tell me, "Dead Eye" Stanley has come up with something new in offensive basketball strategy. Is it worth considering? Ask Pete Open your eyes Stan, you missed.

My old friend, comrade "Blasting" Bill Butts will be heading for Gods country in a week or so. Ah yes, Sunny California no less. Good luck Bill, Give my regards to Market street.

Say, that Dental-Center tilt was some contest, for sheer thrills and excitement you couldn't see another game to match it. Tough one to lose but a honey to win. Coach Frates will attest to this I'll wager, sorry coach it had to be done. The line play was excellent and to say the least, very bruising. Too much credit can't be showered on those two lines believe me.

Battling through a scoreless quarter it was Dentals Dukes, late in the second stanza with than one minute to play broke ice. Catching Center with the fensive shirts off Charlie flashy field general pitched yard aerial to Homer Samuel caught the pigskin standing, endzone. The conversion thwarted by Center and this proved Dentals downfall. Hal ended with Dentals Dukes onto a 6 to 0 lead.

Receiving Dentals opening and half kickoff, Centers Wave on 5 plays rolled to down and their initial tally, v air lanes. Pat Partridge tossed 35-yard pass to Big C Funk who out ran, Dentals to score. The play covered 52 over all. Jay Bell, Centers QB, to speedster J. C. Woods for conversion attempt and Center 7 to 6.

The fourth quarter produced only break this hard fought saw, as Center was forced to from their own goal line. rain and sleet coming down kick slid off his foot and roll of bounds on Centers 6 yard er. However the Commanche in holding for downs and punt of danger moments later.

YARDSTICK

Center	First Downs
10	Net yards rushing
35	Net yards passing
156	Forwards attempted
28	Forwards completed
17	Yards penalized
5	

With three minutes remaining Dentals Dukes marched from field to the Commanche Five crossed Centers goal line Charlie Fries again tossed to uels who had out-faked Center fensive back and was standing alone in the end-zone. The end point was good, Fries to uels, Dukes 13, Center 7, two a half minutes left to play.

Center received the Dukes' kick with Pat Partridge carrying leather to the Commanche 25 marker. Racing against time Partridge and Bell filling the zone with pigskins. Center picked two first downs in succession. yard aerial, Bell to Bruce Till set the Green deep in Dental tory on the 6 yard line. Fake pass Pat Partridge carried for score. Bell threw to Funk at game ended, Center 14, Duke Center 0 0 7 7 Dental 0 6 0 7 Touchdowns—Samuels, 2; Fries, 1; Partridge. Point after TD—Woods, Funk, uels.

Red Feather Campaign Goes Over Top

Pictured above, left to right: Lieut. Gregg Cox, Royal Canadian Navy, Aide to Commodore Lay, Lieut. Commander Henry R. Ruttan, Victoria, B.C., Surgeon Lieut. John Bean, RC (R), Toronto, Canada, Commodore W. Nelson Lay, Naval Attache, Canadian Embassy, Washington, D. C. and member of Joint Staff, Surgeon Commander Marvin Wellman, RNN, Nova Scotia, Canada, and RADM M. D. Willcuts, MC, USN. Commodore Lay thanks RADM Willcuts in behalf of the Canadian government for the courtesy shown the Royal Canadian medical officers while attending the Special Course in Radioactive Isotopes and Special Weapons held here recently.

Navy Dentists Will Graduate Here Dec. 20

Graduation exercises for ten dental officers completing post graduate work, and specialized training will be held in the NNMCM auditorium at 1500 December 20.

Certificates of graduation will be presented by RADM M. D. Willcuts, MC, USN, Medical Officer in Command, NNMCM.

Speakers for the occasion will be RADM Clifford A. Swanson, MC, USN, Surgeon General of the Navy, RADM Clemens V. Rault, DC, USN, Assistant Chief BuMed for Dentistry and Chief of the Dental Division, RADM James L. Holloway, Jr., USN, Superintendent, U. S. Naval Academy.

Dental Officers completing the post graduate course in general dentistry are LCDR Frederick B. Lukins, LCDR Jackson F. McKinney, LT Edward C. Mitchell, LT Paul H. Wells, Jr., LT Ira Goldstein and LTJG Blayne A. Gumm.

A specialized course in Prosthodontia will be completed by CDR Clarence R. Connell and LCDR Charles W. Miller.

CDR Venard R. Jackson and CDR Norman R. Oliver will complete the specialized course in Oral Surgery.

(Continued on page 5)

Team Work, Coordinated Effort Bring Dividends

All activities of the Medical Center reach the 100% column together in a final spurt spearheaded by Admiral Willcuts.

FINAL STANDINGS			
	Quota	Total Contributions	Percentage of Quota
NNMC	1300.00	1300.00	100 %
NH	2800.00	2800.00	100 %
NMS	615.00	620.30	100.08%
NMRI	756.00	758.00	100.26%
NDS	615.00	618.14	100.5 %
NSHA	450.00	450.44	100.09%
TOTAL	6536.00	6546.88	100.16%

Xmas Party For Kiddies On Dec. 24

Some of the children may remember all the fun they had at last year's Christmas party for the children of staff officers and enlisted personnel. Well, Santa will be on hand again this year for those deserving youngsters. It is anticipated that he will have an overflowing pouch, full of goodies and gifts for all those who attend.

The party is to be held in the Auditorium on December 24th at 2:30 in the afternoon. There will be entertainment and refreshments served. All children who are present will receive gifts. Cartoons and movie shorts will be shown for, ah, the children's pleasure.

Everyone is invited to join in the spirit of the occasion; come and see the kiddies as they get their presents from Santa. Do not forget the time and date as arrangements are being made to insure everyone a good time this happy Christmas eve.

NMRI Officers Meet With Group In Cleveland

A delegation of civilian and Navy research workers from the Naval Medical Research Institute, headed by Captain C. F. Behrens, Commanding the Institute, attended the annual meeting of the Radiological Society of North America. The meeting was held during the week of December 4. The conference was held in the Public Auditorium, Cleveland, Ohio.

Commander H. C. Dudley, MSC, on the staff of the NMRI, presented a paper entitled Radiogallium, Its Possibilities As A New Tool In Radiology.

The Bureau of Medicine and Surgery is sponsoring a panel exhibit entitled "Modern Aspects of Radiologic Research" during the Society's meeting.

Choral Group To Sing Here December 18

On December the eighteenth a group of Washingtonians will present a half hour of entertainment for the enjoyment of the staff and patients. The Washingtonians are under the baton of Mr. John Bulough, a student of Fred Waring.

Twenty-five voices will join to furnish Christmas, popular, and folk selections. Most of the songs will be Fred Waring arrangements.

The Choral Group will appear at 1800 at the NNMCM auditorium. The regular movie will follow.

New Deadline For NSLI Policy Holders

(AFPS)—A new National Service Life Insurance policy deadline will become effective January 1, 1950, the Veterans Administration has announced.

Any veteran of World War II may take out a National Service Life Insurance policy, or reinstate a lapsed policy, before that date simply by providing satisfactory evidence of good health, the VA said. The agency added that a less-than-total-service-incurred disability would be disregarded in determining good health of the applicant.

After January 1, each applicant for a policy or renewal must demonstrate that he is an insurable risk. The rules also become more strict then for the veterans who apply for National Service Life Insurance "total disability income" provision.

Bu M&S Will Shoulder School Expenses Now

During the winter and summer school terms, a sizable number of naval personnel attached to the NNMCM Commands attended the various colleges and schools in this area. The officials of these colleges and schools desire to know the approximate number of naval personnel who will be interested in enrolling in the spring term, which begins in January and February.

The Montgomery County Junior College in Bethesda, is an accredited institution, offering courses on the freshman and sophomore levels. Classes are held in the late afternoon and early evening hours, thereby allowing service personnel attend after duty hours. Some of the laboratory courses begin at 1800, but the majority of classes are (Continued on page 5)

Handel's Messiah To Be Presented Here Thursday

THE MESSIAH, Handel's most successful and best-known oratorio will be presented in the NNMCM Auditorium at 1900 Thursday, December 15.

Approximately 140 voices come from the Calvary Baptist Church, Washington, D. C. and the First Baptist Church, Rockville, Md., to present this Christmas oratorio. Clyde Holt, graduate of West-ster Choir and director of music at both the Calvary Baptist Church and the Rockville Baptist Church will be the director for the MES-

NMRI Civilian Worker Here 20 Years

"Home-town boy makes good—AT HOME." That indeed might well serve as a title for any article written about Mr. Thomas Bean, Carpenter Shop, NMRI, to whom on Friday, December 2, 1949, Captain C. F. Behrens, MOIC, presented a Length-of-Service award.

In the presence of distinguished

Pictured above is CAPT. C. F. Behrens, MC, USN, awarding Mr. Thomas Bean, Carpenter Shop, NMRI, a Government Service Award.

officers, co-workers, and friends, Captain Behrens commended Mr. Bean for his long and loyal service, and presented him with a gold lapel emblem. Congratulations and best wishes were extended personally by all present at the close of the ceremony.

Mr. Bean is in truth a home-town "boy." He was born and reared in walking-distance of the Institute which today he so faithfully serves. When he was a boy, he rode horse-

back in the summer or went sledding in the winter over the same slopes on which the buildings of NMRI are today located.

His quarter of a century with the Government has been spent in many interesting agencies. While on the payroll at the former State-War-Navy building, during the Hoover administration, Mr. Bean's actual assignment was to the White House, where he worked on the remodeling (Continued on page six)

The NEWS is printed commercially from non-appropriated funds at no cost to the Government and is published in compliance with NAVEXOS P-35, Rev. Nov. 1945. The NEWS is a member of the Armed Forces Press Service and uses editorial material credited to AFPS.

The NEWS is published on the second and fourth Monday of every month. Contributions solicited, news items and other communications may be submitted to the Recreation Office, Building No. 23.

Editorial

Anniversary And Policy

The month of November is in effect an anniversary month for the National Naval Medical Center "News". It was one year ago that the "News" published its first large size issue.

It was one year ago that the "News" began with a new editorial staff that remained intact for twelve months.

During November, 1949, the "News" lost both its managing editor and photographer—the very heart of our publication.

Now we begin another year with a new staff. We would like to reiterate our policy that was published in the November 1948 issue.

The "News" is a station paper representing equally all the commands that are combined to make the National Naval Medical Center, which include the Naval Hospital, the Naval Medical School, the Naval Medical Research Institute, the Naval Dental School, and the Naval School of Hospital Administration.

The mission of the "News" is to serve as a positive factor in promoting the efficiency, welfare and contentment of personnel; to honestly reflect the prestige and character of the station.

The "News" strives to reflect the traditions and the devotion to duty that is exemplified by the Center as an integral whole.

The policy of the "News" is a fair and impartial reporting of the news and events that personalize and breathe life into names, making John Doe a real personality.

The creed of the "News" is the American way of life and the proud recording of achievements of the Medical forces of the United States Navy.

To all hands again we say—the "News" is your paper, and to be successful we must have the whole hearted support of all personnel attached to the station.

News items and events of interest to personnel are solicited. Articles submitted to the editor, and approved for publication will always carry a credit line to the writer.

All articles submitted to the editor that serve as a booster to personnel and the station will be approved for publication.

Sway By Sway Description Of Recent Staff Dance

By George Royster

The Place: Rec. Building, Staff Dance.

Time: 2003. One of the "bar"-tenders is doing a swell job of keeping the few people that have arrived in good humor. He has just taken over the mike and is systematically insulting everyone. 2005: Mr. Atkinson comes in with an armful of pictures and looking rather cold. 2008: Howard Williams makes his appearance, very natty in his dress evening garb. 2012: Two or three more of the band saunter in and the Base player lugging his huge fiddle looks as if the whole dance is a miscarriage of justice. 2016: A handful more have arrived and the gym seems to have a more "homey" glow. 2022: There is a mad dash out of the gym into the lobby and of course that means that the young ladies have made their entrance. 2027: There are intermittent blasts by the members of the orchestra as they are getting (?) their instruments in tone. 2029: The first female guest peaks into the gym and seeing around fifty Calvertmen ("men of distinction") she rushes back for reserves (no, not Calvert Reserve). 2032: A group of very brave young lassies march into the gym and very nonchalantly sit down. 2033: The gym is being slowly but surely filled with both sexes. 2039: A few numbers have been played and one can notice at a glance that

there are not enough men present. That will probably make this the best dance we have ever had. 2043: We have just finished the Paul Jones and everyone enjoyed it very much (NO Mother! it's a kind of dance!).

2125: The gym is really packed now. I think this is the most people I have ever seen at a staff dance. 2140: Betty Lou Brewer, the vocalist, has just finished singing and everyone is now sure that "Joe" shouldn't cry. Due to the fact that there are no tables most of the couples are sitting along on the bleachers waiting for the dance contest that is due about this time. 2207: The contest is now on. All the dancers look so sad and serious that it's almost a shame to hold a contest. 2219: The band has been playing steady now for about ten minutes and must be getting pretty tired. 2226: There are still two couples left on the floor, beg your pardon, still dancing. 2227: One of the couples just executed a "dip" that should leave one of their vertebra immobilized or at least immobilized. 2230: The contest is over and the awards have been given out. The usual pictures have been taken so the band takes a well deserved rest. 2300: A few people are beginning to leave. They all seem to be saying the same thing, "See ya' at the Necter." 2310: I have just noticed how strange everybody

(Continued on page 6)

D. O. Changes Hands

Pay Days Will Roll On But Disb. Officers Change

The Disbursing Office changed hands last week when Lt. Jean I. Moon, (W), USN reported aboard as the relief of Lt. Ellen Ford, (W), USN. Miss Moon just recently completed a course of instruction at the Naval Supply Corps School in Bayonne, New Jersey which by the way is the station that Miss Ford is to report to for a similar course of instruction.

In December, 1942 Miss Ford enlisted in the Navy and received her commission as Ensign, (W), USN. Two years previously she had received her AB from Cornell University.

Since her entry into the Navy Miss Ford has served in the capacity of Disbursing Officer aboard many interesting Navy Stations among them were the Naval Training School at Texas A&M, Naval Air Station San Diego, Calif, and the Receiving Station at Charleston, South Carolina.

During May, 1945 Miss Ford reported overseas to the Naval Air Station at Maui in the Hawaiian Islands. After V-J Day she said that some of the rush calmed down and there was time to appreciate what the islands were really like.

"Duty in Washington has given me a better picture as to the functions of the Federal Government and of the Navy Department, but now it's time for some exploring of New York" which just happens to be Miss Ford's home town.

In February 1943 Miss Moon entered the service as an enlisted Wave and went through the regular mill of training. From Storekeeper School at the University of Indiana she graduated as SK3. In March 1944 she was commissioned Ensign USNR, after having attended Midshipman school in Northampton, Mass.

As Ensign she had duty at the Bureau of Aeronautics where she spent four years as Disposal Officer for Electronics which consisted of the disposition and redistribution of Excess Aviation Electronic Material.

Miss Moon also received a course in radio and radar at NATTC Corpus Cristi, Texas in 1944 and served for some time at the Aviation Supply Office in Philadelphia. This work pertained to Electronic Stock Control. Serving on the Disposition Committee for Surplus Aviation Electronics carried her on TAD to Pearl Harbor in October, 1946.

On December 28, 1948 Miss Moon transferred from USNR to USN and now intends to make the Navy a career. This is her first tour of duty as a Disbursing Officer. She is already giving all the manuals the once over and those greenbacks should still be coming out on the Center every two weeks.

To Miss Ford we say good luck with the school, smooth sailing. We are certainly glad that there is someone to take Miss Ford's place at the end of that line every two weeks! We would all feel lost without a Disbursing Officer.

The Dental Explorer

By BOB THOMPSON

Advancement in rating... class for Bickel. Third for mings; Warrilow, Walrafen, Ford, Bannister, Fries, Dion, M and Schroeder. Good going!

Court news (Basketball, the last week the Dental Office the measure of the Dental EM 44-40 but the week before the Jockeys polished off the Tooth ers 45-21. I understand that Dental Dillies are going to their bosses another chance on though, to be sporting.

Lab 13 News Clips

By Glin Winston

Did Chief Erasmus, dorm captain, leave dorm "C" permanently? He is really missed around six in the A.M. Or is it that he is sleeping in himself these days? After all, it is cold that early.

All distance around the place is now measured "as the crow flies", thanks to the new test. Since that time quite a few of the boys are sporting that distinguishing insignia of a petty officer.

Did you happen to see the unofficial ambassador from West Virginia? He is none other than Bunch. Possessing the qualities of a super salesman, he convinced quite a few of the fellows that there is something in them that hills worth the ride. As a convincing factor, he brought back some of the natural resources—APPLES. This clinched the deal and for now it is no problem at all to get a car full of passengers over the weekend. The strange part of the entire affair is after the passengers return, the conversation is never about apples. What's up, Bunch?

Morton Willcutts, Jr. In Mason Dixon Cross Country Run

Morton D. Willcutts, Jr., son of RADM M. D. Willcutts represented American University in the Mason Dixon Conference Cross Country race.

The meet, held near Bridgewater, Va., Monday, November 21, was a grueling four mile rough country run. The course record was broken this year.

In a race of this type the first fifteen place, and are awarded medals.

Young Mort placed 12 among 73 contestants. He was the only entry from colleges in the entire Washington area. There were twenty-two colleges represented in the meet.

CDR "Coach" Frates was on hand with Mort in an advisory capacity.

In previous triangular meets Mort has won two first and one second place, and in April of this year he won first place in the two-mile run in an intercollegiate meet.

Ava Gardner's publicity man says she's through with "cheese-cake" photos. The actress herself says she's tired of posing "with practically nothing on." But we'll bet it's just plain talk. Anyway, better take a good look—it *might* be the last.

stowing away chow with the leathernecks—"Curly" Miller, completely surrounded by her charming platoon of Blood Donor Marines. "Ho hum, all in a day's work!" says she . . . which reminds me—SEE YA' LATER, FOLKS!

Patients Prove Prowess In Football Scores

Despite the many upsets in this season's football games the USNH patients have proved themselves nearly as expert in picking winning teams as the sports writers.

Each week since the beginning of the football season Jack Berry VAP on Ward 3C made a list of the opposing teams in twenty big college games throughout the nation. The winner was to be chosen for each game. For the football game of the week the patient guessed the score.

After the list was mimeographed, Red Cross Recreation Workers and patients distributed the sheets to the wards on Mondays and Tuesdays. The completed lists were picked up on Friday an after the weekend games read. Bersey SN (Ward 136), Cpl. Paul Hitchcock (Ward 3D), and other patients helped the Red Cross Workers check the correctness of the predictions.

The football season will soon be a pleasant memory but many of the patients can still congratulate themselves on their astuteness in picking winners: J. N. H. Fawcett, HMC (Ward 5C), J. M. Shine VAP (Ward 3B), A. W. McCullen, Gordon Dickerson AD 2 (Ward 5A), W. S. Schutz SK 2 (Ward 136), J. A. Moody AD 1 (Ward 133) and N Bombardier VAP (Ward 3B) were among those patients who were ward winners more than once.

NSHA Notes And Quotes

By Benny Bernard

Uncle Fuller and I crawled out of our wigwam in the woodwork just in time to miss a delicious holiday dinner of (ugh) baked 'possum, hominy grits, and turnip greens. But we did give thanks—thanks for holiday menus of turkey and trimmings, liberty, paydays, and shipping-over money.

And speaking of shipping-over, two of our students, T. G. Byrne and L. J. Smith, did just that last week, both for 6 full years. We haven't found out why they reenlisted, but we'll lay odds it was for either 1) they'd already agreed to extend in order to attend school, or 2) they both wanted the hatful of money that goes with the 6-year reenlistment! (When I ship over, it'll be for 16—so I can say I'm on my last enlistment!)

In response to numerous inquiries, we hasten to explain ALPINE EARS. They're those external auditory auricles which, over a period of time, have grown long enough to drag. They're usually found on people who keep trying to hear what's said about them after they have left! Alpine Ears — shaped like Alpine Horns — get it?

Vermillion Physiognomy Dept.: Complacently munching peanut brittle on the chaise lounge, we were smug enough to think that none of the events of NSHA escaped our notice. Now I find we're among the 10 percenters (who don't get the word). Seems that HMC C. . . Voegelé received a Navy Unit Citation Bar on Oct. 4, and we didn't mention it in this column. We finally got the word!

Uncle Fuller says that the class is now learning to parse sentences in the Essentials of English class. And here I thought parse was the abbreviation for something used to garnish boiled potatoes.

And then, after that—someone was kind to you, Dear Reader, and opened a bottle of air-wick to clear

Med School Scuttlebutt

By F. A. Adams

Med School's tennis pro "Poncho Giragosian," of the blood chemistry department, got one of the thrills of a life time recently while watching the Kramer-Gonzales tennis matches at Uline Arena. At the intermission, he held the lucky ticket to one of the door prizes, a Wilson racket, presented in person by Kramer. John is looking forward to Springtime so he can once again get out on the courts.

That loud noise everyone probably heard recently in the laboratory was the invasion by Lab Class #13, which finished the theory part of its training and has now started on four months of practical experience.

If anyone has a Yeomen rating badge that is not being used, Dodge, of blood chemistry, would probably like to borrow it to wear on his afternoon tour of duty. How about it Bill?

The personnel of the bacteriology department must have struck a gold mine recently judging from the looks of the new cars seen around. Captain Davis, Medical Officer in Charge has purchased a new Chevrolet, Tiny Schroer, has been seen practicing on the rights and wrongs of driving in his new 1949 Ford and Paul Niner with his new 1949 Pontiac.

The Blood Chemistry Department looked like a campaign headquarters recently with various signs seen reminding one of a great political battle. Could it mean another empire is slowly collapsing? How about it fellows?

How lucky can one person be in such a short time. Chief Ellis reporting aboard to the Med School Staff one day and the next day winning a case of Scotch in the Community Chest Fund Drive.

Bu M&S

(Continued from page one)

scheduled from 1600 to 2200.

The Bureau of Medicine and Surgery encourages the further education of Hospital Corpsmen and authorizes "courses in various schools and universities for furthering the education of Hospital Corpsmen in practically any subject which will be of value in the performance of their interfere with the performance of duty." It is felt that the majority of the personnel are not aware of this provision for attending school at the expense of the Bureau of medicine and Surgery. For further information see the chief in the Educational Services Office, Ward 102.

Naval personnel who desire to take courses in the spring term, place your request as soon as possible, it takes about six weeks to process your request, so hurry. Do not be LATE!

Navy Dentists

(Continued from page one)

An orchestra from the Marine Corps Band will furnish music for the graduation exercises.

CAPT. L. D. Mitchell, Jr., DC, USN, Dental Officer in Command, Naval Dental School states that during the last six months there have been two courses for reserve dental officers, one course for dental prosthetic technicians and one for dental repairmen completed.

A class of dental prosthetic technicians will graduate December 22. This graduation will be held in Building 122.

the atmosphere, and we, naturally, faded slowly into double zero aught minus!

Woping Scene In Bowling Alley

Sporting Scenes

By JAY BELL

Hello girls, speaking of the feminine set, brother have you latched on to rumors I've heard about this Wave who buckets 30 to 40 pts per game? This isn't barley either. Incidentally Betty Barley happens to be her monicker. The team she plays for also happens to be our Wave Basketball Squad, coached by none other than Bruce Tillman. More fortunate than the Admirals our Admiralties have copped two league tilts of late, maybe you girls are in the wrong league.

Picking the all star intra-Football squad has been no easy matter. I've given plenty of thought to it, but without a doubt some stinker will be in discord with my selections. Never the less here they are; All first liners of course: Ends, Homer Samuels of the Dukes, George Funk, of Center, Pivot Post Guy Knapp of Center, Lineman, "Toughy" Mills Dental, RH Pat Patridge Center, LH Earl Dennler NP's Gazelles, FB Charles Fries Dental, QB J. Bell of the Commanches. Honorable mentions in their respective positions: Jack Levi, Pete Stanley, Whitey Corian, Leo Ready, Jim Cross, Bob Cameron, and Rose the Riveter of Dental. I said it was tough, well it was, look who I picked for QB, and to think, no partiality was shown.

Our scrappy Admirals seem to have more than enough fire and brimstone, yet something is lacking, who knows it may be grey matter or the equivalent of horse sense. Seriously though, we have a team with height, youth and stamina; even a couple of good shooters. Our coaching staff has some excellent ideas and their system has continually proved sound. Though this all is true we haven't the punch of a bantam-weight. Perhaps our problem stems from an "I" complex. "Yes, (I) played four years for Hooperton Hight. All State (MY) last two seasons. (I) also played CYO ball, naturally (I) ran off with the honors. How many points per game did (I) average? Sixteen or so (I) fail to recall, it was so high. Scholarships! are you kidding?, naturally (I) spurned several offers, you might call me a hold-out, (I) think (I) may receive a larger offer."

As the Coach so aptly put it, "let's call a spade a shovel," or was it a bums a bum? Oh well, you birds get the idea. Why not get rid of this personal pronoun complex. It still takes 5 men to form a team and since we have that many on the floor at one time, why not utilize them? The difference it makes will astound you, believe me.

Enough of this advice to the problem children, sounds like a sermon, speaking of sermons I'll get one if I stick around much longer, women, Bah, who said that?

Football Winners Awarded Trophies

The Championship trophy for intramural football was presented by RADM Morton D. Willcuts to J. Bell for the Comanche team. Left to right, first row: RADM M. D. Willcuts, J. Bell, Woody Woods, George Royster, Lee Fredericks; Second row: Tilly Tillman, Bob Deloche, George Funk, Pat Patridge, and Bill Haussner.

RADM Morton D. Willcuts, MC, USN, presents CAPT. Louis D. Mitchell, DC, USN, the second place intramural football trophy in behalf of the Dental Dukes. Left to right, first row are: RADM Morton D. Willcuts, MC, USN; CAPT. Louis D. Mitchell, DC, USN; Second row: James Brace, Thomas Bigart, Charles Fries, Gerald Palmazzo, Allen Copping; Third row: Edward Lakowski, Dozier Mills, Leo Reading, Homer Samuels, John McConnel, and Philip Nichols.

Mid-Atlantic Championships Blue Printed

February through April will be red letter months in Navy Athletic competition with Middle Atlantic Group Bowling, Boxing and Wrestling Championships of 1950 being waged throughout the area.

Blue prints have been completed for the staging of Middle Atlantic Group elimination tournaments. Included in the Mid-Atlantic Group are the 5, 10, 15 Naval Districts and Seven River Naval Command.

Quantico Virginias' Marine Corps Schools has been selected to act as host for the Mid-Atlantic Boxing Championships to be held during the week of 16 April 1950. Commencing 12 March 1950 Mid-Atlantic Wrestling titles will be placed at stake with the Naval Receiving Station Washington, D.C. staging the eliminations.

Winners in the Mid-Atlantic Group Eliminations will be held for participation in the Mid-Atlantic-Northwestern Group Tournaments, with the victors of this tournament ear-marked for competition in the All-Navy Classics.

(Continued from page one) where he worked on the remodeling of the President's office.

Since 1942 Mr. Bean has been located in the Carpenter Shop of NMRI, and in 1948 he was promoted to Head Model Maker. His originality, imagination and unique creative ability have served to fashion countless complicated pieces of special laboratory equipment required by the scientific staff. Usually his "instructions" are taken from drawings. His ability to grasp important details and translate them into tangible equipment not obtainable on the open market, has won for him the confidence and admiration of his associates.

Center Cagers Lose To HQMC On Home Court

Notching 18 points via the foul line, Head Quarters Marines edged NNM's varsity five 52-48 in a game which found the lead exchanging hands eight times.

Fighting nip and tuck throughout the contest, with whistles blowing freely and personals running rampant the cagers committed 63 fouls, with centers quintet accounting for 60% of the infractions.

Behind pin point shooting of Don Polizzi, who swished the strings for 14 markers in the first half, NNM's Admirals set the pace throughout the first half. Holding onto a slight edge the Admirals continued their pace until midway in the second stanza when HQMC, copped the lead and the scrappy devildogs vacated the court at half time with a shakey 26-24, two point margin.

With Tom Brothers and Indian Jack Levi doing most of the scoring Centers Med. men out gunned the marines in the third quarter and held a 5-point lead entering the final frame.

Fighting back with persistence, Headquarters lead by Coffman who notched 18 points during the contest to take scoring honors for the game, overcame the deficit and in the final minutes of the game passed through a closely knit admiral defense, pumping in six markers. By freezing the ball and holding possession for two minutes the devildogs ran out time and gained a hard earned 52 to 48 victory.

to wash, fold and press his uniform?
Girl: I will.

Sailor: I, John, take thee, Mary, as my wedded wife, subject to the changing residence whenever the ship moves, to have and to hold as long as the allotment comes through regularly and there I give thee my troth.

Chaplain: Then let no man put asunder these whom God and the Bureau of Personnel have wrought together. By virtue of the authority in Navy regulations, of the latest of bulletins from the Bureau of Personnel concerning matrimony, you are now man and wife.

By DIRECTION OF THE COMMANDING OFFICER. AMEN.

Waves Wallop Wacs 42-29

By "Scoopnose-ski"

Without a doubt, the WAVES are ROLLING right along! In their first regular basketball game of the season, held November 30 in the gym, the spunky, unpredictable NNM "Admiralties," an unusually small team of unknown, inexperienced young ladies, swished to sudden overnight stardom with an amazing 42-29 victory over the powerful South Post WACs from Fort Meyer.

Those witnessing the spectacle literally dropped their teeth when Betta Barley, NNM's ace basketball "Queen for a day," began piling up the points, a total of forty in all, in spite of the terrific competition and pressure from her wide-awake opponents, who had unfortunately grabbed the lead early in the first quarter.

Also making names for themselves were "Rusty" Olsen, outstanding for her fine sense of fair play as well as ability to retrieve and pass along the ball, and Jo Feldi, who all but created a mild riot with her promising, persistent talent for dribbling at the slightest provocation, whenever and wherever possible, much to the anxious spectators' delight.

Other members of the team who participated were: Gussi Denker, Grace Trovato and Regina Wyka—, all of whom, according to Coach Tillman, "possess the makings of great championship material."

MORE POWER TO YA', SHIPMATES!
FLASH! ! ! Final score on the December 1st game against the North Post WACs at Fort Meyer, 59-48, OUR FAVOR! ! !

Staff Dance

(Continued from page two)

looks in civies, hardly recognize anyone. 2318: Guess I had better get my coat from the rack before that last minute rush. 2321: One last look tells me that the dance is still going strong. I had best go now though, got to get up early tomorrow and be ready for the inspection. Ho hum, goodnight.

"Gee Sir, I keep hearing things."

Montg. J. C. Drops Tilt To Admirals

NNMC's Admirals topped gomery Jr. Colleges quintet on home court 49-39 in a game played here on Dec. 5.

Coach, CDR Frank Frates, displayed a zone defense which the losers found a bit fling, spending most of the evening attempting to score from outside.

With neither team having success at gaining a definite lead the half ended in a 20-20 dead tie.

Battling on even terms through out most of the third quarter, netmen entered the fourth with a one point lead. Clamoring the lid on the bucket the Admirals tightened their defense allowing M.J.C. only 3 field goals and a dividend toss in the final frame. Picking up eight goals from the floor to notch the victory.

NNMC Five Drop Opener To Rec. Station

In their Potomac River Commencement opener N.N.M.C. courtmen dropped a 56-42 decision to the Tars of Naval Receiving Station on the winning court.

Assuming a three-point margin the opening minutes and played tight defensive ball the Admirals kept pace with the Receiving Station five throughout the initial stanza. Nav Med., however, wilted in the second quarter and found themselves on the short end of a 26-12 half time score.

With six minutes remaining play Nav. Med. fell by the wayside as the tars quintet caught fire and breezed to victory.

Scoring honors for the game were shared by the winners Black, and N.N.M.C. Indian Jack Levi, with points each. Laskowski of the Receiving Station and Brothers of the Admirals garnered 12 markers each in runnups.

Coffee	

Catholic Christmas Services

The traditional Midnight Mass for Catholics will be celebrated in the NNMCA Auditorium on Christmas Eve, Saturday, December 24. On Christmas morning, Sunday, December 25, a mass will be celebrated in the Auditorium at six o'clock and again at eight-thirty. There will be another mass at ten o'clock in the small chapel facing the Auditorium. The masses celebrated from the Auditorium will be broadcast over Channel "C" for bed patients.

A faint sound, almost indistinguishable, floated slowly over the chill December air. All else was quiet. Serene. Slowly, very gently, the sound came closer. With its nearness the sound became audible. At first it seemed a jumble, but then we could hear the strain of music. And the music increased. All else was still and quiet. All else was breathtaking for its titanic gap of silence. "Oh Silent Night . . ." Where did it come from? We looked up into the sky. The stars winked down at us . . . The figures in the manger stood still and the music seemed to hover over their heads. We knelt, for our Christ was born . . .

ADM. Willcutts Extends Xmas Greetings To Personnel

Again the Christmastide, festival of the Nativity of Jesus Christ, our Lord.

This great Medical Center joins humbly yet fervently in celebrating the Birthday of the greatest Physician and Healer of all time. His tenderness toward the weak and the sick, His patient teaching and sublime leadership gave goodness upon which were founded the age-enduring concepts and glory of Christianity.

He gave all, even the supreme sacrifice, that this earth might be peaceful, with lasting good will among all men.

We doctors of Navy medicine salute piously, fervently, His Day, the beginning of a sublime life of sacrifice and devoted pity to the sick and injured, the children, and the aged.

We rejoice that He did not die in vain, that far into the twentieth century Christianity marches on with tempo of rising power that will destroy all evil and subversive doctrines whatsoever.

Long may His flag wave gloriously over our American way of life.

Truly this Christmas is a day for great hopes and wishes. I extend to the command, officers, men, and to all the civilian grades, my sincere wishes for a very happy holiday.

M. J. Willcutts

Protestant Christmas Services

The Christmas Eve Communion Service will be held in the Auditorium Christmas Eve, Saturday night, December 24 at eleven o'clock.

Sunday morning at ten o'clock, December 25, a Christmas Service will be held in the NNMCA Auditorium.

Channel "C" will broadcast both services to the wards for the benefit of those patients unable to attend.

A special invitation is extended to all hands to attend services of their choice.

Louis Armstrong, Big Cat, Here Wednesday

The Chaplain's Corner

By Chaplain Paul J. Raynor

"For unto us is born this day . . . a Saviour"

Christmas is, of all the holidays in the year, a Christian holiday. It is a day in which we commemorate the birth of the Saviour, Christ the Lord. It is a day of great joy, as the angels sang, "Glory to God in the Highest, and on earth peace, good will to men." Because of the supreme gift of God, we give gifts to our loved ones.

The joy of Christmas, however, is not its total significance, for as Phillips Brooks penned in the familiar carol,

The hopes and fears of all the years,
Are met in Thee tonight."

This phrase reminds us of all the deep conflicts of life, in which selfishness born of fear struggles with unselfishness which is born of hope and trust. We have a tendency to separate our lives into different pigeon-holes, not realizing that all of life is one, and that a separation cannot be made. We try to separate the sacred from the secular. At Christmas we try to separate the hopes from the fears, and for a season think about the hopes and forget the fears. On that first Christmas night the angels of hope of all the years, and the spirits of fear of all the years, met in mortal combat, and the angels of hope won.

Unless that same conflict is waged and won in the individual mind and heart, the hope of Christmas will slip away as the day itself passes, and the fears of all the years will again take possession of us. Let us drink of the water of life which the Christ offers, and out of us will flow rivers of living water. The hope and joy of Christmas will then be ours throughout the year.

Meet Your Public Work Officers

LT. A. M. Pollard Relieves LT. Spuler As P. W. Officer

Is there a sink leaking . . . or water from your roof seeping? Is there a tree that needs cuttin' or a window that needs puttin'?

Then you'll want to know Lt. Andrew M. Pollard, CEC, USN, who reported aboard December 1 to assume the duties of Public Works Officer and Resident Officer in charge of Construction.

LT. Pollard relieves LT. P. L. Spuler, CEC, USN who recently departed on 30 days leave, then on to his new station at Tanapag, Saipan.

Mississippi, and his daughter, Andrea.

LT. Pollard utilizes what spare time he has from his duties in developing two entertaining hobbies, photography and woodworking.

MOIC, DOIC MSOIC NOW CO'S

A recent letter from the Secretary of the Navy authorized a change in the title of Medical Officers-in-Command and Dental Officers-in-Command to Commanding Officers. Also changed was the title of Medical Service Officer in Command, Naval School of Hospital Administration, National Naval Medical Center, Bethesda, Maryland, to Commanding Officer.

The above changes affect all medical and dental department activities whose commanding officers use the title of Medical Officer-in-Command and Dental Officer-in-Command.

Prior to his arrival here, LT. Pollard was the Executive Officer of the 105th Construction Battalion, Amphibious Force, Atlantic Fleet.

Mr. Pollard received his degree in Mechanical Engineering from Polytechnic Institute, Auburn, Alabama and after entering the service attended the Civil Engineers Officer's School.

He entered the service in October 1942 and during the war served with the 43rd U. S. Naval Construction Battalion in the Aleutians and Pacific Area, also a tour of duty at the Naval Supply Depot, Norfolk, Va. (Cheatham Annex) as Public Works Officer.

Home for LT. Pollard is Florence, Alabama, but at present he resides at 5810 Kingswood Road, Bethesda with his wife, the former Rene D. Gibson of Tunica, Missis-

NSHA Student Awarded Navy Unit Citation

Charles F. Welsh, HM1, USN, a student at NSHA was recently presented with the Navy Unit Commendation Ribbon Bar by RADM Morton D. Willcuts for service aboard the USS Titania.

The Titania took part in the following action: North African Landing, Battle of Bougainville, Marianas Operations, Leyte Landings, Lingayen Landing and Borneo Operations. This is a testimonial in itself, we need not go any further.

Welch entered the Navy on June 29, 1942 in Oklahoma City, Oklahoma. He received his recruit training at NTC San Diego, California.

Among the many ribbons to his credit, Welch has the Purple Heart, Good Conduct Medal, Asiatic-Pacific, Philippine Liberation and the Victory Medal.

Telephone Calls Gratis For G. I.

Long distance telephone calls are being offered as Christmas gifts by the Baltimore News-Post and Sunday American to patients who are active servicemen, or women in active duty status, or Veterans Administration patients, who are unable to take a trip away from the hospital during the holiday period.

Calls may be made starting December 20th until January 1st, inclusive. Your Red Cross social worker has been asked to contact you to complete authorization cards. For details, see the bulletin posted in your ward.

Many Varied Talents To Present Show Here

The Washington Music Guild Inc. will present a top notch show at 1800 Wednesday, December 28 in the NNMC Auditorium. The show is produced by Arnold Fine, Night Club Editor, Washington News and Hirsh de La Viez, president of the Washington Music Inc.

Crew's Library Ready For Xmas Duty Bound

The staff of Crew's Library extends best wishes for a Merry Christmas to everyone. Patients who are unable to go on leave will be glad to know that all wards will have book cart service at least once a week during the holiday season. Also special requests will have the usual quick delivery, if the books are available, and nurses and corpsmen are urged to phone Extension 285 if there is need for extra books for new patients or rapid readers.

Of general interest is a new book called **WHERE MY SHADOW FALLS**. The author, Leon Turrou tells of two decades of crime detection; first as a special agent of the FBI and then in the wartime service with the Army's Criminal Investigation Division. The writing is fast paced but not sensational, as dramatic and exciting as any fictional man-hunt.

THE WIND IS FREE by Frank Wightman tells of an exciting three thousand mile trip across the Atlantic from Cape Town to Brazil and up the coast to Port of Spain. Driven by hatred of a monotonous office job, Wightman designed and built the 34-foot yacht for this six-months' trip. Accompanied only by a photographer, he found exhilarating adventure and many narrow escapes.

H. Allen Smith's latest is called **WE WENT THATAWAY**. Smith's object is to find out if the West is anything like the movies show it. He rides the range in a "palomino Cadillac" and, "sage of the sagebrush," describes all the wonders of the reconverted west with his usual mellow humor.

Globe Travelers From Near And Far Visit NNMC

If an American were to visit Egypt he would probably be drawn first by the Sphinx and then by the pyramids, but Colonel A. Aly Hassan, Major Y. E. Wakil and Major M. L. Shahed were not so much impressed by our architecture as by our dental facilities. The officers are from the Egyptian Army Dental Service. They were extremely interested in the physical facilities of the Naval Dental School, Art Department, and prosthetic technicians laboratory.

Colonel Berje O. Alm, MSC, Swedish Defense Forces Office of the Surgeon General, Stockholm, Sweden, visited the Center under authority of the Chief of Naval Operations. His visit consisted mainly of observing our training program for administrative personnel of the Medical Department.

Dr. Frederick E. K. de Sinner from Switzerland, on a recent visit, took in a high-light view of plant

High-lighting the show will be the nationally known Louis Armstrong. Mr. Armstrong's orchestra comprises the greatest aggregation of jazz artists in the history of music. The following members of the band will be present: Jack Gardner, trombonist; Earle Hines, the piano; Cozy Cole, bass; Catlett, drums; Barney Bigard, clarinet; and Avril Shaw, bass.

The presentation is expected to last a full hour. There will be plenty of entertainment for everyone.

The internationally known Bob Fiske will be present with his guitar. He is presently playing the Old New Orleans restaurant.

Josephine Friedman will be a soloist. Along the feminine there will be 12 finalists in the Mardi Gras Contest, and Jodyler, Miss Washington for 1944.

Other entertainers, equally known, are Dwight Fiske, recording artist of double entendre songs now at the Old New Orleans restaurant, Bob Friant, mentalist in the television show "What's Your Mind," Jean Cassel, known as "Yodeling Connie," Stan Barclay from the Hill Hit Parade.

There you have it. A program chock full of varied entertainment. The time: 1800. The date: December 28. If you love entertainment we make here and now a solemn promise: you will find it at this show.

Santa On Wards For Gala Time

Since December 20th, each ward has perfected its own Christmas scene. Trees and greens supplied by the Navy have been gaily trimmed by patients, ward personnel and Red Cross workers with the naments and lights brought in by the Red Cross.

Now on Christmas Eve, Santa distributes individual gifts to patients, carollers both inside and outside the hospital will voice their greetings.

Christmas Day afternoon will find parties gay with refreshments and outside entertainers on the wards for those patients who cannot go out on this day.

For convalescent patients in the community have been accepted those who did not have leave.

and the nature of our research program.

Other foreign visitors this month were: Dr. S. B. Hopkins and Dr. Hirsch, both dentists from Toronto, Ontario, Canada; Dr. H. Schaefer, Frankfurt, Germany; Col. H. Shortt, professor, London School of Tropical Medicine; Brig. Chaudhuri, Indian Embassy; and Philip Manson-Bahr, England.

The Dental Explorer

I wonder how many will write a letter to Saint Nick? Trying to find out what it would be like trying to go to the moon, so for those of you who didn't and for those who did but perhaps forgot something I wrote one of my own which I trust will meet with your approval.

NDS Bethesda, Md.
15 December 1949

Dear Santa,

I don't know how many others around here you'll be hearing from. This is for all. However, I can't tell everybody's wish as there are quite a few of us.

First, a White Christmas would be nice, not slushy or muddy, mind you, but a lovely, velvety white—enveloping every field, home, tree, and hill.

Second, a Happy Christmas, with the laughter of the children, the ringing of the bells, the holly and the mistletoe omnipresent.

Third, a Thankful Christmas, with hearts and minds dutifully celebrating His birthday, revering His short but magnificent presence on the Earth so long ago, and praising His Father.

And last but certainly not least, a peaceful Christmas throughout the world, all peoples uniting their voices in one great hymn, with no thought toward one another.

These things, Dear Santa, I ask of everyone and if this letter isn't too late, please try to grant them.

Bob Thompson

Research Findings

By J. P. Walsh

A few sidelong glances at Research's most newsworthy Miss Betty Barley, "Bucket Queen" of the inter "hoop sisters." . . . The column is too brief for a longer look though the girl is worthy.

First impression, a Wednesday at T.V. gal from Uline, Betty, with a fat eye and fatigued look, she labors with the Dewey-Decker at the Research Library. Betty isn't ladies on the basketball court. This is not a typical picture of Betty, who is more akin to the buoyant bobby-sox type.

The prim library business is not Betty's style, but the change from books to basketball babbly keeps her young—and score high.

Betty joined the Waves in March, and reported here from the "waves" in June. Career Wave, she, but she has wasted no time in getting herself and will compound the picture of a DTI's bachelor exchange come January. This allays Tillman's fear that she might "pro." Obviously no husband to spend his time watching

Satan: In Self Defense

By Angel Joe

I have a charm, you must admit,
That's only matched by ready wit;
That Daniel held me fast at bay
Is bosh; a poet sang the lay.
My house is warm and always cheery,
A little hot, yet never dreary.
I've souls to serve you sizzling stew,
And if you drink, a cocktail, too.
My floorshow starts on time at eight,
And never ends 'Til very late.
I pay my actors quite a wage;
The hottest pay for any stage.
My entourage is ranked with gangsters,
And mediocre little pranksters.
Yet, this I make no bone about,
I cannot see where I'm a lout.
I quite abound in virtue, too,
Though you've been taught another view;
For all my life, throughout the ages,
I've toyed with saints, good souls and sages!

Personalities About The Center

Miss Schmid Sees Many Duty Stations

Miss Pauline Schmid, LT., NC, USN, entered the Navy in March, 1943 as ensign and since that time has taken advantage of that old recruiter's by line, "Join the Navy and see the world."

Born and raised in Allentown, Pa. Miss Schmid attended high school there and also received her nurses training at Allentown General Hospital. Her parents by the way still reside in the old hometown.

Miss Schmid made up for lost travel time after she entered the Navy. Being one of the very few nurses that have ever been assigned duty with the Fleet Marine Force, Miss Schmid was assigned to the dispensaries in both Tsingtao and Tientsin, China with the 1st Marine Division. She can give the best of the old salts a good breeze session on how things were in China . . . When!

Topping this duty with assignment to the U.S.S. Bountiful (Hospital Ship) she was aboard when this ship was ordered to Bikini Atoll in the Marshall Islands to take part in "Operations Crossroads." She viewed both "A" Bomb tests and thought that they were nothing short of spectacular.

Miss Schmid reported aboard this station for duty on December 1, 1947. She likes her work here very much and is all set to make the Navy Nurse Corps her permanent career.

his wife on the T.V. screen doing her nightly chore for Phillip's 66.

Worthy of a parting glance—the coach with three of his girls—Denker, Supine and Barley hashing over last night's game, stomping, gesturing and muttering "Beat Army" while Betty puts in the exclamation points with her bubble gum!

We close with a fervent wish that this column may not be the holiday's biggest bird.

P. M. Of NH, NNMC Likes EEG Work

One of the very few EEG Techs aboard is Paul Murray HM3 from the Naval Hospital Command.

On November 20 1946 Murray signed that well known pledge and became what Webster defines as "One who travels by water", a sailor.

After the routine works at Bainbridge, Maryland, both boot camp and corps school, he jostled into the Medical Center on August 17, 1947 where he stayed as staff until July 29, 1948 when he was transferred to Patuxent River, Maryland.

One year later on July 29 1949 Murray reported back to the Center for a course of instruction in Electroencephalography (try and pronounce it). Upon graduation Murray became staff and is now working in the EEG department with GR.

As to the Navy he says, "I like the Navy very much and I think that it has some things to offer that can't be equalled anywhere."

When his present hitch in the Navy is up Paul intends to go to the University of Kentucky and study pharmacy.

Navy Belles

By Nadiene Calhoun

'Tis the Season to be Jolly' (also, the one time during the year when you can have the spirit and the duty at the same time.) Santa is preparing for departure from his Arctic domicile. Soon he will don his dress reds, check his list (and 8 copies), climb aboard the sleigh (recently converted to Mule Train) and the air will resound with "On BuMed, On NavPers, On Budocks and Sanda." Might take a look-see in hopes that some of the requests were granted. All Chief Stark wants for Christmas is a silencer for her neighbor's alarm clock, or her neighbor might not have her two front teeth for Christmas. Please Santa, no more radios! Katie Glendening simply wants a round trip ticket to all games away from the base, just in case she is left behind again (and in her sweat suit she was). Which two are anticipating a package containing two airplanes that will fly a straight course to the South and BACK despite ceilings. How about that scorchproof ironing board, or was it a heatless iron? Dottie Flemming will settle for anything but a Navy rain coat (lost one, gained two). Trust there are a few surprises for those night-duty folk, also.

That was a mighty fine song fest in ye olde laundry the other night. I was thinking . . . take those voices, add them to the tenor and bass section and the NNMC choir could

(Continued in column five)

Chief Otto, HMC Likes His Duty At NMRI

It isn't that James Stewart Otto, HMC, is looking down on the world, it's just that he was made that tall! The skyscraping chief hails from Clarksburg, West Virginia. He joined the Navy on April 11, 1940.

The chief has seen a myriad of stations. He attended corps school at Portsmouth, Va., and later studied laboratory technique there. Of the many other stations he has seen, most interesting are: Naval Gun Factory, Washington, D. C., Naval Research Laboratory, Bellview, D. C., where he studied in the Chemical Warfare Research Laboratory.

Chief Otto has a very jovial personality. He is interesting, handsome, and soft spoken. But ladies, forbare, he is married and has a two-year-old boy. The chief says that there otto be another Otto in the family soon.

The Chief spent two years on Terciera, in the Azores, with a patrol squad doing air-sea rescue work. On October 14, 1946, he was sent from Philadelphia receiving station to the NMRI where he has been ever since.

The chief principally assists in conducting research on radiated animals. This duty involves a variety of activities, including the care of the animals, handling radio active isotopes, and the preparation of gross and microscopic pathologic specimens. Many of these animals are from Operations Crossroads.

Homer Williams, alias "micro-tech," insists that his first love is skating, with blood collecting running a close second now that he is a member of the local "ups and down" club. The reason for this change of pace is that his latest project went on the rocks so there is no alternative at the present.

There is a fairly interesting yarn going around concerning Fernand Cyr. It all started in one of the local spots. It seems that Fern ran into an 'old friend' who remembered him after all of these years. She showered him with affectionate kisses and immediately started talking shop. This left him speechless as he could not remember the name or the place but he went along for the ride. There is still some question as to whether the identification is complete.

I'm almost sure that the Pharmacy's supply is unlimited in the line of soda bicarb for, with the holidays coming up it will undoubtedly be a necessity. Sorry fellas but you have to furnish your own Bromo-Seltzer, so MERRY CHRISTMAS AND A HAPPY, PROSPEROUS NEW YEAR.

NSHA Notes And Quotes

By Benny Bernard

Since someone closed the bottle of air-wick, here I am back again, with the usual line, and no matter how slice you thin it, it's still!!!

Prize boner of the week: The student who started to tell his girl that time stood still when he looked into her eyes, but blurted, "Your face would stop a clock!" You gotta watch this English language, Boy. (We consoled him with the new hit tune, "Don't Cry, Joe, Just Go.")

Congrats to C. F. Welch, HML, who received the Navy Unit Citation Ribbon on Dec. 13, for duty in the USS Titania. Admiral Willcutts made the presentation.

School has been dead since the 16th; about 50% of the gang left on holiday leave. Hope they're having a swell time.

Anyone wishing to hire an excellent m.c., get T. (Pancho) Coles, Jr. He's a wow, and his store of notes, stories, and anecdotes is never depleted.

Signs of Our Crimes: Written by Swami Hassen Ben Sobour—"Albers, Bergquist, Byrne, and Irwin."

Need an answer? They've a sure one!

If your mind is full of questions They've solutions and suggestions. Don't ask the swami in a turban, See Albers, Bergquist, Byrne or Irwin."

I'm glad, as are all his friends, to see that Sgt. Urbush has shed his body cast. Poor guy—he had a hard time; everytime someone sang "Roll Out the Barrel," out came Urbush! (Once I almost got put into something like that, only it was made of canvas, and had straps and buckles!)

With the holiday season in full swing, everyone left here in school is beaming and happy. This is the season when nearly everyone is happy and friendly. Too bad that the rest of the year doesn't bring the same attitudes.

Uncle Fuller, by the way, wants to get into the Santa act this year, so we're letting him take the part of a reindeer—one part of one, anyway. So getting into the end of things, we quote that roly-poly, venerable gentleman who said, "Happy Christmas to all and to all a good night!" A Happy New Year to youse, also—or as we say down south,—way, way down south, "Felice Año Nuevo, Yu awl!!!"

present a great musical when they resume their rehearsals about the 2nd week in January. Come on, how about an hour or so with the choir one night a week. (If you think aforementioned was a commercial, you're correct). Along the lines of music . . . thank you Gerry Gruber for having your piano sent down from New York. It will be a pleasure to many. A most 'up-right' loan, Chief.

Our sincere thoughts to Betty Leckie, who was called home on emergency leave.

Another student has joined the ranks of the mid-night oil burners. Oakland Naval Hospital's loss was our gain when we welcomed Millie Tschaeppe, a future NP clerical tech.

Wish you could have spent more of your leave with us Chief Bosarge. Here's to a happy holiday and continued pleasant duty in Florida. Were you worried when one of our new gals greeted you with "Oh, are you our new MAA?" Seriously, Elliott has handled the reins like a trooper. Speaking of

(Continued on page four)

Women Love Sailors No Matter Where

Sailors are what some women marry. They have two feet, two hands and sometimes two women, but never more than one dollar or one idea at a time. Like a Turkish cigarette all sailors are made of the same material, the only difference is that some of them are a little better disguised than others.

The lover is the one you find surrounded by women. The husband is the one who goes ashore in the first boat. The bachelor is the one who has the bank account.

Making a husband out of a sailor is one of the highest plastic arts known to civilization. It requires science, sculpture, common and uncommon sense, faith, hope, and charity, and mostly charity. It requires tact, brains, "it," that, these and those. It is a psychological marvel that a soft, tender, violet-scented little thing like a woman could enjoy kissing a big, awkward, stubby-chinned, thing like a sailor, but they do.

If you flatter a sailor, you frighten him to death; if you don't bore him to death. If you permit a sailor to make love to you he gets tired of you in the end; if you don't, he gets tired of you in the beginning. If you agree with him in everything you soon cease to interest him, but if you argue with him on everything you soon cease to charm him. If you believe all he tells you, he thinks you are a dope, and if you don't he thinks you are a cynic.

If you wear gay colors, rouge and a charming hat, he hesitates to take you out; if you wear a sensible outfit, he takes you out and stares all evening at a woman in gay colors. If you join him in wild parties and smoke with him, he swears you are crazy; if you try to reform him he thinks you are treating him like a child.

If you are true to him, he doubts that you have a brain; if you aren't he longs for a playmate. If you look at other fellows he is jealous and if you don't he hesitates to marry a wallflower.

If you "high-hat" a sailor, he gives you the Bronx cheer and goes right on having a good time. If you treat him civilly and try to cheer him up, he gets gloomy and moody. If you invite him to drink he'll refuse, if you tell him not to drink he will get a skullfull and break up all the furniture. If you treat him politely, he'll knock your teeth out, and if you're impolite he'll call you a heathen. If you take him out to a swell hotel to dine, he'll drink out of the finger bowl and if you take him to a cheap restaurant, he'll demand his food served in courses.

So, sailors will be sailors in their own peculiar way, and the women will shout and complain. But between you and me, sailor, they love it.

Patuxent Trips Admirals, There

A pair of charity tosses in the last thirty seconds of play spelled defeat for the Hospitalmen on the Patuxent court.

Brothers took two handoffs from 'Prof' Echols in the opening seconds of the game to establish a four point lead before and estimated thousand spectators had time to be seated. Ratay of the Airmen countered with two mid-court swishers to tie it up. Rebounding nicely under both boards by Kurzawski and Braun, enabled 'Hubbard House' Polizzi to lay in two.

With Ratay and Brothers engaged in a marksmanship duel, the Admirals went into a six point lead at half-time of 22-16.

Going down the stretch Levi and Brothers hammered the mesh to put the Admirals in a narrow lead of one point when ill fate in the form

Admirals Rap Caruso Florists

In a loosely played ball game, the Hospitalmen took the measure of last year's Recreation League finalists 51-37. Tom Brothers took scoring honors with 25 markers while Panella of the losers hit the hoop for 16.

Asked to single out an outstanding player for the game Coaches Frates and Sharon picked the backboard work of 'Plasma' Glunz, Hayes and Stanley as their player of the night.

of a couple of fouls in the closing canto kept the Admirals from notching a league win. Montgomery, Wallace and Ratay played heads-up ball for the winners with Stanley, 'Plasma' Glunz and Oddis turning in a creditable performance for the Center.

Admirals Measure Quarters "I" For Second League Win

The local boys took their second league win by a score of 39-37, boarding in fine style, the Hospital men were off to a quick start with and Echols counting with successive goals.

Waves Lose First Tilt To Bks B

The overcast was slightly blye on the night of December 15th . . . in addition to blue satins, we witnessed a few blue faces when the scoreboard revealed a final 8 pt. victory by our worthy opponents.

Neither team held a dramatic lead o'er the other during the first half. Then Bks B displayed a guard formation which protected their score throughout the rest of the game. Their key forward, Keener, produced 16 of the visiting team's 36 pts.

Barley, of the Admiralties, experienced some difficulty with inverted knee-guards; however, soon remedied the situation and came through with 10 pts.

Hats off to Denker for a cool game and a keen air which added 10 pts. to our score. Smith moved in to contribute a healthy 9 pt. support. For Feldi, 'twas a 4-foul game, but her ability and speed were compensatory. Olson lived that guard position to its fullest extent, played an excellent game both on her feet (mighty sly block in the 3rd qtr) and from the deck level. Techappe, a newcomer to the team, shows great possibilities. Speedball Hernandez scored despite the sore foot. A bouquet to Glendenning for her undying spirit and fine sportsmanship, an unsurpassable combination.

MEMO TO TEAM: What incentive is there to any sport without an occasional loss . . . so keep your eye on the basket and take it on the shin.

MEMO TO COACH: Don't cry, Bruce. Turn 'em loose, turn 'em loose, turn 'em loose!!

Quantico Wins, Admirals Wilt Too Soon

Thirty-five minutes of smart ball playing by the Admirals saw the vaunted Quantico Marines held to a thirty six, thirty six tie with five minutes to go, but superior stamina and excellent ball handling placed the Centermen on the short end of a 55-41 score.

The tally sheet fails to show the terrific guarding of Braun, Funk, and Levi under the home board, nor the matchless floor-play of Echols, Kurzawski, Stanley and Polizzi.

Fast breaking from their zone enabled 'Cornell' Brothers and Echols to rack 28 points against the unerring set-shots of Skinner of the Marines.

The Quantico stands were in a continual uproar over the personal guarding of Kurzawski who permitted All American Cy Wadrop, three field goals while the Centerman gathered three himself. The Quantico team was lavish in their praises of the shifting zones employed by the Admirals.

Red Cross Xmas Party For Staff

Attention all hands. A real Christmas party is scheduled for all corpsmen aboard on Christmas Eve. Santa Claus will distribute gifts and fruit cake and egg nog will abound. The place—Main Barracks. The time—2000 to 2200. Merry Christmas All.

The game see-sawed with Na and Fast of the losers tallying long set shots, with the Admirals holding a two point advantage at half-time.

Thirty seconds to go and led by one point, a Quarters I deliberately kicked the ball to the bleachers, Tommy Bro stepped to the free throw line, sank the charity toss, tying the ball game.

On a beautifully executed bounds play, Black Jack Levi a pass to Brothers who iced game for the locals, as Frates added three more grey

Anacostia Air Hand NNMC A First Win

Smarting under their close loss from Patuxent the night before, Admirals, featuring the double attack of Echols and Kurzawski swept into an early lead and never headed in winning from Airmen by a score of 66-48.

With the forward Center clicking on their lay ins, and and Braun putting the lay through from beyond the key, and Miller of the Air Station tough row to hoe in match points. Tommy Brothers once paced the Center, garnering two three markers.

Shooting Stars

Shown above is Joseph "Ski" Kurzawski, HN, a student in NN "Ski" is a sharp eye and a fast moving ball carrier. He hails from Harrison, New Jersey, and weighs 174 pounds. His six two and half height adds tremendously to his defensive power.

Previously, "Ski" played four years varsity ball for Harrison High. He scored a neat 36 points in one game in '45. And we hope to see this fine record broken soon.

Kurzawski plays forward for the Admirals. It is his first year on the team, but already he has proven to be an invaluable player.

CAPT Crawford Relieved By CDR Grunewald

Commander Alvin H. Grunewald, DC, USN, became the Executive Officer of the Naval Dental School here last week. He relieved Captain Merritt J. Crawford, DC, USN, who leaves for a new duty at Alameda, California.

Captain Crawford was Executive Officer for a little over four years serving under Rear Admiral, then Captain, Clemens V. Rault, who is now Chief of the Dental Division and Captain Louis D. Mitchell, Jr., present Commanding Officer.

He was held in high esteem by the officers and men of the command but will be remembered particularly for his efforts in the construction and maintenance of the Center Golf Course. He was senior member of the Golf Committee from its inception and was a familiar figure on the course as a player and official.

Another of the Captain's loves was hunting and working with his excellent bird dogs of which he is very proud.

(Editor's Note): There will be a complete biography of CDR Grunewald in a later issue under the column entitled "Meet Your Executive Officer."

Patient Made Citizen After Seventeen Yrs.

There has been a long and winding road to citizenship for Joaquin Del Rosario, MMI. Del-Rosario has applied for his papers, but circumstances were not favorable. When he applied, but the Navy sent him to Pearl Harbor where he underwent an eye operation. He returned to the States and on November 3, 1949, he reapplied. The new life is just at his fingertips. The horizon is clear, and there is a golden ray of sun peering from beneath the dark clouds. Joaquin is married and has two children. They are aged 15 and

Del-Rosario is quite grateful to the Red Cross for all their help. He wants especially to thank Miss McCarthy from the RC who was particularly helpful. One of the hospital workers held a little party in the ward to celebrate the occasion. The patients joined in and congratulated the new American citizen.

Del-Rosario has been in the Navy seventeen years. He enlisted in 1932 in the Philippines, his homeland. He has a long list of commendations to his credit. During

New Officers' Club Opens Officially With New Year's Dinner And Dance

The new commissioned officers' mess (open) at the National Naval Medical Center, Bethesda, Maryland, was christened on 31 December 1949 with a New Year's Eve dinner and dance.

The gala party was attended by more than five hundred mess members and their guests. Among the high ranking officers present, with their ladies, were Admiral J. W. Roper, Chief of Naval Personnel; Admiral C. A. Swanson, Surgeon General; Admiral H. L. Pugh, Deputy Surgeon General; Admiral A. M. Pride, Chief of Aeronautics; Admiral G. B. Davis, Commandant, Potomac River Naval Command; Admiral G. W. Calver, Captain physician; Major General Oliver P. Smith, Assistant Commandant of Marines; Admiral M. D. Willcutts, Commanding the National Naval Medical Center; and Doctor Norman Topping, Associate Director, National Institutes of Health.

With A Heart Of Gold He Spread Good Cheer

By Armed Forces Press Service

This is a post-Christmas story. It's a simple, heartwarming yarn about the generosity of officers and men at the U.S. Naval Air Station, Patuxent River, Md.—and of a young seaman who never forgot.

Joseph Peter Pestana, SN, USN, is an orphan. The orphanage operated by the Mission of the Immaculate Conception at Mount Loretto, Staten Island, in New York, has been his home for 13 years.

He remembered the meager Christmases as a child. None but a person who's spent his youth in an orphanage knows what it means to be remembered at that time—the "personal touch," he'll tell you.

Two years ago he decided to do something about it.

The 25-year-old sailor, as a self-appointed Santa Claus, distributed small cash donations, candy and toys to youngsters in one of the orphanage's cottages. In 1948, still from his own meager funds, he repeated the process.

This past Christmas season Pestana had a real problem. Instead of the smaller number of children to whom he'd played Santa Clause, he now had 74. That's a lot of good little boys to take care of at Christmas time for a seaman in the U.S. Navy.

Pestana, quiet and reticent by nature, discussed the matter with a buddy at Patuxent. Before he knew what was going on station personnel were calling on him in the ship's service tailor shop where he works. They didn't leave until they had left cash donations with

Staff Dance Here Friday, January 20 All Invited

Calling all ears tuned to music, swift moving feet, and swaying bodies. There will be another staff dance Friday night, January the 20th. Those who remember the last dance will surely want to come again, and those who missed last time are invited now.

Civilian clothes will be in order. Buffet lunch and soft drinks will be served.

For those of you who think your feet can dance you to fame, there will be contests held for the Waltz and Fox Trot.

There is a change in orchestra. The USN School of Music will furnish music for the evening and from all reports they are plenty good! They come from the Naval Receiving Station downtown. There have been a good many girls invited.

Festivities are slated to start at 2000. All hands and their guests are invited.

Miss Judge 1st Woman In Navy To Get Wings

LCDR Florence T. Judge, USNR (ret.), is the first wave in the history of the Navy to receive her wings. Miss Judge graduated from the Naval Air Aviation School, Hollywood, Florida in November of 1943. She was the first of eighty who eventually received their wings.

Miss Judge is a patient on Tower ten. She has had varied experiences during her stay in the

Miss Burge Retires After Thirty Years

Friends and co-workers presented a parting gift to Miss Margaret E. Burge at a farewell party held recently on the event of her retirement from the Civil Service.

Miss Burge, who resides at 705 18th Street N.W. has been em-

RADM Morton D. Willcutts congratulating Miss Margaret Burge on her retirement from her civil service status as fiscal accountant. Present were, left to right: Miss Burge, Mrs. Marie Hungerford, Mrs. Joyce Pearce, Mrs. Verna Rhodes, Miss Bonnie Westberry and Miss Jean Moon.

him.

The entire project had been spread by word of mouth throughout the station. From the skipper on down to children of naval and civilian personnel the contributions poured in.

When the cash hit the \$100 mark, Pestana figured he should quit accepting it. But still it came.

Eventually there was enough to

(Continued on page 6)

ployed by the U. S. Government for thirty years.

Beginning her employment in July, 1919, the entire thirty years was spent in the supply and pay departments of the old Naval Hospital downtown and here at Bethesda, where she advanced from clerk to fiscal accountant.

Actually she completed thirty years July 16, 1949 but Miss Burge's retirement was not effective until December 31.

The NEWS is printed commercially from non-appropriated funds at no cost to the Government and is published in compliance with NAVEXOS P-35, Rev. Nov. 1945. The NEWS is a member of the Armed Forces Press Service and uses editorial material credited to AFPS.

The NEWS is published on the second and fourth Monday of every month. Contributions solicited, news items and other communications may be submitted to the Recreation Office, Building No. 23.

Letters From The Editors

Dear Readers,

Someone told us that "to head a column with 'Editorial' is quite detrimental to the purpose set forth by the Editorial." It all boils down to: most people won't read an editorial.

With all due respect to constructive criticism, we have decided to change our approach. Like it? Well, write about it.

Most magazines and newspapers carry a "letters to the Editor" department. The Editors of the NEWS do not want to follow in the footsteps of other papers simply because other papers are doing something. But we feel that a space could be devoted to this department. The only trouble is that we do not have any letters. Then, let this be the clarion, or the call to you readers to air your views.

We feel that a "letters to the Editors" department would give many readers a chance to take an active part in their paper. At the same time, we know that this department would allot a space for views and counter-views.

Letters are solicited from everyone, service or civilian personnel. They should be sent to the Editors, Recreation Building, building number 23.

This article, which is now admitted to be an Editorial, will prove or disprove the theory of our critical eyes.

Have you got a new slant on an old theme, or a new theme on an old slant, or just a plain theme or slant? Let us know and we will in turn let the people on the compound agree or disagree. We are especially interested in hearing comments on the content of our own issues.

Crew's Library

The "Potomac" Book With Local Interest

Now that the excitement of Christmas and 1949 itself has passed into history and the winter months of the new half-century open up, let's settle down to a bit of solid reading.

Of especial interest locally is THE POTOMAC, by Gutheim. Here, in the latest of The Rivers of America series, we find a description of the settlement of John Adams' time; a review of the important events in the history of this region and a picture of Washington as it is today.

LINCOLN FINDS A GENERAL by K. P. Williams is a military study of the Civil War as conducted by the Generals of the Northern Army. Their deficiencies and defeats are analyzed in a scholarly but readable manner.

THE CONQUEST OF SPACE, by Willy Ley is a beautifully illustrated book with the latest scientific information about the solar system and the manner in which a rocket trip could be made to the moon or Venus and Mars. This will furnish a good background for the enjoyment of the new Science-Fiction novels.

If you have been interested in the reviews of the last fifty years in the current newspapers and magazines, you will want to see NOT SO LONG AGO, which is Lloyd Morris' informal history of the U. S. since 1896. He traces the development and influence of motion pictures, automobiles and the radio, the three agencies which contributed most to the transformation of our culture and civilization.

The Chaplain's Corner

Lt. Edward R. Martineau, ChC, USN

"Hello, Padre—hey, is that your dog?"

"Yeh, that's my Penny—had her more than two years now."

"What kind is she?"

"Golly, I'm not sure—looks like collie and setter."

"She sure is pretty—nice eyes."

"She's about the best friend I ever had—wouldn't part with her anything."

"How do you keep her so clean?"

"Clean? She's not clean! She's always digging holes, chasing bits."

"Guess she needs attention."

"All she needs is a bath."

Just like my dog Penny, we too need a bath. For reasons of health this has become known as a Saturday night "Must." And, that cleanliness isn't limited to our physical nature—we definitely need spiritual cleansing too, just as regularly. No matter what religious convictions we may hold, we all certainly must realize the need for a spiritual check once in a while. We know that cleanliness is next to godliness—and there's no truth than poetry in that saying. No matter who we are, or what faith we might profess, there's little question that a spiritual cleansing would be a regular benefit. So, according to your own religious belief, take a mental checkup and see what filth and rubbish should be cleaned out of your heart.

March Of Dimes

1950 "March of Dimes Fund Raising Appeal" will be conducted during the period 16 to 30 January 1950.

Many servicemen whose children have had polio can say, "The National Foundation for Infantile Paralysis is helping us." Many of 27,908 men, women and children who had the disease in 1948, and thousands more in 1949, have been aided toward health through your support of the March of Dimes. Service, including hospital care, has been available to each of these through chapters close to their homes.

It is estimated that 110,000 patients have received such assistance since 1938, costing chapters about \$40,000,000. Men and women who had polio 10, 20, or 500 years ago, as well as those of last year, are helped by fitting from modern treatment and appliances you provided through the March of Dimes.

Containers for contributions have been placed throughout the Medical Center for your convenience.

Meritorious Mast Held For News Staff

RADM M. D. Willcutts presents the Armed Forces Press Service award to the staff of the NNMIC NEWS at Meritorious Mast, and commends the staff for outstanding performance of duty as reflected in the "Pat-on-the-Back" award is a major contribution to the morale and contentment of patients and staff of the Naval Medical Center. This commendation has been entered in each member's service record. Left to right: Betty Bookis, Bob Thompson, Glin Winston, Ralph Dalessio, LTJG J. O. Atkinson, Ronald Bourgea, George Royster, Benny Bernard, and RADM Willcutts. Absent for the ceremony were J. Bell, Fordyce Neilson, J. C. Woods and Frank Adams.

NATIONAL NAVAL MEDICAL CENTER

Bethesda, Maryland

20 December 1949

From: Commanding Officer

To: Lieutenant (jg) J. O. Atkinson, MSC, U. S. Navy

Subj.: Commendable Performance

Ref: (a) "Pat-on-the-Back" award of the Armed Forces Press Service

(b) SecDef ltr AFIE-NY-P 000.76, of 12 Dec 1949

1. The commanding officer takes pleasure in informing you that the station newspaper "NNMC NEWS" has been awarded the Armed Forces Press Service "Pat-on-the-Back" (Honorable Mention) in the stateside letterpress class for the month of November 1949. This recognition of achievement is awarded monthly to the outstanding Service publication chosen from approximately eight hundred (800) Armed Forces publications.

2. Your outstanding performance of duty as Editor-in-Chief of the "NNMC NEWS" reflected in the "Pat-on-the-Back" award is considered a major contribution to the morale and contentment of patients and staff of the Naval Medical Center. You, and your entire staff, are commended for your splendid efforts in elevating the station newspaper to its present high standard.

3. A copy of this letter will be attached to your next regular report on fitness.

The class taking its introductory chemistry course.

Cummings as he enters the laboratory. All portions of the laboratory are marked with this distinctive type of sign.

A. R. Holtry executing the hardest process in the handling of RA material. It is the diluting process whereby the concentrated material is brought down to a workable range.

R. M. Gismondi, HM3, unpacking radioactive material. The instrument at the right is a "cutie pie," a safety monitoring device to index the approximate radiation received by handling.

Instructor Bullock and Cummings executing the calibration process. Isotopes are compared to known standards to determine the amount of radioactive material per shipment.

Medical Aspects Of R A Materials Studied By E.M. Intensified Course First In Navy For Non Professionals

Long, long ago . . . away back in 1944, before the atom bomb became a public word . . . before it was a tangible thought in the mind of John Q. . . it played a vital and secret part in the vocabulary of this country's scientists. It was a hush-hush word, uttered behind closed doors and marked TOP SECRET. Hiroshima first announced it to the public. Then Nagasaki prolonged it. . . Now, in 1950, the atom has become a dinner table word. People still cringe at the thought of

it, but they have also learned to accept it. And in that knowledge they are striving to make it as powerful a factor to destroy disease as it was a factor in destroying people. The five enlisted men now attending the first class in radioactive material handling in the Navy for non professionals and primarily taught the medical aspect of radioactive materials. Nevertheless, they would be qualified to be utilized in time of emergency to supervise disaster control squads. Their training is ultimately to qualify these men as assistants in the field involving

medical aspects of radioactivity from the standpoint of clinical and research projects.

The first class has been chosen from graduates of the NNMC X-ray school, but students will be chosen from all Naval activities in succeeding classes. The course is an intensified six months of radio chemistry, X-radiation, mathematics, radiation physics, administration and practical work in all of the above. In addition the class is privileged to take a ten week intensive course in general chemistry which is the equivalent of a full year of college chemistry.

The instructors by far outnumber the students, and this is necessary to cover all the material that is taught. CDR M. W. Mason, USN, radiologist who teaches X-radiation is the officer in charge of the school. Other instructors are: LT Bell, MSC, radio chemist, teaching radio chemistry; HMI Bullock, teaching practical clinical laboratory techniques; LCDR Chambers, MSC, physicist, teaching X-ray physics; CDR Dudley, MSC, radio chemist, teaching radio chemistry; Mr. Emery, chemist, teaching mathematics and radio chemistry; Chief Istock, teaching practical laboratory procedures from the research standpoint; CDR Morgan, MSC, physicist, teaching mathematics; LCDR Mulry, MC, teaching practical clinical laboratory procedures; and LTJG Paddock, MSC, teaching administrative procedures.

The students are James Kellner, HM3, from Columbus, Ohio; Joseph Johnson, HM3, from Farming-

dale, N. J.; Donald Commings, HM3, Staten Island, N. Y.; Arthur Holtry, HM3, Sturgis, South Dakota; and Raymond Gismondi, HM3, Pittsburgh, Pennsylvania.

This school is fortunate to be directly connected with the NMRI radioactive isotope laboratories. The present laboratories are relatively extensive in that they have a variety of research projects directly related to clinical medicine. There are several which have reached a stage of development in which promising results are being obtained in patients.

The NMRI has been active in radioactive research for a number of years and has carried the principle load of research in this field for the Naval Medical Corps. Complementary isotope laboratories were organized in the Naval Hospital more than a year ago. These laboratories handled the clinical application of the work of the NMRI laboratories. This includes a standardization and streamlining of the technical procedures in an effort to use isotopes in a practical manner throughout the larger Naval Hospitals.

and Johnson making a surface count with a Gieger Muller counter. Patient has been given a tracer dose of radioactive iodine, which will concentrate in the thyroid gland. These tracer studies are used in cancer of the thyroid and hyperthyroidism.

Bullock and Gismondi check glassware to see that all radioactive material has been disposed of.

NSHA Notes And Quotes

By Benny Bernard

The coming of the New Year meant coming back to school and here we are—in all our pomp and glory. Everyone had a wonderful holiday season—even the fellows who didn't get leave. Just ask them!

Several guys who did go on leave made out like burglars—Roberts returned with a red Olds "88" convertible—like a Hollywood fire chief—and Willis came back with his block-long Lincoln, and Sgt. Lovins returned with a two-tone Plymouth—the front right fender is a different shade of green from the rest of the car. How come?

An item of interest is the fact that the Officers' and MAT-2 classes completed the USAFI exam in Accounting Principles by McKinsey and Noble (college level) and of the 144 participants, 110 were successful, representing 76.3%. 14 of the successful participants passed with distinction. Professor Cronin, of the U. of Md., taught the officers and Professor Kelly, of NSHA, taught MAT-2. Inasmuch as few, if any, had prior knowledge of college accountancy, such a fine showing rates the highest of honors: **WELL DONE!**

During January, both classes will finish Essentials of English under Profs. Adams, Mooney, and Bradley, all of U. of Md., and immediately thereafter will complete the USAFI exam in Commercial Correspondence (college level). Watch for the results!

As we have said, these USAFI exams are college level stuff, and in some civilian institutions—of learning, that is—successful completion of a USAFI course is accepted toward a degree. For further details, visit your local Educational Services Officer!

The height of something is the student who always takes an alkaseltzer each day at 4 P.M. (He actually does.) But I haven't found out if it's in anticipation or relaxation!

Where there's smoke—
"The crew in the rear
Complain they can't hear
The questions from up front, and
yet,
They instantly soar
with a roar through the door
When a teacher says, "Break:
cigarette!"

A parting reminder—(particularly to the staff member who wore a dark green tie as part of his uniform one day during the holidays)—the holidays are over. Now you have only to prepare for June 15th (graduation day). Good luck!

Santa Forgot . . . Deer Left Behind . . . Chief Suprised!

Life was one steady chain of common place events for Chief Lasko, head of the sanitation crew. He was leisurely riding along in his jeep, for the mice were all caught, the roaches exterminated, flies were no problem anymore, and the termites kept below decks.

When he turned in by the greenhouse, the chief saw a huge brown shape bound over a thicket. He knew it wasn't a roach. It was too big . . . unless it was a plank owner.

Many people are still wondering if it was a plank owner roach . . . or a left over Christmas spirit. Chief Lasko says definitely that it was a deer, but he could not detect whether it was "vixen" or "blitzen."

Personalities About The Center

Angel One Of Two Staff White Hats At NSHA

John E. Angel, HM 3, is one of two staff whitehats at the U. S. Naval School of Hospital Administration. He works in the personnel office there.

There may be rumors going around shortly that we are trying to disguise Angel. He is no spy. To prove it, he shaved that mustache off the other day. So if no one can recognize him from the above photo, it is not our fault. The photographer just caught him too soon.

Angel enlisted on July 17, 1947, away down and over in California, San Diego, that is. While at the Naval Hospital there he worked in the EENT department.

On the 4th of February 1948, Angel was transferred to the NNM. He took his indoctrination on various wards, then got a racket down in the bag room (sea bag room!).

Then March 25th came, and found him at NSHA.

The Navy "is one of the few places a person can plan his career and be sure of security at this present time," to quote Angel himself. He will re-enlist in July of this year for the top stretch.

One of his chief ambitions while in the Navy is to do Submarine Rescue Work.

"Y" Cottage Schedules Month Of Entertainment

The recently elected "Y" Cottage Club Council has several able servicemen from N.N.M.C. heading committees. Tony Maienza is chairman of the Public Relations Committee, and Jimmy Meeker is Master-at-Arms.

The Council and the Program Committee have a full calendar of events scheduled for the remainder of January. Sunday morning breakfasts, served from 9:00 to 12:00 under the able supervision of Mrs. Louise Herring, an excellent cook and one of the Cottage's best loved hostesses, are becoming a Sunday specialty along with the regular Sunday suppers scheduled at 6:00 p.m. Those who are interested in attending church services in the community are invited to have breakfast at the Cottage and leave with the group for the Church of their choice.

Monday nights at the Cottage cater to bridge fans, but that shouldn't stop the non-players from dropping in for a cup of coffee, a bit of conversation, and perhaps a moment relaxing in the music room.

Thursday, January 19, the Cot-

Betty Leckie One Of Two TE Waves Here

Betty Lou Leckie of center command is a well-liked figure about the Station. Especially so in the Postal Directory service where she works. It seems as though there are more men than usual there stopping at the directory office to see if they have any mail . . . but we won't go into the reasons.

Miss Leckie bears a mouth and pen full of letters after her name to the tune of TESN. For us corpsmen, we will be happy to know that this means: teleman Seaman. And a teleman is a "smithing" of a postal clerk and a "smattering" of a communication technician.

Betty enlisted in this man's outfit on 14 February, 1949. She went to the Lakes for her "boot" training, then to Norfolk, Virginia for teleman school.

Vital Statistics: Betty is twenty-six years old and claims Donora, Pennsylvania as her home town. The dimensional line, as to height, weight, etc., is here left out for lack of information, but we can assure a well proportioned young lady.

When Betty was asked the inevitable question, "are you staying in?", she answered, "Yes and no, that is to say, my mind is uncertain."

Betty reported here for duty on September 6, 1949.

tage is sponsoring a Square Dance to be held in the parish hall of the St. John's Episcopal Church. Cynthia Moore, a professional caller, will lend her services for the occasion. If your feet are itching to step in time to the rhythms of the hill country, meet at the "Y" at 8:00 p.m. on December 19. We promise you men plenty of pretty girls will be there, and as for you nurses and waves, well, come and find out.

Saturday, January 21st, a crowd will leave the cottage at 1:00 p.m. for a Museum Tour. You know you've been planning to hit some of those historical sites of Washington since you first arrived in Bethesda. Here is your chance, so don't miss this activity.

Tuesdays, the 17th, 24th, and 31st of January, the Cottage Calendar lists "Hen-Rooster Parties." If you don't know what that is, we'll give you a hint; it's not a hen-party and it's not a bull session.

Friday, the 27th, a group will meet at the "Y" to go roller skating at Riverside. There will be cars to transport the skaters.

On Saturday, the 28th, the Cottage crowd plans to attend a dance at the downtown Y.W.C.A. We would like to have you join us for this activity as well as the others. Meet at the Cottage at 8:00 p.m.

Bullock HM 3 Finds NMRI Good Duty

"Being in the Medical Research Institute has many compensations," says William J. Bullock HM3. Working there over a period of time he says he has learned a lot and taken part in some very interesting work.

At present Bullock is working in the Paristology Dept.

Coming from Conshohocken, Pa. (See a map) Bullock graduated from St. Matthews High School of that city.

Entering the service in September of 1946 he received his recruit training at Bainbridge, Md. and also attended Corps School there.

Bullock reported aboard the Medical Center on May 8, 1947 for duty at the Naval Hospital. He served only four months there when he was transferred to the Naval Medical Research Institute where he has been stationed ever since.

Undecided about whether or not to make the Navy his career, Bullock has been giving thought to a course in-Electrical Engineering.

Making the Bowling Alleys and the Pool Room his spare time hang-out affords much of his recreation. Bullock used to be active in the Center Bowling League.

The Chaplain Makes A Call

"Hello, chaplain?"

"Yes."

"This is the Officer of the Day."

"Yes doctor."

"We have a patient over in 3-B in bad shape."

"What's the name, doctor?"

"Henry Blank—the nurse said to hurry."

* * * * *

It was dark outside—and cold—about 0230. I wiped the sleep from my eyes and in a minute, was screaming down Wisconsin. The lighted hospital stood like a sentinel in the night—harbor of hope and faith and love. In 3-B Miss Black showed me to the bed-side. A doctor and corpsmen were adjusting an oxygen tent. There was precision and know-how in their every move. Other professional work was attended to in the same proficient manner. The patient breathed easier and we were alone. There was a look of gratitude. "Having a rough time Father." "Yes, but you'll be okay." And, he was. Men and women, doctors and nurses, corpsmen and waves, all may be proud of their share in bringing comfort and aid to the sick and the suffering. God bless you and keep you.

Monkeys, Dog Big Pow Wow At NMRI

By J. P. Walsh

A sampling of New Year comments found Research Personnel too disenchanted for publication we turned to our animal friends whose disconcerting comments reported unabridged. . . .

First we went to the dogs were mute and melancholy, could tell at a glance that this was the world had gone. saddest of all said, "This ain't chaplain's office buddy," so we away feeling uneasy. . . .

The monkeys laughed at sight of us and were ready comments. One quipped, "you read Mr. Pearson you know all about '50 and more—a wry monkey looked up and winked agreement (he was writing a simplified version of Einstein's Generalized Theory of Gravitation Forces for Super Comics due February). A third monkey was reading Super Comics 1 January, said that his neighbors, dogs, were all neprotic because they took thinking too serious and indicated there wasn't a complex in a cagefull of monkeys. Conversation with monkeys so easy and civilized we hated leave.

But, we did, to visit the where we selected a family who learned had been given a ten-spread in Life as a typical middle family. Joe Jones, a grey breasted field mouse came from the country to marry a fine type city mouse. They lived in a little glass house and had no money problems because Joe exhausted himself making it and spent his evenings reading the scraps of old newspaper which covered the floor.

Mrs. Jones had maid service she spent her time frantically spinning her exercise cage while eight children got stuck in the fitting tube or buried in the newspapers and wood shavings.

We asked no comment from normal American family of ten living in a one-room apartment.

The guinea pigs were carrying on a continuous, nearly inaudible conversation on a different level than ours so on we went the chickens who were nervous pre-occupied. They gave out prepared statement which read follows: "We're just a bunch of dumb clucks and the most we hope for in the New Year is to an egg." They were kidding course.

No comment from the pigs, just sprawled glumly.

So, until we came to the g there seemed little hope for New Year—but—here was a family, the males growing beat the females busy growing kids the kids busy growing (and wait "Mammy" like young Jolson). goat under a magnificent set horns stated sagely "This it is '50." It sounded good to us we rushed out happily—as we ed the monkeys one looked up his Scientific American, shrug his skinny shoulders and gave lunatic laugh.

Patient

(Continued from page 1)

the war Rosario served with a pair gang in the Philippines.

After seventeen years of dev service with the United Navy, we cannot say "welcome a new citizen, but simply well to one who has been a citizen heart for a long time.

Med School scuttlebut

By Frank A. Adams

Now that the holidays are over, it seems as though the invasion of Frederick will be going back into all seeing judging from the reports of Smith and Guyton returning after a long night attack. How about fellows?

Faceman seems to be sporting a smile since he was selected on the Staff to attend Blood Bank school. Could it be the change in scenery or maybe "Rusty" could answer it?

A better late than never welcome aboard is extended to Crocker, Burmeister, Davis and Martin reporting for a two month course in instruction in the Blood Bank school and also Ender reporting for a course in Medical Illustration.

Those wedding bells are breaking up that old gang of mine will be heard shortly with Harry Fallers in Bacteriology taking the last steps in the very near future. Best of luck.

Did everyone notice the front page of the Washington News recently when they had a large picture of Parker, Kuopus and Smith caught in the act of watching the stage show here at the hospital? All the news stands within miles must have been sold out that night judging from the stack of papers found in the barracks.

Everyone still wondering what motor Parker used to reach the stage to kiss the lucky winner of the beauty contest during the stage show. Parker appeared on the scene before anyone else barely at his seat.

Epperson, of blood collecting getting up in the early hours of the morning to draw tower chemistry requests will be checking his shoes more closely from now on. Really he arrived in the messhall wearing one brown shoe instead of the usual pair of black.

Grace Trovato caught in the act of trying to obtain a large sponge cushion. Could she be thinking of the splinters from sitting on the bench in the past basketball games?

Lab 13 News Clips

By Glin Winston

To say the holidays were not enjoyed completely would be the most understatement of the New Year. To note the angelic expressions on different faces was mute testimony of that fact.

Nick remembered all. Even pay officer co-operated in making it a merry affair. We had liberty to burn and monotonous to spare, thanks again to the money man.

As usual we have to listen to the tales of high adventure after each of these occasions, but the one of these in spite of the fact that he is proof (he says) is hard to believe. He is the only man that I know up to date that can go to Rome in December and get a sunburn. Will someone let us in on the scoop? Can't even trust the weather man these days.

Our heartiest congratulations to Tom Thomas upon the arrival of his son, a bouncing 8½ pounder. A future man if I ever saw one, heir to the throne. Cigars are really in order, Rick, old boy.

Texas' loss is Kentucky's gain. Texas as Tex Dayton prefers the grass country to the roaming of blue bonnets and plains. Tex, what's in "them thar

Long Service Awards Presented Here

Miss Mary Bone receiving a twenty-year long service award from Capt. M. J. Aston, MC, USN. Present at the ceremony were: Lt. M. J. Wiltshire, MSC, Mrs. Frances McMahon, Miss Anne Pelick, Capt. J. Enyart, Miss Mary Beth Farrelly, and Mrs. Ruth Parker.

Three hundred and thirty years of work are represented! Each one present received a thirty

year long service award presented by RADM Morton D. Willcutts, MC, USN. Present, first row: LCDR S. Crawford, MSC, USN; Frederick Washington; Joseph Padgett; Margaret E. Burge; LTJG HeWitt, MSC, USN; Ruth Rodier; George Simmons, and Herbert Oram. Second row: James Thomas, Abner Hansborough; Isaiah Hawkins; Joseph L. Kelley and Ricardo Rosario.

Navy Belles

By Nadine Calhoun

A few days ago an old man was seen walking wearily beyond the entrance to our hospital. His only identity was the proverbial beard and the sickle. With him went the Christmas trees and wreaths; ribbons and wrappings; egg nog and empty alka-seltzer bottles; 5 days of leave and 5 days of duty. The entrance and exit of Father Time. . . Now we have memories of '49.

And a few days ago the U.S.S. 1950 was commissioned . . . christened with hope, manned by a crew of faith, a crew who has set their course for a 365 day tour. DESTINATION: Self betterment—safe mooring.

RESOLUTIONS and EVENTS: That was no 'figment of the imagination' clutched 'neath the journalistic arm of Betty nee Bookis. OFFICIAL RECORDS stamped across the front of a brown manila envelope converted our Navy wave to Navy wife. . . Uncle Sam's loss was Tony's gain. The best for you, Betty.

Hammy (alias Susie, alias Hamilton, alias KEM student) has solemnly resolved to never again traverse the nation via pick-up truck without additional cushions.

Wonder how lasting will be those resolutions to: retire earlier; answer letters more promptly, spend less cash in the canteen and more time in the chow hall; exercise ½ hour daily; invest in savings bonds; cast more bouquets and less brickbats. Some 'resolve to never' others 'never resolve to'—either way, two negatives constitute a resolution.

Heavy Holiday traffic. . . Former Bethesda Waves, now stationed in California, came to Bethesda. Bethesda Waves, now stationed in Bethesda, went to California. Who met where, and if so, when?!

Really enjoy our coffee room these Winter nights (Winter by date but not by temperature). Almost more coffee than room.

Now that you can look back on it, Hanson, night duty was not too unbearable, was it? So relieved that you made the train to Philadelphia.

A salutation to Ruth Flora, our guiding light behind the MAA desk. You can set your watch by her daily bluffing act at 0730.

No, that was not another Wave reporting aboard today. We shall call her 'classy LASSY,' with a very clever hair-do. Different . . . attractive.

Time to turn in (this, according to Webster, is defined as "rotating toward a corner"). Alright, Mr. Webster, this is your 'revolving Belle' cornering you all to wish you a successful tour on the USS 1950.

Gray Ladies Offer Patients Full Evening

The Red Cross evening recreational services have been increased during the past year through the assistance of trained Gray Ladies who have completed a special training course. These Gray Ladies are, in the daytime, business and professional women who come from Virginia, Maryland, and District of Columbia. They are women who believe with us that the lonely early evening hours should be enhanced with gay activity.

Gray Ladies assist in evening recreational program by taking crafts to bed patients, taking entertainment units to assigned wards or helping hostesses conduct a party. A typical Monday, Wednesday, or Friday night program including three entertainment units, two hostess groups and two scheduled craft sessions would not be possible without the assistance of eight scheduled Gray Lady workers.

In addition to their assistance in evening recreational programs, the same Gray Ladies donate their time on a rotating schedule to act as guides to new visitors to the hospital on Saturdays and Sundays from 2:00 to 4:00 p.m.

Miss Henrietta Young is Chairman of this group and under her able direction each volunteer is able to give a service to patients most fitting to her own capabilities.

A. B. S. Honors Two Naval Hospital Doctors

The American Board of Surgery has announced that two of the Naval Hospital's doctors have been certified as Diplomats of the American Board of Surgery. CDR Philip J. McNamara, MC, USN and CDR Joseph M. Hanner, MC, USN last month received awards from the American Board of Surgery which was founded in January of 1937.

Before reporting aboard this station, CDR McNamara had just completed a fellowship in surgery at the world renowned Leary Clinic in Boston, Mass. CDR Hanner completed a one-year residency in surgery with the famous Dr. Coffey at the University of Georgetown Hospital.

CDR McNamara and CDR Hanner who are both Fellows of the American College of Surgeons have served with CAPT. Gross, MC, USN, the Naval Hospital's Chief of Surgery, CDR Hanner as O. P. D. Surgeon at the U.S. Naval Hospital in San Diego, Calif. and CDR McNamara as O. P. D. Surgeon at the U.S. Naval Hospital in San Diego, Calif. (Continued on page 6)

The Dental Explorer

By Bob Thompson

Hangover Haven, formerly the Naval Dental School, is now valiantly struggling to get back on its feet and back to work as 1950 pushes its way through the thick fog surrounding everything. New Year's Resolutions have been made and broken with Chuck Lavasseur probably being the first to junk his. An old shipmate of mine, he reported aboard the 31st for Prosthetic School, determined not to touch the lighter spirits, only the harder ones, but at five past twelve his resolution was forgotten.

Several other Bur Jockeys who desire to become Plaster Jockeys have reported in and there are many more to come as this will probably be the largers class to grace the hallowed halls of Bldg. 122. A cheery welcome and a Happy New Year to all.

Also in, is the new class of dental officers here for post-graduate instruction in the varied fields of Naval Dentistry. A big welcome for you, Doctors.

AINav 167 has wrought it's damage and joy here like everywhere with Shiffman, Rodman, and Cobb the first to take advantage of the new ruling. But, "Baby It's Cold Outside".

Now, in closing let me take this opportunity to wish everyone a Happy and Joyous New Year and also a Benevolent Second Half Century.

Diaper Derby Post Results

After dodging baby sitters and bum tips . . . called Joe . . . headed for the track. Being away for three months, picked up the local form and began to look things over in general. After much disagreement with Joe . . . made up a schedule. Here goes. . .

Picked a late November favorite, Rachel Susan Trasher . . . weight 8 lbs. 7½ oz. . . HMC Del and Mrs. Trasher listed as owners.

Liker Jennifer so decided Jennifer Jane Phelps . . . good bet for December 2 and it was confirmed by Mr. and Mrs. Robert Phelps of the local staff.

Wnedy Jane Ketcham was a favorite for Alford and Mrs. Ketcham . . . on December 7.

Fourth on the track win list was little Mary Norris tipping the scales at 6 lbs. 11½ oz. . . Although the owners, Mr. and Mrs. Carl Leslie, were very proud, Mary Jan didn't have much to say.

Mr. and Mrs. Edward Bupnilt kept the pace in the derby with their tiny Alice who looked to us as though she'll always take the first place in any race.

The only listed male entry was on Mr. and Mrs. Billy Dillon's card . . . he is Charles Eugene Dillon who also arrived at the track in late December . . . the 27th to be exact. Father Bill is an HM3 of the Naval Medical School.

Just received two late entries. . . First '50 entry Charles Jett . . . January 5 . . . wt. 7 lbs. 3 ozs. . . made Mr. and Mrs. Charles Jett very happy . . . all diaper bets two to one.

Last race drew to a close with Gloria June Gardner copping all honors . . . couldn't get a good look at her for that big pink blanket but for the 7 lbs. ¼ oz. she was causing quite a commotion . . . Mr. and Mrs. Ruthford W. Gardner predict great things for the future.

LTJG Hewitt, in attending the weekly panel meetings, has rendered valuable assistance which has helped make it possible for the Potomac River Naval Command to carry out the provisions of the U. S. Civil Service Commission's Retention Preference Regulations during the recent reductions of civilian employees.

Through the efforts of the Commandant's Advisory Panel many difficult and complex placement problems have been resolved without the necessity of formal orders to activities. This has, in turn, resulted in a saving of time and effort for all concerned.

LT Hewitt is proud to claim California as his native state and entered the service from San Diego twenty-one years ago.

Twenty-one years in the Navy may mean stations and varied duties. Mr. Hewitt states he learned the ways of the Navy and the hospital corps at the training station and HC school at San Diego.

Then there was duty aboard the battleship West Va., fleet air detachment, Pearl Harbor and NH Philadelphia.

The war years saw him aboard

(Continued on page 6)

Having returned from a short visit with the kin folk out in cool and colorful Colorado, I'm finding it a bit difficult to shake the bonds of inactivity out of this old hide of mine.

Our talented varsity squad seems to have run aground of late. Well, the chips are stacked a little high against our boys. Internal combustion, you know. Perhaps that old malignant growth, "INDIFFERENCE," has been dormant too long.

WANTED DEPARTMENT:
Some gentleman with a bit of coaching experience who has the time and desire to assume the responsibilities of one, (A coach that is). It will be strictly a distasteful task, I can assure you. Of course of you have some of the tenacity with which our players are well supplied, it may give you a personal satisfaction in the realization that you have done the best you could with the tools you had at hand.

CONGRATS: To "Fireman" Kirby and Miss Owens of the N.N.M.C. Ducklin Loop. Keep them rolling. It looks easy from here. Of course you know more about that than I do. Also to members of the basketball team. Perhaps if we had 15 or 20 more just like you all, this station could hold its own in this or any other navy league.

The Admirals fireball forward Tom Brothers is just about the hottest ball hawk in this league. It may come as a surprise to most of you when you hear this. In Tom, our Admirals have perhaps the leagues high scorer. Brothers has consistently hammered the nets somewhere in the twenties in the major part of the games he has played in. You think it's easy, try it some time.

DID YOU KNOW: In Colorado the steaks are so tender the natives wonder how the steers ever walked. It's true. Speaking of steaks, a faint odor of sizzling pureloin seems to be hanging in the air. Reckon I'll sashae on over to chuck. That is one resolution I did make, "Eat more." Think I will have any trouble keeping that?

New Packard Won By NMRI Civil Worker

By Anne O'Leary
A brand new 1950 Packard Sedan is being parked in front of NMRI these days. It was the first prize in the Phillips Delicious nation-wide contest and won by Frances Maurine Gilchrist, the NMRI Editor, on a twenty-five word completion statement.

Mrs. Gilchrist, a Maryland resident, based her statement on a lasting and favorable impression made on her when she saw a Phillips tomato buyer refuse some beautiful red tomatoes because, being an expert, he detected that they had been water-soaked by recent rains.

Earl Godwin of radio and television fame spread the story of Mrs. Gilchrist's spectacular win throughout the day and evening, adding a glamorous sequel to the exciting moment when Mr. Phillips presented her with the car's keys and the winner drove away amidst the cheers of those gathered to witness the presentation.

Tugs Lead Duck Pin Loop, Transports Next

A tight struggle for first place honors in the N.N.M.C. Duckpin Loop is currently being waged, with an 8 game difference between the first place team and the last place contenders.

Mr. Shibley's Net Tenders hold the edge in all individual team honors with a 562 high team set and a 1561 high team set. The Net Tenders are currently in sixth place in league standings.

Among the kegglers Mr. Kirby bowling in his usual brilliant manner is maintaining his supremacy in league competition by leading in all individual honors, with but one exception, the strike department, in which he laces second.

Throughout the first half of the league play Miss Owens of the Net Tenders has carried away most of the individual honors among the women kegglers. Leading in every department except high individual game in which Mary Jane Koerner of the last season's champs has the high mark of 134.

Admiral's Brief Sum-up

Last game before Christmas:

Admiral's: 31

Walter Reed: 26

Miss Feldi played an outstanding game in her position as guard. The game was also included in the 11:00 sports round-up over NBC.

Next opponents will be the Henderson Hall Marines on 10 January, away. The Marines are the only undefeated team in the league—as yet.

On January the 11th the Admirals will meet the Rockville Stars here. This is an exhibition game.

A. B. S.

Namara who is at present the Assistant to CAPT. Gross.

CDR. Hanner received his education at the University of Chicago where he attained his PhD and his Medical Training at the Indiana University. He served his internship at St. Marys Hospital in Madison, Wis.

Receiving his M. D. from the Duke University School of Medicine in 1936, CDR. Mc Namara came into the Navy the following year for duty at the old Naval Hospital in Washington, D. C.

During the war both doctors saw plenty of action and sea duty. CDR. Mc Namara served on board the very famous U.S.S. Wasp and the U.S.S. Vincennes and CDR. Hanner, who received the Bronze Star while serving aboard the U.S.S.

Scenes From Shakewell's Famous Play The Royal Room

Roscoe, the High Emperor of the great city, is conversing with Odee, the fortune teller.

Roscoe: What doth the heavens say for me soothsayer?

Odee:

That soon Great Ruler, all in the world will know of thy greatness. Thou shall ride the gravy train from here on in, Majesty.

Roscoe:

Good, go now low one, and leave me to ponder in the Kentucky Derby.

The serf leaves and Roscoe is left alone to think (a major accomplishment for Roscoe).

Roscoe Thinks: Soon I will be ruler of the world and then I can write my own arrangement of Mule Train.

Enter Merthiolate

Merthiolate: Royal Ph.D. Sir, I suspect treachery in the palace. Someone has tampered with the one knob picture control television set.

Cries Roscoe: Surround the palace. Reward the man who captures the villain two tickets to the Army-Navy game.

Exits Merthiolate, enters Neuralgia, fiancée and headache of Roscoe.

Neuralgia: Roscoe, thou hast neglected me for many lucky old suns. Dost thou loveth someone else?

Roscoe: Nay, Nay sweet flower of the desert. Affairs of state have kept me busy. The men are few and soon we may have to starteth a three section watch.

Weepeth Neuralgia, sweepeth the janitor, and in creepeth the palace general, Amashak.

Amashak: Oh great potentate, leader of thousands, wisest of all wise, and owner of most of the speakeasies in this part of town, I come to warn thee: King Shmoo is at the palace gates with a hundred leagues.

Roscoe: Fine, we should have some good games this year.

Amashak: Sire, You don't understand, he comes to conquer the city and take control of the coal mines.

Roscoe immediately dons his pin striped robe and summons his eight cylinder chariot to the scene. A

Shooting Stars Quarters K Aids Admirals Losing Ways

John Levi, pictured above, represents the N. P. Department's only contribution to the varsity basketball aggregate. "Indian Jack Levi," as he is tagged by his team mates, is a holdover from last season's Admirals. Jack stands 6 foot 2 inches, tipping the scales at 180 and has reached a ripe age of 22 years.

With previous high school, Jr. College and Navy basketball experience behind him, Levi has proven to be one of N.N.M.C.'s steadier ball players. He is rated as having one of the best eyes among the present courtmen. An athlete with a fair share of individual talent, Jack will in all probability continue to improve.

Heart of Gold

purchase a combination radio-phonograph set. In addition there was enough to get individual presents for the 74 boys, between six and eight years. There still remained money for candy, a Christmas tree, the decorations—and all the other Yuletide accessories.

Pestana was overwhelmed. Women in the ship's service store wrapped the present in gaily colored paper. The Navy contributed a Santa Claus suit. A buddy provided the transportation to New York.

To Pestana it was all convincing evidence that there is a Santa Claus. "They're all Santa Clauses," he says of his shipmates and NAS personnel.

Miss Judge

(Continued from page 1)

Navy. Experiences that would leave many women envious of her fine work. During the war she taught new cadets aviation navigation on the ground and in the air. She prepared these young men with the experience that sent them into the foray to show their prowess. Not only new pilots were hers to teach, but old seasoned men of wings as well. When the older pilots returned from the fronts, she brought the squadrons up to date on new navigational aids.

While she was stationed at Annapolis, Maryland she edited text books on Navigation.

Miss Judge is a resident of Washington and lives at 44th Street, N.W. She retired from the Navy in July of 1947.

large war is waged, until finally everybody was shot and died.

Scene Two

Roscoe:

I dieth! Can it be?

Enter the morticians.

Curtain

In opening their second half the PRNC Basketball League N.N.M.C. in and out varsity continued their losing ways. Quarters "Ks" flashy tars poured 36 goals from the floor and 4 charity tosses, to handily trip the admirals 76-53.

Quarters "Ks" sailors, as an early lead, and continued pace setting throughout the game. The admirals matched the score in the second period, and proved to be their best quarter, tying 16 points. The first half ended with center trailing by 9 points.

Opening the second half the sharpshooting Nugent and clever ball-handling of Elich, tars rangy center, "Ks" mounted offense pulled out all stops. When the final whistle rang, Green & White 76-53 count.

Tom Brothers continued usual sparkling play by leading Center scorers. Prof. Echols led in a steady game in scoring points and was outstanding defensively throughout the contest. Elich and Nugent carried "Ks" attack with Elich especially effective covering the boards.

Honolulu which was hit in Ley Bay.

CDR. Mc Namara and his wife Louise Mc Namara live in quarters "G" aboard the station with their two daughters, Ann Victry and Mary Fontaine. Their son Neal is present attending Duke University where he is a sophomore.

Chevy Chase is home for CDR. Hanner and his wife Mary Elich and their small daughter Patricia who is four years old.

Both CDR. Mc Namara and CDR. Hanner are to be congratulated for receiving this honor from the American Board of Surgery.

Patient Given Citation By Sec. Of Navy

LTJG William F. J. Riordan, a patient on T-14, received a commendation from the Secretary of the Navy recently. The commendation was presented by RADM M. D. Willcutts, MC, USN, Commanding Officer NMMC, with due ceremony attended by hospital staff and friends. The citation reads as follows:

"For outstanding service as Assistant Signal Officer and Division Gunner Officer, attached to the USS Tennessee, in action during five major operations against enemy Japanese forces, including the Assault on Leyte, the Battle of Surigao Strait, the Iwo Jima Assault, the Capture of Okinawa and the Operations in the East China Sea, from September 28, 1944, to August 20, 1945. Stationed on the after defense platform during the historic Battle of Surigao Strait on October 25, 1944, Lieutenant, Junior Grade, (then Ensign) Riordan, despite intense hostile bombardment, skillfully carried out his responsibilities as signal officer during the maneuvering of many ships a night in confined enemy waters. When the Tennessee was struck by a Japanese Kamikaze on April 12, 1945, he stood by the battle station on the after antiaircraft defense platform, assisting the radar-director officer in training the antiaircraft defenses against oncoming enemy planes."

"I'm not trying to boost the Hospital's ego, but I've been here a year and find it a wonderful place. I've received expert treatment here," supplies LT Riordan. He is here following a plane crash that broke both his legs. He is now able to walk with the aid of braces. LT Riordan will appear before the retirement board this month. He is ready to go into business for himself.

(Continued on page 3)

LTJG Riordan receiving a Citation from the Secretary of the Navy. The Citation was delivered by RADM M. D. Willcutts while CAPT. Greaves looks on.

Seventh Course For Reserve Doctors In Atomic Medicine

The seventh course for U. S. Naval Reserve medical and dental officers in the Medical Aspects of Radioactive Isotopes came to a close Friday. The lectures and illustrations were under the auspices of the Commanding Officer of the Naval Medical School. The course is primarily for the orientation and training of medical and dental officers of the Naval Reserve (inactive), however medical and dental officers, regular and reserve, who expressed a desire to attend were not only eligible but cordially invited, as were line officers of other federal agencies.

There are quotas assigned to each Naval District and the number who may attend is accordingly set at two hundred and ten. The course lasted one week.

Capt. M. J. Aston, MC, USN, gave the introductory address, followed by a welcome by RADM Morton D. Willcutts, MC, USN. Other speakers were: W. Palmer Dearing, MD, speaking on Medical Readiness, Howard Andrews, PhD, giving an introduction to Nuclear Physics and Lt. Col. David B. Pader, USA on the Evaluation of Atomic Bomb Effects.

The distinguished speakers for the 24th were RADM W. S. Parsons, USN, Herbert Scoville, Jr. PhD, Shields Warren, MD, CDR J. L. Tullis, MC, USN, CAPT Charles F. Behrens, MC, USN, and LCDR E. P. Cronkite, MC, USN. The topics divulged were the Naval Problems of Atomic Warfare, Fission and Ionizing Radiation, the Fundamental Biology of Ionizing Radiation, the Pathologic Anatomy of Total Body Irradiation, the Cumulative Effects of Ionizing Radiation, and the Hematologic Picture and the Therapy of Acute Radiation Illness.

Other speakers for the course were Col. J. P. Cooney, MC, USN, Richard Gerstell, PhD, Karl Z. Morgan, PhD, CDR L. H. Roddis, Jr., USN, J. B. Trunnell, MD, C. F.

New Choral Group Organizes, First Meeting In Auditorium Thursday

If you sing, hear this; if you don't know how to sing, listen anyway. The Recreation Department announces the first meeting of a brand new choral group at 1630 Thursday, 2 February, 1950 in the NMMC auditorium. All interested personnel are urged to attend this meeting.

Tentative engagements, public appearances, and the new set-up organization will be discussed.

The new choral group will be under the able direction of Mr. Clyde J. Holt, who is a professional minister of music. He is presently director of music at Calvary Baptist Church, Washington, D. C., and director of both The Washington Boys Choir, and The Washington Girls Choir. He was formerly head of the music department at Trinity University, San Antonio, Texas. He was a student of John Finley Williamson, Paul Boepple and Myron Whitney in voice and conducting. Although a civilian, he is very much interested in our new venture and looks forward to a lot of fun with us.

We are looking forward to a big turnout. Mr. Holt emphasizes the fact that a knowledge of music is not necessary, that you are born with a voice, he can only teach you how to use that voice.

Lt. Paul Natvig and Sarah Woodworth, HN, have promised to give us a hand with the accompaniment.

If you have a trained voice, you are needed; and if you have never sung before, come out and join our big group. Singing is fun. "There is no music without fun . . . and no fun without music." Let's put NMMC on the map in music.

It is anticipated that we will have one rehearsal weekly, Thursdays 1630-1730.

Don't forget the first meeting—1630 Thursday, February 2, 1950—NMMC Auditorium.

NMS Photo Lab Gave Exhibit At Shoreham

The NMS Photography Laboratory presented a medical exhibit at the meeting of the American Society of Photogrammetry recently, on the event of its sixteenth annual meeting. For those not familiar with the technical term Photogrammetry, it means simply map making. The exhibit took place at the Shoreham in Washington, D. C.

The Photo Lab. presented an exhibit of photography in pathology, medicine, research and surgery. The prints were both in black and white and in color. It was the only portrayal of medical photography at the meeting. Other Naval representatives at the meeting were from NAS, Anacostia.

Photography exhibit presented by the NMS Photo Lab. at the American Society of Photogrammetry's sixteenth annual meeting. The exposition was presented at the Shoreham Hotel in Washington, D. C.

LT Conant Speaker At Beckley, W. Va.

At a meeting of the New River Dental Society held in Beckley, West Virginia on January 18, 1950, LT. Julian R. Conant, DC, USN, of the Naval Dental School, spoke on "A Surgical Treatment for Periodontoclasia." His lecture was followed by a sound color film made here in 1948 under his direction and color slides taken here also. An avid photographer, Dr. Conant obtains his lecture material in his own office by photographing selected patients at different stages of treatment.

He has given his work at meetings from Canada to California and yearly he is on the program of the District of Columbia Post-Graduate Clinic.

The Chaplain's Corner

By Chaplain Frank R. Morton, USN

New Year Resolutions . . . if we make them can we keep them? John Jones always gets out his pencil and paper and starts jotting down those bad habits and little shortcomings—with a steadfast determination that "this time I'm really going to keep my resolutions."

January 1—"Everything fine; remembered them all today."

January 2—"Quite busy at office; during phone conversation a few words slipped—but it wasn't purposely."

January 3—"Not so good; unconsciously lit a cigarette and reached for a second before I caught myself."

January 4—"Too busy to think about resolutions today."

January 10—"Resolutions? bah . . . I'm not so bad after all."

How many of us have gone through this same thing. It took only a few days to find out that it was pretty hard to make ourselves better—and finally we decided we weren't so bad after all.

It just seems to be in human nature to want to make one's self better, but alas, it cannot be done. The Bible says: "Can the Ethiopian change his skin or the leopard his spots? Then may ye also do good, that are accustomed to do evil" (Jeremiah 13:23).

In another place the Bible says: "For though thou wash thee with nitre, and take thee much soap, yet thine iniquity is marked before me, saith the Lord" (Jeremiah 2:22).

Men and women would like to have a new start when they realize their sinfulness—but alas, they look to the wrong person. They look within, and try to make over that old sinful nature—and each time it ends with utter failure. God says one might as well try to change the skin of the Ethiopian as to try to do good.

But God has a way of changing a person and giving him a new start. And God not only gives a new start but blots out the sins of the past. "If any man be in Christ, he is a new creature: old things are passed away; behold all things are become new" (II Corinthians 5:17).

Why not trust the Lord Jesus Christ as your own personal Saviour at the beginning of this new year, 1950, and know the blessedness of sins forgiven, and assurance of Life Everlasting. Instead of your making the resolutions each year you will then be able to look back to the time when God gave you a new start—a new life—a new hope.

Jesus said: "Him that cometh to Me I will in no wise cast out" (John 6:37).

The Dental Explorer

By Bob Thompson

Seventy-seven Dental Techs have now reported in for Prosthetic School and the class, as I said before, is the largest one ever here. Classes started the first of the week under the direction of CDR Frates and LCDR Superko, very ably assisted by DTC Lynch and DT1 Bickel.

The new routine of no work on Saturday mornings has met with much approval here in the North Wing. I am sure it will be appreciated even more in the summer when the golf course again becomes the center of attraction.

Glimpsed in Passing — DT1 Clark, from Dental Research, telling Chief Harvey how much he envied him and his job. Reply from the Chief—"Ha!" . . . The new joe mess in the Main Lab that should help these early morning blues. . . The absence of shuffling Dan'l Gryzowski who's now in the Windy City a la Dependency ALNav. . . The distaff Lowden being separated. . . The eyebrow pencil found hidden under Farrington's pillow. . . Moore with a peacock on at morning muster.

That's about it so I'll get ready to sign off now.

Lab 13 News Clips

By Glin Winston, NMS

Lab. Class 13 is the only class that I know that is producing, slowly but surely, its successors, a dynasty of twenty year navy men. This time it is Frank Adams and a boy.

We said the final farewells to Strannigan, Dillon, and Buchanan last week. Armed with honorable discharges and broad smiles, they headed into what we casually refer to as Civilian Life. Good luck, boys.

Back in the old days, horse trading was the major source of getting the best in transportation, now it seems to be car trading with Bunch holding an exclusive monopoly over it all. The latest victim, Alumbaugh, A classmate.

Some people are lucky, some are master planners, and some are victims of circumstances, but whatever happened to Minick I am sure that he is enjoying it all. He is now supporting a new Plymouth.

If need be, we will have to pool our money and buy Goff and Cornelius each a pair of glasses. Goff is now partially without any because someone punched him in one of his eyes. Or did he really drop them? On the other hand, 'Corny' can never find his. Two blind men would be unbearable.

Say . . . It's Not Easter Yet

He can't quite make it walking yet, but crawling will serve the purpose for Bruce Alan Bredland. Maybe by Easter he'll get that bunny. Bruce is just pushing six months. His father, HM 1 Bredland, is a member of the Naval Medical School staff.

G. I. Insurance NMMC Attracts Best Bet For Visitors From Big Savings Near And Far

Know your G.I. insurance before contemplating any change!

There is a general tendency to believe that you are paying money in and getting nothing out. This is not true! All insurance contracts, whether civilian or G.I. are based on the "American experience mortality table," and a set "interest rate." Therefore, since the company knows what your life expectancy is and the interest rate they will pay, it is simple matter to compute the amount needed to cover death claims, disability claims, etc. This is the amount that is charged on your 5-year level premium term policy, i.e., only enough to cover expenses.

"Now, the same thing is true on all types of policies. As an illustration we will use age 18 as an example: 5 year-term costs 64¢ per thousand per month, ordinary life costs \$1.18. It is true that ordinary life costs more but you will argue that it will be worth something, that it has a cash value.

We will now break that policy down and see what cash value we have. The "cash reserve tables," show that the ordinary life policy has a reserve or cash value of 55¢ a thousand at the end of the first month. By subtracting 55¢ from \$1.18 you get 63¢, which means that even though your policy has a cash value it still costs you 63¢ a thousand for protection. Now we again look at the 5-year level term policy. You pay 64¢ a thousand and the reserve tables tell us that you have a 1¢ cash value per thousand, which also leaves us with a cost of 63¢. Looks exactly the same, doesn't it? Even though different methods were used to arrive at the same figure.

You will find the same thing is true of all types of policies. They are all based on the same thing, i.e., American experience mortality table and a set rate of interest. The government offers you paid up policies, savings plans, endowments, etc., the same as commercial insurance companies, and it is not necessary to take out term insurance first.

The necessary forms to convert or start new insurance may be picked up from the insurance office, ward 102, or at any veterans administration office. And remember there are no restrictions as to hazardous employment, travel, suicide, etc., (which no commercial insurance co. can duplicate or match).

Although he is no J. L. Lewis, Dr. Schepers of Capetown, South Africa knows plenty about mines. He is not so much interested in labor relations, as in making the mines safe in the health aspect. While here, Dr. Schepers visited the NMRI and interested himself particularly with the problems of industrial medicine related to mines.

Dr. J. F. Toennies from Freiberg, Germany, had a twofold reason for visiting NMRI. He came to review pre-war acquaintances and also to discuss the function of the central and peripheral nervous system. Especially interesting was the work on electrical properties of nerve membrane.

Colonel Borje O. Alm, MSC, Swedish Defense Forces, Stockholm, Sweden made a second stop here at the Center. This time he came to observe the Medical Science Corps Organization.

Sir Philip Manson-Bahr, Consulting Physician to Hospital of Tropical Diseases, London, is also a return visitor to the Center. His stop here was expressly to convey personal greetings to Dr. Huff and Dr. (Continued on page 3)

G.I. rates are approximately 15 to 20% cheaper in the long run than comparable rates of insurance on the outside. And most important of all there is no overhead or commissions to pay,—therefore in effect you receive a proportionate share from earnings and savings from time to time as determined by the administrator of veterans' affairs through the NSLI plan of mutual benefits. Also the proceeds from NSLI are not taxable by the Federal Government.

Don't forget the special dividend being paid to veterans with insurance force from the effective date in 1948—the rate is 55¢ a thousand per month, which if you pay 64¢ per thousand and get back 55¢ means you are only paying 9¢ per month per thousand for protection. These Dividends or adjustments on the premiums you pay for protection are expected to continue just as good in the future.

Think it over carefully and, if still confused, the insurance office will be glad to give personal attention to your G.I. insurance problems.

Insurance Office, Ward 102, Phone 252 or 547.

Crew's Library

IF YOU . . . IF YOU . . . IF YOU . . .

If you seek peace and quiet, come to Crew's Library and see how useful is the atmosphere since the glass has been installed in the door so that a glimpse may be had into the inviting interior while noise and food odors are kept out!

If you are one of those Western fans, you will be interested in a new biography by K. ZANE GREY: MAN OF THE WEST. A dentist, Grey compensated for an unexciting existence by creating a world of romance and action in the western plains.

If you like plot and counter-plot, intrigue, swordplay, and romance against lavish settings, you want to read Shellabarger's latest, KING'S CAVALIER. The story traces some 400 years ago when the Duke of Bourbon was leading a revolt against the crown.

If you like your historic facts written up in a jaunty fashion, try PAUL REVERE'S HORSE AZOY. This book will correct any false ideas you may have carried over from your school days about the Battle of Bunker Hill, Farnham's battle of Mobile Bay or the Charge up San Juan Hill.

If you are one of Robert E. Lee's many admirers, you will like the new collection of his letters, reports, orations and biographical sketches in the new ROBERT E. LEE READER by Horn. You will add to your picture of him as a military genius but also find him a noble, gentle and truly human person.

Med School Scuttlebut

By Frank A. Adams

The iron curtain surrounding the Chemistry Class seems to be finally weakening. Recently the fellow broke through the shell to play the Waves in a hard fought game of basketball. Could Hamie be the cause of the sudden uprising?

Welcome aboard is extended to Chief Potter, who arrived from NSHA for duty in the MAA office and Chief Nygren reporting back from the Naval Hospital at Chelsea for duty here as the chemistry instructor in lab school.

TINY Schroer (last time on a scale rapidly crowding 260 lbs.) must be trying to break all records judging from his daily trips to the messhall. Maybe Glunz, of Blood Chemistry, should be let in on the secret.

Everyone wishing a speedy recovery and a rapid return to duty for Chief Mego, a patient on Ward 107.

It appeared to be farewell to dear old Bethesda recently with Chief Thomas, of Blood Chemistry, leaving for civilian life in California, Timmerman leaving for duty at the Naval Hospital at Quantico, Guyton leaving for duty at Pine Point and Otto Hon leaving for sea duty with the Atlantic Fleet. Judging from the many calendars being marked in the quarters, it won't be long before many others will be bidding farewell.

Everyone busy burning the midnight oil lately, starting to study for the next advancement in rating test scheduled for the 28th of this month. Many of the fellows seem to have high hopes judging from all the new rating badges already seen.

Navy Belles

By Nadiene Calhoun

Tonight I sit behind the crystal ball. For several moments all is dark. The crystal ball remains rounded in darkness. Soon a silhouette assumes shape before my eyes. Now many silhouettes. Finally I recognize people and faces. Real, friendly, happy people. Yes, it is the panorama of the recreation room. There is prophetic of an eventful evening. Gaze at the crystal ball and you shall listen and you shall hear. . . Sarah W. or Katie G. at the Beauty Shoppe. . . "We'll go sailing along, down la da de. . ." Now we hear the constant hum of the Singer machine as Burton bends her head intently guiding the material toward the needle and saying with every revolution of the wheel, "Just gotta finish this dress to wear when I see him!" Wee Un Miller and So Velly Sleepy Hopper create a steady ping-pong, ping-pong across one table in corner. Suddenly the air vibrates with the exciting strains of Tchaikowski and the gracefully interprets each musical phrase with ballet, demonstrating both talent and years of study. Click, click, click repeats the typewriter as Barbara White (spelled backwards is psu . . . nurse for Pharmacy). Notice the tall, slender, blond nurse sitting on the card table, singing, "Who will buy my pretty uniforms?" . . . Sorry Eli is leaving at know Mr. Smith isn't. Better keep one uniform for the Spirit 75 parade.

We watch a bit o' conversation titled Bingo-lingo . . . it's the arm-pushers discussing the fun to be had with corn on the card in C. on Tuesday nights (At last, here is a place where prizes are offered for corn!)

A subdued mumble, mumble is heard near one of the writing desks. Barbara Winter sits cashmirationally sitting and coaching Gracie in the propriety of writing the first letter to the B.F.'s mother.

Hip, hip away . . . three cheers for Lenora Hill's most recent bowl score.

Elsie Bachison wanders into focus of the crystal ball, looking most startled and her dismay is justified. Elsie reported early to attend Dental Prosthetic School in order to get squared away at the quarters. Unfortunately, her luggage took another path. Welcome to our adobe . . . luggage or no, be patient and keep your shirt

to not be alarmed by the explosion from the laundry room.asty-Olson storms into view . . . and a scorched shirt.

Sound waves travel wildly from wall to wall; the tempo of the Singer machine, ping-pong, Tchaikowski, typewriter, vocalists, piano, radio and conversations increases to the climaxing pitch.

Gradually tones grow softer, a mist filters into the crystal ball, characters are obscure. The Belles chimed the mid-night hour and a panorama vanishes.

COTTAGE TO ATTEND CONCERT

The gang has been going roller skating or ice skating each Friday evening. Here's your chance to meet some nice lads and lassies and spend the evening skating. Transportation will be furnished from the Cottage.

Wednesday, February 8th, the Cottage Group will attend the Concert at Constitution Hall—make your reservation for this early. If you have not seen the sights of Washington, contact the Cottage group.

And The Lights Were Low

Random pictures of couples at the last staff dance. Everyone had a good time, and danced the night away. Which reminds us, there will be another dance in February. Let's see all those smiling faces again. But those who have never been to one of these gatherings are assured a wonderful evening.

Not Much Research From Research

By J. P. Walsh

Lady designers lament the lack of personality in men's clothing while BuPer's prodded by 13 buttoned rebels, offers sedate compromises for nautical wear, and sailors, the last of the personality dressers go by the board.

We mourn the passing of the salty dogs (the designing ladies also mourn).

No doubt the old navy of the sixties shed briny tears over the passing of the slouch beret and the jacket "double breasted with rolling collars, two rows of medium sized buttons on the breast, six to a side." (Regs. 66) natty as an Eisenhower jacket over the frock (jumper) tucked in at the belt. The frock could be of flannel, linen or duck. The one, two or three stripes on collars and cuffs designated rate; landsman, coal heavers, and boys wore one.

Rating badges were worn on the right arm, or left, to indicate port or starboard watch and consisted of a petty officer's badge, a star above an eagle perched on an anchor, worn above the elbow and a specialty mark in the manner of the old strikers badge, below the elbow. Non-rated men wore watch designations similar to the new seamen's bars. One or two bars worn on the front of the sleeve above the elbow showed first or second watch section worn on left or right arm.

Dungarees called overalls were cut like the other uniforms but made of unbleached duck and tied with a draw string. You could sew these models yourself and the navy supplied the patterns.

By 1897, the uniform was out at the elbows with sleeves big as ditty bags, 20 to 23 inches in circumference gathered at the cuff. There was also a detachable breast piece, tho hardly necessary with regulation blue flannel undershirt (square necked with side opening and matching long drawers).

But depreciation of glamor (commissioned) has been sadder still. Cocked hats, helmets, spiked hats and straw hats have come and gone along with frocked coats, grass coats, epaulettes, the sword and six stripes for the captain.

Shades of pastel elegance (enlisted). The pajamas, optional in early 1900 and obtainable at small stores. All gone—and more to go?

Gone—the professor of mathematics, the ship's school master, the Naval Temperance badge and the band with its scarlet egrets and braiding.

NSHA Notes And Quotes

By Benny Barnard

Since January 16, all hands have been eagerly watching for the mail man. To date—1-19—only two of our gang have received what we're all looking for—those NSLI dividend checks. Chiefs Todak and Coles were the lucky ones.

Friend Crismon had to spend most of his holiday season in the USNH, Memphis, but he returned last week to the grind. Evidently none the worse for his experience. Ted Shearer also had a bout with a hospital bed early this month—nose operation. He tells me he's now able to smell. (That's an opening, if I ever saw one!)

I hear tell that the latest in Personnel exams is the "double whammy"—but after reading the questions, I'm inclined to label the exam a "crosseyed double whammy." Example—A NavMed 102 was mailed to BuMed from USNH, Guam. Why was that wrong? (First—what in heck is a 102?)

Chief Book submitted an application for the Iowa State Bonus back in May 1949, but to date he's heard nothing. So now he's getting impatient! (How hungry can a guy get? All this money from the new pay raise—insurance dividends—state bonuses! Us little guys don't have sox big enough to hold all that much!)

I see Karr has a new car—a Mercury. With all the first class PO's buying cars, I think I'll have to take the next exam and try to make it so I can get a car. Of course, all those new cars belong to single fellows—lucky guys!

Uncle Fuller just came back with his nest egg—but who is interested in nests and eggs? All we're interested in is the chickens—and not the feathered variety, either. With that nest egg (the dividend check) we'll all have chicken!

Foreign Visitors

(Continued from page 1)

Cole. He also asked about the filiariosis and was shown unclassified material pertaining to misquito research.

Professor Collins' object in visiting the Center was an interest in how the Navy attacked radiation problems. He was interested in Dr. Manard's work on cerebral circulation. He found the monkeys with lucite skulls quite interesting.

The fleets-in, but not the sailors that the feather boa and bustle set followed from port to port.

We're bigger and better but not so interesting.

LTJG RIORDAN

(Continued from page 1)

self selling a child guidance plan and encyclopedia, the name of which is "CHILDCRAFT."

After graduating from the Naval Academy in 1944, he went to the USS Tennessee where he earned the above commendation. In 1945 he was sent to flight training and in 1947 received his wings.

With his shining wings in one hand he graduated from the bachelorhood to matrimony the same year. He now has two sons, William and Malcolm.

His first duty as a flyer was with an anti-submarine squadron, and on February 10, 1949, while on a flight his engines become caked with ice and caused the accident that broke both his legs.

Meet Your Chief Of Medicine:

CAPT Norman Has Long Career In The Navy

CAPT Irwin L. V. Norman, MC, USN, has a long and varied career in the Navy. He has a total of twenty-three years' service. He entered the Navy after graduating from the University of Minnesota where he received his medical degree.

From then on, CAPT Norman served aboard many ships and stations. Among ships where he was medical officer are the USS Antares, USS Arizona, Destroyer Division 28, USS Trenton and the USS Omaha. He served two hitchies at the Naval Hospital Chelsea, Massachusetts and was executive officer of Long Beach Naval Hospital from 1944 to 1946. He was also stationed at the U. S. Marine Barracks, Quantico, Va., and at the Bureau of Medicine and Surgery.

Later, he served as Chief of the Medical Service at the USNH, San Diego, California. From there he reported to the National Naval Medical Center in August of 1949 and was assigned duties as Chief

Miss Rose Of Red Cross Here For Orientation

Miss Jeanette Ross, a new face in a Red Cross uniform at this station, is spending three weeks with us getting oriented to domestic service in a military hospital. When she leaves us, it will be take up her duties as Red Cross Field Director at St. Albans General Hospital in New York.

Miss Ross is no newcomer to Red Cross as she has been with the organization for eleven years, including two years of overseas duty. She comes to us directly from Tripler General Hospital in Honolulu where she served as Field Director for two years. Her other overseas stint was in a military hospital in India during 1942 and 1943.

Between overseas assignments Miss Ross worked at National Headquarters of Red Cross in Washington as assistant to the Director of Foreign Hospital Service. She has also had a number of domestic hospital assignments. She has seen duty at the Army and Navy General Hospital at Hot Springs, Arkansas, Fort Sam Houston Station Hospital (now Brooks General Hospital) at San Antonio, Texas and Fitzsimmons General Hospital at Denver, Colorado.

Miss Ross's home is in Bloomington, Illinois. She obtained her social service graduate training and Master's Degree at the University of Chicago Graduate School of Social Administration. She specialized in the medical sequence at that school.

of Medicine at the Naval Hospital here.

Before the war, from 1940 to 1942, CAPT Norman was Assistant Naval Attache to the American Embassy in London. His principle mission there was to study the advances made by the British in treating air raid and war casualties. While in London, in 1941, he accompanied the Harriman-Beaverbrook Supply Mission to Russia. He was in Russia at the outbreak of the war.

In 1942 he was sent to the Naval War College in Newport, R. I. and following that, to the South West Pacific where he served as fleet Medical Officer of the 7th fleet. He also served as Assistant to the Medical Inspector for the Pacific Ocean Areas. He made Captain during 1943.

CAPT. Norman is a graduate of the U. S. Army Field Medical School. He completed a year's postgraduate course in Internal Medicine at the Mayo Clinic, Rochester, Minnesota, and is certified by the American Board of Internal Medicine. He is also a member of the American College of Physicians.

CAPT Norman has written many papers in the field of Internal Medicine which have been published in various medical journals.

He is quite a golf enthusiast, and especially enjoys playing with CAPT Gross, the present Chief of Surgery.

E. J. BELL

Oh Happy Day! and that it is. With my pockets temporarily lined with gold. A bright wintery sun glowing warmly in the heavens. Our Admirals showing all the zip and vitality of a flock of spring chickens. Top this off with the transfer of T. Brothers (thanks to "Coach Frates"), to Center Co. Reason enough for hilarious joy? I should say so.

During the recent game with N.A.S. Anacostia, Centers' handsome guard Kurzkaski, was injured, when his lower jaw came in contact (quite by accident) with an arm full of elbows. In a statement in the locker room later Skee is quoted as having said, "There will be no need for the girls to worry, there will be no scars."

The Intra-Basketball league is in full swing of late. From here it looks as though Dentals' "A" have about the hottest team in the circuit. If not the best team, they certainly have one of the top performers in Dr. Klein. (Not a bad Dentist either). Stiff competition is being supplied in the form of N.M.R.I. and N.P. services quintet.

The Redskins have certainly made themselves strong contenders for all honors in the Pro-Football circuit. A team with Choo-Choo Justice, Bill Dudley, Eddie LeBaron and the likes of slinging Sam Baugh will be able to supply no end of sensational football: Washington fans are in for a season chocked full of thrills come September.

When Don Polizzi was being examined for entrance into the Navy, the first question which they asked was: "Who is the Commander-in-chief?" "Dunno, Sir," replied nose? "I ask you how many shot gotta one fit whisky. You dunno. You know your biz, I know mine."

"Whoever he is there is a sneak thief on this team," says G. Funk. In the past week I've lost a set of Sunberry knee pads, a Patuxent River Sweater, a pair of Quantico Pants and two Y.M.C.A. towels.

Luckless Ctr. Decisioned By Patuxant Squad

Patuxents naval airmen stormed to victory over Centers' Big green and white squad in the final minutes of a game played on the Admirals home court. Decisioning Centers' scrappy quintet 46 to 44 gave the airmen their second victory in as many starts, over Centers' Admirals. Patuxent River previously downed the Center crew 47 to 43 in a similar fashion.

Pounding the nets with four goals in quick succession, Centers luckless crew, to all appearances, seemed bound for victory. With four minutes of playing time having elapsed the airmen countered with their first marker on a long shot by Toriciccollo. With gradual consistency the airmen pared Centers' lead and by half time, jumped into a one point lead, on a two-hander by Ratay, leaving the court with the count 27-26.

Centers' green and white opened the second half with new life and rolled to a 36 to 33 third period lead, behind the sparkling shot-making of Tom Brothers and the strong defensive play of Braun and Pete Stanley, Admiral guards.

With spirited determination the airmen overcame Centers' lead with less than three minutes playing time remaining. It was a race against

Shooting Stars

Pictured is Paul E., "the Indian," Stanley, our selection for "Shooting Star" this issue. A few of his vital statistics are as follows: Age 20, height 6 foot, weight 160 lbs.

The Indian, as he is affectionately tabbed by his team mates, never played basketball during his High School days although he professes, "playing the hardwood court is his favorite pastime." Pete, another of his many nicknames, lettered as a track man in high school in Columbus, Ohio.

A very popular player on the varsity squad, Stanley is considered to be an excellent ball handler and a very spirited player. Although his shot-making ability is somewhat below his defensive and ball handling capacities, Pete has a rather effective eye. Trying to induce Stan to take shots whenever an opportunity presents itself, has been man-sized task for the most part.

A Sophomore in varsity play here at the Center Stanley has shown continual improvement, and has produced many a fine laugh with his spiritous fun-making, while at the same time he has given serious work to his ball playing.

time for the Center five and the final whistle sounded with the airmen winning out 46 to 44.

Blitz Stops Airmen, Ctr. Rolls, 75-58

Continuing at a torrid pace, Centers' cagers easily outscored Anacostia's Naval Air Station five 75 to 58, thereby running their wins to 3 in a row. This was the Admirals second win over the airmen in two meetings.

Playing with effortless ease the Admirals grabbed on to an early lead and held to it throughout the game. Half time ended with Centers' Med. Men out in front 34 to 29.

With Tom Brothers, George Funk and Jack Levi tossing in duces as though they were wild, the Admirals leaped to an unsurmountable lead. Notching 22 points in the final frame Center rang up their highest score of the season.

The Airmen's center, "Lucky" Price, was the games high scorer with 24 points, followed closely by Center's Tom Brothers who tallied 23 markers for the winning Admirals.

Admirals Win Dump Rockville On Home Court

Playing deliberate offensive ball and setting up a tight zone defense Naval Medical Centers Admirals downed the Rockville All Stars flashy quintet on the home court.

With Tom Brothers, Center's fighting Irishman, tossing in points with his usual consistency the admirals took the lead early in the first period. Rockville's stars however managed to overcome this lead and the end of the first stanza found the score knotted at eleven all.

As half time approached Big George Funk and Tom Brothers combined scoring efforts, pumping in two pointers from the court to give the Admirals a slight 18 to 15 half time margin.

Molan, the Stars' husky center, who had trouble finding the bucket in first half play, opened the second half with two goals to give the Stars a 1 point lead 2 minutes after

Head Quarters Marines Out Scores Admirals 66-60

Headquarters Marines from south of the Potomac, turned on the and downed Centers Admirals in a high scoring tilt, 66 to 60.

Shooting Stars

Another "Shooting Star" who rates among the top players in PRNC Competition is Tom Brothers. Being well fortified with all the natural and acquired abilities so necessary in the athletic field of endeavor, has given Tom the respect of all his opponents as well as the members of his own team.

Having lettered four years in high school, in three major sports Tom matriculated at Cornell University where he continued his outstanding play before his enlistment in the U. S. Navy. Tom incidentally is a native of Fairport, New York, 23 years of age, stands 5 foot 10½ inches and weighs in at 178 lbs., is Irish by choice.

In this his freshman season with the Admirals, Tom has led his team in all individual honors and stands high among the top scorers in the PRNC basketball league. In 17 contests in which he has appeared Brothers has amassed a total of 314 points for an average of 18.4 per game. It is well to understand that while Tom is small in stature, his speed and elusiveness combined with a sharp eye make him an exceptionally difficult opponent. They say basketball is a tall man's game, Well?

the period opened. Molan was later extracted from the game for unsportsman-like conduct, but not before he had bucketed 11 points.

Rockville's Bob White dumped in a two pointer, to give his squad a 1 point margin with 2:15 seconds remaining in the tilt. Paul Gluntz Admiral's lanky forward was fouled a few seconds later in attempting a shot. Gluntz made his two charity tosses and Centers' Med. Men had the edge. Freezing the ball effectively, and upsetting the Stars' defense, Kurzkawski, had little trouble making the game's last goal.

NNMC Attracts: India, Portugal, France And Germany,

We won't try to pronounce, but Dr. Vyaghreswarada and Dr. Sant, both from the Grant Medical College, Bombay, India, conducted observations here recently. Their interest centered on aspects of physical medicine and rehabilitation. They were conducted through the physical medicine and Occupational Therapy departments where they observed our rehabilitation procedures.

Dr. Karl Schuchardt, M.D., D.M.D., visited the Naval Dental School upon the invitation of CAPT. L. D. Mitchell, Jr., Commanding Officer of the Dental School. Dr. Schuchardt is a professor and Dean of the Dental School, University of Hamburg, Germany. He is also director of the Kieffer Clinic in Hamburg. He is an unusually able and experienced plastic and maxillo-facial surgeon, and delivered a lecture on these topics to the students of NDS.

Dr. A. Mankarum of Calcutta, India, was specifically interested in the Obstetrical and Gynecological departments. He was shown the operating rooms, Obstetrical and Gynecological services, Tower 18, and the Medical Library. Col. and Mrs. Tomaz Fernandes of Lisbon, Portugal, were here for sight-seeing than for technical information, although Dr. Fernandes was interested in the hospital as a military installation.

MSC, HC Officers Accepted For Commissary Course

Applications of Medical Service Corps officers and/or commissioned Warrant officers of the Hospital Corps are now being accepted for the special course of advanced training in food preparation and service in the U. S. Army Advanced Food Service School, Camp Lee, Petersburg, Virginia. The school convenes in September 1950.

Requests are desired from commissioned Warrant officers HC and Medical Service Corps officers in any rank, but must be received in BuMed (Attn: Code 345) by 15 July 1950 to receive consideration for this class.

The scope of the course of study, which is of 6 months' duration, permits comprehensive technical training in food service, with emphasis on food preparation, nutrition, menu planning, equipment operation and maintenance and supervision of all types of military messes. It is desired that only officers with practical experience in, or those possessing an average theoretical knowledge of and interest in commissary procedures, will request this instruction.

Tomorrow Nite Is The Nite! Step Lively

Fun, music, girls, refreshments, and civvies—what more could you ask? It's all included in the staff dance tomorrow night in the NNMC Gym. By all indications, the dance committee is all out to make it the biggest and best yet. The doors will open at 2030 and festivities will close at 2330.

Howard Williams and his orchestra will supply the music. 'Nuff said in that department.

There will be a buffet supper, which has become a tradition with these gatherings. There also will be a door prize.

An all hands turn out for a night full of color and fun. Remember, tomorrow, February 14, in the gym at the Recreation Building. Doors open at 2030.

B. E. Jennings Gives Lecture To H. S. Student

WOHC Belton E. Jennings, USN, a member of the NSHA Officers' class, gave a lecture entitled "What the National Naval Medical Center Means to Bethesda, and What Bethesda Means to the National Naval Medical Center" on January 25th, to the students of the civil government class of Leland Junior High School in Bethesda.

Mr. Jennings explained the organization and functions of the component commands of the Medical Center and gave the definition of the word, "Bethesda" according to the 5th chapter, 2nd verse, of the Book of St. John in the New Testament, in which it tells of a healing pool near a market place in Jerusalem. The pool was called Bethesda and the sick and lame came to bathe in its waters. In the Hebrew language, Bethesda literally means "five porches." He also pointed out that the Medical Center is often called the Bethesda Naval Hospital.

The lecture showed the relations between the Medical Center and Bethesda, that the Medical Center is an integral part of the community, and how it affects the lives of the people in the community, both socially and economically.

CAPT. Greaves Selected; RADM Now

Congratulations are in order for Captain Frederick C. Greaves, MC, USN, Commanding Officer of the Naval Hospital here who has been selected for promotion to Rear Admiral.

Captain Greaves' appointment will be effective immediately as he fills the vacancy created by RADM F. L. Conklin's retirement last fall.

Admiral Greaves' new assignment is to the Bureau of Medicine and Surgery.

Congratulations are due at another naval hospital. Captain John Q. Owsley, Commanding Officer of the Naval Hospital, Great Lakes, Illinois, was also selected for promotion to Rear Admiral. His appointment will be effective immediately to fill the vacancy created by the retirement Feb 1 of RADM Carlton Andrus, 3rd Naval District Medical Officer.

And in the Dental Corps, two captains were selected for promotion to Rear Admiral: Captain Henry R. Delaney, Deputy Chief, Dental Division, BuMed, and Captain Daniel W. Ryan, Dental Officer, U.S. Naval Academy and Severn River Naval Command.

Corpsmen Complete Rating Exams

The following listings are personnel who passed the last Rating Tests.

From HM2 to HM1: J. Fyffe, W. Phillips, J. Moler, R. Bourgea, R. Kinnan, F. Hamilton.

Barber Grows Green Hair

Green hair will be in style for men this year. At least, those are deductions made from observations of experiments recently conducted in the station barber shop.

M. J. Yonan, SH 1, has a plaster skull which is growing bright green hair. The only difference is that the hair isn't hair at all—it's grass! Yonan says that he will let the hair (oops—grass) grow and he will have a good practice dummy.

The Binding Virtue

By Chaplain H. G. Gatlin

There is one virtue that binds all the rest together. It keeps the personality from coming apart and is essential to one's wholeness. It is the virtue of loyalty. A man may have love and courage and gentleness or any other virtue sometimes even to fanatical extremes, but that does not mean he is liable to have loyalty in the extreme. Loyalty is the most unselfish of our virtues. It is the one which looks out and not in. It is the virtue that most recommends to us a friend. A man may have many faults, make many mistakes, commit many errors but if he be steadfastly loyal to us we do not see what ever other faults he may possess.

And it is strange how completely the knowledge or suspicion of another man's disloyalty kills all his excellencies as far as we are concerned. In vain is he brave or handsome or noble or honest. It is like a woman who is not beautiful unless she is beautiful to us.

"What care I how fair she be
If she be not fair to me"

The recipe for loyalty is very simple. It is to refrain from criticism or unkind words about another in his absence as in his presence. These things have a way of getting about that we do not understand and sooner or later come home to roost.

If we will always bear in mind that the person of whom we speak is present in spirit, we would say nothing about him that we would not want to say in his presence. This is the way to get the reputation for loyalty whether we are loyal or not. Of course the roots of loyalty are in love, a genuine attachment of the affections to another person. When this attachment is unshakeable and cannot be broken and will not be threatened, we call it loyalty. And, since the human heart is thirsty for love, more than for any worldly thing, it relishes most of all the taste of loyalty. For loyalty is the quintessence of love. It is love that abides and cannot be moved. It is love upon which one may lean with assurance. And a person who is not capable of loyalty may well ask himself whether he is capable of love.

Tell Me A Story

The Children of Tower-6 yell with joy when they hear of the Gray Lady's coming to read them stories and poems. The group above is, from left to right: Mary Domler, Valerie Cole, Patricia Dincaid, the Gray Lady, Rodney Curren, Lyric Mondy, Dwain King, and Robert Knowles.

This Red Cross Gray Lady, feels amply rewarded for her weekly service to the children by the children's own expression of thanks. Sometimes she wishes she could be triplets when three different groups of children are clamoring at once for her to read or tell or sing a story.

Every Wednesday afternoon, the Gray Lady is on the Pediatrics Ward with a collection of books of short stories and poems. For children too young to be interested in regular stories, she sings little songs. Some of the older children look forward to her visits because she brings books they can keep for a week and read to themselves.

Many of the children come to this hospital from great distances and

do not have regular visits from their parents and they get special attention from the Gray Lady. Red Cross soon hopes to have another Gray Lady on another weekday to help entertain the sick and lonesome children on the children's ward.

Foreign Visitors

(Continued from page one)

Dr. Pennox, Director of the Paris Cancer Hospital is here in the United States on a fellowship. The visit is sponsored by Dr. Heller, Director, National Cancer Institute, National Institutes of Health. He was interested in the general outline of work on Cancer research and statistics carried on at NMRI.

The Dental Explorer

By Jim Boyce

The new name on top of this column may be somewhat of a surprise to many people, it was here too. I would like to say that I'm very proud to try to match the wit, hard work, intelligence, and conscientiousness that was displayed by Bob Thompson. Good luck to him on his new job.

We have a number of new faces here in the "family of dental." They are: The new Post Graduate School Class—CDR Robert F. Burnett, LCDR Joseph R. Grysbeck, LCDR Odin F. Leberman, LTJG Charles W. Lynds, LT William M. Marking, LT Ingram W. Ogden, LTJG Thomas J. Pape, CDR Alfred L. Raphael, LCDR William S. Rusk, and LCDR Jerome C. Stoopack. Other P.G. officers taking specialized courses are LTJG Blayne A. Gumm (Oral Surgery) and LT Paul H. Wells Jr. (Prosthetics). Then if you were to go to the Dental Repair Department you would find DTC William E. Parker.

Looks like the "Gold" has to make the dental basketball showing, and very efficiently too. A serious bid is being made, right up there by the top.

Say Schwind, what happened to you in the chow line the other day? I thought you were putting on weight lately!

I know that everybody is wishing the best of congratulations to a couple of swell couples, Dr. and Mrs. Lakowski and Mr. and Mrs. DT3 Burkinshaw who recently took nuptial vows.

If you're looking for something that you would enjoy, why not put some of those shower room vocalizations into the new Center Chorus?

Med School Scuttlebut

By Frank A. Adams

Med. School's Fred Astaire, John Giragosian, of Blood Chemistry, seems to be checking the days off until the next staff dance. Maybe after his experience at the last dance, he's looking forward to the jitterbug contest. How about it John?

While on the subject of dancing, what could be the story behind Bill Eliades and Lou Kovarik making their weekly trips to the Don Palini Dancing Studio? Could they be thinking of giving someone competition in the near future?

Arthur De Paemelaere sporting a large smile after returning from making his daily sick call visit. What could be causing all the "JOY"?

Smith, of Pathology, still wondering what the dentist used in removing his first wisdom tooth. Just think of the pleasant future ahead with only 3 others to follow.

Everyone sending best wishes for a speedy recovery to Tiny Schorer, of the Bacteriology lab, following his recent operation.

Welcome aboard is extended to Sterling reporting in from USNH, Portsmouth, Va., and Burkhardt from USNHS, Newport, R. I., for a two-month course of instruction in Blood Bank techniques. Terrell, who for the past few months has been working in Serology, got the assignment from the Staff.

Rumors flying around the 3rd floor are that many of the students in lab class No. 14 are thinking of going to the education office to apply for shorthand courses. Could Chief Spangler be causing it all?

Meet Your Executive Officer

CDR Alvin H. Grunewald Alaska's Top Enthusiast

CDR Alvin H. Grunewald, DC, USN, assumed duties as Executive Officer of the Naval Dental School, the first of the year relieving CAPT. Merritt J. Crawford, DC, USN, who is now on duty at Alameda.

The new Executive Officer graduated from the Marquette University Dental School in 1931, and served as an instructor at that institution prior to entering the Navy Dental Corps in 1935.

During the course of his Navy career he has served on three ships and eight shore stations. At the beginning of the hostilities of World War II, he was at fateful Pearl Harbor, and when the hostilities ended he was District Dental Officer in Alaska.

For the past two years he has been engaged in research on dental materials at the National Bureau of Standards.

CDR Grunewald is a Diplomate of the American Board of Prosthodontics. His affiliations in the dental profession include the chairmanship of the Section on Full Denture Prosthesis of the A.D.A., Fellowship in

the American College of Dental Fellowship in the Academy of Prosthetics, membership in the American Denture Society and the International Association of Dental Research.

CDR Grunewald's interests are not limited entirely to dentistry. He is an ardent hunter and sportsman. He was so favorably impressed with the opportunity to enjoy these sports to the fullest in Alaska, that he continues to be an outstanding press agent for that territory. Anyone receiving orders to Alaska would be remiss in not permitting the command to convince him that he is on the best duty in the navy. CDR and Mrs. Grunewald reside at Northfield Road in Bethesda, their two daughters, Mary Margaret and Ann Louise.

NSHA Notes And Quotes

By Benny Bernard

NSHA, I see by the Daily Sheet, has done it again—this time with the largest amount contributed to the March of Dimes! W. DONE!

Heartiest congratulations are in order for Chief and Mrs. Worsham. They became parents of a BOB, the first to be born to the family of a member of MATI.

And condolences to Chief Jones who is presently on the sick list. (We're wondering if it was the taste of beef slaughter in Commission Class that made him ill!)

Speaking of Commissary Class—guess who, while teaching Food Inspection and Selection, didn't know the gestation period of hogs? (With the aid of a researcher, he was able to tell all about the love life of 'possums!')

And then there was the plain country boy who asked if we knew hogs! (Don't feel badly, friend. It happens every class.)

And then there was the guy who had gall enough to work crossword puzzles in class. What made the instructor call him down was the fact that he was cheating by looking in the back of the crossword puzzle book at the answers!

And we also have the "pun" man who, when asked why he wore his hat in the office replied that he was a Chief and was just trying to keep his wig on. (Clothespins are available at the MAA shack.)

Changing the subject—but fast—did you know that there ain't a C in Montgomery County, Md.?

Applying a stopper to this pourri, I just can't help wondering why we ain't seen Uncle Feller since they hung his picture on the Montgomery County Courthouse wall!!

Laff Awhile

Little Willis: "Mother, do fairy tales always begin with 'Once upon a time'?"

Mother: "No, dear, not always. Sometimes they begin with 'My love, I may be a little late tonight, I have the duty'."

A pinch of salt may be improved by dropping it into a glass of beer.

Woman (telephoning desk clerk): "There's a rat in my room!"

Hotel clerk: "Well—tell him to come down and register."

Sign at a Scottish Golf Course: "Members will refrain from picking up lost balls until they have stopped rolling."

Poet, Lawyer

(Continued from page one)

have been included in the Congressional Record for many years. His first poem attacked "wall street interests," and found him expelled from school for promoting the "spirit of anarchy." Unabated he went forward to become a brilliant lawyer and the originator and founder of the "Coconino Sun," a paper that is a collector's item today.

When asked to recite a poem, he chose "Too Old," a piece written when he was refused entrance into the service for World War II:

"The surge of battle rises everywhere,
From cap and field to office, home and street;
The soldiers' vibrant step, the drums' deep beat,
Stir the blood even as they fill the air.

But who are they that, chafing, stand and wait,
Though speed is victory and men's the need?

Why must they press, while none will pay them heed,
To serve at any cost, in scorn of fate?

Scarred veterans whose valor shone before,
They have stepped forth to take their posts again;

"Too old, too old," they hear in a refrain,
As their steeled honor urges them the more.

Faith with their past, which knew no compromise,
Calls them to fight until their life tide dies."

By Nadine Calhoun

The hearing ear is always found to the speaking tongue" . . . quite often what the tongue says is published.

Chief Stark was deeply engrossed the Post an evening or two ago when she took cognizance of an advertisement recommending a part-time finishing school in D. C. to the Chief. "Well, guess I will go for the school and get finished. It has been rumored that course in P & A offers similar re-

Until the next publication of the taking tongue, Navy Belles, I'll be waiting you.

Personalities About The Center

Wouldn't commit himself . . .

'No Downright Dislikes' Says Thompson HMI

"Don't know any downright dislikes," answered Emery R. Thompson, HMI, USN, who was asked to enumerate his likes and dislikes. He didn't mention the likes, so we will assume that they are those of any twenty-five year old, six foot, one hundred and eighty-five pound sailor (if in doubt: see Naval Customs and Traditions).

"Tommy," as he is called, works in the Medical School Personnel Office. He came here from Great Lakes Naval Training Station in April of last year. He lists his home as Marysville, Ohio.

"Tommy" is a baseball enthusiast, both from the bleachers and on the field. Therefore his admiration for television is in order. He also likes bowling and swimming.

He has had varied duties on both coasts, but enumerates as the most outstanding, Panama, Philippines, USS Bushnell and the USS Sperry. He has attended several schools, namely, Hospital Corps School, Great Lakes, Independent Duty School at Portsmouth, Va., and Submarine School, New London, Conn.

One of his favorite "hang-outs" around the hospital is the Ship's fountain where he likes to indulge in an occasional nip . . . of coffee.

He would not commit himself by saying whether or not he would ship over. The strongest comment we could get was, "probably."

The NNMC

A tower high, majestic and white,
A beacon for all to see,
A symbol of mercy already past,
A promise of what is to be.

Buildings gleaming in the sun-
shine,
Symbolic of God's love;
Night time windows brightly shin-
ing,
Twinkling like the stars above.

Many buildings in the background,
Surrounded by shrubbery and
green lawn;
Tall trees spreading their cool
shadows
With the coming of the dawn.

The above poem was submitted to the NEWS by the Assistant Civilian Guard Supervisor who makes poetry his hobby. Mr. Jones' hope is that his readers may find some measure of enjoyment from his pen.

... things had gone far enough . . .

Tower Barber Clips Much Hair On Long Duty

Probably one of the best known, best liked, most jovial people in Center Command is "Mac" the barbershop technician. Upon seeing him walk down the passageway in his white coat and black sachel, a little boy was heard asking his mother, "Is he a doctor, Mama?" Mac, who really is E. D. McGowan, SH 1, USN, can take a lot of "ribbing" about his nose, but when the men "tabbed" him Rudolph he decided that things had gone too far and he pointed out that Jimmy Durante owed his success to his prominent protrusion. All ended.

Mac was transferred here in March of 1949 from the destroyer 734, USS Purdy. He enlisted away back when most of us were still saying "Mama" (1926).

It would be futile to list all the ships which he has served aboard, but he did mention these: USS California, Arizona, Nevada, Whitney, Chaumont, and Henderson. He has had two tours of shore duty, and they are at Fleet Air, Pearl Harbor and here.

When asked what his favorite sports were he said, "Well, boxing, hockey, baseball and . . ." a twinkle came to his eyes, ". . . and the Red Fox." He has nothing but praise for the Navy, and, as his long service implies, he will soon finish his long enlistment before retirement.

Mac is single and has no immediate plans toward matrimony, but he says that he's still young, and who knows. . .

... pulled a whopper aboard

Kerron Moore, Dental E. M. Likes Navy

Kerron E. Moore, DT 2, USN, is stationed at the Naval Dental School in the Crown and Bridge Department. He was transferred here on March 9, 1949 from N.A.T.T.C., Memphis, Tenn. He enlisted in his home town, Palestine, Texas.

Kerron wears a chest full of ribbons, notably, Asiatic-Pacific, Philippine Liberation, China Service, Good Conduct and American Theatre. He took his "boot" training in San Diego. He has served aboard the USS Saufley, DD 465, and the USS Randolph. He has also been stationed at various shore stations: Com. Chas. 16th Fleet Medical Staff, USNH Houston, Texas, and NAS Pensacola, Florida.

Football is his most loved sport, but he also is interested in hunting and fishing. And that reminds him of the time he pulled a wopper aboard but it was so big that it sunk the boat and. . . On the other hand, and this is no fish story, Kerron enjoys raising rabbits. "You start with two, see, and pretty soon you have so darn many. . . Well, it reminds him of the little poem:

"Rabbits have a funny face,
Their private life is a disgrace.
You'd be surprised
If you but knew
The awful things that rabbits do,
And often, too."

Kerron is 23, easy going and has no known dislikes—at least, none vehement. He is five eleven and weighs one hundred and seventy pounds. He will definitely stay in the Navy.

Did You Know

The only pitcher in modern base ball history to pitch a no-hit, no-run game on opening day, is Bobby Feller. Fireballer Feller is also one of the few pitchers who is credited with more than one no-hitter. Incidentally his two triumphs were by the identical scores of 1-0.

In twenty-six fights for the defense of his world championship title, three of the Brown Bombers' opponents were able to go to the required 15 round distance. Tommy Farr in 1937, Arturo Godoy in 1940 and Jersey Joe Walcott in 1947. In return bouts with two of these opponents Joe eliminated their hopes with his usual polish.

Only eight horses have ever accomplished the remarkable feat of winning the Triple Crown, (Kentucky Derby, Preakness and Belmont stakes). Eddie Arcaro has been upon two of the horses who have accomplished this feat; Whirlaway in 1941, Citation in 1948.

Not Much Research Involved

By J. P. Walsh

Arrivals and Departures.—News comes slowly from Research; the cautious scientific reservation against being previous. It seems safe at this time to announce the following arrivals as definitely here and the following departures as not here, in the month of January.

Carl Hrenilovich, HMC, and Dan Hartlieb, HM2, reported for duty after tours aboard the Mississippi and the Wright respectively. They had previously spent six months as a research team aboard the Duluth collecting and analyzing specimens on an N.M.R.I. dysentery project. Hartlieb married a Philadelphia subdeb last August. He and his pretty blond wife are now members of the Bethesda smart set (Y Cottage division).

Carter, HMC, and Conto, HN, have been assigned to radiation technology. Carter reports from Oak Ridge and Conto reported here after X-ray training at Philly. Conto has with admirable ease adapted himself to X-raying rat's femurs and donkey's jawbones. He will be "at home" in Bethesda this week.

Terrence Melchi, HN, and John McMahon, HN, are traveling the center circuit. Melchi reported from the hospital O.R. to work in experimental surgery on bone graft techniques. McMahon, recently working in the store room at Research, was attached to N.N.M.S., and is on his way to Quantico.

Kennedy, TD3, is ground crew for the Research Airforce; a link trainer repair man, he reported from Norfolk.

Anderson, HMI, and Lindsley, HMC, have been assigned to the Military Sea Transportation Service, Seattle and New York, HDQS Headquarters respectively.

Selmen, HMC, shipped out for Kansas City and the wide wonderful world. Meriweather, HM2, who was assigned to the Rec. Department is now stationed at Indian-head, Md.

The youngest and latest arrival, Sandra James Otto, born to Chief and Mrs. James Otto on 27th January 1950.

"These charming people", please copy.—Come high noon (or low tide) Richard Martin will marry Helen Fraser, not of the automofile Frasers. Future plans undetermined. Martin could give a course on "How to Make Out in D.C." The couple announced their engagement three weeks after his arrival at N.M.R.I.

Now keep your blows above the belt. The first offender will lose that round.

E. J. BELL

It is truly wonderful to observe the rise in competitive spirit, confidence and cocksure aggressiveness which has overcome our varsity basketballers. The newly super-charged Admirals have really been clicking of late. Chalking up points with wanton fervor, they have tripped ten of their last fifteen foes.

ORCHIDS TO: Clyde Schubert, who has tackled his position as, "Bookie," for the Admirals with an enthusiasm which has become infectious. His ardent efforts are indicative of the spirit now prevalent among our varsity members.

Bus Sheary, coach of unbeaten Holy Cross, states, "he has the best team in the country." Who is to disprove his statement. His triple-teaming platoon system has enabled the New Englanders to knock off all competition and from here it looks as though it may continue unabated. It wouldn't surprise me if some day he sends in the bench, after all he throws in everything available.

The Intra-mural cage league is fast drawing to an end and spirited play is being waged for play-off berths which will go to the top four teams in league play. N.P., Dental A's, and N.M.R.I. fives are waging a top-flight campaign for honors, with the Laboratory School quintet following a stride behind. The results of the coming play-offs will be interesting to observe, as all contenders are closely matched and it's anybody's guess as to which team will come out on top.

EAVESDROPPING around the Admiralties bench one evening, Coach Mills was preparing one of his damsels for substitution, giving her these instructions: "Now get in the game there and run that team! And don't forget to watch the bench for Signals."

LOST & FOUND: Found, George Funk has found his missing article, (cleaned out his locker for a change). LOST: George has lost his blinkers which have somewhat more than curtailed his scoring ability. Big George has averaged somewhere near 14 points per game in his last six tilts. One reason among many for the Admirals late successes. Congrats.

CONGRATULATIONS, this time to another George, George Herman Ruth, the great "Bambino," was voted the top baseball player of the past 50 years. I for one will cast a vote that he will always be the greatest ball player regardless of how many half centuries come and go.

Shooting Starlette

Maybe it's because Betty Barley comes from Indiana, or perhaps the nifty net-threading feats this blue eyed lass accomplishes are hereditary. A librarian in the Research Institute, Betty carries a well proportioned 135 lbs. on her 5 foot 6 inches of height and confesses to 21 years of life.

Donning the Blue and White livery of N.N.M.C. Admiralties, Betty opened the season with a bang, scoring 42 points in her first outing. She has continued at a high scoring pace and recently scored 47 points against South Post of Fort Meyer, the present league leaders.

Miss Barley has amassed a total of 211 points in seven league games, for an average of somewhat over 30 per game. This amazing total gives Betty the rather unusual distinction of having scored more points than the opposition has scored against the Admiralties.

Center's Five Swamps Qtrs. "I" Tars, 54-33

Setting a fast pace and combining it with some fancy shooting, Center's Med. Men raced to their fifth league victory. Swamping Quarters "I" to the tune of 54 to 33 gave the Medical Center's crew their second triumph in two meetings with the tars this season.

With Roland and Fast hitting for the Tars, Quarters "I" was able to hold the Admirals to a four point margin during the first period. As the second period opened Tom Brothers hit for two and Prof. Echols, rangy center, pumped in two baskets in succession and from there Center's Admirals counted for a 14 point period while Qtrs. "I" produced only half that margin. Half time score Admirals 27; Quarters 16.

Tom Brothers, snake hipped center forward, collected 25 points and ran away with the top scoring honors. Roland of the tars managed 12 markers for place. Captain Fast of Qtrs. "I" rang up eight points for a losing cause and played excellent defensive ball.

Admirals Pull Out All Stops

Not unlike a herd of rampaging colts, Centers green and white clad Admirals ran wild on the home pastures in a lopsided victory over Georgetown's Foreign Service School; 72 to 24.

Utilizing every available member of the squad throughout the game Centers Admirals maintained a speedy attack, combined with an almost impenetrable defense. Strafing the bucket with uncanny accuracy from all points of the court it was Center all the way.

High Scoring Admirals Romp Over Qtrs. "K"

Rolling along with the greatest of ease the Admirals greatly improved basketekers outplayed and outshot a surprised Quarters "K" squad. In their initial outing against Centers five, Quarters "K" handed the Admirals their worst defeat of the season. It was the same story, with a new twist, Admirals 71, Quarters "K" 43.

On the opening toss-up Quarters "K's" Nugent grabbed the tip-off and drove in for the first score, moments later "K" scored again with a charity toss. To all appearances it looked as though the tars would again set the Center squad on their respective heels. Fighting back, however, Centers Green and White overcame the deficit to hold a first period lead of 14-9.

Playing a tight man to man defense, the Admirals began to roll in the second stanza. Chalking up twenty-four points during the period. Behind the brilliant shot making of Tom Brothers Center emerged at half time with a 17 point lead.

Throughout the game Centers rangy crew dominated the boards and seldom allowed the tars more than one scoring attempt. It was the Medical Men's night as they moved along with clock like precision. Substituting freely in the second half the Admirals rolled to victory with ease. Final score: Center 71, "K" 43.

Rockville Rocks Admirals, 51-45 In Overtime Period

A game Center squad fighting with their backs against the wall from behind in the last minutes of play to knot the count and run the game into an overtime period. This however failed to impress Rockvilles stars as they refused to be denied and went on to win the contest 51-54.

Shooting Stars

Pictured above is J. P. Oddis, freshman forward with the varsity this season. Hailing from the buckeye state, Oddis owns an airy personality, which is high in humor content. He is a great kiddier and receives much the same treatment from his team mates, who have tabbed him, "Waddles," a name which he obtained through his professional like apeing of Donald Duck.

Oddis, who stands 5 foot 10 1/2 inches and packs around a sturdy 170 lbs. has shown no lack of desire and has continually improved throughout the season. His promising signs of improvement has given the Admirals some of the necessary defensive stability which they lacked earlier in the season. While not being particularly adept in the scoring department, Oddis has made up for this with some showings of excellent defensive work. With continual progressive improvement Oddis will prove to be a strong point on any squad.

M. Hqtrs., Wertz—16

With Hathcock, the Stars to ing center, connecting from all gles and playing as though he possessed, Rockville maintained steady pace, increasing their point half time lead to eight points. It was midway in the fourth before the Admirals began cutting their margin.

With six minutes playing Don Polizzi, center forward, came fire, notching three successive baskets to put the Admirals in contention. Tom Brothers was fouled an attempt at scoring and connected with two charity tosses to the game. Rockville's Hathcock ripped the net with a two-point shot at the 35 second mark. Time out as Tom Brothers again connected from the floor to knot count a 45 all.

Taking the tip-off, the stars to score. It was Geauque, the husky guard, who scored the winning points for the home team, troling the ball for the most during the overtime period, stars moved to victory in delif fashion.

Losing Battle For Admirals Quantico, 48-4

Power packed Quantico Marines utilizing liberal substitution throughout the game, dumped Medical Center Admirals 48 to 4 on the losers court. This was Marines second win over the tars Green & White.

Behind the sharp shooting Kieckner, Quantico guard, marines jumped into an early lead and continued to hold this advantage until midway in the second period when Center's hard fighting five tied the count. Half time found the devildogs coasting ahead with an eight point lead.

Two Chaplains Report Here For Training

Two new Chaplains reported to the National Naval Medical Center on 14 February for several weeks of training duty under the direction of the Senior Chaplain. Chaplains Ambrose T. McGinnity and Bradford W. Long are completing a one-month tour of duty and will be assigned to active duty with the Navy or the Marine Corps after leaving here.

Chaplain McGinnity is a native of the state of Indiana and before coming into the Navy was an assistant pastor at the St. Mary's Roman Catholic Church in Michigan City, Indiana.

Chaplain Long is a native of the state of Pennsylvania and is a member of the Philadelphia Conference of the Methodist Church. Before coming into the Navy he was pastor of the Canadensis Methodist Church at Buck Hill Falls, Pennsylvania.

The tour of training duty for these two Chaplains included duty at the Bureau of Naval Personnel, Washington, D.C., the Marine Corps Schools at Quantico, Virginia, the U.S. Naval Receiving Station at Anacostia, the Naval Air Station at Patuxent River, Maryland, the Service and Amphibious Forces of the Atlantic Fleet in Norfolk, Virginia, the Marine Corps Station at Cherry Point, North Carolina, the Marine Corps Recruit Depot at Parris Island, South Carolina and the National Naval Medical Center at Bethesda, Maryland.

Red Cross Gray Ladies Graduate Here

Admiral Willcutts, in his warm message of welcome to the Seventeenth Graduating Class of NNMC Gray Ladies spoke proudly of his associations with Gray Ladies and commended them for their dedicated, unselfish service to sick and wounded; a service he considers one of the finest traditions of the Red Cross.

The graduating ceremonies for the 33 new Gray Ladies were held at 3:00 o'clock Saturday, February 25th, in the auditorium. A group of organ music filled the hall as friends and relatives assembled and as the Gray Ladies in newly earned veils formed a procession down the aisle.

Chaplain Kerrigan opened the ceremony with an invocation. Misses Red Cross Field Director, and the group to Admiral Willcutts. Following his cordial welcome, Admiral Graves, Com-

Pictured above are the newly organized NNMC Singers shown at a recent practice session. The group is under the auspices of the Recreation Department and conducted by Mr. Clyde J. Holt. This is but a nucleus of a large group which is hoped for. Come 'n help!

Know Your VA Benefits To Realize Full Claims

Being on active duty in the Armed Forces is no bar to your receiving certain veterans' benefits. That is, of course, provided you are otherwise qualified.

Three principal veterans' benefits provided by law which are available to active duty Service personnel are National Service Life Insurance, educational and loan provisions of the G. I. Bill of Rights.

RADM Andrus 3rd ND M. O. Retires

RADM Carlton L. Andrus, MC, USN, retired from the naval service on February 1, after more than thirty-two years' active service.

A native of California, he attended the College of the Pacific and Leland Stanford University, where he received his degree of Doctor of Medicine in 1917. He then entered the Naval Reserve Force as a Lieutenant (junior grade) and in 1918 transferred to the regular Navy.

In 1939 he reported to the Bureau of Medicine and Surgery for duty as Chief of the Planning Division and also served as Officer in Charge of the War Plans Division throughout the war period. For exceptionally meritorious services in these duties he was awarded the Legion of Merit.

Admiral Andrus plans to return to California where he will make his home.

Commanding Officer of the Hospital spoke of the continuing need for Gray Lady service to patients and his hope that this class would maintain the admirable tradition of service which the Corps has achieved.

Mrs. Bailey, Chairman of the Corps, administered the Gray Lady pledge of service. Certificates and pins were presented to the new graduates by representatives of the District of Columbia and Montgomery County Red Cross Chapters from whom these volunteers had been recruited. Chaplain Gatlin closed the ceremony with a benediction.

Special emphasis on such benefits are outlined in a recent Armed Forces Talk. The Talk, No. 310—"The V. A. and You," emphasizes benefits available to veterans now on active duty in the Armed Forces and is one of a series of four. Listed as the principal benefits as administered by the Veterans Administration are:

1. National Service Life Insurance (NSLI) and U.S. Government Life Insurance (USGLI).
2. Educational aid.
3. Guarantee of loans for the purchase or construction of homes, farms, or business property.
4. Readjustment allowances for veterans who are employed.
5. Disability compensation.
6. Vocational rehabilitation.
7. Physical examinations, hospital care, and outpatient medical and dental treatment.
8. Domiciliary care and guardianship service.
9. Pensions.
10. Death benefits to survivors.

For purposes of eligibility under the Servicemen's Readjustment Act of 1944 (The GI Bill), World War II service is generally construed to mean service between Sept. 16, 1940 and July 25, 1947. A major exception—provided by the Armed Forces Voluntary Recruitment Act of 1945 (Public Law 190)—provides that personnel who enlisted or re-enlisted between Oct. 6, 1945 and Oct. 5, 1946, may count the entire period of such enlistment as "war service," to qualify for GI Bill benefits.

Service personnel are cautioned, in having dealings with the Veterans Administration, to always provide their full names, "C" (claim) number if one has been supplied, military serial or service number and complete permanent address.

Ambass. Stuart, Patient, Was Jap War Prisoner, Founded Yenching Univ.

Ambassador John Leighton Stuart has been a patient here since the 1st of December, 1949. A few months prior to his admission, he returned to America from Nanking, China, where he maintained headquarters as Ambassador to the Republic of China.

Doctor Stuart, as he is better known to his many friends, was born in Honchow, China, in 1876. At the age of fourteen he came to America to further his education. After completing high school in Mobile, he attended Pantops Academy near Richmond, Virginia, and received his DD degree from the Richmond Theological Seminary. Soon after graduation Doctor Stuart married a young lady he had met while attending school in Louisiana.

For a short period of time there was some debate as to what type of work he should go into. The final decision was to follow his father's footsteps. At the age of

CDR Bigelow Gives Report On Inspection

On February 10, Commander A. F. Bigelow, MSC USN, Executive Assistant to the Inspector General, Medical, presented a lecture entitled "Some Observations Made by the Office of the General Inspector, Medical" to the staff and students of NSHA. Also in attendance were visitors from other commands and activities in this area.

Commander Bigelow gave the lecture in two parts, the first of which concerned staffing of Naval Hospitals. He stated that staffing presents a very serious problem, not only because of fast turnover of personnel, but primarily from misplacement of personnel. To correct this condition, personnel qualifications, job descriptions, and consideration of appropriate ratings should be closely reviewed, he said.

In part two of his lecture, Commander Bigelow presented problems in organization from a Medical Inspection standpoint. He stressed the need by the Medical Department for a "Manual of Standard Procedures" to enable proper administration from organization charts, and pointed out that there is a great need for such charts.

New Director Nurse Corps Selected

Commander Winnie Gibson, Nurse Corps, USN, was selected recently by Secretary of the Navy Francis P. Matthews to the Director of the Navy Nurse Corps. She will succeed Captain Nellie J. DeWitt, NC, USN, who is scheduled for retirement May 1, 1950, upon completion of 30 years' service as a Navy nurse.

Upon assuming her new duties, Commander Gibson, now Chief Nurse at the Naval Hospital, Naval Medical Center, Guam, M.I., will attain the rank of Captain.

Born in Texas, Commander Gibson was graduated from Seton Infirmary, Austin, Texas, in 1923 and

thirty-eight Doctor Stuart returned to China, where he was assigned as (Continued on page 2)

Blandy, Retiring, Lauds Navy Work In Anti-Sub Work

Norfolk, Va. (AFPS) — At change of command ceremonies recently conducted on board the aircraft carrier USS Franklin D. Roosevelt, Admiral W. H. P. Blandy, USN, expressed his gratification in the Navy's progress in anti-submarine warfare.

Admiral Blandy, retiring after 40 years of service, turned over to Admiral William M. Fechteler, USN, command of the U. S. Atlantic Fleet. The retiring Commander-in-Chief, in a pre-ceremony interview, said that the Atlantic Fleet has been working on anti-submarine warfare "for some years, and particularly in the past year we have made great progress."

Editorial

February's gifts to the ages are undoubtedly some of the greatest mer this young nation has produced. Numbering among these are George Washington, Abraham Lincoln, and Thomas Edison.

Washington, "Father of Our Country," directed our infant nation to victory and was the towering figure in our early government. Words alone can hardly express the effect he had on us, rather the mention of his name sets us in awe.

Lincoln, compared somewhat with Washington, was the instrument with which freedom was obtained by many other people. His simple words of wisdom and understanding should serve as an example for all.

The third of our group while not a politician or lawmaker certainly stands with the greatest. Our everyday actions are guided in a great part by this man who gave us electrical lighting, the movies, the phonograph, and other innumerable integral items.

To make a foursome we might add the day that the shortest month gives us, that being St. Valentine's Day. This day commemorates the early Christian martyr of the third century and is set aside for us to affirm our affections.

So remember that while February is the smallest, "great oaks from little acorns grow."

Red Cross Drive Opens Wednesday

Admiral Willcuts formally opens the American National Red Cross annual drive for funds at National Naval Medical Center on March 1st.

Under federal statute and regulations of the Army, the Navy, and the Air Force, the American Red Cross furnishes voluntary aid to the sick and wounded of the armed forces, acts in matters of voluntary relief and as a medium of communication between the people of the United States and their armed forces. This program is carried on through Red Cross Offices attached to military and naval stations such as the Red Cross office here at the hospital and in chapters covering the United States by means of a Home Service program designed to assist servicemen, veterans, and dependents of veterans and servicemen. Civilian Disaster Relief is also a responsibility placed on Red Cross by Congressional Charter.

In recent years a Blood Bank program has been established which will eventually aid every community in the United States.

The National Red Cross participates in the international humanitarian field both in disaster relief and as a member of the League of Red Cross and Red Crescent Societies.

Money to operate this vast program of voluntary services is obtained by annual solicitation of funds in a drive conducted during the month of March. By giving to Red Cross, you become a member of the organization and have a voice in its management.

"Y" Cottage Capers

Spring comes early at the Cottage! If you don't believe it you should have been around when we refinished all the furniture. Such chaos! Sweeney had a hard time dividing himself between decorating for the Navy dance and refinishing furniture for the Cottage. Spring housecleaning continues with M. J. Lindblad making new slip covers and drapes, and finally a new paint job.

Sorry to see the two Dicks leave—Dick Zachardy who left Navy and the Navy for Ohio and school, and Dick Huffman who was transferred southward. On the other hand we are glad to welcome Jean Smith from California.

The Valentine Dance at the Bethesda Chevy Chase Rec Center Saturday night was fun. Jack Slothower deserves credit for a good selection of records and Alice Seiler gets the laurels for decorations. Tony Mar claims a good chunk of the work. There'll be a St. Patrick's dance March 11. Hope you can come.

The up and down department—Jimmy Meeker is back wrapped like a Christmas bundle, only not so festive—but we're sorry to say Glen Lannier can be found hobbling around 5C.

Sweeney is advertising "all you can eat, drink, and carry home" occasion being a benefit waffle supper Saturday, February 25 from 9:00 to the Cottage. We think that's a good offer for 75c. Any profits to the "Y" Cottage Club to pay for that free cup of coffee that is always brewing in the kitchen.

Hope you didn't miss the Holiday dance at Rock Creek Shelter. Stretton's orchestra played from 9-12, refreshments were served during intermission, and everyone enjoyed themselves.

Perhaps you're new to D. C.—or a native which automatically means you've seen less—in either case we invite you to join us Sunday afternoon, February 26 at 1:00p.m. to visit one of the D. C. museums. Last month we saw the Vienna exhibit before it left for New York. There those who want to see the medical exhibits at the Smithsonian but if there will be another group going elsewhere as well. Join us.

AMBASSADOR

(Continued from page one)

Missionary to the Presbyterian Mission in Honchow.

For eleven years he was Professor of Greek and Latin at Nanking Theological Seminary. He spoke Chinese fluently and was well acquainted with the Chinese of every walk of life.

Then came the election as president of a combined university in North China, named Yenching (the old name for Peking) University. He became the founder of Yenching, established in 1919, which University is still going strongly today; is comparable to our Yale or Harvard.

Doctor Stuart remained at Yenching (Peking) until December 1941. During World War II, he was incarcerated by the Japanese and confined in a Peking court yard for three years and eight months. Mr. Cordell Hull, then Secretary of State, sent strong protests to the Japanese authorities asking for the release of Doctor Stuart. Not until the surrender of Japan in 1945, was he allowed his freedom. During those years of confinement he was not treated badly. Reading privileges were extended to non-political books (mostly novels), he was fairly well fed and quartered, but was constantly under guard. It was later learned that the Japanese had hoped to eventually employ Doctor Stuart's services as a mediator between them and Generalissimo Chiang Kai-shek.

After release, he went immediately to the capitol, Chungking, where he visited the Generalissimo. Then a trip to America followed in November, 1945. He returned to China in April, 1946, and was appointed as advisor to General George C. Marshall for approximately two months.

With Ambassador Stuart here in the hospital is his assistant and secretary, Mr. Peter Fugh.

From America to China, Doctor Stuart has friends harbored in every port and city he has visited. Since his admission to this hospital, he has received many calls and letters from friends for miles distant, including five long distance calls from a doctor friend in Ohio.

Many will be pleased to know that he has been removed from the serious list. It may be a while before physical strength is regained to the extent where he may carry on with duties and responsibilities so faithfully demonstrated for his country.

Crew's Library

"Wooden Horse" Book With Chills, Thrills, Humor

Whether your taste runs from fact to fiction, science to fantasy, the serious or the silly, you will find Crew's Library ready to serve and more than anxious to satisfy your whims.

Here is a sampling of the books received this month:

WOODEN HORSE by William Under cover of a wooden valise, three prisoners of war dig a tunnel under the wires of a German Prison camp and make their way back to England. The apparently true tale is told in a traditional style with bits of humor to relieve the tension.

SWIFTWATER by Annixter. Through the eyes of Cam Callaway and his son Bucky, the last trappers in a backwoods village in Maine, we see the wild life of the wilderness and rejoice in their sources in establishing a sanctuary for wild geese.

MY OLD MAN'S BADGE by F. J. Ley is as good as a cops and robbers game; a rough, fast, exciting story of a young policeman's attempt to find the man who had murdered his father some years before.

DECORATING THE SMALL APARTMENT by Ogg; suggestions for making one room apartments attractive and convenient. While there are expensive ideas for those who can afford them, most of the details can be carried out with a reasonable amount of skill in handicraft and a small expenditure.

NEW DIRECTOR

(Continued from page one)

was commissioned an ensign in the Navy Nurse Corps in 1918. During her Navy career Commander Gibson has had graduate study at the University of Pennsylvania School of Nursing and had duty assignments at several Naval Hospitals, a hospital ship, a Marine barracks and the Bureau of Medicine and Surgery.

Captain DeWitt has been head of the Navy Nurse Corps since April 1, 1946. She entered the Corps during World War I, and after a two year period of inactive status was reappointed to active duty in 1919.

This picture is printed by request of the Photo-Lab. They have been asked many times for a picture of the Center. Send one home fellows.

The Hospital Social Worker and Curtis Manning, PRAN, rejoice together in good news. Many patients have found it useful to consider with a social worker complications in their personal affairs. During 1949, 2,579, or one out of every six patients admitted to this hospital used major social services and in addition, 2,808 minor services were used. These figures do not include the able-bodied staff men of all Commands of the Center who also use Red Cross.

When a serviceman or veterans problem involves the family at home they may decide to enlist the help of the Red Cross Worker in the Chapter who can consult with the family about what Red Cross services they can use. Here the Home Service Worker visits a family near the Hospital.

Red Cross Helps Personnel In All Fields

The Red Cross Unit at NNM is responsible for social services for all Commands and for recreation services for the Hospital Command. Individual Red Cross social services are made available through six specially trained graduate social workers. They are part of a team of doctor-nurse-patient-and-Red Cross workers reaching for a common goal of maximum benefit to the patient of available resources useful in his particular situation.

The major services provided are: information and communications; consultation around personal and family problems; referral services to other Red Cross offices and community agencies; financial assistance; assistance in applying for government benefits. Workers interview bed patients on the wards and see relatives, ambulatory patients or staff personnel in their offices. To carry out some of the services they cooperate closely with

Red Cross Chapters throughout the nation and with American Red Cross offices overseas.

The recreation department provides a medically approved program which includes a variety of activities. A few are pictured on this page. There are also ward movies and special parties and supplies for games, playing cards, classical and popular music, and instruments available to patients. Through the participation of community organ-

izations and the Red Cross chapters it is possible to add volunteer entertainers, dramatic club presentations, hostess groups for ward entertainment and trips to sports events, concerts, plays, and private parties for ambulatory patients. The department plans with the Hospital Command seasonal activities, such as the Christmas program, and channels the gifts and donations of the community to hospitalized servicemen.

Red Cross volunteers who serve

the hospital directly include Gray Ladies, Motor Corps, and Production Service (which makes an average of 8,000 surgical dressings a week. Gray Ladies recruited from the local chapters have contributed throughout the year a monthly average of 1166 hours of service. These ladies have provided in addition to services pictured, assistance with recreation, letter writing, package wrapping, bandage making, and guiding newly arrived visitors.

Gray Ladies in the Navy Exchange are being helped to fill the shopping orders they collected from bed patients.

This Gray Lady and Davis, Ramond I., FC2, Danville, Illinois, have found a magazine that seems just what he wants. The Library Cart goes to the wards every Monday and Friday.

This big craft cart rolls on the wards three times a week. Patients secure material and instructions on how to make some of the articles that are being examined by Fountain. Harry, SN, Baltimore, Md.; Hutching, Erman, SN, Orlando, Fla.; Alford, Howard, FN, Columbus, Ga.; Gaskins, Floyd, EN, Washington, D. C.; Brown, Glenville F., VAP, Washington, D. C.; De La Vies, Robert O., Pfc., Washington, D. C.

It's party time on Ward 3A. The hostesses assisting the Red Cross recreation worker at this party are from National Catholic Charities.

Patients about to load into the Montgomery County Motor Corps bus enroute to a game. Volunteer drivers gave this hospital a monthly average of 131 hours of service in 1949.

Visiting relatives of patients are getting information about nearby rooms and, while a patient secures a birthday card and paper to wrap a gift, another Gray Lady takes that proverbial stitch in time for some hard-working Chief whose insignia was loose.

Dental Chief To Head Dental School

Rear Admiral Clemens V. Rault, DC, USN, Assistant Chief of the Bureau of Medicine and Surgery (Dentistry) and Chief of Dental Division, will retire from the Navy on July 1, 1950. Upon retirement he will become the Dean of the Georgetown University School of Dentistry.

Admiral Rault, who is a native of New Orleans, Louisiana, received his undergraduate degree from Spring Hill College, Mobile, Alabama, and was graduated from Loyola University School of Dentistry, New Orleans, in 1918. He entered the Navy the same year and served as dental officer aboard the cruisers Pittsburgh and Houston, the hospital ship Relief and the battleship Maryland. He also accompanied the Marine Corps Expeditionary Forces to Haiti in 1919 and to China in 1929.

Ashore Admiral Rault has had duty at New York, Philadelphia, BuMed, the Staff of the Commandant, 3rd Naval District, and just prior to his present position he was Commanding Officer of the Naval Dental School.

The degree of Master of Science in Dentistry was received by the Admiral from Northwestern University in 1937 and other post-graduate work includes Columbia, New York University, Washington University, the Pasteur Institute in Paris and the Mayo Clinic, Rochester, Minnesota.

Announcement of the appointment came shortly after his return to Washington from attending the Sixth Congress on Dental Education and Licensure in Chicago as the United States Navy representative.

Lab 13 News Clips

By Glin Winston

Quite a few of the fellows are preparing for a long trip or they like the scenery in dental surgery. They all seem to be frequenting the place, especially West. For a while we all thought that West was a dental technician.

Our successors are really burning the night light. Those pathology students are getting in most of the time. They can be seen any time of the night working away on slides. Chief Spangler really knows how to get the work out of his boys. To prove that point take a look at Walker's fingers. That kid really did work his to the bone. This class really took a fancy to this station or was it the immediate surroundings that motivated their choice of duty stations. It seems that most of the class wants to stay here. This is a far cry from their general opinion six months ago. I wonder what happened to change so many minds so soon?

In true observance of St. Valentine's day everyone that attended the dance held in the Recreation building seemed to have a nice time. This is said to be by some, the best dance that can be remembered around the place, an orchid for the recreation department.

Did you happen to hear the fiery oratory of Hicks lately? He seems to be drawing the crowds. I don't know what he is driving at but he has the followers.

Urgently Needed: Someone to play and teach the true art of electric guitar playing. Attentive students, grateful crew. Apply in Dorm "C".

Personalities About The Center

LTJG Blanchard Specializing In Otolaryngology

LTJG Arthur J. Blanchard, MC, USN, is one of the youngest looking doctors at the Naval Hospital. He is presently working at the ENT department.

Although born in Toronto, Canada, he has spent most of his life south of the border in Toledo, Ohio. He entered the Navy as an enlisted man in October 1942. In 1944 he entered Medical School as a V-12 student from Samson Naval Hospital.

After graduating for the University of Toledo he continued his studies at Loyola University School of Medicine, Chicago, Illinois, and received his MD degree there in January 1947.

Dr. Blanchard interned for sixteen months at St. Vincents Hospital, Toledo, before a summer of general practice there. In the fall of 1948 he re-entered the Navy for a two year residency in otolaryngology here at Bethesda.

Dr. Blanchard is married and has two children aged one and three and a half. They are both girls.

We Look In The Book Of The Past

February of '45 saw the School of Hospital Administration extend its course for officers to eight months, a drawing of the proposed Recreation Building, which was to cost \$600,000, appeared in NEWS. The personnel of the Center contributed \$2870 to the Navy Relief and the Commanding Officer of the Center, Rear Admiral William Chambers was awarded the Distinguished Service Medal. The citation read in part, the Admiral "distinguished himself as a forceful leader and was largely responsible for the success of the Medical Department's program in this theater of war (Pacific area)".

Another year passed and the Recreation Building had its dedication with a staff dance. Vice Admiral Ross T. McIntyre, MC, USN, Surgeon General of the Navy, and his wife were present at the ceremonies. Mrs. McIntyre was pictured in the NEWS as the first bowler of NNMC. February of '46 also saw ten Dental Officers start a refresher course at the Naval Dental School. Eight of these officers were former prisoners of war that had been held in the Pacific Area.

In February of '47 Captain Robert P. Parsons, MC, USN, was attached to the Naval Medical School as Commanding Officer. Rear Admiral C. A. Swanson, MC, USN, Surgeon General of the Navy and (Continued on Page 6)

"Nice To Be Remembered", Says Mrs. Fritz

There is a lot of humor and good will everywhere. But sometimes there is an overpowering mass settled in some one spot. So is the case with the petite Mrs. Ruth F. Fritz. Have you ever felt that certain people radiate good cheer? Walk into the Ship's Store sometime and you will see for yourself.

Mrs. Fritz originates from Terre Haute (French, high terrain) Indiana (English, Indian-Anna). There is a tale of intrigue in her transposition in this fair state. Some five years ago, she decided to visit Lt. L. E. Boston and his wife who were stationed here. One day she came to the hospital to visit a patient. While here she met LT. Shepard, then in charge of Ship Service Store. They needed help. She never went back to Indiana.

Mrs. Fritz is a widow. Her son, Chas. W. Fritz, HMI, is a student at NSHA.

"It is nice to be remembered," says Mrs. Fritz. She hears from many acquaintances that were here but are now in all parts of the world. She is particularly enthusiastic about helping people select appropriate gifts.

Among her varied social functions, she has served as a hostess at all the staff dances for the past year. She is always ready to smile for she maintains that grief comes easily, but happiness must be created.

Parker Not Corny As Kansas But From There

Reporting from Oceanside, California, W. I. Parker, HM3 of the Naval Medical School has been here since 10 October 1948. Although he likes the east coast, California holds an unmentioned (by him) fascination.

Time: November 1947. Place: home state, Kansas. "I do solemnly swear or affirm that I will bear true faith. . . ." And in Kansas there's a little spot called Salina that he has called home for the past nineteen years.

Although he has never been aboard ship for duty, Parker has served overseas at the Naval Hospital, Balboa, Panama. On the other hand he has had stateside duty at San Diego for Corps School and with the FMF at Camp Pendleton.

Somewhere in the annals of Washington High School in Salina is the jewel of two years, sweatin', gruntin', and buckin' on the varsity football team. But he asserts that he DID study also.

At the present time he is working in the Board Room at NMS. His duties there include giving and recording physicals.

In August of this year he will venture forth into the world at large and once more undertake the grinding schoolroom curricula. Although he is definitely going back to school, he is uncertain of what specialty to mark as his goal.

Fashion's Trend Uncovered

Here are some examples of "California exposure"—from bathing suit styles of 1915 through 1950. There's not much doubt there have been some changes made according to these styles displayed recently at Long Beach, Calif. Left to right are Bonnie Farmer, dolled up in a modest 1915 suit; Bonnie Pickett dressed in a suit of 1910; Gene Harding wearing a 1925 charmer, while Evelyn Webster and Jo Galliher are both decked out in the 1950 variety. Jo's suit seems a little skimpier than the earlier models. In brief, it's really modern—and brief!

The Dental Explorer

By JIM BOYCE

A large crowd of spectators on hand to watch the tooth doctor and the NMRI basketball team clash in a very hard and fast counter. The doctors came out the winning end to the tune of 20.

Up and down the floor—not could get near the baskets till last moment of the first quarter. Then Willie Kline came through Dental with a score from the of the court. From there the on and third quarters saw score sheet running a little smoother. Stoopack, Kline, and "N bers" Ogden seemed to take the floor. NMRI made a very showing all through the game their excellent shots and blocks but in vain, for the last quarter found Ready, Samuels, Copp, Kaires, and Laskowski wrapping the final points. Speaking blocking. "Coach" can tell how!

Two more Naval Dental School doctors have received the honor being elected to the national important American Board Prosthetics. They are CDRs O terling and Frechette.

Since the evening of February 14, a well known person of staff has undergone a great change. Slowed down to a walk, instead of a run, talks with some sense of son, has a dry brow, and a more things. Why? The Mos family has a new addition. L 8 pound 9 ounce Shelly Kerr. Congrats from all. Some of comments that were made from DT3 Andy Farrington "how that it doesn't like to butt heads. DN Jack Gonsalves thinks he seen them a lot smaller, DTC Hovey remarked, "She didn't get from P & A!", and CDR Wohlfar said, "Crown and Bridge always does things in a big way."

Bethesda Letter Praises Music From Tower

The Chaplain
National Naval Medical Center
Bethesda, Maryland
Reverend Sir,

Ever since last fall, when we first heard the boys' beautiful voices coming out of the tower, I have intended to write to you and express our great pleasure and appreciation.

The first day they sang, some of my Bethesda neighbors and I were standing outdoors talking. Hushed silence fell over our group as they began to sing, and we suddenly felt transformed. The rich beauty and power of those voices coupled with the clearness of the words truly inspired us.

In the driveway next door to boys were polishing their car. They stopped until the music was gone, then resumed their polishing while listening "I Would Be True."

One neighbor remarked: "We ought to let them know what a divine thrill they gave us." Where upon we all agreed that we would telephone or write our feelings and gratitude, but like most humans we too are guilty of procrastination.

I came into the house with that happy, floating-on-air feeling, ate a little lunch, then wrote to my daughter in a North Carolina college, trying to describe the magnetic incense of song that rose from the tower. Next I wrote to my

One MO, Two POs Honored By Boards

Commander Benjamin W. Oes-
burg, DC, USN, and Commander
Arthur R. Frechette, DC, USN, re-
cently have been certified by the
American Board of Prosthodontics.
Both dental officers were commis-
sioned in the Naval Dental Corps
March 3, 1936. Commander
Oesburg, a native of Le Grande,
Oregon, attended North Pacific
College, Portland, Oregon and
Commander Frechette, who main-
tains official residence in North
Hollywood, California, attended the
University of Southern California,
Los Angeles, California.
Captain F. P. Krueze, MC, USN,
was recently certified by the Amer-
ican Board of Orthopedic Surgery.
A native of Michigan, the Captain
received his schooling at Marquette
and Northwestern and was commis-
sioned soon afterwards. He has
been at the Naval Hospital since
last year and now makes his
home in Chevy Chase.

NMS Chief Given Navy Commendation

James T. Hutchisson, HMC, re-
cently was awarded the Navy Unit
Commendation for duty aboard the
USS Crescent City.
RADM M. D. Willcutts, MC,
Commanding Officer NNMC, read
with congratulations the citation
which follows:
"The Secretary of the Navy has
awarded the USS Crescent City the
Navy Unit Commendation for ex-

ceptionally meritorious service in
action against enemy Japanese air-
craft, submarines and mines in the
South Pacific Campaign during the
following operations:
The Guadalcanal Landings, The
Landing off Malaita, The Bougain-
ville Landings, the landing at
Leyte, the Occupation of Southern
Philippines, the landing at Leyte, the
Marianas Operation.

By virtue of your service in the
USS Crescent City during one or
more of the periods cited, you are
authorized to wear as part
of your uniform the appropriate
Navy Unit Commendation insig-

Unit: "Rita, will you come back
Right now I'm trying to
figure out my income tax."
Rita: "That's just what I wanted
to see you about—there's some-
thing wrong with my form."
Unit: "Just keep your coat but-
toned, and nobody'll notice it."

Major Anthony Caputo receives the Commandant's trophy and the permanent PRNC trophy was presented to the captain of Quantico's team following the basketball championship playoff here recently. CDR F. E. Frates presented the trophies in behalf of the Commandant PRNC. Photos by R. P. Matvey, MCS, Photo Service.

New Machine Would Make Early Birds Even Earlier

By John T. Ryan

Yes, you, being human like the rest of us really need a Jeczshnykpt machine. You will fully agree with this by the time you finish reading this article.

To begin with, it is a device which has not been invented and probably never will. I shall endeavor to describe its inimitable functions and advantages.

Upon arising in the morning, or in the middle of the night as some of my comrades have put it, I feel like something a horse just kicked and trod upon. My eyes are bleary, my mouth is stale and I just "don wanna get up."

Now, a wonderful way to overcome this feeling of rigor mortis is to awaken with the assistance of a jeczshnykpt machine. An initial description of the contraption would be: an alarm clock designed by Rube Goldberg. Anyway it consists of many unnecessary gadgets which are absolutely necessary.

As has been happening for many, many years the rooster arises at the crack of dawn, does a strut and crows. In the jeczshnykpt machine a rooster is housed in a little box, which is situated on the end of a plank and also balanced on the plank with a bucket of water.

When the rooster arises in the morn to do his stuff, he leaves his chambers and thus upsets the bucket which in turn pours a torrent of cold water upon a sleeping dog. The dog, quickly aroused by stimulation, jumps up and his head strikes a sort of teeter-totter set up.

On the other end of the teeter-totter is a hand holding a match. The hand is sent in a downward motion by the dog's action on the teeter and the match skims along a rough surface.

By the time flame is produced the match has reached a pile of gasoline-soaked kindling wood under the bed. The resulting fire produced is a great aid in making the victim feel ready to go in the morning and also causes him to scream.

The scream, naturally, causes his mouth to open and ready him for further treatment.

When the dog set the teeter in motion he also turned a switch which, put in motion an electrically powered conveyor belt above the bed. The belt carries three cups which contain liquor antiseptic, coffee, and a short snort respectively.

These are dumped with ease into the victim's mouth as the belt moves. His mouth is already open from the scream. Of course the cups are retained by the belt. We can't knock his teeth out too!

Now, after all this procedure has been done the victim will not want to arise in a happy state and who could after all that business. So, connected to the rear pulley of the conveyor belt is a system of rods which lead to a feather on the end. You guessed it. The feather tickles his feet and makes him happy.

Last but not least is a line with a hook on it ready to pull off the poor soul's blanket so as to give him full access to the morning air.

Now, honestly, can you think of a better way to get out of bed in the morning? No? Well, neither can I. That is why I think you should have a jeczshnykpt machine.

Power Laden Marines Show All Navy Form

In the final game of tournament play for the PRNC Basketball Championship and the right to represent this district in the Intersectional Playoffs, Quanticos power packed devildogs walloped Patuxent Rivers' quintet 59-37, before a gathering of some 300 roaring spectators.

Not Much Research Involved

By J. P. Walsh

A supplement to the Holiday Magazine, Washington Profile, covering people and place off the beaten track. Faces seen in places, the boatswains in Benneys, the seamen in Kit-Mars (Halsey and Ginger, McBurney and his lady fair) Corpsmen at CasaBlanca, the Bureaucrats at Captain's Tom, NSHA at Bassins (Would you send a cab for MR.—) and the doggy set at the Whippet and Red Fox. When dining its the Galley (with cold slaw please) or the Hot Shoppe (light on the mayonnaise).

Sunday night the few who know gather at the little white cottage on Wisconsin (Southern fried with lemon meringue) and move after hours to the Zephyr where Sweeney presides. The jokes are double-entendre and the guests from the International Set, Louviere, our Lucius Beebe, Howard and McGinnis. So much for Cafe Society.

The evening round table on general topics, Bkrs. 142, is for the unlettered intelligensia and has for the future, lectures by Deal, on the History of Cards and Craps As Played Pre-Fire Age, Van Blois on Rum, Demon and Coke Solvent, Runkel on the South Pacific in Slides and Songs, Holderman on Monuments and Marble, An Unguided Tour of Gettysburg, and Arnot on Early Cuban Dental Practices. These little culture sessions are well attended.

Clicks with a cause. The literati set go to night school for discussion groups on Science Fiction and the more technical comic books. Students of note and weight, Durant, Pierce, Walters and Cameron. The circle of light diminishes with each B.S., you can't talk neutrons with morons.

The conservative hop group follows the dance, Keim, Devenney and Johnson who are planning a remake of On The Town, with dances by Mr. Murray.

The air-borne division, Teter, Kurnyta and fledgling Hardy speak an esoteric C.A.P. jargon and wear twenty missions flat hats. They fly out of Congressional air port and, land we hope!

These social sets are strict and by invitation only (the invitation can be, an old quiz on biology, a speeding ticket, a reject slip from the Reader's Digest or a nickel for the coke machine). They shy from publicity and rarely appear shaking the Veep's hand or as Drucies' bridesmaid, but obscurity is often the price of exclusiveness. How Holiday missed them we can't say but we have tried to remedy the oversight and point out the existence of traditions and societies which are the backbone of capitol life.

With their eyes set toward the all Navy Final, Quanticos Marines set about their business in a masterful fashion and with comparative ease swept pass the Patuxent Airmen in a breeze.

Counting first from the court, the Marine Corps Schools five assumed command of the game and never once relinquished it. By half time the Airmen found themselves on the short end of a 32 to 19 count.

Opening the second half with the same brand of artful and deliberate play, the Marines continued to increase their lead and when the final curtain fell Quantico had marched off with the Championship.

Waldrop, Quanticos All Navy Center, captured the scoring honors for the evening straffing the nets for 17 points, while St. Clair, the Airmens crack forward aided a losing cause with 13 markers.

Commander F. E. Frates presented the Championship and Runner-up Trophies to the two squads. Commenting on the spirit and traditional sportsmanship of Navy competition. Commander Frates lauded the spirit of fairplay and show of sportsmanship which predominated this years playoffs.

NSHA Notes And Quotes

By Charles Bernard

Whenever there's a drive for funds to support a worthy cause, such as March of Dimes, Red Cross, Navy Relief, and Community Chest, to name a few, the students of NSHA never hesitate to contribute. Recently, ye scribe had the poignant and fertile idea of passing the collection plate, in class of course, and it came up with the sum of \$17.81—for th benefit of the Arthritis and Rheumatism Foundation. Not much of a collection, it's true, but if enough people contribute, the goal will be reached. In the very near future, HMC Conrad, NSHA's librarian, will ask help in the Heart Campaign.

We've noticed several eulogies on the hospital, lately. Ever notice the triptych in building 2? The Center is a concrete example of the story which the triptych conveys. What better eulogy?

We are still waiting for the final averages made by MAT-2 and Officers' classes in the Commercial Correspondence examinations, but to judge from the marks already recorded, the majority have been enviable ones.

On February 16, District Fire Marshall A. H. Benson, from PRNC, gave a lecture to the Officers' class on fire prevention and fire protection. He pointed out that most of us are less aware of the great amount of damage done by fire because the damage is to properties surrounding us that do not represent our own investments. He also stressed that there are three things necessary for a fire—1) heat (ignition temperature), 2) combustible material, and 3) oxygen. Remove any one of the three, and there'll be no fire. It's as simple as that!

Dental A's Take Research For Champ Title

Dental A's Receive Trophy For Intramural Championship; Research Runner-up Team

At a regular meeting of the Commanding Officers of the Center the Board Room, Rear Admiral M. D. Willcuts, MC, USN, presented champion and runner-up teams of the Intramural Basketball Leagues.

Naiman-Photo Turns Back Admirals

N.N.M.C. Admirals dropped a 58 to 66 decision to Naiman-Photo service five to continue a string of three losses in succession. Playing without the services of their ace scorers Tom Brothers and Big Prof. Echols, Centers quintet lacked a bit of their old fight.

Vacating the hardwood with a 32 to 25 midway lead, Center's cagers returned to the court and were unable to stand off Naiman's strong second half bid for victory. Crafty Naiman Forward, Livinton connected for 18 of his 26 points in the last half to lead the D. C. boys to their win.

D. C. Champs Edge Admirals

Safford-Chandler's District champs of last season edged the Medical Center Admirals in a closely played game on the losers court. The Down-town boys found the going a bit tough in squeezing out their victory via the free throw route. Counting for twenty three goals from the court and dumping in sixteen charity tosses, two of which spelled the difference, gave the District five another scalp to add to their long string of victories.

Holding a 31-20 half time lead and seemingly bound for an easy decision, the D. C. five soon found the Med. Men knocking on the door. Behind the shot-making of Big George Funk, the Center five knotted the score at 43 all midway in the final frame and it was a nip and tuck battle down to the final whistle. Final count was 62-60.

Lights Out Gas And Light Doused, 58-36

Placing the black-out blinds around the Washington Gas & Light quintet's buckets, Center's five rolled to a 58 to 36 victory with the greatest of ease.

Unable to count from the court with any consistency W. G. & L. fell by the way-side in the second half as the Admirals increased their eight point half time lead to twenty-two point at game's end.

Overcoming a 3 point first quarter lead, the center five behind Prof. Echols and G. Funk rolled to an eight point lead by half time. Catching fire in the last two stanzas and playing deliberate ball, the Center defense stiffened allowing the Gas & Light five to count for only 7 baskets and a single free throw for the final two periods.

VA Plans 1st Step To Stop Schooling Program For Vets

Washington (AFPS) — The Veterans Administration has announced that the six-year job of shutting down the Veterans' training and education program is about to begin.

That part of the GI Bill expires in 1956. Veterans Administrator Carl R. Gray, Jr., has informed Congress that a regulation to be published April 1 will state that, with certain exceptions, veterans may not enter training programs after July 25, 1951.

Furthermore, after that date veterans may change for the most cogent reasons.

The 1951 deadline will not effect the 11 million veterans who enlisted or re-enlisted under the Armed Forces Recruitment Acts of 1945 and 1946, and those veterans who have been discharged since July 25, 1947, or who are still in Service.

Race For Lead Duckpin Loop Hot And Furious

With the onrushing Battlewagon team making a strong bid for top place in the N.N.M.C. Duckpin Loop it is increasingly more difficult for the Tugs, present leaders, to maintain a leading margin. With one game spelling the difference between them and their arch rivals, contention is hot.

The rise of the second place Battlewagons is somewhat phenomenal. A week before the second round of play commenced they were in last place. In just less than 3 months they have fought their way to within striking distance of the league leaders and are now knocking on the back door.

The old fireballer, Fireman Kirby is as usual maintaining top honors in practically all individual departments of league play. At present his average of 113 leads all league competition.

Miss Owens has lost little or no prestige since the last posting of league activity. Her average is still tops among the fairer set, and as yet no lass has bettered her High Set of 356 for three games.

PRNC Announces Photography Contest

The Potomac River Naval Command will conduct a photographic contest on 3 May 1950 at the U. S. Naval Gun Factory, Washington. All entries must reach the Commandant prior to 26 April 1950.

For purposes of the Commandant's Trophy Competition, a full entry will be ten photographs, two from each of the four categories, service life—on duty and at leisure, landscapes and architectures, peoples and customs, and general pictorial, and the remaining two optional. Color is considered an optional category.

All entries must be forwarded through the Recreation Officer, along with the entry blanks required in BuPers CircLtr 205-49.

There will be no rewards for this contest but fifty photographs from each category will be sent to the Chief of Naval Personnel for the Interservice Photography Contest to be held later in May also in Washington.

Further details may be obtained from BuPersCircLtr 205-49 and the Recreation Officer, Ext. 672.

Center Nipped 57 To 55 By Cortez-Peters

The all colored quintet of Cortez Peters from D. C. squeezed by the Centers varsity in a hard fought tussle played on the Center court. The flashy negro squad displayed some nifty ball-handling but were unable to show a good percentage for their shooting and barely edged the Admirals.

Playing with a considerable loss of height, with Big George Funk and Prof. Echols away, the Center five lacked rebounding strength around the boards which proved damaging, but managed to outscore the Negro squad from the floor.

Towering J. Watson, hook-shooting Forward for the winners, dominated the scoring for both squads pumping in 17 markers. Big guns for the Center five were Don Polizzi and J. Bell.

NEWS REVIEW

(Continued from page 4)

dressed the second postwar Refresher Course for Medical Officers. The Admiral dealt with the advantages that the Navy offers its Medical Officers and emphasized the recently inaugurated residency training program leading to the various boards.

The NEWS was discontinued the last of March 1947 so February 1948 slips by unmentioned.

The second month of 1949 saw the Sanchez-Perez serigraph and automatically controlled serial roentgenograph donated to the Navy. The instrument is used to outline brain tumors and represents 15 years of work by our South American neighbors. Dr. Sanchez-Perez made the presentation and afterward illustrated its effectiveness by performing two operations.

Now here is the last of February 1950. Wonder what will be written next year about this month?

Captain L. D. Mitchell, USN, accepted the winner's trophy for the champion Dental Officers Team which won over the Medical Research Institute in final game of the season.

The roster of the team follows: CDRs F. E. Frates, W. D. J. ack, LTs I. W. Ogden, J. C. S. and LTJGs L. V. Ready, A. Copping, W. R. Kline, E. S. kowski, W. E. Dilts, H. S. Sar.

LT I. V. King, MSC, USN, administrative Assistant, NMRI, received the runner-up trophy, behalf of the second place quintet. Their team consisted of: Dr. rill E. Hill, Dr. Manuel F. les, MSC, USNR, ENS Louis Cecchini, MSC, USNR, B. estas, HMI, J. E. McGuire, HMI, B. B. Tillman, HMI, Karolzak, HN, H. E. Jones, S. E. Cook, HMI, and S. O. T. HMC, acting coach.

Dental's "As" easily outscored somewhat befuddled N. M. I. squad and ran off with the Intramural Basketball Championship. Outplayed by the well knit Dental squad throughout the game N. R. I. posted 20 points in four ods and were unable to cope with the Dental defense. The final showed Dental 38, N. M. R. I. 22. N. P. Department's quintet team which in earlier games showed promise of giving any team trouble wilted in the play-offs and dropped out of contention as they handed a 38 to 22 shellacking to Research. Surprising Lab. No. gave the Dental "A" a tough struggle for three periods before fading near the finish and dropping a 41-28 decision to the Dentalists.

LETTER

(Continued from page 4)

mother and father in Indiana told them. They had heard lovely carillon bells when I had visited here.

Then, did I write to thank you and the boys for the joy they gave us? Oh no, I prepared supper, told my husband about the glorious singing, "did" the evening dish, read the paper and went to bed. No wonder you Chaplains pray earnestly for our sins of omission.

If it is not too late, please tell the boys how much their singing meant to the people in our neighborhood, and please continue the grand chorale!

Very Sincerely
Mabel L. Lind

NNMC Singers Present First Concert Thurs.

The NNMC Singers will make their first public appearance at 1800 in the Auditorium on Thursday, March 16. The group will present a short concert just before the first movie. This newly organized group is composed of Nurses, Waves, Wives, Doctors, and Corpsmen, all NNMC personnel.

The choral group is under the auspices of the Recreation Department and is for the enjoyment of the personnel involved as well as those that will hear them sing. It is hoped that the group can expand and grow into something that will put NNMC on the singing map. For this reason we have called so many times in the past and call again for volunteers.

The group meets every Thursday at 1630 in the Auditorium. You don't need invitations, pass keys, or pass words. Simply come up and become a member. We can promise an entertaining evening.

Eighth Course For Reserve Doctors Here

The eighth course in Medical Aspects of Special Weapons and Radioactive Isotopes for Reserve medical and dental officers of the Navy will be held the week beginning Monday March 27 and continue through March 31, at the U. S. Naval Medical School here.

This course is being conducted primarily for the benefit of Volunteer Reserve medical and dental officers and will present the techniques to be employed and the problems likely to be confronted in the field of Atomic Medicine. The first course was given in February 1948 and to date a combined total of about 1,000 physicians and dentists have attended succeeding classes.

Outstanding men in their specialties will be the speakers and an interesting and informative presentation is assured.

Reserve medical and dental officers who desire to attend this course should submit a request for training duty at the earliest practicable date to the Commandant of the Naval District in which they reside. Facilities available at the Naval Medical School, make it necessary to restrict attendance to 200 Reserve medical and dental officers. Reserve medical and dental officers are restricted to one such course during a fiscal year.

Capt. R. M. Gillett relieves Capt. F. C. Greaves at change of Command Ceremonies while RADM M. D. Willcutts looks on. Left to right: LT. Moon, LT. Winnie, CDR Mason, Capt. Ashton, LTCDR Finan, Capt. Mitchell, LT. Pollard, Capt. Behnke, Capt. Peterson, LT. Vaupel, Capt. Norman, LTCDR Zimmerman.

Dance O' The Green Next Thursday

"Hi Ho, come to the dance. . . ." Another big conflagration, shuffle, jive session, hep cap ball, bebop bopping or what have you. This time, not in the pink, but in the green, in honor of that great Irishman, Saint Patrick. Our last gathering, beneath the six foot heart, was a memorable occasion. There are still many people who remember it with affectionate afterthought, lingering like an after dinner liqueur.

The gym will be appropriately decorated, and the recreation committee is hard at work to produce that materially. There will be door prizes for the holder of lucky tickets. Festivities are slated for Thursday, March 16, at 2030.

Howard Williams will supply the notes and rhythm. And, if the jive numbers are too much for you, you can always stop for a "spot of coke, old chap." There will be a supper for the connoisseurs of the gathering (soup to nuts, or as the dilettante would say, from consommé to pecans).

Chaplain Edward R. Martineau was detached from the Medical Center on 1 March. He will report aboard the USS BUTNER for duty in the Pacific with the Military Sea Transport Service. Father Martineau, a Benedictine Monk from St. Leos Abbey, Florida, came to Bethesda from duty with the Marine Corps on Guam. He leaves with a hearty BON VOYAGE from all hands.

Chaplain Arthur P. Finan assumes his duties at Bethesda, after serving aboard the heavy cruiser MACON. Father Finan, a native of Boston, is a member of the Redemptorist Order. Before his entrance into the Navy he was professor of Greek and Latin at St. Marys College, Erie, Penna. Welcome aboard.

Captain Norman Miss David Wed In Chapel Rites

Captain Irwin Louis Norman, MC, USN, of the Naval Hospital Command and Miss Jean David were married March 5 in the chapel at the Naval Communications Station.

The bride was given in marriage by her Uncle, Vice Admiral Ross T. McIntire, MC, USN, (Ret.), former Surgeon General of the Navy.

Captain Henry G. Gatlin, CHC, USN, Senior Chaplain here, performed the ceremony.

The beautiful candlelight rites were followed by a reception given by Admiral and Mrs. McIntire at the NNMC Commissioned Officers' Mess.

Captain Norman is Chief of the Medical Service here at the Naval Hospital.

CAPT Gillett Relieves CAPT Greaves As CO Of Naval Hospital Here

Captain Robert M. Gillett, MC, USN, was welcomed aboard March 1 when he assumed command of the Naval Hospital here at the Change of Command Ceremonies held in the Admiral's Board Room.

Reporting from Chelsea, Massachusetts, Captain Gillett was Commanding Officer of the Naval Hospital there.

Incorporated in Captain Gillett's orders, the Commandant of the First Naval District expressed regrets upon his detachment and wished him continued success in his new command.

Captain Gillett relieves Captain F. C. Greaves (the newly selected Admiral) who will go to the Bureau of Medicine and Surgery for duty as Assistant Chief of the Bureau for Research and Medical Military Specialties, Navy Department.

Following the reading of his order of detachment, RADM Greaves expressed sincere appreciation to RADM M. D. Willcutts, Commanding Officers, Heads of Departments, and all hands for the splendid support shown him during his tour of duty as Commanding Officer of the Naval Hospital.

RADM Willcutts bade farewell to the departing skipper and welcomed aboard the new one at the ceremonies in the presence of NNMC Commanding Officers, Executive Officers, Heads of Departments and friends.

Red Cross Fund Appeal Underway

The American Red Cross annual drive for funds is now under way. Chairmen and keymen have been appointed by Admiral Willcutts and are soliciting funds.

Although chartered by the Federal Government to carry many responsibilities, Red Cross is supported entirely through voluntary contributions. Your contribution brings you a membership card and the privilege of voting on program and policy of American Red Cross. All may help make this drive successful.

Red Cross covers the country with its services. The chief obligations are Service to the Armed Forces at home and abroad, Services to Veterans, Disaster Relief, promoting Health and Safety, and International activities directed toward relief of suffering and promotion of better understanding between nations.

The Red Cross program is big and flexible. It stands ready to expand during time of war or major disaster, and to meet the changing times. To do so it needs the help of all, both in volunteers services and in voluntary contributions. The organization functions through 3,745 chapters and 4,668 Field Directors offices with thousands of volunteers and paid workers. Volunteers out-number 100 to 1 the (Continued on page three)

Volunteer Dent Reserve Officer's Course At NDS

Approximately forty-four Volunteer Reserve Dental Officers will undergo a two weeks' training course at the Naval Dental School April 12 to 25.

This training duty will consist of professional and military subjects appropriate to dental officers and will be similar to the courses conducted at the Naval Dental School during the past two years, at which persons ranked high in the professions participated.

Volunteer Reserve Dental Officers desiring to attend this course should submit their requests to the applicable district commandant.

Above shows the Gray Ladies receiving diplomas at their Graduation Ceremonies held in the NNMC Auditorium. RADM M. D. Willcutts addressed the graduating class and congratulated and wished them success for the future.

The Chaplain's Corner

By Chaplain H. Grady Catlin

So many of us are prone to put first things last and last things first. We become so entangled and enmeshed in the web of mere things that we neglect the values that are worthwhile. So many of us twiddle and waste precious time with the little non-essentials. We neglect the big fundamental first things of life for the insignificant.

In the twenties we put our faith in self; during the thirties we put our faith in the state; in the forties we put our faith in science and now man has lost faith in self, in the state and in science. If we are to survive we must put our faith in God.

In these turbulent times the things that are boisterous, ugly, cruel and crude seem to dominate our lives and thinking. Emerson said "things are in the saddle and ride humanity."

We live in the world of things—we are occupied with things—things loom up in our thinking to such an extent that there is danger entirely and completely of neglecting the spiritual side of our lives. A hog is perfectly happy and contented to wallow in the mud but a man conscious of his divinity is not happy or contented unless he lives on the high lands of life.

What kind of things do you like? Are you satisfied with the skim milk of life? Do you let the little every day worries rob you of the joy of living? Cultivate the first things first and you will be amply rewarded.

Dying, Horace Greeley exclaimed: "Fame is a vapor, popularity an accident; riches take wings; those who praise today will curse tomorrow—only one thing endures and that is character."

If you will strive diligently to put first things first, the pathway of your life will be brighter and you will get a greater joy out of life.

O.T. Helpful And Interesting

Bernard Verble, SA, is a patient here at the Naval Hospital who is making full use of the reconstruction program offered him. While stationed at Pensacola Naval Air Station, Verble received three compound fractures of his left arm in an automobile accident. The injury damaged the radial, ulnar and median nerves, making his left arm useless.

He was first hospitalized at the Naval Hospital in Pensacola, Florida, for four months and subsequently was transferred here for treatment by neurologists. His arm has become progressively better but, according to Verble, it will be another six months before any definite results can be obtained.

Referred to Occupational Therapy by the medical officer in charge of physical medicine for functional therapy to the injured arm, Verble has nothing but praise to offer for his wonderful treatment at O.T. In his own words, "Work here helps me a lot. It exercises my arm and is at the same time interesting." In the above picture he is operating

a hand loom with the aid of a sling suspension which is used for support of muscles too weak to sustain working position. By eliminating gravity the patient is able to work from left to right with the injured arm, and vice versa.

Weaving is not his only occupation, though. He has done leather work, produced several wallets and belts, and, in metal, he has made a sterling silver bracelet. Occupational therapy is indicated for the purpose of morale, diversion from worry, constructive use of leisure time and an opportunity for the patient to feel independent and one of the group.

Verble's home town is Living-

President Of China Among Foreign Visitors

The Center was recently graced with a visit in the distinguished persons Li Tsung Yen and Doctor Kan. Mr. Li is the President of the Republic of the China.

President Li is in the United States for two months undergoing medical treatment in a New York hospital. He was here visiting Ambassador Stuart who is the American Ambassador to China.

A host of foreign visitors have toured NNMIC recently. In February Lieutenant E. O. Errebo-Knudsen, Danish military surgeon, conducted a general observation at the Research Institute. Lt. Errebo-Knudsen stopped here on his way to the U. S. Naval Air Development Center, Johnsville, Pa., where he studied and observed the centrifuge.

The Naval Hospital honored the presence of three Cuban Army officers and one Cuban Naval officer who were here to observe our hospital administration procedures and ward management. The officers: Lt. Luis Iglesias, Capt. O. Esteves, Lt. Rupio Garcia, and the Navy's representative, Lt. Guillermo Palacios.

In a letter to Miss Margaret E. Patterson, Secretary of the Science Clubs of America, RADM M. D. Willcutts joined with the Commanding Officer of NMRI to extend a cordial invitation to the winners of the Ninth Annual Science Talent Search for a visit to the Medical Center on 6 March. The tour will be guided and will include the NMRI and NH. RADM Willcutts also extended an arranged invitation to such groups as this for the future.

Many other visitors have entered the portals of the Center recently. Remarkable amongst these were, from Mexico City, Dr. Jorge E. Audiffred; Dr. B. Nygaard-Ostby, Professor at the Norwegian College of Dentistry and President of the Norwegian Dental Association; and Dr. Horace Gillette, Malariologist from the Government of Trinidad, British West Indies.

From Canada came Cec N. R. Twinn, Entomologist, Canadian Department of Agriculture, Winston M. Askwith, Engineer, Federal District Commission, and Alec C. Jones, Chemist Department of National Defense. They all visited NMRI on unclassified basis.

It'll Happen Every Time

By J. C. Woods

Early one morning the usual traffic was booming at the maintenance entrance. Everything was running smoothly until a jeep suddenly stalled. This held up all the incoming and outgoing traffic. Horns began honking and the driver hurriedly lifted up the hood to see what was wrong. The motor was in good condition, nothing could be found. Some of the other drivers came over, they made a few suggestions, none of them helped, the jeep sat like a stubborn donkey.

Finally they called the garage. An experienced mechanic arrived on the scene. By this time a large crowd had gathered out of curiosity. The mechanic checked the jeep in a manner that showed long experience. Then he turned to the crowd, took a deep draw from his pipe and said "She's outta gas."

ston, Tenn. He plans to make the Navy a full time job provided his arm heals favorably.

Meet The Commissary Officer

LT W. W. Smith Makes Your Eating His Pleasure

Lt. W. W. Smith, MSC, USN, entered the Navy in 1925 as an Apprentice Seaman from his home state of South Carolina. Hospital Corps School came early in his career followed by many other types of duty.

Before the war he served at most of the large hospitals, with the Marine Corps for five years at Marine Corps depots and recruiting stations, and on several kinds of ships, destroyers, minesweepers, and tenders to mention a few.

With the beginning of the Neutrality Act, Mr. Smith went on a destroyer which patrolled the Atlantic, assisted convoys, and hunted for enemy submarines. This duty lasted until only eleven days before the Japanese attack on Pearl Harbor.

During the war, Mr. Smith, who had received his commission as Warrant Officer in 1942, moved about quite a bit helping with the establishment of the new hospitals the Navy needed.

After the war came the assignment to NNMIC as assistant Commissary Officer under Commander W. R. Burr, HC, USN. When the Commander retired in 1948, Mr. Smith was selected as his successor and up to two months ago he also had additional duty at the school of Hospital Administration as Commissary Instructor.

Like many other Navy men, Mr. Smith is full of praise for southern California and in regard for his seagoing nature, small ships are to his liking.

At present the Smiths, which include a boy, 17, and a girl, 15, live in Kensington.

NSHA Notes And Quotes

By Charles Bernard

The results of the college level Commercial Correspondence examination, taken by students of NSHA on 11-21-50, have finally been computed, and of the 142 who competed, 122, or 85.9%, passed. This was much better than the showing made on the Accounting Principles examination held in December. Only 110, or 76.3%, passed that one. Apparently all hands are improving with age.

Another item of interest is that the amount of \$16.89 was contributed by NSHA to the Heart Campaign. Now we have the Red Cross drive coming, so dig deep and give generously, folks.

We have a short poem that we'd like to pass on to you. It was written by Dr. James A. Bell, LL.B., A.B., A.M., Ph.D., Professor Emeritus of Southeastern University. Dr. Bell is our own instructor to the Officers' in Public Speaking. The poem, entitled "Under Control," was recited over radio station WPIK, Alexandria, Va., on 1-21-50.

**"If you can hold your temper
And never count the loss
When you are wrongly censured
By an irritated boss;**

**"If you can take a call-down
When you really are to blame,
Frankly admit your errors
But keep playing the game;**

**"If you can keep your virtue
While mixing with the throng
Willing to help the sinner,
Ready to fight the wrong;**

**"If you can face all problems
And never lose your grip,
The victor's crown awaits you.
Your role is leadership!"**

"Navy Tremendous Challenge" Says Chaplain Long

It is Friday morning and I am standing in the office of Rear Admiral Willcutts, the Commanding Officer. My two weeks of training duty are ended, and in a few hours I will be leaving for Guam, my duty assignment. As I am about to leave, Admiral Willcutts asks me several pertinent questions concerning my attitudes on the Navy. I would like to share my answers with you:

Q. Well, Chaplain, how do you like the Navy?

A. I love it, Sir. I fully realize its problems and hardships and discouragements but in spite of all this I feel that it is a tremendous challenge and a wonderful life.

Q. Is a Navy Chaplain's work more difficult than a Civilian Parish?

A. I have had ten years' experience in the Civilian Pastorate, Sir, and in some respects the Navy Chaplain is easier than Civilian Parish work and in other respects it is more difficult. It is easier in the fact that you are free to do your work and develop your program. You know your job, the Navy is cooperative and sympathetic and will give you the help and respect you need. It is more difficult in the fact that all pretense and sham are dropped and you men get to know you better than the average congregation knows its minister. You also get to know your men for what they really are and not for what they pretend to be. The Navy is more exacting of a Chaplain's time and talents than the average civilian church. I have enjoyed my work in civilian life but I feel that the Navy is a greater challenge and a fuller ministry.

Q. Has your training duty at the National Naval Medical Center been profitable to you?

A. Yes, Sir, it has. I feel a great debt of gratitude to the Medical Center for the experience and training it has given me.

Q. How do you feel about your next duty, on Guam?

A. It should broaden my view of the Navy and field of duty.

(Continued on page four)

Personalities About The Center

Navy Belles

By Nadine Calhoun

If "Wishing Will Make It So," then a few damsels may soon realize a rosy future. Find a wishing well, and above the tangle of coins as they are tossed from all directions, the schol of the belles might reach your ears to such a tune as this:

Gussie, "Hope the plumber brings over some plugs for the wash tubs so I won't lose another nylon stocking down the drain."

Glory Pagano, "Wish someone had told me that 'chow relief' did not mean: a package of tums."

Jo Feldi, "Why don't they install a tap labeled 'Soapy' in showers for people who discover they are soapless."

Harriett Hanson, "Just give my color (and hair) back and I promise to never again try 'golden-red rinse'."

Phyllis McElfish, "A self-teaching course in how to pick up the cue, pocket the number four ball and rack up a score." (TO WHOM IT MAY CONCERN: aforementioned pool table was most successful in its debut at the quarters. Eager fans employed various and sundry techniques after which final scores were discussed at a joint Cue Tea party.)

Karge, "Got my wagon hitched to a star that rotates in the Bethesda-LaJeune orbit."

Gerry Gruber, "Guess my wishes have been granted." Our vivacious chief recently acquired two titles . . . one reads "Olds. Rocket '88; the other, Mrs. Smith. Congratulations to the happy couple in Lab 13. Doesn't this defy the philosophy of the mortal who said, "Wife cannot carry a head of lettuce beneath one arm and a book beneath the other"?"

Robertson, "A quick trip to Corpus Christi and husband, Bill." May many days pass ere we forget Bobby's temperate disposition).

Hernandez, "Just want to get back to work. Let me hear that coach yell Helena, you go in at forward." Little did anyone realize that last fall on the court would result in surgery.

Elliott, "Would like to own a helicopter to facilitate more direct trip between USNAS Patuxent River and Building 123, NNMCC."

Suchomski, "More and more planes." (The first plane ride made quite an impression on the pretty Polish maiden.)

Meacham, "Just one day of complete rest and comfort." Believe Marj., the patient, would prefer to return to former status as Marj., the corpswaver.

Cooper, "Wish I were a yeoman." Well, Irma, it has been said that life is a progress from want to want . . . does this not indicate you are progressing?

The empty well has been fed; the campaign of the wishing belles has begun . . . so Wishing MAY make it so.

married life. Who wouldn't be, after two weeks in Florida for a starter. Seriously, though, we wish you the best of luck.

CWO Paul Allers had a very enjoyable 30-day leave in Florida. He says the weather is quite different up here, but who wouldn't after basking in the sun for a month.

Since Robert (longevity) McCabe made DT2, his famous words are, "Pack your sea bag friend."

Well, all good things must come to an end, so see you next issue.

HMC Lubber, "Let Me Stay In The East"

Among the souvenirs of HMC Arthur H. Lubber is a picture of himself with the late President Franklin D. Roosevelt. The President was launching the Second War Bond Drive and was shown along with members of the White House staff and Secretary of the Treasury, Henry Morgenthau, Jr. At this time the chief was chauffeur for Vice Admiral Ross T. McIntyre, then Surgeon General of the Navy.

"Art," as he is known to his many friends, is now on duty at the Naval Medical School and is assigned to the Property Office and Biological Shipping Room which is located in the basement of the North Wing.

Entering the Navy in 1940 from his home state of Connecticut, he served at Newport and the Old Naval Hospital in Washington before the war. He went to the Navy Department Dispensary in 1942 and the following two years saw him at the White House on Pennsylvania Avenue. The Southeastern University awarded him the Bachelor of Commercial Science Degree in 1945 and after that he attended the School of Hospital Administration. Next came duty on a hospital ship in the Pacific and then back to the East Coast and Philadelphia and Alexandria. NMS '48.

The Lubbers now consist of the chief, his wife, Shirley, a native of Maryland, and two boys, Ross and Neil, ages 4 and 6. Golf and fishing are Art's main hobbies while among his other likes is the East coast. As for the Pacific though, "it is just too big!"

RED CROSS

(Continued from page one)

paid workers who through special training direct and channel these services and gifts to the American public.

At N.N.M.C., the following Division Chairmen were appointed: N.N.M.C., LCDR. C. L. Crawford, MSC, USN; assisted by Lt. H. E. Rooker, MSC, USN and C.W.O. J. G. DiCarlo, HC, USN; N.M.S., Cdr. R. L. Taylor, MSC, USN; N.H., Captain H. A. Gross, MC, USN; N.S. H.A., Lt. L. A. Young, MSC, USN; N.D.S., Cdr. F. M. Keyes, DC, USN. Under their leadership, 122 Key-men selected from medical and administrative officers, nurses, enlisted personnel, and civilians have been and are giving their services to contact everyone who wishes to contribute. When they reach you remember—all may help.

Last year the Red Cross gave emergency relief and long term aid in 330 domestic disaster operations—the largest number in any single year of the organization's history. The disaster program cost \$7,640.

"I Love'um All" Quotes Freddy From 'Bama

"Not married, but not averse to it," said Lee Bryan Frederick, HN, from Center Command. He is better known as "Fred" and as a man having a sharp germanic disposition. One of his chief likes being women, he vivaciously explained, "I love 'um all, but especially blondes . . . and brunettes . . . and red heads."

Born in Birmingham, Alabama, he attended Woodlawn High there. While at Woodlawn he participated actively in three major sports: basketball, two years varsity team; football, junior year varsity; and baseball, three years varsity.

San Diego, January, 1948: "OK Boots, line up. Forward march . . . hip . . . hip . . . hip . . ." San Diego, April, 1948: "You pinch the flesh into a ball and insert the needle . . ." And finally, Bethesda, July 1948: "Going up." "Tower sixteen, please." And up and down he rode until in March 1949 he was transferred to Center Command where he has worked at various assignments. He is presently at the Recreation Building in the property storeroom.

Although "Fred" has been active in intramural football with the Commanches, his flair for sports has given way to singing. He is a member of the newly organized choral group and may be found warbling along most any Thursday night in the Auditorium. But this yen for singing is not newly acquired; he was with his high school glee club for four years.

After all this practice with needles and medications on humans, "Fred" has decided to extend his work on animals by studying veterinarian medicine when he is discharged in 1951. To do this he plans to attend University of Alabama.

200. Your Red Cross contribution helps make assistance available wherever and whenever it is needed.

By the end of 1949 the Red Cross national blood program had collected over 500,000 pints of blood and was operating 30 regional centers throughout the nation. Blood is being supplied, without charge, to some 1,550 hospitals and 80 clinics to help insure better health and security in the United States. Your Red Cross contribution in 1950 will help this program grow.

The Red Cross this year needs \$67,000,000 to continue its services to the armed forces and veterans, its disaster relief services, its national blood program, and its widespread volunteer activities. Do your part to keep essential Red Cross services in operation by contributing to the 1950 fund campaign.

Yust A Little Of Minnesota

A little lady of the Land of the Lakes is Phyllis McPeck, DN (W), of the Naval Dental School. She reported last September after completing boot camp and Dental Technician's school in Great Lakes. Before entering the Navy she finished high school in Osakis, Minnesota, where most of her twenty-one years have been spent.

When asked to list her likes the ones she gave seemed to come from a college gal instead of a Navy woman. They included Minnesota, University of Minnesota's football team, sleeping, movies, convertibles, spaghetti, and concerts. She dislikes Washington (especially the weather), her alarm clock, and being called "Shorty."

Hobbies such as sketching and knitting and sports, fishing, hunting, and bowling, round out a seemingly crowded but normal life.

At present, Phyllis is working in Oral Surgery, which she enjoys very much. She has very definite plans for the future which include marriage and discharge in June, then raising a family of little Minnesotians and Dental Technicians.

The Dental Explorer

By Jack Swedberg

We would like to welcome the new Dental Intern Class which started the first of the month. The Dental Officers are, LTJG's, C. S. Anderson, M. F. Byers, B. E. Clarge, G. H. Cooley, W. F. Dean, G. L. Gardner, D. K. Ewton, J. Gutman, R. W. Higgins, C. J. Hill, J. F. Hutto, E. H. Lange, W. L. Lehman, W. G. Lehmann, R. J. Leopold, R. O. Osler, R. A. Probst, D. M. Reed, R. C. Standish, G. L. Spielberger, R. C. Stockton, W. L. Turner, and L. J. Wiley.

Anyone looking for three for five, come to the Naval Dental School and see Dr. Wells. Honest John Swearingen can vouch for him.

Congratulations to DTI's Pless and Mills on graduating from Dental Repair School. Hope you like your duty at Brooklyn.

Best of luck to Ding Dong Bell and Don Laden. I hear it's pretty rough on the outside. I hope you make it through them thar hills of Kentucky, Ding.

The only thing Jack Knudsen had to say after ten days' leave was "I'm hungry."

I'll bet Kerron Moore is an expert at changing diapers after that week's leave. How about it Moore?

John Burkinshaw, the happy groom is very well pleased with

A robin chirped a merry little tune. A kite dipped, then fluttered and rose into the heavenly blue, to hang like a cloud suspended on a string. The air is fresh as morning dew and spring is here, how do you do. How do I know? Like you, I watched a white haired lad, with bat and ball, usher in the spring with just one cry, "Let's play ball."

Another Baseball season is just around the corner and, as though I never made a losing bet, I'll be foolish enough to go out on a limb and pick Brooklyn to repeat with Boston's Red Sox winning going away. Washington—who said that? The Nats have made one improvement, they now have a pilot who really has the know how. Oh well, there is one consolation, it takes two teams to make a game. I could be wrong, and believe me if you watched last year's Senators, you might begin to wonder if it really takes two teams.

Our illustrious Admirals have really turned into a truly good basketball team, having won about 27 of their 40 games this season after a rather dismal start. It has and is a continual ache in my anatomy whenever I think of what might have been if we had the team spirit and harmony which prevails at present.

The Varsity Baseball Squad is soon to be organized according to top men in our athletic set up. As of this time we have yet to select a coach. This of course is not due to the fact there are none present. Reliable sources has it, that a certain gentleman has offered his services without charge and promises full-time devotion to the program. A rather generous offer, thanks. Perhaps your request will not go unheeded. It has been suggested this person be made coach in all respects, except perhaps, since he is a retired officer it will be necessary to adhere to policy by appointing some active member as manager. I only hope a decision is made soon. A good start is of prime importance if our boys are to give a type of performance which they are capable of giving. Our athletics aboard this station are on a par with those of any station in the district, give them an even break, you will be given reason to be more than proud of them.

Admirals Roll Naval Aces Dumped 89-68

Romping along in a seemingly easy fashion and scoring 56 points in the last half, Medical Center's high scoring Admirals routed the Naval Aces 89-68 in a game played on the Medical Center's court.

Combining their scoring efforts for the evening Big George Funk and Tom Brothers were the big guns in the Center attack. The scoring twins straffed the nets with 28 and 29 points respectively.

Throughout the game Center's rangy crew dominated the backboards. Prof. Echols and Funk playing standout roles as ball hawks, gathered in most of the rebounds. The Admiral win avenged an earlier defeat which the Naval Aces handed to them on their home floor.

(Continued in column five)

Admirals Swamp Bell Telephone Quintet 67-22

With swift and business like precision Centers Admirals swamped a somewhat hopelessly outclassed contingent from the District of Columbia. Allowing the invaders a total of nine field goals, 8 in the first half, the tight guarding Center squad rolled to a decisive 69 to 22 victory over Southern Bell Telephone.

Clearing the bench and utilizing unlimited substitution in an effort to hold down the scoring, Centers red-hot clan just couldn't miss. Big George Funk straffed the nets for 18 points in his 15 minutes of play to be followed closely by Tom Brothers with 14 and Chuck "Weep" Spencer who dumped in 12 points in the last period.

SCOREBOARD

Admirals	G.	F.	TP.
Brothers	7	0	14
Royster	3	0	6
Bell	4	1	9
Funk	9	0	18
Stanley	2	0	4
Spencer	6	0	12
Oddis	2	2	6
	33	3	69

Bell Telephone	G.	F.	TP.
Carter	2	2	6
Wilburn	0	1	1
Adams	4	0	8
Gonella	2	1	5
Detorie	1	0	2
	9	4	22

It is difficult to recognize this flashy basketballer as his prominent proboscis may hide some of his features. An Irish-Italian boy from Illinois, Don "the Nose" Polizzi, has made his 5 foot 11 inches of height a necessary component on the Admiral squad this season. Being in possession of a fair share of shooting ability and a good team man, Polizzi ranks high among the better players on the Admiral squad.

Chuck "Weep" Spencer, 19-year-old, 5 foot 10 inch, 175 pound Admiral Forward is a fast and talented Freshman, with no lack of initiative. He packs around a sturdy frame which contains about as much energy as the tornadoes which reportedly hit his home state of Kansas. "Weep" is a late comer with the Admirals but he has worked in nicely and will continue to aid in the Green and White cause.

Admirals Clip Airmen's Wings Win 77-52

With Tom Brothers collecting 25 points for the evening and leading Center's scoring attack, the Admirals added another scalp to their long skein of victories, defeating the Andrews Field army airmen on their own court to the resounding tune of 77 to 52.

Jumping into an early lead the speedy Admiral squad put on a blazing first half and despite the airmen's spirited play, controlled the backboards and with precise timing and excellent team play rolled to a 39 to 28 half time lead.

The airmen put everything but the bench in the third period in an attempt to break up the Admiral offense and ease their somewhat ice-cold squad, but to no avail. The third period mark found the fliers on the short end of a 57 to 37 count.

The final session continued at the same pace with the Admirals hammering the hoop at the rate of 2 points per minute. With the sound of the final whistle Center's five had racked up their seventh victory in a row.

SCOREBOARD

	G.	F.	TP.
Brothers	10	5	25
Polizzi	6	2	14

Shooting Stars

Player. Coach Jay "Sausage" Bell has seen plenty of action in recent Admiral tilts because his height and play-making ability has been needed against several tough foes. A cool, poised performer on the hard-court, especially when the going is roughest, Bell is the "old pro" on the NNMCC squad. He admits to being "in the late twenties."

"Pops," as his mates sometimes call him, sports a deadly two-handed set shot from the side and is rated a shrewd floor performer. In good condition, he played the entire 40 minutes against Arlington Hall Army here recently. The Admirals, incidentally won that one.

A keen sports fan, Bell has coached the Center Command Club to two straight NNMCC intramural touch football titles, and also pitches and plays outfield for the varsity during the baseball season.

Baseball Meeting March 15th In Gym All Interested Report

A meeting will be held on Wednesday, March 15th in the recreation building at 1900. The purpose of this meeting is to determine the number of men available for varsity baseball tryouts.

All men interested are urged to attend this meeting. If you are unable to be present please contact the recreation office, leaving your Name, Rate, Department and sleeping Quarters telephone extensions.

Bulletins and posters will be displayed on the Bulletin board near the entrance to the Mess Hall, which will indicate opening of practice sessions, dates and times.

Plans have been drafted for loosening up workouts inside the gym for the next few weeks. Practice sessions will be held outside as soon as is possible.

The Recreation Department has initiated necessary steps for the improvement of our present diamond. Equipment has been purchased. All we lack is YOU.

Give!

Red Cross workers in 84 Veterans Administration offices last year gave assistance in a monthly average of 96,000 claims cases for veterans. They reviewed 717,500 VA folders, made more than 480,000 rating board presentations, and appealed 18,000 cases. Do your share to help our veterans by giving through the 1950 Red Cross fund campaign.

"Bones" Braun, a blue grass boy from the state of Kentucky where they grow them big and give them a basket ball as their first toy. He has been around since the season began and is a rather handy freshman with plenty of potential. Bones stands 6 foot 1 inch and is just about as thin as his moniker implies. A regular on the Center team, Bones has proved a valuable defensive asset and has shown continued improvement in every campaign this season.

In less than half a season, "Ike" Armstrong has contributed, a more than respectful total of points towards one of the Admirals more successful campaigns. Late in being recognized as a handy-man to have around, Ike has been given plenty of action of late and has proven his ability, by straffing the nets in the double columns on many occasions.

Cottage Caper

We've heard it again—that old record! Where is the "Y" Cottage? Why is it? What is Who goes there? and Why do know about it? So, again weary writer points out:

Where? The "Y" Cottage, 8 Wisconsin Avenue, is the first ho to your right after you leave NNMCC gate, headed toward Bethesda (don't get it confused with the Woodmont Country Club).

What? It is a COMMUNITY CENTER FOR ALL YOUNG PEOPLE OF THIS AREA. It's "hot" to a lot of us, with its fireplace, kitchens, library, and record collection for both popular and long fans. Pots of internationally famous coffee, current magazines and newspapers, and decks of cards (in new and worn condition) are ways available for immediate resumption. If you like your recreation planned there are regattas, dances, bridge tournaments, picnic sight seeing tours, concerts, civic classes, and Sunday Night pers followed by a variety of programs. If it's a room for your family or yourself or visit friends that you are needing, register with the Rooms Registry file.

Who? The "Y" Cottage far consists of Bethesda residents, students, employees of NIH, and military and civilian persons from NNMCC.

Why? It is here because the dozens of Bethesda-Chevy Chase liked the job USO did and took upon themselves to keep the Cottage open—and because Community Chest provides YWCA with money and rent, light, and staff.

Why don't you know about it? We don't know—perhaps you can read, for there are posters on bulletin boards, notices in daily bulletin, and articles in paper. There's a neon sign on our door beckoning a welcome, if these are too commonplace, looking for a Model A Ford, a Chevy Station Wagon, and a large truck. Drop in for a cup of coffee and look the place over. You need a personal invitation—just you're over 18 years of age and under 75. If you'd rather plan for more information the number OL 7808 and if you lose this number the "Y" Cottage is in the phone directory. NO excuses!

CHAPLAIN LONG

(Continued from page two)

deavor—I am pleased with the opportunity for great service.

Adm. Willcutts — "That's the spirit, Chaplain—good luck and happy cruise."

Respectfully submitted,
BRADFORD W. LONG
Lt. (jg) CHC, U.S.N.

Easter Dawn Services To Be Held At NNMCC

The grounds of the National Naval Medical Center will be the setting for a special Easter Morn Service at 6:30 A.M., Sunday, April 9. The service, for which a section of the band of the Navy School at Annapolis and the a cappella chorus of the Bethesda Chevy Chase High School will provide the music, is being sponsored jointly by the NNMCC and the Bethesda Council of Church.

"The Indestructible" is the subject of the message which will be given by the Rev. Mr. Fred C. Reynolds, D.D., superintendent of the Washington East District of the Methodist Church. The service is scheduled to begin at 6:30 A.M. with a procession of the chorus and

Dr. Mason Views Pers. Efficiency In High Temps.

Dr. Douglas Ryle Mason, Scientific Attache to the Union of South Africa, visited NMRI for the purpose of discussing research work on efficiency of personnel in tropical climates and under conditions of high temperature. Authorization for this visit was granted by the Chief of Naval Operations.

In a full day schedule, Dr. and Mrs. Roberto Suarez Morales, Dean, School of Gynecology, University of La Paz, Bolivia visited NNMCC and the National Cancer Institute. At NCI they heard talks on "Eclampsia-like conditions in pregnant rats injected with progesterone," the "cytologic test for cancer," and "demonstration of growth promoting effects of vitamins and hormones." They later visited LCDR C. L. Crawford at the NNMCC before leaving.

James E. McCormack, M.D., Executive Director, Committee on Medical Sciences thanked the Commanding Officer, NNMCC on behalf of Dr. Aub and the members of the Joint Panel on Medical Aspects of Atomic Warfare for the courtesies extended to the group.

Miss Karin Hallmen, Swedish Red Cross School of Nursing, Stockholm, Sweden recently visited the Naval Hospital on authorization from the CNO. The visit was sponsored.

New Band To Be Organized

A new station orchestra is now in the process of organization. The director will be Paul Carinno, HMI, of Physio-Therapy.

The orchestra will not only provide its members with recreation but will give enjoyment to others by the performances which are planned.

All persons interested are asked to contact Carinno at extension 206 or the Recreation Officer. All kinds of instruments are needed.

HIT THE ROAD!

BuMed employees visit the Center in a series of field trips for familiarization purposes. Picture taken at the Naval Dental School, shown left to right: CDR. F. E. Frates, NDS, Nann B. Irwin, in charge of field trips. Lucille Baker, Richard Dominelli, Laura Penland, June Dries, Theresa St. John, Gertrude Lesser, Jane Douglas, Patricia Shadle, Ida Haun, Edwin Hewitt, CDR. R. F. Burnett, NDS, James Short, Frank Gorman, Chief Garrett, Margaret Arness, Judy Elwyn.

Easter Program Features Stainer's "The Crucifixion"

"The Crucifixion", Sir John Stainer's most popular work, will be presented here Wednesday April 5 at 1930.

A full hour of wonderful music, this Easter cantata will feature a full chorus of mixed voices, and tenor and bass solos with organ accompaniment.

Approximately one hundred voices from the choirs of Calvary Baptist Church of Washington, D. C. and the Baptist Church of Rockville, Maryland will present this outstanding program.

Mr. Clyde J. Holt, present director of our NNMCC Singers, will conduct "The Crucifixion" here.

The program will be broadcast from the auditorium stage to all wards over channel "C" for the benefit of patients who will not be able to attend.

Chalk Up One More

The National Service Life Insurance has found one staunch defender here at the Center. About to go nearly a thousand miles on emergency leave with little cash, what happens but his insurance dividend arrives. Just going out the door, the mailman walks in with the piece of green paper that will mean smooth sailing ahead. Score another for the NSLI!

Captain Behnke To Duty At Bremerhaven

By J. P. Walsh

Captain A. R. Behnke, MC, USN, who has been associated with NMRI since 1942, leaves on 28 March for Bremerhaven and his new assignment with the Commander Naval

Forces in Germany at Heidelberg, (and additional duties at the London Branch Office of Naval Research).

Captain Behnke, whose work on submarine and diving problems is well known, is succeeded as NMRI Executive Officer by Captain Wilbur E. Kellum, who has been identified with research in aviation medicine for the last fifteen years. Captain Kellum comes from the Naval School of Aviation Medicine at Pensacola, Florida.

Joyful Easter Greetings To All

Easter's Dawn symbolic of sanctity, joy, hope, purity and life marks the beginning of a New Day. It is the happy event of day from night. It is the hour for renewal of faith in the resurrected Prince of Peace, the martyred Christ.

The simple yet mightiest sentence ever spoken—"He Is Risen"—established forever the fundamental teaching of Christianity—Christ is the Light of Hope midst a world of darkness and despair.

We have here many seriously sick and wounded. Many different creeds and faiths are represented, but to each the Easter commemoration may mean contentment, assurance, joy and light. The need for the Easter message is all about us.

To all members of our great Medical Center, both naval and civilian groups, my sincere Easter Greetings!

M. J. Willcuts
RADM M. J. WILLCUTTS,
Commanding Officer,
National Naval Medical
Center.

ADM Sherman Releases Info On New Uniform

Articles have recently appeared in periodicals criticizing and alleging unpopularity of the change to the enlisted man's dress blue uniform approved by the Secretary of the Navy in 1948, but not yet issued to the service either for test or general wear. The Chief of Naval Operations has inspected and approved the minor changes which greatly improve the wearability, smartness and comfort of the uniform without change in its traditional appearance.

These changes consist of a zipper fly front vice buttoned flap, addition of two front slash pockets and two hip pockets in the trousers, all well covered by the jumper, belt loops replacing lacing in back of the trousers. The general cut of the trousers is unchanged. The jumper is unchanged except for tight cuffs at the wrist which have been replaced by sleeves similar to the white jumper.

This is not one of the uniforms incorporating radical changes which were submitted to the fleets in 1947 for trial and comment. The approved changes in the uniform are those recommended by the men who will wear it and will permit them to wear the uniform properly with greater convenience and comfort.

This will mark the third year in which this community service is held at the NNMCC. Two years ago element weather forced the service to the auditorium, with overflow of the halls and stairways. Last year again the weather was cold, the service was held outdoors nevertheless, immediately in front of the main building. This year the locale for the service is being moved to the grounds immediately behind the main entrance. In case of unfavorable weather the service will be held in the gymnasium in the recreation building.

The B-CC A-Cappella Chorus of voices under the direction of Mrs. Faye Finley Shaw, will sing anthems, "Alleluia" by Thompson, "Now Let All the Heavens Praise Thee" and "Up, Up, My Lord With Gladness" by Bach, and "Joseph's Lovely Garden" by Jensen. Pre-worship and offering music as well as accompanying for the congregational hymn singing will be furnished by the

The Easter Morn service will be broadcast to the hospital wards and the community by Station WBCC.

The Chaplain's Corner

By Chaplain H. Grady Catlin

Easter

Easter is the most joyous day in the Church's calendar. As Christians we celebrate this day in memory of Christ's resurrection. It is claimed by some that Easter is the name of an old Saxon goddess. As a time of celebration Easter goes back to great antiquity. It is not known exactly when it began. The earliest Easter hymns of which we have any record date back to the fourth century.

Easter is more than a spring festival or flower show—the resurrection of Jesus represents a belief in the supreme worth of personality. Loyalty, honor, beauty and goodness are more than mere words.

It is the purpose of Easter to bring to light those qualities that are eternal. The concept of immortality is ageless. But it is at the empty tomb of Jesus that the world finds hope, and without that hope it would be most difficult to carry on with the burden of despair in the midst of chaos. Easter is God's promise to man. Perhaps the world needed another Gethsemane and Calvary—since hope is eternal in the breast of man—there is sensed the dawn of a new life for the sons of men. For out of the bitterness and agony of a world in travail there will come a new life. For out of the tomb of our sorrows the flower of hope blooms and emits its fragrance.

The Easter message, pulsating with love and radiant with hope, challenges man to great and fearless and adventurous living.

Shower Held In Chevy Chase For Ann O'Leary

Guest of honor, hostess and guests at luncheon-shower for Margaret Ann O'Leary. Upper row: Agnes Hubert, Mildred Mynes, Mary Cary, Frances Spear, Tsugiyu Shiroishi, Dorothy Foster, Dorothy Marchbank, HHelen McNeely, Helen McGahren, Melba Grafius, Mary Ann Evans, Opal Nowicki, Mable Clark. Lower row: Maurine Gilchrist, the hostess Marian Cordova, Mae Rhodes, Margaret Ann O'Leary, the guest of honor, Jeonette Thuman, Jacqueline James and Gertrude Brown.

"In the spring . . ." Oh, but this entire story happened even before the official debut of spring. Margaret Ann O'Leary, one of NMRI's most popular girls decided March 19 would be the day for her wedding to handsome, young Louis Coriasso, formerly of NMRI, also. "Lou" is now pursuing his studies preparatory to a medical degree at the University of Colorado at Boulder, where they will make their home for an indefinite period.

Many showers and premarital parties have been given for the bride-elect but of special interest to readers of the Center News was the luncheon-shower given recently at Brook Farm Tea House, in Chevy Chase.

The attractive guests represented almost 100 per cent roll call of the young ladies from the various departments of NMRI, a beautiful tribute to Ann's popularity.

The luncheon table was arranged

in a large "T" shape, near the blazing fireplace. In front of the guest of honor, was placed, in an artistic circle of dainty ferns, the shower cake centerpiece. The cake measured 20" by 30"; was iced in pure white and trimmed with deep red icing roses. Across the center was a staff of music in chocolate icing with chocolate notes and the words "I LOVE LOU TRULY."

Following the delicious chicken luncheon, beginning with frosted fruit juice and ending with tall frosty chocolate parfaits, the gifts were presented, unwrapped and placed on display. Candid camera shots were made throughout the party to complete the record and to be shared with the 'groom' who was unable to enjoy the festivities in person.

Good luck Ann—Good Luck Lou—We'll always be interested in your wonderful new life together—so let us hear from you often.

Dear God

*This is my prayer I make today,
As nations plan the future way,
Open their eyes that they may see
Another war must never be—*

*Let nations look through mothers' eyes
Or mile on mile where their sons lie.
Crosses in every part of the world,
Too many young into war were hurled.*

*Let nations look at buildings torn,
City after city of beauty shorn.
Does not a lovely church mean much
As its spires that seem to heaven touch?*

*Let nations look at rock and stone,
Where wonderful harvests have been grown,
Is there not beauty in a green field?
There is no beauty if guns we wield.*

*Let nations look into crippled souls,
Crippled of limb—mind, hospital walls
Hold men who could greater nations make,
Now useless—because of war's mistake.*

*Let nations see the old, so tired and worn,
Shedding tears over a country where they were born.
Peace should be theirs at last of life,
Not confusion amid war's fierce strife.*

*Let nations look at children small,
Each country has thousands, hungry and all.
They only want to laugh and play,
They could not if war were on the way.*

*Dear God, let nations forget a boundary line,
And build for things that may be fine.
Let nations be led by kindly love.*

The above poem was submitted to the NEWS by Nadine Calhoun, HMI, Naval Hospital Command and was composed by her mother Mrs. Everett Calhoun.

Charles Stokes Married To Carol Harpold

Not even a broken leg would stop Charles R. Stokes, HM3, USN, from his rendezvous at the altar some time ago. Charles and Miss Carol E. Harpold were joined in marriage at the NNMC Chapel with Chaplain Frank Morton, LT, USN, doing the honors.

The bride wore a beautiful dress of pink silk interwoven with copper mesh. Robert G. McComas, HM 3, was best man and Mrs. McComas was bridesmaid.

A reception followed and took place at the 2400 Club in Washington, D. C.

The Stokes are presently residing at 3911 Seneca Lane, Bethesda, Md.

Foreign Visitors

(Continued from page 1)

sored by Miss Davis, Field Director, Red Cross Unit.

Warren W. Berning and Norman Arnold, both Army employees, visited NMRI to discuss radiation effects. Both men are employed at the Aberdeen Proving Ground.

Two Japanese, Mr. Kitooka and Mr. Imari, by leave of the CNO, visited the Naval Hospital to observe the patient's recreation program being conducted by the Red Cross.

Other recent visitors to the Center were Dr. Mushin, Cardiff, Wales; Miss Ingrid Stenstrom, Swedish nurse; Doctors Allbert Brun and Jean Raulo, both from France,

Meet Your Commanding Officer:

Captain Gillett Has Seen Duty From Shanghai To N. H.

Captain Robert M. Gillett, MC, USN was born in Clarion, Iowa. 1920 he graduated from the University of Iowa as Doctor of Medicine. Interning at Memphis General Hospital, Memphis, Tenn., he afterwards entered into general practice.

A veteran of twenty-seven years of service, Captain Gillett has seen many stations and ships. He has been Medical Officer in Command of the USNH Jacksonville, Florida, and USNH Chelsea, Mass., his last station. While he was the Executive Officer of the USNH Portsmouth, N.H. in 1942, Captain Gillett said that he had never seen such cold weather. "The temperature often dropped to twenty or twenty-five below zero," he said. Also, he was Executive Officer at the USNH Oakland, California.

This part of the country is not exactly new for Captain Gillett for he was in Washington in 1925 at the old Hospital. He was once stationed with the Scouting Force Regiment at Hampton Roads, NOB, Norfolk, Virginia. The spell of the Caribbean is particularly delectable for the Captain, having had duty at Saint Thomas and at Saint Croix, Virgin Islands. While at Saint Croix, he and several officers ran a training school for native nurses. In 1931 he served with the Fourth Regiment of marines in Shanghai.

Outstanding among the ships which he listed are the USS Vestal, AR, the USS Monocacy, a gun boat on patrol on the Yangtze river, and the USS Nashville. While serving with the Staff of the Commander of the Amphibious Forces of the Pacific during the war, Captain Gillett served aboard four ships. He explains that, when serving with the Flag Staff you followed the operations and not the ships. He participated in five major operations and was awarded the Legion of Merit with combat device and the Navy Unit Commendation for these duties.

The new Commanding Officer has a multitude of hobbies. He is a golf enthusiast from away back. Tennis once held a fascination for him also, but he states that tennis is a little too fast for him now, although he still enjoys the game from a spectator's point of view. Outside of sports, he likes to dabble with electronics and wood work.

Captain Gillett is married and resides on the station. His daughter, Mrs. Dorothy Mae Carlisle, resides in Key West, Florida. The Captain also has a fifteen year old son who is presently at Bolles Military Academy, Jacksonville, Florida.

Protestant, Catholic Good Friday Services

Good Friday, which commemorates the suffering of Christ upon the Cross, will be observed here at the Center with a Protestant service at 1000 and a Roman Catholic service at 1200. Both services will be in the Auditorium and broadcast to the wards over Channel "C."

The Protestant churches of Bethesda are uniting in a community service from 1200 to 1500 at the Hiser Theatre. Center personnel are invited to attend.

Catholic personnel are welcome at the Good Friday services at Our Lady of Lourdes.

Easter Services

(Continued from page 1)

It has been announced that the Bethesda Council of Churches is sponsoring a Community Good Friday Three-Hour Service of Devotion at the Hiser theater on Wisconsin Avenue. The service will begin at 12 o'clock and will continue until 3 P.M. There will be regular intervals at which worshipers may enter or leave the service. The devotional messages will be delivered by local Protestant ministers and chaplains from the NNMC.

RADM Willcutts At ACS Meeting In Pittsburgh

Rear Admiral Morton D. Willcutts, MC USN, Commanding Officer of the National Naval Medical Center, attended a meeting of Board of Governors of the American College of Surgeons in Pittsburgh March 15, 16 and 17.

RADM Willcutts is the Governor representing the Medical Department of the Navy.

News Review Reveals Past At NNMC

The NEWS of 31 March, 1949 carried a picture of the 100,000 patient of the Naval Hospital, was Dorothy McGruder, HAI, was stationed at Arlington Fair Special chow privileges were corded her for this distinct Rudolf Firkusny, young Czech Slovakian concert pianist, was tured in a program in the Auditorium. Mr. Firkusny, by the way returning to Washington this month with a concert at Constitution.

In 1946 one lucky group of Research consisting of two officers, a chief, and four other enlisted made a month long jaunt to St. Springs, Florida to test a type lifejacket. Florida in the winter and Bethesda in the summer, could be nicer.

Getting along to '47 we find the issue of the NEWS in our files. to the scarcity of personnel funds it was discontinued and that time it was thought that would be the last of the NEWS now as anyone can see we are with a much larger paper.

March '49 reported on the posed pay bill, the Medical Service Corps was given its first top administrative billet in Medical Service Officer in Command at School of Hospital Administration and baseball fever started as '48 regulars were pictured in NEWS. John Garrison, who is in college in South Carolina, B. Tillman, and Jay Bell were the shown on the local diamond.

more Karge, DN(W), receives dental examination request from patient. This request, along with dental examination and treatment form, goes to the officer in charge of Oral Diagnosis, CDR E. G. F. Pol-

lard, DC, USN, who is pictured in the operating room conducting a clinical examination. Joseph Hawley, DN, USN, seated at the left notes on form those dental conditions present.

A thorough X-ray examination comes next in the patient's rounds. Fourteen pictures were taken so that all the teeth may be seen. Bernard Plaske, DT3, is the technician in this picture.

The Naval Dental School At Work

The Naval Dental School is one of the component commands of the National Naval Medical Center. It occupies the first and second floors of the North wing of building 1 and building 122. The pictures on this page were taken in Bldg. 1 in order to illustrate the steps by which a dental patient receives the necessary treatment.

A local examination and treatment form is first filled out with information from the patient. Next comes a clinical examination in which the doctor charts on the form those conditions which may be seen with the naked eye. A thorough X-ray examination follows this and after the X-rays have been read the patient is ready for treatment.

If the patient needs only simple restorative dentistry, he may be sent to the clinic in Bldg. 122 for silver amalgam fillings. More detailed work such as crown and bridges prosthesis or full or partial prosthesis is usually accomplished in the main building. Also in the main building are several other specialized departments: oral surgery, oral pathology, endodontia, which deals with the keeping of "dead" teeth by removal of the non-vital pulp and placement of a resin-like filling in its place, oral bacteriology, and periodontia, which is concerned with the health of the gums.

NDS also offers two courses for naval dental officers, a post-graduate and a dental intern. The doctors under instruction study the latest material pertaining to dentistry and work on selected patients in the clinic. Two other courses are open to enlisted men, one in prosthetic technology and the other in dental repair and maintenance.

CDR T. A. Lesney, DC, USN, describes a case to student officers, CDR A. L. Raphael, DC, USN, second from left, and LTJG P. J. Pape, DC, USN, in Oral Surgery Department. LT Ann Boyle, NC, USN, and Phyllis McPeck, DN(W), assist.

CDR W. C. Wohlfarth, DC, USN, prepares an impression tray prior to the fabrication of a prosthetic appliance. His assistant, DT2 Kerron Moore stands by help.

DT2 Donald Preston puts the finishing touches on denture with the aid of a wheel and abrasive powder. Note the technician's face is protected by shield around the wheel.

A scene in the Oral Pathology Department. T. R. Smith, DT1, is working at a microtome while Mrs. Ruth O'Brien is at the staining table. Many specimens such as the pulps of teeth, tongue lesions, and other oral pathological conditions pass through this department.

A workbench in the Main Prosthetic Laboratory. Here the technicians receive the impression from the dental officer, fabricate the denture, and return it, finished to the doctor. Pictured from left to right: John McConnel, DN; Jack Cummings, DT3; Burgess Allison, DT3; William Sickles, DT2; and Ray Peters, DT3.

Not Much Research Involved

By J. P. Walsh

ARRIVALS AND DEPARTURES:

Aloha, nei ke aloha, pau oli, and a lei of caries free teeth to an Institution within an Institute, DTC B. L. Taylor BMOC (C for Caries), writer, lexicographer (he compiled the first Samoan-English dictionary), scientist, inventor and etc., who leaves NMRI about April 1 for Pearl Harbor, T.H. The Chief completes a four year tour of very active duty with his work on Intra-Oral Color Photography. DTC Franer, reporting from the Dental Clinic Naval Gun Factory replaces B.L.T. in the Dental Facility.

A & D (Cont.)

LITJG Park reporting from the Hospital to the Psychology department. HMC Tommila and HMI Weiss reporting from Chemistry School, NMS. DT2 Arnott to NAS Anacostia from the Dental Facility. Kurnyta SN, to NATTU, Airmen's School, McBurney SN to NAS, Pensacola, Photographers School, Kelly, SN to Great Lakes, Electricians' School after completing their assignment as Special Research Assistants to the Aviation Medicine Department.

Marital Affairs:

We regret that duty interfered with an opportunity for a little society reporting of the Anne O'Leary and Louis Coriasso nuptials on the 19th. Our best wishes for a happy married life in Colorado. But we can announce the Joan Smith-HMI Pinchon marriage for April 1st.

We hope this is all news to you.

Jet Mascot

Aviators who have flown jet planes 600 miles an hour or faster have chosen Gaby Andre as the official mascot of their organization "The Fastest Men in the World," and christened her "Miss Chain Lightning."

Crew's Library:

Sports Books New Look For Coming Spring

Watching the bulletin boards outside Crew's Library is one way of checking on the new books but you must remember there is only room for a small proportion of book jackets, so come along in and browse.

We are getting ready for spring with a few new sports books.

PLAY BALL by Birt Dunne was recommended to us as one of the best books ever written on baseball.

There is a new book called THE SPORTSMAN'S ENCYCLOPEDIA. For the fishing enthusiast and THE RIFLE BOOK by Jack O'Connor for the hunters.

SAILING TECHNIQUE by H. A. Calahan will be a welcome sight for all windjammer readers.

If you have to take your recreation more quietly—from a bedside chair for instance—you will like Goren's POMT COUNT BIDDING in contract bridge or Morehead's COMPLETE BOOK OF SOLITAIRE AND PATIENCE GAMES.

Stamp fans will all be glad to see SCOTTS STANDARD POSTAGE STAMP CATALOGUE in the 1950 edition. This is in two volumes with British and American stamps in volume one and Europe, Asia and Africa in the second volume.

Lab 13 News Clips

By Glin Winston

There seems to be quite an uproar around these parts lately with the drafts coming in for this class. As expected most of the fellows are happy but there is that ten per cent you know. About nine are staying here out of a group of twenty-four that wanted to stay. When all of the eligible men wanted to stay and they could not use them, all the ones wanted were chosen by votes from all of the departments. The persons getting the most votes stayed here. The number of votes depended upon the departments attended so it was quite an affair. It seems as if we have quite the politicians around.

Chase, who is usually regarded as one of the more conservative members of the class is making out like a mad bandit in the Blood Bank. After a few weeks there he seems to be wielding the wheel. It so happens that he is one of the lucky stiffs that are staying here. I wonder who it is that he knows?

It is quite the thing nowadays to see Pappy Kerns mingling with the working men, especially the students. He actually got himself a job in Hematology or was that arranged? All we have to do now is get Magan a job and we are all set. After all, we all get it in the end.

Cottage Capers

Right now about the only thing we can think about is that wedding we all attended last Sunday, the one where Ann O'Leary became Mrs. Lou Coriasso. Lou is a lucky man, but the "Y" Cottage will never be the same without Ann, and Colorado is a long way off. Whatcha bet—Ann will get some new ideas into some of the University of Colorado Clubs. Our best wishes to them.

Butch and Betty Moore are doing a good job of getting Sunday night

(Continued on page 6)

The Wearing O' The Green

Scene from the recent Staff Dance where the green colors reigned sublime. A good time was had by all.

Drums Along Wisconsin Avenue

Once, around the land Bethesda,
Lived a tribe of Hubba Indians,
Fierce and warlike tribe of Indians,
Hubba Hubba Hubba Indians.

Dug into the ground these Indians
Every winter, cause of weather,
Cause of cold Bethesda winters
Hibernated Hubba Indians.

Dug into the ground for comfort,
Couldn't even go to Florida
Had no money for the journey
And were tan enough already.

Dug their way out in the springtime
Just in time to do spring cleaning
Vacuum cleaned and swept their wigwams,
Did their details like good Indians.

Lived that way for many centuries
Lived through Washington and Lincoln,
Through Babe Ruth and Adolf Hitler.
Glad to live through Adolf Hitler.

Dug their way up one fine springtime,
Found a strange place built around 'em.
Found the U. S. Navy settled,
On the land above their dwelling.

Hospital above their dugout,
Also Research and a Med School,
They were mad, the Hubba Indians.
They were mad, and who could blame 'em.

Held a council did the Indians,
Striped their bodies full of warpaint,
Striped themselves with rouge and lipstick
Warpaint from the Corpswaves barracks.

Rode through paylines did the Indians,
Held up chow carts. Galley-corpsmen
Went to duty armed with muskets,
Fought off hungry Hubba Indians.

Rode around the halls the Indians,
Rode around on shaggy ponies,
Felt the white men should be punished,
Felt their land had been invaded.

Purchased things with worthless wampum,
Used inflated Indian Wampum,
This was economic warfare
Warfare learned from Wall Street Indians.

Admiral called them into council,
Smoked a peace pipe with the Indians,
Told them all about the Navy,
How it needed land Bethesda.

Told them crows on sailors' deerskins
Warded off the evil spirits.
Also gave 'em extra Wampum
(Liberties—Could pitchum bigger.)

Listened closely did the warriors,
Asked best number crows to wearum.
Found out chief was best to gettum.
(Indian chief—important jella.)

Indians liked the sound of Navy
Joined the Navy did the Indians,
Went to boot camp did the Indians,
Patriotic were the Indians.

Now you know about the Indians,
Now you know 'cause we have told you
Told you all about the Indians.

Editor's Note: Reprinted from NNM NEWS of 2 March, 1946.

Red Cross Offers Patients Radios, Records

Are you a music lover? Are strictly the long hair type or Patty Page send you? Maybe prefer the plaintive strains of Foley or Eddy Arnold. What your choice, you might be interested in learning that records and trolas for patient use are available through the Red Cross recreation office. Some records which could recommend are: "I Dream, Can't I" by Andrews Sisters, "Fairytale," by Mills Brothers and Ella Fitzgerald, "Sorry," Frank Sinatra, and the over popular "Johnson Rag." For our hill friends we have Eddie Arnold, Foley and such records as "Q silver" and Crocodile Tears. classical music lovers can find anything from Beethoven Brahms to Moussorgsky and ner.

We also have a limited number of radios and guitars. Should you desire either, tell your ward Red Cross recreation worker or if call extension 621, and there none available at the time, we put you on the waiting list and usually only a few days before request is handled. Bed patients are given preference for radios, each request must be approved by the ward medical officer.

Sheet music, both old and as well as manuscript paper, would be composers is available the Red Cross recreation office, also have such varied musical for patient use as: guitar and picks, ward pianos, and leles.

Brothers Nam On PRNC All Star Team

A richly deserved honor was received by Tommy Brothers, leader of Bethesda Court Ace in the form of a silver basketball for his selection as a member of the All-Star team. Both on and off the court, Brothers has exhibited all the traits of an outstanding athlete and team mate. The entire staff of the Command congratulates this representative of the Command.

The Dental Explorer

By Jack Swedberg

Last week was a very busy time for the Dental Officers here at the Naval Dental School.

The Annual Postgraduate Clinic of The District of Columbia Dental Society was held at the Shoreham Hotel, Washington, D. C. on March 12, 13, 14, and 15, 1950. The Clinics were presented by Drs. F. E. Frates, Jr., E. N. Palmer, C. E. Meyers, J. V. Niiranen, and K. O. Turner. Lt. Comdr. K. Kaires, Lts. J. R. Conant and H. Wells, Jr.

J. Holmes received his orders for El Toro, Calif., and Jack Knudsen received his for the USS Dixie. Both of these men the of luck and hope thier next of duty will meet with their royal.

Ray "Smoky" Peters has just informed me that he will probably be in for 20 due to the fact that Mrs. suggested it.

Jim Boyce, the regular News Correspondent for the Naval Dental School will return from 20 days leave Monday. He will then continue his regular duty of writing Dental Explorer.

We would like to welcome aboard E. Ambs DTC, and H. H. Elsey, C. They are here on staff and hope they will find NDS a satisfactory duty station.

DTI's Anson, Barton, and Gard have reported aboard for DRM pool. Good luck men, you have lot of knowledge to gain in 6 months.

will bring this issue to a close, ending an old saying with you. Any truth has been told between teeth.

NSHA Notes and Quotes

By Charles Bernard

The Officers' Class of NSHA has been extremely fortunate to receive instruction from two distinguished gentlemen, Professor John H. Palacios, A.B., M.S.S.W., of Catholic University, and Mr. Edward J. Smith, A.B., M.S., Managing Director of the Washington Criminal Justice Association.

Professor Palacios teaches in the Department of Psychology and Psychiatry, in the schools of Nursing and Social Work at the University. He is also Director of Social Subjects in the University Child Guidance Clinic. At NSHA he teaches psychology with reference to the problems.

Mr. Flynn lectures at the University Methods of Research in Social Work, and at NSHA teaches problems in the community connected with crime, and problems along in the breakdown of the family structure.

MC Ralph (no middle name) DEES just embarked on his last assignment (so he says) on 3-14-50. Soon he expects orders to the West Coast where he maintains his permanent residence, and since he finish "20" during the latter part of his cruise, the transfer is what he wants. Good Luck, and best wishes for a happy life.

So best wishes to HMC CON. who relieves your truly as reporter of the "Notes and Quotes." Perhaps with the injection of new blood, we'll have a healthier column. So in order to write "Notes" to my career (?) as a writer, will open a bottle of air and FADE.

Personalities About The Center

After Ten Years Chief Meets His Best Man

Patric Joseph Fitzpatrick was a PhM2 in 1940 when he was best man at the wedding of Alfred Todak, then PhM2 also. After the wedding Todak lost contact with Fitzpatrick. But now, almost ten years later, Todak just casually ran across Fitzpatrick in chow line. They are both Chief. "It's a small, small Navy," says Todak.

Alfred Todak, HMC, is a native of Buffalo, N. Y. Attending three years of vocational High School, he was an active participant in all sports. It was in Buffalo that he first developed his liking for hunting and fishing, pastimes that still are with him. All this happened before 1935 when he joined the Navy. Boots in Norfolk. Immediately after recruit training he was sent aboard ship. A seaman, he served aboard the USS Broome 210, and the USS Litchfield 336, stationed at Pearl Harbor. While on the Broome he made the designation of first class gun pointer, but on transfer to the Litchfield he was put to work on the deck force. The force did not have much fascination for him, so he transferred to the hospital division.

In 1938 he was sent to San Diego for Corps School. Then followed a string of hospitals and dispensary duties: Pensacola, Florida, Key West, Florida, re-enlistment in 1940. For the next three and a half years he served with the FMF, 1st division. With them he participated in the initial attack on Okinawa and Cape Gloucester with intermittent recuperation periods in Australia and New Zealand. It was in 1944 in Pavuvu, where the 1st division had taken time to recuperate and re-organize that Chief Todak was sent to a dispensary in Jacksonville, Florida.

It was on the Okinawa engagement that the Chief earned the Silver Star. Under heavy fire, Chief Todak recruited some men and they dug out bodies and survivors of men caught in a fox-hole which was covered by bomb blasts.

The Chief has three children who reside just outside of Rockville. They are: Alfred Junior, eight years; Barbara Jane, four years and Nancy Lee, eight and a half months.

Diaper Derby

A baby girl, named Susan Jennifer, was born 11 March to LTJG and Mrs. William Park. The father is a physician on Ward 3-B.

On the 14th a baby boy, David Clifton, for Joyce and Darrell Gilman of the Naval Hospital. Gilman is an HM3 attached to O.T.

Also on the 14th a boy, Mark Stephen, for Betty and John Knox, who is an HM3 attached to the Medical School.

"Show Me" State Is Home For Miss Jean Rogers

If you should walk onto Ward 5-A, probably the first person to catch your eye would be the blonde nurse behind the desk. Keeping the ward trim, operating it efficiently, and seeing to the patients' troubles is the work out for LT Jean Rogers, NC, USN.

A native of the "Show Me" state, she was born in the college town of Columbia but now makes her home in Kansas City, Missouri. After a year of work at Kansas City Junior College she entered the Saint Joseph Hospital School of Nursing and upon graduation became a Navy Nurse.

During her career she has had hospital duty at Great Lakes, Guadalcanal, Noumea in New Caledonia, Corona, Long Beach, and Bethesda. Procurement duty at Seattle, Washington, and the MCAS Dispensary at El Toro fill out a varied Navy life.

Since coming to the Center last August, Miss Rogers has worked on 108 and 5-A and may now be seen on the latter. She has liked all her duty especially Southern California and at the present she has no reason for not staying in the Navy. In fact, she says she "likes the Navy fine!"

Ed Garland, HN Served With Mer. Marine

When your reporter first saw Edward Garland, HN, he was working intently on an aged patient in ward 6-B, the Urology Ward. Upon talking with him, we found him to be a nice, well-spoken fellow, 23 years old, and a native of the Sunshine State, Florida.

Ed went to high school in his hometown of Lakeland, Florida, and at Georgia Military College. A desire to play football sent him to Georgia for a year but misfortune in the form of a leg fracture prevented this. After another year of college at Florida U., Ed entered the Navy.

Somewhere in between his schooling, Ed found time to serve with the Merchant Marine for three years. With rates of Purser and Pharmacist Mate, he made voyages to South America, Germany, and England. Entering Bremerhaven, Germany, after the war, Ed was surprised to find only a little of the city left. All the buildings were down and only a few walls were left, those in poor condition.

With an eye on veterinarian medicine, Ed's college work was pre-medical and he hopes to continue if he gets out. But right now he is hoping for Lab School which may prompt him to stay in.

Intramural Soft Ball to commence in mid April.
A meeting of all team representatives will be held in Rec. Building, Thursday, 30 March at 1300.
New colorful uniforms have been ordered. Ten (fifteen men) teams can be outfitted. Anticipating a long season with a double round robin.

Shhhh . . .

Chief W. S. Duffey, HMC of the Dental Hospital Administration states that his daughter Christine, 4½ months is not always as quiet as she is pictured.

Navy Belles

By Nadine Calhoun

Out of the shadows of the night, the world rolls into light; it is day-break everywhere.

0600 . . . The silence of the night is shattered with the quaver of a dozen alarms in tones ranging from the burglar-warning type to that of the door-bell buzzer. One by one a mechanical device (namely 'alarm clock button') is pushed. Stretches, yawns, another forty winks until the pink of the Western horizon is replaced by a pale blue canopy with golden rays of sunshine shining directly in the sleepers' eyes.

0615 . . . Monday through Monday station BKS, broadcasting on a frequency of approximately 40 Wavocycles sponsors Tex Cowaway and his SILOettes. We are convinced Joy is a "Tennessee Baby."

0620 . . . Philharmonic playing a Strauss, Dinah Shore and "My Man" (that 'other woman' in my life). "Duz Duz everything," Bromo-seltzer, Bromo-Seltzer, "Today's auto sale features cars that have been widely used from coast to coast. No other dealer will make that statement."

0630 . . . Thursday—Harlee selected as Linen Countess: semi-conscious bodies, still wrapped in sheets, trip down two flights to the first deck.

0645 . . . Whiffs of the first pot of coffee cause hunger pangs. Catalan returns from the graveyard shift . . . swollen eye lids and dead tired, but with her characteristic confidence.

0700 . . . Bridge session (with a brush and bi-carb). Everyone exchanges the habitual "Good Morning." A dental teck, hits the deck, as McPeck combs her radio and tunes in her hair. Heckel and Murphy seek refuge atop chairs while Travato chases one or two white mice.

1700 . . . "Any letters in the B box?" Is that B as in baseball, Betty, or as in Brooklyn?

1800 . . . "Who left their clothes in the Bendix?" Ten thousand offered an affirmative response! So, Miller found a likely deposit for the unclaimables and began her washing.

1815 . . . Olsen returns after a day at the ditto-machine. Rusty tasted the wine of happiness today and her intoxicated thoughts revolve around the leave to Minnesota, longies and real snow.

1900 . . . Hopper finds change for a dime, moves weakly toward the telephone; perishing from hunger, she calls the Galley. Other nickel can be used for candy bar should emergency nutrition be necessary.

2000 . . . Students studying.

2005 . . . Students interrupted by non-students who just arrived from the canteen with coffee and sandwiches.

2200 . . . To the recreation room with book under one arm, bobby pins in one hand, a coke in the other. Rest of the gang arrives with same gear and the books remain closed.

2400 . . . Flemming shuffles quietly through the dorms; only the beam from the flashlight disturbs the larkness. Black night broods over the deep. "All quiet."

"So your wife eloped with your best friend. Who was he?"
"I don't know, never met the fellow."

Patient: "If you had \$5 and I asked you for \$2, how much would you have left?"

Corpsman: "\$5."

The NNMV Varsity Team is already hard at work. Brothers is taking the pitch from James Cox (right) while Charles Walters, Bruce Tillman and Clarence Vanderveer wait their turn.

Shooting Stars

George Royster, staunch Cleveland Indian supporter is somewhat of an athlete himself. Royster, a speedy, hard fighting forward for the Admirals has had little activity on the hardwood this season as he has been hampered by an old wrist injury which he obtained in football this past season.

An aggressive ball hawk with an accurate hook shot George performed for the N.P. five Intramural Basketball squad for the greater part of the season. Joining the Admirals late in the season Royster proved his value as a handy man to have around.

A speed merchant in the backfield of Centers Championship Touch football squad for the past two seasons, George should supply a little of the speed necessary to the coming Baseball squads outfield.

Shooting Stars

This towering six foot three inch chunk of skyscraper from the state of Wisconsin contributed a wealth of rebounding strength to the Admiral quintet throughout the season. Paul Glunz a sophomore center with the station five played in 27 of the Admirals tilts contributing an average of four points per game to the cause and was outstanding around the backboards.

Paul is a keen sports fan but professes only two loves, basketball and the piano. When it comes to tickling the ivory Big Paul can cut a mean caper on the keyboard. A Laboratory Technician on the Med. Staff he intends to return to civil life and continue his music.

Once There Was A Chief Bo'sun

It was common knowledge aboard the battleship that the chief boatswain and his junior, the chief boatswain's mate, had agreed to disagree and spoke to each other only in the line of duty. It was also common knowledge that the chief boatswain was almost totally deaf and was trying to hide the fact from his superiors. Now, it seems this particular battleship was entering a drydock for some needed repairs and just as the bow passed over the sill and into the drydock itself the captain up on the bridge, finding it necessary to issue a few pertinent orders, picked up a megaphone and bellowed an order down to the foc's'le.

The boatswain, being hard of hearing turned to the chief and asked, "What did he say, Chief?"

The chief very soberly replied, "He said to drop the starboard anchor."

The boatswain promptly picked up a sledge hammer, knocked the stopper off the starboard anchor, and down went 10,000 pounds of pig-iron into the drydock.

When the Captain saw this catastrophe he directed his whole salty vocabulary at the foc's'le.

Whereupon the boatswain again asked the chief, "What did he say that time, chief?"

The chief soberly replied, "He said drop the port anchor."

The boatswain in a very professional manner swung the sledge again and dropped another five tons of metal into the drydock.

This was too much for the captain, and it turned out to be too much for the chief, too.

His whole plan was foiled; the bos'n was transferred, but so was he—to the same place!

Editors Note: Taken from the "Amphibian," February 17 issue.

High Bowler For Duckpin League

The gentleman in the picture above is Mr. W. W. Kirby, the leading bowler of the NNMV Duckpin League. At present he is leading every department but one and he is second there. Since the season he has been over in less than a month, there is little doubt that he will reap the individual prizes.

Mr. Kirby has been living in Rockville for nigh on 30 years and has been bowling for a good number of those. He is employed by the Center Fire Department.

Mr. Kirby's Tin Cans are currently in ninth place despite his excellent bowling. Harrington, with an average of 104 topped only Kirby's 112, is keeping his Tin Cans in first by a scant one game over the Battlewagons, who have caught up since mid-season. The league is and has been very close. Only 12 games separate the team from the last.

The officers for the league will end in the next month and will be: President, Mr. C. K. Dewitt; Secretary, Mr. Kirby; and Treasurer, Mr. C. Windham.

Team	Won
Tugs	51
Battlewagons	50
Tankers	47
Transports	46
Carriers	45
Net Tenders	44
Cruisers	42
Tin Cans	41
Cutters	39

"Well Bust Ma' Sides"

By Armed Forces Press Service

When a woman really loves a man he can make her do anything she wants to.

The lightning bug is brilliant. But it hasn't any mind; It wanders through the darkness With its headlight on behind.

Love is like long underwear keeps you warm, but it binds.

He: "You're the first model I kissed since I started painting."

She: "How many have you had?"

He: "Four. An apple, bananas, and you."

"Now children," said the teacher, "How do you suppose Noah passed his time on the ark?"

There was no answer.

"Well," she continued, "I think he did a lot of fishing."

"That's wrong," replied the teacher.

"Wrong!" smiled the teacher. "And why is that wrong?"

"Noah couldn't have done much fishing. He only had two worms."

E. J. BELL

Center Thumps Arlington Hall Soldiers 76-64

In a hard fought tussle played here on March 1st, Center green and white clad Admirals outscored a powerful Arlington Hall quintet. The 76-64 win over Arlington's soldiers accounted for the Admirals' 26th victory in 38 starts this season.

Big George Funk and Tom Brothers proved an unbeatable combination in the Admirals win. Scoring 51 of the Center quintet's points between them, Funk and Brothers easily waltzed off with top scoring honors. Funk was especially brilliant around the backboard as he tapped in eight rebounds for the evening.

Despite the margin of victory the score belies the closeness of the contest. Having assumed a seven point 16 to 9 first period lead the center five lost some of their fire in the second canto as the army five tied the count late in the period. With 38 seconds remaining in the first half Tom Brothers connected with a long two hander to give the Admirals a 32 to 30 half time lead.

The Admirals entered the fourth period with a 52-49 lead but were unable to hold this margin and by midway in the last frame the invaders held a 61 to 59 edge. However, Don Polizzi and George Funk counted from scrimmage in quick succession and the Admirals rolled on from here and were never headed.

Capers

(Continued from page 4)

Supper programs going. We hope all of you met the "Frantic Few," who provided some frantic antics for the amusement of all concerned. And that reminds us, next Sunday night we celebrate all the March birthdays. Drop around and eat birthday cake.

Polly Polhamus wants everyone reminded that the Benefit Card Party is next Thursday, March 30, at the Bethesda Women's Club. Bring your own partners for Bridge, Canasta, Pinochle, or other card party games. Tickets of \$1.20 including tax and may be obtained at the "Y." If one of our ticket representatives doesn't contact you, The Cottage needs the money and you'll have a good time, so make your reservations soon.

I know you just returned from the South Pacific, but there ARE some things that you must forget.

With the last chill of winter winds giving way to spring another baseball season is fast approaching. This spring not unlike last in many respects finds our Washington Nationals bemoaning a somewhat miserable corp of moundsmen. Their chances to repeat as this seasons cellar dwellers are somewhat less than it was last spring. Thank goodness they are on the road to improvement, yes but they are, they have a new manager. Well it can't last forever, but how long is forever?

A LOOK INTO THE PAST: Remember last year's Pyramid Clubs? It was jolly fun meeting all those new people. Money? What do you want for a sawbuck? Coffee, donuts, cake and if you were extremely fortunate cocktails and dancing parties. It was even rumored that some people actually made money. Oh well, the social aspect was very stimulating to those who desired something new.

Oh my poor aching sacro-iliac, how good do you have to be to win the N.J.T.? Perhaps Bradley U's quintet could supply the answer. Some fans will say, "I knew C.C. N.Y. had the goose which layed the golden egg," but here is one who accorded them what you might call an outside chance. How wrong can you be?

Latest report has it that our Medical Center nine will be the proud possessors of a set of new uniforms. A story of from rags to riches overnight or one easy way to the top, I can't describe them to you, so perhaps you will come out and give them a look see. **ANOTHER IMPROVEMENT:** Station softballers will don various colorful jersey tops for intramural play this season a wonderful promotional idea for intramural activities. Should give additional interest to sporting activity abroad.

The turn-out at last weeks Baseball meeting was very good. Of course many of the interested parties not present are expected to turn out for practice sessions. Our new coaching staff seems to be quite interested in providing proper leadership and devotion to a common cause. The station Athletic Director gave his full support to the coming Campaign.

Burmese Official Under Treatment For First Time

Convalescing at the Bethesda Naval Hospital is Ambassador So Win, Burma's first Ambassador to the United States. The past month has been an unusual experience for him, this being his first admission to a hospital.

The Honorable Mr. Nyun was born in Rangoon, Burma, in 1899, living in that country until completing high school. He then traveled to Great Britain and Scotland further his education at the Balliol College, Oxford University and Edinburgh University.

After being called to the Bar in London, England, in 1926, Ambassador Nyun returned to Burma, to practice as an Advocate in the High Court of Rangoon. This po-

New Machine At NSHA Aids Staff To Fast

By Ray W. Conrad

A boon to weary duplicators arrived here recently in the form of a collator (among other things Webster says this can be a light meal allowed on fast days). Now days are more frequently enjoyed as fast days (from work that is) with the advantages of this machine.

If you don't believe your correspondent just ask G. E. HACK,

HACK, USN, who is the operator in the above picture. Hack will tell you that the collator is to one who makes collation of notes what the photostat has been to the medical history writer or copy maker.

The principle of this machine is so elementary that it asks the question, "Why didn't I think of that?" Sixteen slanted shelves hold sixteen pages of notes, and small sponge rubber fingers push out individual pages when acted upon by a controlling foot pedal. Voila!

Dental Officers At French Lick Springs Meeting

The Naval Dental Corps was well represented by officers from the Medical Center's Naval Dental School and NMRI, and from BuMed, at important dental meetings in French Lick Springs, Indiana, March 24-29.

Attending the meetings of the American Association of Dental Schools, were RADM C. V. Rault and CAPT W. Rehauer of BuMed; CAPT L. D. Mitchell, Jr. Commanding Officer of NDS, represented the school at this conference.

Several of the dental officers attached to the NDS and NMRI presented papers before the International Association for Dental Research, also held at French Lick Springs. CDR C. A. Schlack of NMRI attended several committee meetings. CDR R. W. Wolcott of NDS, assigned to additional duty at the National Bureau of Standards, assisted Drs. Paffenbarger, Caul and Smith of that Bureau, in presenting "Physical Properties of Direct Resinous Filling Materials."

CDR J. A. English of NMRI spoke on "Oral Manifestations of Ionizing Irradiations." Dr. F. L. Losee of NDS, with Dr. W. C. Hess of Georgetown U. and NDS, presented "Estimation of Amino Acids in Dentin Protein." Dr. H. W. Lyon of NDS, with additional duty at the Bureau of Standards, assisted Drs. Sweeney, Fischer and Schoonover of that Bureau in presenting "Some Factors Which Affect Polymerization of Acrylic Resins."

Papers presented by these men will be published in appropriate dental and other scientific journals.

Travel Award To NMRI Doctor

Dr. Manuel Morales of the NMRI Physiology Department has received an American Physiological Society "Travel Award" to attend the International Physiological Congress in Copenhagen Denmark. The award was based on his paper "Physico Chemical Studies of Muscle Contraction" prepared at NMRI with the collaboration of Miss Jean Botts, Miss Eugenia Tarver and Mr. Louis Cecchini. Dr. Morales, a Reserve Lt (s) served at NMRI during the war and was formerly Assistant Professor of Physiology at the University of Chicago.

Miss Botts has been awarded National Institute of Health Pre-doctorate Fellowship based on her Ph.D. thesis prepared at NMRI for the University of Chicago.

Luncheon in honor of Sir Alexander Fleming, left to right: CAPT Enyart, CAPT Bradley, CAPT Sargent, Sir Alexander Fleming, RADM Greaves (back to camera), RADM Willcuts, RADM Swanson, CAPT Behrens, and CAPT Gillette.

Noted British Bacteriologist Addresses Reserve Group And Staff On Penicillin Therapy

Sir Alexander Fleming, Professor Emeritus of Bacteriology, University of London, and the discoverer of penicillin presented an address on March 29 to a group of reserve medical and dental officers attending a special training course at NMS, and members of the staff.

Sir Alexander visited the Center as a personal guest of the Surgeon General of the Navy, Rear Admiral C. A. Swanson and was accompanied by Mr. Francis I. Peck, American Home Products Company of New York.

The visitors were entertained at lunch by the commanding officers of the several Center activities and spent the afternoon inspecting the activities and renewing friendships of former acquaintances.

A native of Scotland, Sir Alexander studied at Saint Mary's Medical School, University of London, served as a captain, medical corps, in World War I, and returned to St. Mary's after the war. In 1919 he was made a Hunterian professor and in 1928 an Arris and Gale lecturer.

The Journal of Experimental Pathology in 1929 carried his first report on penicillin. For this he was awarded the Nobel Prize for

"Atomic Medicine", Edited By CAPT Behrens, Wins International Acclaim

"The Atom knocks at the Doctor's Door," says Capt. C. F. Behrens in his new book "Atomic Medicine," for which he has won international acclaim.

The book is unique in that it is the first text written on the subject of Atomic Medicine; and was published in 1949 by Thomas Nelson and Sons, Edinburg, New York and Toronto.

There are twenty-one chapters contributed by nineteen scientists under the able editorship of CAPT. Behrens—each a nationally known specialist in his field.

The tall, stately, soft spoken doctor-naval officer, author, editor and scientist is presently Director, Atomic Defense Division, BuM&S, and Commanding Officer of the National Naval Medical Research Institute here.

Book Reviews of "Atomic Medicine":

ARCHIVES OF PHYSICAL MEDICINE—March 1950, "... This book has set a standard that will be difficult to equal and almost impossible to surpass. The book should be read by every physician from the standpoint of his possible role in civilian defense; second to keep informed of the developments already made by atomic energy in the field of medicine and third, to learn of the future possibilities in this new era in both diagnosis and treatment—"

THE CANADIAN MEDICAL ASSOCIATION JOURNAL — March 1950, "... The whole subject of radiation in relation to medicine is most excellently presented, is well

"Hawaiian Nite" Theme Of Staff Frolic April 20

"Old Hawaii" will be the theme of the April Staff Dance to be held the 20th of this month. A combo, able to play appropriate music, will be furnished by our regular maestro, Howard Williams.

Gaily colored apparel will be in order and leis, which will be passed out, will be part of the uniform of the night.

Dancing will start at 2030 and a luau, feast to you-all, will be held at 2200.

The Dance Committee promises another gala affair and it is expected a large turnout will be on hand as usual. More tables than usual will be placed around the gym in order to take care of the overflow.

R. Keplinger M. Magnanelli Wed Recently

Richard Leroy Keplinger, HN, was married to Miss Marie M. Magnanelli in the Our Lady of Lourdes Catholic Church in Bethesda, Maryland on February 11 at 3 o'clock in the afternoon.

Father McWilliams officiated at the ceremony. The bride's sister-in-law, Mrs. Frank Magnanelli,

Public Relations

Far from what many think, Public Relations is not entirely the job of a Public Relations Officer. This Officer can only generalize, by giving information say, to local radio stations, but people like to see before believing. They can hear things circulated, but the eyes must see before firm belief is attained. Then, public relation's vital points lie in the individual. In the courtesy of the service man on a train, a bus. In his willingness to be helpful to others. Any man who is proud of his uniform, of the job that he is doing, of the service he belongs to is essentially a public relations man.

The job of public relations is fourfold. Its objectives are to satisfy the American public's justifiable interest in the activities of the Navy, to procure for the personnel of the Navy public recognition commensurate with their accomplishments, to insure continuing public support for the Navy, to foster a sustained interest in the Navy.

While the Public Relations Officer can publicize the activities and the accomplishment of the Navy, the individual can produce conclusive proof by his actions, and it isn't hard to do. Just be natural. You don't have to offer your seat to an old lady on a bus with "this is a public relations job" on your mind. We are all endowed with manners and morals. We know how to act like intelligent human beings, and by acting accordingly we are unconsciously carrying out a valuable part of Public Relations.

LCDR Dean, Miss Hansch Wed In N. Y.

LCDR Henry Taylor Dean, Jr., MSC, USN and Miss Emily Hansch were married in New York April 1. The marriage rites were held in the Brides' Chapel of the Little Church Around the Corner. The Rev. Dr. Randolph Ray, the rector, performed the ceremony in the presence of family and close friends.

Given in marriage by her brother, Henry E. Hansch, the bride had her sister, Miss Joan Marie Hansch, and Mrs. Henry F. Shurtz as attendants. LCDR Charles L. Crawford, MSC, USN, National Naval Medical Center, was best man.

LCDR Dean, director of finance here, is the son of Mr. and Mrs. H. T. Dean of Shellman, Ga. He studied at the St. John's University in Brooklyn and at Navy schools.

The bride is the daughter of Mrs. August C. Hansch of Whippany, N. J., and the late Mr. Hansch. She attended Morris Junior College in Morristown, N. J. and New York, and Columbia Universities.

After a wedding trip to Florida, the couple will make their home at 4504 Gladwyn Drive, Bethesda, Md.

Navy's Health Hits 2nd Year All Time High

The Navy's health rate reached an all-time high for the second consecutive year in 1949, according to statistics of the Navy Bureau of Medicine and Surgery, which has kept complete medical department records since 1850. New low records were established for incidence of diseases, injuries, deaths, and days lost from illness.

In 1949 the annual incidence rate for disease and injuries of all kinds among Naval personnel dropped to 376.0 per 1,000 strength—a 15 per cent drop from the previous low of 442.8, set in 1948. Except for the last five years, during four of which the incidence rate hung around 490 per 1,000, this rate has rarely dropped below 500.0.

Fewer common colds and a 33 per cent reduction in venereal diseases contributed largely to the 1949 disease and injury record.

The fact that the average person in the Navy lost less than a week's time, 6.7 days, from duty because of illness in 1949 constituted another new health record. The average number of days lost from illness varied from 8 to 15 per person during the years from 1900 through 1948.

RADIOLOGY "Announcement and Book Review—1950, "... It is an excellent compendium of current knowledge of radiation as a disease-producing and therapeutic agent, the work of some score of contributors."

SCIENCE—March 1950 "... The book is written in simple language and can readily be understood by anyone with scientific training. The terminology peculiar to radiologists has been carefully avoided except when it adds clarity to the discussion. There are chapters

The Chaplain's Corner

By Chaplain Arthur P. Finan

Less than 1% of humanity has caused most of the world's major trouble. This meager handful—no matter what their labels—are fired by a mill hatred of the basic truth upon which this nation and all Christian civil tions are founded: "That each and every human being is a child of God, deriving his rights from God, not from the State."

The technological haze which clouds our twentieth century has and blurred the outlines of the value of an individual. You are are not massed produced from any state controlled assembly line. stand or fall in the present, and we stand or fall in the future on fundamental principle that we have a specific beginning from the hand of God, and we will have a specific end in the hand of God.

The balance of power, for individual and international peace ever turn on the beams of Christ's Cross.

Against the 1% of trouble makers all mankind is looking for another 1% who will volunteer to be actual, alive, dynamic Christians. It is more important to get workers of good "in", than to get workers of evil "out".

If there is a cold war being waged, why are you not aflame with fire of Christ's Love?

Don't sit back and complain about the lack of vision that has the world. Remember: "It is better for you to light one candle than sit back in your chair cursing the darkness."

Meet Your Executive Officer:

CAPT. W. E. Kellum Has Unique And Varied Duty

CAPT. Wilbur E. Kellum, MC, USN recently assumed the post of Executive Officer of NMRI, succeeding Capt. A. R. Behnke. Capt. Kellum comes from Pensacola, Florida where he just completed two and half years of duty as Officer in Charge of the School of Aviation Medicine. "I look forward to the association with the Naval Medical Research Institute with pleasure and enthusiasm," the Captain said.

In 1920 he received his BA degree from Pomona College in Claremont, California. Then, in 1923, he received his MS in Anatomy at the University of California and following that, his MD degree in 1926 from the same University. After two years of general practice in civilian life, he entered the Navy in 1928.

His first assignment was at the Naval Hospital at Bremerton, where he did duty with then LCDR Erick J. Hakansson, recently commanding Officer of NMRI.

Following that Captain Kellum had a unique and unusually wide variation of duty, assignments including duty on the battleship USS Maryland the aircraft carrier USS Saratoga and with the Naval Electro Mission in Nicaragua. At the old Naval Hospital at 23rd and E Street, Washington, D. C. he took a course at NMS, where he first became interested in the problems of Aviation Medicine, thereupon, he was sent to Pensacola in connection with training in this field. He spent a full tour of shore duty there and participated in early research on the psychologic problems of selecting candidates for flight training. In relation to this he studied for eighteen months at St. Elizabeth's Hospital and the old Naval Hospital on 23rd Street.

While serving with an air squadron attached to the USS Saratoga he became interested in the problem of anoxia (that condition suffered by aviators flying at altitudes where oxygen is not sufficient to permit breathing) and participated in the development of an early oxygen mask. Following a tour of duty at the U. S. Naval Academy he was again sent to Pensacola to continue his studies in the selec-

tion of candidates for basic flight training. It was there in 1939 that he participated in the establishment of the School of Aviation Medicine.

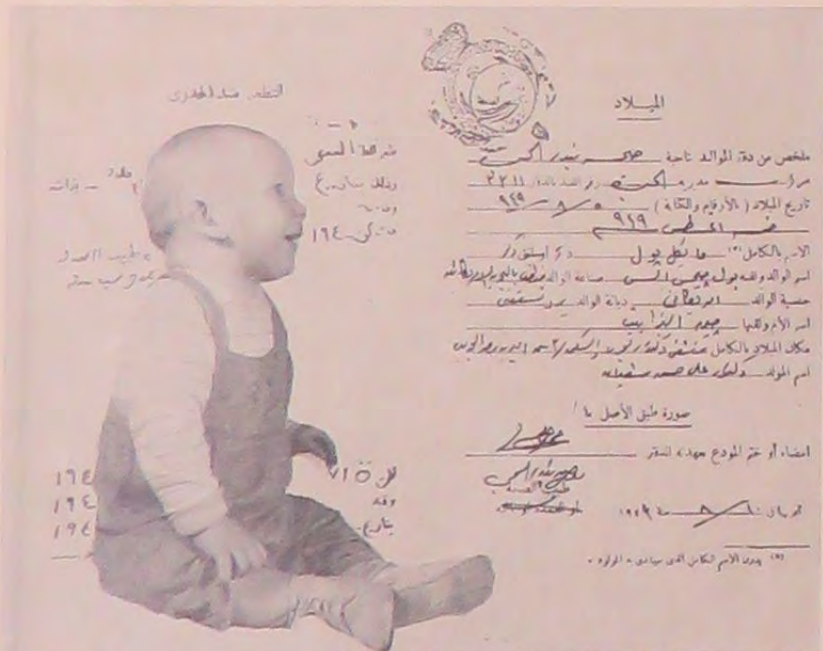

He participated in the establishment of the Naval Air Station Kaneohe Bay which shared in the Jap attack on Hawaii 7 December 1941. Then three years at BuA where he was responsible for the development of improved oxygen breathing equipment, and the program of air evacuation of casualties.

Near the end of the war he was ordered to the 5th Fleet, then Japan, where he succeeded to the position of Commander M. D. Willcuts. It was here that he received a spot promotion to Commander. Continuing the pattern he again relieved RADM Willcuts as staff Medical Officer and Fleet Surgeon to the Commander and Chief of the Pacific Fleet in the Pacific Ocean Areas.

CORPSE SCHOOL

Alycia Delish gave the cutest and toast brawl last evening when she invited Babes Laut and Clue MacFigger to share a pop-over with her Ma sent her from Flathead Island. The girls romped in the cubicle until taps had actually been sounded and the last silvery note died away (over the barracks when Shorty Snuff, her boy, from the sleepers). Golly, girls, but it was so mantic, just simply Roomantic!

American Citizen

This happy chap is not at all Egyptian. His name is Michael Paul Ellis, 7 month old son of Chief Ellis (Photo Lab). Paul was born in Cairo, Egypt and it took three different birth certificates to make him a U. S. citizen.

Prayer For Peace

By James Patrick McGovern

Men's Prayer for peace through brotherhood world-wide
Had never need so great as in this hour;
Love calls, with God's infinitude allied,
Regardless of the race, the creed, the power.
Now that both space and time, the atom's fire
And all the secrets of the sun unfold,
The helmless mind speeds to a brink so dire,
Who can fortell what death's abyss would hold!
But none can steal, like land, another's soul,
Or any virtue in its quality;
But rather will thieves make good-will their goal
When heart finds heart in true democracy.
May strength have leaders who like Christ forgive—
Who for the spirit live and would let live.

Bone Bank In Naval Medicine

Typical bone bank class scene. Instructor (Right foreground) Bob May, Navy teacher (left to right) Gene Andrews HM1, Harry Froeh-HM3, Ray Mattock HM2, Vernon Perry HM2.—Photo by John H. Carstens, Jr.

The sterile jar is placed within another sterile jar to secure a maximum amount of sterility.—Photo by Robert H. Carstens, Jr.

September 1, 1949 marked the first steps undertaken by the Naval Medical Center to establish a bone bank, much on the principle of the blood banks now in operation throughout the U. S. The general idea is to take live bone, preserve it, study it for suitability, and then, when the need arises, graft it into a patient.

Although this is relatively a new undertaking at the Center, there have been many improvements and much research work in this field. A school to train enlisted technicians has been established: a four month course with Operating Technician, and twenty-four months of obligated duty as the prerequisite. In charge of the overall operation is Lt. George W. Hyatt, who initiated the

bank here at the Center. One class of five enlisted men has already been graduated.

Plans are being considered to spread a network of banks throughout certain Naval establishments, with Bethesda serving as a Center, where bone could be requisitioned and delivered within forty-eight hours to outlying banks. The present method of storing bone is by freezing at a below zero temperature, but it is anticipated that a method of "freeze drying" can be incorporated, nullifying the need for refrigeration. This process would entail the elimination of the liquid substances of the bone, making refrigeration unnecessary. In this manner, bone stored in vacuum containers, could be replenished

with their liquids outside the body or placed into the patient, letting the bone itself absorb its nutrients from the patient's body. Preserved bone is not "live" bone; therefore it is not as good as live bone, nor will it ever be, unless a means is found to preserve this live bone.

In conjunction with bone preservation, much research work has been devoted to the conservation of skin and blood vessels. Principal figure in this work is LTJG A. R. Marrangoni, MC, USN of the Research Institute. The project is still in its infancy, although skin from rabbits has been successfully preserved and transplanted. This would conceivably be an invaluable boon, if perfected, in the event of atomic war where much burning

of human tissue could take place. A severely burned patient could be treated right under combat conditions, curbing the loss of body fluids which ultimately causes death. On the other hand, patients needing bone would have to be sent to hospitals or hospital ships where sterile technique is more practicable.

The bank itself is so set up that incoming and outgoing bones have been duly inspected for serviceability, history and type. All bones, usually obtained from patients undergoing operations where bone removal is necessary in such cases as lung or heart operations, are entered in a "deposit account book" where the source, date of deposit, type of operation, and case history are recorded. If the patient from whom the

bone is taken has had a venereal disease, jaundice or cancer, the bone is recorded in the "reject account book." If the bone is all right it is placed in the "ready account book," where the doctor can obtain information on what is available to him. Once a bone is grafted into a patient, it is recorded in the "withdrawal account book."

The bones themselves are stored in a deep freeze. They are placed within two glass jars, one within the other, to assure the maximum amount of sterility.

Certainly all who are striving to further this knowledge and these beneficial assets to modern living and in placing Naval Medicine in the fore deserve a high amount of praise and continued backing.

Bone bank as standardized by NMMC Naval Medical Center for future use in the Navy.—Photo by Robert H. Carstens, Jr.

Prepared bone is now placed in the bone bank which is maintained at a sub zero degree.—Photos courtesy INS.

This is a bone mill. Whole bone is cut into small chips in this machine. The product is called boneburger.

Re-enlistments At NSHA Hit 100 Per Cent Mark

By Ray W. Conrad

Since the enactment of the Career Compensation Act of last October the trend has moved to six year re-enlistments. At least this is true at NSHA where 100% ship over and 100% re-enlist for six years,

Needless to say the reason is "greener" encouragement which follows the pattern of the original intent of the framers of this legislation.

In consonance with the trend Arthur J. Morrison, HMC, USN, has taken the "six year step" to continue service which has included the invasion of Guam in 1944, and for which he received the Navy Unit Commendation with the Third Corps Medical Battalion of the First Marine Brigade.

Pictured above Chief Morrison is being reacquainted with the responsibilities of Naval Service as the Commanding Officer of NSHA, LCDR M. E. ZIMMERMAN, MSC, USN, administers the oath from the shipping articles, assisted and witnessed by LTJG C. E. CONNELL, MSC, USN, the school's Personnel Records Officer.

Readers of "Your Navy," NavPers 10600, will recall similar previous acts of the legislative body of our government designed for recruiting inducement. As early as March 1777, Congress authorized able seamen of the Continental Service a sum not exceeding \$40.00 and ordinary seamen or landsmen (by 18th century standards most of the present day sailors would no doubt fit this latter category) \$20.00, this sum to be deducted from their future prize-money.

This particular recruiting drive not only afforded the young men of the day an opportunity to cram themselves with English prize-money, but also enlisted their services aboard the ship Ranger under the command of John Paul Jones, Esq. Now whether it be 1777 or 1950, gold is one thing but glory is quite another.

Showing the way for the esprit de corps of the modern Marines (then not yet to Tripoli nor Montezuma's halls) the Continental Army went even further by offering service with General Washington himself and assured the youth of the nation glowing certainty of financial remuneration for services rendered and pricked their consciences with

KEPLINGER

(Continued from page one)

was matron of honor and Mr. Peter Magnanelli was best man.

The bride wore a pink suit, pink hat with light gray accessories, also a beautiful white orchid. The bridegroom put aside his blues temporarily to adorn a light gray gabardine suit.

A reception was held at the bride's home in Cheltenham Drive. Friends on both sides attended. Then came a twenty-eight hundred mile honeymoon through Indiana to the bridegroom's home in Piercetown.

The Keplingers are presently residing at 4601 Cheltenham Drive in Bethesda.

words such as, "Those who may favor this recruiting party with an opportunity of hearing and seeing their attendance as above, will have in a more particular manner, the great advantages which these brave men will have, who shall embrace this opportunity of spending a few happy years in viewing the different parts of this beautiful continent, in the honorable and truly respectable character of a soldier, after which, he may, if he pleases return home to his friends, with his pockets full of money and his head covered with laurels. "GOD SAVE THE UNITED STATES." To which NSHA can only add—amen!

This lagniappe of the Continental Congress hardly compares with the benefits of Title IV of the Career Compensation Act which is a constant source of comfort to your obese correspondent.

Three Center Officers Eye Promotions

The President has approved reports of several Selection Boards which convened recently. In the Dental Corps, CDR Alvin H. Grunewald was selected for the temporary rank of Captain. CDR Grunewald is the Executive Officer of the Naval Dental School.

Selections of the Medical Service Corps Board included LCDR M. E. Zimmerman and LCDR M. T. Sproul (W) for the rank of Commander. LCDR Zimmerman is the Commanding Officer of the Naval School of Hospital Administration while LCDR Sproul is attached to the Naval Medical School and is in charge of the Blood Plasma Department.

AMBASSADOR

(Continued from page one)

sition was combined with a political career which included ten years' service in the Burmese Parliament from 1929 to 1939. Other governmental positions held were those as Chief Executive Officer

Red Cross Helps Vets Through Home Service

The Red Cross is a familiar emblem to the veteran and his family. It was with him in training camp and overseas—in the foxhole and rear area, when sick, wounded or a prisoner of war. Upon his return, Red Cross was at the pier.

While away, his family had the home town Red Cross chapter to lean on in time of need. Now that he is back home it is natural for him to turn to this familiar emblem for help. Red Cross has a record of 32 years of serving veterans and their dependents.

In his home town the Red Cross Home Service is available to help him in solving his personal and family problems, in providing financial assistance in some cases, to help with difficulties in his claim for government benefits and in referral to other agencies in the community. These chapters have close ties with Red Cross field directors at Veterans Administration Offices where by special assistance is made available in presenting and clarifying claims and other benefits.

These Field Directors are Red Cross workers trained to assist veterans with claims for government benefits. They have access to Veterans Administration records and are able to give veterans advice either directly or through chapters, of the type of evidence needed to complete claims cases. They also appear before the Veterans Administration rating boards and the Board of Veterans Appeals to present evidence in veterans cases.

In veterans' hospitals, Red Cross service is also available. The familiar Red Cross Gray Lady and recreation service follows the veterans to the V. A. hospital. In hospitals such as this, where veterans as well as active servicemen and their dependents are served, the full Red Cross hospital program of volunteer services, professional recreation and social service is available to the veteran to help him with his hospital adjustment. And through chapters help in contacts with the community of the veteran when this is important to him and to his family.

and Mayor of the City of Rangoon. During World War II he was Controller of Civilian Defense in that city.

In 1947 the Ambassador and his family departed from Burma to the United States. There are three sons and two daughters in the Nyun family. Two children were born in Washington, one daughter being born on United Nations day, 24 October 1949.

While living in Burma, Mr. Nyun owned a large racing stable. He speaks of horses with knowledge and enthusiasm and thoroughly enjoys riding.

The Cherokee Indian Reservation here in the United States elected this Burmese Representative as its Red Indian Chief in 1949.

The opening speech at the New York Herald Tribune Forum of Youth, held last January, was given by the Ambassador. Youths from 17 countries of Asia, approximately 1000 New York high-school students and two delegates from Burma were present. During February of this year his travels in this country carried him to Minneapolis, Minnesota to address the World Affairs Center.

Mr. Nyun has returned to Burma once since 1947 and then for a period of ten days. In addition to the responsibilities of his Ambassadorship, he represents his country in the United States.

CAPT. Sargent Attends RA Reserve Course

Among the many outstanding personalities that visit the National Naval Medical Center is Capt. James C. Sargent, M.C., USNR. Capt. Sargent attended the recent Special Course in Radioactive Isotopes and Special Weapons conducted here by the Naval Medical School.

Capt. Sargent is chairman of the Council on National Emergency Medical Service of the American Medical Association, the Council advises the AMA in national emergency, and is concerned with medical officer procurement for the Navy as well as for any national emergency where the medical profession is needed. He is also Naval Reserve Consultant to the Surgeon General of the Navy.

Specializing in Urology, he practices in his hometown, Milwaukee, Wis., is Senior Consultant in Urology at the V. A. Hospital at Wood, Wis., and is professor of Urology at Marquette University. Incidentally, the Capt. said the Navy rates 4.0 at Marquette.

Capt. Sargent said he has an especially warm spot in his heart for Bethesda, for his son James, also an MD, interned here at NNMHC in 1942, and was in the Navy throughout the War.

Laff Awhile

Why do they always sit like T-H-I-S upon the bus I miss? While on the next that comes along they always sit like this?

Waiter: "Would you like to drink Canada Dry, Sir?" Visiting Sailor: "Sure would, but I'm only here for a week."

Visitor: "I'd like to see someone with a little authority." INN: "What can I do for you? I have about as little authority as anyone."

Dick: "That college turns out some great men."

Joe: "When did you graduate?" Dick: "I didn't graduate. I was turned out."

Doctor: "Is there any insanity among your relatives?"

HM2: "Yes, I'm afraid there is. They keep writing me for money!"

An American and British sailor were discussing the comparative merits of their ships. "Ow about your carriers, matey?" asked the Britisher, "Ow fast are they?"

"I don't know," replied the American modestly. "We have never opened them up. All they're required to do is keep up with the planes."

Found a little rabbit, called him Jim.

Got 18 more. Her weren't no him.

Crew's Library:

"Our Eastern Playgrounds" Is Vacation Book

If these warm spring days fill you with restlessness and a longing for the outdoors and you want to plan a holiday that is cheap and informal, you will be interested in a new book in Crew's Library. This book OUR EASTERN PLAYGROUNDS is a guide to National and State Parks and Forests of the Eastern Seaboard states. It lists, locates and describes every developed recreational facility from Maine to Florida so that you can plan a one-day drive or a full vacation and know in advance where you can picnic, swim or hike, hunt, fish and camp. Especially good for the budget-minded.

Speaking of budgets, (and we aren't?) how's the little wife? Is she able to handle the money intelligently? Just out is the book MONEYWISE, the intelligent woman's guide to everyday finance. It discusses savings accounts, taxes, investments and the ABC's of money matters.

Those friends of Horatio Hornblower's who have been following his career for years and may have been wondering how it all began will be pleased to read C. S. Foster's latest book—MR. MIDSHIPMAN HORNBLLOWER. Here we follow the episodes and adventures of Horatio as he progresses from Midshipman to Lieutenant.

Old Glory Flies Again Over USS Arizona

Pearl Harbor (AFPS) — More than eight years ago—December 7, 1941—the battleship USS Arizona was blasted into history here by seven bombs and one torpedo. The once-powerful battlewagon went down where she was moored, her flag still flying.

Today, the Arizona is virtually the only remaining evidence of old Battleship Row of the Japanese sneak attack. Within her rusted hull are the bodies of 1,092 men who were caught in the onslaught. They have been sealed in their tomb, the ship that had no chance to fight.

The Navy has been trying for some time to find a suitable way in which to pay lasting tribute to the men of the Arizona. Recently, at a ceremony attended by high ranking officers and other officials, that tribute was paid.

Admiral Arthur W. Radford, Commander in Chief of the Pacific Fleet, suggested that a flag be raised every day over the battered superstructure of the Arizona. The idea accepted, a 50-foot pole was erected from which a 30-foot by 20-foot flag was unfurled.

At the flag-raising ceremony, Admiral Radford said: "We are here this morning to do honor to the USS Arizona and her splendid crew, so many of whom are still with their ship. From today on the Arizona will again fly our country's flag just as proudly as she did on the morning of Dec. 7, 1941. I am sure the Arizona's crew will know and appreciate what we are doing."

Each day the flag will fly from 8 in the morning until sunset. A special detachment of color bearers will make the five-minute boat ride to perform the daily ceremony.

Navy Belles

by Nadine Calhoun

Buddy write a Buddy, need a Buddy cry? Huh, "Late Seventies" arrest Hattie:

Regret you were unable to attend the Belle Reunion this year. A dozen more Bethesda Alumnae met about your where and why-abouts; however, they understood your wanting to be in California when Hermie returned from Mars and Rocketyard.

While dusting the liberty today I came across a photo book from the fifties. Twenty years could never erase those memories.

Remember Louise Miller. To a body consisted of 98% water and 500 cc of plasma. Then Tiny along. There was considerable excitement in the quarters, when at the stroke of 2345, they numbered the announcement of their engagement.

Richard Lyon Martin, Jr. and Louise Miller

National Airport was a scene of bewilderment that Spring. Betty Leckie boarded a plane for Pittsburgh and came as a civilian, leaving many friends at Bethesda. Sarah left piano and drug-box behind for a few days and to see the guy who brings pretty flowers. Seems only yesterday that Helena hobbled into the OD office to log out on consent leave before returning for training. Joy was packing for the flight to Miami, trying to decide whether or not she would ride in the raincoat.

Did Grace write to you while on tour in Europe last summer? Did she realize that beginning night school at Montgomery and create such aspirations.

Still miss hearing the evening news from the Tower. Playing for the first time was quite an experience for Mary Dixon, converted pianist, who anticipated a naval career as a medical steno. Her ambition was to help people and Bethesda welcomed her.

Received an Easter card from Hattie today. She is administering sympathetic treatment to family, all of them down in 'mumps', remembering her confinement in sick bay during the festivities of '50.

Pictures surely draw the past to the present. How young our hearts were that year 'Red Shoes' and 'Cinderella' our fancies; Saint Patrick's dance; the enjoyable trip to Annapolis, Jamestown and Williamsburg (truly a center of beauty and history); the get together for the lotus. How we laughed when Hammy discovered he was actually mercury in thermometers once she got her glasses. Tell Hattie, my memory has dusted but the books still need attention. There is still much Spring to be done (and we used bread field day). Wish you could dine with us this evening opening a jar of imported steak sauce.

Personalities About The Center

Many Stations Seen By TE 3 Charles Smith

Charles Smith, TE 3, probably has sent more radio messages than Carter has made pills. He can be seen (although this is no exposition) tapping away at a Navy NTX machine or Western Union machine at the local message center, across from the information desk.

There have been vicious rumors circulated that the Editors of the News have a tendency for certain states. Furthermore, rumors have it that nine out of ten chosen for personality write ups come from either Missouri or Kansas. Well, Smith comes from Missouri, Joplin to be exact. We did it again! While living there, he attended (and completed) four years of High School.

Chicago, the loop, skid row, and Great Lakes winds are all fond memories of boot camp in 1945. From there follows a long list of Naval Air Stations, namely Memphis where he began striking for Radioman (and he struck and struck and struck until in 1947 he made TE 3 at NAS Anacostia, but that is jumping a few stations ahead of the story). Then came NAS Bunker Hill, Indiana, NAS Olathe, Kansas, NAS Memphis, Re-enlistment after three months as a civilian, and Receiving Station, Washington, Amphibious base Soloman, Maryland, NAS Patuxent River, Naval Gun Factory (breathe), Naval Radio Station, Arlington, Va., Naval Barracks, Washington, D. C., Anacostia, and the Navy department (now take in a deep breath for more).

After all these shore stations, Smith thought that he would get a little sea duty when he received his orders to Palestine in 1948. But what happened? He flew! From here to Cypress, then a ship. For three glorious days, but Haifa Bay came into view and land and more ratios at the Communication Station for the American Consul. He liked his duty so much that after eleven months of it he shipped over there.

But all good things and bad alike have an ending. He was transferred (flew again!) to the Naval Barracks in D. C., then Quarters K. And to round off the circle, to complete the cycle, to NNMCM in November 1949.

Charles has taken advantage of his G. I. bill of rights. While stationed at the Naval Gun Factory he took six months of flying and earned his private license.

Charles Smith and Betty Brown (wonder where John Doe is?) were married in 1946. They have a two year old daughter, Peggy Louise, and another baby to be born soon. Charles says that he hopes it is a boy so that he can keep the Smith name from becoming extinct.

"Grumpy" And Small Stores Synonymous

Another old-timer at the Center is Camden Windham or as he is better known, "Grumpy." Practically a plank owner, Grumpy missed that honor by only a couple months.

Our small stores man was born in Alexandria fifty-six years ago although his appearance belies that fact. Today he is an ardent sportsman enjoying boating and fishing and duckpin bowling; he is treasurer of the Center league. A forty foot cabin cruiser is his pride and joy and it is a safe bet that he will be out on it much this summer.

Windham started work with the Government way back in 1916. At that time he began at the old General Engineers Depot, now Fort McNair. He was there for several years and then went to the Army Quartermaster Corps. After working for them for three years he tried out some businesses for himself for eleven years in Washington. Then Grumpy dissolved his interests and went over to Saint Elizabeth's in 1932. He worked there for ten years before the Center got him in 1942.

His rate is that of storekeeper and he comes under the Disbursing Office and the Bureau of Supplies and Accounts. He's married and has two daughters, ages 26 and 30.

Ex-Sergeant Praises Center

Having been a patient in the National Naval Medical Center at Bethesda, Maryland in 1947 and most of 1948 with cellulitis, I am taking this means of expressing my appreciation at the treatment I received there.

Due praise should go to the doctors, nurses and hospital corpsmen whose untiring efforts make one's stay there as comfortable as could be desired. I trust you will be able to find space for my words of appreciation.

Ex. Sgt. Edward (Skip) Williams, Verona, N. J.

This letter was taken from the Vernon-Cedar Grove Times and sent to the editors of the NEWS.

SIR FLEMING

(Continued from page one)

medicine in 1945 and many other awards. He was made a Fellow of the Royal Society in 1943 and was knighted in 1944. The John Scott medal followed in 1945.

Sir Alexander arrived recently from London on the Queen Mary to give a series of lectures to medical groups in this country.

A Dentist, A Physician, A Pianist

A small village in the lake region of Northern Wisconsin, Prairie Farm, is the home of LTJG Paul Natvig, MC, USNR. His father has been practicing medicine there for the last 32 years and now the son is following. After the "usual high school days," Dr. Natvig says, he attended St. Olaf College in Northfield, Minnesota. There he majored in chemistry and continued studies on the piano which he began earlier.

Following graduation he went in the Army and was entered in the ASTP program and sent to Loyola University School of Dentistry at Chicago. In his junior year the Army decided no more dentists were needed and discontinued the program. However, he went ahead and completed the course and graduated in 1945 with the degree doctor of dental surgery. With an idea of specializing in maxillo-facial surgery, he decided to work for the degree doctor of medicine so only four days later he enrolled at Marquette University School of Medicine at Milwaukee, Wisconsin. Upon receipt of his third degree in June of 1949, he entered the Navy as an intern here at the Naval Hospital.

The young, blond doctor, a fine pianist, enjoys music very much and also likes fishing on the lakes of his native northern Wisconsin. He also has a flair for the fourth estate, being the editor of a medical school journal and a high school yearbook.

Dr. Natvig plans on a civilian career and on completion of his internship will begin a residency in maxillo-facial and oral surgery at the University of Michigan Hospital in Ann Arbor, Michigan.

Diaper Derby

A baby girl was born on the 22nd to Lee A. and Pearl Haney. She was named Nadene Frances and she weighed 7 lbs. 8½ oz. The proud father is a Chief Hospitalman on duty at the Naval Hospital.

On the 23rd, a baby boy, Robert John, for Adam J. and Helen Goepfert. The youngster tipped the scales at a healthy nine pounds. This papa is an HMI at the Research Institute.

A boy, William Ross, to Elizabeth and William Champion on April 1st. LTJG Champion, MC, USNR, is a resident in surgery.

On April 2nd, a boy to Ann and Paul Hamilton, named Caywood Lee. The father, Dr. Hamilton, is a resident in pathology.

NSHA Notes And Quotes

By Ray W. Conrad

The parade of distinguished speakers and lecturers continues to keep NSHA in its enviable and unique niche among schools of this kind. Officer and enlisted students in commissary management recently heard two lecturers from the Department of Agriculture. On March 21, Dr. J. S. STEIN of the Meat Inspection Service of the Bureau of Animal Industry opened the eyes of the students to the laws and regulations concerning the inspection of animal products for human consumption and methods of enforcing the laws and regulations.

The next day Mr. C. E. MURPHY of the Production and Marketing Administration not only had an interesting discourse but also amplified with projected slides on his subject of "grades" and "grade-standards" of foods as administered by his department.

Not to be outdone by the enterprising Commissary Department, the Personnel Management Classes came in for their full share of "extra-curricular" instruction during this same period. Mr. N. J. ASBURY, Management Engineer, Office of the Secretary of the Navy, spoke with dynamic delivery and a thorough command of his subject entitled "management improvement technique."

In a memorandum to the Commanding Officer this month, the Surgeon General of the Navy has expressed his appreciation for NSHA's participation in the humanitarian cause of blood donor program at the Nat'l Naval Medical Center. The Surgeon General was gratified to learn of such splendid response from the donors and made special mention of LCDR W. W. WILLGRUBE, MSC, USN, who is in charge of the program at the school. Constantine's vision has been recorded in history for a very different reason but the Surgeon General too may well have uttered at this Easter time, "In Hoc Signo Vincas!"

Sea duty, the tireless suitor of naval personnel, has again overtaken one of our enlisted instructors, Ralph GEDDES, HMC, USN. The Commanding Officer, LSDR M. E. ZIMMERMAN, MSC, USN, took this occasion to commend Geddes for a job well done. On 13 March 1950 at meritorious mast Geddes was commended—"for outstanding diligence, resourcefulness and initiative in the performance of your duties. Your research in and preparation of instructional material showed a marked degree of insight and understanding of the subject, and resulted in a comprehensive compilation of accounting procedures. Your military bearing and conduct have been exemplary. Your work has contributed materially to the carrying out the mission of this School, and is in keeping with the highest traditions of the naval service."

All hands can take aim at this commendation as a "target named desire." Students and staff express every good wish for Chief Geddes' continued success in his new assignment to USS BADO-ENG STRAITS subsequent to 7 April 1950.

Ptomaine has taken its toll in the enlisted class where menu planning has wound up the course in commissary management. Competent authority has it that such menus should be consumed only by the enemy (or perhaps the instructors). Que pasa?

Not Much Research Involved

By J. P. Walsh

March 31 to April 6 was National Laugh Week. Did you? Probably not in this extremity of ennui called spring in Maryland, but you may have found a few. The cherry blossoms coming and going year in, year out like a bad joke on the Chamber of Commerce. . . . Incidental intelligence from a local cabby. . . . In twenty years of observation of this local phenomenon the blossoms and the festival have been coincident just once. The little buds bud between the last week of March and the last week in April. Last years early blooming was the one lucky break. The cabby suggests magnolias, more reliable and pretty too. Next year we suggest pictures of the people who take pictures of the blossoms. You've seen them droopy as a blossom without hormones, looping around the Nation's Capitol with cameras slung over the shoulder and a mote in their eyes for every cloud banked monument. . . .

And some people laughed at a new book called "science is a sacred cow", that laughed at science. There were a few shudders which could have been tacit laughter observed in our building but spring and laugh week caused no general thaw in the solid front of science.

Nor could you take spring and laugh if you thought of all those panther shirts, chartruese gauchos and aloha tee shirts that would greet the cool night air without the protection (ours) of a coat. Sailors all jois de vivre and bold look off to greet the season with Bock beer along Bethesda's great white way and inspect the junior delinquents (Hot Shoppe Lodge) who will begin their annual encampment in that parking lot.

Come spring and the new autobahn and with last year's cherry trees, the facade of the Whippet will no longer be. There are some people no doubt who can laugh at these losses, but we can't neither in spring nor in laugh week.

RADIO PROGRAMS

All programs now heard on channel C, will be plugged through channel A in the future. Channel B actually has no outlet, but it makes a nice panel. "Portia Faces the Doctor" is being replaced by "Life Sure Is a Mess." Taps will be sounded and the station will go off the air during the third quarter of the second night basketball game.

Learn-To-Swim Drive Begins Here Today

The YMCA's 36th Annual Learn-to-Swim Campaign gets underway today. The pool here at NMMC will be used again this year in the program that taught some 350 youngsters between eight and seventeen to swim fifty feet or more last year.

The classes will be taught by qualified YMCA and American Red Cross instructors, however it isn't necessary that prospective swimmers be members of the YMCA.

The Medical Center pool has been reserved for this program from 1500 until 2000 April 10-15 inclusive, with the exception of Tuesday April 11, when the pool will be used from 1500 until 1800 only.

Life Saving Course Starts Next Week

Admiral Willcutts has completed arrangements for an Advanced Instructors' Course in Life Saving and Combat Swimming to start at NMMC on April 17, 1950 and continue through May 12, 1950. This course is similar to those given at West Point, Annapolis, and Quantico and satisfactory completion of it earns a nationally recognized Instructor Certificate in Life Saving.

The course is open to military personnel of all military installations of greater Washington who can meet the physical and intelligence requirements. It is a stiff course and success in it requires good physical coordination and mental ability equal to that needed for Officer Training courses.

The course will be given by Mr. Joseph Aranoff, Assistant Director of Water Safety, American National Red Cross, District of Columbia Chapter. Text books will be provided to all registrants, free of charge. Classes will be held from 1300 to 1600 Monday through Friday. Those interested in the course should consult their Commanding Officer and Lt. Atkinson, Recreation and Welfare Officer.

A demonstration Water Carnival is planned at the completion of the course. We understand one demonstration will include swimming with three out of four arms and legs incapacitated. That could be mighty useful some time.

The two ladies above are the leading distaff bowlers for the Center Duckpin League. Carole Lawrenson, on the left, sports the high average for the fair sex with a 99 mark. D. Owens, on the right, is only a pin behind her. They also run one-two in the strikes and spares. Owens holds the season mark for a three game set with a 356.

Cottage Capers

If this keeps up we'll be known as International House! Miss Anniemarie Fonfara and Mr. Klaus Wende from Germany have been assigned by the National Welfare Assembly to the "Y" Cottage to observe and study the workings of democracy. It is fun to see things through their eyes these past few days and we hope they are enjoying us as much as we are enjoying them. We were also glad to welcome Michelle Boisseaux of France to our group. Michelle took to American square dancing as if she had been born in Texas. On the other side of the ledger we are losing Barbara Lee to the State Department, Foreign Service. She is being assigned to Salzburg where she will be working with displaced persons.

Under the heading of things that shouldn't have been missed this month at the Cottage was Dr. Taylor's calm in the face of the atom bomb—said he, it's here to stay, and we might as well make peace with it. Lou and Anne's wedding, already sufficiently publicized, was THE social event not to have been missed. For pure mayhem you shouldn't have missed square dancing in the Moore's basement along with 12 other couples. For entertainment value we nominate Butch's variety show wherein he accidentally brought the house, and incidentally his partner, down.

Things NOT to be missed are on the calendar for April. There's the Cherry Blossom Festival, and we are dancing in the D.C. Folk Festival. National YWCA emphasis week comes during the latter part of the month with its slogan "A Better World Begins With You". There will be some thought given as to whether this might not really work if we tried it out.

There'll be another dance at the BCC Rec Center, Saturday, April 8 at 8:30. But lets not stay up too late because we're due at Sunrise Services the next morning. For those who make reservations there will be an Easter breakfast following—and if I remember last year—we'll need lots of hot coffee.

Friday nights are set aside for roller skating, ice skating, bowling, and special outside parties. "Y" Cottage Club members have to take off because "Y" Teens have the use of the building that evening. We're sorry to say goodbye to Tony Majenza of Navy Med School who is heading for Corpus Christi—but we're glad he is running a last swimming party before he leaves. It will be on Saturday, April 15 at 2:00 and there will be supper for the gang at the Cottage afterwards.

Lab 13 News Clips

By Glin Winston

The graduation of Lab 13 will be a slight loss to our Recreation Department. Two of the basketball team's best players, Braun and Armstrong, are leaving for other duty stations this month. This will be only a temporary set-back for a few days after the class graduates a new one will start and Coach Frates will have an untapped source of probably good talent.

Are you one of the many who is still wondering about the bandage on Everett's arm? Well relax, it's probably not what you're thinking. As most everyone knows, he takes pride in the fact that most of the students refer to him as the "whip." This is his favorite name and he tries to live up to it by cracking it at every chance he gets so he must've tightened down on Ryan and Paul Deaton for they've been awfully quiet lately, and in the process got his arm caught.

Now that Lou Kovarik is back from leave he is up to his old tricks again. Besides ruling his place (that awful room) with an iron hand, his partner in crime, Glunz, along with Hicks, so I am told, are just waiting for their chance. They sent Bill Elidaes along to get a head start. The way Glunz talks, in the next ten years they will be big time operators.

Incidentally, with Hicks coming on the staff, probably in chemistry, John might as well pack his bags for with that trio mere existence will be absolutely impossible.

Med School Scuttlebutt

By H. R. Fallers

Elmer Francis Hawes, HMI, turned on the second of April another tour of duty at the Medical School. Hawes, who previously on the staff here, left June of 1948 to go aboard the Worcester, CL-144 on which served until March of this year. Welcome aboard, Elmer.

The sixth class to attend Blood Bank School commenced classes on the third of April. Six students, who are already laboratory technicians with a minimum of one year's experience, spend the next two months in Blood and Plasma Department, Blood Donor Center, the Department of Serology, and the Bank. During the first week of April, Class Number Five graduated three students. They were W. Sterling, HMI, Robert Burke, HN, and Paul Terrell, HM2.

The last month was an event one for the Medical School for it saw the return to duty of Roy Leo Schroer, HM2, who spent eight excruciating weeks on the sick list. After his operation and rather long and painful convalescence, Schroer was indeed happy to get back to duty regular watches.

Several of the men here have received letters from Bill Eliad, former member of the Department of Blood Chemistry. Bill was charged recently and is now making plans to attend college in Philadelphia.

During the next two months, of the old hands on the staff will either going to sea or will be charged from the naval service.

The cognomen is now Lieutenant Commander Sudduth, MC, USN. The whole Medical School joins in expressing our congratulations upon your promotion, Dr. Sudduth.

Red Cross Drive Over Top Here

The Red Cross Annual Drive funds went over the top at Naval Medical Center on March 12th, the 7th day of the drive. The Center Quota of \$2,096 was completed. However leaders of fund drive continued accepting contributions until the end of March so that each individual who so wished could be a member of the organization and signify their support.

As of March 24th, \$2,668.74 had been credited to National Naval Medical Center. We are proud of the record of giving this station and thank all who gave. The chairmen and keymen for the Drive deserve a special vote of thanks for the excellent job they did.

March 17th, St. Patrick's Day, and the birthday of two sets of twins at the Center. On the left, Peter and Paul Chambers held by their mother, Mrs. Johanna Chambers. Peter tipped the scales at an even 6 pounds, while Paul weighed in at 6 lbs. 11 oz. Col. and Mrs. Chambers, who have three other children, reside in Rockville. On the right Joseph Frank II and Joseph Sylvester Winauski Jr. Frank was four pounds, fifteen and three-quarters ounces at birth while Sylvester was five pounds, ten and one-half ounces. Mrs. Mary Louise Winauski is the mother and her husband, Joseph S. Winauski, SN, is on duty aboard the USS Macon.

First Patient Retired Under New Pay Bill Leaves Center

The first naval officer to be placed on the permanent retired list for physical disability under the Career Compensation Act of 1949 left the Center the first of April. He was LTJG Vincent F. Foster, USN.

A naval aviator, Mr. Foster was injured in an airplane accident at Patuxent River in February 1949. He was a patient here from then 'til retirement.

Mr. Foster appeared before the "Clinical Board," which is composed of three medical officers, in January. This panel recommended his appearance before the Physical Evaluation Board in February which in turn sent the case to the Physical Review Council of the Navy Department. Final approval came from the Secretary of the Navy who approved his retirement effective 1 April 1950. His disability was rated to be 60 per cent in

Baseball Tickets Available From The Red Cross

Peanuts! Popcorn! This old familiar cry will soon be echoing across crowded baseball diamonds all over the U.S. If you are a baseball fan, don't think that being in the hospital will keep you from Griffith Stadium.

If you are a liberty patient or can get special liberty, here's the scoop: The Red Cross receives fifty tickets for every Senator home game from Griffith Stadium management for those home games which fall on Tuesday night, Thursday night, Saturday afternoon or Sunday afternoon.

The Motor Corps furnishes transportation for all these games, and we leave from the ambulance entrance.

We are not invited to attend the opening game, but we plan to be among those present April 20th at 2000 when Washington meets Philadelphia. Servicemen and veterans are welcome, but if you're the former, don't forget that a uniform is regulation.

If you're interested, see your ward recreation worker or drop by the Red Cross recreation office, Room 102, and give us the word.

accordance with rating schedules of the Veteran's Administration in current use.

The Commanding Officer of the hospital, CAPT. Robert Gillette, MC, USN, wished Mr. Foster good luck in his new undertaking on the occasion of his retirement. The former aviator plans to live in Westchester or Long Island, New York and "raise children and Irish setters."

Many Foreign Visitors Come To Center

Mr. Ernesto Fuenmayor, Venezuelan engineer, visited the center recently on authorization of the NO. His visit was sponsored by the Venezuelan Embassy. Mr. Fuenmayor is in this country making a study of hospital administration and of the buying of hospital equipment.

On an unclassified basis, Professor H. B. Fenn of the Guy's Hospital, London, England, visited the Naval Medical School in March.

In a letter to RADM M. D. Williams, Miss Margaret E. Patterson, secretary of the Science Clubs of America, thanked him and the staff for courtesies shown the winners of the Ninth Annual Science Talent Search, who visited here.

Dr. Robert Stoempfli, of the (Continued on page 2)

F. N. Neilson, HMC, snapped this picture of the cherry blossoms in Kenwood during the Cherry Blossom Festival. The scene, which is along Dorset Street, expresses fully the beauty of the lovely trees.

CAPT M. J. Aston, CO, NMS Retires After 33 Years, Naval Service

Captain Melville J. Aston, MC, USN, Commanding Officer of the U. S. Naval Medical School will retire on 28 April 1950. After a trip to Europe Captain and Mrs. Aston plan to live permanently in Philadelphia, where the Captain will teach in one of the City's Medical Schools. Also, he will go into private practice in that city.

Captain Aston has held his commission as a Medical officer longer than any officer presently stationed at the Center. He has had a full and varied career of thirty-three years. He has been active in various fields of medicine, both as a teacher and lecturer. Recently he has devoted much of his time to Atomic Medicine. Many scientific Journals have carried his articles and observations throughout his Naval career.

In May of 1917 he became a regular Navy doctor. He studied at the Naval Medical School, Washington, D.C., with an additional assignment at the Naval Hospital there. Then followed three ships, the USS North Dakota, USS Black Hawk and the USS Baltimore. In the course of his career he served aboard the USS Amphion, USS Shawmut, USS Chaumont, USS Arkansas, USS New York and as Senior Medical Officer aboard the USS Solace.

At the outbreak of the war Captain Aston received a letter of commendation from Admiral Nimitz for his handling of casualties at Pearl Harbor.

In 1943 he was Commanding Officer of the NH, Norfolk, Virginia and in 1945, the NH at Philadelphia. While at the Philadelphia Naval Hospital he received a letter of Commendation with authorization to wear the Commendation Ribbon, from the Secretary of the Navy. He was District Medical Officer of the Third Naval District

prior to his appointment as Senior Medical Officer of the Naval Shipyard, Portsmouth, Virginia. In August of 1948 he took command of the Naval Medical School here.

Captain Aston is authorized to wear in addition to the Commendation Ribbon, the Legion of Merit, World War I and II Victory Medals, American Defense Service Medal, American Campaign Medal and the Asiatic-Pacific Campaign Medal.

The Captain belongs to countless associations and medical groups. Outstanding among these are: the American Medical Association, American Urological Association, a diplomate of the Ameri-

Cabin Cruiser Now Available For Parties

The Cabin Cruiser "Catherine" is made available to enlisted and officer personnel, their dependents and occasional guests upon request of the Welfare and Recreation Officer, Potomac River Naval Command. For further information and application blanks inquire at the local Recreation Office, Extension 672.

Limitations as to the size of the party has been set at twelve. The cost for the day's outing is set at five dollars, with all recreational equipment furnished (except for bait in the case of fishing). Lunches will not be furnished by the Catherine but each party will furnish their own lunches. The limits of the trips are set by the Memorial Bridge in the upper extremities, Quantico, Virginia, and the Anacostia River in the lower.

There has been a definite schedule set up to assure a maximum amount of usage. The boat will be made available to officers on Mondays, Wednesdays, and Fridays; to enlisted personnel on Tuesdays, Thursdays, and Saturdays. On Sundays starting with the 23 of April the Enlisted Personnel will alternate Sundays with the Commissioned Officers.

There is no specified uniform required, although if a sporting uniform is worn it must be complete. Bathing attire is also in form, if desired. All trips must end before 2300.

This is an excellent recreational opportunity. Reservations must be made well in advance, so call your Recreation Officer and get that application in now.

Looking At The Past With The NEWS

In April of 1945 the painting in the lobby of the auditorium was presented to the Center. It depicts Jesus at the Pool of Bethesda healing the lame. A work of Violet Oakley, it was presented by Mrs. Barron P. DuBois, President of the Colonial Dames Society Chapter 3. Those attending the ceremonies included Mrs. Woodrow Wilson and Mme Eze, wife of the former Chinese Ambassador.

Nineteen forty-six saw a graceful water ballet performed at the Recreation Building. The NEWS pictured several of the beautiful acts presented.

CAPT. C. F. Behrens assumed command of NMRI in 1948 relieving CAPT. E. G. Hakansson who had been CO since '43. The NEWS

Salt Shaker Sailor

January 3, 1950

Dear Bethesda,

It seems a long time since I last saw the tower. When I left, I was frankly glad to go . . . I would be a sailor at last! I often griped while I was there. I had come in the service to go to sea, but little did I realize the comforts that I would forego.

A comparative analysis would probably put to better advantage what I want to say. First, a hospital is definitely not like a ship! Although we call the hospital walls bulkheads and the floors decks, they do not become tangible, as such, until we come aboard a "real-go-to-sea" ship. Everything is different here. The way things are done. You live by the PA system. At six (and sometimes at five) in the morning the boat's pipe blasts a "groggy" get-up-and-get-out in your ear; "Reveille, reveille, Make up and trice up all beds. Reveille." And you do get up! No one minute more. The MAA is there like a robin, bright and early, but he isn't looking for worms. You eat (All hands lay down to the mess hall for chow.). You work (All hands turn to.). You sweep (Sweepers man your brooms, clean, sweepdown all decks and compartments fore and aft. Sweepers.). And if your lucky, you go on liberty (Liberty will commence at 1630 to expire on the dock at 0800.).

Yes, Bethesda, you're not a ship. And somehow, I miss you. I miss the lazy summer days by the rec. hall. And then again, I like shipboard duty also. They are different, but they both have their advantages.

The other day we were standing in front of our compartment, waiting for lower deck inspection when a group of old "salts" began telling sea stories about the war. One had just finished telling a story about how his ship had nothing but coffee and beans to eat for a week. "That's nothing," started another, "My ship was out for a month and we couldn't get supplies when we returned so all we had was water and peanut butter for a week and a half." A trusting "boot", who was standing nearby asked naively, "What brand peanut butter?" A hush fell over the group as the Captain appeared.

We shove off for maneuvers next week. First sea trip! Anxious. I'll tell you all about it my next letter.

Your Salt Shaker,
A. Sailor

NNMC

By Ronald Bourgea

They built from earth to sky. Their work
Admired by the passerby
Is not a feat of fancywork.
No gilded palace for the eye,
But it claims all of those who see
Its beauty in simplicity.

The house of sickness is no place
Where beauty reins sublime
In outward looks of pallid face,
But written in the heart of time:
A sort of understated word
Not uttered by the mouth, but heard.

Greeting Cards Available At RC

Have you some one to whom you wish to send a Birthday Greeting Card? If so, ask your Red Cross worker on your ward about the birthday cards available for you.

Among Red Cross supplies available to patients at N.N.M.C. are birthday cards and holiday greeting cards, which are yours for the asking.

NEWS REVIEW

(Continued from page 1)

printed samples of the new rating badges that were to soon make their appearance.

April of last year watched CDR Glenn F. Lyon, MSC, USN, go into civilian life after more than forty years of naval service. The new Secretary of the Navy, John L. Sullivan, was also front page news.

Navy Studies Radioactive Gallium

One of the projects now being undertaken by the Medical Division is an extensive study of radioactive gallium which was initiated by the Navy three years ago. It is of interest because of its short half-life (14.3 hrs.) and a tendency to concentrate in bone that may make it of value in studying and treating bone disorders.

CDR. H. C. Dudley, Head of the Medical Allied Science Section in the Navy Medical Service Corps at Bethesda, who has been instrumental in conducting the Navy research, was made a consultant to the Medical Division this month and will assist actively in carrying out the research here.

Originally the project was a test one for the Office of Naval Research which has an engineering interest in gallium. A routine search of literature revealed nothing on the relatively rare metallic element. The Navy group then began a study of the biochemistry of gallium with emphasis on methods of analysis and types of gallium-containing compounds which could be injected in animals for study.

By chemical analysis, the group made a number of distribution studies and found that gallium concentrated quite heavily in the bones (although not exclusively there). At this point, the group began using radioactive gallium to attempt to further localize the points of concentration. They reported it was concentrating most strongly in parts of the bones where growth was the greatest and also in healing fractures. At this point the medical science group brought the problem to the attention of the Naval Hospital in Bethesda.

Tracer amounts of radioactive gallium were inserted in human patients there. Because of the short half-life, it was desirable to investigate further the problem at Oak Ridge, and considerable studies have been made by the Division over the past few months with rats and pigs as the experimental animals.

CAPT. ASTON

can Board of Urology, and the American Board of Preventive Medicine and Public Health, fellow of the American Public Health Association. He is also a fellow of the American College of Surgeons.

The entire staff of the National Naval Medical Center join in wishing Captain Aston godspeed and a glowing post-naval career.

The credit man at a department store recently received this letter: "Dear Sir:—Once a month my wife and I put all our bills on the table, draw six at random and pay them. If you give us any more of your impudence, you won't get a place in the shuffle next month."

Man (running breathlessly into a police station): "Sergeant, lock me up! I just hit my wife with a baseball bat."

Desk Sergeant: "Did you kill her?"

Man: "No . . . lock me up quick!"

The Chaplain's Corner

By Chaplain Frank R. Morton, USN

In every village and city Americans made ready and observed the supreme days of the Christian calendar—Good Friday and Easter. These days were not legislated holidays but the time for all Christians to join corporate worship and to pray unto the Saviour of all men for the joy and peace of the Cross and the Resurrection.

Good Friday and Easter, 1950, are history. The Message is Eternal. You and I live in the glory and in the shadow of their sacredness. However, to be of import for us those days must be a part of our being.

Mrs. Frances Swarbrick of Anna, Illinois, has placed the fact of living Good Friday and Easter before us in her great Spiritual Poem THOU:

The Crucified drew near tonight,
And I cried out to see
The wounds still bleeding, and the eyes
Still pained that looked on me.

I said, "O Lord, are they not healed,
Those wounds of long ago?
Our age proclaims Thee—surely none
Today would hurt thee so!"

My Lord replied, "Each ingrown soul
That shuts its door,
A world's neglect and unconcern
Opens the wounds once more.

"As long as hands would drive the nails,
I feel the pain.
A hating heart sets up each day
My cross again."

"Ah, Lord," I cried, "what heartless one
Wounds Thee so cruelly now?"
He held me with a long, long look
And answered gently, "Thou."

Above is part of the large congregation which was present at the Easter Dawn services held in the gymnasium of the Recreation Building. The Bethesda-Chevy Chase A Cappella Chorus furnished the Easter music and the sermon was delivered by Dr. Fred C. Reynolds, Superintendent of the Washington East District of the Methodist Church.

Correction

In the last issue of the "NEWS", 10 April, proper credit was not given to International News Service, responsible for the two photos at the extremes (bottom) of the Bone Bank Pictorial. The middle picture was by Robert H. Carstens, Jr.

The Editors apologies also go to the Chaplain Corps and employees of Center Files for the disconcerting effect caused by the short filler "Radio Programs", which had the effect of Orson Wells' Martin invasion.

While in the apologetic mood, correction is made in that "Grumpy" Windham was not born in Alexandria, Virginia, but in Maryland. He knit his brows and said, "I wouldn't be caught in Virginia."

FOREIGN VISITORS

(Continued from page 1)

Jungfrau Joch Altitude Research Station, Berne, Switzerland, conferred with members of the NMRI staff on common problems in biophysics and altitude physiology. The visit was on an unclassified basis and was requested by the Department of the Air Force, Washington, D. C.

Drs. Koloman Laki and Jol Gergely, both from Hungary, visited NMRI on an unclassified basis, for the purpose of working with Dr. Morales.

From a request by the Ambassador of Australia through the Department of State, two Australian doctors were permitted to visit NMRI. Dr. Edward H. Derrick, Deputy Director, Queensland Institute of Medical Research, and John I. Tonge, Director, Queensland Laboratory of Microbiology and Pathology, discussed recent developments in rickettsial and virological research.

On a general courtesy tour, Claude Frankaw, Ministry of Health, London, Dr. Edward Martin, Ministry of Health, London, and Dr. John Smith, Department of Health for Scotland visited NMRI and the Naval Hospital.

Navy Belles

By Nadine Calhoun

When seersucker uniforms are packed from foot lockers; when gals sew rates on white shirts; when \$25.00 silks and woollens go to moth balls and \$6.98 prints to the eye; when nature lovers to and from Bethesda for instead of using Capitol at, then Spring has made its debut. This particular season has witnessed the "turn-to" of numerous. After 7 years of active duty, Gerry Gruber Smith is now working research in the science of domesticity and is very happy in her assignment to ComServ.

There is a sparkle in the eyes of a sparkle on her left hand a pair of wings-over her heart. It was a balmy Spring night for a McSwain when she swathed face, arms and legs with what thought was skin lotion but was soon revealed to be hair oil. . . . which brings up the question, "What do bearded ladies

Football season offers variety this Should you be in the bleachers (figuratively speaking) when it invades the diamond and did you yell "Betty" to one of team members, you will get answer.

Personalities About The Center

Another Missourian, Tiny Schroer

When someone is around 6'3" and weighs in the neighborhood of 230(?) the monicker of "Tiny" is inescapable. Roy Leo (Tiny) Schroer is the one we are talking about now.

This "poisonality" is an affable HM2, a laboratory technician working in bacteriology which is one of his favorite subjects. Not that the NEWS is in a rut, but Tiny is also from Missouri as several others have been. Jefferson City claims him or rather he claims Jefferson City as his home.

Tiny enlisted in Jefferson City the first of 1943 after finishing school there. He has served at several training stations and on three ships. One was the USS Quartz, IX 150, a concrete barge. In making a cruise to Pearl Harbor this vessel, which had no power of its own, sprang three leaks. He was also on the Missouri and Ross (DD).

When asked if he would stay in, Tiny shrugged. "Maybe. But if I get out I will probably go to college and major in bacteriology." Aside from the lab, he also likes sports, baseball, football, hunting and fishing, and bowling. He has one other like, liberty, but who doesn't?

be a valuable experience to sit down with young people from other countries and find out how much we have in common. Klaus has worked for the American government in Germany for a number of years and was quite prepared for the States, but readily admitted that at one time he thought of them only as skyscrapers, cowboys, and Chicago gangsters. Annemarie Fonfara, our German girl, wrote in a report to her sponsoring agency that she was impressed by the American's "respect for each other, and the way in which the men helped". Take a bow, men.

Dropped in to watch square practice in the Moore's basement the other night to see if we rate an honorable mention this year at the Washington Folk Festival. It seems that B. Allison must have had a hand in choosing the demonstration dance, there is a waltzing in it.

Watch the schedule for next month, it should be the time of year for Mr. Butts to bring his early morning rides Sunday mornings. It's a wonderful idea if you can make the initial break of getting out of bed. Breakfast is sometimes cooked out of doors at the farm, and sometimes we return home for cinnamon rolls a la Mrs. Herring.

A little birdy told me it's spring and the circus is coming—maybe we should go. For further information call the Cottage—it's just an idea.

"Veteran" Navy Nurse Is D. C. Native

ENS Barbara Ann Fredette, NC, USN, is a native of Washington, D.C. There she lived, went to school, and entered the Navy Nurse Corps.

Her high school work was taken (or endured) at Notre Dame Academy and the Georgetown University School of Nursing had her later. She entered the Navy in May 1949 and was sent to the hospital here. This is her only duty station. But since her coming, she has worked on more than a few wards and is very popular. Presently, Miss Fredette is on Ward 3B.

One of her most outstanding attributes is her fine voice. She sings in a high, clear soprano. Aside from other schooling, she studied music and voice at The Washington Conservatory of Music. Among sports she enjoys swimming, riding, and football. Although she says she plays tackle best it seems hard to believe. Miss Fredette also enjoys a unique hobby, that of collecting miniature dogs. She has a collection of nearly two hundred, many from other parts of the world. Some are made of porcelain, some china, others are teakwood or ebony.

Miss Fredette says the Navy suits her fine and that she will probably stay in. 'Twould surely be a great loss if she ever got out.

Dental Explorer

Every now and then comes a time when we the personnel of the Navy have a chance for an advancement in rating. They give you a book full of questions and tell you to answer them and study them for your examination. Night after night, a conscientious person will spend working and studying, his anticipation getting greater and greater all the time. Then finally he is called for a test. He starts to worry and shake and he tells himself that maybe the test won't be as hard as he thinks. When he takes the test he finds that the questions aren't on anything he has studied but he tries his best and answers everything as best he can. After the test everyone asks him, how was your test? How many questions did you have? Do you think you passed? It was real easy when I took it. When the grades come out he's told, Well—you did pretty good—but—you'll do better when you take your examination. Examination? What was that? Oh that, it was just a test on your progress book. Then and there he gets peeved and is about to blow his top. He asks himself,

(Continued on page 4)

Bernard Risi Saw The War All At Once

Navy life started with a bang for Bernard Risi, TE1 who's first ship was torpedoed from under him after he had been in the service for only four months. Risi was sent to a "mass production" three week "boot" training station at Newport, R. I. He was then sent to Norfolk, Va., where he was to catch a Destroyer Escort, but fate had other plans. The ship was out to sea, so that he was drafted into the Armed Guard Gunnery School to serve with the armed guards on merchantmen.

On May 13, 1942 the SS David McKelvey, a merchant oiler, was cruising peacefully about thirty miles from the mouth of the Mississippi at about eleven that night, Risi who was standing watch on the stern gun felt a terrific thud and saw the forward oil tanks burst into flames. The torpedo had hit just below the bridge. In the excitement four men dropped a boat to the water, but as they did the oars fell out and the boat drifted back into the flames where three men were seriously burned and one jumped overboard and was lost in the burning oil film that had spread over the water.

In the-meantime Risi and a group of ten men ran to the port side where the oil film had not yet caught fire. They lowered a life raft to the water and Risi descended to unfasten the large hauser that held the raft. The knot was water soaked and impossible to loosen, and the flame was crawling steadily nearer so that the effort was abandoned as the men swam to the open sea for safety.

For an hour the men floated about in the water until a converted patrol boat picked them up. Risi later learned that his ship was the second of three torpedoed in that area some three hours apart. "It took me three days to scrub the oil off," Risi said.

Risi first became interested in postal work when he was transferred to Brooklyn (his home town) where he became a striker. He advanced from SI/c to TE3 and TE2 before he was transferred in 1944 with a dredge repair outfit to Scotland. The outfit broke up and he was sent to London in 1945 to serve with the Central Post office, which distributed and directed mail to all parts of Europe. While in London he made first class.

He has had duty on two ships since 1945; the cruiser USS Macon and the destroyer USS Stormes 780. Finally in December of 1949 he was sent to the Center for duty in the Postal Directory Service.

NSHA Notes And Quotes

By Ray W. Conrad

When the prospective student thinks of the course here at NSHA (as many do these days probably the last department he would normally include therein is maintenance. Of the various phases of maintenance his remotest thought would no doubt arrive at maintenance of laundry machinery. Notwithstanding the thinkings of students yet to be and more directly concerned with those now under instruction the classes were recently introduced to this very necessary phase of hospital administrative work through the medium of a very fine film and a short talk by Mr. J. N. Moore, Washington Machinery Co., of Cincinnati, Ohio.

Necessity for the maintenance of laundry was forcefully demonstrated as one of the acute problems of hospital administration and we are grateful to Mr. Moore for this service. If we had a "laissez faire" attitude towards this subject heretofore, we've revived our interest considerably.

The personnel management classes have enjoyed lectures on matters relating to civilian personnel several times in the past by various representatives of the Office of Industrial Relations, Navy Department. Recently Mr. W. F. Rogers of the office of the Secretary of the Navy lectured to the classes on the subject of civilian training and training methods. Much valuable information was derived from this lecture, and our civilian personnel management scope has been broadened.

It was our own John Paul Jones who said, "A gentleman never unintentionally offends another." You may be interested in visiting the tomb of this great Naval hero at the U. S. Naval Academy Chapel, Annapolis, Md. "Inspiring" is the least descriptive adjective one could use.

Not Much Research Involved

By J. P. Walsh

Our narrowing perspectives Department:

The arrival of the Navy (former crew members of the U.S.S. Duluth and the U.S.S. Atlanta for a research project) has been as refreshing as the ground swells out of San Francisco—People who find little sport interpreting ALNAVS or solving chemistry problems and view the "Docs" with a healthy disdain. They may even relieve the sea duty neurosis, our occupational disease. For research on this aspect of the navy we recommend Captain Lederer's book, All the Ships at Sea.

Reporting in—H.M. Bruntmeyer, H.A., from RecSta, Philadelphia, Pa.

Reporting out—HMC Gerende and HM2 Freeman to BuMed Unit 1, HM1 Price to Quantico and SN Hepper to Monterey, California.

Congratulations to HMC Durant on his marriage to Miss Ronnie DeHaven, and to HMC Tommila on his marriage to Miss Helen Lee Skinner.

Book Review in brief: The identification of faces in the Pictorial Review has been referred to Madame Juliana on Wisconsin who sees all and knows all . . . A curious set of pictures in that book.

Pitching Stardust

by C. Karolczak

Softball! That seems to be the magic word in this vicinity at the present moment. In the chow hall, in the pay line, at the barracks, it's the same old subject—softball.

Nine teams have been entered in our intramural softball league. Things look mighty good except for a little cool spring weather bringing on many sore arms. There does seem to be a little lack of practice room but P. E. Bickel's Dental "whizkids" seemed to have solved the problems by their invasion of surrounding premises of their barracks.

Lab. 14's team has a strong lineup, especially with "Ski" playing the shortstop position. Pitching seems to be a major problem, with all the weight now thrust upon HM3 Bacon.

Ray Gismond's Research team looks powerful and ready for action. Incidentally, that team boasts the only girl-player in the league—basketball high point girl, Betty Barley.

It looks like the Naval Hospital team, coached by P. E. Stanley, is far ahead of all other teams mentioned because of their pitching ace, Smiley. He is backed up by a fast infield.

Turning the cover to our varsity hardball team, we seem to be looking at a closely knit handful of men who will bring in a string of victories. A terrific infield is in the showing with such men as Henderlite at first, Don Polizzi covering second, Tom "Irish" Brothers holding down shortstop, and Sampson doing a good job at third.

The pitching staff was suddenly weakened by "Jay" Bell's sudden transfer. Roberts and York, however, have filled "Jay's" shoes very nicely. Strong arm Cox has been injured, and it is unknown when he will return for the pitch. Best luck to him. George Funk seems to have no trouble calling pitches from his stance behind the batter's box.

Although the team has heavy hitters in G. Royster and J. C. Woods, it seems that batting practice will be number one on the schedule before opening game the first of May.

The team has made the announcement that more players are still needed, so come on guys, let's see what you can do.

Rumors have been vibrating across the base that a NNMC swimming team is in the making. Any hot dope on that subject will be snatched up by this column, so watch for it.

If you can, in any possible way, enter the life saving course now being conducted—do so. The information gained from this valuable course may be very useful some day.

Tennis champs are again going all out in a race to develop their back-hand shots. The newly acquired back board set up actually seems to be a hindrance rather than an asset to most players because of its low height.

Before I run off the page I would like to leave behind a little reminder. Those fellows on the various softball teams are going all out to spring some good, close, interesting, games. How about coming out and cheering your team on? You would be surprised how much it helps.

Med School Scuttlebutt

By Harry R. Fallers

Paul Glunz, HM3, was discharged from the naval service last week. This fall he will attend Marquette University in his home town of Milwaukee. Paul will take a pre-medical course and then eventually medicine.

Sheaff, HMS, was transferred last week to the Naval Research Laboratory at Anacostia. After finishing Laboratory school here he worked in the Blood Collecting Department.

All members of the Medical School Staff are wishing Cox, who was injured a few days ago, a speedy recovery.

The Medical School Staff's softball team started the season's play with a big bang, or was it a dull thud? Scheduled to play the team from Lab Class 14 on Thursday the thirteenth the staff came through with flying colors. Hard hitting, good throwing, and terrific defensive play were seen all afternoon. Incidentally, the score was 7-0 in favor of the Lab class, via a forfeit. Now, does anybody want a softball team cheap?—Cheap did I say? I meant free!

A couple of Saturday nights ago five of the boys started out for a pleasant evening's relaxation. Using a little three passenger coupe the group headed for Glen Echo. Finding this dull, they went on to the Dixie Pig where events began to transpire which promised adventure. So being adventurous at heart, these five devil-may-care sailors spotted some girls. Perhaps, it was the other way around. Anyway, it all began with—"Say sailor, have you got a match?" Time passes and we find the eight of them NOW at an after hours club in Washington having a hilarious time—wine, women and song. And the check? Some fabulous amount—we won't tell how much—just somewhere around ninety-one dollars and fifty seven cents. But it was fun eh Foreman, Tanner, Kovarik, Cox, Schroer. It wasn't?

Lab 13 News Clips

By Glin Winston

Now that the ordeal is over we must extend our profound appreciation to Commander Floyd and his staff of able instructors. We can laugh as we look back at the frequent admonitions received from the Commander. Whether we were "knuckleheads" or that was routine is still questionable.

The fellows always looked to Chief Thrasher as a liberator. He delivered us from that potential lawyer, Allison. I suppose he was a good instructor but that voice scared the daylight out of me. Chiefs Robinette and Blakemore were both good but just the opposite. Blakemore always has something for everything while Robinette saves his for emergencies only.

The departments, which meant the difference between our success and failure as laboratory technicians, must be given credit for sincere effort which was helpful in every respect. Of unquestionable notoriety was Frank Adams, Walter, John, Hardy Everett, Spiegel and Chief Porter. No one will question the choice of Walter as the most popular in every respect. "Clutch", as he is usually called knows how to get the points over with ease. The greatest asset in

News Shorts From The Editor's Desk

An informal party was given at the Center in honor of Captain Nellie J. Dewitt, retiring Director of the Nurse Corps and for Cdr. Winnie Gipson, who will relieve Captain DeWitt. The party, from 6 to 8 on the 21st, was held at the officers club. CDR Gipson will become Captain soon.

A group of nearly forty dental officers completed another Reserve course here Saturday. The course was like those that have been held at the Naval Dental School in the past and included subjects pertaining to the newest aspects of naval dentistry.

The courses have been held for the past several years and are in great favor with the Volunteer Reserve Dental Officers of the Reserve Fleet.

The editor-in-chief of the News recuperating on a fifteen day leave... As is Mrs. Bean from the Crew's Library.

Center Host To Hospital Officials

On Wednesday, 19 April 1950, a group of twenty distinguished persons from six agencies governing the hospitals and medical facilities under the Department of Defense visited the Naval Medical Center for a conducted tour through the facilities here. Participating agencies were the Navy, Army, Air Force, Veterans Administration, Public Health Service and Bureau of Indian Affairs.

The group is taking part in the semi-annual Inter-Agency Hospital Institute conducted at the Army Medical Center, beginning April 17 to May 5. These Institutes are held semi-annually to give hospital managers a broad concept of the administration and management of their installations.

While at the Center, the group visited the carpenter shop, paint shop, machine shop, laundry, fire house, commissary, operating suite and the tower. A fire drill was observed on the level of the fifth floor.

First Ace Scored By NMS Staff Man

On Sunday afternoon of the seventeenth, Clifford Kovarik, HM2 of NMS, stepped up to the sixth tee with a five iron and let go with the first ace of the year. There was only one witness to the feat, that being Bruce Dietz, HM3 also of Med School.

The course has been having much business although the season is young. John Leavell, Greenskeeper, and his staff are hard at work to have the route in top shape for the formal opening sometime next month.

Officer Students Of NSHA Take Course In Amphib. Warfare

By Ray W. Conrad

Amphibious warfare and related medical logistics is the very well descriptive title given to the week-long course of special instruction completed on 7 April by the officer students at the Marine Corps School of Hospital Administration, Quantico, Virginia, under the command of Major General L. C. Sheperd, Jr., USMC.

Captain W. C. Baty, Jr., MC USN, the Staff Surgeon, lectured on the medical aspects of amphibious warfare, stressing the duties of Medical Service Corps and Hospital Corps officers assigned as administrative assistants to Task Force Surgeons, Amphibious Group Surgeons, and Landing Force Surgeons. Organization, medical plans, medical logistics, medical service for embarked personnel, troops in the field; casualty handling, evacuation and reporting; sanitation and preventive medicine were all topics for instruction and discussion. The group was under the supervision of LTJG C. E. CONNELL, MSC, USN of the Naval School of Hospital Administration.

In addition, lectures and demonstrations were given by capable Marine Corps and Navy officers on related matters of aviation, operations, ordnance and communications, and a demonstration by the FBI concerning field training for their own officers.

Amphibious operations, though

carried out during WWII on an unprecedented scale, are by means that recent to the science of warfare or military tactics. History students will remember small crafts "breathing fire" ceded landings which saved the empire of Justinian and Theodosius the conflict of Greens and Blau Constantinople in the 6th century A.D. More recent were the "mando" tactics of pirate H. Morgan in the Caribbean. In less to say, medical and dental support was minimal on occasions but we have reason to believe that it existed in whatever form was known to men of that time for records indicate that many of our own men who were injured in the rape of old Panama City were tended by the clerics of Iglesia Josá, Panama.

Thus we have arrived at present highly technical amphibious operations which require the alert personnel not only in the field but also administrative duties in the field.

The course, Amphibious Warfare and Related Medical Logistics, which was presented to the student officers of NSHA, was under the direction of Major General L. C. Sheperd, Jr., USMC, front row left. CAPT. W. C. Baty, Jr., MC, USN, front right, was the featured speaker.

DENTAL EXPLORER

(Continued from page 3)

"Is all this worth a couple of bucks a month?" He doesn't feel like working at it so hard anymore, so he doesn't worry about it very much after that. Then comes the word, you take the test day after tomorrow. All of a sudden he gets all the fear and anticipation of before. So he crams everything possible in the short time left. He walks into the room for the examination and his mind goes blank, he's unable to think of anything.

But for his prestige, he guesses a little and fills out all his answers. When the information on the results is released, someone says to him, "better luck next time."

LAB 13 NEWS CLIP

(Continued from column two)

Serology. Spiegel and Chief Porter seems to have a time. Chief Porter's philosophy is "I am the law". Barracks wheel was Speery, bless his little pin-pointed head, kept the place in shape regardless of price. Sometime we paid a terrible price, even with liberty.

This was Clinical Laboratory Class 13. Not a good class, just the best in thirteen. You can't exceed perfection I always say. There are the laws of nature.

Laugh Awhile

Do you know who has more than people? Wabbits.

Do you know why Wabbits have more fun than people? Because there are more Wabbits than there are people.

Do you know why there are more Wabbits than there are people?

Because Wabbits have more than people?

Two men were making their airplane trip. At St. Louis the plane touched down, and a little truck sped out to its side to meet it.

At Cleveland the plane landed again, and again a little red truck darted across the runway and sped up to the side of the plane.

At Albany, the passenger on the right noticed the same occurrence when the plane landed.

His companion took out a watch, glanced at it, and observed, "These planes sure make wonderful time, don't they?"

"Yeh," his partner replied, "there's a little red truck out there that ain't doing so bad for them."

Horace Heidt's Salute To The Armed Forces

The popular and national hit of radio and television, Horace Heidt, presents a top notch show at the Ft. Myer, Virginia post gymnasium on May 14 at seven thirty p.m. There will be no charge, although tickets will be obtained from your Recreation Department. One guest is allowed per ticket. Horace Heidt's show, with a cast of fifty top flight entertainers, is presently entertaining American Armed Forces personnel in Europe. The show will wind up that tour with the special command performance at Ft. Myer. The show is specifically for Armed Forces personnel. Among the entertainers, who are long time winners on his programs, are Bea Jay, one of his best show-stoppers, with her big voice (range is three octaves) singing the songs made famous by Kate Smith and Sophie Tucker; Richard Barri, impressionist who had the audiences in the isles, and who was destined to be a top star of the future; the Pepperettes, "the singing sensations of America."

Singing alone does not constitute a show, for there is a varied program offered by Dominic Frontiere. He accords, Gilbert and Siney Shepard, ringing Swisses and cow belles, Al Hirt on harmonicas, Pierce Knox, the xylophonist, and many others. Certainly anybody interested in flight entertainment cannot miss this opportunity to see such a show. This is your show, so make the most of it.

Research Data on Radiation Available

The Navy's experimental research data concerning certain effects of atomic radiation upon living tissue are being made available to civilian physicians and medical officers of the armed services and other agencies under a program announced by Rear Admiral Clifford A. Swanson, Chief of the Navy Bureau of Medicine and Surgery. To implement the program, pathological slide study sets and appropriate literature prepared by the Naval Medical Research Institute, Bethesda, Maryland, have been provided to Naval hospitals throughout the country. This particular group of study sets concerns lesions produced by atomic body ionizing radiation. The tissue sections were prepared from mice which had been exposed to one million and two million volt

(Continued on page 3)

Williams To Play For Dance Again

On May 18 the Gymnasium will ring out again with the music of Howard Williams and Company. This is the date for the next Staff Dance, a popular monthly feature provided by the Recreation Dept.

This time most of the girls will be from Quarters K, but if you know someone else, why, bring 'er along.

Williams, claimed almost equally by NMMC and WINX, is bringing his popular ensemble again. Intermission will be around 2200 along with eats. Civies may be worn or if you wish, uniform of the Day. Something cool would be in order for dat dare gym gets mighty hot.

Ninth RA Course Here May 22-26

The ninth course for Naval reserve medical and dental officers in Medical Aspects of Special Weapons and Radioactive Isotopes will be conducted during the week of May 22-26 by Captain John L. Enyart, MC, USN, Commanding Officer, Naval Medical School. It is anticipated that approximately one hundred and seventy five reserve officers will be in attendance.

The following presentations will be highlights of the course: Atomic Weapons and Tactical Employment by Lt. Colonel David B. Parker, USA; Strategic Medical Intelligence by Colonel R. W. Hayward, USMC, of the Office of Naval Intelligence; Fundamental Biology of Ionizing Radiation by Dr. Shields Warren of the Atomic Energy Commission; and Recent Developments in Europe by Frederick Reinhardt of the State Department.

The Special guest lecture will be given by Dr. Thomas M. Durant, Professor of Clinical Medicine at the Temple University Medical School at 2015 Friday evening, May 26. His subject will be "Dyspnoea: Its Significance and Interpretation in Naval Practice."

Captain Aston Bids Farewell

On April 29 Captain Melville Aston delivered his farewell address to the congregated staff and student body of the Naval Medical School. Captain Aston was presented to the audience by Captain Enyart, the Executive Officer of NMS, who introduced him as he who "is deeply admired by all of us".

Rear Admiral Morton D. Willcutts, MC, USN, Commanding Officer, is here shown presenting HMC W. C. Marceau with the Presidential Unit Citation. Captain B. E. Bradley, MC, USN, Executive Officer of the Hospital looks on.

Navy Nurses To Observe Anniversary

An often unheralded but never forgotten branch of the Navy—the Navy Nurse Corps—will on May 13 quietly observe the 42nd anniversary of its establishment.

As early as 1811 a far-sighted Naval medical officer had recommended the inclusion of a nursing service in the Navy, but to no avail. Women served with the Navy from time to time whenever skill and care was most urgently needed, but were not an actual part of the Navy. The Sisters of Mercy who cared for the wounded of the Battle of Vicksburg are the first on record, followed by nurses working at the Naval Hospital, Norfolk, Virginia during the Spanish American War. It was nearly 100 years after the first recommendation, on May 13, 1908, that the Corps was established and a pioneering group of 21 nurses came into Naval service.

With distinguished service in two world wars and the intervening years of peace, they have firmly established themselves as a respected and integral part of the Navy Medical Department. In all parts of the world, under greatly varying conditions, Navy nurses have shown their skill and devotion to duty to be in the highest tradition of the Navy and of their profession.

Today, not resting on their laurels, the Nurse Corps is still doing the job for which it was created—caring for the sick and injured of the Navy.

Captain Aston remarked on the splendid work of NMS and especially on its international acclaim due to "the team work of all NMS" and not through the acclaim "of any individual or individual group".

Life Saving Water Show Here The 15th

A "water show" will take place in the recreation building swimming pool at two o'clock on May 15. All personnel, military and civilian, are cordially invited. This is not a water carnival or a water ballet. It is a finale to the four week Life Saving Course that has been going on here and will feature the technical aspects of water survival.

Seven military stations in the Washington area are represented from Navy, Marine, Army and Air Force bases. Various technical skills will be demonstrated such as Red Cross Safety Instructors are prepared to teach.

Included in the program will be various individual water skills demonstrations in personal safety and diving safety. Life saving in all forms and under all circumstances will be included and the nine basic swimming strokes will be shown.

The show is expected to run for an hour or an hour and a half. Anyone interested in water safety and in learning more about swimming will certainly enjoy this presentation.

Presidential Citation For Marceau, HMC

William Chas. Marceau, HMC, of the Naval Hospital was presented a Presidential Unit Citation for his participation in the action with the First Marine Division Reinforced. Presenting the award was Rear Admiral M. D. Willcutts, while Captain B. E. Bradley, the Naval Hospital Executive Officer, looked on.

The citation read: "The officers and enlisted men of the First Marine Division, Reinforced, on August 7 to 9, 1942, demonstrated outstanding gallantry and determination in successfully executing forced landing assaults against a number of strongly defended Japanese positions on Tulagi, Gavutu, Tanambogo, Florida and Guadalcanal, British Solomon Islands, completely routing all the enemy forces and seizing a most valuable base and airfield within the enemy zone of operations in the South Pacific Ocean. From the above period until 9 December, 1942, this Reinforced Division not only held their important strategic positions despite determined and repeated Japanese naval, air and land attacks, but by a series of offensive operations against strong enemy resistance drove the Japanese from the proximity of the airfield and inflicted great losses on them by land and air attacks. The courage and determination displayed in these operations were of an inspiring order."

The Chief lives in South Hadley Falls, Massachusetts and entered the Navy in October of 1939 in Springfield. He attended "boot" camp at Newport, R. I.

Chief Marceau is authorized to wear, other than the Unit Citation, the American Defense, American Area, Asiatic Pacific, Philippine Liberation, World War II, and Good Conduct Medals.

In front of the hospital stands the Marching Detail which put on a fine show in the Bethesda-Chevy Chase Rescue Squad Carnival parade. CDR F. E. Frates, DC, USN, Officer in Charge, takes a final check on the men prior to their departure.

Allan Johnson And Friend

That most renowned, gun-totin', dust-eatin' podner, The Lone Ranger thrilled the children on Tower-6 with a personal appearance here recently. Reverently looking up at the masked man is Allan Johnson and other observers are an unidentified outpatient with his father while Sandra Davis looks on.

Salt Shaker Sailor

Dear Bethesda,

A few miles out to sea . . .

It was odd to see the seaman loosening the large hausers that held us fast to the pier. Odd to see a water gap widening between us and the pier. Two tugs guided us out of our berth. Sea duty at last!

Finally we were on our own. The engines started the great blades of the screw moving. The water churned up and sent a powder blue wake behind us. We were moving all right! Big, steady strides forward out to the open sea. The sea gulls gathered around us like a flying escort of planes. They hovered just above and behind the fantail. It was a great feeling, having this big mass of steel plow through the waters. I didn't exactly know what I had expected, but whatever it was, the feeling was wonderful.

Steadily the bow pointed to the mouth of the sea. The piers and the buildings ashore were becoming indistinguishable. A little ways out we passed a battleship. The PA system snapped, "Attention to Port". We faced the port side and saluted. I could see the sailors saluting from the other ship. "Nice," I mused.

Just then I lunged forward a bit. We had hit open water . . . A queer sensation ran up and down my spine. The swells were large out here! I looked forward and there was nothing but the sky, far off, bending over to shake hands with the sea. Up, over, down. Up, over, down! I had to learn to walk all over again. I found that at times, when the ship plunged its head into a wave, I flew up the ladders with ease, and at other times it was difficult to go down, when the ship was climbing a wave.

The last few sea gulls flew off. The land faded away into a gray mist. There was nothing left now but a vast, vast ocean and an even vaster sky, and my little ship. I touched the hard steel deck and gave it a little pat. "Here's hoping," I said.

Chow was called but I wasn't hungry. My stomach felt a little "woozy", but far above that, I was too fascinated with this great new life to think of food.

Your Salt Shaker,
A. Sailor

These young 'uns! . . . Up in Woodgate, N. Y., they had a law suit with a new twist. Mrs. Elizabeth Turk sued for damages after an automobile accident. She claimed it prevented her from dancing. Mrs. Turk is 95.

"Was your friend shocked over the death of his mother-in-law?"
"Shocked! He was electrocuted!"

"No, Ma'am," said the hobo, "I ain't afraid of work but there's not much doing in my line."

"Why, what are you?"

"Oh, my profession is a window box weeder."

And remember this—if she looks old, she's young, if she looks young, she's old, if she looks back, follow her!

Crew's Library:

Robert Duffus' New Book Good Story

For adventure and absorbing plot, Robert Duffus' new book, "Non-scheduled Flight" will fill the bill. A group of strangers, 18 people in all, meet in New Orleans, bound for Guatemala and assigned to a chartered night plane. As the plane flies through the night, 5,000 feet above the waters of the Caribbean, its passengers find themselves under a strange spell known only to those who fly. One is Andrew Morebrook, fighting his fear, another is a perpetually drunk marine haunted by an imagined responsibility for a friend's death in the war; there is the hostess who is not the shallow person her hard, lacquered exterior would lead one to believe, there is Miss Twill, prim New England school teacher who found courage to change her whole way of life, and the two married couples, one intense young honeymooners, uncertain of their future happiness and the other, friendly and elderly, looking back on fifty years of married life. As all these people come to know each other, they are revealed as thinking, feeling, questing human beings whose doubts and uncertainties are believable. With sudden climax, lives are changed and conflicts are resolved. And to each at the end of the journey, came not the thing he feared, but the thing that in his heart he most desired.

Norman Katkov's book, "A Little Sleep, A Little Slumber" is the story of a simple man's deep love for his family, the humble love of an immigrant for his new country. Although the life of this Russian-Jewish immigrant father had been dogged by fear and lack of money, his courage never wavered. His name was Lev Simon, and on the day he lay dying his grown sons returned to stand beside his bed. The story then unfolds in their remembering shared experiences of the past and new ones to which "Pa" looks forward. This book is the story of Lev Simon, a frightened and bewildered man who entered America illegally and became perhaps a better American than most. It is the story of a man whose faith brought him finally to a small measure of greatness. A book to appeal to men and those who are interested in psychology and sociology.

In "I, My Ancestor", Nancy Ross tells the story of a successful young executive who comes to an emotional and physical dead-end, in his relationship both to his wife and his work. Philip Stewart, cynical, modern, night-club habitue, his sanity threatened by a pressurized life as a film editor, seeks his "ancestor", the child who preceded the man of forty. His rehabilitation begins under the psychologic guidance and is furthered when he seeks his father, who has found solitude and wisdom on a lonely Pacific Island. Slowly, but with increased understanding and growing love for his father, with the friendship of two unorthodox lovers and the island's natural peace, Philip begins to collect his scattered life. The story is powerfully told, its characters richly and warmly human. There is no happy ending, only a promise of greater understanding. Miss Ross's fine novel opens a vista deep into life, giving a sense both of the cause and the cure of many of the insistent tensions that haunt the modern world.

The Chaplain's Corner

By CHAPLAIN PAUL J. RAYNOR

One of the essential Christian virtues is self-control. The Apostle Paul, who often used the terms of the athletic field to describe spiritual things, put it this way: "Every athlete exercises self-control in all things. They do it to obtain a perishable wreath, but we an imperishable." The athlete, therefore, is in training he will refrain from smoking, drinking, late hours, and over-indulgence in food.

The "giving-up" in self-control is only one side of the picture. There is also the positive side. So the athlete chooses a proper diet, he engages in proper bodily exercise, he takes the proper amount of sleep, and he gets plenty of fresh air. He does all of this to win a crown of ivy leaves which is beautiful when received, but which soon withers away. Or, as in the case of the athlete, he receives a cup which he places in a conspicuous place until it begins to tarnish, and it is put away in the attic.

Since it is of such great value for an athlete to train to win a prize, prize, how much more important it is to exercise similar self-control in order that we may win a prize which doesn't fade and pass away. What is this prize? It is not only for a crown in the future life, but for a life so filled with the love of God and man, so filled with positive good, that it is an abundant and full life.

The world imposes surprisingly little control upon us. Our character and conduct is largely determined by our own self-control. Thus the Apostle Paul said, "I have fought the good fight,"—the self-control of the soldier who does only that which helps to win the war; "I have run the race"—the self-control of the good athlete who concentrates on the things which help him to be the victor; "I have kept the faith"—the self-control of the good follower of Christ who has done only those things which helped him to be faithful. This self-control wins the imperishable crown, "the crown of righteousness."

Meet Your Chief Of Neuropsychiatry: CAPT G. N. Raines

Back in '31 a young physician, new to Navy ways, was assigned to the Special Service Squadron in Panama. Central America was in a turmoil and now CAPT George N. Raines, MC, USN, Chief of Neuropsychiatry, can look back over many years of colorful service.

Captain Raines was born in Jackson, Mississippi. He attended the University of Mississippi for his B. S. degree and Northwestern University School of Medicine for his M. D. Entering the Navy in 1930, he interned at Mare Island after which he went to sea on the Idaho. Then came the duty in Panama. En route to the United States from this, he was caught in Cuba in the Cuban Revolution. This lasted five months during which he came in contact, indirectly, with Captain Norman, Chief of Medicine. In the words of Captain Raines, "I never saw him but I did sleep in his bed."

In 1934 the Captain was assigned to the Psychiatric Service at the old hospital in Washington and later to the Naval Medical School under instruction. The following year he began a residency at St. Elizabeth's hospital in his chosen field. Other duties included the Naval Hospital at Philadelphia and the ships, Saratoga and Lexington.

In 1942 when the Center was commissioned, the tall, worldly doctor was on hand as Assistant Chief of Neuropsychiatry and Officer in Charge of the NP SOQ, then in Tower Four. When the hospital was moved here, a total of 160 patients were on the sick list but in 1945 when Captain Raines returned, after having been Chief of NP at Portsmouth, Virginia, there were 500 NP patients alone here and 1400 more at St. Elizabeth's. As well as being chief of the department, Capt. Raines was also Medical Officer in charge of the Naval Medical Unit at St. Elizabeth's.

Other current duties include: Head of Neurology and Psychiatry at the Naval Medical School, Professor of Psychiatry and Director of Department of Psychiatry, both

at Georgetown University, Consultant in Neurology and Psychiatry at the Naval Dispensary, Consultant to the Professional Division, Bureau of Naval Medicine, Special Consultant to the National Institute of Mental Health, Chairman of the Committee on Nomenclature of the American Psychiatric Association, one of the twelve directors of the American Board of Psychiatry and Neurology, Councilor of the Washington Psychiatric

Society, and a faculty member of the Washington School of Psychiatry. Captain Raines will also be listed in the next supplement "Who's Who in America." He is also, Fellow, American College of Physicians, Fellow, American Psychiatric Association, Fellow, American Medical Association, Member, American Neurological Association, Member, American Academy of Neurology, Member, American Psychopathological Association, Member, Association for Research in Nervous and Mental Diseases. In college, Captain Raines was a member of the Sigma Chi Fraternity and in Medical School, the Chi Medical Fraternity.

In July, 1932 Kate Oliver St. Clair became Mrs. Raines and the family now includes a daughter, Mary Ann, 16, and a son, George Jr., 15.

BY NADINE CALHOUN

There comes a time when mater- for the press reaches a low ebb; when people become inspired to con- themselves quite normally in doings and goings; no fantas- performances; no emergencies above all, no misconstrued ops. I hereby declare the past weeks as Quiescent Time, dur- which period very few Navy es sounded off.

When strangers move into the racks our first attempt should to lend them a hand, facilitate becoming acquaintances and ate an interest within them to participate in the work and fun by side with those of us who been aboard longer. Since it is feasible to 'break the bottle' or the fatted calf as a means of come and entertainment under sent living conditions, Navy les would like to introduce the ent arrivals.

Five of our newymets have al- dy been initiated by lessons and in Lab School. Teresa Hawk, 11, who claims Ohio as her home te, came in from Oakland, Cali- nia, bringing with her a record yer and one that also records ust draw a contract for rights on t recorder).

Margaret Drumm, HN, a New sey girl heart and soul, reported in USNH, Philadelphia. Origin- from California are Betty Sea- ves, HN, recently stationed in ladelphia, and Yvonne Clar, who arrived from USNAS, ds Point.

From the Eastern coast-line of ine, is Mary Coyne, HM3, who ben on duty at USNAS, Nor- A shake of ye hand to Nancy Ad- s, HN, who is also proud of WA. Nancy has been on duty at NH, Annapolis, and is now prac- ing practicability practically ev- other night as she studies to be Operating Room tech.

Good-bye and the best of luck to rolyn Catalan who has gone to- with her family. It was a better- nt for our organization to have own her a little bit than to have ver known her at all.

"Bird class" examinations have sed (and we trust the same goes those examined). Dollar-like uds of anticipation hover over examinees as they greet each er. "Any dope on the tests yet?" at first crow on the sleeve makes a feel more like crowing than additional stripe. It could be tten. "Know all you birds of a ther will crow together".

(Continued from page one)

ny. The response of the tissues these animals to x-radiation is comparable to the response of tis- s in man in atomic bomb radi- ation.

The program was originally eduled for the use of Naval med- al officers. Since this material is generally available in 'hospital' ratories, and because the devel- opment of atomic energy has made mandatory for all physicians to familiar with the syndrome of vere total body radiation injuries, Navy considered it advisable prepare some of the Institute's erimental material for dissema- tion to civilian physicians, and government and service medical of- fers.

The commanding officer of each val hospital has been instructed arrange with the local county edical society, commanding officers armed forces reserve compon- and federal agencies in their

Personalities About The Center

This WAVE Finds People Fascinating

Miss Alma Rose Wadenstorer, HN is a slender, good looking WAVE of twenty years hailing from Farmington, Michigan. She is at- tached to the Naval Hospital Com- mand is presently working in the Chief Nurses' Office.

Great Lakes, Illinois . . . need more be said? Yes GL claimed her for "Boots" in July of 1949. Those days went by swiftly and soon she was in San Diego, California for Hospital Corps School. Five weeks ago, she made the step that most Hospital Corps personnel do if they stay in the Navy for any time at all—transferred here in March.

While in "boot" camp, she won a trophy for first place in the one hundred yard free style swimming contest.

Of the varied likes that people have, Miss Wadenstorer probably holds the oddest; and that is people. "What do you mean by people?" she was asked. "Just plain ordinary people. I like them. Take an interest in the multitude of varied inter- ests that they have." Certainly this is a wide field when you stop to think of it. There is a gold mine of knowledge, humor, deviation and fascination in the lives of human beings. It brings to mind Pope's famous line "the proper study of mankind is man."

An avid sport enthusiast, she glories as both a spectator and a participant in baseball, basketball, swimming and hiking. She played guard on the WAVES Basketball Team here and will be on their Baseball Team. Other interests of the prolific WAVE were in drama- tics in High School and the school band in which she played saxa- phone. She is a member of the NNMC Choir.

Her interests are not confined only to sports, however, for she is a collector of salt and pepper shak- ers and has oodles of varied match covers. She also delights in making shell jewelry.

She will not stay in the Navy, but will study Nursing.

areas for interested physicians to join with Navy doctors in the use of this study material. It is hoped that by making the material avail- able to these physicians through the naval hospital in his immedi- ate locality some of the doctors' problems will be overcome, such as extensive travel and loss of time from practice to gain access to sim- ilar material at some other distant institution.

The study material is considered to be of interest and value to the practicing physician as well as to pathologists. The study material, however, does not replace or sup- plement any established course con- cerning the effects of atomic radia- tion, as it has been prepared from experimental animals to further the Navy's knowledge.

Meet Chief Smith, Dental Laboratory

In October of 1943, Gitmo sent to the Naval Dental School DTC Jack J. Smith. Now, Smitty, a ten year Navy man, is in charge of the Prosthetic Lab in the Main building where most of the dentures are made. In the picture above you see him polishing the metal part of a partial denture with a handpiece and brush. Over part of this frame- work will be placed acrylic, to sim- ulate the gums, and artificial teeth.

During the war Smitty saw a lot of water on ships such as the Cas- cade, Relief, and John Rodgers. He also got a glimpse of the bot- tom on subs R2, 04 and S16, school boats out of New London, Con- necticut. Mare Island and Pearl Har- bor were other duty stations.

The young, mustachioed chief hails from Sacramento, California where he enlisted in 1940. Since he's been in so long he is going to go the full route. He's married and now lives in Bethesda.

Smitty enjoys hunting, fishing, and boxing in his leisure time. Also he likes to make jewelry, a hobby which seems prevalent among Den- tal Techs.

Like many other sailors, Smitty, at the end of his Navy days, will probably settle down in good ole California (Cal. C of C, please note) and live happily.

NSHA Notes And Quotes

By RAY W. CONRAD

A seminar in the economical ad- ministration of power plants and utilities recently included talks by CDR C. H. PLUMBLEE, CEC, USN, Manager, Power and Utilities Branch, Bureau of Yards and Docks; Mr. C. D. Friday, Electrical Section, Power and Utilities Sec- tion; Mr. B. Lenhart, Water Sup- ply and Sewage Treatment Section; and Mr. L. F. Deming, Power and Generating Section. Perhaps you're wondering how all this ties in with the administration of naval hospi- tals—have you ever considered what happens if these utilities stop functioning? Mirabile dictu!

The most recent addition to the curriculum has been an introduct- ory course in modern economics. Dr. Wilbur BAUGHMAN, BS, LLB, MA, LIM, JD, a practicing attorney of Washington, D. C., is the instruc- tor. Dr. Baughman's titles read like a "Who's Who" of law and econ- omics and his teaching experience includes considerable experience in economics as well as having been an Assistant District Attorney of the District of Columbia; Principal At- torney, Federal Trade Commission; Lecturer at the American Institute of Banking, Building and Loan In- stitute and Columbus University. He has a record of almost continu- ous teaching experience since 1930. The course in modern economics has proved to be a very popular one not only with the officer students but also with staff officers.

Martha Sanders Likes Singing, Dancing

Anyone who has been here just a short time will know Martha N. Sanders, who is the chief Tele- phone Operator here at the Center. She is well known for her bubbling personality, ready smile and good humor.

Martha is a southern belle from Fountain Inn, South Carolina (pop- 2,500). But these happy bare-foot days only lasted ten years. Then she went to the big city—Greenville, S. C., where she stayed until she came to Washington. She is a High School graduate and took particular interest in singing, being a member of their Glee Club.

Her brother, Jack Sanders, joined the Navy and was later transferred here. He found out that they needed operators out here so he sent for Martha. She came and stayed and has been here ever since. In 1946 she took over the position of Chief Operator although it was not offi- cial until the 16th of this month. Following suit, Jack got discharged from the Navy and started work also at the Center, in the Property and Accounting Division.

Her love for singing did not end in High School. She is a member of the First Baptist Church Choir and also was a member of the NNMC Choir. She states that she wants to become a member of the new Chor- al Group. Martha devotes a good deal of time to the YWCA where she is a senior hostess. She attends all the NNMC dances and likes that form of entertainment quite well.

Cottage Capers

Cottage schedule for this month features one big outdoor activity on each weekend. On the 8th we have a trip scheduled to Skyline Drive. In case you aren't familiar with this area, Skyline Drive is a beautiful National Park running along the Blue Ridge Mountains and overlooking the Shenandoah Valley.

There is to be a special square dance May 10 at St. John's parish hall, Bradley and Wisconsin Ave. Cynthia Moore will call to the strains of live music. Charge will be 30c per person. Wear your jeans and your plaid shirts!

The following weekend, May 13, there is a record dance at B.C.C. Recreation Center on Saturday night from 8:30—11:30. On Sun- day if it is a pretty day we'll spend the afternoon at Great Falls and return to the Cottage for a box supper instead of the usual Sunday program.

On the 21st we have planned a picnic at Tridelphia leaving the Cottage at 10:00 a.m., and taking our lunch and softball equipment. And the last big outdoor activity for the month is a fishing party scheduled for Saturday, May 27th. We plan to leave at 4 p.m., and re- membering last year's trip we in- vite all sturdy stomachs. Reserva- tions are necessary for all these trips. Call the Cottage, OL 7808 for further information. We hope you join us in some of these activities.

Med School Scuttlebutt

by Harry Fallers

The quietness which has settled over the third floor of the labora- tories is probably due to the fact that since the last laboratory class graduated there has been nothing for the staff to do except put out the work. Even the usual din which has always come from John Gira- gosian's bawliwick has changed to the gentle tinkling of glassware. Only moans and groans can be heard coming from the corner in Bacteriology in which Tiny Schroer can be found these days intently staring into a microscope. The Blood Collecting run of Feronti, a brand new member of the staff, must be long and difficult for Fer- onti who is already none too big in stature seems to be shrinking in size. Of course, the situation is be- ing kept well in hand with the able assistance of Epperson who is look- ing very dashing with his Sherlock Holmes pipe.

Coming up from the Print Shop to work in the Master-at-Arms Of- fice recently was Carl Norris, HMI. Last year Carl was the regular catcher for the Medical School soft- ball team. This year the Print Shop with a larger crew has its own team and Carl is playing on that.

The Mouse Room where the preg- nancy tests are run tells the story of the Supreme Optimist or the Su- preme Pessimist — it depends on how you look at it. Recently two different specimens for examina- tion were received from Quantico in rather odd containers. To be spec- ific, they were recived in babies' nursing botles, I don't understand it, do you?

News Shorts From The Editor's Desk

The Hospital Command can be duly proud of F. Czerechowicz, HN, for his fine rescue of a drowning patient in the swimming pool here recently. Czerechowicz who was tak- ing an afternoon dip, saw the pa- tient dive off the board and come up struggling. As she went down again, he jumped in after her and dragged her to the side of the pool where she was given first aid for a back in- jury, before being sent to the hospi- tal. The patient is all right now, thanks to the splendid work of Czer- echowicz.

Commander "Coach" Frates was a guest speaker before the annual meeting of the New Jersey State Dental Society April 26, 27, 28. The topic presented at Atlantic City was Head and Neck Anatomy. May 1, 2, 3 the Commander spoke be- fore the meeting of the Maryland State Society in Baltimore on the subject of Operative Dentistry.

Agriculturists, take a bearing on this! We have a professional horti- culturist on the compound, but when this spell of cold weather and rain was on, he got worried about his seeds taking so long to come up. He consulted books—no an- swer. He asked others—no answer. Finally in desperation, he dug up a couple of rows: "just to see if they had germinated". Huh, Chief B. C. M.?

A letter from Grant S. Ray of the Naval Gun Factory lauded the NEWS for "its splendid composi- tion and details".

Sport Scope

By J. C. WOODS

Spring training is well underway for the NNMC Admirals baseball club, and the boys show a lot of promise for the coming diamond duels. There is plenty of new material this year and a competent coaching staff to train them.

R. D. Henderlite, HMC, will manage the team and John O'Brien will work as assistant manager. Chief Henderlite managed the ball club aboard the USS Noa, DD, in the DesLant league last year. The ship's team boasted the excellent record of twenty seven wins and only three losses. The carriers Wright and Mindora and the Battlewagon Missouri were among those defeated.

Chief Henderlite states: "The outlook of the Admirals at present is very good. The infield has been working very well together and what wrinkles need to be ironed, we hope to do in the near future. The pitching staff also shows promise, although they have not as yet had the opportunity to show their true form." He also added: "The PRNC schedule does not commence until the sixth of June, but we hope to have a few games under our belt before then."

Mr. O'Brien who has had much past experience in coaching service teams joins with chief Henderlite in saying that the ball club is shaping up very well.

The Washington Senators seem to be saying Nats to everyone. Sid Hudson's hitting has improved quite a bit this year, he hit two batters in the Philadelphia lineup recently. Seriously though, the boys that bounced around in the cellar last year seem to have quite a ball club this year.

It seems the Boston Red Sox are doodling while the mighty Yankees are tearing up the place. Yogi Berra is taking track lessons around the bases, while Jolting Joe is showing his heels to everyone but the doctors. Bob is still the Feller with the Cleveland Indians and it is agreed by all that they'd like to keep him in the Boudreau drawer.

Also the Pittsburgh Pirates have been seen raiding the St. Louis C's. That's all for now. See you in the next issue.

Combat Swimming Course Success

By C. KAROLCZAK

"Learn to save a life, which may be your own", could very easily be the maxim behind all the excitement which has been carried on, in the vicinity of the swimming pool, these last three weeks.

With a hearty number of approximately 80 men entering the stiff instructors course, given by Mr. Joseph Aranoff and his two assistants, "Wally" and "Jimmy", only about 5/8ths of the original number have managed to withstand the difficult tests which are being given constantly.

After a quiet introduction to the "rules of personal safety" the men suddenly discovered that they were in a rigid course which brought out the aspects of underwater swimming, surface diving, disrobing in the water, heaving a ring buoy, and learning the art of giving artificial respiration.

The Beginners test, which was given after a weeks instruction, included: swimming 200 yards, floating for 10 min., swimming underwater for 45 feet, towing a victim with a collar tow for a distance of 60 feet, and stroking 20 yards elementary back stroke. Incidentally, all these tests were done fully

Dental Explorer

By ELLI KARGE

Before getting started, I only hope I can do as good a job as Jim hope I can do as good a job as Jim Gulp!, here goes nothing.

Spring has sprung and the grass is—well you've all heard that a hundred and one times these past few weeks. Of course looking at the Dental School records, we find that seven of our "healthy" individuals, and the word is used loosely, are spending their spring in the wards. Yes, I said seven! That's why so many of you people have to wait such a spell for those dental appointments. We are running short of corpsmen. Kidding put aside, a great big get well soon goes out to Buchanan, Turner, Brouillette, Gonsalves, Wilkins, and we mustn't forget our two mump patients, Anderson and Dahl. Hurry back, won't you?

Office 172 and thereabouts are going to miss that popular red-headed dentist. Our Dr. J. R. Conant is leaving the 1st of May for Memorial Hospital, New York. He'll return to us after completing one month's T. A. D. orders there, but just for a short time before "The Boy Genius" leaves for his new duty station in Pearl Harbor the 15th of June. We're all going to miss that man who hides behind that "wonderful" smelling cigar, aren't we?

We said goodbye to the 30 Reserve Officers this week. They are probably all back to their private practices now, dreaming of the grand time spent among the happy group which composes the Naval Dental School, both in buildings 1 and 122.

Dr. Frates, we are all proud of you and the boys after seeing the grand job of marching you did out there last Saturday. You all must admit, the swabbies really showed them all. Fine job, well done.

Welcome abroad, Billie Roller, DT1 from the Canal Zone, and a fond fare well to Restless Preston, who is another one of our boys to join the Fleet Marines at Camp Lejeune, North Carolina. Luck and stuff to you both.

And we mustn't forget "Junior Apex" McCabe who has joined the student ranks. McCabe is now a member of the Lab School Class. Endodontia misses you, Hash Mark Kid.

Who has more fun than Ollie Brand, especially when he's washing, polishing, shinging and what have you, that blue Studebaker of his. You can find him out behind the barracks any Saturday, all day. Sure does a beautiful job though.

Well time to put this column (?) to sleep—so for now people, one and all, who every you may be—goodbye from the North Wing of Building 1.

clothed, including shoes. For anyone unfamiliar with our pool, the length is 25 yards and the width 30 feet.

Among the NNMC personnel who have already advanced to the latter stage of the course are Donald Bauer, F. Czerchowiec, Carmen Petrix, Steve Manning, Will Morrison, E. Ester, La Fontaine, J. French, F. Kloster, and last but not least, DTC John Nickolson.

No matter where we travel it seems the female species can never be left out, this course being no exception. Ens. Helen Jarvi is the solitary member representing the Nurse Corps. Who said "the weaker sex"?

Names of graduates of this course will be published in our next issue. We're hopeful that everyone will come through in flying colors.

The Winnahs!

Pictured above are the members of the winning duckpin team of the NNMC League, the Battlewagons. Front row right is the team's captain, Mary Jane Koiner and beside her is Mabel Dean. Mary Jane is from Med School Personnel and Mabel, Navy Exchange, Main Store. Left to right, back row, Bob Kanning, Occupational Therapy, Bob League, Lab School, Buck Howe, Firehouse, and Bob Robey, Property.

Laugh Awhile

Marine: Say, that was some blonde with you last night. Where did you meet her?
Sailor: I donno. I just opened my wallet and there she was.

The first I'd really like to slam
Is the one who copies my exam;
The other is the dirty skunk
Who covers his and lets me flunk!

A prisoner was being led to execution by a squad of soldiers one rainy morning.

"What brutes you soldiers are," grunted the doomed one, "to make me march through the rain like this."

"What are you complaining about?" retorted one of the squad. "We have to march back."

A ship's gunner was home on leave sitting before the fire with his cat on his lap . . . The fire went out . . . His wife came home . . . eyed the husband snoring before the dead fire, and screamed, "Fire!!!" The husband leaped to attention, tore open the door of the oven rammed in the cat, slammed the door, and cried: "Number one gun ready!"

'Twas in a restaurant they met,
Romeo and Juliet;
He had no cash to pay the debt,
So Rome'od and Julie'et.

Splasher

Billie Jane Nelson, 123 pounds of Los Angeles loveliness, is California's representative in the national finals of the 15th annual "Swim For Health Week" in New York.

Pitching Stardust

By C. KAROLCZAK

Ready to go! That's a perfect description of the various soft teams around the base who are awaiting action. With cold, damp weather hindering and preventing many games, one finds that material is left to shower superlative adjectives upon. Little material did I say? Read on, you doubtless Thomas.

Among the few teams who managed to brave the late cool no winds, was R. Worter's rambling Print Shop team. Bowden, pitcher of said team, took his first feat at the hands of an eager speedy NMRI team. With a heavy lineup of hitters, including "terrible three", (Spencer, Discher and P. J. Cummings) NMRI managed to bat in 7 runs despite the desperate and tireless effort of s.s. Linn and catcher "Roe" Norris. This game was forced dynamic close in the 4th inning cause of inclement weather.

Commissary came rocketing into the spotlight by defeating C. Schert's N. P. "gashouse gang" in exhibition game. A magnificent performance was turned in by men Petrix who turned back stubborn N. P. team with a 10-0 score. This first effort by a competitive unknown, has impressed a hitter in the league but particular J. P. Oddis, R. D. Freschcorn, R. Sidenor. It will be very interesting to see the pitching duel between D. Smiley and Petrix which lies far in the future.

Coming up from behind in 3rd inning, P. E. Bickel's "road Dental School" managed to out-surprise NMRI team last April 24th. With the able assistance of hitters, Haupt and Thiem, a 1-7 victory was accomplished. "drop ball artist" Beckley. Described wonderful field action by J. Odomitti, Beny Maestes and Discher, and the batting power "choke bat" Teter and "Flash" Zuper, the Dental's overpowering play could not be stopped. Much praise must be placed on Dental 1st baseman, Beck, who more than once seemed to stretch to twice his size in an effort to snag all plays in his direction.

Turning for a brief moment to the other sports activities on base (with due consideration to the writings of my colleague, J. Woods, who is handling the publicity for our varsity hardball team), we find another "J. Kramer" in our midst. Former R. Tech. at N. H., Terry Melchior, has been exercising a rusty forearm in an effort to again reach perfection in his tennis game. Very noticeable has been the absence of H. "Pappy" Eltzholtz. "Pappy", who has usually led the young players by the hand each spring, seems to be a little busy these days, pending his retirement from the Navy June. Good Luck to you. We miss you!

Closing this little informal booth we are still wondering Charlie Ford, weightlifter extraordinaire, has ever found a trace of the weights he has been looking for during the past two weeks. Your troubles are at an end, Charlie. A new set of weights is one of the main objects on order at the Rec Center.

Question of the week: Has any of the teams been missing any players lately. If so, you might try looking in that hole in front of the pitcher's box on "ye old soft ball diamond." Ah there's where many a pitcher has hit the dust.

See you in three weeks, folks. Hope to have some pictures on the various sports activities accompanying this article in the next issue.

Betsy Bradley Wins Wellsley Scholarship

Compliments are in order for Betsy Bradley, daughter of Captain E. Bradley, Executive Officer, Naval Hospital Command. Miss Bradley was recently awarded a scholarship to Wellsley College, the recognition being based on an outstanding scholastic record as well as general participation in school activities. During this senior year she has been rated Salutatorian in a class of over 200 students.

Miss Bradley commenced high school training at Western High. Last year her family moved to Long Beach, California, where she attended Woodrow Wilson High. Several months later Betsy enrolled again at Western High in Washington, from which school she will graduate on 15 June.

It could never be said that this young student has dwelled on "books and tests" entirely during her school course. She is a reflection of beauty and health accented by her versatile interests, particularly in the field of art.

(Continued on page two)

See Rec Off For Aid With Picnics

Hey, Joe. Let's get some of the fun together and go on a picnic. Yeah? And who are you?

Black, no. But the Recreation Department will help us out, I think.

That's right. The Recreation Department will help finance organization picnics and other outings for commands or departments throughout the summer.

Organize your party and contact the Recreation Officer for the necessary permits.

In Memoriam

Again we of the active service pause to pay homage in commemoration of our departed shipmates. We thrill anew to the ancient Navy adage,—“Old sailors never die, they just sail away.”

We review again records of their inspiring deeds in defense of our country. Patriots all, they knew not communism, in battle their valor was Christian and American.

We owe them so much, they ask so little. Mutely, silently, yet eloquently their graves plea that we carry on the Good Cause, that we preserve and guard this Best Nation in whose defense they so bravely died.

Commanding

CDR Winter Comes To NH Via Canal

Commander S. J. Winter, MC, USN, has reported to the Naval Hospital for duty as Chief of Pediatrics, after completing 2½ years at Long Beach Naval Hospital, where he served as Chief of the Pediatric Department.

Doctor and Mrs. Winter, with their three children, arrived on the East Coast via the Panama Canal. They boarded the USS RANDALL, AP, in San Diego, California. Doctor Winter remarked that the fourteen-day trip was smooth and pleasant, the food was excellent and that fine entertainment was provided for passengers. This was the first time at sea for the children and they were fascinated with their experiences aboard ship.

Doctor Winter was born in Pershing, Indiana. He received his MD from the University of Indiana in 1926, after which he interned at St. Elizabeth's in Dayton, Ohio, later receiving his residency in general medicine from that hospital. Next he went to Cleveland, Ohio, for a residency and Fellowship at Babies and Children's Hospital.

Three years ago Doctor Winter returned to the Navy for his second tour of duty, having spent the first tour at the USNH San Diego, California, during the war years, serving under Chief of Service, Deputy Surgeon General (then Capt) H. L. Pugh & RADM Willcuts, CO.

In addition to his membership in the American Academy of Pediatrics, Doctor Winter is also certified by the American Board of Pediatrics.

Chief Carden Awarded Unit Citation

At recent ceremonies which took place in the Board Room, HMC Jefferson C. Carden, USN, was presented the Presidential Unit Citation by the Commanding Officer Rear Admiral M. D. Willcuts, MC, USN.

The award was for Chief Carden's participation with the First Marine Division, Reinforced and read as follows:

“The officers and enlisted men of the First Marine Division, Reinforced, on August 7 to 9, 1942, demonstrated outstanding gallantry and determination in successfully executing forced landing assaults against a number of strongly defended Japanese positions on Tulagi, Gavutu, Tanambogo, Florida and Guadalcanal, British Solomon Islands.”

(Continued on page 4)

Armed Forces Day Observed With Open House

The celebration of the first Armed Forces Day was observed at the National Naval Medical Center Saturday May 20 with open house festivities and special programs in each command.

The programs were so organized as to give a comprehensible over-all picture of the National Naval Medical Center and of the achievements of the Medical Department of the Navy.

Continuous movies were shown in the auditorium on subjects pertaining to the Medical Corps. A band concert was conducted near the main building under the auspices of the Center Command.

The Naval Hospital conducted tours through its facilities. Included in the tour were the obstetric wards, surgical operating suite, orthopedic wards, neuropsychiatry and occupational and physical therapy departments.

Demonstration tours at the Naval Medical School included biochemistry, chemistry, bacteriology, serology, pathology, parasitology, hematology and an audio visual exhibit.

The Naval Medical Research Institute conducted demonstration tours including experimental dentistry, biophysics, glass blowing, and aviation research.

Clinics and displays were held at the Naval Dental School. Clinics were on endodontia, periodontia, oral surgery, maxillofacial and ocular prosthesis and dental research.

The Naval School of Hospital Administration held open house with classes in session.

CAPT Peterson Leaves For San Diego Duty

Captain Paul Peterson, MC, USN, Chief of Obstetrics and Gynecology here at the Naval Hospital will be detached June 1st, and will leave shortly thereafter for duty at the Naval Hospital San Diego, California.

To prospective mamas and papas the news of his transfer is sad indeed. The popularity of the soft spoken easy to smile doctor is further reflected in the proud manner in which the new mamas say, “Capt. Peterson was my doctor!”

Hometown, Pickens, Mississippi. Capt. Peterson received his B.S. degree from University of Mississippi and his M.D. from Vanderbilt. He is a Fellow of the American College of Surgeons and a Diplomate of the American Board of Obstetrics and Gynecology, also a Fellow of the American College of Physicians.

He entered the Navy in 1932, reporting to U. S. Naval Hospital Portsmouth, Virginia for his first tour of duty.

During the war years Capt. Peterson saw duty aboard the USS IOWA, and has been Chief of Obstetrics and Gynecology here at the Naval Hospital.

VADM McCann, Submariner, Retires

In a letter to Vice Admiral Rockwell McCann, USN, Retired, Secretary of the Navy Francis Matthews expressed his regret on the occasion of the Admiral's retirement. Admiral McCann, a patient here at the hospital, was placed on the retired list May 1, 1950.

Admiral McCann will be remembered for an outstanding contribution to submarine operational problems. This was the development of the submarine rescue chamber.

Forever

The Chaplain's Corner

Chaplain H. Grady Gatlin

Lest We Forget

May 30th is the day set aside by a grateful Nation to pay homage and tribute to the memory of the heroic dead who made the supreme sacrifice, in order that our way of life may continue to exist. Those who gave their lives for their country are truly immortal. Our dead who died upon the battlefields, in the air or on the seas lived a few glorious hours. Their heroic deeds are inscribed on tablets of imperishable material. The greatest tribute that we can pay our heroes is when we reproduce and perpetuate their spirit.

In Scotland there is a battlefield on which the natives and their Saxon foes met in a terrible encounter. No monument marks the spot, but a singular little blue flower grows there, and there alone. They call it the flower of Culloden because it sprang from the soil in which the bodies of patriots were buried. The seeds were there of course, but needed the baptism of blood to make them grow. And now every blue flower on Culloden Field, as it bends its head to the summer breeze, is a tender memorial of the brave spirits who dyed that sod with their hearts' blood.

The choicest flowers of human civilization are always Culloden flowers; they spring alone from soil that has been watered by sacrifice. Freedom is one such flower. Religious liberty is another. Christianity is another . . . it sprang from the blood-dewed ground at the foot of a cross. Obedience, magnanimity, self-sacrifice—this is the trinity of patriotic graces Memorial Day must teach.

Flowers for our dead.
Praise for our dead.
Peace for our dead.
Memories for our dead.
Love for our dead.

"They shall not grow old as we who are left grow old. Time shall not weary them nor the years condemn." Our heritage has been enriched and our traditions purified and glorified.

May we ever be conscious of our duty to carry on the work our comrades laid down. May we work for peace and its establishment in all the earth, and may the day speedily come when the heroism of the world will be enlisted against these enemies of mankind: War, ignorance, disease, greed, lust, dishonesty and lawlessness. May we catch the spirit of the idealism of our republic and may selfishness and fear be cast out and the vibrant spirit of hope and moral enthusiasm reign in our land.

Harvard Physiologist Visits Center

Cecil K. Drinker, M.D., Professor Emeritus of Physiology, Harvard University School of Public Health, visited the National Naval Medical Center recently. Dr. Drinker was acting as a Consultant to the Navy on Physiological problems.

Dr. Drinker gave a Staff Conference at the Navy Medical Research Institute on "Chemical Physiology of the Lungs."

One of his main interests was the work being carried on by the staff of the Pathology Division of NMRI concerning the changes produced in the lymph and lymphatic system by total irradiation.

Dr. Drinker graduated from the University of Pennsylvania Medical School in 1913, and trained at the Johns Hopkins and Harvard Medical Schools. He was Professor of Physiology at the Harvard School of Public Health from 1923-1949, and Dean of the school from 1935-1942. He has done experimental work in many fields of physiology; probably his chief interests have been the function of the lymphatic system, pulmonary physiology, and industrial toxicology, on all of which subjects, he has written monographs. The Navy has had long association with Dr. Drinker in working on the physiological problems concerned in Aviation and Submarine operations.

MISS BRADLEY

(Continued from page 1)

larly those of sports, nursing and medicine. Miss Bradley is a member of Phi Beta Rho, a Scholastic Honor Society attained after 5 continuous semesters on the Honor Roll.

Extra curricular activities include the following: member of the student council and Girls' W Club (athletic group); cheer leader; member of clubs branching from courses such as history, chemistry, literature, etc. She was photography editor of the Westerner (Senior High Annual) and has been active in both swimming and tennis meets at school.

As a member of JANGO (Junior Army-Navy Guild Organization) many hours have been spent at Doctor's Hospital as a nurses' aid or working in the nursery at Fort Myer.

In addition to studies and sports, Betsy has devoted patient hours to home.

Our honor student has a full schedule for the month of June, including plans to spend June Week at the Naval Academy.

When asked about plans for college, Betsy expressed a strong interest toward majoring in Zoology. She will leave for Wellsley in September.

Center Drivers Given Safe Driving Awards

A number of Center employees recently received U.S. Navy Safe Driving Awards. CWO J. G. DiCarlo HC, USN made the presentations for the Commanding Officer.

The awards are given annually to personnel-full time drivers—who have gone without any preventable accidents. They are accumulative from year to year.

Chauffeurs from the garage included (number of awards after names): Leonard Carter 3, Wilbert Carter 3, Henry Craven 3, Matthew Hurd 3, Raymond Jones 3, Wilford Keenom 2, John W. Lynch 2, Bishop Melvin 2, William Minnis 3, Thomas Mumford 2, William Osborne 3, Joseph Poole 2, Reuben Rogers 1, William Rule 1, Louis Shearer 2, Fred Somers 3, Martin Taylor 2, Daniel Williams 3, William Wright 3, William Wood 3.

Personnel from the Grounds Department were: Joseph Burdette 3, Jackson Cooper 3, Herman Dorsey 3, Charles Dove 3, Eugene Duvall 3, Robert Foster 3, Gerard Green 3, Hugh Harmon 3, LeRoy Jackson 3, Harry J. McGahren 3, McKinley Wilson 3.

Jesse (Bud) Malatesta of the Paint Shop received his second award and Frank Schweitzer of the Fire Department, his second.

Center employees who were presented Safe Driving Awards picture above are from left to right: Henry Craven, William Osborne, Leonard Carter, John W. Lynch, William Rule, Louis Shearer and Wilford Keenom.

RADM Willcutts Speaks To Alumni At Indiana U.

Rear Admiral Morton D. Willcutts, MC, U.S. Navy, Commanding the National Naval Medical Center, attended the meeting of the Alumni Association of the Indiana University School of Medicine, at Indianapolis May 9 to 12.

Presenting a Paper on "Casualties," Admiral Willcutts participated in the program as one of the principal speakers.

Speaking to the Indiana Medical School group on their third annual Alumni Day the Admiral told things to come in the event of radio-active or biological warfare.

In an A-bomb attack he said "Within an instant, without pain or sensation, exposed persons within 1,000 yards from the center of the explosion would die from external radiation, and those within a radius of 2 miles would be injured seriously and all buildings in that area damaged."

In the midst of the gloomy outlook, however, he was confident would survive—"Our country young and very strong when attacked or attacked."

For both radioactive and biological weapons he declared they are defense measures, adding American people should not make themselves psychological victims through hysteria through ignorance of the measures.

Salt Shaker Sailor

Dear Bethesda,

On the open sea . . . A whole new world has opened for me since I left port that first time. A lot of water has gone over the bow since then, and at first, I was leaning over the railing quite a lot, but I have now got my sea legs and the roll of the ship is second nature. I like it especially at night when it lulls me to sleep. Our beds consist of a piece of canvas stretched over a rectangular steel frame. I loosen the line that holds the canvas, and it makes a sort of hammock. Very comforting and inviting.

We've been out at sea for a month now. At first we passed a couple of islands in the distance, but for the last two weeks there has been nothing at all but the sea. The weather has grown warm, with a steady cooling breeze. We are in Caribbean waters: the richest, purest blue you've ever seen. It has a lot of depth and is inviting. Often wish to swim in the waves. Every now and then, one would hit the water with its tail and keep itself going. Finally, the arched and plunged into a wave. They were steel blue on the back, with white undersides and grossly elongated fins which gave the appearance of bird wings.

It was on deck, too, this afternoon, that I noticed the sea gulls wished against wish that it was what I hoped. The PA confirmed my wish a little later: "Now here this. Now hear this. We will anchor at Saint Thomas, Virgin Islands at about 1400. Liberty will commence immediately . . ." My liberty! In a foreign port. My first!

Well, I can't deny it. It had been a long while out to sea and, even though in the past month the sea had steadily grown on me, I was anxious to get ashore. I didn't see much of the town, because of the Bamboo Room which is only a stone's throw from the dock, and the Singapore Slings were terrific.

Promise to go sight seeing on my next liberty. See you then.
Your Salt Shaker
A. Sailor.

Senior Life Savers And Instructors

Ninety men—sailors, marines, and soldiers—on 17 April enrolled in the Red Cross Life Guard and Water Safety Instruction Training School here. On May 15, after 60 hours of instruction, 28 were qualified as Senior Life Savers and 14 as Water Safety Instructors.

The course was under the supervision of Joseph Aronoff, Assistant Director of Safety Services, District Chapter, Red Cross.

The pictures here are scenes from the show put on by the students at the end of their course. On the top left James French is teaching stroking and to the right, John Nicholson is showing how to break holds.

The group that represents NNMC in the course is shown at the middle right. They are from left to right, back row, Helen Jarvi, Frank Czerechowiec, Donald Bauer, Walter LaFontaine, James French, Cline Hagerman, and Carl Karolczak. Front Row, Steven Manning, James Morrison, John E. Nicholson, Carmelo Petix, and Frank Kloster. The bottom left picture shows preparations for the life saving drill and at the bottom right, four men are carrying another on a stretcher which is supported by trousers full of air.

Visual Aids

By Ray W. Conrad

During the week 24 through 28 April, this correspondent attended Conference of the Federal Visual Aids Workshop at the U. S. Naval Air Station in Washington, D. C. I presume we all realize the importance of training aids, but have we ever considered the tremendous scope of this field and its potential in every phase of instruction—enterprise?

This conference was sponsored by the Federal Personnel Council of the Civil Service Commission. Just about every Federal Agency was represented and all participated in stimulating discussions. I believe good foundational work was the way for further study of this training aid. The Navy is several agencies ahead of the other Federal agencies in this medium.

Considerable good work has been done at the Special Devices Center, Port Washington, L.I., N.Y. The Census Bureau plans to evaluate the TV for use in the 1960 census as instructional medium for cen-

sus-taking both from the standpoint of the taker and the public. The Navy already uses TV for classroom instruction at the Supply Corps Schools at Bayonne, N.J., and the resulting reports are encouraging. However, here we must stop and give credit to the leader-

ship in the other mediums of the Department of Agriculture. This Department has a long history of training excellence.

The discussions of the conference included every medium from

the most simple sign to mock-ups and motion pictures. If we accomplished nothing else during this workshop we at least gained much information concerning the availability of visual aids, who makes them, and how to get them, and there's more to come. Nothing is more important to the teacher than to know where his material lies.

The aspiring Machiavelli once said, "If he (the prince) is shrewd, he usually disguises his sins against the people by professing the most pious aims or he diverts the attention of the citizens from their sufferings and his own iniquities by constructing elaborate public works, staging spectacular entertainments, or engaging in foreign aggression." In his instruction to this Florentine prince, Machiavelli gave the dictators of modern times a textbook for infamy. Since "what is past is prologue" we must study the past to determine the best course for the present and future. These few words of Machiavelli should certainly accomplish a momentous task in guiding us towards the best publications, the best news sources, the best educational and instructional mediums for expression through visual aids.

Naval School Of Hospital Administration

By Ray W. Conrad

Within the past few years, and especially during the recent war years, this country has been rapidly

moving towards a system of accounting, filing, cross-filing, etc., on punch cards. Perhaps you are familiar with the type of card for you've seen it in the old Fa card (now the F card), a Government check, or perhaps a subscription to a magazine—it's the now famous IBM Card. On the 8th and 9th of May, this school has been very fortunate to have had lectures and demonstrations of this type of accounting from the International

(Continued on page 4)

CDR Amberson Lectures At Harvard U.

Commander J. M. Amberson, MCR, USNR, on the staff at NMRI, lectured in "Tropical Medicine" to the student body of the Harvard University School of Public Health on Friday, May 19, at Cambridge Massachusetts.

On May 27, Commander Amberson will present an illustrated lecture on the Navy's "African Safari" at a meeting of the George Washington University Medical Society to be held in the G. W. Medical School Auditorium.

The "African Safari" is a documented record of the Navy's 1948 Scientific Medical Expedition into Africa and has been enthusiastically received by audiences in many cities for its geographic enlightenment as well as for its scientific value.

CAPT. PETERSON

(Continued from page 1)

stetrics and Gynecology here since January 1946.

Captain L. N. Harris, MC, USN will come from U.S. Naval Hospital, Great Lakes, Illinois as Capt. Peterson's relief.

Capt. and Mrs. Peterson and young daughter Virginia, age 4, plan a leisurely trip across country to San Diego.

Often seen on the tennis courts here, Capt. Peterson says he looks forward to continuing his favorite sport on the courts of sunny southern California.

Television Set For T-8

Tower 8 has its own television set now. The set, bought by the patients, was presented to the hospital and accepted by the Commanding Officer. Left to right at presentation are: LT Allan E. Stein, LTJG Joseph Burke, LCDR August C. Wilhelm, Ret., RADM Willcutts, LT Richard W. Howell, HC, Ret., LT Reginald C. Walke, LCDR Urko Stemback, LCDR Kenneth S. Wales, Chief Mach. Jesse E. Weeks, Machinist Lawrence J. Walker, LTJG Erdman H. Pankow, and LT Calvin W. Woliums. ENS Josephine Hart, NC, is standing by the TV.

NSHA—

(Continued from page 3)

Business Machines Corporation itself. This course is similar in content to the more extensive course given at the Navy Supply Corps School at Bayonne, N. J. Mr. E. H. Corey, Special Representative of IBM at Washington, D. C., brought several members of his staff and for two full days the students received excellent instruction in the several technics of machine accounting.

Assisting Mr. Corey were, Mr. M. J. McCarthy, Mr. J. A. Sheehan, Mr. H. A. Tyler, and Mr. L. H.

Hill. Business practices in general were discussed and explained through the medium of punch card system and included such varied subjects as a description of the various machines, preparation of payrolls, cost accounting, appropriation accounting, equipment and stock controls, management of offices and office methods, and of course our own (PAMI) system of personnel accounting. The subject was interesting, the lectures were excellent, and the results were gratifying, thanks to the splendid work of the IBM representatives. The practical aspect of machine accounting has been amply demonstrated to the students through the field-trip method to the Bureau of Medicine and Surgery. In groups of twelve the students have been visiting BuMed under the guidance of LTJG C. E. CONNELL, MSC, USN, and during a three-hour visitation the IBM system has been operation in the machine records section of the Statistical Division. Here they learned how BuMed handles the reports which have been submitted by the field; how they convert them into statistical figures, correct erroneous reports, and finally put this effort to practical use.

Always mindful of the mission of the U. S. Naval School of Hospital Administration in training officers and men to be leaders, a refresher course in calisthenics and military drill has been under way here for the past several weeks. Such instruction will one day enable students to command a division of hospital corpsmen aboard ship, on parade, or ashore at naval hospitals, to the satisfaction of personal pride and command prestige. This is just another one of those small details which go to make up the complete course of instruction for the officers and potential officers, which, though seldom thought of in connection with hospital administration, must be considered in every good command organization.

The proximity of this command to the Navy Department has advantages which cannot be measured. We are constantly privileged to have representatives of the various bureaus and offices of the Navy Department lecture to our student body on subjects of interest and value in this realm of hospital administration. Recently CDR R. E. COKER, MC, USN, of BuMed lectured to the students on the subject of the functions of the Statistical Division of BuMed with particular interest on that Bureau's use of the NavMed F card and other pertinent medical department reports submitted by naval hospitals and other field activities. This invaluable when the classes graduate soon and what has been learned here shall be put to the test.

Cottage Capers

Those who remember the days of "Matilda" will be glad to hear that the "Y" Cottage is the proud possessor of a new Jeep Station Wagon. This one answers to the name of "Willie" and the biggest thing about him is his horn. There's only one thing smaller around this timely information should prove place, Allison's Crosley. We only hope that Willie brings as many good times to as many people as Matilda did.

A couple of new ideas cropped up at the last planning meeting. Thursday evenings around supper time a gang of backyard barbecuers will cook their suppers out of doors. Groceries will be found in the refrigerator, you do your own cooking, and we will share the cost. Favorite picnic dishes will be featured when and if you tell us what they are.

Another new idea at the Cottage is "Couples Night" on Saturdays. A number of young couples in the community and at the base are interested in knowing other young people in similar circumstances. Here's a chance to meet them informally over a cup of coffee, a bridge game, or dancing. Watch for a definite date!

For Sunday morning riding we're getting those ten riders that means a discount for each. Helen doesn't seem to have much difficulty talking people into getting up that early—8:00 a.m. to be exact.

We hope to have the backyard in shape for summer soon. The lawn furniture is being painted and there's talk of a ping pong table, horseshoe pits, badminton court, and even an outdoor concrete dance floor. MAA Meeker and his hired hands are hard at work. We also hope to emerge from behind the concrete mixer any day now.

Don't forget the Record Dance at BCC Rec. Center Saturday, June 10 at 8:30. 30c admission. Dance to Jack Slothower and his records. Call the Cottage, OL 7808, for news of other special activities. Center News is ahead and our schedule is behind.

CARDEN

(Continued from page 1)

Islands, completely routing all the enemy forces and seizing a most valuable base and airfield within the enemy zone of operations in the South Pacific Ocean. From the above period until 9 December, 1942, this Reinforced Division not only held their important strategic positions despite determined and repeated Japanese naval, air and land attacks, but by a series of offensive operations against strong enemy resistance drove the Japanese from the proximity of the airfield and inflicted great losses on them by land and air attacks. The courage and determination displayed in these operations were of an inspiring order.

Chief Carden, who is a native of Chattanooga, Tennessee, enlisted in Nashville, Tennessee, in 1939 and received his recruit training in Norfolk. He is married and has one child, a daughter. He wears also the Asiatic-Pacific, American Defense, American Theater, Good Conduct, and Victory medals.

News Shorts From The Editors' Desk

Commander Frank M. Kyes, D USN, of the Naval Dental School presented a paper entitled "Fault in pull denture construction before the Indiana State Dental Society" at the Claypool Hotel, Indianapolis, Indiana, May 16.

Washington (AFPS)—Navy officers, of the rank of commander and above, except Reserve and temporary officers, will be required to wear the newly-approved dress uniform at all formal occasions beginning October 1951.

Conforming generally with civilian formal evening dress, the new dress uniform will include white tie, three-button waist coat, a slightly different cut, and wearing of miniature medals the left breast instead of the lapel.

Officers—lieutenant commander and below—with the exception of commissioned warrant officers, not required to wear the new dress uniform, but may do so if desired.

Women officers will wear formal evening dress previously approved. Mandatory date for men officers is the same as that for male officers.

Mr. Raymond C. Dennis, National Service Officer of the Disabled American Veterans, has replaced Mr. Raymond H. Davis as visiting "DAV" representative to the hospital here.

Mr. Dennis will visit the hospital each Wednesday and will be available to assist members of "DAV", veterans and prospective veterans as desired. This service is furnished without obligation. Personnel who wish to avail themselves of this service may make necessary arrangements through the V.A. Contact Office, Room 1 Telephone Extension 300.

Doctor Paul Pincus, member of the Department of Physiology, M dlesex Hospital, London, England, delivered a lecture at the Naval Dental School May 15. Dr. Pincus lectured on "The Relation of Pulp to Dental Caries."

Two Naval Hospital doctors highly qualified for membership in the American College of Physicians. They are CDR Melville M. Dikell and LCDR Wade H. Boswell.

Laugh Awhile

The new messenger dusted the officer's desk, wiped off the chair, arranged his books and tidied generally—everything was tip-top except the deck.

"Sailor," said the officer, "was this deck swept?"

"No," admitted the sailor. "No, WHAT?" rasped the officer. "No broom," answered the sailor.

A friend once wrote Mark Twain a letter saying he was in very bad health, and concluding: "is there anything worse than having a tooth ache and an earache at the same time?"

The humorist wrote back: "You have rheumatism and St. Vitus dance."

Conductor: "Can't you read the sign that says, 'No Smoking'?"

Sailor: "Sure, mate, that's plain enough, but you've got a lot of dippy signs here. One of 'em says 'Wear Nemo Corsets'—so I ain't payin' attention to any of 'em."

A swanky chap applied at the recruiting office to enlist. "I suppose you want a commission," said the officer. "No, thanks," was the reply. "I'm such a poor shot that I'd rather work on a straight salary."

Replace All Divots

Lee Frederick, HN, Center Command, portrays on the left those golfers who leave divots upland but on the right he shows the correct way.

VADM McCANN

(Continued from page 1)

Most of his thirty-three years of service was in connection with the undersea arm of the Navy. He served as a Submarine Task Force Commander in combat and after the hostilities he was Commander Submarine Force, U.S. Pacific Fleet.

Admiral McCann will make his home on Yuma Street, Washington, D.C.

Most accidents happen on Saturday. It's a great life if you don't work on Saturday.

Jack and Jill fell down the hill. A stunt that's mighty risky. If water makes them act like that I think I'll stick to whiskey.

"... Well au revoir, Chief Snodgrass, it's been a real pleasure to have been associated with you and I found your lengthy instruction very informative and extremely interesting."

A wife who has good horse sense never becomes a nag.

Dental Explorer

By Eli Karge

How did you all hear that our Dental Base team W-O-N their ball game? They beat the School Staff to the jolly tune of 22 to 9. For a bunch of "old" you must admit, they're good. But what's the trouble with Marion and "Curly"? I'm sure you'd let go with at one home run. Maybe next time, huh?

Poor, poor Beck, Earl Carroll, it is. If any of you think our instant C.M.A.A. has a "soft" job, try making up a watch list for students, and still keep in the graces of all. What with special liberties coming in at the minute, and sometimes after, the shoe fits, put it on, enough to believe me, I don't understand how he can keep that smile on his face and those curls in his hair. All in all though, isn't this better than Guam?

A "welcome back" goes out to Commander Gruenwald. Our Executive Officer returned from T.A.D. to Milwaukee (that's in Wisconsin you know. Near the big one of Sheboygan—say remind me to tell you about Sheboygan sometime). How did you like the old home State, Command-

There is a new face in the Crown Bridge Lab, Main Building, these days. McConnell, J., is going to try and fill the big space which has left. Vernon left, headed in the direction of civilian life and a college education. Good luck to you Varner, you shall be missed around NDS.

NOTE TO KERRON MOORE who just acquired a '50 Ford) D GEORGIE OWEN: Please tell those lovely water fights elsewhere. The front desk doesn't care for water spots on herself or the uniforms. No joke boys, water takes "natural curl" out of my hair. More orders are floating around the place! Two more sets came in this week: Dr. E. B. Nutting is leaving the 15th of June for the enchanted islands; where, as far as the eye can see—blue sky—blue seas—bright flowers—where nights chant with music and starlight—where—say doesn't that sound like the ideal spot to pull duty? Well, it couldn't have happened to a nicer man. Dr. Nutting, we wish you were staying, for you've always been swell to each and every one of us. A sad farewell.

Another Hawaii bound man is Chief D. C. Harvey. He left Office of the Dental School on the 1st of May. My, you should have seen the Chief the day before he left. So excited he was. Why we had to tie the man down to keep him from floating away, but I suppose the same could be expected from anyone.

"Ski", if I could spell Zagrosky, write out your name, but I can't, so "Ski" will have to do. Anyway before we get way off the subject, tell me, just how confused are you get? We shan't let you sit down, boy. I'll let you all in on a secret: This boy puts in for special liberty for Mother's Day a week late, then he forgets on that day his birthday is, well all right, there is one boy who doesn't know whether to have fireworks on the 4th of July or Thanksgiving.

Hope you recover soon, very soon. What with all the women in Building no. 22 these days, I'm surprised the prosthetic lab boys can keep their minds on their work. Not only do they have two of the fairer sex right there in their class, but now they have four women civil service workers to contend with. Just how lucky can you get? All that sweet pair-fume

Personalities About The Center

Charles White, HM1

Chuck White has been at the Center just one year now. In the other seven years of his Navy life, he has been in San Diego, Bremerton, Oakland, with the FMF in the South Pacific, Korea, D.C., and China. The latter he terms as his most interesting duty. He served there with SAGO (Sino-American Cooperative Organization) which operated in the interior during the war in cooperation with the Chinese as an intelligence group. This group also collected and forwarded weather reports and trained Chinese troops.

Chuck is another one of the many golfers at the Center. But when the weather turns sour, the pinochle cards are broken out for a quick game or two. He also likes crossword puzzles and one of his pet peeves is people who kibitz over his shoulder when he's in mental agony trying to solve them.

When asked if he would stay in, the answer was neither yes nor no; it was a big "20". Perhaps at that time California will see HM1 White again.

Crew's Library:

For The Baseball Fans

It has been said that baseball fans are seldom bored! They are always looking for thrills and excitement and remember all the victories; sometimes they are sadly disappointed but even the lost causes are not forgotten and the true fan is always loyal to his favorite team. Here are three important and interesting books which will interest you whether you are spectator or player.

and powder. Ah, can't you smell it now? Lovely, lovely!

We said "How was the leave? to Chief Stinson, just fresh off of a thirty day leave. That sun tan becomes you, Chief. Also a great big "Glad to have you back" to Lt. Cdr. Paul Moore, who came from Bermuda. From Sunshine to Raindrops in one easy jump.

Drs. Frates, Niiranen, Superko, Kaires and Swearingen had a three day "vacation" in Huntington, West Virginia last week. Those T.A.D. orders are alright you know, especially when you spend half the time waiting for the Navy station wagon to pick you and your baggage up.

Everyone concerned is still waiting patiently for any word at all on who did or didn't make their rate. The "Scoop" should be coming in any day now. Fingers and toes are still crossed.

Just about enough of this chatter now, so the Corporal (isn't that right, Dr. Frates?) will say, "see you next issue".

Russell Pearsall, HM2

To some people a parachute serves only one purpose. To others however, it is a different story. And if you doubt it, ask the fellow in the picture above. Once while flying from Teheran, Iran, to Cairo, Egypt, Russell Pearsall's plane developed engine trouble. In fact three of the four motors failed and everyone parachuted. The group landed on the desert east of the Suez Canal, miles from any village. Soon along came some Bedouins who were instantly attracted by the parachutes. Then and there a bargain was struck. The Bedouins got the parachutes and the six-airmen got two camels and finally found some railroad tracks.

Russell, an HM2, is now stationed at NMRI. The photographer caught him in Entomology preparing the skin of a mosquito larva for examination.

New Castle, Pa., sent Russ to the Navy in October 1943. Since that time he has seen Great Lakes, Camp Lejeune, Yorktown, Va., Cairo, Teheran, French Morocco, and NNMC. He married in 1946 and has a son, David Roy, six months old.

Have you ever wondered why Ted Williams flopped in the 1946 World Series? Why Joe McCarthy's Yankees win series after series? What goes on behind the scenes? What is the technique and strategy of Big League managers? Then read GREAT BASEBALL MANAGERS by C. B. Cleveland. This is a "dugout" view of the greatest managers from Cap Anson to Casey Stengel. The book also includes a wealth of colorful anecdotes and inside stories.

If you think you know your baseball, check yourself on a few of these points: Who was the player who carried his bat with him into hotel dining rooms? What magnate suspended a player for not tipping his hat to him on the street? In what ball park did the following sign appear, "Please don't shoot the umpire, he's doing the best he can"? All of these questions are answered in ONE HUNDRED YEARS OF BASEBALL by Lee Allen. Here you meet the greats and the not-so-greats in an intimate and dramatic story of baseball with all its glamour and all its strife.

Connie Mack, "Mr. Baseball himself," who said, "I have never known a day when I didn't learn something new about this game," has studied his lessons for 68 years. Now he draws from his knowledge and experience to write CONNIE MACK'S BASEBALL BOOK in which he gives pointers on pitching, catching, playing the bases, batting, and running as well as what it takes to be a major leaguer and how players get there.

Russell Chase, HM3

Another Russell on the Personality Parade is Russell Chase, HM3, of Salem Depot, New Hampshire. Russ enlisted in March 1943 and after recruit training and HCS in Great Lakes came to Bethesda. He first worked on T-14 and then T-16 where he has been ever since.

Most of us would rather work in a department but not Russ. He has turned down several chances to work someplace on the grounds that work with patients is both fascinating and interesting.

Off-duty Russ is spending most of his time at the George Washington University night school where he is studying pharmacy. He plans to continue after his discharge next March. Among his likes are meeting people, history, travel, reading music, dancing, and hiking and for a hobby he has taken up stamp collecting.

Not Much Research Involved

By J. P. Walsh

As bar tender at the stately ball of 18 May this columnist approaches the dead line with a magnificent detachment very like a coca-cola hangover. From a bar tender's perspective, the fun seemed dogged and the coca-cola consumption alarming. Gaiety can be so dismal and long drawn out. It's the bar tender's fate to know the night before how the morning after will be, the answer to a personal research project on the Why of the stoic unpleasantness of bar tenders from nickel beer parlors to 90 cent lounges.

With the depression of a one-night-stand coke dispenser and the dread of this season in the Maryland sun there is no reason to expect a fresh approach to the reporting of the going and the gone. Real-gone, HMC's OTTO and THOMPSON and HMI CORDOVA to BuMed Unit One. Gloria Pagano, SN to give her undivided attention to married life. DN MARTIN to Quantico and divided attention to courtship.

The Going, DTI BERZINSKAS to Pearl Harbor for field work on the "chair". We recommend his work on rodents for delightful summer reading which was so well received by rodent fanciers the world over.

But, Three Came Home, so it may only be the recent low-pressure weather that causes our grim outlook. EMC's MARRER and POWELL from the "MuMu" project on Somoa. DN NICHOLSON, who was here as an SN in 1943,

Med School Scuttlebutt

By Harry Fallers

Evidently it is nobody's blank business but nevertheless the men quartered over in Barracks 112 are still speculating as to where 'Pappy' Kearns goes every night around eleven o'clock.

All peace and quiet left the third deck last Monday when Lab Class 1 established its beachhead which will last during the four months practical work now required for graduation. However, the staff welcomes with open arms the students who will be a pleasant addition to the watch list.

Oliver Trice, HM3, just left a few days ago for his new duty station at the Naval Receiving Station at Anacostia.

There have been some vicious rumors circulating about the 'Wild Goose'. Whether or not they are true we would like to repeat one about JOHN GIRAGOSIAN'S shopping tour of the grocery markets. After buying pickles, bananas, rolls, and salomi, the 'Wild Goose' saw some bunches of grapes at the market on the bridge in Bethesda. Of course, he couldn't merely buy a bunch. Sample first! And sample he took. With eyes protruding, mouth open, and boy hands grabbing wildly at the grapes he quickly stripped three bunches before the proprietor could suggest he might like to buy some. So he bought a dime's worth.

The little Frank Adams has become a bachelor for a month while his wife is away on vacation.

The young sporty set has abandoned the local clubs and now is journeying up to Hagerstown in search of excitement. Lou Kovarik has become somewhat of an authority on that particular territory.

Good old Pops Everett has been rather crippled the last week or so. He persists in telling some fantastic story about fishing. We personally believe otherwise. We feel that Pops is experiencing the natural consequences of the passing years. We youngsters are satisfied in believing just that.

We couldn't finish this without some mention of Tiny Schroer. We have a word of advice . . . give up baseball, Tiny, and stick to the collecting of stamps. None has ever been hurt by a wild stamp.

Looking Back

Five years ago this month all America let loose for a day. And there was a good reason. Victory in Europe. But then the people settled down to the other task remaining before them. The NEWS described the way as "rocky, the war is half won."

A year later on display in Washington were some of the last relics of the Reich. The marriage certificate of Eva Braun and Adolph, his will and political testament, and the order that Admiral Doenitz would be the new President were shown at the Archives Building.

May of 1948 brought lighter news. The opening of the Admirals' saw them pitted against the Receiving Station. And baseball became the topic of the day at the Center.

But just a year later, at first anyway, the team didn't fare so well. But even that didn't subdue the spirit and love of the game.

Last year, at this time also, came news of the promotion of Captain Stone to Rear Admiral.

struck for the dental rate aboard the Coral Sea and trained at Great Lakes returns to burn with a hard bright flame for science.

Pitching Stardust

By C. Karolczak

And they're off! The softball race of the year is finally off to a flying start now that the balmy weather has moved in. With an over abundance of rain, game cancellations, and limited practice fields, the teams have finally settled down to do some real "ball playing."

The Naval Dental School's "tribe of warriors" achieved an overwhelming victory over a valiant Medical School Staff. Despite the thrilling double home runs scored early in the 2nd inning by Gilman and Dietz. Worters team of nine were powerless to stop the abundant batting power which finally cast all their hopes into the sea during the 4th and 5th innings. As if in retaliation, a revengeful Beck, cinched the game with a home run in the fifth inning, followed quickly by De Fillippi, who turned in a repeat performance.

Dental's pitching champion, Beckley, accomplished a total of 6 strikeouts. The game ended with a dashing score of 22 runs for Bickel's Dental "Hot Shots," leaving a total of 9 runs scored by Med. School.

Commissary came out fighting mad on the 1st of May, to prove she would still be a threat for the championship of the year. A stubborn and daring NMRI team fought the resolute Commissary team "tooth and nail" for a quivering 7 innings before bowing before the lash. "Speed King Petrix" managed to gain 6 more strikeouts to his credit after allowing Dischinger, Cummings and Zipperi to make the tour of the bases several times. The excellent demonstrations turned in by House on 1st and the catching ability of Parris were enough to turn the tide of battle from defeat to victory for the Commissary crew. Final tally: Commissary-7 runs. NMRI-5 runs.

P. E. Stanley's "Illusive nine" obtained another victory on their string of conquests by completely defeating a morale-lacking N.P. team 16 to 0. Schubert's N.P. team seemed to be placed in a state of hyponosis when confronted with Smiley's curve ball. Many of the "All Star Teams" players will undoubtedly be picked from the Hospital's lineup if such impressive performances are repeated.

The newly arrived caps and jerseys are a god-send for stimulating the various teams' morale. Now if awe could arrange to have a portion of evening chow set aside for our captivating ball players, the situation would be just about complete. (Dreamer!)

At this time I would like to pay due homage to New York's gift to the Navy. Tom "Irish" Brothers. He has done a marvelous job of keeping equipment available for all teams and keeping an amazingly accurate record of all games played. Team captains are again reminded to use the score book included with the softball equipment, placing the final scores in bold print at the end of the game.

Turning to the other aspects of sports we might recommend that you stop by the gym some time witness Don Smith, run through his regular schedule of gymnastic exercise. His "giant swings" on the horizontal bar will bring a gasp from the lips of all spectators.

I'll have to put an end to this column before I run off the page, but before doing so, I would like to give out a bit of warning to all "ye tennis players." Due to the crowds swamping the tennis courts on the week-ends it may soon be necessary to have reservations made to insure a place to play, but until that time, remember that this is one case in which the early bird gets the tennis courts instead of the "worm."

NH Takes Lead In Intramural Softball Play

By C. Karolczak

P. E. Stanley's NH team has taken a firm stand at the top of the softball intramural league. The "yellow-jerseys" have managed to establish themselves by adding 3 wins and 0 losses to their credit.

Among their most recent exploits was a rough and tumble game which led to a 16-15 victory over NMRI in a 7 inning "season thriller." After a neck and neck 3 innings, NH managed to acquire a lead in the 4th inning. Then NMRI took charge when Dischinger managed to sway a home run in the 5th with 3 men on and 2 outs. However, due to the hustle of husky, J Oddis, and the batting power of SS Mark Kaiser, NH managed to retain their undisputed air of supremacy at the head of the league.

Not to be outdone by NH we find the rest of the league in this topsy turvy position. Lab 14 remains strong with 2 wins and 0 losses, followed closely by NDS and the "blue jerseys" of A. Hay's commissary crew, with 2 wins and 1 lose each. NMRI has managed to grasp a 2 game win out of 5 tries.

Sport Shorts

By C. Karolczak

DTC J. Nicholson has managed to obtain "life guard" emblems for graduates of the recent life saving class.

Recently interviewed catcher for the varsity team, George Funk, seemed to be enthusiastic about NPMC's chances of a good high perch in PRNC's baseball tournament. We're all behind you, George!

Sports celebrities viewed at the recent Rec. Dance were: George Royster, Will Morrison, T. Brothers, Frank Czerichawiz, Don Bauer, and Don Teter. Rumors are flying that these dances will continue right on through the summer. Can you think of a better exercise than a fast rumba to the music of Howard Williams?

All ears are being strained lately in an effort to hear the answer to the \$64 question, "When is 'speed artist' D. Smiley going to resume his pitching career?" All the teams are hopeful that hand of his becomes healed in one big hurry—or are they?

Hope to see Charlie Bonfield, 220 yd. freestyle swimmer, turn out for the swimming team along with "Rag Mop", Fred Hardy, who recently turned in a fast 25 yds. in 13 sec. flat.

A Hit!

Walter Reed AMC 3rd sacker tacks a line drive in the third inning of seven inning practice tilt. Behind the plate are catcher George Funk and Umpire Charlie Wagner. The Admirals won 13-12 in the first practice game.

An example of the newly-acquired softball jerseys is shown here by the NMRI squad. All nine intramural teams were outfitted with this type of jersey with colors covering all the spectrum of the rainbow

Tennis Enthusiasts Invade Courts

By C. Karolczak

Through thick and thin our tennis amateurs have managed to cut their way through the recent damp weather to dally away a few hours on our well established tennis courts. With a humble eye peeled on the everdrawing near Spring Tournaments, many of our NPMC staff have managed to get the breaks and stiffness out of their bones in an effort to bring their serves to dagger point sharpness.

Among the "oldtimers" getting tuned up for the tournaments are: "Old Faithful" John Giragosian, and Terry "Curley" Melchi. The latter having the possession of a wicked cannonball serve while "Poncho Giragosian," who hails from the Lab Staff, is one of the most dangerous south-paws these courts have seen in some time.

"Shorty" Powell, HMI from Commissary, has become one of the better strategists in the game and owns a very decisive forearm drive.

The Waves barracks has also sported some young blood to invade the gates of stardom in tennis. Among the most startling is a young damsel named "Jo" Feldi. This gal has grasped on to the whirlwind tactics of tennis with amazing speed and should put up a contest in the tournaments.

Among the newcomers in the field of action are S. Brown, Van Belois DT3, and "Hot Rod" Ed Garner.

We are all hopeful to find some good material for the All-Navy tennis tournaments from this listing. Results of the NPMC tournaments will be published in the next issue.

Sport Scope

By J. C. Woods

Flash, the latest report is in swinging bat over on the baseball diamond. We don't know what the results will be yet, but at this point the boys seem to be lining up into quite a ball club.

Mustering the team we find cran catcher George Funk doing excellent work behind the plate. Lon Kavarik holding his own at third base, Tom "Smiling man" Brothers picking them short, Don Polizzi sparking the second base area and R.D. H. lite snatching the mat first. S. the cameras to the outfield we speed demon George Royster center, Bob Deloche former ball champion in right and B. Brabant playing the fence.

Top notch hurlers are found W. Chatham, Beanie Roberts, Richard Cox, last years pitcher star. In a seven inning practice their first defeat 6-3. Recent tilt with the Walter Reed Medical Center the Admirals slugged the Khaki crew to win slub fest thirteen to twelve. Spring Moose handed the tight ball game was played the DeMoley ball club, final Admirals 1, DeMoley 0. Good thing was provided by Kavar Brothers, and Henderlite.

All in all the boys are cooking Grade A ball club and will be themselves known in the league.

The Washington Senators, a cal team, have been playing excellent baseball these past weeks to stay in the general of third place. Sid Hudson, Ray Scarborough are doing a very nice pitching and it looks if the Nats are going a long this season. In the National League the Brooklyn Dodgers manager Burt Shotton are keeping themselves on top of the list with Philadelphia right at their heels.

For some real thrills and put on your Derby and roll over the Uline arena to watch the sport baby in action.

Sticking one's neck out is the worst thing one could do to self, but then Middleground stuck his neck out and won the Kent Derby, so hear goes. The roller by in five years will surpass other indoor sports on the draw card. The Detroit Tigers will be the American League pennants. They've won the pennant every year since nineteen thirty, so should they change now? All racing fans keep your eye on three year old named Caraway, certain person came up to me other day and said: "I have on the base two years now have never had my name in paper, so just to keep the straight . . . G. G. Metcalf.

Portrait Of RADM Oman Unveiled June 2

A portrait of the late RADM Charles Malden Oman, MC, USN, was unveiled at the National Naval Medical Center by Mrs. Oman Friday evening, 2 June, during brief ceremonies attended by service and civilian friends of the family and senior Navy medical officers on duty in the area, with their wives. The portrait was a gift by Mrs. Oman to the Navy Medical Department and presented by the Surgeon General, RADM Clifford A. Swanson, to the Navy Medical Center, where it will hang from the south wall of the lounge just off the main lobby, facing the main entrance.

The Surgeon General, in his presentation address, eulogized the memory of the eminent Navy doctor with these words:

"In 1942 Doctor Oman commissioned and was the first Commanding Officer of this National Naval Medical Center. It is fitting that the portrait we here unveil of Doctor Oman should, as a tribute to yesterday, an inspiration for today, and a cherished heritage for tomorrow, adorn the walls of this

Training Films In Production At NDS

These cables on the upper deck of the Dental School carry the extra voltage required for lighting the movie "set" in room 224.

Under CDR "Ted" Frechette as Motion Picture Officer, the Dental School is overseeing production of three professional-level dental training films. One film is on partial dentures, with CDR Ben Oesterling as technical adviser. CDR Lesney is supervising a film on exodontia, and CDR Frank Kyes says yea and nay on a full denture picture.

"Shooting" has been under way for several weeks, and will continue for two or three weeks more. A Dental Corpsman is the principal character in one of the films; in others, a table-full of dentures, clasps and articulators make up the acting cast.

One thing that distinguishes Naval dental films is their emphasis on basic principles. Even when techniques are shown, the mechanical and biological reasons for the steps are explained. This stressing of principles prolongs the useful life of a training film; techniques may become obsolete or may change, but basic principles go on forever.

Most dental films produced by or for the civilian dental profession concentrate on techniques. Many of them are silent pictures. They vary widely in quality of photography and in teaching value; some are excellent, while others show the operator's knuckles and elbows as often as they do the inside of a patient's mouth.

Photography, animation and soundtrack for the current productions are being handled by a civilian training film producer. The professional civilian crew and their expensive equipment are a far cry from the one-man, one-camera, one lens production units of earlier days. CDR Carl Schlack pioneered in dental films for the school some years ago, operating on a shoe-

Twenty-Four Long Service Awards Given

Twenty-four Civil Service Employees were recipients of long service awards recently. The awards were presented by RADM Morton D. Willcutts in the Admiral's board room.

Among the many who received awards were Katherine Lanahan, with twenty-six years continuous duty with the Naval Hospital. Also in this category is Susie Miller, with twenty-two years. Mrs. Miller is awaiting physical retirement.

Other long service awards were given to: David Ayers, 26; Albert Bath, 23; Charles Brown, 21; Henry Craven, 21; Robert Irwin, 28; Aaron Jones, 22; Guy Kes-secker, 24; Thomas Kell, 27; William Kirby, 23; John Lynch, 27; Matthew Rodgers, 23; Daniel Scarlett, 25; Edward Smallwood, 25; Clarence Soper, 21; Tempi Taylor, 28; Marie Walsh, 25; Onedia Decatur, 27; George Hantzmon, 22; Joseph Voisine, 23; Honesto Crisostome, 22; Bertha Walter, 22; and Louis Suit, 24.

string—and on his own time. His training films were the best of their kind at the time; and they don't look too different from the Dental Corps' recent pictures—two of which won awards last year at Venice, in the International Exhibition of Cinematographic Arts.

Something New For June Staff Dance June 22

With hints of something entirely new, the Enlisted Dance Committee is putting on steam to get ready for the next hop.

Time for the shindig is 2030 and the place is the Gymnasium. This time the Navy Band will furnish the notes.

The "something new" is in the form of a buffet supper but different from the others that have been featured.

To find out all about it, why not come next Thursday? One hundred girls will be there through the courtesy of Mrs. Anna Lansburgh, the Washington lady who in the past has invited so many of us on her moonlight cruises.

June Dance—Informal but Nice.

Alvin Real HM 2 Awarded Unit Citation

Alvin Real, HM 2, USN, was recently awarded the Presidential Unit Citation for service with the First Marine Division, Reinforced. RADM Morton D. Willcutts made the presentation and congratulated Real.

The citation was signed for the President by John L. Sullivan, Secretary of the Navy. The citation read:

"For extraordinary heroism in action against enemy Japanese forces during the invasion and capture of Okinawa Shima, Ryukyu Islands, from April 1 to June 21, 1945. Securing its assigned area in the north of Okinawa by a series of lightning advances against stiffening resistance, the First Marine Division, Reinforced, turned southward to drive steadily forward through a formidable system of natural and man-made defenses pro-

tecting the main enemy bastion at Shuri Castel. Laying bitter siege to the main enemy until the defending garrison was reduced and the elaborate fortifications at Shuri destroyed, these intrepid Marines continued to wage fierce battle as they advanced relentlessly, cutting off the Japanese on Oroku Peninsula, and smashing through a series of heavily fortified, mutually supporting ridges extending to the southernmost tip of the island to split the remaining hostile force into two pockets where they annihilated the trapped and savagely resisting enemy. By their valor and tenacity, the officers and men of the First Marine Division, Reinforced, con-

Bill Downing To Be First Golf Pro Here

Bill Downing, instructor and assistant pro at the East Potomac Golf Course, will come to the Center 15 June to become the first pro here.

The new pro will manage the course and will be available for lessons either to individuals or groups. Appointments for lessons may be made now with the starter at the first tee.

He will also offer a golf clubs repair service and a professional line of equipment for sale.

Downing comes to the Center with many good references. One widely known Washington golfer recommended him for his repair service in particular.

There is no doubt that a pro is needed and now Downing will help to make the course a shining 4.0.

Notice for Patients Requiring Prosthetic Dental Treatment

Service personnel, active or retired, who require full or partial dentures and are sure to be available for treatment during July, are urged to report to the Naval Dental School Information Desk as soon as possible for examination prior to such treatment.

tributed materially to the conquest of Okinawa, and their gallantry in overcoming a fanatic enemy in the face of extraordinary danger and difficulty adds new luster to Marine Corps History and to the traditions of the United States Naval Service."

Real has been in the Navy since August of 1942. His home is Gonzales, Texas.

institution. The record of his service stands as a goal and a challenge for the many young men and women of the Medical Department who now and will in the future serve in the Navy and particularly in this splendid United States Naval Medical Center.

RADM Willcutts, Commanding Officer of the Medical Center, accepted the portrait. RADM Herbert L. Pugh, Deputy Surgeon General, also participated in the program by delivering the introductory remarks.

Mrs. Oman was honored at a reception following the ceremonies. The reception, given by the Surgeon General at his quarters here, was attended by many medical department officers, their families, and friends.

Gold Star Mothers

Memorial Day has been reserved for many years as a day of tribute to those men who gave their lives in order that we might live freely in a nation secured by the principles of democracy.

Among the ceremonies held to honor those men was that of the National Gold Star Mothers, Inc., held Monday evening, May 29.

The Director of the Women's Reserve, ComPRNC, was directed by the Commandant to request a corpswave to escort one of the Gold Star Mothers who lost a daughter and son during World War II.

Serving as escorts to Mrs. Helen Vjada of Capital Heights, Maryland, were Nadine Calhoun, HMI, Bethesda Naval Hospital, and James Howlett, PFC, Fort Myer. Mrs. Vjada's daughter was a corpswave aboard a plane transporting patients from one hospital to another within the United States. She was killed in a plane accident.

The program was highlighted by the installation of the National President of the Gold Star Mothers.

Services began with a Grand March of the Gold Star Mothers, followed by the National Guard of Honor of the American Legion who advanced colors.

St. Andrew's Society of Washington, D.C., was represented by two members attired in kilts, who offered special selections on the bagpipes.

Chaplain Albert J. Karnell of Fort Meyer delivered a timely sermon, stressing the importance of a closer bond among our nation's families.

The entire ceremony portrayed solemn beauty. The expressions on the mothers' faces revealed stories never written or spoken; however, silently expressed the hope for an everlasting nation.

At the close of the program each mother was presented a yellow rose corsage.

THE PANEL ON PERTINENT PROBLEMS announces its summer schedule of discourse. The members have decided to hold the warm season session on "MUSCLE BEACH BACK OF THE BARRACKS" (it is noted that as of June 12, the hose will once more be available for quick showers since Bethesda's best groomed cars will have been transferred). (It is also noted at this printing that soon there will be no Muscle Beach due to improved parking conditions, so culture with the muscles will have to find an annex).

The members in planning this series have put the most pertinent problem first, that of flies and a panel of the nation's pest control authorities will discuss and attempt to solve this problem of air-borne pestilence. With all due respect to these authorities, but with a more knowing respect for the flies, the group plans to introduce the special weapons division to this species. Following a picnic supper and aerial display, a discussion will be held on the possible utilization of this cheap expendable carrier for military purposes.

Considering summer as a burden, the schedule was planned to be light and diverse. Tentative lectures include: SMITH on the Esthetics of Beach Wear or Is The Bikini Suit Passe? KAROLCZAK on A Critical Estimate of Various Muscle Improvement Techniques from Dynamic Tension to Bernard McFadden. RUNKEL on Etiquette

Naval School Of Hospital Administration

By Ray W. Conrad

Almost there . . .

That good record of which we boasted some weeks ago has been broken. Of course I speak of reenlistments. Remember when we said we were reenlisting all hands for six years? Last week John E. ANGEL, HM3, USN, left the Navy for civilian pastures. Now this is not the end of the story, however, for we reenlisted him in Class V-6, USNR, before he got away and thereby we claim a victory of a sort. What sort? Don't remember?

Interagency relations is a term which becomes more familiar to us from day to day as the Department of Defense (originally the National Military Establishment) moves towards that unity which was the intent of those who established it. Recently Admiral WILLCUTTS and our Commanding Officer, LCDR ZIMMERMAN added their appreciation to that expressed by COL Thomas E. HARWOOD, Jr., MC, US Army, Ass't. Executive Officer at Walter Reed General Hospital, when he thanked WOHC Belton E. JENNINGS, USN, for the latter's presentation of Armed Forces Talk No. 314, "The U.S. Navy", to the Forest Glen Section of that command. Mr. Jennings' presentation was informative and enjoyable. COL Harwood informs us, and we are glad that he has had this opportunity to further cement good relations.

Sincerity To Help Brings RC Volunteers

Volunteer Red Cross workers are men and women who come into the organization because they sincerely desire to be of service. They seek the help of Red Cross professional staff in evaluating their individual abilities and interests and to get training for volunteer jobs.

There are 9 areas of Red Cross Volunteer Service, 4 of which we use extensively at this hospital. These are Gray Lady Service, Motor Corps Service, Production Service and Entertainment and Community Service.

The volunteer we see the most and where services are best known to us is the Gray Lady. In 1949 we had 130 trained Gray Ladies working at this hospital. Gray Ladies working here were recruited from the Red Cross Chapters of D. C. and Montgomery County, Maryland, and have contributed throughout the year a monthly average of 1166 hours of service given by a monthly average of 77 ladies. They have provided shopping service to bed patients, library cart service, assistance on the crafts program, assistance with recreation, and numerous miscellaneous services of letter writing, package wrapping, mending and bandage making.

Red Cross Motor Corps Service is in daily use at this hospital and during 1949 23 drivers contributed a monthly average of 131 hours of service to us. In this branch of volunteer activity, men and women who are experienced and skillful drivers take convalescent patients to ball games and other entertainments. They drive patients, hostesses, and entertainers to and from hospitals and clinics.

The Production and Supply volunteer workers are behind the scene making many useful items for hospitals, disaster sufferers and war refugees. Our 1949 monthly average of production workers was 109 workers producing from navy gauze an average of 8,000 surgical dressings per week. In addition to surgical dressings we have received for distribution knitted afghans, sweaters and cast socks, layettes and bedroom slippers, all made by Red Cross Chapter Production workers.

The Entertainment and Community Service volunteers are made up of men and women who utilize organization ability. They arrange for many entertainments and recreational activities at this hospital, frequently enlisting the services of professional and amateur entertainers. They plan trips for hospital patients to sporting events, plays and musical affairs in this area.

The influence of 5 other volunteer services of the Red Cross are not directly felt here at this hospital but offer a variety of new experiences to volunteers who wish to donate time and effort to being helpful. These are Nurses Aide Service, Social Welfare Aide, Staff, Arts and Skills Service and Canteen Service.

The nurses aide service appeals to women interested in nursing. After a period of training they volunteer regular hours of time helping professional nurses in hospitals. Through this training they also equip themselves to do an adequate job of home nursing when illness strikes in their own homes.

Social Welfare Aides are trained to assist professional social workers in the handling of personal problems. They are frequently on the Chapter end of a service requested here for a patient, such as getting or giving health and welfare reports.

In the Staff Aide groups, volun-

CDR Miller To Portsmouth For Duty

CDR Walter R. Miller, MC, USN leaves Bethesda for duty at the Naval Hospital in Portsmouth, Virginia. He has been stationed here since 1948 as assistant and chief Orthopedics.

In 1927 he entered NROTC where he was then commanded by Admiral Chester Nimitz, at the University

of California, and in 1931 he received the reserve rank of Ensign (in line). Cdr. Miller had originally planned to become an Architectural Engineer, and for a reason he was given a commission in the line. After three and a half years he changed over to medicine. In 1937 he joined the Medical Corps as LTJG in regular Navy.

The doctor saw plenty of action during the war. He was aboard the USS California at Pearl Harbor at the time of the Japanese attack and later served aboard the USS Pacific Fleet flagship USS Pennsylvania. During the period October 1941 until December 1945, he served aboard the USS Colorado as Senior Medical Officer throughout Leyte, Mindoro, Lingayen and Olongapo campaigns. He entered Tokyo Bay on V-J day aboard the USS Colorado for the signing of treaty.

Other than Bethesda, CDR Miller has served at shore establishments at Long Beach and Seattle. He has had special courses at Mayo Clinic in 1943; one year at James Whitcomb Riley Memorial Hospital in Indianapolis in children's orthopedic surgery; and recently, he passed part one American Board of Orthopedic examination.

The doctor has three children: Bobby, age two and a half, Michael, age eight and a half, and Emily, age eleven.

Volunteers find an opportunity to serve by doing clerical work such as filing, or operating a switchboard. They may serve as receptionists in chapter offices, or assigned to such community service activities as helping in a library, operating a mimeograph machine for some health or welfare community agency.

Canteen Service offers to volunteers interested in food a chance to serve by assisting in emergency group feeding in disasters and preparing and serving food at Red Cross Chapter houses. These workers often participate in community activities such as canning, or school lunch projects.

Some men and women with creative ability and technical skills find their proper channel of volunteer service in the Arts and Skills group. Here after training they give time in activities of teaching and crafts in hospitals and community institutions such as children's homes or homes for the aged. They may conduct classes at Chapter houses or interested groups of citizens.

Up T-6 Way

Photog Bob Carstens snapped these children at play on T-6 the other day. They are from left to right, David Steele, Carol Lee Ovrum, Jimmy Wooten, Kathy Irons, R. H. Mitchell, and Suzie Long.

Navy Belles

By Nadine Calhoun

17:30 — anyday — Summertime (without Porgy and Bess). The day's work has ended, thoughts of duty are pigeon-holed all the morrow, chow is down and our general retreat is toward the quarters. It's hot, humid and you're weary. So you shower (more humidity) and don just nothing for comfort (it doesn't take much to make some people comfortable). Then you yield to temptation to drift gently along on the tides of sleep, hoping the raveled sleeve of care will be knitted by 40 winks. As you drift, so does conversation and you are lulled by voices (some shrill some soft), speaking of many things. "How about 'one' game of Canasta?" Two hours later . . . O.K. Just ONE more game". Helen Glover does for Canasta. What Culbertson does for bridge. "Who has something for burns?" The bathers of the sun come in with well-rounded tans, nursing minor burns gotten as they entered the basement via windows over arrow steam pipes. McSwain and Lora were among those piped broad.

A knock, banging doors, a clash of metal and spokes sounds the turn of the peddle pushers.

Billie and Katie explain the range of the land contour in certain areas, "Just played a turf game putting a few hours o' curse".

Can hear Meacham humming away the hours toward that date of departure on leave.

New voices echo above the cubicles of x-ray tech strikers Posipanka (pronounced Margaret), Schumann, June Miller and Kindschi. Says Med enthusiasts are Algers, Laver, McClintic and little Annie Adoloto. "I can just see me trying to instruct patients in OT". "An I, Reggie for I think you are all suited for the job."

"They sure don't give you any where you are going for duty, they"? No, Harleee, they don't. Less they have to find out where they are needed first.

"Why do we have to wear hose is Summer?" But think of the razor blades you would use. "Those in the skultery are getting in hair". But, if the dish-washers is out, who washes dishes? Have the dishes in the sink, Ma.)

Karge is doing a good job covering Dental news".

Boy, was I glad to see Igou, Lison and Berry report for duty". Believe those personalities would be quite welcome wherever they went.

Louise's new Nash does bring umbico closer, doesn't it?" "What me does Lab clas convene in the main lounge tonight?" "The new ones are beauties". That's right . . . American Beautys.

"It was a diamond and the first time run of the season for Barley Mills on 28 May, as they sped in Florida to New York to Bethesda Chapel to the Quarters. Good luck, newly weds.

"Don't mind finding alarm clocks, hangers, etc. hidden between sheets at 0100 but please don't cha the paja together again."

"Why go to the pool to swim when you can do practically the same thing in the plugged showers." Chief Stark is unpacking to prepare for her trip to Com12. Found box of candies, which is being forwarded to Smithsonian in the future.

Trust these 40 winks have knitted raveled sleeves of care as this bit of conversation drifts ashore and be anchored among the archives.

Personalities About The Center

Cline Hagerman HM 3

Fenton, Michigan, which is about sixty miles northwest of Detroit, is the home of our first personality, Cline Hagerman, HM3.

Very few people, Hagerman says, know his first name so in this he will be just Hagerman.

After graduating from high school in 1948, Hagerman came in the Navy September of the same year. He went to boots and HCS in Great Lakes and then was transferred to the White Tower. He worked for a while on 134 and T-12 before going to T-11 where he is now.

In school Hagerman liked football and track and swimming. He is still very interested in swimming, having just completed the Red Cross Course in water safety and is also trying out for the Center team.

Hagerman plans to get out of the Navy when his time is up to study business administration. Right now he is trying to acquire a tan so his blushing won't be noticed.

News Shorts

(Continued from page two)

marked and missed by many more. Mrs. Fritz has devoted much time to being hostess at the staff dances. When asked about her leaving she said: "I will miss the friends that I have made here, but hope to make as many in California."

CHEF'S SPECIAL: When the waitress at the cafeteria was asked for a Sea Frank she gave a short shocked shake of bewilderment. Referred to the advertisement she called to the waitress behind the counter: "One Sea Frank" "Sea Frank?" the second waitress queried. "Sign right above your head," said the first. The second waitress looked at the sign, then went over to the galley window and yelled: "One Sea Frank." "Sea Frank?" a voice shouted from the seclusion of the window. The first and second waitress joined forces and disappeared into the galley for a conference with the unseen voice. Some minutes later the sea frank arrived. It was good, but not worth all the fuss, yet recompense was attained in that a new dish may have been introduced to the world.

NSHA

(Continued from page two)

The enlisted students gave a picnic to remember, on Saturday, 27 May, at Great Falls, Virginia, and the fun flowed like gossip. The Recreation Department furnished athletic gear and financial support, they took their own food, and that was the beginning of the school activity most likely to be remembered by all, for, unlike any other class, no one slept. Rumor has it that many wives drove home in lieu of husbands who had driven out. The burden of proof still falls upon the prosecution. All Allegations are denied.

It has been said that, "There is no hope for the contented man."

CDR Casimir Park

Casimir F. Park, CDR, MC, USN relieved Captain White as officer in charge of the civilian treatment department.

CDR Park received his degree from the University of Michigan in 1930 and took a rotating internship at Columbia Hospital with affiliation with Milwaukee Children's Hospital and South View Isolation Hospital. Then he had a one year's residency in Pediatrics and infectious diseases at the University of Michigan Hospital.

The doctor is a Diplomate of the National Board of Medical Examiners and has his MS in internal medicine from the University of Pennsylvania.

In 1943, after six years of civilian practice, he joined the Naval Reserve and was sent to NAS, Whidbey Island, Washington. He served as ward medical officer at the Naval Hospitals, number 128, 10, and 8, Aiea Heights, Pearl Harbor. From 1946 to 1949 he was physician to the Domiciliary Section of the Veterans administration facility, Wood, Wisconsin.

It was not until May of 1949 that he was transferred from the Reserve to the Regular Navy. He took a years residency in Internal Medicine here at Bethesda before taking up his new position.

The doctor is married and has four children Kathleen, Jerome, John and Michael. The family is still in Milwaukee, but will move to Bethesda when their new home is completed in September.

John Norris

"These have been my happiest four years and four months since I've been in the postal service," confided John Norris when asked his opinion about working here. He has been here since February of 1946.

Johnny first entered the postal service in 1920 and since then has worked up to the position of a Station Superintendent. In one more year he will retire and he plans to take the first three years after retirement in leisurely travelling about the country. He plans to visit every state in the US and finally decide on which one he would like to settle down. He plans on a small rural tract of about five acres.

Life in the early days was centered about Bethesda, where he was born in 1896. He attended grade school here and Carol Institute High School. He was interested in many sports, but baseball always had a singular attraction for him. He played for his high school and later for the Tenny Town Club, which won the District Championship for three years.

In 1916 he entered the Army. His outfit was sent down to Texas to fight the notorious Verilla and Karanzo, bandits who were instigating border trouble. But this was the prelude to World War I. Johnny spent twenty-one long months in France and took part in the historic battle of the Argonne Forest and Belleau Wood. It was on a march to Metz that the welcomed word of the Armistice arrived. So he came home.

In 1920 he joined the postal services and has been with it ever since. Johnny takes great pride in his work and is certainly an A-1 fellow about the station.

Two Times Everything

Two more sets of twins who arrived recently are shown here. On the right, Mrs. Sara Lou Atkinson holds Jo Anne and Ann Reid born May 29. The father, LTJG J. O. Atkinson, MSC, USN, is attached to the Center Command. On the left is Mrs. Jean Grainger and Patricia and Deborah born on May 28. LCDR Grainger is on the staff of the CNO.

Dental Explorer

By Elli Karge

Another day, another dollar. Believe me people, this weather is just too much for your reporter. Three days of solid rain and then when you have the duty, what happens, that's right, that lucky old sun decides to beam down with all its glory. There's just no justice in this wicked world.

A pat on the back for "Chief" Billie Roller. Yes, this likeable "old" man made Chief as of the first of June. It couldn't have happened to a nicer one of the Dental gang. You look so—oh—h-h—h, well just so oh. in your new uniform. Also in the new rating department: cigars were passed out by the new DT3's Plaske, Cooke, Martinson, and DT2's Burkinshaw, Pennington, and Lawrence. Congrats goes out to all seven. Those new rates look very nice on your jumpers, boys.

Dr. E. B. Nutting seems to be making a big hit with the physical therapy department these days now that he's a patient in Tower 14. I get to hear reports of "that nice Dr. Nutting" cheering up every one, staff and patients included. We all wish this friendly representative of the Dental Clinic would get up and show his face around here. We don't like it when one of the gang is laid up. We get used to one another and we miss you when you're not around.

Everett "Wilys" Howard, DT2, said farewell on the 1st of June and is now heading for points west, about as far west as Pearl Harbor. Just how many of the Dental can they use out there? The rate they're going now, we might as well transfer the NDS section of NNMC to Pearl. But then maybe that wouldn't be such a bad idea either.

Off on leave: Captain Mitchell, CDRs Kyes, Niiranen, Pollard, Wohlfarth, and Gardner, Lt. Ann Boyle, and DNs Zagrosky and Owen. That doesn't leave us with many hands aboard does it? But we try to get along without them.

A new man reported aboard this past week. It was W. Adams, DN, with bright red hair, fresh from DGT school at Great Lakes. We hope you're going to be happy here with this bunch of creatures. But then, how can you help it?

Word has reached these little ears of mine that two, 2 mind you, Dental Waves are going to report in the next few days. It sure will be a blessing to have them around. We are sort of at a minimum here, at Dental that is.

With the new system we have at Dental, why the place is just loaded with the fair set of Nurses here on staff. Every morning at 0900 we have about fifteen of them in for dental appointments. You should see the corpsmen—all with shining shoes and slicked down hair. A sight to behold, believe me.

Blue ribboned cigars were passed out by LTJG G. L. Gardner for his brand new bouncing boy who said "hello" to this big world on the first day of June.

The squawk box is squawking, the phone is ringing and about six patients are standing here glaring at me so for now, that's all she wrote.

Sport Scope

by J. C. Woods

Stealing bases was out of the question in a recent practice tilt with the Metropolitan Police. The Admirals were handcuffed from the beginning and dropped the seven innings 8-4. The local authorities flashed their power from the beginning scoring two runs in the first. The long arm of the law on the mound had the sailors stymied all through the game. It wasn't until the bottom half of the fourth that the gobs got their sea legs, straddled the plate and started hitting. Don Polizzi belted a double into left field, Lou Kavarik stepped up to the plate and smashed a single into right sending Polizzi home. The boys picked up a few more in the fifth and sixth but the game was in the hands of the law and the Admirals dropped their fourth practice game out of six. Actually this has nothing to do with what the sailors will be like in the P.R.-N.C. league. A regular lineup has not yet been completed and Chief Henderlite has been putting everybody into the game. So we really won't know how good the boys are for a couple of weeks yet.

A recent report tells us that Major League baseball attendance has dropped off 13 per cent since the beginning of the season. Baseball big wigs bellow about television being the cause of this. The question is would the average American rather take an hour to find a parking space spend another hour waiting to spend his hard earned money getting a ticket and then sit under a hot sun trying to figure out what's going on, or would he rather grab a nice cold bottle of beer, relax and watch it on television. What do you think?

Recently the Chicago White Sox let an Eddie and an Al and a scar burrow their way into the lineup. Washington Senators the Nations Capitalizers.

A citation is in line for Citation the Calumet currency king. The speedster is now the biggest money making horse in the country edging out Stymie former king, by a couple hundred dollars. The famous horse was overheard saying to his stablemate, "The boss has given me two extra bales of hay since winning that race and that ain't money."

NP Team Rallies For A Two Win Come Back

by C. Karoleczak

Schubert's NP division awoke from a deep sleep and started down the come back trail, by taking two in a row, in recent games played.

The first victory was obtained when NP turned back a fierce Print Shop team by a score of 17-11. An atomic reaction took place when 3rd baseman, Pinto, representing NP, obtained 3 for 4 well needed hits. Supported by the place hitting abilities of left fielder, Jameson, the dents made against Mercer's pitching by Bowden and Sherin of Print Shop, were not felt too deeply. The losing pitcher was Gilman.

NP's second win was obtained at the expense of Phys. Med's newly re-organized team with a final score of 37-7. Details of the game can not be published due to the inability of either team to record the game in the scorebook provided. May that lasting hint be helpful and heeded by all teams in future games.

Varsity Infield

Don Polizzi leaps high with Admirals in preparation for opening of P.R.N.C. League. Don plays the keystone position in a well knit fast working infield. Big Lou Kavarik stands ready for his part as Admirals prepare for opening game, with receiving Station. Lou played first base for the Admirals last year, has switched to third for the fifty season. Playing shortstop is Tom "Irish" Brothers the Cornell Comet. Tom teams up with Polizzi to make one of the best double play combinations in the league. Next in line is R. D. Henderlite 1st sacker and team manager. Henderlite claims Admirals will go a long way in the league and that the pitching and fielding of the team has been more than satisfactory. George "Ozark Ike" Funk crouches in anticipation of a good season with top hurlers. George caught last year and proved to be an excellent man behind the plate and equally as good with a bat. In the pitching department we find Willy Chatham doing some tricky chucking from the mound. Chatham has pitched a few games and has shown plenty of stuff.

Med School Scuttlebutt

By Harry Fallers

William L. Jones, HM1 returned from a week's TAD at The Mount Sinai Hospital and the Brooklyn Polytechnic Institute where he attended a course in the Theory and Technic of Electrophoresis. Some time this summer the laboratories are obtaining one of these machines which will be used to make studies of protein dyscrasias.

The main topic of conversation around the laboratories the past week has been the startling discovery which was made by 'Moose' Kovark. It seems that Moose has discovered an entire new sex made up of nothing but women. A tremendous revelation, to be sure. Being a rather talkative fellow he told me all about this girl . . . oops, I meant to say LADY. We can believe that she is a heavyweight and rather tall but we won't believe that she is a lady wrestler.

We would like to apologize to BIG FRANK ADAMS, HM1 for any embarrassment caused him from our last column. We were speaking of the other Frank Adams, HM3. Everybody knows, or should know, that BIG FRANK ADAMS, HM1 is not married. We suppose that the reason for this is that the girls over here are not any more fleet of foot than those in Greece where Frank was continually on the run—on the run away from the girls. Sorry about the mix-up, LITTLE FRANK and BIG FRANK.

Another casualty of the playing fields is John. Got hit in the eye with a tennis ball. Here is our suggestion to you John—stick to your grapes, soft grapes—they don't hurt very much.

Cox has renewed his shipboard romance. It was old reunion time aboard the good ship Bear Mountain, flagship of the Wilson Line.

NOTICE: We would like to borrow a late model used car (a 1932 Ford or a 1935 Dodge) to use for the next Two-night doubleheader at the ball park. Even a 1936 Packard would do if it has four wheels.

NNMC Intramural Softball Schedule

Team	Won	Lost	Pct.
Naval Hospital	6	0	1.000
Lab. No. 14	4	1	.800
Commissary	4	2	.666
Naval Dental	3	3	.500
Print Shop	3	3	.500
NP	3	4	.429
Phys. Med.	0	1	.000
Med. School	0	5	.000
NMRI	1	4	.200

Tennis Champs Battle For Title

By C. Karoleczak

Attack! Drive deep! Surprise! Should I use the American Twist service or the cannonball?

Yes, it seems that my ears are ringing with tennis, tennis, tennis—and with good reason.

The NNMC tennis tournaments got off to a flying start with an approximate number of 16 ranking players entered for the "singles" game while a hearty group of seven pairs entered the "doubles" tournament.

Out of nowhere came an avalanche of forearm drives and authentic back hand volleys to surprise and defeat Cdr. A. Emerson. A comparative newcomer in these parts, HM1 P. Cook, managed to bat in this first victory by a score of 6-1, 6-4.

A. S. Tong, who represents the Pathology division, took a step further by defeating his first opponent, 6-3, 6-4, and marched on to defeat his second rival, Bob Thompson, (who also had one under his belt), 6-4, 6-3.

No surprise to many were the decisive "kills" of Lt. (jg) Anderson who has piled up a record of two matches without the loss of a single game.

A decisive offensive match was turned in by HM3 Mercer, who managed to out do P. G. Stouks, by a repeat score of 6-0.

After dropping his 1st "doubles" match, W. L. Jones, defeated his adversary, John Giragosian, by a series of forcing shots which ended in a 6-4, 6-3, win.

Among the "winning combinations," Cook managed to combine efforts with Lt. (jg) Jackson, and come out at the head of a 7-5, 7-5 attack on their opponents, A. Emerson and C. Hering. Meanwhile, Tong and Giragosian earned a more decisive match with a 6-4, 6-3, self-controlled win.

F. A. Adams and R. B. Bingham smashed home a thrilling set of doubles after being hampered into a defensive campaign by Bob Thompson and Bill Jones, who were tied at the end of two sets with one win apiece, with scores of 9-11 and 6-0. Then the team of Adams and Bingham, turned on the heat and left their opponents at the bottom end of a 6-1 score.

Tournaments will reach their climax this week with the end in sight in a few days. Results will immediately appear in this forthcoming column.

These tournaments are only a preview of the coming action to take place at Annapolis, Md. during the week of July 16 when the All-Navy tennis championship will be held.

Naval Hospital "Wildcats" Still Top Notch Team

By C. Karoleczak

Pete Stanley's "yellow jerseys" increased their social standing in the intramural softball league with a recent double win.

Pitching Stardust

The "rambling wrecks" from NH received a handfull of dynamite when confronted with the die hard teams of Gismondi's Research "wildcats" and Commissary's "bucking broncos." The "yellow jerseys" managed to nose out their rivals by a slim, one run, in both games, and thus still retain their driver's seat on the "Intramural Bandwagon" with a tally of 5 victories.

It seems that only the combined efforts of Lab. 14's "mighty nine" now stands in the way of NH's quest for complete supremacy in the 1st round robin of the season. That game will no doubt be decided before next "press" time—so watch for the results. Lab. 14 has proven themselves worthy of combat by having no defeats up to the present writing. The hitting power of Sellidia and Hooker, should be sufficient reason to give pitcher, D. Smiley, many "a long and sleepless night."

Who can say what reason there is for the inspired playing of Schubert's NP division. After starting out rather awkwardly, the "roaring tigers" have literally showered an avalanche of blitzkrieg upon their latest opponents. This recent "awakening" may all be due to the supreme efforts of 3rd baseman, Messina, and his neighboring SS Kaulius. The long anticipated addition of, Levi, may or may not be a contributing factor.

Turning the spotlight to other areas we find that there are cases when one sport will conflict with another. Take for instance the efforts of Cdr. Frates being confined to his game of golf. With the tennis tournaments beckoning a come-hither call, there was only a faint, "I'm too busy," reply in the wind. Maybe next year-huh, Cdr.?

Congratulations goes out to Pettix, Morrison, and Schubert, for their recent roles as umpires in several of the recent games played. Quite a different procedure from their regular player positions.

Incidentally, there has been a lag in the number of umpires who are willing to face the wrath of "conscientious objectors," spread out quite evenly throughout the various teams. This is an appeal to all umpires who have been appointed, to please keep tab on the softball schedule and make all possible efforts to be there.

Spring house cleaning, which has been the reason for the malady, "3 day bachaches" (a new disease congenital in the Washington area to allow more participation at the Nat's home games) invaded the premises of the NNMC swimming pool this past week and has resulted in a beach-combers' paradise (minus the beach) of a glistening 25 yds. of attractive water. If you are disgusted with getting wet from the recent overpowering sunshine, simply come into the pool area and get wet in the inside.

If any mermaids are found in the area of our swimming pool, they will have to be turned over to Mr. Atkinson immediately for immediate return to their native haunts. (I am not referring to the "Silver Fox". This request has been placed by the "Mermaid Con-

First blood was obtained NH topped a vigorous NMRI after a nip-and-tuck free for played on the station so diamond.

NMRI took the lead in the inning when P. J. Cummings hit his first home run in the ball with two-on, and then going turn in a repeat performance his next time at bat with on. That fact, plus the field action, Don Smith and Benny M. managed to keep the "hot" in the lead until the last of it when the combined efforts of Guinn, and Sellers, turned into victory by pouncing a score over the surprised Re team.

Three moons later, NH again on the warpath and on the trail of the Comm "warriors." Kaufman set the in the 1st when a total of was acquired. The heavy pit of Commissary's, Dias, held "Redmen" to only one more in the next 6 innings. But seemed to be all that was for the NH team finished the at the head of a 5-4 score, teams played heads-up with Horek and McKevitt, p handsomely for Commissary.

An "on the road" game was by NH over the Bethesda Market, played at Bethesda, baseman, Freshcorn, and ss managed to tour the bases times to bring a 12-5 victory the Bethesda home team.

NMRI

and Attire onboard The Pun Dinghy (He will also answer questions you may have on punt and dinghy) ELLIOTT T.S.) on The Problems of burger Stowage Arising Communal Living in Semi Climates such as Washington

A musicale, the piece-de-resistance of the session will include premiere performance of a The Whippet's End, with a temperative dance by the Martino Group. At the conclusion of the dance, a fragment of structure, the Whippet, will now dead but still remembered placed in a time capsule and The junior scientists who have conferences this summer are dially invited.

ARRIVALS AND DEPARTURES: HMC L'ETOILE from Sirogo, HMI SCHULTZ from Somoa, HN PARKER from Sta. Anacosta, HM3's JOHN and GISMONDE from Radiotop School, NMS, HMI BARKSKI to Cairo, A baby born HMI WADDELL and wife.

servation Association," whose headquarters is on "No-Man's Island, Pacific Ocean.

Before leaving, I'd like to suggest you watch the interesting game between Print Shop and NH, played this 12 of June at 1500 on the softball diamond. This will be the 1st round robin of the Intramural softball league. If you can't find room, due to capacity crowds, simply make a reservation for 3 feet of ground by calling Beachwood 7369, Fairbanks, Alaska. See ya Gang!

Civilian Board of Consultants Meet At BuMed

The Board of Honorary Civilian Consultants to the Medical Department of the Navy held their annual meeting at the Bureau of Medicine and Surgery June 9.

Members of the Board include many of the nation's outstanding doctors; the Presidents and Presidents-elect of the American Medical and Dental Associations; the Secretary of the American Pharmaceutical Association; and leading educators in the nursing profession.

Among those attending were Dr. Frank B. Lahey, Lahey Clinic, Boston; Dr. Edwin J. Cohen, Harvard University School; Dean Paul A. McNally, Georgetown University School of Medicine; Dr. Richard B. Cattall, Lahey Clinic; and Sister Mary Geraldine Kulleck, St. Louis University School of nursing.

A buffet lunch served to the members of the Board at the Bureau of Medicine and Surgery was furnished by the NNMCC Commissioned Officers Mess (open).

Son Of Former Commanding Officer Ordained Priest

On Tuesday, 6 June 1950, Henry Harper, son of RADM John Harper, MC, USN, was ordained into the Holy Priesthood of the Catholic Church in the National Shrine of the Immaculate Conception, at the Catholic University of America.

On Saturday, 10 June 1950, a dinner, which was attended by the families of RADM Willcutts and RADM Harper, was served in honor of the newly ordained priest in the Commissioned Officers' Mess at the Medical Center.

On Sunday, 11 June 1950, a reception was held in honor of Henry's ordination at the Commissioned Officers' Mess. The reception was attended by friends from military and civilian circles.

In attendance with the family, was Richard Harper, the younger son of Admiral Harper. Richard is pursuing studies leading toward ordination into the Jesuit Priesthood.

RADM Harper was the Commanding Officer of the Medical Center in 1944 and of the Naval Hospital from 1942 to 1945.

Southern and Southwestern universities, conducts a broad program of research, training, and education in the nuclear sciences through a contract with the Atomic Energy Commission. Nearly 500 research workers from 42 states, Hawaii and Puerto Rico have attended the courses which are under the direction of Dr. Ralph T. Overman.

Foreign Visitors From All Parts Visit NNMCC

Miss Florence Harmer, R.N., from Cambridge, England, visited the Naval Hospital recently.

From Denmark came Miss Agnete Wedell-Wedellsborg, Occupational Therapy student, to observe the occupational therapy department. She was shown through the department by Dr. Vaupel, Chief of Physical Medicine.

In a letter to RADM Willcutts the Uruguay Embassy expressed appreciation for the consideration given Mr. Carlos A. Surraco, a Uruguayan architect who visited the Center. The letter singled out Mr. Nordstrom who accompanied Mr. Surraco through the hospital.

Other foreign visitors were: Dr. Armador Cobas, Puerto Rico, to NMRI; Col. Alfonso Cruz, Director, General Hospital Quito, Ecuador; Dr. Bao Shih, Shanghai, China, Mr. Val Detaro, Brazil; Dr. Sakugi Komagata, Director Electrotechnical Laboratory, Tokyo, Japan.

A letter from the chief of the Bureau of Medicine and Surgery expressed thanks for its civilian staff which has been visiting the Center in small groups in order to gain some knowledge of the NNMCC operations.

Isotope EM Class Here Graduates After 8 Mo.

Four enlisted men have completed the Navy's first course in radioactive material handling and personal safety. They were awarded certificates as technicians in this specialty by Captain J. L. Enyart, MC, Commanding Officer, Naval Medical School.

The official name of the course was "Radioactive Isotopes Laboratory Technique". This was the first formal training course of its kind in both Naval and civilian institutions. Commander M. W. Mason, MC, Chief of Radiology, Naval Hospital, through earnest efforts and hard work, is largely responsible for its commencement.

The eight month course was successfully completed by Donald J. Cummings, Joseph E. Johnson, Arthur R. Holtry, and Raymond M. Gismond.

LT E. L. Ozburn Leaves Center For New Duty

LT. Ernest L. Ozburn, MSC, USN leaves for the Army Chemical Center, Edgewood, Maryland on 1 July. "I'm looking forward to the change even though it is only sixty miles," said the Lieutenant who has been stationed here at the Center since May of 1942, just three months shy of being a plankowner.

After completing high school and two years of college at Young Harris Academy and College in Young Harris, Georgia, Mr. Ozburn entered the Navy in 1931 as an enlisted man with an HA2 rating. Since then it has been a steady rise in rate and rank. He is attached to the Chemistry Department here at NMS. He also has completed his last two years of college at George Washington University.

Mr. Ozburn states that the Navy has maintained a unit at the Army Chemical Center for some years, antedating Unification by some ten to twelve years. As far as can be determined, he is the first officer to be assigned at Edgewood from the Center. He will probably be working in the toxicology department there.

Mr. Ozburn has been stationed on many ships and shore establishments. Among them: Paris Island, Brooklyn Supply Depot, USS Relief, Naval Medical School at the old Naval Medical Center, USS Pyro (ammunition ship), YMS 95 (a mine sweeper), and the USS Henry T. Allen (troop transport).

Mrs. Ozburn and their three year old adopted son, James Harold, will follow the Lieutenant to set up their residence in Edgewood.

CAPT. Hakansson CO, NMRI, 1943-48 Died At Chlesea

Captain Erik G. Hakansson, MC, USN (Retired) passed away at the Naval Hospital, Chelsea, Mass. on the morning of 19 June 1950.

CAPT. Hakansson was the Commanding Officer of the Naval Medical Research Institute from 1943 to 1948.

Born in Sweden, CAPT. Hakansson came to the United States in 1909 and attended the Medical College, University of Illinois from which he graduated in 1915. He entered the U. S. Navy from internship as a LTJG in 1917.

During his years of service, CAPT. Hakansson was actively engaged in research work in the field of tropical medicine. At the time the Japanese attacked Pearl Harbor, he was attached to the Hospital Ship Solace.

In September 1947, CAPT. Hakansson was presented with the decoration of the Royal Order of Vasa (Knight, first class) which had been conferred upon him by the Swedish Government in 1939, in recognition of his services during

Music For Patients

Six new Zenith radios were presented to Captain R. D. Gillett by the Gray Lady Corps. The radios are for the use of the patients.

Salt Shaker Sailor

Dear Bethesda,

Charlotte Amalie . . .

How different from U. S. cities! How different this little city is, clinging to the foot of the gigantic mountains. How odd, foreboding, and fascinating. Here is a different mentality entirely from that which I had known.

When we got off the liberty launch there were a bunch of children offering peanuts, shell beads and silk ladies slippers for sale. I pushed my way through the crowd and up the street. I hesitated a moment and looked across the small park to the Bamboo Room, but went on. Probably the first two things that I noticed which were radically different were the gay colored pastels of the adobe houses and the odd vegetation and multicolored flowers of which there were so many that I could hardly have learned but a portion of their names. So I didn't bother to learn them at all, I simply let their richness and wonderful scents imprint themselves on my mind.

There was one main street that stretched from the dock out around to ChaCha village (a french colony) and beyond to the beautiful beaches of gold sand and emerald and sky-blue waters. This was the only street at a flat level, the others ran parallel to the main but on the mountain. Palisades of steps served as communication between one street and the other. Here you would pass Spanish-looking villas with large walls surrounding them. Every so often you could see a lizard scramble out of a cranny into another, and there were myriads of multi-colored humming birds busily backing out of and going into the abounding flowers.

I climbed one of these palisades into the hill that overlooked the city. It was a sight to stow in memory. The little sailing fleet huddled in the harbor, and the gay and exotic colors of the houses below. Here I was sheltered in the cool foliage and the air had a particularly sensuous quality of drowsiness and something regarding a lost paradise.

The shops down below, with their open arcs on the street, windowless, were just closing, and the sun was falling behind the mountain above me. A subdued light fell over the city as I climbed down the palisade, back to the waiting liberty launch.

Your Salt Shaker,
A. Sailor

Capt. Hakansson

(Continued from page 1)

the Tenth International Congress of Military Medicine and Pharmacy, 1939.

CAPT. Hakansson retired from active naval service in 1948. A small farm in Virginia was his new pursuit.

Funeral services with full military honors were held Thursday, 22 June 1950, with interment at Arlington National Cemetery.

Epitaph To A Motorist

Here lies the body of William Jay, Who died maintaining his right of way.

He was right, dead right, as he sped along,

But he's just as dead as if he'd been wrong.

Doctor (complacently): "You cough more easily this morning."

Patient (querulously): "I should. I've been practicing all night."

News Shorts From The Editor's Desk

(AFPS) If you have not received your NSLI refund dividend check yet—be patient. There are another million just like you. However, the Veterans Administration has announced that if you have not received your NSLI refund check by June 30, then, and not before then, write a letter to Mr. E. G. Joseph, Director, Special Insurance Projects Service, Veterans Administration, Washington, D. C. A prompt investigation will be made and reason for the delay in payment will be explained.

Lt. H. E. Rooker, MSC, USN the Assistant Finance Officer, is on a ten day leave prior or detachment. He will go to the Naval Hospital at Pensacola, Florida to assume the duties of Finance Officer there.

Lt. Rooker has been here since October of 1947. He, Mrs. Rooker and his son, Rickey, have been popular members of the Center Command.

RADM and Mrs. George C. Thomas, MC, USN (ret.), made an informal visit to the Center recently. The Admiral and family were on their way from Florida to Maine for the summer.

RADM Thomas will be remembered as a former Commanding Officer of the Naval Hospital in 1934 and 1935.

A thirty-three per cent decrease in the incidence of tuberculosis among Navy civilian employees was reported by RADM C. A. Swanson, Surgeon General of the Navy, as a result of the Navy Medical Department's continuing chest X-ray program.

Of the 213,442 civilian employees who were given X-ray examinations in 1949, four of every 1,000 employees had evidence of tuberculosis, while the incidence in 1948 was six in every 1,000. Under the Navy's tuberculosis control program, earlier and more effective treatment is provided for those affected than would be possible after noticeable symptoms had developed. Chest X-rays are made annually on all civilian employees, and at the time of their entering and leaving Navy employment.

The "Smiling Irishman", Tommy Brothers, got six hits for six times at bat recently in a game with Anacostia NAS. One double and five singles.

Ten dental officers will graduate from a Post Graduate Dental course on June 30. The course had a six month duration and touched all fields of dentistry, but particularly those specialized subjects such as oral surgery, etc.

Three Medical Photography Technicians graduated recently. They were responsible for many of the pictures used in the NEWS. The honor man was Warren H. Eyer, HM 1, who goes to Portsmouth, Virginia. Others: J. J. McBeath, HMC, to Oak Knoll, and C. S. Williams, HMC, who is studying here. Two other members of the class, E. A. Hay, HMI, and H. W. Aguirre, HMI, will stay here to take an additional three month course.

Three Medical Corps and a Medical Service Corps officer were issued TAD orders to attend the American Medical Association Convention, MC, LTCDR E. P. Cronkite, MC. They are: Captain A. J. Detton, LTJG W. H. Chapman, MSC and LTJG S. E. Willis, MC.

The Chaplain's Corner

"Help me to be a sport in this little game of life. I don't ask any place in the lineup; play me where you need me. I only ask the stuff to give you a hundred per cent of what I've got. If all hard drives come my way I thank You for the compliment. Help me to remember that You won't let anything come that You and I handle together. And help me to take the bad breaks as part of the game. Help make me thankful for them.

"And, God, help me always to play, on the square, no matter the other players do. Help me to come clean. Help me to see often the best part of the game is helping other guys. Help me to be a 'regular fellow' with the other players.

"Finally, God, if fate seems to uppercut me with both hands I'm laid up on the shelf in sickness or old age, help me to take as part of the game also. Help me not to whimper or squeal that the game was a frameup or that I had a raw deal. When in the dusk the final bell, I ask for no lying, complimentary stones. I'd only to know that you feel I've been a good guy."

—Chaplain's Desk

150 New Books Added To Crew's Library In June

Nearly 150 new books were added to Crew's Library during the month. Only a few can be mentioned here but you may judge from this sampling that there are books for all tastes.

Nearly 100,000 families in the United States are building, or have recently built, their own houses. Housebuilding is a multitude of simple jobs so if you can saw a board, hammer a nail, and want a house enough to work at it, you can qualify to build your own home. Hugh Laidman, ex-Marine, in the book *How to Build Your Own House*, shows you how it is done in step-by-step, nail-by-nail, easy-to-follow directions. A husband and wife team, in about twenty week-ends can save up to \$4,000 even after letting out contracts for the excavating, plumbing, heating, electrical and heavy concrete work.

SKYSHOOTING is dedicated to that great fraternity of amateur photographers who look for other fields to conquer. Hunting the stars with your camera tells you what there is to photograph: the aurora, meteors, the stars and their nebulae, the sister planets as well as the sun and moon. There is explicit and understandable information as how it is done both with and without a telescope.

Speaking of stars, if there ever was a person who set his sights on the stars it was Bernt Balchen, who sacrificed world fame as an Olympics contender to win his wings amidst the ice and snow of Norway. In *Hitch Your Wagon*, by 2 veterans of the U.S. Air Force, we come to know Balchen's colorful personality and follow his adventurous flights with Amundsen and Byrd to the Poles, as well as the heroic part he played in World War II.

THIS RECKLESS BREED OF MEN by R. G. Cleland tells the story of the trappers and fur traders of the great Southwest. Before the missionaries, gold seekers or cattlemen, these hardy, beaver hunters and mountain men to whom danger was a daily commonplace, opened up pathways to the western sea.

Lawyer: "When I was a boy my highest ambition was to be a pirate."

Client: "You're in luck. It isn't every man who can realize the dreams of his youth."

N. H. Doctor Passes Ophthalmology Board

Dr. Samuel H. Oliver, MC, has recently been certified by the American Board of Ophthalmology. CDR Oliver is the Assistant Chief of EENT department at the Naval Hospital, where he has been duty for the past two and one-half years.

CDR and Mrs. Oliver with two children Terry, thirteen, Jo Anne, six and a half, reside 5503 Northfield Road in Bethesda.

Canasta, New Bug With Bad Bite, Bites Man

The Canasta bug has bitten W. 3C. The Red Cross recreation worker noticed that quite often there were several interesting games going on, so she and the patients decided that a tournament would be fun.

The following patients signed: Berry, J. V. VAB; Manning, C. PRAN; Sharp, T. W. Cpl. Payne, Louise GM3; DeLairez, R. Pfc; Steward, H. C. SN; and Miller, C. F. Pfc. They played for best two out of three games. The tournament time lasted one week.

The big winner was Pfc. Miller and the runner up Payne. Now we hear that the winners will challenge anyone in the hospital. Feel lucky?

"Do you drink?"

"No."

"Are you sure?"

"Absolutely . . . I never touch the stuff."

"Then hold this bottle while I tie my shoe."

Filling a tooth may be better, but it certainly can keep you from the edge of your chair.

Big Babies To Be Toting Around

This is far from siesta. Although the two men sitting on the trailer seem to be carrying their own shade around with them, they are actually on their way to transplant this tree on the golf course.

The men here are preparing the ground that will take the transplant. Six trees were transplanted in all. They were taken from in back of barracks 142 where a new parking lot is to be constructed. Transplanted were three oaks, two hawthornes and one maple.

The workers pose before undertaking the actual transplant. From left to right: Isaac Cubitt, Albert Harding, head laborer, Robert Foster, head laborer, Adam K. Lampert, and J. Harding, gardner.

Nature calls her children back to her. This three ton "baby" oak has a six and a half foot diameter wall of top soil around it. This "bulb" is dependent upon the diameter of the tree: one foot diameter "bulb" for every inch diameter of the tree.

The tree is transplanted. But the "baby" must still be cared for. It must be watered and fed, and wired to protect it from wind, until it takes root. The feeding consists of bone meal buried along its trunk.

APT Thyson receives DSM from Sec. Navy

Captain Leo Cromwell Thyson, USN, received the Navy Distinguished Service Award for "exceptionally meritorious and distinguished service" in saving the lives of many fellow prisoners of war in Japanese camps from February 1, 1942 to September 14, 1945. Secretary of the Navy Francis Matthews presented the award to Captain Thyson at a ceremony

attended by top Navy Department officials in the Pentagon.

Captain Thyson, one of the first American prisoners of war during World War II, (he was captured on December 8, 1941 while on duty at the American Legation, Peiping, China), disregarded the possible fatal effects of Japanese-made vaccines by testing all serums upon himself before administering them to other prisoners. He became violently ill on one occasion, and discovered that the normal amount of serum given to a Japanese would be fatal to occidentals.

A native of Washington, D. C., Captain Thyson is now serving as Executive Officer of the Naval Dispensary, Navy Department. His address is 3601 Connecticut Avenue, N.W., Washington, D. C.

The text of the Distinguished Service Award citation, was read by Rear Admiral C. A. Swanson, Surgeon General of the Navy.

British sailor: "Battleships? Why the flag ship of our Navy is so big the captain travels around the deck in an auto."

American sailor: "That's nothing, bub. The galley of our flag-ship is so big the cook has to go through the Irish stew in a submarine to see if the potatoes are done."

June Groom Takes June Bride

Gussie Denker, HM3, NMRI, and Emery Thompson, HM1, NMS, joined hands in wedlock on Saturday, 3 June, at 4 P.M. in the Baptist Church at Ridgefield Park, New Jersey.

The radiant bride was attired in a white uniform and carried a white bible with a corsage and streamers. The groom proudly wore his dress blue uniform.

Serving as Maid of Honor was Flora Hamilton, HM1, who is attending Chemistry School here. Mr. William King, a life-long friend of the groom stood with him as the best man.

During the ceremony vocal selections were offered by Mrs. Jacoby of Ridgefield Park.

Miss Denker was given in marriage by her father, Mr. Albert Denker. Following the ceremonies a lovely reception was held at the home of the bride's parents. Among the guests present was a group of the newly wed's friends from Bethesda, Maryland.

The Thompsons are now at home in Hyattsville, Maryland.

Naval School Of Hospital Administration

by Ray W. Conrad

Medical Administrative Technician's Class No. 2 has graduated and its members have been dispersed to almost all activities of the Medical Department. The Commanding Officer, LCDR M. E. ZIMMERMAN, MS, USN, took this opportunity to commend the class adjutant, T. R. Fitzgerald, HMC, USN, for a job well done. The job of class adjutant is not an easy one, nor for that matter, is it often looked upon with much thought being given to the many details which are attended to quietly and efficiently while other students pursue their studies. One hundred and seven MAT's have now added their skills to the work of the field in medical administrative matters. Ecce Signum!

Officer students have derived considerable benefit from special lectures during the course which have shed much light upon their duties as administrators. Most re-

cent of these lecturers was LTJG J. O. ATKINSON, MSC, USN, NNMCR Recreation Officer. Of particular interest was the matter of handling the movies of the Welfare and Recreation Division, and the nature of legal liabilities due to accidents in Welfare and Recreation facilities. The Navy places increased emphasis upon the recreation program as the foremost key to good morale. The lectures by Mr. Atkinson were excellently presented and very informative.

It was Voltaire who said, "I may not agree with what you say, but I shall defend to the death your right to say it."

GOOD GIRL

I never kiss, I never neck;
I never say hell, I never say heck.
I'm always good, I'm always nice;
I play no poker, I shoot no dice.
I never drink, I never flirt;
I never gossip or spread the dirt.
I have no line or funny tricks,
But what the heck, I'm only six!

POSTSCRIPT

I've never been dated;
I've never been kissed;
They said if I waited,
No man could resist
The line of a pure, innocent miss.
The trouble is—I'm fifty.

W. H. Moorman A Noteworthy Example

By RAY W. CONRAD

In these days of keener competition most of us frequently take stock of our own abilities to compete, and egotistical as we may be we'll usually admit that we're far, far from the goals we dreamed of in high school. For "le temps fuit" and we are left standing on the dock with our ship somewhere out in the stream. Yes, time flies, but not so rapidly that we enlisted persons can't do something about it. Ambition may have been Shakespeare's reason for the downfall of Caesar but it can also be the cause of the rise of us.

For example, take the case of Walter H. MOORMAN, the instructor in commercial law there at the Naval School of Hospital Administration. Mr. Moorman is a hospital corpsman who did something about his stock taking. Years ago Mr. Moorman, then an enterprising hospital corpsman, began picking up his law credits, "a little here and a littler there", as he has put it. Prelaw studies were done at Washington State, University of Hawaii, San Francisco Teacher's College, and the National University School of Economics and Government during the time he was stationed in these various areas. In 1937 Mr. Moorman ("Zeke" to his intimates) got his bachelor's. By 1940 he had attained his degree in law from studies at South Eastern University and the National School of Law. When the Naval School of Hospital Administration was in the embryonic stage back in 1942, he organized classes in Naval law, which he taught until 1946, and in public speaking which he continued for 4 years. During this time Mr. Moorman's "regular" duties were those of the legal assistance officer at NNMC. By January 1946 when he left the Navy with 25 years and 2 months active duty behind him he had come all the way from HA to Lieutenant, Hospital Corps.

A member of the bars of Maryland and District of Columbia, he was admitted to practice before the U. S. Supreme Court. This is not a story from a book by Grimm or Andersen but rather an authentic account of what can be done by those of us who have the will to do it. It might be well to quote Benjamin Franklin here just to reassure ourselves that our problems are not new to society. Just before taking upon his shoulders the task of representing Pennsylvania at the Constitutional Convention of 1787 (at the age of 31 years) he wrote, "We are sons of the earth and, like Antaeus in the fable, if, in wrestling with a Hercules, we now and then receive a fall, the touch of our parents will communicate to us fresh strength and vigour to renew the contest."

Diaper Derby

For Geraldine and James Waddell, HMI, a boy on 28 May. The father is at NMRI.

On 29 May a boy for Winifred and Arthur Lembeck. The father is NMRI's Personnel Officer.

For LTJG Wellington Dean and wife, Gladys, a girl on May 31. The father is on the Naval Hospital Staff.

From Dental, a boy for LTJG William and Helen Lehmann on the first day of June.

A new Med School staff man is the son of Bruce and Bernice Dietz who was born on June 4.

A girl for Telemann Charles and

Dental Explorer

By Elli Darge

Field Day here at Dental School is more a mad house than anything else. Joe Hawley keeps telling me, "I don't feel like holding a field day—I just know we'll have patients in my office—so what's the use?" Poor Joe, bewitched, bothered and befuddled, but an awful nice guy. Speaking of Hawley, we failed to mention him making 3rd class. Very sorry, I'll never let it happen again.

Farther down the hall, excuse me. I'm in the Navy now, passageway, we find an empty crown and bridge lab since McConnell and Thompson have left for their trip to Montana. Hope the boys have a good time roping cattle or what is there to do out west? Anyway several of the boys "volunteered" to clean the lab—bless their lovely pointed heads.

Across the street to the prosthetic lab class and their field days—how do they manage to be secured an hour before the main building? They claim they work harder than we do, but then I suppose they're right, seeing they graduate in just a few more weeks, as Elsie and Wilma (the feminine plaster jockeys) keep reminding me. It seems the tests are coming fast and furious these days. They're studying like little beavers. Keep those chins up, yes I mean all of them, even higher, there, that's better, now smile.

New Car Department: Believe me this department keeps every one jumping. Newly acquired cars by: Chief Barry, who still keeps calling for more patients every single day. Where am I going to find them Chief? Sure wish I knew. Also, LeBate is now the proud owner of one of these four wheel wonders.

I have at last found out the secret on how our dental officers keep those slim trim figures. I saw at least three fourths of the officers out on the golf course, and the others playing their hearts out at a quick game of tennis. Wasn't it just a wee bit could and damp out there on Thursday, Dr. Grunewald? What's the matter Dr. Superko, is the bag too heavy to drag around those nine holes? Why get yourself a cart when you have two fine shoulders to carry with. Then Dr. Lesney, with that beautiful bright red shirt or those lovely brown shorts. Mighty handsome, that's all I have to say. Oh I get to see them all. An advantage of living near a golf course.

Welcome aboard the Dental Barge to Rose Ann Britsky and Ila Mae Chappell, both DA's, both women, both from Great Lakes, and both now busy working in Building No. 1. Britsky can be found at the Information Desk and Chappell in Oral Surgery. Also brand new is Paige, I like that for a first name. West, DN also from the Lakes. Paige is filling in for "Skii" in room 238 since the "confused youse" is on leave.

A big red face on your reporter—seems somewhere between writing the column and having set up for type, the names of our new fathers got just a wee bit confused. Seems the last issue claimed Dr. Gardner became the father of a bouncing baby boy when all the time it was Dr. Lehmann, the one with "two n's". Really Drs. Lehmann and Gardner, I'm very sorry. Please forgive me, I hear Mrs. Gardner was quite surprised by all the news. Again, I'm really sorry.

Off on leave this morning was McPeck who is going to become

Betty Smith on the fifth. Smitty works in Western Union.

Med School Scuttlebutt

By Harry R. Fallers, Jr.

We saw Everett the other day when he returned from leave. We told him that we were happy to have him back aboard. How do you think Everett reacted to this welcome? You guessed it. The first thing he asked was "What do you want, a punch in the nose?" There's nothing like a good vacation to get you back in fighting trim?

Congratulations are in order for Thompson who was married recently.

Also, for Jones who is a new father. A very good smoke screen was laid down on the third deck from the cigars which were passed around. However we believe we must have got one that was left over from his first baby who is now three years old. We wouldn't say that the cigar was old, rather, it was well cured.

A very funny sight these early mornings is Tiny Schroer taking his morning exercises out in front of the barracks. This is supposed to take off weight from around the middle. But, those who know say that Tiny still goes out for the usual midnight lunch.

You might have noticed what you thought was a softball bouncing down the passageways. However, if you will look more closely you will discover that it isn't a softball at all. It is really Speigle's newly clipped head.

John, you know John, departed on leave the other day. Being a

(Continued in column 4)

Mrs. Bilbo sometime during those five days. Best of luck to you Phyllis, and that's from the whole gang at Dental School, Officers and Enlisted.

We certainly are running the patients through Dental these days. Trying to keep every one happy and so far doing a fairly good job of it. A lot of the patients who have waited for such a long time, are finally on top of the list and work is moving ahead. We'll have those cavities fixed up in just no time at all. Makes my heart feel good when I can give an appointment to one of the corpsmen and see that "thank heavens" expression on his face. Never saw so many people made happy over nothing but a dental appointment. But I guess it takes all kinds of people to make up a world, doesn't it?

More requests for annual leave are coming up to Chief Stinson's desk these days. Think I better get mine in there if I want to visit the wilds of Wisconsin this year. I can almost smell the good clean, fresh air of Lake Michigan now. Love that Lake! Sure wish they had something like it here in Bethesda. But then how can you expect that, Bethesda is in Maryland. I love it here, now don't take me wrong, people.

Too bad Swedberg! You missed your chance to kiss the bride. Enough said on that subject. All the dental dillies will know to what I am referring.

I see all the Officers getting ready to go to the weekly Friday afternoon lecture now and that gives me the first clue that it is time for little old me to start looking as if I were going to do my cleaning. I always get caught either polishing a desk or else dusting the files when the inspection party gets around. This week I'm going to be good and try to have everything finished at least five minutes before inspection starts. Won't that surprise them all? You know it too (a favorite N.N.M.C. expression, so I'm told).

One Hundred And Seven Enlisted Men Graduate From NSHA

By R. W. Conrad

The enlisted students of Medical Administration Technician's Class No. 2, graduated with impressive ceremony held in the Naval School of Hospital Administration Auditorium on 15 June. The Commanding Officer, LCDR M. E. ZIMMERMAN, MSC, USN, delivered the presentation address to start them on their administrative careers. In his address, he reflected that he had previously presented graduation certificates to some of the students of MAT-2 at basic and intermediate Hospital Corps schools, and also expressed the hope that this school would similarly stimulate their desire for further advanced learning. At the same time, he counseled them that every decade presented opportunities for advancement.

Embracing almost every type of activity where the Medical Department of the Navy is represented, these enlisted graduates will form a nucleus to train other personnel in this field. Since the instruction of new or reserve personnel is paramount to the efficient operation of medical facilities at all times, there can be no more effective medium for forming a corps of instructors than the curriculum of this school.

The scholastic record maintained by MAT-2 is a challenge for MAT-3 to achieve when the latter class convenes the day after Labor Day.

Graduates are listed below: Adams, C. S., HMC; Albers, A. D., HMC; Alwood, H. S., HMC; Bagwell, C. D. T., HMC; Barnhart, H. E., HMC; Bender, U. J., HMC; Bergquist, M. D., Jr., HMC; Besser, P. C., HMC; Blackmon, E. H., HMC; Book, H. H., HMC; Bowe, W. G., HMI; Brown, R. A., HMC; Buckman, L. J., HMI; Bullock, W. M., HMC; Burgess, R. K., HMI; Byrne, T. G., HMC; Campbell, E. P., HMC; Campbell, H. E., HMC; Campbell, W. S., HMC; Choate, R. S., HMI; Christian, W. T., HMC (SS); Clary, B. W., HMI; Coles, T. W., Jr., DTC; Connolly, R. F.,

Med School

(Continued from column 3)

key man is exacting. He still gets called back for consultation about CO₂ machines and other things.

It seems everybody in the labs are either playing tennis or golf these summer days. Or baseball. We are honorably represented on the Admiral baseball team by Kovarik and Cox. Cox has been performing like a pro on the mound and Kovarik turns out to be a good man with the stick. And all this is very embarrassing to us because we were the ones who said that Cox wouldn't win a game and Kovarik wouldn't hit .200 this year. We humbly eat our words and hope the Admirals go on winning games.

We were going to mention something about Frank A. Adams, HMI and his activities out on the patio outside of Ships' Service but

HMC; Crismon, J. L., HMI; Crowe, R., HMC; Davis, H. HMC; Dearman, H. L., HMI; Dempwolf, E. H., HMC; Dineen, C. F., HMC; Dohse, B. HMC; Dove, P., HMI; Drake, R., HMC; Duffey, W. S., HMI; Eberth, E. J., HMC; Elks, G. HMC; Elliott, G. E., HMC (SS); Facey, H. J., HMC; Fitzgerald, T. P. Jr., HMC; Fritz, C. W., HMI; Gay, L. W., HMI; Gehring, J., HMC; Gibbons, H. C., Jr., HMI; Gilleland, J. Frank has convinced us that would be in poor taste.

Chief Spofford has begun to believe that there is a conspiracy in Bacteriology to get him to buy the coffee every day. We deny this most vehemently. All of our coffee flips are as honest as the day is long.

Chief Erasmus has forsaken certain forms of entertainment and has returned to less strenuous forms of relaxation. Now it is the opera at the Watergate. And a very good change if we do say so. Novels still goes on his merry way to destruction.

Navy Belles

By Nadine Calhoun

Shortly after the last issue of Center News was on the stands, I was told that one of our readers, a literary critic to the Corps, had expounded his views thusly: "Why doesn't that Navy Belle woman write a column that can be understood or interpreted by someone besides the Waves". In rebuttal, it could be asked, "Does the engineer subscribe to the AMA Journal?" However, for the critic and for those who feel there have been quibbles in previous columns, I dedicate the following news articles. Lois Peterson, Barbara Winters and Ila Chappell are light complexioned. After several days of exposure to the sun they have acquired lovely tans near the tennis court.

On the eve of 14 June 1950, a party of 6 hospital corps women treated Chief Jerry Stark to a midnight snack in the city of Bethesda, Maryland. The party then returned to the quarters where Jerry's car was loaded. On 15 June the honorable chief graduated from USN SHA, after which she began her journey Westward. May the new command welcome her as much as we miss her.

Alma Wadenstorer is making an album which is different and beautiful in design.

We have two pay telephones in the quarters. Sometimes they ring off the wall, almost. There have been no casualties as a result of any grand rushes to answer the belle's bell.

Mary F. Coyne was seen recently leaving the quarters with a tennis racket. Add that to her Irish background and the sum is . . . good sport.

Someone found an insect in the room. The insect was compared to a picture in Encyclopedia Britannica. The insect was a cockroach. An alarm was transmitted to all hands. Lockers were emptied. Insecticide squads mustered in the quarter-deck. Mate of the day patrolled specified areas saying, "Spray that again, please."

Terry, Rusty and Jeannette drove to New York City for a delightful week-end. The trip was lengthy and enjoyed same.

July and vacations are drawing nigh. Have you submitted your leave request?

Elsie Bachison bought a handsome beige skirt. She also enjoys a good game of tennis.

Elizabeth Berry has dusted her hope chest; however, she has not packed it yet.

The long and short of it is a greeting to Rose Ann Britsky and Ila Chappell, who have reported to the Naval Dental School for duty.

How are plans for the Wave picnic progressing?

While biking down the street one on. In the merry, merry month of June, Barbara White was taken by surprise by two flat tires but the little A. Came her way, and carried a little bike behind them.

They say: That that is, is; That that is not, is not. As far as news is concerned, This is all.

Personalities About The Center

Money rolls . . .

Christine Lund

"Old Money Bags" is neither old, nor a miser. In fact, as can be readily seen above, he is no him, but a she, and a mighty pretty one at that. With prefatory introduction administered, the name Christine Lund who maintains living quarters in Silver Spring (no other pertinent information available) is submitted. Chris, as she is also known, is presently the cashier for the Navy Exchange. She has an interesting route of travel in the Medical Center—and it seems as though there is money waiting for her at every place she stops.

Christine was born in Norwalk, Connecticut in 1925 (which makes her twenty-four, and she admitted it!). Her earlier days were spent in Newton and Boston, Massachusetts where she attended grade school. In 1940 her father got a job here with the government so that the family followed. Chris finished high school at Woodrow Wilson in 1943 and then went to work for the government herself as a photographer.

In 1945 she decided to further her formal education, so she took a first year at Alabama Polytechnic Institute. Then she returned to Washington in 1946 to work temporarily with the Navy Exchange, but the job seems to have turned into a permanent affair.

Chris confided that there is definitely a man in her life. In her own words: "He is white with black spots, and his name is Bugler." Well the description fits a dalmatian all right. When asked how big he was she said, "As big as they come." Which means pretty big!

She is an outdoor girl from the letter o to r. She enjoys tennis, swimming, and horseback riding. "Photography is still interesting," she says, "but I don't have the place to set up my equipment."

Chris is five ten and she placed an emphasis on the fact that she only weighs one hundred and thirty eight. The hardest part of her job, according to Miss Lund, is in overcoming the girl hecklers in her office.

Drunk to policeman: "Just because my eyes are red is no sign I am drunk. For all you know I may be a white rabbit."

The wonderful love of a beautiful maid,
The love of a staunch, true man.
And the love of a baby, unafraid,
Have existed since life began.
But the greatest love—the love of loves,
Even greater than that of a mother,
Is the tender, passionate infinite love
Of a drunken bum for another.
* * *
Neighbor: "Say, have you folks a bottle opener around here?"
Parent: "No, he's in the Navy now."

. . . trucks roll . . .

Douglas Powell, HM 1

Only a few hours before the photographer got this picture of Douglas Powell, HM1, two large trucks came rolling in from Norfolk. They were carrying the dry stores for the Commissary and Powell was responsible for checking them in and seeing that they were put away in the proper place. So, with a few mid oaths, which you could hardly hear, Powell dug right in.

The Navy first saw him in 1942 just after war was declared. The Navy got him from that gem of cities, Mobile, Alabama, where he also attended school. It was in high school that Powell first started playing tennis. Now he's a right good player and is often on the Center courts.

Powell's been all along the East coast as well as the West coast for duty. He's also been out in the Central Pacific, Hawaii, Philippines, and Okinawa. After the war he was on some small craft which made a hydrographic survey of the Yangtze River up in middle China.

Powell is now nearing his three-year mark at Bethesda. Commissary has been his only detail and there, he has done "a little of everything."

Cottage Capers

Best party of the month was without a doubt Wednesday's picnic at Rock Creek Park followed by a dance at the Shelter. We're planning a repeat Saturday July 8 at the B.C.C. Rec Center. Picnic supper will be served at the picnic area and when we're stuffed we'll work it off dancing at the Rec Center. Make your reservations by calling OL 7808. Wednesday Jack Slothower went quietly crazy trying to fill our requests for fast and slow numbers, rumbas and polkas which the picnic hall put us in the mood for. In between picnic capers we found out that we have some mighty fine dancers and an ever improving selection of records. It was a good party—join us next time.

Any bridge players still loose? Come Monday night and beat Sweeney if you can—come Wednesday night and let him teach you to play if you don't know how. And please don't pass him any cigarettes, he's demonstrating how much will power he has.

A couple of weekend trips have been hinted at by the program planners. How would you like to spend a weekend in the mountains catching up on fresh air? There's Ed's cabin with huge fireplace and porch all around, a creek to wade, swim, or fall in, a country store where you can buy penny candy and swap opinions, and a haunted house. The snipe hunting, by the way, is ex-

. . . fingers roll

Ruth Dybala, ENS

Ruth Dybala, ENS, USNR is probably new to Naval Nursing, but had been one year at her profession before entering the Navy in November of 1949. She is a native of Toledo, Ohio, and has much state pride and spirit, which became particularly evident when the Ohio-Michigan football game was mentioned (the score 10-10).

Ruth completed high school and later took three year's nurse's training at Saint Vincent's Hospital. She graduated in 1948. The next year was at Toledo State Hospital where she specialized in psychiatric nursing (her preference). She displayed a scar on her ankle and said, "that's what is interesting about this kind of work, it is rough and tough, but the payment is observed in seeing well patients."

Piano is one of her favorite pastimes. She prefers the classics, but also likes other good music ("The slow, dreamy kind"). She also likes knitting and is presently working on a pair of argyle socks. Bowling is another of her likes and she says her all time high score was 197. On the outside, she enjoys tennis and swimming, times. She prefers the classics, but tor.

While at nursing school she became editor of the school's paper, the Paragon, and learned to fully detest editorial work. She maintains that editors should edit and not be forced to write "the whole darn paper." In her senior year of high school she was president of the Girls Athletic Association. She was a mile runner (not for a Camel) on the track team. She played guard for her high school basketball team.

Miss Dybala is presently working on Ward 127.

cellent, and your genial host Ed Beamer will introduce you to the art if you're unacquainted with it. Better keep tabs on which week-ends we are going because it won't be long after the list goes up before we have the allotted 20 people. July is symphony month at the Watergate and although we have no definite schedule as yet, we plan to take advantage of some of those 60c seats. If you like music in an informal setting and don't mind if a few airplanes come in for a landing just as the soloist swings into action, you'll really enjoy these concerts. It is tradition in D.C. to rent a canoe and paddle down the river to the band shell. We like to drive down and sit on the steps, and watch the canoe brigade with their single red lights take off up the river when the music is over.

Something NEW at the Cottage . . . beginning July 15 international date night at the Cottage will be Couples night. There are a great number of young couples in Bethesda, both service and civilian, who have been asking lately for a specific night when they can come to

Not Much Research Involved

By J. P. Walsh

The responses to this seasons greetings "How was your leave?" are reminiscent of teacher's first fall day compositions, 25 words, "How I Spent My Vacation".

"This summer I read the works of Tennyson and Hawthorne. They were good. It was a good way to spend the summer, etc."

"This summer I sold popcicles at Gonzoni's Ladys Baseball Team's night games and made 15 dollars, and with the money I bought a Tom Mix shirt and pants and a baseball that I haven't used yet but, etc."

"There was nothing to do this summer at all. Everyone was working or out of town or somewhere. No guys, no girls. I didn't do much this summer."

With years of world travel and adult imagination the comments are more sparkling. "Fun huh—fun out the ears—sack in till noon, out every night to the Lake Gladiola dance pavilion, slick orchestra—beer—dames—Fun huh—Yeah."

"Enjoy my self? My gal married a YN from the Lakes, lost my money in a crap game, wrecked my old man's car. Never had it so good. Spent the last three nights in jail!"

"Fun I guess—got married—Pocono honeymoon, fun, cost money though—wife's home, need a place, costs money, takes time—guess it was worth it though."

Even with the career compensation act no one we know takes the under 10,000 dollars vacations which Holiday plans and Esquire suits. Whom do we know sailing on the "Queens" for a season in the contentinal sun, floating to Waikiki on the Lurline, or chartering the Sea Cloud for a trip to Bermuda. (WHOM DO WE KNOW THAT LIKES THE SEA?)

It's not surprising our 25 words on Podunk makes dull reading.

But, then who doesn't go to Three Rivers, Four Forks or Five Corners without some rising excitement for the local booster's Blood Worm Center for North-Eastern South Dakota, HOME OF TOTEMS, TADPOLES AND BIRTHPLACE OF JOHN HEZIKIAL WHO OPENED THE HEZIKIAL CREEK TO WESTERN PROGRESS. Centennial celebration with Indian Encampment direct from their Kansas City engagement.

It's always home from the fleet with glamour by association and a girl to share the potato salad, beans Brigade picnic—all the beer free and hot dogs at the annual Fire for the boy in blue. But, two weeks of this intense living and you began phrasing the adventure to be told over a beer with the crew. So while the Leginnaires parade five blocks to the end of Main Street and your summer time gal pledges sincerely her love for a life time, you are ready to go back to the salt-shaker fleet at Bethesda. A 10,000 dollar two week leave in 25 words (or less if your not expressive).

the Cottage to dance, play bridge, and to meet other young people in similar circumstances. For some it will solve the problem of where to go and what to do when there isn't too much spare change in the pocket. We won't ask for marriage licenses at the door or even insist that you have a date, so if you like people and want to come anyway you're welcome. We hope to have special entertainment the first Saturday night and if there is enough interest we will continue to invite special guests.

Sport Scope

By J. C. Woods

Our Admirals have started off with a somewhat impressive record of two wins and one loss in the PRNC League. The scuttlebutt is, "Can they beat the mighty Quantico?" In a few brief interviews the belief was found to be the same "Definitely not. Quantico is a much more experienced and practiced team. Bethesda wouldn't stand a chance against them." It cannot be argued that Quantico isn't one of the best teams around, and to say one of the best there is room there for our own Admirals. Actually the Admirals have a very good ball club this year. They have hitting power and are an excellent defensive team and have enough spirit to make Notre Dame hold their breath. They have been waiting a long time to run up against Quantico again, just as they did in basketball, and its my guess that it will be a bloody battle.

And since we are on the subject of bloody battles, what is your opinion on the much talked about Graziano-Lamatta battle. As you know it has been postponed until a later date but now or next year the winnings will come with Graziano. The readers off this column will probably recall a little prediction a while back on a horse called Caraway. Just write out a check for five dollars and we'll call it square.

At this time the Center News would like to extend their thanks to a man who has done much in the line of sports on this command. He is Elias J. Bell now stationed at Quantico, Va. Bell made it possible for the Intermural Football League here and made all the arrangements for the games and kept them going. He played for the NNMC Admirals baseball team last year and also played two years on the basketball team. He coached the Center Commanches to the 1948 and 1949 Intermural Football Championship, and wrote the sports column for this paper for quite some time.

All those who know Bell and have played ball with him join in saying that he deserves a lot of credit for all the extra sports events on this compound.

Softball Schedule Reaches Halfway Mark

By C. Karolczak

One might say that "the law was recently laid down" in a recent meeting of all softball managers.

Due to the fact that the second and final round of the intramural softball league was just about ready to start, Cdr. Frates, Lt. Atkinson, and HMC Martin, held a brief but informative rally for all teams concerned.

A report submitted by HMC Martin revealed the fact that a request to all "ye softball players" was in order. Please, return all softball equipment, which may have accumulated in various corners of the barracks, to HMC Martin IMMEDIATELY so that we may continue the battle of supremacy in the softball derby.

Umpires for the games still present a problem to various teams. It was suggested that the members of the varsity team might be notified to serve as umpires. This may be a little difficult due to the fact that varsity practice and games are played at approximately the same time the softball games are in progress. Perhaps a solution may still be worked out.

Persons interested in becoming umpires would do well to get in touch with Cdr. Frates. HMC Martin has a number of softball

Varsity Outfield

The NNMC Admirals boast a good outfield in (left to right) John Callaway, Beano Roberts, George Royster, J. C. Woods, and Bo Brabandt. Roberts is also a pitcher and proves to be equally as good in both departments. Satchelfoot Royster the Cleveland Cyclone played good ball for the Ads last year and it looks as if he is going to repeat himself this season. Brabandt has picked many a man off with his wicked throwing arm, while Callaway and Woods use speed in maneuvering the outfield.

As are the others these men are anxiously looking forward to the game with the Quantico Marines.

Anderson, Osterling Take Doubles; Anderson Singles For Title "King Of Courts"

by C. Karolczak

A wreath of tennis balls was in order for Lt. (jg) Anderson, when he accepted the title of "NNMC player of the year", by defeating his only barrier to top honors, HMC P. E. Cook. The finals match was held on a sunny 9th of June with a resulting score of 6-0, 6-1, 6-2. Anderson's attack was principally based on his cannon ball serves which has enabled him to win 43 of the total 43 games he has played in the tournament.

Not to be out done in the "double" tournament, Lt. Anderson came in strong by teaming up with Cdr. Osterling (also from Dental), and providing a double headache for his opponents, Cook and Lt. (jg) Jackson, who had avalanched their way to the finals with a string of victories. Although strong in spirit, the NMRI partnership of Cook and Jackson, were

rule books on hand for persons interested.

Two umpires will be allowed at each game, each man receiving a fee of \$2 for his services,—stop shoving, I was in line first.

As far as trophies go, we've got some very interesting facts to relate. There will be trophies for the first four teams and miniature trophies for all members of the first and second winning teams.

So come on gang—keep up the good work!

unable to drive off the incredible volleys slashed at them and met defeat at the lower end of the 6-0, 6-1, 6-2 scores.

These tournaments have enabled NNMC to view with pride the men selected for the PRNC tournaments to be held at East Patomac Park. Behind locked doors the entries have been viewed and all indications point to the inclusion of Mercer, Cook, Tong, Jones, and Cummings on the single's team, and a vigorous combination of Cook, Jackson, Cummings, and Jones sharing the spotlight on the "doubles" teams.

We, who stand on the side lines wish a fond "au revoir" to our representing teams and wish them all the luck we can muster.

NEW INVENTION TO AID PITCHER TO OVER-COME "BALK" RULE
DEMONSTRATED BY PAUL ZIPPERN, SA, VEN.

Admirals Top Receiving Station 4-2; Then Whip Anacostia 17-3. But Bow To Patuxent

By J. C. Woods

After trimming the Naval Receiving Station team 4-2 the NNMC Admirals caught a plane and flew down to the Anacostia Naval Air Station to shellack the fly boys 17-3. The Ads scored eight runs in the first inning going thru the batting order one and a half times. Plenty of runs were provided in that inning, two by Tommy Brothers who handed the excellent record of six for six. Lou Kavarik also hit in the first at-bat with J. Smith and G. Royster while Don "Cagey" Polizzi played it cool and took two walks in that inning.

Pitching Stardust

By C. Karolczak

Golf seems to be coming into its well deserved glory with a hundred-strong voices taking up the cry, "If Ben Hogan can do it, so can I!"

The increasing popularity of golf on the station has been amazing and has caused many a young wife on the compound to play second fiddle to a brassie, and a number two iron. Ah, well, men will be men!

That old sporting blood (a little higher priced on the blood donor market) turned out to influence a number of celebrities on the base. Such notables as HMC Pryor Davis, Cdr. Frates, Bob Thompson, Don Teter, Lt's W. G. Smith, C. S. Brown, and D. L. Spence (Sun tan oil and all) are seen but too frequently on our 6-hole rugged course.

We're all sure that if Delilah (from the picture of the same name) had ever enchanted Samson to a game of golf, she would never have cut the attractive figure our own Helen Jarvi, casts on the number one tee.

A recent lapse in the softball league has taken place while the second round schedule is being published, thus giving the teams a "breather" and a chance to view their players with a new slant on life.

Pete Stanley seems to have a little difficulty while taking muster of his "mule team of nine." The recent loss of, Mass and Kaufman, seems to leave Pete a little "bewitched, bothered, and bewildered,"—to say the least. It looks like tough sledding from here on out, Pete.

Bouquets of roses go out to Steve Manning and P. G. Stouks, who have altered the landscape of the tennis courts by placing up two nets to the applause of the onlookers. They were badly needed.

A total of six trophies will be awarded to the tennis champs and the runner ups of the 1950 tournaments. Anderson and Cook will be the proud possessors of two cups apiece.

It was a tough break when Mercer injured his leg in softball, but he still managed to give Anderson a few good games out on the courts. Nice trying, boy!

A change in commands was in order on the NMRI softball team. H. B. Gardner relieved Ray Gismond of all coaching duties when the latter recently rang welding bells. Possibly Ray plans to raise his own team of softball players and start 'em out young.

Doubt and bewilderment reign supreme in many a person's mind concerning the absence of Cdr. T. K. Ruebush, in the recent tennis tournaments. Aside from his regular duties, Cdr. Ruebush has managed to again acquire his famous "aces" by continuous workouts on the courts. We sure missed you this year, Cdr.

Wish to leave this little reminder trailing along. All you golf "pros" would do well to read the writing on the wall. It looks like keen competition is in store for this year's tournaments.

Willy Chatham went all the way for the local sailors holding Anacostia nine to five hits. The game was highlighted by an eighth inning double play. With a run on first F. McKee Anacostia's fielder smacked a hot ground ball down to Kavarik who made beautiful stop and then fired ball over to second baseman Polizzi on the force. Polizzi leaped into the air and shot ball over to Henderlite at first one of the neatest double seen anywhere. The Ads top things off by scoring four runs the ninth to win their second league game.

Happy over their two victories the NNMC Admirals turned out to greet the Patuxent nine on the field, and were somewhat surprised when the visitors scored seven runs in the first three innings. The tuxent team showed plenty of power and good defensive playing and was not until the eighth inning the Ads started tagging the boys.

Kavarik started things off with a single and then went to second when Funk was hit by a pitch ball. Henderlite rapped a single left center field scoring Kavarik. But that was all for that inning, the boys had to wait until the ninth to get rolling again. In the ninth two runs scored on hits by Simmons, Chatham, Polizzi, and Kavarik but they were a little late, lost their first league game 7-3.

Another game is scheduled with Patuxent soon and you can bet that its going to be a good one.

Naval Hospital Tops Lab 14

By C. Karolczak

NH removed one of the final most destructive obstacles in the march to supremacy, by defeating a previously undefeated Lab. 14 by a decisive score of 7-4. Not only the supreme efforts of Bham's Phy. Med. team are in position to "overset NH's apocryphal."

Doing a complete about face Lab. 14 remained in a strong position by defeating Schubert's cracker Jack NP division. After accepting the lead in the first three innings, NP did not yield to the pitching ability of Sickle, until the at which time the totaled score showed: 4 runs for NP; 4 runs for Lab. 14. However, the intense hitting power of Wright and Aplit, in the 7th, managed to give Lab. 14 a 9-7 winning score. Second baseman, Berry, and Catcher, Griffith, took top honors for Lab. 14 for skillful playing ability.

An exhibition game between NMRI and NP resulted in a close knit NP division going over the top and defeating the "green jersey" by a score of 9-8. The heavy hitting of "blockbusters", Kaulius and Levi, managed to outdo the NMRI "hellcats."

Messina's spectacle of base jumping proved to be a disastrous and amazing antic to encourage the division on their well earned victory; much to the sorrow of NMRI's constant audience of (Snooks) Runkel.

Ruth Flora HMI First WAVE To Ship Over Here

On July 7, 1950, Ruth Flora, HMI (W), shipped over for six years in the U. S. Navy. Captain R. M. Gillett, MC, USN, Commanding Officer of the Naval Hospital administered the oath and LTJG R. E. Winne, MSC, USN, stood by as witness.

Flora was first sworn into the Naval Reserve on March 16, 1944. This took place in Cincinnati, Ohio, although her official home address was in Bowling Green, Kentucky. Three of her brothers were already in the Armed Services; one serving in the Navy and the other two in the Army. At that time she was the only Bowling Green representative to join the Waves.

Her first taste of service life was at Hunter College in New York City where she spent six weeks in Boot Camp Training.

(continued on page 6)

LTJG R. E. Winne looks on as Captain R. M. Gillett congratulates Ruth Flora HMI who shipped over for six years in the regular Navy.

NNMC Nine Hole Golf Course Now Reality

July 8, 1950 will be remembered as an outstanding day in the history of NNMC, for at 1000 RADM M. D. Willcutts, MC, USN, the Commanding Officer commissioned the 7th, 8th, and 9th holes of the golf course. The nine hole golf course becomes a long awaited reality.

The commissioning was held on the 7th tee in the presence of the Golf Committee; Bill Downing, the course Pro; Mr. Leavell, the greens keeper, and other interested personnel.

Carved out of the virgin timber section on the north side of the station, the new three holes present a goal achieved after much effort, planning, time and labor. Labor that was performed with something beyond just a sense of duty.

Overtime Saturdays, Sundays, and holidays, and love of achievement went into the making of this course that now is on a par with the best in the country, and will provide pleasure and recreation for NNMC personnel, both staff and patients, throughout years to come.

Much of the credit goes to RADM Willcutts, for without his characteristic drive, planning and enthusiastic support, the way would have been difficult indeed.

Credit also goes to Captain M. J. Crawford, DC, USN, former Executive Officer of the NDS here, who was instrumental in the original inception of the course.

The Golf Committee, headed by CDR "Coach" Frates, helped immeasurably with frequent inspections and recommendations for the betterment of the course.

Mr. McGahren, foreman gardener; Mr. Leavell, greens keeper and the entire grounds force take the bows for the actual labor, the green grass, the smooth rolling fairways, the silky greens and well kept tees. From bull dozer to lawn mowers—they made the course.

John Dunlavey Married To Ina A. Gibson

John Clarence Dunlavey, HM 3, and Ina Arada Gibson of Sharpsville, Pennsylvania, were married recently. The wedding took place on June 24 at 8:30 in the Church of the Holy Redeemer in Kensington, Maryland. The Reverend J. S. Byrne joined the two in marriage and officiated at the double ring ceremony.

Serving as bridesmaid was Rose Marie Mooney, a close friend of the bride. Thomas Brothers was best man.

Before settling down at 5012 Bradley Boulevard, Bethesda, the couple made a week long sightseeing tour of Virginia.

Chief Petty Officer's Mess (Open) Commissioned With Formal Ceremony

Chiefs Wilkinson, Betzner First President, Treasurer Installed

The Chief Petty Officer's Mess (Open) was officially launched at ceremonies held in the club at 1900 on July 8. Chief E. Wilkinson, the club President, made a short welcome address and introduced the speakers: RADM Morton D. Willcutts, RADM H. L. Pugh, RADM Clifford A. Swanson, and RADM Glen B. Davis.

Following the Commissioning Address by RADM Willcutts, the Surgeon General of the Navy, RADM Swanson, gave a brief talk of appreciation. He said that RADM Willcutts' recitation of the winning of the Medal of Honor moved him, and he added that forty-nine per cent of the Congressional Medals of honor won during World War II were bestowed upon the personnel of the Hospital Corps. "In all my travellings throughout the Navy, I have never seen a finer CPO club," said the Admiral, who praised the murals and their creator, HMC M. Runkle.

RADM Pugh, Deputy Chief of the Bureau of Medicine and Surgery, advised the chiefs to derive all the pleasure possible from their new club. Admiral Pugh payed his respects to the chiefs and to Admiral Willcutts of whom he said, "Once started, he is a hard man to stop."

Admiral Davis, Commandant of the Potomac River Naval Command, was called on to speak. He, also, praised the fine work of the CPO's of the U. S. Navy.

Much credit must be given to the chiefs of this compound who have contributed time and effort in this undertaking: to chief H. H. Betzner and his charming wife, who is hostess; to chief Wilkinson, President of the Club, and to the Board of Governors, HMC's C. D. Shick, J. R. Renard, A. N. Potter, J. R. Doyle, C. C. Berry, S. O. Tolar, J. E. Burwell; and to the artist, Chief M. Runkle.

The text of RADM M. D. Willcutts' commission address is set below:

"The launching of our Naval Medical Center's Chief Petty Officers' Open Mess comes as the fulfillment of many months' hard work. Admiral Davis, Commandant of the Potomac River Naval Command, and thereby our cognizant authority, for the establishment of clubs and messes, granted authority for this CPO Open Mess, in accordance with BuPers regulations published for CPO Messes and Enlisted Men's Clubs. This, last August 1949.

I am very pleased that our own local recreation fund was strongly able to furnish all the original financing of this Mess by a grant of \$15,000.

Then came the conversion of these spaces. The cobbler shop had to be removed. Then the barber shop was moved and consolidated into the main shops, Center proper. The beauty shop, long in disuse, was cleared away, and other spaces consolidated. We depended upon rainy days and spare moments of our own ship's force to do all of this work. Many delay hurdles had to be

(Continued on page two)

Chaplain Sassaman Relieves Chaplain Frank Morton

LCDR Robert S. Sassaman, (CHC), USN, reported aboard the Center June 15 to relieve Captain Frank Morton who will be detached in the near future.

Chaplain Sassaman comes to NNMC from the Marine Barracks, Camp LeJeune, North Carolina. During the war he saw duty with the Sea Bees and was at Fleet Hospital 109 in Brisbane, Australia. Other duty stations were Charleston Receiving Station and the Naval Training Center, Bainbridge, Maryland.

The new chaplain, a native of Pennsylvania, studied at Gettysburg Seminary. He is married and has two children. As soon as Chaplain Morton, leaves, Chaplain Sassaman will move into Chaplain Morton's house in Silver Spring.

Aside from his ministerial duties, Chaplain Sassaman is quite an acey-ducey player. In fact, Pacific Champion. This undoubtedly will be questioned he says, but he is willing to take on all those who doubt it.

Dr. D. D. Eley Of England, Speaks At NMRI

By Maurine Gilchrist

Dr. D. D. Eley of the Chemistry Department, University of Bristol, England was the distinguished guest speaker at the NMRI Staff Conference on July seventh. Dr. Eley is interested in the general field of catalysis, including enzyme catalysis. His recent studies in the field of metal catalysis have served to bring out the importance of the electronic factor in this system, and at present, he is extending this work to the field of enzyme chemistry. In connection with this work, he is investigating the electrical conductivity of organic molecules including protein molecules. He is also interested in the properties of aqueous solutions and their relation to the biological system.

During his visit to the United States, Dr. Eley has been much in

(Continued on page 2)

RADM Willcutts Makes CPO Club Commissioning Address

(Continued from page one)

overcome. I know that at times our patience was severely tried, but never once did I hear a word of complaint, I saw only broad grins of appreciation as the country began to shape up.

Now I have had considerable experience in establishing clubs and I have learned that a streamlined planning organization is essential. There is an old saying that "too many cooks spoil the broth". So it goes with too many committees in building a club efficiently. I recall, in the late winter months, asking one of the chiefs if the boys knew that we were doing everything to hurry matters along. I also asked him for a vote of confidence in the matter of interior decorating, the installation of fixtures, and so forth. I shall never forget his prompt reply. "Admiral Willcutts, what you do will be O. K. with us. We all understand and have full confidence in your decisions and planning."

That put it squarely up to me, so I want you all to know that we have gone all out to make this one of the smartest CPO clubs in our entire Navy.

The Surgeon General made informal checkups from time to time and gave us great encouragement by his manifestly strong and kindly interest.

Mrs. Willcutts developed the color scheme from a wonderful book of master color paints. Mr. Malatesta, our Chief Painter, carried out the color theme in excellent manner. Lieutenant Pollard, Mr. Cobin and Mr. Irwin master-minded all the conversion details. We owe all the ship's force a vote of thanks for their great interest and help. We are grateful to Lieutenant Atkinson, our Recreation Officer, for his support. I have appointed him as Officer Representative for your Mess. Chief Runkel from the Research Institute did the ship's paintings, and I believe that they are not only excellent but most appropriate.

The Commanding Officers of the Center's component Commands join me in extending sincere best wishes for the success of this Club.

You CPOs hold a warm spot in our hearts. You constitute the backbone of our enlisted staff. Our youngsters look to you for intimate guidance and leadership.

Today our country faces again the call to arms, as the peace of the world is threatened in Korea.

You are all Veterans and know well the potential demands that may be made again upon all members of the Medical Department. In my files, as Fleet Surgeon at Okinawa, I treasure the citation that won Hospitalman Robert E. Bush the Medal of Honor on 2 May, 1945. I believe it fitting that I read it:—

"BUSH, Robert Eugene. Hospital apprentice, first class.—For conspicuous gallantry and intrepidity at the risk of his life above and beyond the call of duty while serving as medical corpsman with a rifle company, Second Battalion Fifth Marines, First Marine Division, in action against enemy Japanese forces on Okinawa, 2, May, 1945.

Fearlessly braving the fury of artillery, motor and machine-gun fire from strongly entrenched hostile positions, Bush constantly and unhesitatingly moved from one casualty to another to attend the wounded falling under the enemy's murderous barrages.

As the attack passed over a ridge top, Bush was advancing to administer blood plasma to a marine officer lying wounded on the skyline when the Japanese launched a savage counter-attack. In this perilously exposed position, he resolutely maintained the flow of life-giving plasma. With the bottle held high in one hand, Bush drew his pistol with the other and fired

into the enemy's ranks until his ammunition was expended. Quickly seizing a discarded carbine, he trained his fire on the Japanese charging point-blank, over the hill, accounting for six of the enemy, despite his own serious wounds and the loss of one eye suffered during his desperate battle in defense of the helpless officer.

With the hostile forces finally routed, he calmly disregarded his own critical condition to complete his mission. He valiantly refused medical treatment for himself until his officer had been evacuated and then collapsed after attempting to walk to the battle aid station.

His daring initiative, great personal valor, and heroic spirit of self-sacrifice in service for others, reflect the highest credit upon Bush and enhance the finest traditions of the United States Naval Service."

End of Citation

I have never known a corpsman to fail under fire.

You chiefs have proud service records. You have earned and deserve well this attractive home.

As defined by BuPers, the primary mission of your Club is, I quote, "To furnish to authorized persons meals, refreshments and recreation facilities, . . . by providing, where possible, a facility where chiefs may bring their civilian friends and naval acquaintances in to an atmosphere as much their own as is possible to maintain, within the accepted rules for naval discipline and orderly conduct."

As Commanding Officer of this great medical center, my responsibilities in relation to your Club are fixed and exacting and may not be delegated.

I assure you, however, that I have full confidence in your officers as supported by a representative Board of Governors from all of our Commands.

I feel no doubt nor worry for the efficient and orderly management, the conduct and the development of this Club. I hold the highest respect and deepest faith in your mature judgment and decorum as HMCs.

So, President Wilkinson, I give you this protocol containing the basic request and authorization for establishment of the Mess. You will notice that your authority stems from Bureau of Naval Personnel Regulations for Chief Petty Officers' Messes and Enlisted Men's Clubs Ashore, 1948, NAVPERS 15,800. In accordance with these I have published National Naval Medical Center Standing Order No. 59, which I shall read:—

1. A Chief Petty Officers' Mess (Open) is hereby established at the National Naval Medical Center in accordance with the authority contained in reference (a).

2. Operation of the Mess shall be the responsibility of the Mess President and Mess Treasurer, governed by the regulations set forth in references (b), (c), and (d), and amplifying directives.

3. A board of governors is authorized to serve in an advisory capacity the officers of the Mess. The board of governors shall consist of not less than seven (7) chief petty officers attached to the several commands of the National Naval Medical Center, exclusive of the President and Treasurer, as follows: NatNavMedCen (1); NavHosp (2); NavMedSchl (1); NavDentSchl (1); NavMedResInst (1); NavSchlHospAdm (1). The members of the board of governors shall be elected by the chief petty officers of the respective commands to serve for a term of one (1) year. Number of terms for any one member is not restricted.

4. The Mess is located in building 23 (Recreation Building), rooms Nos. B-31, B-32, and B-33, with rest room and garment-

checking facilities in the corridor leading to the swimming pool, across the main lobby from the Mess. Parking for members and guests of the Mess is provided in parking lot "D" at the rear of the power plant, building 16.

Mess Treasurer, HMC Harold H. Betzner, your duties are prescribed by BuPers Regulations, Section 4, Paragraph 404. I shall head them so that all may understand and appreciate your very important assignment:—

(a) The Treasurer shall be the custodian of all records and other property of the mess; shall be responsible for their safekeeping, preservation and accessibility for inspection; and shall see that they are not removed from the station without the written authority of the Commanding Officer.

(b) He shall approve all orders for supplies.

(c) He shall inspect and verify the receipt of all shipments in detail.

(d) He shall accurately maintain such accounts as will enable the Commanding Officer or the Audit and Inventory Board to ascertain the condition of the Mess or Club at any time.

(e) He shall prepare the monthly financial statements required by these regulations.

(f) He shall employ, dismiss for cause, assign the duties and supervise the civilian employees paid from funds of the Mess, and shall establish working hours and rates of pay subject to the approval of the Commanding Officer.

(g) He shall assign the duties and generally supervise the work of enlisted personnel and civil service employees, if any, regularly assigned to or employed in the Mess.

(h) He shall be responsible for the receipt, deposit, disbursement and accountability of the funds of the Mess.

(i) He shall approve all orders for equipment, furniture and fixtures.

(j) He shall sign checks, financial statements and routine correspondence of the Mess.

(k) He shall retain in the files of the Mess agreements with civilian employees paid from Mess funds relative to hours, wages, overtime pay, vacations with pay, etc. Such agreements shall be signed by each person employed and by the Commanding Officer or his authorized representative.

Chief Betzner, I hand you the keys to the Club."

DR. ELEY

(continued from page 1)

demand as a lecturer at various industrial and university laboratories. Prior to his visit to Bethesda, he lectured before the American Chemical Society Symposium at Minneapolis, Minnesota.

Any article on Dr. Eley would be incomplete unless it included a reference to his dynamic personality and individual charm, in addition to his outstanding achievements in the field of science and his brilliance as a lecturer.

RADM Anderson, Former Commanding Officer, Retires

RADM Thomas C. Anderson, MC, USN (Ret.), was relieved of active duty from the Medical Division of the National Security Resources Board July 1, 1950. RADM Anderson was the Commanding Officer of the National Naval Medical Center from June of 1946 to July of 1949 when he was relieved by RADM M. D. Willcutts.

News Shorts From The Editor's Desk

RADM Morton D. Willcutts, MC, USN, Commanding the National Naval Medical Center, represented the Medical Department of the Navy and the American College of Surgeons, as a member of its Board of Governors, at the 1950 annual meeting of the Canadian Medical Association.

The Association's 81st session was held at Halifax, Nova Scotia, in conjunction with the 97th annual meeting of the Nova Scotia Division, from 19 through 25 June.

(AFPS) Taking stock on the sixth anniversary of the Servicemen's rehabilitation law enacted for the aid of veterans after World War II, the Veterans Administration reported it had placed \$24,800,000 in the hands of the country's 15,300,000 war veterans.

Approximately seven million former Service men and women received on-the-job and classroom training costing \$10 billion during the six year period. The average training period was 15 months. Only 300,000 veterans exhausted their eligibility for training.

Veterans who desire schooling after July 25, 1951, must enroll by that date. Educational benefits will cease in 1956. The deadline for loans comes in 1957.

(AFPS) What is believed to be the smallest hole in the world was drilled recently at the Naval Ordnance Laboratory in White Oak, Md.

The hole, drilled in platinum, measures 3/5000ths of an inch. It equals the thinnest strand of silk spun by a spider.

Two new parking lots are going up. One by the Recreation Bldg. and one in back of barracks 112.

Rear Admiral William L. Mann, MC, USN, Ret., former CO, NMRI, visited RADM Willcutts recently on his way through this area.

The Maryland Society of American Medical Technologists held their first State Meeting June 30, 1950 at the Bethesda Medical Center. An election of officers and a general discussion of the Society by Miss Fliesman, state representative, were the main topics.

Those present wish to extend their utmost thanks to CDR. T. K. Ruebush, MSC, USN, for his interesting lecture.

(Continued on page 4)

A long and colorful career behind Admiral Anderson. He seen two World Wars and has Legion of Merit, the Marine Corps Expeditionary Medal, the Asia Pacific Area Medal, Victory Medal, the American Defense Service Medal, the American Area Campaign Medal and the World War II Victory Medal.

The Admiral was born in Sheffield, Iowa, in October of 1886. received his BA degree from Morningside College, Sioux City, Iowa, in 1908, and his MD from University of Michigan Medical College, Ann Arbor, Michigan, 1914. After two years of civil internship and practice, he entered the regular Navy in 1917.

He has had duty on many stations and ships, among them, USS New Mexico, USS Relief, Naval Hospital, Honolulu, T. Naval Hospital, Mare Island, California, Third Brigade, US Marine in China, Naval Hospital, Canal Zone, Philippines Islands, Naval Hospital, San Diego, California, Naval Hospital, Boston, Massachusetts, Naval Station, Guantanamo Bay, Cuba, NOB, Norfolk, Virginia. In 1946 he reported for duty as Fleet Medical Officer on the staff of the Commander in Chief, US Pacific Fleet and Pacific Ocean Areas.

In 1945 RADM Anderson was ordered to the Bureau of Medicine and Surgery and later as District Medical Officer, First Naval District, Boston, prior to becoming Medical Officer in Command in 1946.

RADM Anderson received honorary degree, Doctor of Science, from Morningside College, Sioux City, Iowa, June 1946.

Big Event Marks Chief Petty Officers' Club Opening

Middle row looking down are the principal figures in the commissioning ceremonies of the Chief Petty Officer's Mess (Open). First Mess President, HMC E. R. Wilkinson, the Commanding Officer, RADM M.D. Willcutts. The Surgeon General, RADM C. A. Swanson, the Deputy Chief of the Bureau of Medicine and Surgery, H. L. Pugh.

Random shots taken during the first evening festivities show HMC and Mrs. A. M. Potter, MMS. Upper right, HMC and Mrs. F. L. Moore and Mrs. Minerva Tass. Second row, left, HMC and Mrs. T. Scales, HMC R. A. Nygren, NMS and HMC, and Mrs. H. O. Dysar, NMS. Second row, right, LCDR and Mrs. C. L.

Crawford and HMC and Mrs. H. H. Betzner. Chief Betzner is First Treasurer of the Mess. His charming wife in the white dress is club hostess.

Third row left, Mary Jean Nunnery, HMC C. A. Dana, Ann Nunnery, and Clarence Jones. Third row right, Chief Wilkinson, RADM and Mrs. Davis, RADM and Mrs. Willcutts, and Mrs. Betzner.

Bottom left, three Commanding Officers of Center Commands, LCDR and Mrs. M. E. Zimmerman of NSHA, Captain J. L. Enyart of NMS, Captain and Mrs. C. F. Behrens of NMRI and Mrs. Enyart, Captain and Mrs. Mitchell, of NDS were also present. The picture at bottom right was taken in the bar which ad-

The Chaplain's Corner

By Chaplain Dennis R. KERRIGAN

In a recent issue of "Life", five Protestant Ministers of Portland, Oregon let loose at the funeral industry. They deplored the ostentation, the artificial expense, the tendency to diminish the Church and the Pastor, and to exalt the Funeral parlor and the Mortician. The Ministers have our sympathy. But Dr. Paul S. Wright of the First Presbyterian Church was sadly near the mark when he said: "Many people have no relationship with organized religion, (statistics indicate this number to be over 60% of the population of the United States) and therefore it is difficult for them to have a Church service. For, in fact, they have no Church. The funeral parlor system which has grown up is only an indication of the world in which we live".

Of more import and more interest would be the large portion of this sixty percent who are openly antagonistic to religion,—which means openly hostile to God Himself. The extremely nervous condition of the world at this moment is the result of just this—the abandonment of Almighty God, which necessarily brings down unhappiness and suffering to mankind. For trying to build the brotherhood of man without the Fatherhood of God is like trying to make a wheel without a hub.

We might well pause at the prophetic words of St. Paul written to Timothy (3: 1-5) almost 2000 years ago: "Be sure of this, that in the worlds' last age there are perilous times coming, men will be in love with self, in love with money, boastful, proud, abusive; without gratitude, without scruple, without love, without peace; slanders, incontinent, strangers to pity and to kindness; treacherous, reckless, full of vain conceit, thinking rather of their pleasures than of God. They may preserve the outward form of religion, although they have long been strangers to its meaning. From these too, turn away".

Editorial

One hundred years B. C. there was a nativity that would affect the known world of that time and the expanding world of the future. That was the birth of Julius Caesar, who left behind him a weird pattern of chaos: he is written about in histories, he has been topic for poets such as Shakespeare, he has been the Latin student's stumbling block for many many moons—how many of these students would have gladly changed places with Brutus, but sooner (remember: Gallia est omnis divisa in partis tris: etc.). And even Omar said:

"I sometimes think that never blows so red
The rose as where some buried Caesar bled."

But of all these things, few people realize that he has also left us something in the active tense, present mood, and that is the name of this month which is taken from his first name.

There are five other dates in July that are interesting to note with regard to the development of this country. In 1776, a hand full of men, rustic, but determined, flung a sheet of paper at the world proclaiming that this nation was independent of any other. But in 1863 we were engaged in a civil war and on July 1 the battle of Gettysburg was fought. Much later, in 1914, one of the world's mightiest wars began, World War I, which brought to the attention of the people of this country that we must take part in world politics and economics.

And as late as 1941 we were again engaged in a second World War. July 4, 1942, the first US Bombers raided Western Europe; July 9, 1943, American troops invaded Sicily; July 25, 1943, Mussolini was ousted from power.

In 1775, on July 26, the first US Post Office was opened. How many have sprung up since then!

We can remember July then, as more than a month of greenery and heat. It is momentous in our nation's history.

Salt Shaker Sailor

Dear Bethesda,

The poetic urge...

We set underway again today. Although I felt a little tug at leaving Charlotte-Amalie (for I did not know if I ever would return) it was still good to feel the ship vibrating beneath me.

All day we travelled seaward on calm water. Then night came. Only a night fitting the Caribbean. An immense night. An immense sea. I sat on deck alone and looked dreamily into the star specked sky, then to the groping ocean beneath me. Little sparkles, like stars, formed as the ship turned over phosphorescent specks in the water. This was a night for poets. And so, poetry came, and I wrote in my mind...

THE SEA

Like music and like magic is your hand
Which plays the wrathful tunes of hurricanes,
Or strums a doleful song of sinking ships.
An ancient minstrel playing on the strand;
A stormy jazz band beating out its brains;
A crooning lover, honey on his lips.
Oh sea! You have a haunting melody.
Oh sea! Though you may rule with iron arm
You have yet kept through years of changing time
A haunting and a magic imagery:
Of soft spray, soothing like a charm
The wanderlust which grips the heart at prime.
Although men have denied your magic song,
Call once, and I shall come and prove them wrong!

And then, a cool breeze came in from the sea and I reclined against the bulkhead and became part of the majestic vastness...

Your Salt Shaker,
A. Sailor

Plaque Unveiled In Honor Of WW II Veterans

A former patient of our hospital, and an ex-Army Captain, a brilliant lawyer and a vibrant poet, James Patrick McGovern has had a monument erected at the Bethesda-Chevy Chase American Legion Post No. 105. A bronze plaque contains one of Mr. McGovern's sonnets, "March of Freedom."

The invocation was delivered by the Post chaplain, Rev. William F. Creighton, Pastor of the Episcopal Church of Chevy Chase and the dedication address by the Honorable Henry F. Ashurst, former U. S. Senator from Arizona. The benediction was given by Rev. Elmer T. Fisher, Pastor of the Church of Our Lady of Lourdes of Bethesda.

The United States Marine Band played a martial air composed by Captain McGovern and set to music by the members of that band, entitled "Our Soldiers, Sailors and Air Men," which he has dedicated to our National Military Establishment.

NEWS SHORTS

(continued from page 2)

As a note of interest to all service personnel belonging to the organization the July meeting will be held in Baltimore, Md. All urged to attend.

According to a recent letter from the Washington Suburban Sanitary Commission the water consumption has now reached such amount that greater conservation in the use of water from the public supply must be exercised to properly protect the public health and safety. It is now against the law for any firm or corporation or their employees to use any water supply for the purpose of watering lawns, shrubbery, flowers, or gardens or for any purpose other than for family or business use until further notice.

Captain and Mrs. Paul Titus, MC, USNR, Secretary of the American Board of Obstetrics and Gynecology and Consultant to the Surgeon General of the Navy visited RADM Willcutts at the Center recently.

Captain Titus did duty at the Bureau of Medicine and Surgery during the war. RADM and Mrs. Willcutts entertained Captain and Mrs. Titus at a dinner at the Commissioned Officers Mess Open.

Air conditioning is now in commission in the Officers Mess. Patrons are enjoying the welcomed respite from the summer heat.

Dental Officers Complete PG Course Of Instruction

At graduation ceremonies for twelve NDS dentists, left to right RADM C. V. Rault, DC, USN, Captain L. D. Mitchell, CO, NMS, RADM B. Groesbeck, MC, USN, RADM M. D. Willcutts, and Chaplain F. Grady Gatlin take the rostrum.

Seitz-Elliott Wedding Solemnized Here

Miss Patricia M. Seitz, Red Cross Head Recreation Worker, and Mr. William E. Elliott, Jr., until recently an attorney in the Department of Justice, were married June 28th in the Catholic Chapel with Chaplain Arthur Finan, USN, officiating. Immediately following the ceremony a small reception was held at the Officers Club.

Miss Seitz was attended by her sister, Mrs. Patrick Brady of Milwaukee, Wisconsin. Mr. Elliott's best man was Dr. Robert Miller who was formerly attached to the Naval Medical School here and is now a pediatrician in Arlington, Virginia. Mr. William Cahill served as usher.

Miss Seitz, daughter of Mr. and Mrs. Jacob Henry Seitz of Cashton, Wisconsin, received her MA degree from Marquette University and has been active in their alumnae group here. She has been with Red Cross at this station since the beginning of 1944 and before that was stationed at Camp Reynolds and Camp Forrest.

Mr. Elliott, a graduate of Wesleyan University and George Washington Law School, was in the Navy during the war as a Lt. Cdr. Until June he was with the Department of Justice but is now associated with a law firm in Philadelphia, Pa., where Mr. and Mrs. Elliott will make their home.

Among the out-of-town guests present at the wedding ceremony were: Mr. Elliott's parents, Mr. and Mrs. William H. Elliott, and Mrs. Eldridge, an aunt of the groom, all of East Orange, New Jersey; Mr. Alfred Aurich, a partner in Mr. Elliott's new firm; and Mrs. David Camp of Philadelphia (Patricia Pettinos), a former recreation worker at this station. Due to distance and health factors, Mrs. Elliott's parents were unable to come East. Also present were Mr. William F. Bixby and his two daughters, Mrs. Olive Knight and Miss Betty Bixby, with whom Miss Seitz had resided in Washington.

fore last in the Annual Inter-Service Golf Tournament beating the Army and the Air Force by a sound margin. The score was, Navy, 150 points, Army, 118 points, and the Air Force, 115.

Learn to swim classes for children are now being conducted at the NNMC pool. This class will end in about a week and another

Twelve dental officers were presented certificates upon completion of postgraduate studies at the Naval Dental School, June 30, 1950.

At the graduation exercises which were held in the NNM Auditorium, Rear Admirals B. Groesbeck, representing the Surgeon General, C. V. Rault, and S. O. Claytor were the featured speakers. Captain L. D. Mitchell, DC, USN, Commanding Officer, introduced Admiral Claytor, incoming chief of Dental Division, who turn introduced Admiral Groesbeck. Following Admiral Groesbeck, Admiral Rault gave a short address. The next day he retired and assumed the position of Dean of the University of Georgetown Dental School.

The Commanding Officer of NNM, Rear Admiral M. D. Willcutts, MC, USN, presented the graduation certificates. Ten dental officers completed a general course. They were: Commanders R. Burnett, and A. L. Raphael, Lieutenants J. R. Groesbeck, O. F. Leberman, W. S. Rault, and J. C. Stoopack, Lieutenants M. Marking and I. W. Ogden, and Lieutenants (Junior Grade) C. Lynds and T. J. Pape. Lt. P. Wells completed a specialized course in prosthodontics and L. B. A. Gumm, a specialized course in oral surgery.

Music was furnished by the Navy Band prior to the ceremonies and it also rendered the National Anthem at the close. Chaplains D. Kerrigan and H. Grady Gatlin gave the Invocation and Benediction.

To be able to speak several languages is valuable, but the ability to keep one's mouth shut is one language which is priceless.

Alexander Smith aptly said, "A man's real possession is his memory. In nothing else is he so rich. In nothing else is he so poor."

Sometimes it's hard to tell who's knocking... opportunity or temptation.

will start immediately. It is a two week course, supervised by Water Safety Instructors, and is open to those children from seven to thirteen whose parents are authorized users of the pool. The next class will be comprised of twenty youngsters and registration and any further information can be obtained from HMC J. Nicholson or J. French at extension 227.

I Love A Parade

"I love a parade..." The children yell...and the marchers march...and, even though the time could have been spent on a date the men feel a particular brotherhood with each other as the bands blare, the people watch, and the children yell. First row, left, some three hundred men from all the commands of the Center march down Wisconsin Avenue led by CDR Frates. Right, the men in

front of the hospital, before leaving led by the 2nd Army Drum & Bugle Corps. Second row, left, Marines march up the Avenue, and, right, Governor Lane, cuts the ribbon which officially opens the Avenue that alleviates the traffic bottle neck that existed in Bethesda.

NNMC Golf Course Stretches To Nine Holes

Saturday, July 8th—a big day in NNMC Golf history. That day, after proper ceremonies, the 7th, 8th, and 9th holes were opened for play making a total of nine holes. Admiral Willcutts presented CDR Frates with a ball and the Coach proceeded to drive it over the creek and onto the fairway for the first official drive. That's the Coach and Admiral Willcutts in the lower left picture. In the upper left picture is the first foursome through. Made up of CDRs Frates and King, LCDRs

Reading from left to right, upper right: LCDR Floyd, Bill Downing, pro; LTJG Atkinson, Polansky, and LTJG Anderson.

Lower right shows part of the professional line of golf equipment Downing has for sale in the new golf shop at the first tee.

Letter Tells Of Deep Appreciation For Center Personnel

Appreciation lies deep when it is twice told. Below is a second letter expressing the appreciation of prisoners for the books sent to them by the Crew's Library. The books were from an overflow stock and double copies.

Dear Friend:

It is New Year's eve in the government, a day of work rather than of celebration, with the headaches of last-minute inventories, becoming what the previous budget did not accomplish, and worrying about the shortcomings of the budget allocations for this year. But for us there is one great difference—we do have something to celebrate—and we want to wish you a happy New Year, simply because you've made this year past a memorable one for us.

Your generosity in donating books has been inspiring to ever so many. You have made mine an easier job because I have been able to satisfy some of the needs our men have felt for good periodicals. You have had an even more decided influence on the men; every one of our readers has come to recognize that little legend we've put on your contributions: Donated by National Naval Medical Center.

Do you have any idea what it has meant to these men to realize interest sincere and kindness so that there really are people with an evident that they have gone to the considerable trouble and expense to provide reading materials which make life here more bearable? For every man, as for myself—a very heartfelt thank you and—Happy New Year!

Sincerely Yours,
Supervisor,
Academic Education Dept.

Personalities About The Center

Jerald Boyles HM3

Again West Virginia hits the personality page . . . This time in the person of Jerald R. Boyles, HM 3, from Phillippi. Jerry was educated at Phillippi where he was an active participant in many school activities and organizations. He was cheer leader and belonged to the Hi-Y, an organization which directs student government, organizes dances, sports, and recreational activities and has charge of the Thespian club. He was narrator for one of these plays, a Negro spiritual opera given in his senior year.

Jerry entered the Navy in 1947 and has now decided to make the service a permanent thing for at least twenty years. Basic training and Corps School were both taken at Great Lakes. He came here in April of 1948 and has worked on wards and the Record Office since his arrival.

He is presently working in the photostat room. His duty there is making photostatic copies of official records of documents for the hospital, Veterans Administration, Bureau of Medicine and Surgery and for other Naval hospitals.

Jerry wants to go to embalming school in Saint Louis. It is an eight week course. So far, all efforts in this direction have failed but he is still trying.

Peggie Igou HN

"Ahgou is my name," said the pretty little Miss Peggy Ruth Igou. The only way her name was correctly arrived at was by her conjugating: "You Know, Ahgo, You go, He goes, etc." With that, there was no doubt or surprise when she said that home was Chattanooga, Tenn.

Miss Igou was the first woman to join the WAVE's in peace time and her home town paper ran a pictorial of her progressing from civilian to "boots" in Great Lakes and graduating finally as the honor girl of her company. The newspaper overlooked some water-logged shots in not taking her submerged in a lake. Miss Igou declares that she has seldom gone near a lake when she did not fall in fully clothed.

She attended Chattanooga High School and two and a half years of pre med at the University of Chattanooga. She wanted to become a laboratory technician, and now that she is in the Navy wants to attend laboratory school here. Although she likes her work with dependents on ward 128, she would not like to stay with it all the time.

While in high school, Miss Igou played the piano for the Glee Club and participated in all the women's sports. She earned her letter in her senior year on the basketball team where she played guard. She said that she just missed the team here because of her late arrival in May, but next year she will be on the court.

The piano has been second nature for her since she was a "wee tot". She can play classics, but prefers swing. She has her own ideas about music, too—very rebellious in this point. If she believes a piece should be played faster or slower than indicated she goes by her intuition. "This has resulted in many squabbles with my teachers," stated Miss Igou.

"The Navy is brand new to me," she said, "And I don't know if I will ship over or not, but I have until 1953 to decide."

Michael Lasko HMC

Michael J. Lasko, HMC, is a big hunk of chief who comes from Clarksburg, West Virginia. He is well known about the station for two things: his good nature and his work in Sanitation. The chief states that the general sanitary conditions are good, but that there are still a few things that he would like to see corrected. His job ranges from catching mice and rats to spraying for cockroaches and termites. His most recent job is trying to get rid of crows.

At Victory High School, in his home town, what seemed to be a musical career started for him. He was a member of the school's glee club, quartet, and A Capella choir. He studied voice and had plans to continue, but lack of money forced him to take a job with a steel company. His father, who also worked in the plant, was burned to death and shortly after, Lasko got burned himself. He quit the plant and joined the Navy with hopes to make enough money to return to college, but the war came and when it ended he decided to stay on.

He entered the Navy in 1938 and was promptly sent to Norfolk, Virginia, then to San Diego for Corps School. While at his next duty station, Pearl Harbor, the Japanese attacked. He was sent back to the States and almost immediately sent out with a Tuna Boat Task Force. He was on the "American Beauty", operating with a group of fifteen others whose main job was to patrol an area of one hundred and fifty miles of coast. These forces kept a lookout for invasion forces. The chief said that we had such task forces patrolling all the western coast.

After this assignment a quick list of ships and stations followed: the USS Chanticleer, ASR 7 (put

Crew's Library

Light Reading A La Mode To "Beat The Heat"

There are certain words that ways call to mind other words (ham and eggs of course is classic example) but the word mind now are SUMMER LIGHT READING!

Crew's Library has on many books to help you "beat heat." Here are a few suggestions.

THE MARX BROTHERS Kyle Crichton tells the story of Minnie's five brash boys from tenement beginnings through Broadway musical comedy days their world-wide success in Hollywood.

SLIGHTLY COOLER IN SUBURBS by C. B. Palmer. I have ever spent a week end country, you will enjoy these aimed darts at all phases of suburban living from the local taxi vice, to pets, children and the neighbors.

Max Shulman's latest is SLIGHTLY COOLER IN SUBURBS as hilarious side-splitting as you would expect if you have kept up with this author from the days of BAREFOOT BOY WITH A CHEEK.

Rating Exams Given Today, And The 24th

With well sharpened pencils, sharpened wits, last minute cramming be ready for the coming rating examinations! July is a big month and may be the making of new stripes. The Navy Exchange declares that cigars are already being stored up. The seventeenth and the twenty-fourth are the days. All going up for second class will take the examination the seventeenth; and for first twenty-fourth.

All present waiting lists are being abolished, to make way for new service wide examinations. The examinations will originate and be corrected in Norfolk, Virginia. There is no word out as to where or when the results will be posted.

Another examination is to be scheduled in January. The date has not been announced yet, though that information will be conveyed as soon as it is released.

Mrs. Alben Barkley Presents Afghan For Hospital Use

One Red Cross volunteer service which contributes much to the comfort of patients in the Hospital is the Production and Supply Corps. The beautiful hand knit afghan shown in the picture was presented by a group of Senators' wives as a symbol of the work which they do under Red Cross auspices.

Mrs. Alben Barkley, wife of the Vice-President and ex-officio leader of this production unit, came to the Hospital on Tuesday, June 20th, accompanied by the ladies pictured above with Captain R. M. Gillett (MC) USN, Commanding Officer of the Hospital, to present the afghan formally. Red, white, and blue with Navy anchors and

flags, it represents the spirit of this group.

During the course of the year the hospital receives many afghans, a large and regular supply of hand-made dressings for the operating room, layettes, bed jackets, etc.

Production units are located all over the city of Washington and the surrounding suburbs. Led by local chairmen, ladies meet in churches, community halls, clubs, and workshops, and work together to make articles requested by Red Cross in the hospitals for the use of patients. They find the group association enjoyable and derive satisfaction in contributing their efforts, knowing they have added to the welfare and enjoyment of the hospital patient.

WAVE Ships Over

(continued from page 1)

The next step was toward the Hospital Corps School, Bethesda, Maryland, after which she was ordered to the Bethesda Naval Hospital.

She has been stationed at this hospital since completion of Corps School. During the greater part of her years here she has been assigned to duty on the Dependents' Service, where her duties have been performed in a highly satisfactory manner. For the past several months, Flora has been Master-at-Arms of the Waves' Quarters.

Whenever she had extended or shipped over in previous years, such had been done within a group. This was the first time to be sworn in as an individual. In 1948, she was one of the first six Waves to be sworn into the Regulars. That particular group went to the Office

Oregon Patients Remembered

Mrs. G. O. Kendell, 3121 SW Crestdale Drive, Portland, Oregon, representing the Navy Mothers' Club of Portland, and Senator Wayne L. Morse visited the Naval Hospital, and presented lap robes and slippers to Oregon patients. Left to right, Senator Morse, Mrs. Kendell, Captain Gillett, CO, NH.

of the Secretary of the Navy, the Honorable John L. Sullivan, where they took the oath from Admiral

George L. Russell. Captain Joy Hancock, Director of the Women's Reserve, was present.

By Nadiene Calhoun
The Naval Medical Center Recreation Department has very successfully handled a fund allocated for monthly enlisted staff dances as one phase of their program to provide recreation for enlisted men, their families and guests.

No one individual can be credited for promoting these dances, because the work involved has required the efforts and cooperation of many staff members. The participants themselves have made the evenings enjoyable for all.

Despite the immensity of the

gymnasium, it has been possible to create an atmosphere of gaiety, aided by several decorative themes. During the past year the themes of Halloween, Hawaii, St. Valentine's Day, Club 52-20, May Day and St. Patrick's Day have been appreciated for their color

schemes and novelty.

Howard Williams and his orchestra have played a strong hand in entertainment background throughout the season. Whether you were a 'hepcat', an Arthur Murray rumba perfectionist, a 'top hat and cane' glider, a fox

trotter or just simply liked to dance, the floor was yours.

For several months contests were conducted for enthusiastic jitterbugs, fox trotters and waltzers, with a variety of prizes being

Diaper Derby

On June 15 a baby girl was born to Ann Mary and James Joseph Humes. The father of the new arrival, whose name is Alice Marie, is in the Pathology Department of the Naval Medical School.

For CWO(HC) and Mrs. C. W. Brien, a girl, Catherine Ann, on the 10th of June. Mr. O'Brien has been detached from NSHA but will be remembered as the artist for the NEWS.

Betty Griffiths gave birth to Albert A. Griffiths June 18. The father, Adam M. Griffiths, HMI, is on duty at NMRI.

A new shutterbug is Deborah Jean Hay who was born June 19 to HMI and Mrs. Everett Hay. "Doc" Hay works in the Photo-lab and has taken pictures for the NEWS more than once.

DTC John E. Nicholson passed out cigars on the 29th when his wife presented him with their second girl, Cynthia Ann. Nick is attached to NDS but is detailed to the Recreation Department.

Barthory Pruitt gave birth to James G. on the 29th also. Ralph, the father, is an HMI who works in the Pharmacy.

On July 3, a boy for Charles and

(continued on page 9)

Cottage Capers

Are you a dagwood fancier? If so, Sunday suppers during the summer at the Cottage will suit you. In order to ease up on the cooks we have settled for sandwich makings, salad, potato chips, iced tea, and dessert. Supper is served at 6:30 in the backyard and we share the cost to the tune of 50c. Call OL 7808 for reservations. There's dancing in the basement after supper and plenty of partners for bridge, canasta, or pinochle.

It seems that Cottageites are running off with all Glen Echo's prizes for square dancing. It wasn't long ago that Kay Ramos won a portable radio and just the other night Polly Polhamus and Dave Garrett won portable radio's. It's worth the admission price!

One of the most popular of all Watergate concerts, the all Gershwin program, comes to Washington July 26 at 8:30. We plan to meet at 7:15 at the Cottage, 8410 Wisconsin Ave., in order to give us time to drive down, park, and find a good step to sit on. Bring your umbrella so it won't rain, 65c admission, a pillow if you're not well padded, and we guarantee you an evening of pleasure.

(continued in col. 5)

Thirty-three NSHA Officers Graduate

At left, RADM A. H. Dearing, MC, USN, Assistant Chief of the Bureau of Medicine and Surgery was the principal speaker at the NSHA graduation exercises. With Admiral Dearing is LCDR Max E. Zimmerman, the CO. At right, LCDR W. W. Willgrube delivers diplomas to students.

By Ray W. Conrad

LASKO (continued from page 6) it into commission), Sub Base at Pearl Harbor, and the USS Litchfield, DD 336, which did convoy, rescue and escort duty. While on the Litchfield that ship sunk two enemy submarines. Lasko was then sent to the Naval Hospital at NOB, Norfolk, where he made Warrant Officer. He was then sent to the School of Public Health at the University of California, preparatory to his duties as Sanitation Officer at NAS Alameda, California.

The chief is presently engaged in the building of model trains. He hopes to have a thousand feet of track once he has his own home.

It is always a pleasure to attend a graduation exercise for one receives a feeling of achievement out of its atmosphere which imbeds itself firmly upon our memories and is a constant source of pleasant remembering. Such an atmosphere pervaded the auditorium of the U. S. Naval School of Hospital Administration on 5 July, when the thirty three officers of the Army, Navy, and Air Force, completed the course in Naval Hospital Administration.

The Invocation by Captain H. Grady GALTIN, CHC, USN, commenced a program of an unusually fine character.

LCDR Max E. ZIMMERMAN, MSC, USN, the Commanding Officer, introduced the speaker with a brief but poignant statement in which he recalled the origin of this school, the fine job done by its founders, and particularly of that part played, in establishing the school, by LCDR W. W. WILLGRUBE, MSC, USN, who will soon be detached from his ling and excellent service here.

RADM A. H. DEARING, MC, USN, the Assistant Chief of the Bureau of Medicine and Surgery for Professional and Personnel Operations, was the principal speaker on this occasion. Admiral Dearing recalled the history of the Hospital Corps, forerunner of the Medical Service Corps, and in an informative manner revealed to the officer-graduates the unusual opportunities offered in training by the various Armed Forces schools and civilian institutions of learning. He impressed upon them the importance of future and continuous study and training, not only for their own edification but also for the advancement of the Medical Service Corps in order that it may reach the maturity and stature intended for it.

Benediction was pronounced by LCDR A. FINAN, CHC, USN, and this class was launched upon its renewed task of better SERVICE to itself, the Navy, and the Armed Forces.

The graduates are: LT JG O. S. Abernathy, MSC, USN; CWOHC L. E. Black, USN; LTJG Ray Bohannon, USN; LTJG B. N. Bricks,

MSC, USN; LTJG W. L. G. Cartier, MSC, USN; 1st LT L. R. Cheezum, MSC, U. S. Army; Capt. Anthony De Mattia, MSC, U. S. Army; Lt H. G. Donovan, MSC, USN; Capt. C. W. Dudley, MSC, U. S. Army; CWOHC R. A. Edlin, USN; LTJG F. B. Essman, MSC, USN; LTJG T. G. Fowler, MSC, USN; LT E. C. Hinz, MSC, USN; LCDR J. J. Jacobs, MSC, USN; WOHC B. E. Jennings, USN; Capt. R. I. Jetland, MSC, U. S. Army; CWOHC W. P. Johnson, USN; LTJG J. A. Kelly, MSC, USN; Major C. F. McAleer, MSC, U. S. Army; LT W. G. McGehee, MSC, USN; WOHC R. C. Meyers, Jr., USN; LTJG J. R. Nix, MSC, USN; CWOHC C. W. O'Brien, USN; CWOHC A. T. Parker, MSC, USN; Capt. D. F. Powell, MSC, U. S. Air Force; LTJG W. C. Replogle, MSC, USN; CWOHC H. J. Spangler, USN; LCDR Eugene Stevens, MSC, USN; WOHC B. T. Stradley, USN; LTJG S. P. Tipton, MSC, USN; LCDR F. L. Westbrook, MSC, USN; LTJG W. F. C. Whalen, MSC, USN; LT L. A. Young, MSC, USN.

CAPERS

(continued from col. 2)

If you ever get up late Sunday morning, go riding or swimming before breakfast, or go to church and then want breakfast and the funnies, drop in and meet Mrs. Herring, our Sunday morning volunteer from 9:00-1:00 who sees that breakfast is available. This is another share-the-cost venture. If Navy chow comes cheaper drop in for a cup of coffee and the funnies anyway.

Duty Bound

The Perambulating Perambulator

Washington is not called the "city of parks" for nothing. This term is taken by many to mean the small commons that dapple the city, but this is not exactly what the term applies to. Take Rock Creek Park. It stretches the breadth of the city, from the Lincoln Memorial into Kensington, a distance of approximately ten or fifteen miles. Take the Jones Bridge Road, just behind NMMC and cross Connecticut Avenue, follow through and after you cross the East-West Highway you are in the Park.

The Park follows Rock Creek in a curvy wooded area, quite pleasant and cool. This could hardly be considered a forest, but it is a delightful change from busy streets and office buildings. Picnic tables and fire places are strewn at intervals and there are many clearings for softball and other sports. You can park your car and, if the old west calls you, mount a hardy steed and travel along the bridal path. Horses are available at the stables near the mouth of the Park on the East-West Highway.

You need a car? Not at all. The Recreation Department has eight bicycles which are available to Naval, Dependent, and patient personnel until ten at night.

As you travel along the Park, crossing the Military Road, you soon notice that ducks start to appear. Your cue for a stop at the National Zoological Gardens. Never seen so many animals in all your life! There are separate buildings for the different species. While wading through a wad of cotton candy you can be throwing peanuts at the brown bears who will sit up and wave their paws for them.

The bird house is, as would be expected, colorful. Monkeys are fascinating (and as the saying goes, crazy people. There are ample supplies of every imaginable type. You may be a bit disappointed in the Lion House. Most of the kings and their feline friends, the tigers and panthers and leopards are sprawled out nonchalantly and quite oblivious to all that is about them. However they will occasionally flick at a fly with their tail and at other times become very nervous and pace up and down in their cages, stopping at one end and looking up the aisle as though they were expecting someone who was late for dinner.

The crocodiles, the reptile house, open their mouths wide and seem to "welcome you in with gently smiling jaws", while the snakes are quite aloof and hardly ever move. Now, you haven't seen all, you look away up in the air and see a small head stuck on a long neck stuck on a small body stuck on four long legs—exemplifying the matter, it is a giraffe in the mammal house. Walk a few steps more, and there's a stern old Rhino who will glare viciously, then a tired elephant, wrinkled and watery eyed, and the two ton mammas—hippos.

With a creaking neck from looking up and down you decide to continue on the Park and finally arrive in Georgetown, go up Wisconsin Avenue to Bethesda and probably stop at the Dinner Bell, The Cape Cod Cottage, or the Bethesda Inn, all excellent places to eat. And finally, you drive back and see Joe who has been trying to keep cool in the shade all day and you say to him: "We had a wonderful time today, Joe, you should have come along."

There are wonderful opportunities open to the dance enthusiasts at the YWCA, 17th and K Street NW, every Wednesday, Friday and Saturday during the month of July. Orchestra dancing on the 12, 19 and 26 at 8:30, while on the 14, 21, and 28, there is square dancing at 8:30. Saturdays (15, 22, and 29) afford other nights for orchestra dancing and there are also free dance instructions given at 7 PM on those nights. The admission for servicemen: Wednesdays and Fridays, thirty-five cents, and Saturdays, fifty cents.

Four Antihistamines Prove Ineffective In Cold Prevention

A recent investigation into the effectiveness of Antihistamine drugs by the Naval Medical Research Unit No. 4, Great Lakes, found that four drugs were ineffective in preventing or relieving the symptoms of the "common cold." The Unit is headed by CDR John R. Seal, MC, USN. The four drugs are: thonzylamine, chloropropenpyridamine, doxylamine and pyratiazine.

A total of 1,964 persons were included in the study. The study, divided into four phases, was carried out upon persons of both sexes and various age groups drawn from volunteers of Naval Personnel and their dependents. The investigation did not explore the value of the four drugs upon allergies; and known allergic patients were excluded.

One general conclusion to be drawn from the study is that there is no significant difference in the result obtained when prevention or treatment of the "common cold" is undertaken with the antihistaminic drugs studied, inert substances, or typical "cold tablets."

CDR Seal summarized the result by saying: No evidence could be found in these results that the antihistamines proved effective. Reports were filled with comments praising the results, regardless as to whether antihistamine or placebo (a harmless preparation resembling the antihistamine in appearance, but without any effect) was used and several patients on prophylactic option insisted on returning to placebo when changed to an antihistamine. This also happened in reverse and illustrates

only the large psychological factor operating in these volunteers."

The office of the Surgeon General of the Navy emphasized that the general conclusion to be drawn from the study does not mean that "colds" should be ignored or that the untreated patients in this study were neglected, since each was constantly under the observation of a Navy medical officer.

(continued from col. 5)

—look at all the work you piled upon her shoulders. We're sure you'll live through it, though. You always have. (Am I not a comfort?).

We're glad you belong to Dental Dept: Drs. Frates, Flocken, Superko, Oslar and Lehmann, and all the boys that marched in the parade marking the opening of Wisconsin Avenue. With the sun tans you've all been acquiring, the whites, you looked nothing but fine, I think we even outshined those Marines! Don't you agree, Commander Frates?

Time to put this little jewel to bed, so until the next time—be seeing you all.

Bulletin Boards Med School Play Big Role If Well Used

By Ray W. CONRAD

Since the beginning of recorded time men have been informing other men of their desires and intentions, of the consequences of their acts of omission and commission and the like, by means of a sign or notice which today we commonly refer to as a bulletin. Noah Webster tells us that a bulletin should contain three essential elements. These are: (1) A brief statement of news (2) made to the public (3) issued by an acknowledged authority.

In the Navy, as elsewhere, the bulletin board too often does not meet these requirements. Material which finds its way to the board is too often forgotten and in time is either covered up or, having outlived its usefulness, it receives no notice.

Your correspondent once worked in a department store where the president of the organization would frequently require that an entire department be moved overnight to another location in the store. By doing this he averred that the interest of the customer was aroused and, since most humans are inquisitive by nature, in the process of seeking out the new location they were exposed to the wares of several other departments where the all powerful force of suggestion was unleashed upon them. In short, they came to buy a book and wound up with some cosmetics, a new shirt and two books.

How does this principle apply to bulletin boards? Simply this—the material on any board is only as good as its timeliness. It must be arranged in an interesting manner and of simple uniformity and coordination to render its message within the easy grasp of the reader. Revise and edit the material frequently. Use bold headings to announce the subject material and fix responsibility upon the individual for knowledge of that material which has been issued by competent authority.

The importance of the nature of official notices should not be diminished by items of idle chatter. A constant source of difficulty to prosecutors of wrongdoers in the naval service has been the matter of proof of publication of local orders of the command. When an accused person has violated the provisions of a local station order it must be alleged verbatim and proved like any other fact and it must be established beyond reasonable doubt that the accused had knowledge of the order which was violated. CMO 3-1947-262 specifically mentions publication on bulletin boards as a fact of which the court may take judicial notice thereby fixing responsibility upon all of us for daily reference to the authority of official bulletin board items.

Charles Speigle, HM2 was detached from the staff of the Medical School on the third of July and left almost immediately for sea duty. We thought it would be proper to mention this little item of news. Immediately after complimenting the Admirals' baseball team on their good play we were told about a 24-0 score. The Admirals were on the short end of that score. But, as any member of the team will gladly tell you, the playing field was very rough and literally covered with pebbles. It does sound a bit thick but that is what they will tell you.

John Giragosian came back from leave and immediately sounded off about almost everything in sight. Of course, he wasted no time in offering his services to the 'Immortal First'. We are proud of John.

Not too long ago a friend of ours—Frank Adams HM1-brought a milk shake from town for one of his many admirers who had night duty on one of the outer wards. As he was entering the ward from the outside entrance he noticed that the nurse was busily talking to a medical officer at the desk. Feeling a bit shy Frank decided to wait outside until the doctor left. However, it began to rain and continued to do so for some time. And still the doctor remained. And still the rain fell. And still Frank waited outside. Finally, soaked to the skin and still clutching the milk shake which was now well diluted Frank came in out of the rain and humbly presented it to his little friend, the nurse. Now, the moral to this story is—well, perhaps we should forget all about it.

There isn't much time these days—gotta hurry home and pack my sea bag.

DANCE

(continued from page 7)

awarded. Door prizes have also been a feature attraction.

Picture on page 7 are impromptu scenes snapped at the June dance. Recreation went all out to make this one of the best dances of the year, from linens and flowers to a buffet served cafeteria. Swing and Sway melodies were offered by Russ Temple and his Navy Band, who were loudly applauded for their musical manner.

The Dance Committee has expressed special verbal tokens of appreciation to the electricians, carpenters, commissary crew, working details from each Command, photographers and the gardner for their assistance and cooperation.

Whether the sun was shining or clouds were bursting with rain; whether pay day had just come or was still around the corner; the staff dances have drawn an excellent crowd.

Dental Explorer

By Eli Karge

Ah, that lovely time of the when there is nothing to do but to picnics; that is if this Mary weather will permit them. Dental Gang packed up, liquor freshments, ham, turkey and trimmings and headed for the open spaces of Great Falls on Fourth of July. Believe me, a good time was had by all, including the horse-shoe players! Naturally we had a set of horse-shoes, would a picnic be without them. Thank you, Tommie for having fore-sight to bring them with. And then to T. R. Smith goes a "thank goodness some one thought of bringing his bathing suit". went for a dip every time the ball landed in the canal. Of course we always have a few sleepers in the crowd. Yes I'm talking about you McConnell and Allison have been all the food you summed. Anyway, I got the picture of you two sound asleep with your mouths wide open. Come around to the front sometime and I'll show you sleeping beauties really look. Our tee shirt twins were weren't you Morrison and Skin. We mustn't forget the children our little group. I think the had a super time. Chief Pat your little Rickie "shot" many times during the day. I don't if the bullet holes can be counted. Never the less, Rickie is a cute. Takes after his mother doubt. Michael Tombrello sat in the water and was very unhappy when he found out his mother hadn't brought him a complete wardrobe. Lois Stipkovich looked so cool and comfortable in her dress and with those nice red pinned up. I'd like to mention the little incidents that went on day, but there is a limit to patience, so I'll just add, that out the kids around we grow won't have had half as much. A closing line about the picnic all went home tired but very pleased with the whole affair. A pat on the back goes to Chief, son, for all the hard work he into this deal and for the sake of it. Thank you Chief, and from the bottom of our hearts.

Now over to Building 122 the Prosthetic Class. Subject the moment is the choice of stations. Three of the boys received orders for, of all places, NDS, NMMC, Bethesda, Mary. Lucky boys! We are referring Marion T. Applegit, who by way is not a Wave, even though his name sounds like it ought to Haupt and "Butchie" McCl. Welcome aboard four winds the seven seas, or so the states. Best of luck to all of it's been fun being ship-mates together this past six months.

Also setting sail for new stations were our ten Post Graduate Officers. Immediately after the very nice graduation exercises which were held in the Main Auditorium, Friday the 30th, we loaded them out and they were on their merry way. We get rid of more people through the process of graduation, don't we? Well, we had got times together since the beginning of your course. May you all find your next station as friendly as the one—there is a motive behind this, you know that don't you? trying to build ourselves up in the eyes of the new Post Graduate officers who have just reported. Twenty-three in all. Poor Mrs. M.

(continued in col. 2)

New Justice Code In the Offing

By RAY W. CONRAD

In the JAG Journal of March 50 we were informed that the Uniform Code of Military Justice is being rather well in the legislative and in about one year we'll be putting it into use throughout the National Military Establishment. To most of us who have an interest in the subject the new military code is eagerly awaited and we hope that some of the old problems of naval justice will be settled or substantially enlightened.

The problems of naval justice are confined to the administration of discipline but embrace a wide variety of everyday questions ranging from, "how does the Navy feel about my Mexican divorce?" "Am I amenable to naval jurisdiction after I'm retired?" "Are my clinical records available to courts?" "How about that death gratuity?"—And really hundreds more.

Let's step back a few hundred years and see how the various phases of law came to be the protecting

How many times must I tell you to leave the disciplinary station up to me?

of society in the service as well out of it. Have you ever heard Hammurabi, King of Babylon? Couple thousand years B.C. this codified the laws and existing customs, which code lasted to influence society for a thousand years. This was the first great example of "law of the written word". It was followed by a long procession of law givers who contributed to that phase of law such as Solon of the City State of Athens who gave us administrative law—Justinian of the East put his into book form—Hugo Grotius added international and admiralty law—Edward Plantagenet (Edward I of England) planted the roots of the English Common Law which have grown through Thomas Blackstone into the common law which all the states except Louisiana have used as the basis for their codes and constitutions. Of course no parade of the law-givers would be complete without our own John Marshall who first took teeth into the Supreme Court in "The Great Dissenter". Will you ever forget, for instance, when commenting on free speech; he said that the right of free speech must give any man the right to "FIRE" in a crowded theatre. "Carl Van Doren's 'The Great Republic' and Charles Beard's 'The Republic' can fairly well appraise us of the intent of the framers of our Constitution with regards to our law beginnings. Add these beginnings to our own Naval Courts and Board and Court Martial Ordinances, appraise ourselves of the past and we'll be better able to receive the new military code. Next time someone mentions naval justice to us we can then take stock and surmise our own responsibilities, our

Inquisitive Student

I think that I shall never gaze
On a poem as lovely as gamma rays.
Are they short or are they long?
Do they dance or sing a song?
Do they have two legs or have they four?
Do they get ulcers and do their feet get sore?
Do they have a pappa and mamma?
What's the difference between a he and she gamma?
Don't they get tired of running so fast
Do they ever get where they're going at last
Does the mother-in-law gamma pay a friendly visit?
Tell me, Simmons, what sort of a thing is it!!!

One Man's View of Modern Progress

By J. C. Woods

How things have changed. Yes, as the years go by we find ourselves making startling progress... or are we? For instance, no longer do we have to worry about the wrong decision in marriage. We simply open a current magazine and presto... "answer the following 50,000 questions with yes, and you can be sure that your marriage will be a happy one." And then there is the problem of "Should I drink?"... here is where our modern psychiatrist takes a hand. First we find that if we drink to forget, then we lack character. If we drink for a good time, we do not lead a healthy life and if we drink just to be sociable... And then we wonder why most ball tenders are bald.

Which brings us to the radio. Why, without this box of bliss how would we know that we are smoking the wrong cigarette? Let's see, this one does not harm our appetite as the others do, and this one does not tire us, this one does not affect our eyes, this... and it's the radio bedtime stories that save us the trouble of rocking our little ones to sleep. You just tune in and...

"Will Horace Headhacker succeed at last in killing our hero Fearless Tom Musheart. Tom is hanging on a limb just over the canyon when Horace sneaks up with a hacksaw, but don't lose your heads listeners, Tom has an ace up his sleeve (what a time for card tricks). Be sure to tune in tomorrow, same time, same station, for another thrilling episode of "Skull Pass". Then the poor kid sits up all night wondering what's going to happen to Tom Musheart.

(Continued in Next Column)

own personality barriers and prejudices and perhaps our tongues won't place our position in jeopardy before good reason saves the day.

Take these words of John Paul Jones quoted from his famous letter to the Congress of 1777—"I have sat on a Court Martial where the President of the court could not read the orders that appointed him, and a Captain of Marines had to make his mark in signing a report. As long as you have such characters for officers the Navy will never rise above contempt. It is by no means enough that an officer of the Navy should be a capable mariner. He should be as well a gentleman of liberal education, refined manners, punctilious courtesy, and the nicest sense of personal honor."—Don't relax into thinking that the responsibilities of naval leadership rest solely with the officers for Jones was here also speaking of petty officers and not one chip from the block of responsibility has been lost to the time which has elapsed since 1777, until that day when you take your place on the court as an officer or enlisted member under the provisions of the new military code.

In Pareu—Film and swimming star Ester Williams strikes an eye-filling pose in a pareu-Tahitian style sarong. It's authentic, too. Ester was photographed on location on Kauai island, T. H., where a new picture, "Pagan Love Song," is being filmed.

One Man's View

(Continued from Column 2)

The news announcer has a different story to brighten our day: Depression seen. Food shortage.

XX found to be cause of such and such disease. No cure yet.

And so time goes on bringing us new conveniences and broadening our knowledge of life.

So friends the next time Junior blows up the chicken coop with his ray gun or dad tears apart the garage with an atomic car—remember, it has its good side too.

DIAPER DERBY

(Continued from page 7)

Tena Ferguson. The bundle is called Junior and the father is an HM3 in Blood Collecting.

For HMC and Mrs. John W. Ricketts, a boy, Allen Andrews, on the 6th of July. The chief works in Cardiology.

Irate Guest: "Look here, the rain is simply pouring through the roof of my room."

Summer Hotel Proprietor: "Absolutely according to our advertising. Running water in every room."

Two soldiers, slightly the worse for a Saturday night celebration boarded a bus and tried to pay their fare to a man in uniform.

"You've made a mistake," said the officer. "I'm not a conductor, I'm a Naval officer."

"Hey, Joe," exclaimed one of the pair, "Let's get off—we're on a Battleship."

Navy Belles

By NADIENE CALHOUN

Be it ever so humble, there's no place like home. However, during the first few weeks of barracks life, the recruit might be inclined to doubt the "bonne foi" of the humbleness of home and consider the cubicle the most humble place on earth.

Instead of the silky smoothness of Wamsutta's 90x103 deluxe sheets you bunk between standard stenciled USNH or NNMC or NMD. Turn your head and on your pillow case is the boldly penciled figure "103," which merely indicates that there are 102 more like it in stock. North Star 100% virgin wool blankets were part of your past—your future is covered with harsh (but warm) semi-white material trimmed in blue with Medical Department lettering its way across the center of your bunk.

If you happen to retire at 2130, 30 minutes later your slumber is rocked by "Ten o'clock, lights out." Now you're awake. That is not a bed-side, radio-perculator-alarmclock-shower lamp shining in your eyes. Instead, it's the red beam from a bulb that shows you where to go in case of fire. To escape that infernal ray, you can either smother 'neath the polliw, wear colored glasses, put your feet where your head was (a very neat trick) or get up, move the bunk, during which process you knock over a chair, waste basket and 2 ash trays... at 0200. But don't unscrew that little red bulb.

Instead of a Dagwood 'special' in a cozy kitchen at midnight, you stumble to the scuttlebutt, which can be heard through the dorm every time it turns on and shuts off... sounds something like a tractor taking a graveled hill in low gear. But just fumble through the dark to a spot where the floor vibrates and there's the fountain. On your retreat to the bunk you will undoubtedly run into and apologize to at least four open locker doors, a couple of fire extinguishers and a light cord.

However, WE ARE HERE BECAUSE WE LIKE IT—On that we'll all agree.

Personals

Joy Shrader has mastered a left-hand technique for tennis enthusiasts with a sprained right hand.

Phyllis McPeck is now Mrs. Bilbo. We join Naval Dental School in saying "Visit us often".

Speaking of Dental, I'm convinced there's something winning about their smiles. Now Liz Berry and Bart have added their names to those banded couples. 'For just a smile, You may walk that Aisle.'

Peggy Drum tried a round of golf while Holidaying in Philadelphia. Felt as if she had been clubbed across the shoulder the following day.

Let's take to the woods. Barbara Winters is learning to fire a pistol. If BuPers hears of this, we may have to give hip measurement for gear issue 'come the war'. One sequined holster coming up.

Within a week Peggy Igou was visited by her parents (and fiancé), made her debut into the 21st year of life, then drew her first tour of night duty.

Meacham flew the country on leave. To sum all accounts of the vacation, she was just plane happy.

Millie was honored with a candle-light reception last week. That was a fine birthday party you gals planned, too. Entertainment was supplied by Poncho at the Piano. By the way, Poncho, did anyone eat that salad you prepared from the foliage and centerpiece?

Not Much Research Involved

By J. P. Walsh

On the Research picnic: It was a fine picnic tho I was too close to the beer to have kept a reporter's sharp eye on all proceedings. I do remember the baseball game—a free for all between those who played by the rules and those who had a more spirited approach. It was married versus singles supervised by TILLMAN—in charge of athletics (a post that has only a formal significance once the beer starts flowing). ZIPPERI was the star clown. It was irrelevant at the time but the married men won. The sack race—a happy union of spirits and sport on a rough track of gulleys and humps. GARNER and NIGH won in the men's race. JACK JAMES won the ladies. The picnic was best for food and drink supervised by HMC TOLER, assisted by GOEPFERT, S M A R T, SMITH, VAN BELOIS and SANCHES. Most remarkable was the cold beer, so rare on a picnic on a day in June.

On the dance: Elegant as a senior banquet and the cause of nearly as much awe. It was a relief to find no steaming curry in the chafing dishes on such a warm evening, and the chow line was relaxing comedy after acting up to the cut flowers and silver cutlery all evening. There is a certain security in not straying too far from our way of life. The committee's gambol in to gracious living found few wanting in decorum tho there were some cries of outraged innocence from surprising quarters at the inevitable few inelegancies of conversation, such reaction seem a shade bourgeois since spirited banter is more a part of our lives than cut flowers, or GROSS in a mess-jacket (too large but he wore it well).

On the pertinent Problems Pane: In the face of world problems it seems an impertinence to offer a solution, so the panel has taken up a limpid existence at Great Falls evenings. SWEENEY and JONES doing a revised Susan and The Elders, TETER reading Quick to the Colonel's daughter HOLDERMAN reading the "Cardinal" to be with the best seller and VAN BELOIS transfixed by the local topography. It is also interesting to contemplate people scrambling over the rocks like ancient cave-dwellers. Pleasant if you find no moral for the future in such a sight.

still together, following a sprained ligament.

Lost

One seersucker belt in the vicinity of the laundry lines. Made to fit Cooper's waist.

1/8 inch of shoe leather by Grace Travato during Bethesda Street Dance!

Operation Coke Machine

This necessitates mustering at least 6 hands and 6 feet... holding the machine at a 45 degree angle... inserting the coin and holding your breath. Sometime you get 2 nickels for one... sometimes you get no coke for 2 nickels... sometime someone may lose a big toe. At 5c a toe or 25c a foot, who wants the paws that refresh, who wants the paws that refresh.

Farewell to a Gem

Our titian tressed Irish beauty, and lassie of the Murphy's of Erin, was honored on July 5th with a

Sports In Brief

By C. Karolezk

Med. School came out to win their second victory of the year by defeating the "green jerseys" of NMRI's hard luck team. This action relieved Palmer's Med. School Staff of supporting all 8 teams on the bottom of the ladder and places them in 7th position.

Carmen Petix led an aggressive Commissary team to victory over Lab. 14 after 10 innings of guerilla warfare. This places Commissary once more directly behind the leading NH team.

Tough luck to P. Cook, A. S. Tong, HM3 Mercer, who gave their best at the PRNC tournaments but didn't quite make the grade. Mercer managed to conquer his 1st opponent but just barely was beaten in his next follow up match. Cook, managed to go one better, taking two victories before admitting defeat. Tough competition in this vicinity, podner!

Pretty Perk—Joan Caulfield models a new type swimming suit that she'll wear in her forthcoming musical, "The Petty Girl". In case you're interested, men, the suit is made of shired nylon.

Pitching Stardust

By C. Karolezk

This brief but adequate suspension of play gives a chance for your's truly to bury himself in Spalding's official softball rulebook of 1950. As stated before, HMC Martin, located at the Recreation Building, has these booklets available and they may prove useful not only to the game umpires but also the team captains.

Games in the past have been running quite smoothly with very few disputes or arguments. However, there are a few noticeable rules that might do some good if published; so here goes:

1. No team shall be permitted to start or continue a game with less than NINE players.
2. Pitching distance shall be 46 feet except for girls for whom the distance shall be 35 feet. (I hope this doesn't lead to an all out effort on the part of team managers to sign up girl players for the starting line up. But who knows, NMRI did it!)
3. It is a regulation game if it be called by the umpire on account of darkness, rain, fire, panic, or other causes (does not include calling the game on payday night) which places the players in peril, provided 5 or more innings have been played by each side.
4. A base-runner may have another player run for him by and with the consent of the opposing captain.
5. If but one umpire be assigned, his duties and jurisdiction shall extend to all points, and he shall be permitted to take his stand in any part of the field that in his opinion will best enable him to discharge his duties.

And now, if I might, I would like to extend a bit of good news. As you glance over this column, this reporter shall be situated in his cozy "beach chair" on the sands of Lake Michigan. (No, I haven't been transferred to Great Lakes).

There comes a time in each man's life when he must return to his native haunts, and so I too have been called back to the city that made a certain beer famous (or vice versa)—Milwaukee. But never fear—I shall return!

During my absence, I hope and know, that the second round softball league shall go into full swing; that Tong and Shorty Powell will continue to slice away their unique back hands; that Bruce Tillman may find a will and a way to get back out for the varsity team and Parris's "blue jerseys," from Commissary, will again make their bid for top place in the softball league. (We hope they have all recovered from the Commissary picnic held a few weeks ago).

And now—Goodbye! I'll see ya, gang!

NAVY BELLES

(continued from page 9)

toast, dinner, corsage, favorite song requests and later, a wonderful surprise party at the quarters, prior to her departure for U. S. Naval Dispensary, Cleveland, Ohio, the next day. 'Twas Mary Murphy's night and there was music in the air. Did me heart good to see everyone sharing happy hours together for the first time in many weeks. Wherever Mary went, happiness was shor'n to go. For over five years her smile and conscientious faith have been like a golden wand to those she met at Bethesda,

Tennis Champions

Receiving their trophies from the Commanding Officers, are NNMC's Tennis Champions and Runners-up. Reading from left to right are CDR B. W. Oesterling, DC, USN, Doubles Winner; LTJG C. S. Anderson, DC, USN, Singles and Doubles Winner; RADM Willcutts; LTJG D. P. Jackson, MC, USN, Doubles Runner-up; and HM1 P. E. Cook, USN, Singles and Doubles Runner-up.

Admirals Suffer Naval Heavy Losses To School Of Marines, RecSta Hospital Administration

By J. C. Woods

In the last two league games the Admirals have proven themselves effective in giving the other teams batting practice. The Receiving Station sailors turned the ball diamond into a shooting gallery in a recent... duel?

The Admirals couldn't even bring a run across the plate and stood by to watch their rivals bat in twenty-four runs on twenty-two hits. Walks and errors played their part in handing the Ads, a bitter defeat in this uneventful nine inning melee. ("It was a glorious defeat!")

The sailors hadn't completely recovered when they went down to face the mighty Quantico Marines. Again the sailors were bombarded by hits, and cursed by errors. The marines chalked up six runs in the first three innings to prove who was boss. Then, in the 4th inning, Tom Brothers singled to center field for the Ads and was later scored by Beano Robert's double to left field. Holding the Marines scoreless for the next two innings it looked as if the Ads might make a comeback. But somewhere that hope was lost when the MarMen drove in six more runs in the following innings, and held the Admirals to their one run.

After their brilliant start it is hard to say just what happened to the home team. Fortunately the league has just started and the boys still have plenty of time to make up for it. What do you say Ads?

By Ray W. Conrad

We are justly proud of the course of instruction offered at our school and are constantly working to improve upon the instruction material and teaching methods. In keeping with this policy, the enlisted members of the teaching staff are now being assigned to the School for Naval Instructors, South Annex, Naval Station, Norfolk, Va. At weekly intervals, during the two months in which we have no classes here, these men are receiving a months instruction in teaching methods at naval schools.

Our staff, as you know, includes several excellent civilian teachers who have been introduced to you from time to time through this medium. Now we would like you to know James A. BELL, A. B., A. M., Ph. D., LL. B., president emeritus of Southeastern University, Washington, D. C. Dr. Bell was president of that institution of learning from 1922 until 1946. Here at the Naval School of Hospital Administration he teaches effective speaking to the officer students, and with the aid of a wire recorder, does a superb job of improving upon their public speaking. Dr. Bell has been doing similar work in the field of radio since 1945.

In the same vein of improvement of trainor and trainee we have offered this year for the first time a course in the psychology of teaching. Walcott H. BEATTY, A. M., Assistant Professor of Education,

Sport Scope

By J. C. Woods

On the road to Mandalay, flying fishes play. It's too bad NNMC Admirals can't do the same. After a very promising start, Ads have dropped two games by overwhelming scores. Having once beaten the Receiving Station the local sailors set out on a road for a repeat performance. They performed allright, but never repeat it they had better on the road. The Receiving Station crew edged them out 24-0.

All over the U. S. people are echoing the same cry: "What happened to the real baseball?" Timers will remember the time when an umpire wouldn't step on the field without a ten thousand dollar insurance policy in his pocket. Still more will recall a tear filled eye and trobbing the spirit of the players of gone-by; of how Walter Johnson would go fifteen innings without faltering, and the mighty Ruth, always giving the fan a little gesture of appreciation, humor. Yes, this true baseball changed quite a bit in the last decades; like football it has become too methodical, involving too many technicalities for the average fan to comprehend or attempt to do. Many people complained of the cent two and three platoon system being used in football, nevertheless the platoon system has become dominant throughout the game. And fortunately there is nothing people can do about it, except watch the games with decreased enthusiasm.

Ben Hogan's dramatic return to the golfing circles has won him admiration of many, but not about all.

Joltin Joe DiMaggio's career first base was short lived in outfield. The question now is "How much longer will he last in the outfield?"

The Washington Senators are to be holding their own, they are the only team in fifth place in American League.

Meanwhile the Detroit Tigers are still maintaining first place in that league. Their only threat is the Senators... the ones in progress that is (they may pass draft bill).

A famous man once said "Horses are horses". No one has proven him wrong since.

University of Maryland is a newcomer to our staff and has finished what has been described by the students as an unusually good guide to better understanding of student's problems and needs. In addition to his work here and at the university, Mr. Beatty works with teacher groups throughout the country helping them to understand work with students.

The Uniform Code of Military Justice (Public Law No. 500, Congress) appears in the Navy Department Bulletin of 15 June 1950 or may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. Since we are presumed to have knowledge of law, and ignorance of it is not a sufficient defense in courts-martial it is incumbent upon everyone in the naval service to become familiar with the provisions of this law.

Whether or not the statement "Your manner is so loud I can hear what you're saying" is a turn of an axiom, many of us are guilty of being its sponsor.

Refreshments On The Course

The new snack bar is for tired and weary golfers. After nine take five for a coke or ice cream. The bar also serves sandwiches, soda, and milk shakes.

News Shorts from The Editor's Desk

Due to the shortage of physicians, dentists and nurses to meet present day obligations, the Surgeon General asks that members of the inactive Naval Reserve volunteer immediately for extended active duty. Medical and Dental officers in the ranks of Commander and below and nurses in the ranks of Lieutenant and below will be accepted.

Commander Frank E. Frates, USN, will attend a graduate course on Education at Fordham University, New York, starting in September.

A new class of twenty-one naval dental officers convened recently at the Naval Dental School. Of this number, sixteen are taking the General Postgraduate Course; five are taking the specialized course on Prosthodontia; and two are taking the specialized course on Oral Surgery. In addition there are twenty-three dental interns at the NDS who will complete their year internship in August 1950.

Commander Frank M. Kyes, DC, USN, has been invited to appear before the Cincinnati Dental Society, Cincinnati, Ohio, on September 11, 1950 as guest essayist. Commander Kyes will discuss the "Faults in Denture Construction."

Whenever Mr. Bailey, in charge of the Navy Exchange fountains, hears one of the girls grumbling over her work he has the perfect comeback—"SMILE".

(Continued on page 4)

Seven EM Graduate From Pharmacy

Seven enlisted men have graduated from the Naval Medical Center's nine month course in pharmacy. The school is directed by Lt. C. G. Brooks, MSC, USN.

The course of instruction consisted of the principals of pharmacy, operating and dispensing of pharmacy, inorganic pharmacology, organic pharmacology, materia medica and pharmaceutical arithmetic. Presentation of the certificates was made by Captain J. L. Enders, Commanding Officer, NMS, the following: J. F. Griffin, HMC; H. E. Hicks, HMC; G. B. Lathrop, HMC; F. C. O'Connor, HMC; H. L. Penny, HMC; E. M. Piro, HMC; C. W. Pierce, HMC; R. Statler, HMC; T. E. Walters, HMC; V. B. White, HMC; E. O. Williams, HMC.

New Parking Lot For NNMC

Extensive work is in progress to alleviate the parking situation here at the Center. Focal points of congestion are around the Recreation Hall where the Commissioned Officers' Mess, CPO Club, Golf Course and swimming pool bring many additional cars. There are two new parking lots being constructed; the one shown above, opposite barracks 112 and one on the opposite side of the present parking spaces for the Recreation Hall facilities.

CAPT Harris New Chief Of Obs. And Gyn.

Captain L. N. Harris, MC, USN, recently relieved Captain Paul Peterson, MC, USN, as Chief of Obstetrics and Gynecology. Captain Harris comes from the Naval Hospital, Great Lakes.

Upon completion of studies at the Universities of Texas and Pennsylvania, Captain Harris, a native of Texas, interned in the Naval Medical Corps at the Naval Hospital, San Diego. This was in 1931. Following this the captain went aboard the USS Colorado and later, the Destroyer Division 6. Then came duty at the Main Navy Dispensary just before the war and during the war he served with the Fleet Marine Force. After the cessation of hostilities, Captain Harris was at the Bureau of Medicine and Surgery and Great Lakes.

Before the war, Captain Harris took up the study of obstetrics and gynecology and is now a Diplomate of the American Board of Obstetrics and Gynecology and also a Fellow of the American College of Surgeons.

Chaplain Morton Left For USS Cape Esperance

LT Frank R. Morton (ChC) USN has been detached from the Medical Center and is on his way to the USS Cape Esperance, CVE 88. Chaplain Morton, just prior to receiving these orders, had orders for a year of postgraduate training at the Divinity School, Harvard University.

The popular chaplain had been here for two years. Before coming here he was at American Samoa for two years and he also saw duty with the CB's and the Coast Guard during the war. From his home state of Pennsylvania, he entered the Navy in 1943 as a reserve but transferred to the regular Navy in 1944.

Chaplain Morton married more than a few couples here and for some of them, he baptized their first child. He will certainly be missed by these and for his efforts in Center Choral activities. And, in a lighter vein, his fragrant pipe.

The chaplain and his family have returned to Aliquippa, Pennsylvania, his hometown, where Mrs. Morton will make her home.

ENS.(HP) USNR Eligible For Training Duty

A limited number of billets are open in Naval hospitals to undergraduate medical students holding the rank of Ensign (HP) U.S. Naval Reserve who desire to volunteer for 14 days active training duty with pay during the months of July, August, and September 1950.

Eligible are members and non-members of Volunteer Naval Reserve Units who will be assigned to a hospital nearest their home. Provisions have been made for the

(Continued on page 5)

Staff Dance To Be Held At Nat'l Press Club

For the first time in several years, the monthly staff dance will be held off the Center. As you may have noted from the posters, this one will be at the National Press Club, 14th and F, N. W.

Navy transportation will be available to and from the ballroom. The bus will leave NNMC from the front of Building 1 at 2000. If you desire to go this way please contact Chief Burwell in Educational Services or John Giragosian, HMI, in Blood Chemistry so that adequate transportation may be obtained.

Free soft drinks will be served and the cocktail lounge will remain open. A number of girls have been invited and the Navy band will again furnish the music.

Don't forget to arrange for transportation and have a good time.

New Clothing Allowance Announced

Effective July 1, 1950 the following explanation interprets in part the procedure and payment of cash clothing allowances to enlisted members (men and women) of the regular Navy.

Navy enlisted personnel are no longer entitled to the \$20-16.50-12.00 quarterly maintenance formerly payable on the first day of each quarter. Instead each member is entitled to either a basic or standard maintenance allowance. This represents a monthly amount to be computed in each payday.

Basic maintenance accrues for each person beginning with the day following the date (day of enlistment excluded) of completion of six months active duty, subsequent to last entitlement initial or special clothing allowance. Example: a member enlists on 1 January 1950, BMA is due beginning 2 July 1950.

Standard maintenance allowance accrues for each member beginning the day following the date of completion of 36 months active duty subsequent to the date of last entitlement of initial or special clothing allowance. Example: a member enlists on 6 September 1947. He is entitled to BMA beginning 1 July 1950 through 6 September 1950. Beginning 7 September 1950 he is entitled to the Standard Maintenance.

The monthly rates for the basic and standard maintenance allowances are as follows:

	Basic	Standard
CPOs and Band Members	\$6.00	6.60
Women	4.50	6.00
Men	3.60	4.20

Flowers On The Patio

If the sun stays out long enough, you can enjoy your lunch out on the patio adjoining the ship's cafeteria where you can have the pleasantness of fresh air and the additional pleasure of the multi-colored flowers that line the walls of the patio.

The Chaplain's Corner

Faith In The Future

By Chaplain Frank R. Morton

Recently the Town Meeting of The Air carried a radio program in which four young people, including Jackie Robinson and a daughter of Bruce Barton, spoke hopefully of the future. Most of you who read this NEWS are young. How do you feel about the future? Do you feel confident of success and happiness? Are there some hurdles, not of your making, that seem high as you race toward them? Or do you like them high enough to bring out your best?

It seems to me that our faith in our future will be greatly helped by three things, our confidence in ourselves, our confidence in others, and our confidence in God.

How can we best have confidence in ourselves? How much faith do you have in yourself? If you don't believe in yourself, who will? Take a look at yourself. Size up your qualifications, your personal assets and debts, your shortcomings and your excellences. How high is your rating? How can you improve it?

Now do this: study your ambitions as well as your achievements and weigh carefully what you seriously think you have it in you to become. Give yourself credit for what you are trying to be as well as for what you have already scored in the game of life. Have confidence in your undeveloped powers—and set to work to develop them now—and keep at it hard and long. You'll arrive.

Have confidence in your friends too. Some of them may not seem to be worth it. Maybe you can help them. How does cooperation add to our confidence in others? Many will be worthy of your fullest confidence. Blind yourself to them. Study their strong points: evaluate the influences that seem to have helped them most. Can you bring some of those good influences into your life?

But be very confident about God. Why is this so important? That confidence can help you over many a hard place and light your path in moments of uncertainty. The Psalmist had radiantly confident words about God: "Thou art my trust from my youth." Security can be yours through Him: "The Lord shall be thy confidence, and shall keep thy foot from being taken." Furthermore, He can help us to happiness: "Whoso trusteth in the Lord, happy is he."

But let's keep a good conscience for our future's sake. "If our heart condemn us not, then have we confidence toward God."

You have much of your future in your own hands now! From, *The Link*, April-May 1950.

Salt Shaker Sailor

Dear Bethesda,

Task force...

Last night, when I secured, the ocean stretched out to the sky, calm and smooth. But this morning, I saw the ships coming over the horizon. Row after row. In perfect formation. They seemed to appear from nowhere. The Roosevelt, The Randolph, The Missouri, The Providence, The Juno, and a host of destroyers.

They came forward slowly, like a grazing herd of cattle. Steady. Big. Ominous. Then the Roosevelt broke formation and headed our way. The towering mass of steel pulled up along side of us. We looked like a pigmy next to an amazon. The PA blasted: "All hands stand-by for transfer at sea."

A chief boatsun's mate shot a nylon line to the Roosevelt and they pulled it in until the larger hauser that was attached to the end of the nylon line was secured to the carrier's bulkhead. Along with the hauser went a "sound powered telephone" for communication between the ships. This hauser, secured to the bulkhead on the Roosevelt was held taut by the men on our ship. On the hauser was attached a stretcher with a smaller line at the head and end. The stretcher was pulled back and forth, from one ship to the other, transferring patients or supplies. Much the same procedure was enacted when refueling.

After the Roosevelt, each ship pulled up in its turn, until the whole task force was serviced. And I cannot say that I was crying to see them leave when they finally did, for my hands were all blistered from heaving on the line. They faded over the horizon and we were left looking after them as a person does on a railroad platform when the train fades from sight. I realized then that although this was a big ocean, it wasn't too big.

We were on our way to Veague, where our ships were already bombarding the island in preparation for the mock invasion by the marines. Our ship would stand-by, a mile or so out, to receive casualties.

Your Salt,
A. Sailor

"Devil Dog" Famed Marine Hero Passes

BRIG. GEN. Frank Whitehead USMC Ret., famed Marine Corps officer hero passed away at the Naval Hospital here July 21, 1950.

The General who was 62 lived at 5231 Massachusettes Avenue, NW, and is survived by his widow Mrs. Eleanor Whitehead.

General Whitehead rose through the ranks from an enlisted man to Brig. General after nearly four decades in the Marine Corps. He joined the service in 1908 and was an enlisted man until 1917.

During World War I he served overseas as Regimental Adjutant with the famed (Devil Dogs) Fifth Marine Regiment. RADM Willcutts was regimental surgeon of the Fifth Marines at that time.

For this duty the tough but kind-hearted General received the Purple Heart, Army Distinguished Service Cross, Navy Cross and French Croix de Guerre with Gold Star.

During his career he served at many shore stations in this country and on several Navy ships. He also took parts in the Dominican Republic and Second Nicaraguan Campaigns.

During World War II General Whitehead served with the Commander in Chief, United States Fleet under Admiral Ernest J. King and the Division of Plans and Policies, Marine Corps Headquarters.

He was the first Marine Corps officer to serve as Commandant of the Army Industrial College. He held that post from February 1941 to January 1942.

He was retired May 1944 but was retained on active duty until January 1, 1946.

Funeral Services were held in the Fort Meyer Chapel at 1100 July 25 with burial in the Arlington National Cemetery.

Diaper Derby

Dental takes the limelight this column with three new arrivals for the North Wing. The first, George Dennis Ogden, reported aboard the seventh. The father, LT W. O. Ogden, is on staff. George Penner, III, arrived on July 10 for George Penner, who is also on staff. The third arrival is Robert J. Leupold, Jr., who was born on the eleventh. The father, LTJG R. J. Leupold, is in the Dental Intern Class.

The Research Institute has its spot also with two new boys. Ronald Robert Maestas was born on July 16. Bennis Maestas, HMI, is the father. For LTJG and Mrs. Harold T. Merryman, a boy on July 21.

USNH reports two boys also. For LTJG and Mrs. James M. Jones, a boy on the twenty-second and also a boy for CDR and Mrs. Samuel V. Thompson, on July 12.

Writers Wanted

The Editors of the NEWS have been asked by several people requirements were needed to write for the paper. They seemed somewhat aghast when told that the requirements were no stiffer than: any writing paper, pen, legible handwriting, something to say and saying it with interest and sincerity were possessors of all the requirements. After repeated queries, we have decided to make public our news requirements, and wants.

News Policy: 1. We are primarily interested in local material the station, station personnel and their dependents, and the achievements of the Medical Department of the Navy. 2. Our policy regards to columns is that they must pertain to the activity represented (very little free lance writing here for the correspondents are assigned by the Commands). 3. We are not a crusading paper. We not taken the troubles of the world on our shoulders; we do not slander or prejudices. 4. We are interested in presenting as much the local news of all activities as possible, for that reason the news stories should be limited in length, whereas the features and interesting material may expand in reasonable proportion of column. 5. Credit in a by-line is given to all those who desire it. 6. We material from Naval personnel, patients, and civilian personnel.

Requirements: 1. We like to receive typed, double-spaced, and margined scripts, although, when typewriters are not available, written manuscripts are acceptable. 2. All news stories must be accurate. We feel that a story half accurate is an injustice to the reader. 3. There is always a demand for humor, rich, and savory, while the slap stick is held in minimal dosages. 4. The story can be as good as you write it is its writing which puts it across. We want adult writing. Clear, and flowery language only where and when flowery language indicated as a necessity to the story's success. 5. We use good poetry. Poetry must be technically sound, having meter and form. Rhyme, if necessary, although it is desirable (people seldom think of blank verse being poetry).

Wants: 1. Feature stories are always wanted and hold a special spot in our paper. 2. News tips are sought. This is a large station with the many Commands which compose it makes it difficult to have all related to us. Such things as marriages are seldom received by our station unless the person himself tells us about it. 3. Any brief news stories, social event, or personal that would seem to be meritorious of publication is sought for inclusion in our "News Shorts" column. 4. Poetry and humorous verse is always considered. 5. Jokes and sayings are in great demand, for they are used as fillers and are of interest to many people. We will consider anything from one joke page full. 6. The NEWS has no regular cartoonist. We welcome anything in this line but must warn that the preference is outlined and the action is preferably to be played about the foibles of the being.

We have stated our policy, requirements and needs. If you are interested in writing, start now, there is a forest of interesting bits, and ends right around you that will serve as an unexhaustible reservoir for the NEWS is situated in the Recreation Building, Extension 672. R. J. Bourgea for further information or if you want to find out the hood of a topic you have in mind.

The Perambulating Perambulator

"Go West Young Man" was a popular saying once, in all seasons, but now, with summer's ovens red hot, the yell is, "take to the woods." In this sylvan slant, we have two suggestions, other than Rock Park, which was mentioned in the last issue. They are, Great Falls Potomac and Sugar Loaf Mountain.

To get to Great Falls take the Canal Road near the Key Bridge "M" Street and follow that road past the Glen Echo Amusement (stop here for a roller coaster ride, or a dip in the pool). It is a nine mile ride, but it is pleasant and cool. Once there you can leisurely walk along the canal, or choose a small island as a picnic spot. With a belly full of chow, and a strong back, you can make your path through the woods to the great boulders overlooking the falls. Once here, you wonder what it must have been like in the old days when Indians, bears and mountain lion stalked the woods. You shudder and return to this century. For the less hardy, an explorer minded people there is a beaten track which, although paved with footbridges, is still rough enough. You go over narrow where the water swirls down in a mad frenzy of foam and fury, once you reach the river, to just sit and watch the river glide by.

Sugar Loaf Mountain is another place where the city dweller can find a measure of serenity and beauty in nature. On a clear day, you can see for miles, the valleys and farms in all directions. From the highway go north on 240 to Rockville, then still on 240, about three or four miles out of Gaithersburg, you bear left on 121 and follow signs from the highway (about four miles from 240). Here, too, there are tables for picnics, a truck at the third view sells soft drinks. There are steps that lead to the summit, to the little plateau from which the best views can be had.

There is a concert at the Watergate at 8:30 P.M. on August 1. The concert is entitled "L'Enfant Birthday Memorial Concert". The Watergate has to close because of so few people patronizing it. This is regrettable for there are so many good recitals, concerts and operas which are held here. The Watergate offers high class performances at very low prices. It is in the open air which makes it that much the better for air conditioning. It is located on the Potomac, directly in back of the Lincoln Memorial.

Basil Rathbone is playing at the Olney Theatre in "The Boy", August 8 through August 13. The play starts at 8:30 P.M. and ends at 10:30 P.M. (from Rockville, then Route 97 to Olney).

In Plant Training For NSHA Students

The techniques of the commissary manager are many and varied. LT Smith, Commissary Officer, with the able assistance of Chief R. Martin, presents a demonstration of the proper method of slicing meat to insure maximum consumable portions with minimum waste.

The inspection by U. S. Inspectors is complete. Shown in this picture is a group of officer students and employees of Schludenburg and Kurdle Company watching a U. S. Inspector examine the viscera of a steer.

Another step in the preparation of meat for human food is shown here as a U. S. Inspector looks for evidence of tuberculosis in the heads of hogs and explains this procedure to two student officers during the "In-Plant Tour" at Schludenburg and Kurdle Company.

By Ray W. CONRAD
During the period of the last three weeks in May, the students of hospital administration participated in practical work in commissary management which LCDR L. BOND, MSC, USN, the instructor, calls the "In-Plant Training." Mr. Bond explains this term to mean, the active participation of the students in the operation of the commissary department, and visitation to civilian organizations engaged in the business of food production. It is common knowledge that those who produce, prepare, and market food products keep busy hours. Student participation in this scheme proved no exception

to this tradition. The break of dawn found them reporting for instruction in the business of learning all they could about the sources of foods used in the general mess of a naval hospital, the standards of quality required by the Federal Government, and finally, how to render these foods palatable for serving to patients and crew. The efforts of many were combined to bring this lesson to these potential commissary officers and the fine spirit of cooperation demonstrated by the staff of the Commissary Department, U. S. Naval Hospital, NNMC, Bethesda, Md., cannot be expressed in mere words. An "esprit de corps" might be

responsible for a certain amount of cooperation between organizations of the Navy, but downright kindness and a desire to do good in the interest of service to the United States can be the only explanation for the splendid treatment afforded this "In-Plant Training" group by the two civilian companies participating. Reports from every source are uniform in their opinions that the SCHLUDENBURG & KURDLE COMPANY, 3800 East Baltimore Street, Baltimore, Md., and the R. L. ANDERSON COMPANY, 1316 5th Street, N. E., Washington, D. C., have rendered immeasurable service to this cause not only through fine

presentation of their respective enterprises, but also through the cooperative manner in which they participated in discussions and answered the many questions directed towards them by the students. At Schludenburg and Kurdle Company, both officer and enlisted students were permitted to follow the complete process of meat ante-mortem inspection, slaughter, post-mortem inspection and like techniques, from the time livestock entered the plant until it was rendered ready for packing. The constant and thorough inspections by the U. S. Inspectors of the Bureau of Animal Industry, Department of

Agriculture, demonstrated vividly the length to which the Government goes to insure maximum safety of selection of meat products destined for foreign or inter-state commerce. The R. L. Anderson Company, dealers in wholesale produce, left no stone unturned when illustrating modern marketing methods in handling fresh produce. The receipt, inspection, refrigeration techniques, and final disposition of fresh fruits and vegetables was the subject which the officer students learned here to later apply to commissary management, a vital and integral division of naval hospital administration.

Inspectors of the Bureau of Animal Industry, Department of Agriculture, carefully examine all meats destined for human consumption both before and after slaughter. One of these inspectors is shown here at the Schludenburg and Kurdle Company, Baltimore, Md., pointing out the reasons for condemning this particular hog carcass to two officers of the class in commissary management.

At the R. L. Anderson Company student officers are acquainted with the wholesale marketing of fresh fruits and vegetables. Mr. Ed. WIDMAFER, owner of the company, assisted by his brother, Mr. Will WIDMAYER, are shown here lecturing to officers of the class on this subject. The personal contributions of Mr. Ed Widmayer were invaluable to the students in learning about fresh produce marketing methods. All members of "Produce Row" were most cooperative.

Navy Belles

By Nadiene Calhoun
The time has come the Watrus said, to talk of many things. Y. T. is far from a qualified quill driver. Scouting for and writing news is an entirely new experience. A feature article about women often causes heart aches and head aches; however, such has been an exception with the Waves at this station. Including all female groups with whom I have worked and lived there has never been a more cooperative nor a more versatile group. Their individual likes and

dislikes, their daily activities at work and play, sports, fun or tears, errors and successes have supplied the fountain of writing and kept it from ever being dry. July 1950 marks the time for final entries to be logged before the good ship BELLE weighs anchor. **Social**
The welcome mat is out for the staff to dance. You can either take the first flying saucer from here to D. C. or be in front of Building No. 1 at 2000 on Friday, 4 August, and board a special bus destined for the National Press Association Building where there will be dancing from 2100 to 0100 in the Press Club. Come along or bring your best friend. Would like to see many Belles at the Ball.

News Shorts

(Continued from P. 1)

The Naval Dental School has just completed a course in Dental Technician Prosthetic for dental corpsmen and graduation exercises were held in the auditorium at 1000 Friday, 21 July 1950.

The following speakers appeared on the program: LCDR Harold R. Superko, DC USN; Capt. Robert P. Irons, DC USN, Head of Dental Personal Branch, Bureau of Medicine and Surgery—guest speaker; and LT Frank R. Morton, CHC USN.

Presentation of certificates were made by Captain Louis D. Mitchell, DC, USN, Commanding Officer, Naval Dental School, National Naval Medical Center, Bethesda, Maryland.

In all, there were sixty enlisted men to receive certificates.

nurse in the hospital here Mrs. Layton says she will leave the Navy soon for a life long vocation—housewife. Chief Layton is in P & A.

Pictured above is the R. L. Halmon and Co. steam shovel excavating the site for a new building behind the commissary. The structure will house a two million volt generator for X-ray.

The USS Benevolence claims CDR Lester J. Pope from the Medical Service here. Dr. Pope was head of the Gastroenterology Department.

Dr. Pope has been stationed at the Center for nearly three years. He is certified by the American Board of Medicine and in his subspecialty of gastroenterology. The doctor will become the Chief of Medicine aboard the Benevolence.

CDR Thirl E. Jarrett has left for the USS Missouri (BB 63). Dr. Jarrett was on Medical Service here for about three years and served as an SOQ doctor during that time.

CDR Jarrett is a World War II veteran and has the Navy Cross for service with the First Marine Division at Guadalcanal.

Captain Louis D. Mitchell, DC, USN, administered the oath of Captain to Captain Alvin H. Grunewald, DC, USN, Wednesday when Captain Grunewald attained his present rank. Captains Mitchell and Grunewald are the Commanding Officer and the Executive Officer of NDS, respectively. Captain Grunewald had been selected for promotion earlier in the year.

The NH Medical Service has lost a host of doctors to other duty stations. Captain Frederick R. Lang, Assistant Chief of Medicine has been transferred to the USNH, Annapolis, Maryland to take the duties of Chief of Medicine there. CDR Williams C. Marsh, Chief of Dermatology has orders to the USS Benevolence. He is certified by the American Board of Dermatology. And still other transfers include Drs. R. T. Donelan to the USS Repose, E. M. Barczak to a destroyer, J. J. Dempsey to a cruiser in the 7th Fleet, and D. Singer to the Staff Military Sea Transport, Bremerhaven.

Both Navy, both NNMIC personnel. What happens when HMC Philip A. Layton meets LT Sue Tanner Layton at home as his wife? Now a

Blood Program Vital To Nation's Health, Security

During the last war we heard much about the Red Cross Blood Program, organized to meet the terrific needs of the military for plasma and blood. After the war Red Cross reorganized to meet the demand for blood in civilian medical practice and to serve as a bulwark against a major disaster of National Military Emergency.

In relation to the present military activity in Korea, General George Marshall, President of the National Red Cross, said, "The possible need for blood for our Military Forces is no longer a vague, shadowy possibility. It is a concrete fact." Recently, W. Stuart Symington, Chairman of the National Security Resources Board, has also reaffirmed the continuing need for development and expansion of the nation-wide blood program for the security of the Nation both for peacetime use and in National Defense. He said, "The blood program of the American Red Cross is of paramount importance to the health of this Nation during peacetime and of equal importance to its security as we make plans for National Defense in this air atomic age."

With the need apparent, the National Red Cross is continuing with blood collecting and processing activities. Much Red Cross money is going into setting up stations and buying equipment to man these stations. Recently a new plastic lined machine which, in one continuous operation, processed blood into nine fractions in a matter of hours was acquired. This same operation formerly required several days.

As is the case with most other Red Cross programs and services, most of the personnel operating these blood donor units are volunteers. A small professional and technical paid staff is helped by hundreds of volunteers who assist in many operations—recruiting donors are volunteers also, and it is in this area that many of us can serve.

CAPT. G. N. Raines, Chief of the Neuro Psychiatry Department, has been transferred to the Bureau of Medicine and Surgery, but will have TAD here as a consultant.

Distinguished Service Medal To RADM Rault

Rear Admiral Clemens V. Rault, Dental Corps, USN, (Ret.) received the Navy Distinguished Service Medal for "exceptionally meritorious service" while serving as Assistant Chief of the Bureau of Medicine and Surgery for Dentistry from February, 1943 through June, 1950.

The presentation was made by Secretary of the Navy Francis P. Matthews at a ceremony attended by top Navy Department officials in Secretary Matthews' office in the Pentagon.

Rear Admiral Rault, who voluntarily retired from active Naval Service on July 1, 1950, is now serving as Dean of the Georgetown University School of Dentistry, Washington, D. C.

The text of the citation for the Distinguished Service Medal presented Rear Admiral Rault reads:

"For exceptionally meritorious

service to the Government of the United States in a duty of great responsibility as Assistant Chief of the Bureau of Medicine and Surgery for Dentistry, during the period from February 1943 through June 1950. Discharging his duties with extraordinary foresight, both professional and military, during this period, Rear Admiral Rault was responsible for the planning and administration of dental service throughout the Navy. Under his capable and proficient direction, the Naval dental service was effectively adjusted to post-war requirements, including adaptation to National Unification policies, and was distinguished by maximum improvement in standards and availability of care. He was in large measure directly responsible for the development of the Naval Dental School to a postgraduate institution of world renown and for the attainment of the highest potential in the Dental Service as a supporting element of the Navy, in constant readiness to any demands made upon it. His valuable service to the Government and to the Navy reflects the highest credit upon Rear Admiral Rault and the United States Naval Service."

Rear Admiral Rault's Washington, D.C. address is 3017 Forty-fourth place, Northwest. A native of New Orleans, Louisiana, his official address is 721 Jackson Avenue, New Orleans.

Advancement In Rate Should Be Ultimate Goal For All Worthwhile Naval Personnel

For years before the recent war chief petty officers received certificates of permanent appointment upon promotion to that rate. Subsequent to the war this custom was revived and upon application to BUPERS certificates of permanent appointment were issued to cover the war years. The Department of Defense requested suggestions for the establishment of such a system of formal notification of appointment to other officer ratings as far back as June 1949. By BUPERS Circular Letter No. 82-50 a decision concerning the form to be used, and eligibility of persons for a certificate of appointment to petty officer ratings, was pronounced. This form is DD Form 216N. Commands were notified this certificate would be issued by them to all persons upon advancement to any petty officer rating up to and including appointment to chief petty officer. LCDR M. E. ZIMMERMAN, MSC, USN, the Commanding Officer, U.S. Naval School of Hospital Administration, is shown here presenting the new certificates to G. E. HACK, HMCA, USN, and other petty officers of the command to cover their last promotion. All future appointments will receive certificates of appointment from their respective commands throughout the military establishment.

Advancement in rating is the ultimate goal of every worthwhile member of the naval service and only constant study and sincere application to the task will prepare you for such advancement. The President has sounded the keynote which should awaken all hands when he addressed the Congress and asked for increased strength for the Armed Forces. Increase in size means increase in the rating structure. Voila.

Egyptian, Far East Doctors Here Recently

Dr. Ayoub Amer of Cairo, Egypt visited the Naval Dental School recently to observe the dental educational activities of a military establishment. He was taken on a general tour of the facilities of the Dental School. His visit was sponsored by the University of Pennsylvania Dental School.

From Bangkok, Siam came Dr. R. Ratanakom who visited the Naval Hospital. Items of particular interest to the doctor were the Hospital Administration program, mental hygiene, occupational therapy and the photographic department.

The National Institute of Health sponsored the visit of three doctors to the Naval Hospital. They were Dr. Hai Chow Ch'en, of China, Dr. H. Shama Sastroy, India and Dr. Mohamed Ilyas of India, all of whom were interested in the laboratory and diagnostic facilities of the Center.

Mr. Salah E. Refaat, Director of Works, Cairo, Egypt and Colonel Ghalet, Military Attache, Egyptian Embassy, both took a tour of the Center to see the type and materials of construction used in the structures of this command.

Argentina was represented at the Center recently in the person of Robert Nicholson who was interested in Obstetrics and Gynecology.

Crew's Library:

New Historical Novels Now At Crew's Library

IN WORLD ENOUGH TIME, Robert Penn Warren written a full bodied historical novel; the scene is Kentucky in 1820's and interest is centered murder and trial, the thoughts emotions of the murderer and justification for the crime.

THE STUBBORN HEART Frank Slaughter's sequel to popular IN A DARK GARRET has an exciting and romantic built around the Reconstruction era with its Carpetbaggers Klan, but giving special emphasis to the medicine and surgery of the time.

Troy, New York in the 1830's the setting for Samuel Hopkins Adams' latest, called SUNRISE SUNSET. The heroine is a book helper but marries the millionaire who turns out to be the villain of the book.

Kennedy's THE SUNLIT FIDELITY has a varied plot, the main theme being the beginnings of professional baseball in Brooklyn in 1858. There is an interesting view of New York City of that period and the heroine is an Irish colleen with the unbelievable name of Chantas O'Reilly.

Red School scuttlebutt

By Harry R. Fallers

As the number of people going leave and to other duty stations increases the amount of news material is diminishing. As a matter of fact, there is practically nothing legitimate on which to comment. Nevertheless, here goes nothing.

We can all be looking forward in near future to the collection of cigars from those on the third who have taken their examinations for advancement in ratings. Wish all those taking exams the best of luck.

Lou Kovarik has returned once again to his old love—Blood Collecting. Having stood many watches with Lou we can say that his technique in drawing blood is a sight which we shall not soon forget.

Cox, HM3, who worked in the Medical Department and who was pitcher for the Admiral's baseball team was separated from the naval service a week ago. Cox has returned to his home in Massachusetts.

Donald Meyers, HM2, who left Medical School about a year ago to go to sea came through here a visit last week. He is now returning to the west coast for further assignment.

After paying from fifteen to twenty-five cents for a cup of coffee her consistently over a period of years, Chief Erasmus has had enough. Now he buys his own coffee for a nickel a cup—enough of a odd man out stuff for the Chief. We don't blame him, either.

We will probably be gone when time comes but we should like have witnesses to see that everything is carried out. When the Boston Red Sox slip into fifth place and Washington Senators go into fourth place Spellman, HM2 is going to push a dead fish with his from one end of the passage on the third deck to the other. This is because Spellman is a ton fan and does not believe in scales.

Not Much Research Involved

By J. P. Walsh

People last week were justified in coming out of their own backyard for significant happenings. The backyard was nothing more than an insignificant pool of water.

This week's most interesting—The reopening of the Kit-habitant of local cafe society, Ivan, Beeman, Halsey, Zipperi, Budacki, etc.—Well attended with borrowed shoes and shirts and borrowed money—In a 10 Billion Dollar Week, 10 cents were free and ten dollars as approximately an illusion as ten billion.

There was also the opening of the High Bar devoted to relaxation. He felt the need for a counter balance to such occasions the re-opening of the Kit-Mar.

Worth mentioning—The experiments in a la Woman's Home Connection with summer eating which head steward polled in the scullery. Many didn't recognize the soup out from under its cocktail spoon of hot sauce. If his poll is accurate he must have allowed for loss due to the wind tunnel conditioning. Obviously an experiment in developing menus for sonic travels—Check the pan-

Personalities About The Center

Emily Louehrs

"Have a coke, please". "Gimme a ham sandwich". "Joe, black as mud". Those are all questions which have been asked of Emily Louehrs, known better as just plain "Emily". "I've seen a lot of changes and a lot of people come and go in my eight years here", said Emily. She misses being a plank owner by just a few months.

The whole town of Bethesda, in fact, has changed a lot since she came here thirty years ago. She remembers when the site of the Hot Shoppe held the Bethesda Bulletin and many other sites newly erected since then. Emily has stayed in Bethesda ever since she came from Rimersburg, Pennsylvania to join her husband who had found work here. "I'm not the traveling type", she declares. "Just rather watch the people come and go".

Home for Emily is on Fairmont Avenue. She has three grown children, all now married. They are, William, who owns a gas station on the Georgetown Road, Betty (Mrs. Raymond Ziska, who is an undertaker for Warner Humphrey in Silver Spring) and Katherine (Mrs. Forest King of Rockville).

Emily likes her job very much. She says that business has progressively picked up. She remembers when the only facility here was the small snack bar occupying the space now used for the Ship's Store, then followed longer opening hours for the bar, a cafeteria in the Recreation Building and its removal to replace the old snack bar on the hospital. She is presently working at the new snack bar on the golf course.

cakes, most successfully designed to resist flight.

The weather was not insignificant but to avoid depression it was best not to notice the tropical wetness. Rumor swapping replaced canasta as the indoor sport.—Heavy on the hysteria—Morning when it proved routine and ordinary came as a relief even on pancake days.

Certainly the newest Mr. Maestas when he read the Post the morning of his arrival, 17 July, felt already quite old.

Training Duty

(Continued from P. 1)

training of these officers on the various professional services.

Members of Volunteer Naval Reserve Units and non-members should submit applications to the Commandant of their home Naval District.

Quotas have been assigned to all Naval Districts within the continental United States including Potomac River Naval Command.

**Richard Worters
HM 2**

A true sportsman is this son of Massachusetts, Dick Worters. Practically any night, after he gets off work from the Print Shop, he may be found on the ballfield, or bowling downtown or enjoying some other type of sport. A large share of the credit goes to Dick for the football and softball teams the Print Shop has fielded. And work in a print shop is not easy.

Dick came in the Navy seven years ago from his hometown of Wakefield, Mass. He got his recruit training in Newport and learned his medical duties at HCS, Portsmouth, Va. D-day in Europe found Dick on an LST ferrying troops across the channel. He stayed in Europe until 1945 and then came back to Boston for duty at the Separation Center but shipped out again soon on the Wilkes-Barre, CL103. Graduating to a larger ship, he caught the Wisconsin, a battlewagon. While in port at Brooklyn, Dick's discharge came through and he got out. But "after a few weeks, I came back in. This is my kind of life."

So he wound up here for a course of instruction in printing and duplicating. After finishing his schooling, Dick stayed on as a staff man.

Naval School Of Hospital Administration

By Ray W. Conrad

Personnel of old MAT Class No. 2 who were retained on board until they had completed the professional examination for appointment to Ensign, Administration and Supply Section, Medical Service Corps, are now preparing to leave for their next duty stations. The examination was held on 17, 18 and 19 July, and about 50 candidates competed here at the Center, and which, in turn, created about 50 very relieved but anxious people.

Meanwhile, officer and enlisted personnel who will form Hospital Administration Class No. 12 and Medical Administrative Technician's Class No. 3 respectively, are arriving for these classes, which will commence the day after Labor Day. The condition of uncertainty throughout the world has added new impetus to enlarge the knowledge of students in the new classes. Although we ardently hope for peace-time application of our learnings, we shall be prepared for all eventualities.

We agree with CDR R. Plunkett, R.N., when he said, "The traditions of the Service are worthy of honor and respect, and while you remain in the Service it is your duty to try and live up to them."

**Nadiene Calhoun
HM 1**

If activity, drive, pleasantness, and friendliness were to be personified they would surely be centered in the person of Nadiene M. Calhoun, HM1 of the Naval Hospital. A combination of friendliness and activity are so rarely found, that in her they become an immediate passport to likeableness. In addition to all this, she has that certain quick wit and spark of humor which makes her one of the most popular WAVE'S on the Station.

Her interests are as varied as would be expected, their tentacles reach for music, philosophy, sports, drama and a myriad of other things. Navy Belles, her WAVE'S column claimed immediate recognition on its initial run in December of 1949. Since then it has continually grown in popularity and not only in popularity with other WAVES but also with the male personnel. She has applied herself with diligence, but also with wholehearted consent to produce a column which presented the days happenings in an enjoyable way.

Life began in an orderly manner for Nadiene in Varina, Iowa ("Where the tall corn grows... a state conducive to peace and contentment"). This order and properness took early markings on her. Since, she has arranged all things possible chronologically—her days, her plans and her hopes. "From my early days," she said, "I can never remember hating school." Proof of her statement is lucid in that she was offered scholarships in music to Drake and Morningside Universities; also, in her sophomore year won a summer school scholarship to Iowa State for designing and tailoring a three piece suit. There she studied vocational homemaking. At the end of that course she was chosen to speak to high school girls in various cities in Iowa (the theme of her lectures was: By living today, you mould the future of tomorrow).

After her first three years at Rockwell City High School, she took her senior year at Oak Park Academy in Navad Iowa, where she studied music and religion in addition to her regular subjects. While at Oak Park she sang with the sextet and played violin every Sunday over WHO, Des Moines. She also toured Iowa, Nebraska, South Dakota, and Missouri as a violin soloist with the coral group from the academy.

Before entering the Navy in 1944 she did two years of child nursing. She entered the Navy as SA and it took three interviews to fully convince the personnel director that she wanted the Hospital Corps.

(Continued on P. 6)

Dental Explorer

Dead-lines to meet and what have you? Whew! Your poor "little" reporter has been doing head stands and tail-spins for the past few days. So many of our dental fellows are leaving—well, those orders are flying in fast and furious, that we are a little, shall we say—shorthanded. Finally—we have enough doctors—now we're in dire need of dental corpsmen. Do any of you have a few of us hidden away somewhere? If so, please notify the Naval Dental School—anytime of night or day. Thank you, one and all.

New Arrivals

George Penner, the 3rd yelled a great big "Wha—a—" ("That's baby language for "Hi Kids", on the tenth day of July—the very same time his father was working his brains out with the rest of us poor DN's on that 3rd class test. Guess that's where George, the 2nd got the cute idea for his son's name. Best wishes to Mr. and Mrs. Penner, and little Georgie.

Arrival department, only in another sense. Welcome to the good ship "Dental Floss"—to Dr. Warren Hedman—who will be in our Endodontia department, Chiefs Rose and Pelick and DN Diaz, the boy with those white teeth which the department is so proud of. We're glad to have you with us.

Good Bye Sailors

A great big tear for each one of you Buchanan, Hudson, Farthing, and Thompson. Sure are going to miss you. Hope none of you get seasick.

The dental Prosthetic class No. 1-50 set sail around 1400 on the 21st—just four short hours after their graduation. They all got leave—your reporter? Writer's cramp. How would you like to log out fifty-seven brand new plaster jockeys?

Comments On The Week

"Oh, that watch list! Have you seen the duty I pull? Wonder who thought this one up? Hey—the Chiefs are holding down the emergency medical team—how about that?" These and many others were overhead by the front desk when the new port and starboard watch list came out. Maybe now you kids will realize just what those students go through. After all this is only going to last two weeks—and I'm sure that's not going to hurt anyone. Personally I think the Chief passed a fair deal on to everyone. After all—what kind of sailors are we if we can't hold down the ship in time of need?

Dr. Carter—I'm sorry I missed the boat on our picnic write-up. I honestly didn't know what a big job you did for us. We all want to say—Thank You, and I especially say, I'm truly sorry. It'll never "happen" again. Cross my heart.

Dental Dillies ball team is really going on a mad spree. Winning games—left and right. Bickle is coaching a pretty fair team. There's just no stopping those "Pass me the amalgam, please". Pop, think I'll have to come see you birds play sometime.

Leave—annual or otherwise

"Curly" Beckly and Marion Applegit to Colorado Haupt and McCline off for thirty (30) days of loafing. Penner and Burkinshaw, who is entering the new prosthetic class in August. Just how lucky can you get. Some day, I too may know the feeling of a loafer.

Can write not a word more—so—what else? See you around.

Local Netters Down Quantico Marines

By C. Karoleczak

On Saturday, July 15, a handful of local tennis enthusiasts invaded Quantico and walked off with one of the most decisive feats of the year to the tune of 8 wins and one defeat.

Headed by our own "King of the Courts", LTJG C. S. Anderson, the local netters lost only one singles match, a three set affair which saw DT3 Jack Cummings go down to Pfc. Bob Bengert, 6-2, 3-6, 6-4.

Playing in the number two slot, HM3 Jim Mercer downed 2nd Lt. Kenneth Steele, 6-1, 4-6, 6-3. Veteran HMI Paul Cook kept a clean slate by walloping Pfc. Jack Daft, 6-0, 6-0, and then teaming up with Mercer to beat Captain John Harney and 2nd Lt. Bob White by the same score.

HMI Doug Powell had the measure of Lt. White in another singles match although Powell was extended in the second set. Powell came out on top of the 6-2, 9-7 score. DT2 Bob Thompson, playing in the absence of another player who was unable to attend, beat Captain Harney, 6-3, 6-1.

Dr. Anderson teamed up with Cummings to form the Center's number one doubles and they beat Sgt. Gene Krygowski and Lt. Steele, 6-1, 6-2. Dr. Anderson had beaten Krygowski earlier in the singles, 6-1, 6-3. Powell and Thompson took the last match of the day, beating Daft and Bengert, 6-1, 10-8.

There were many fine tennis players like CDR Ruebush, Tong, and John Giragosian who missed the boat on this trip but let's hope they will all be in there, more powerful than ever, when Quantico accepts the role of visiting team sometime in August.

Sports In Brief

By C. Karoleczak

The new diving board in the NNMC pool has more spring than any previous board ever in operation in this vicinity. Ask jack-knife artist, Homer Jones! We're sure he will verify that statement. Stand up and take a bow. Tiny.

New equipment for the softball teams included a good looking catcher's mitt. A good system of checking out equipment is now in operation and it is doubtful whether any of the new goods will stray very far away.

Don Smith, horizontal bar expert, proved his worth by taking it on himself to construct his own horizontal bar behind Bks. 142. And a fine job of construction work he did. A more sturdy bit of equipment would be difficult to find.

Don has taken on a number of gasping spectators and encouraged them to do the various exercises he has already mastered. You have to give credit where credit is due and Don really deserves a pat on the back for a job well done.

Now that Steve Manning has left the service, P. G. Stouks, is badly in need of a tennis partner to keep him in practice. Any takers—besides myself?

That "new look" on Ronald Bourgea (an HM2 who's managing editor of one of the local papers isn't exactly NEW. Bourgea has been on a strict muscle building course for several weeks now and from all appearances has gained quite a bit from the experience. His instructor-trainer is none other than Frank Czerchowiez, NNMC life-guard, who looks like a stand in for Charles Atlas.

Bourgea is recently editing a new book entitled, "How to stop writers from talking too much".

Pitching Stardust

By C. Karoleczak

Aloha and greetings, from your ex-vacationland sportscaster.

I see where the softball teams have been going to the—well, it sure started out good. But to be serious for a moment, I don't know if it the bad weather you've been having (Sorry I wasn't around to enjoy it' or the sudden rush of sealed orders delivered for "parts unknown," but there seems to be a slight case of "Gee, We play another game to-night," feeling reigning in the air.

I've got only a single solitary answer I can slide out of my low base larynx and that is, "NOW, during a time when all men concerned should be in their best physical condition possible, there should be absolutely no lack whatsoever in the intramural sports program, for, as was remarked by Cdr. F. E. Frates, "Intramural sports form the backbone of a greater part of your Navy's physical fitness program."

Sure we all can't be on the starting lineup of the Admirals baseball team, but we CAN make we're in there pitching to help your command win a ball game.

Now, don't walk off with the idea that I'm saying softball, tennis, etc., stand on the sidelines and let the varsity team accept the spot light. By no means is this true, NNMC history in the past has proven just the opposite. But, there is only one person who makes these sports programs click, and that person is YOU.

Wow, after letting my hair down (I better get a haircut before next inspection—just about that time of the year) I'll turn to the lighter side of the sports gossip.

Much credit is due to DTC Nickolson and HM3 James French for putting their swimming knowledge to good use by forming a top notch swimming class for the children connected with the base.

Now if we could only get a little instruction for some of the enlisted personnel around the base who don't make too big of a splash in the ocean—we'll be all set. (Sailors who can't swim??? Impossible.

HM3 Bacon wore a happy smile for many days last week. When asked whether he had happened to pass the 2nd class test, or got married, or inherited a fortune from a rich uncle, he replied, "Naw, Nothing as unimportant as that. Our team, Lab. 14, just won it's opening game against Med. School by defeating them 23-14."

Was I the guy who said there is no spark of life in intramural softball? Pass the catsup, please, I'll eat those words if it kills me.

Some people have no respect for age—unless it's bottled.

A sailor retired recently with the comfortable sum of 51,000 dollars after completing more than 20 years in the Navy. He amassed this fortune through careful investment of his savings—and the death of an uncle who left him 50,995 dollars.

"How old is you?"
"Ah don't know, fo' or five."
"Yo' don' know how old yo' is?"
"Nope."
"Does women botha yo'?"
"Nope."
"Yo's fo'."

Second Round Robin Coming Up

Pictured above, right, are the Naval Dental School's fighting, "Hot Shots". Since the beginning of the season, P. E. Bickel, helmsman of the team, has steered the flashing fighters to the number four spot in the first round of playoffs. At long last the top honor team of Naval Hospital (left) has come into our focus. This team has held number one spot during the entire first half of the softball schedule and from all appearances they intend to remain there throughout the second round. We wish them luck!

Team Captains Bid Farewell To NNMC

By C. Karoleczak

It seems like a great majority of the teams are being influenced by recent world developments.

After staging a terrific rally in the end of the first round robin, the NP team had to look elsewhere to find a capable leader to take over their management. Clyde Schubert, their original leader, was recently transferred to Pearl Harbor for further duty assignment. A recent letter from him denotes that he gives you all his regards.

I think we lost one of our greatest sports enthusiasts when we lost Clyde. Let's all wish him some smooth sailing.

Incidentally, HM3 Mercer stepped quite comfortably into Schubert's old worn-out spikes and is now in complete command of the squad. Steer them well, Mercer, you've got a good team in back of you.

Happy Birthday

Mr. John Stringer must have thought someone was pulling his leg when he received this birthday present. But underneath all the paper, there was indeed a gift. The cake in the foreground was quickly done away with by the crew of the Photo-lab after NEW Photographer John E. McClain got through laughing. That's Mr. Stringer in the background.

News Shorts From The Editor's Desk

ALNAV Seven Two announces that all regular Navy, Marine Corps and reserve components, except USN-EV and USMCV, expiring on or after July 28, 1950 and prior to July 9, 1951, are involuntarily extended for one year. If you are under the old pay status your Family Allowance continues during involuntary extension. Members whose enlistments are involuntarily extended are not entitled to reenlistment bonus or reenlistment allowance.

The Army Quartermaster Corps has finally developed powdered eggs that taste like eggs and powdered milk that at least resembles fresh milk. What a boom to the "K" rations!

Those desiring to take GED tests for high school or college levels are urged to report to the education office. The high school tests are given at 0900 and 1300 every Monday, Wednesday, and Friday, while college level tests are conducted on Tuesdays and Thursdays at 0900 and 1300.

(AFPS) Among Hollywood personalities eligible for Air Force Reserve duty under the current strength expansion are Jimmie Stewart, Tim Holt, William Holden, Robert Preston, Tony Martin and Tom Brown. Clark Gable, who distinguished himself in WWII is on the retired list.

If their services are needed, the Navy can call from among Hollywood notables: Wayne Morris,

Bob Thompson Completes Duty As Assistant Ed.

"Tommy's gone." That is the word around the "Center News" office recently. Robert Lewis Thompson, DT2, better known as "Tommy", is probably just setting foot in Pearl by now, and his departure leaves the local paper with the loss of one of the best editors it has ever had. Although he seldom received a by-line for his work, he was responsible for many of the articles appearing in the NEWS. His talents and capabilities were varied and he could handle a straight news story, a feature or a sport story with agility and ability, delineating them into palatable gems of interest and sincerity. "Tommy" will report to the First Marine Division.

Tommy hails from Hattiesburg, Mississippi, but also lived in Miami

Captain B. W. Hogan, 22nd Commanding Officer, NMS

Captain Bartholomew W. Hogan, MC, USN, assumed command of the Naval Medical School here in ceremonies held in the main auditorium Friday, July 28. Captain Hogan became the twenty-second medical officer to command the school since its establishment in 1902.

Duplicating Graduates Four

Four enlisted men received certificates recently upon completion of a course of studies in Duplication. The graduates are: Van D. Carson, HM 3, Roland S. Genett, HM 3, Roland Stehler, HM 2, and Kermit L. Walton, HM 2.

The course is under the direct supervision of the Naval Medical School. CPO Ernest E. Huffman is in charge of the instructions. The course consists of basic lithography which includes photography, albumin plate process and offset press work.

Presentation of certificates was made on Friday, July 28 by Captain J. L. Enyart, MC, USN, Commanding Officer, Naval Medical School.

GI Insurance Applications Streamlined

The Administrator of Veterans affairs has modified medical evidence required in connection with applications for National Service Life Insurance for personnel who have been in service more than 120 days and who are serving in units under the Command of the Commander in Chief Far East or ordered to duty in that Command.

In those cases where it is impracticable to obtain a complete medical examination the VA will accept applications made prior to 1 October, 1950 bearing a statement from a medical officer to the effect that the applicant is free of disease and in good health.

In the case of persons applying in an actual combat area the certi-

(Continued on page 3)

Four Graduate From Blood Bank

An important part of any hospital is its Blood Bank and those who operate it. Four enlisted men recently completed a course in Blood Bank here. They are: James M. Osborne, HM 1, Robert L. Robinson, HMC, Robert J. Hamalle, HM 3, and Arnold Kassler, HM 3.

Graduation exercises were held Friday, August 4, and presentation of certificates was made by Captain B. W. Hogan, MC, USN, Commanding Officer, Naval Medical School.

In charge of the course is CDR J. J. Engelfried, MSC, USN. The course included the following subjects: Administration and Function of Blood Banks, procurement of donors, drawing blood, care of apparatus, and blood typing and cross matching. It is a two month course.

Clothing Allowance Previously Paid In Advance

There is apparently some misunderstanding concerning the former method of payment of the quarterly maintenance allowance for clothing to enlisted members.

Prior to 1 July 1950, enlisted men were entitled to the quarterly maintenance allowance on the first day of each quarter commencing with the first day of the quarter following the quarter in which a period of nine months active service was completed.

This procedure in effect actually constituted an advance quarterly payment. Therefore, the payment of Cash Clothing Allowance made in April 1950 covered the period 1 April-30 June 1950.

The new procedure and payment of Cash Clothing Allowance effective 1 July 1950 was outlined in the 31 July issue of the NNM NEWS.

CAPT D. Davis Ordered To Pearl Harbor

Captain David H. Davis, MC, SN, will leave the Naval Medical School here and will report for duty as Officer in-charge, Naval Epidemic Control Unit SIX, Pearl Harbor Naval Shipyard. He also will serve as District Preventive Medical Officer, Fourteenth Naval District and additional duty in connection with Industrial Hygiene. While here Captain Davis was head of the Bacteriological Department, Naval Medical School, and as additional duty, he served as Senior Member of the Recreation Council, and was active in the recreation program of the station.

Captain Davis was born in Kansas in 1904. He received his Doctor of Medicine in 1930 at the University of Kansas.

(Continued on page 2)

Kenneth Chinnock Wed To Nina Alsip

On Friday, August 4, 1950 Miss Nina Ellen Alsip became the bride of Kenneth M. Chinnock HM3. The double ring ceremony was officiated by Rev. J. R. Nelson in his home at 4910 Moorland Lane, Bethesda, and witnessed by two close friends of the couple, Mr. & Mrs. Garth E. Martin as Matron of Honor and best man.

For the occasion the bride wore a sheer Navy blue dress with white accessories and a corsage of white roses. The Matron of Honor wore a light blue dress with dark blue accessories and a corsage of red roses. The groom and the best man were dressed in dress blues.

Mrs. Chinnock works in Bldg. 2 in the Ship's Service main fountain and Chinnock is attached to the Center command. Mrs. Martin also works in the main fountain and Martin is a patient in the Naval Hospital. The newlyweds are now living at 8407 Irvington Avenue, Bethesda.

Capt. Hogan Makes Interesting Talk

(Continued from page 1)

Hogan wholehearted support in his new command.

Captain Enyart will resume his duties as Executive Officer at the School.

Following the reading of his orders, CAPT. Hogan gave a short talk, (part of which is printed below) which includes a very interesting history of the Naval Medical School and of the men, both officer and enlisted, who have made this a great medical institution:

"Admiral Willcutts, Commanding Officers, members of the staff of the Medical School and friends:

I am filled with happiness and humble pride on this occasion of assuming command of the Naval Medical School. For the Naval Medical School has given to medicine, naval and civilian, a rich heritage of great men in medicine, officer and enlisted, who have made valuable contributions to medical science.

In reminiscing we find among these great men associated with this school men of the caliber of Admiral Stitt, who has been termed the "Father of Naval Medicine" and who without question is the "Father of the Naval Medical School." As you know the Naval Medical School had its origin about 1870 at which time it was called the Museum of Hygiene. In 1902 through the efforts of Admiral Stitt, who was then chief of the laboratory service, its name was changed to the Naval Medical School. From that time on Admiral Stitt spent most of his remaining years in close contact with the school and here with the aid of staff members, he published his famous book "Stitt's Bacteriology". His book was responsible for planting the seed of naval medicine in many medical undergraduates throughout the country. Admiral Pryor published his "Principles of Hygiene," a book which was considered eminent in its field during that period. Admiral Butler, a vigorous exponent of medical subjects, was the first doctor to bring to American medicine and the American people an understanding of the menace venereal disease was to the public health and welfare of this country. Dr. Bloedorn, one of the outstanding leaders in the field of medical education in this country, was a former Executive Officer of the school. Dr. Paul Dickens, professor of medicine at George Washington University, Medical School, was an instructor in the old medical school and the author of the "Dickens Test". Admiral Melhorn, Admiral Harper and Admiral Pugh added to the greatness and reputation of the school during their command. Admiral Harold Smith, a brilliant intellectual, initiated a number of new things and established medical research in the Navy on a firm foundation. He rightfully can be called the "Father of Naval Medical Research". Dr. Benhke, while attached to this school completed his epochal work on submarine medicine. Dr. Draeger invented the first microphotography camera and in collaboration with Chief Pharmacist Mate Long invented the first automatic camera used in Photofluorography. It was here at the school that the first photofluorographic set in this country was made. In fact, the first seven sets were made at this school. This specialized equipment was developed through the stimulation and encouragement of Admiral McIntyre, Admiral Sutton, Admiral Smith and Captain Duncan with the inventive genius of Chief Pharmacist Mate Harry Long. This Medical School pioneered in the field of electrocardiography, for as you know the electrocardiograph machine came out in 1904-1905 and in 1908 the Medical

School installed a Hindel #1 machine. The research work performed by our medical men added greatly to the knowledge in this field during those days. It was at this school that Dr. Kahn in 1926 developed and perfected the Kahn serological test. In this work he was greatly aided by the excellent work of Chief Pharmacist Mate Lucy. Also at this Medical School Dr. Squibb worked out his formula for commercial ether. In later years the work of Dr. Newhouser, Dr. Losner and Chief Pharmacist Mate Evans in establishing a Blood Bank on a world wide basis, was an outstanding achievement. This work was spearheaded and given great support by Admiral McIntyre and Admiral Sutton. In the recent years the establishment of the Bone, Skin and Blood Vessel Bank by Admiral Willcutts, Captain Kreuz and LT. Hyatt is another first achievement in naval medicine.

These great men that I have mentioned belong in the naval medical hall of fame with many others. They were made greater in their medical work by the excellent assistance of the enlisted men on the school staff. To name only a few, there was Chief Pharmacist Mate George Strott, who was an outstanding technician and who during his assignment to the Medical School wrote most of the technical manuals in use during that period. Chief Pharmacist Mate Martin was credited by no less an authority than the late Dr. Hakansson, as being one of the leading laboratory technicians in the field of Tropical Medicine. Chief Pharmacist Mate Evans who worked in the Blood Bank is now one of the leading authorities in the country in this field. Chief Pharmacist Mate Gault, Lucy and Tom Riley were also outstanding as laboratory technicians and instructors. Chief Pharmacist Mate Art Jones was so outstanding that he now is associate professor of Pharmacy and Chemistry at George Washington University. Chief Pharmacist Mate Gidrites started out using a duplicating machine and ended up with a large printing establishment. Chief Pharmacist Mate Moorman, by his interest in medical legal problems while attached to this school, laid the foundation for what is now the legal branch in the Bureau of Medicine and Surgery.

One of the most interesting persons who contributed a great deal to this school was Mr. Noyes. He was originally appointed as the first apothecary in the Navy having held a PHD degree in Chemistry. He later received a medical degree at George Washington University but refused a commission in the Medical Corps of the Navy, preferring his rank of Chief Warrant Officer so that he might continue to teach the subjects he loved and in which he was an outstanding authority. He lectured in Chemistry, Toxicology and Gas Warfare. In 1897 when the Hospital Corps was established he became the first Pharmacist of that Corps. He was attached to the school longer than anyone else and died in 1931. During his life he was a highly respected and fine gentleman.

The medical School has always had the reputation of being a "big family" "pulling together", "supporting each other" and particularly among the enlisted personnel of having the reputation of being of a higher intellectual group than their shipmates in other fields in the Navy.

I am indeed fortunate to have the privilege of serving under Admiral Willcutts. I believe he is one of the outstanding medical men of naval and military medicine. He has

(Continued on page 4)

Bach And Beethoven

Charles E. Mock, HM 3, was married to Miss Isabel V. Hunsecker on August 5 at twelve noon. The ceremonies took place in the Protestant Chapel here and the Senior Chaplain, CAPT. H. Grady Gatlin officiated.

Charles is attached to the Naval Hospital, but recently was a member of the Center Command. He is presently working in the Golf Shop. Mrs. Mock is a native of Fayetteville, Pennsylvania.

The Bride wore a white taffeta dress and white gardenia crown hat with white veil. The Groom was attired in a blue suit. Jean Snowden, a friend of long standing, served as Maid of Honor, while Carl Ridgway, a Marine whom Charles has known for many years, was Best Man.

The couple are now living at 1203 Fairview Avenue, Takoma Park, Maryland.

Bone Bank Techs. Graduate Here

A four month course in Bone Bank Technique for hospital corpsmen was successfully completed by three enlisted men: Vernan P. Perry, HM 2, Harry W. Staples, HM 1 and Robert W. Staples, HM 1. Graduation exercises were held July 28.

This is one of the newer courses at NMMC and is only the second bone bank graduation, but the first to consist solely of operating room technicians. The officer-in-charge of the course is Lieutenant G. Hyatt, MC, USN, on duty at Naval Hospital.

The students are taught the principals of Bone Bank and other subjects including, Bone Bank Administration, Skin Bank Administration, Anatomy, Myology, Osteology, History of the Skin, Bacteriology, Tissue Culture and Isotopes.

Presentation of the certificate was made by Captain J. L. Enyart, MC, USN, Commanding Officer, Naval Medical School.

Diaper Derby

The spotlight glows on three newcomers. The first, James L. Moler who couldn't wait to make his first bow and stepped onto the stage on the second of August at the Admission Room with father, James C. Moler, HM 1 as ring. Moler is attached to the Center Command and works in the sonnet office.

The Research Institute takes over with two new arrivals. Joseph John Di Carlo, Jr. gave his first performance on August 5, father is HMC Joseph J. Di Carlo. The only girl in the trio, Phyllis Ann, pinned up her star on the seventh of August. Her parents, Lt. and Mrs. William Hull.

CAPT. DAVIS

(Continued from page one) city of Kansas. He also received Master of Public Health degree in 1947 at John Hopkins. The captain served his internship at the Naval Hospital, San Diego, California.

He served with the Fourth Regiment Marines in China from 1941 to 1945 and later reported to Naval Hospital, San Diego. He has sea duty on board a destroyer and an aviation tender.

CAPT. Davis is married and has four children: a son studying engineering at the University of Kansas; a daughter, a senior in high school, and two other daughters in grade school. The Davis's are living in Arlington, Virginia, but claim Kansas as home.

Robert Taylor, Douglas Fairbanks, Richard Ney and John Howard. The Marines could get Tyrone Power, Glenn Ford, McDonald Carey, Louis Hayward and William Lundigan. Ronald Regan is a reserve Cavalryman. Vic Mature, Gig Young, and Caesar Romero belong to the Coast Guard.

New York (AFPS) A customer asked the delicatessen counterwoman for a roast beef and Swiss cheese sandwich with Russian dressing.

"My friend", said the counterwoman, "in this delicatessen, Russian dressing is now MacArthur sauce".

Soo Canal Most "Important Mile In America"

(AFPS) The Soo Canal area is referred to as the "most important mile in America".

So important is this stretch of waterways connecting Lake Superior and Lake Huron, that during World War II, the United States had a guard unit of 12,000 soldiers stationed in and around Sault Sainte Marie, Mich. In addition to the troops, there were more than 40 anti-aircraft guns and more than 50 barrage balloons covering the system.

What makes this short expanse of land and water so important? Let's look at a few enlightening figures.

In a single eight-month period, the Soo Canal carries more traffic than the combined 12 month totals for the Panama, Suez and Kiel canals. One ship passes through the canal's five locks every 18 minutes, 24 hours a day—except in winter.

During World War II, 90 per cent of the U.S. iron ore production was shuttled through the Soo Canal to war factories. This year alone, it is expected that between 70 and 75 million tons of iron ore will make the canal journey.

A total of eight million tons of wheat was ferried to the east from the wheat fields of North Dakota, Montana and Minnesota, during 1949. In fact, 22,157 vessels carried 96 million tons of material through the fabulous locks of the Soo.

Construction of the Soo Canal was started in 1833 by Charles Harvey, a young New England business man. It was completed and ready for shipping in the spring of 1823.

WRGH Nurses Visit CDR

Above, LT Florence V. Kircher, in charge of CDR, explains the operation of the Casedy Hypodermic Needle Cleaner to Captain Irene Williams, an Army Nurse from Walter Reed. Captain Irene Williams, Supervisor of Central Supplies at Walter Reed was also present.

Chaplain Raynor Ordered To Sea Duty

LT. Paul J. Raynor, CHC, USN, was detached from duty here as Assistant Protestant Chaplain and will report for duty afloat.

The Chaplain was born on December 5, 1913 in British East Africa. He received his theological training at Princeton Seminary.

Since he has been in the Naval Service he has seen various duty stations. He has served at the District Headquarters, Eleventh Naval District, San Diego, the Philippine Islands, Naval Hospital, Seattle, Washington and the Johnson Islands. Chaplain Raynor reported here in July 1949 from the Naval Air Station, Kaneohe Bay, Oahu. T. H.

THOMPSON

(Continued from page one)

and New Orleans. He still raves about "that good old New Orleans coffee". He left high school before graduating, but finished school through USAFI; and he has also passed the first year college level GED test. It was his firm hope to return to school this August, but circumstances do not permit so that he is now uncertain whether or not to ship over or to wait out his involuntary retention.

Navy life began in October of 1946 in Bainbridge, Maryland where he took his "boot" training and later, Hospital Corps School. He was then transferred to the Naval Hospital at Memphis, Tenn. and later to the DGT School at Great Lakes. Then he came here, where he was known as one of the best dental corpsmen in his command. Previously he had worked on his high school paper so that it was no

wonder that he wrote for the NEWS as a correspondent from the first of 1949 to February of this year when he became the Assistant Editor. Numbering among his many other interests is sports. He helped arrange the recent tennis tournament and participated in trouncing Quantico recently. His love for tennis is probably no greater, though, than that of golf and horse racing, which he says is in his blood.

"I'll go out and edit the Pearl Harbor Express", he said jokingly as he left. Well, we here certainly hope that there is a paper there for you Tommy, and we know that if there is it will be gaining our loss.

One Who Leaves America

By Ronald Bourgea

Where are you now, America?
A line upon a distant sky,
That fades and ever fades away
Into a nothingness of sea.

It takes

A day to fully realize you've gone.
Gone, gone, America! Your ways; your heart.
The very essence of your name is breath
That has been breathed before; grows stale
And makes my lungs collapse against their walls.
The liquid of your crowded streets,
The anvil of your pounding streams,
The mystic incense of your forest life,
The gold dust of your corn, your sprig of womanhood,
The mounting mystery of men,
The strange secreation of your life's life gone for me.
Korea claims the dead. Korea calls America.
And I, and you, and he... and we... must go.
And if we see that distant haze appear again.
Again as we have said before, before.
And if we be not too presumptuous,
May never say again,
"Where are you now, America?"

Editorial

In a memorandum signed by a prominent man there was a statement which should be of particular interest to all personnel. In a list of things that the Department of Defense requires from each serviceman there was stated: "respect for individual dignity and integrity." When you stop and think of this statement, what a gigantic scope it covers! When man loses his individuality he has lost all interest in human standings and is no more than a hollow log or a mechanical robot to be started and stopped at will.

Men have always heard the virtues of the soul mulled over in churches, groups and even with serious conversations amongst friends, but who speaks of the virtues of the body? Individuality, courtesy, adaptability, or friendliness? They are, at most, given passing remarks: "Isn't he polite; he knows himself; he is well-liked; nothing seems to stump him." And that is as far as we care to discuss the qualities of the body, while we go into long discussions about love and charity.

Some people argue that while love and charity are virtues of the soul, the others are but qualities of the body, and the body being so much the lesser of the two that they become only as a speck of sand to a mountain in ratio of importance. That may be true, yet if the body is big enough to be a container for the soul; if it is its host for no matter how short a time, it is then worth more than fleeting comments. Those qualities that the body may have make it a better container and a more convivial host. It would seem that a man void of all bodily qualities would have a barren soul.

It is not only a human right to be an individual, it is a human necessity.

The Chaplain's Corner

By Chaplain H. Grady Gatlin

Atmospheric Influence

Several years ago a London physician gave out a most interesting and fascinating theory which is not altogether new, that is, the human body emits variously colored rays. This is the way he puts it: The rays emanating from a very passionate man have a deep red hue. One whose keynote in life is to be good and do good throws off pink rays. An ambitious man emits orange rays. A deep thinker throws off deep blue. The lover of art and refined surroundings, yellow. An anxious, depressed person, gray. One who leads a low debased life, throws off muddy rays. A devotional, good meaning person; light blue. A progressive minded one, light green. And a physically or mentally ill one, dark green.

Whether or not this theory should prove correct it is undeniable that we send out moral and spiritual rays that effect every one whom we meet.

We build our own world, we make our own environment and we create our own atmosphere. Wherever you move, there goes from you, even if there be no spoken word, a silent but effective influence of an elevating or degrading nature.

Napoleon on the eve of every great battle would send for his marshals and have them come to his tent. There in the silence he would grasp each man by the hand and look into his eyes for a moment and would let him go. The great Napoleon had not uttered a word but the Marshals caught the spark of his spirit and were new men when they left his tent.

Charles Dickens in "Old Curiosity Shop," writing of the death of little Nell says: "There is nothing good or innocent that dies and is forgotten. A little child dying in its infancy will live again in the better thoughts of those who loved it, and play its part through them in the redeeming actions of the world; though its body be burned to ashes or drowned in the deepest sea."

"A nameless man amid the crowd
That thronged the daily mart,
Let fall a word of hope and love
Unstudied from the heart:
A whisper in the tumult thrown
A transitory breath,—
It raised a brother from the dust.
It saved a soul from death."

It is up to us to create our own atmosphere and determine the kind of influence that shall emit therefrom.

Salt Shaker Sailor

Dear Bethesda,

The invasion...
Veaques is not much more than a drop of sand and low vegetation with occasional rises and greenery. The planes from the Roosevelt and other carriers have been flying over ever since we got here. We can see the smoke their bombs make but can't hear the noise, for they are bombing the far end of the island.

This morning the Juneau and a couple other cruisers came in quite close to the beach and let go salvoes from their big guns. We could see the blast of flame and then a few seconds later the large whack of noise, as the sound caught us. Ashore geysers of dust and sand rose up where the shells hit. This continued all morning.

At noon, a group of APA's moved in close to shore and let down their small craft. Some LSM's sent volleys of rockets ashore. The little LSM's and LCVP's circled around their mother ship like busy bees around their hive. Then it came, the small craft headed ashore. We watched them. A terrific support came from the cruisers, now further out and the planes came in steadily. Every now and then we could observe a mock dogfight over the island. We couldn't see the troops land, but we saw the smoke rising from the land and imagined that it was no picnic even if it was feigned.

The fight kept up and soon we started receiving patients. Marines, dirty, and with broken legs and arms. I wondered how bad war could be? How many times multiplied the sight of this? Our patients now were mostly only fractures and dislocations and occasional burns. But what if, I thought... I looked over to the island and made a silent prayer.

Your Salt Shaker,
A. Sailor

The Perambulating Perambulator

If you like sea food at reasonable prices, try the Wharf on the Washington Canal. Take 7th Street by the Army Institute of Pathology on the Mall and bear right on "G" Street. At the end of "G" you will come out on Main Avenue and you can't miss the many sea food restaurants and raw bars along the Canal. Try the Mariners Plate at Hogate's at 8th and Main Avenue. A real treat for sea food lovers, at about \$1.75 per.

For real seaside atmosphere go to O'Donnell's Sea Grill, between 12th and 13th Street on "E" St NW. Here the prices are a bit higher but the atmosphere is more sea-like and the food is as excellent as on the wharf.

"La Cuisine superieur". If you are looking for a bit of Paris and real french cuisine, try Bonat's Cafe on Vermont Avenue NW. Also in the french line there is Aux Trois Mousquetaires on Connecticut Avenue NW, Maxime's also on Connecticut Avenue NW and Michel's on Vermont Avenue, NW. Ce qui est bon, ici est tres bon.

If you want to go out of Washington for your eating pleasure, we have two suggestions to make. The famous Normandy Farm is in Potomac, Maryland. Although the prices are rather high, it is well worth it. Go NW on Massachusetts to the end and follow the arrows from there to Potomac, Maryland. The Olney Inn is quite famous. Take route 97 from Silver Spring to Olney. Voila!

Washington is literally overflowing with good restaurants: Old New Orleans, on 18th Street NW, New Smorgasbord on Connecticut Avenue opposite the Wardman Park Hotel, Naylor's on the Wharf, The Dragon, on "G" Street NW.

Of course, there are still excellent restaurants right here in Bethesda. The Dinner Bell and Bethesda Inn are reputable, as is the Cape Cod Cottage.

* * *

Hildegard is playing at the Olney Theatre, August 15 through August 20. Also on August 21 through September 3, Lorraine Day will be starred in "Angel Street".

The Roosevelt Masquers are presenting a series of one act plays on the following dates: August 17, 24 and 31. The plays will take place at the Roosevelt Center, 13th and Upshur Streets, NW.

GI INSURANCE

(Continued from p. 1)

ification may be signed by the applicant's commanding officer when conditions preclude its execution by a medical officer.

If proper forms are not available,

the VA will accept a statement in writing bearing the signature of the applicant desiring insurance.

All Naval and Marine Corps personnel are urged to apply for or increase their insurance to the maximum amount of National Service Life Insurance.

G. E. Martin SN Weds Janet Kutil

In a double ring ceremony performed by Rev. E. E. Huffman at 4119 Rosedale Ave., Bethesda, Miss Janet Irene Kutil became the bride of Garth Eugene Martin, SN on Friday July 28 at 8 p.m.

R. W. Bowles AE3 was best man and Mrs. Aileen Hartleroad was matron of honor. The ceremony was witnessed by Miss Nina Ellen Alsip and Kenneth M. Chinnock, HM3.

Martin is a patient on Ward 129 of the Naval Hospital and the new Mrs. Martin works in the Ship's Service main fountain. They are making their home at 8407 Irvington Road, Bethesda.

Crew's Library:

New Golf Book By Joe Novak Rates Highly

Crew's Library has just received a couple of shipments of new books so let's open them up together and enjoy the crisp pages and bright covers with promise of the good things inside. Here they are just as they came—

First is *BE YOUR REAL SELF* by David Fink of a former success called Release From Nervous Tension. This seems to be an informal, practical, down-to-earth outline of how to achieve mental health in a 3-fold program: learning how to relax, how to arrive at life's true values and how to adjust to one's environment.

Oh, Oh!—here's one sure to be popular on this compound: *PAR GOLF IN 8 STEPS* by Joe Novak—a wonderful book for any 115 player who wants to score in the 90's. Novak's basic steps are highlighted by excellent photographs.

The next one had a long title, *SAN GENARO NEVER SAYS NO*. The author, Giuseppe Marotta, tells the story of a trip to Naples after an absence of twenty years. With charm and humor, he describes unusual things such as illegal fisherman, puppeteers, petty thieves or an orphanage; all against the background of the beautiful city and the bay beyond.

Next comes a new novel—*DIAMOND WEDDING* by Wilbur Daniel Steele. It begins in the lush days of Colorado boom our last wilderness, when an uncouth mountain man and a sheltered girl from New England make an oddly matched pair.

Better come on in and see what else we found in those big boxes!

CAPT. HOGAN

(Continued from page two)

served in the most important professional and administrative assignments in the Navy Medical Corps during two wars and during peace time. I hope daily to tap this reservoir of knowledge to the advantage of the Medical School and myself.

I also am most fortunate in having as my executive officer, Captain Enyart, who has demonstrated his fitness as an outstanding administrator. He is particularly well qualified in professional work and possesses that rare quality of being able to get along with others.

In looking back over the many outstanding doctors who have been Chief of Laboratory services from the days of Admiral Stitt, I feel safe in saying that none of these great

Naval School Of Hospital Administration

By Ray W. Conrad

And still they come! I refer of course to the 1950-51 classes whose members are reporting daily to this command for the course which begins on September 5. Though we have not seen any golden rod (the traditional sign for the return to the classroom), nor long faces from vacations ended, we are racing towards the day when our classrooms ring again with instruction, argumentation, and laughter. That's the reason for our being and we look forward to new classes with more enthusiasm than ever. There will be changes in our staff, changes in our curriculum, and changes in our teaching methods, but still we come up with the right spirit for a job we believe in!

The problems of the individual may vary. One has lost his orders—another has left his wife on the other coast and wants her here desperately—still another can't move in until his household effects arrive from Kwajalein. Our problem is always the same—how to get the most across in the time allowed to a large group with different backgrounds and different ideas about why they're here and what they want to learn here. We always seem to accomplish more than we had hoped at the beginning and the student always thinks he has learned less than he had anticipated when he arrived.

Perhaps we're both a little distance from the actual facts, but a careful and unbiased stock-taking will add up to pretty much the same view as expressed by Mark Twain. At a dinner party, the subject of eternal life and future punishment came up for a long discussion, in which the great man took no part. A lady near him turned suddenly toward him and exclaimed: "Why do you not say anything? I want your opinion." Twain replied gravely: "Madam, you must excuse me. I am silent of necessity: I have friends in both places." That's us!

men has been better qualified than our present Chief of Laboratories, Captain Silliphant. We are indeed most fortunate in having him with us.

With God's grace and help, and your full and willing cooperation, I pledge to the best of my ability to maintain the high standards of achievement established by previous Commanding Officers."

WAVE Eighth Anniversary

Before this picture was taken (left) there was more cake than shown. Actually, the part shown represents a book, while the podium on which it rested is eaten away. The cake, baked by the Commissary is in honor of the WAVE's Eight Birthday. RADM Willcutts (right) cuts the cake as a group of WAVE's look on.

Dental Explorer

By Elli Karge

Golly, how busy can a place get? If you'd like to know, drop into the dental buildings, both #1 and 122, someday and find out. To give you a clue—we are now the proud possessors of sixtythree green, but willing to learn prosthetic students. Among them we find three female homo sapiens, namely Ruby Pringle, Hope Littner and Virginia Hermann. We are not like Admiral Byrd's article, "Alone", anymore. The Dental half of the barracks has gained a little life again. Back to normal, that's us. Seriously, welcome to our happy family. Glad to have you around (the more watch standers, the better we like it).

Shift to the right

Venancio (O'Brien) Diaz has acquired a new job. Poor soul is pinch hitting for Beck (who is enjoying the freedom of the great outdoors in Minnesota, which is famous as Wisconsin's next door neighbor) for ten whole days. Yes, O'Brien is now file and record clerk up at the main information desk, and having more fun than you or I will ever know. We're glad to have you around Pedro, no fooling.

Sights to behold

That beautiful yellow trimmed automobile (?) owned by Evans. Guess its supposed to match his hair cut—I can't think of any other excuse, can you?

Joe Hawley without his front teeth. I declare someday you're going to lost them, but good!

The hair cut on Levantins. Guess the "Coach" hasn't seen you yet, has he Tommie?

"Ski" polishing the bright work around the information desk. Push, halt for fifteen minutes and rest, and then push again. Such hard work shouldn't be left to one person, especially an ambitious one.

The chit boy of the week. No one but Leon Burger, short for Leo. In just one short week this character put in enough chits to paper the walls of the barracks. Cheer, Leon we all understand, really we do. Of course sometimes, it just doesn't pay to get up, does it?

Before I go any further, let me welcome our new columnist to the fold. Glad to have you aboard, George.

There's a new face in office 240. Newly reported Keller, DT 2, learning the ropes from T. R. How are those "lovely" plaster models getting along? They scared me half to death the other night when I had the Dental Watch. Wish you wouldn't let them just lie there.

The heat is too much for me—so I'm forced to say—so long...

Not Much Research Involved

By J. P. Walsh

It is easy when the temperature is high to understand the nation's sympathy with Irene and her disenchantment. Imagination fails before the prospect of another evening in the ninties and you take another stroll downtown, drink another beer and grow reflective in a season when determination would be more useful. You remember reading that the sun shines only fifty percent of the daylight hours in these parts—curious that it can get so hot doing a part-time job. You can't remember how many rainy weekends the Weather Bureau counted—the same number as your liberty weekends probably. Irene, Irene sometimes I think it's a great notion to go sail on the ocean.

And you probably will—there's the COMWESSEAFRONTIER and the yet to be compiled Tales of San Francisco and Tales of San Diego. Time was and the time returns for nearly everyone to go that way—with all the excitement of the purposefully limited outlook—MARKET ST. and the "A" train. Thanks to the Bacteriology group who

For memory has painted this perfect day

With colors that never fade.

And we find at the end of a perfect day

The soul of a friend we've made.

Carrie J. Bond.

brought the sea flavour to the barracks it is easy to recall the adaptability of the transient disposition—like a briefing for all the travel ahead. Pictures, ashtrays, chairs and tables, the settled look in the cubicle ready to be left behind. The gravitation to one bar (the KITMAR for them, and the bizarre tales too often told. This after all is the rolling life. Salt for work day routine in the Navy everywhere and on the way to anywhere. HOLDERMAN and BULLOCK are the RESEARCH van guard to COMWESSEAFRONTIER—just waiting to add our name. The sedentary life was nice—Goodnight Irene, Goodnight, see you, but not by the fireside bright.

Arrivals and departures for the month: HMC's Taylor, Gilmore and Evans back for another tour. HMC's Brooks, Sylvester reporting in. DT1 Clark, and HMI Griffith, reporting to Pearl Harbor were replaced by DT1 Furrey, and HMC Carnecross lately of Pearl Harbor. HMI Nicholson taking over Holderman's comptometer.

Med School Scuttlebutt

Harry R. Fallers

This has taken me rather a surprise—a surprise in the fact that I am still here to write this column. Since our former editor, Thompson left for overseas duty a fairly large number of us here on the third deck have also been waiting to pick up our own check-out slips and head west. Rumors are a penny a dozen these days.

The other night our quiet and unassuming friend, John, was invited to a dinner party. Being a most appreciative guest he refused to help with the dishes, sang a few or fifteen choruses of "Riders in the Sky"; but he did entertain the children. So, it couldn't have been a total loss, or could it?

Captain D. H. Davis, Officer in Charge of the Bacteriology Department, left a week ago to take charge of the Epidemiology Unit at Pearl Harbor, T. H.

Little Frank Adams also left to go to Patuxent River for duty.

From the many blood shot eyes seen shining brightly over deep blue bags last Saturday morning we can assume that the dance which seems everybody attended was somewhat of a success. Papi Kearns was so determined that the party would be a success that he drove forty miles just to find a place where he could buy a bottle of freshments. However, that forty miles was driven with Tiny Schaefer giving the directions. Without his directing we could subtract about thirty five miles from the total.

Moose Kovarik has a new alias. It is ACE. And from what I hear it doesn't refer to the hole in one which he made several months ago. It does has something to do with flying. We are sure if you ask ACE he will take time from his rather strenuous duties and explain it to you in detail.

Laugh Awhile

The bachelor went to see his married sister's new baby. He watched the infant carefully through the regular routine of its day. When asked later to describe the new arrival, he thought a moment, and then said: "Hmm. Very small features. Clean Shaven. Very red in the face, and a very hard drinker."

"I just shot a dog."
"Was he mad?"
"Well...he wasn't very pleased."

"Lips that touch wine shall never touch mine," said the fair co-ed. And after she graduated she taught school for years and years and years.

Poppa Bear (in a gruff voice)
"Who stole my beer?"
Mamma Bear (in a shrill voice)
"Who stole my beer?"
Baby Bear: "Hic."

Father: "What do you mean by bringing my daughter home at this hour?"
HN: "Had to make 0600 muster."

"Do you love your enemies, Uncle Tom?"
"Yes, all of them—tobacco, women, and liquor."

Chaplain: "Son, are you saving half of what you earn?"
Corpsman: "No Sir, I don't get that much."

Junkman: "Any old clothes or rags?"
Chief: "Of course not, this is a chief's barracks."
Junkman: "Any old bottles?"

Cottage Capers

Ever been to a peach festival? Well, fellows and gals, you haven't lived it.

However, here's a wonderful opportunity for you to correct that mistake and have a good time doing it.

A slam-bang peach festival is going to be held in the vicinity of the "Y" cottage; which is conveniently located for all personnel just a few hundred yards down Wisconsin Avenue; on Thursday, August 2, and "all hands" are cordially invited.

This is to be the "event of the year" and leading the entertainment field will be one of the original "Barbershop Quartets", bringing back a few memories and introducing a few new ones. Gypsies will be on hand to look into the future and tell you if that girl back home is still waiting, or how soon your expected orders will arrive, all to the tune of "magic" fortune telling cards.

Refreshments will be available, dancing, and a raffle for an RCA portable radio; will be on the plan of the day agenda.

Ice cream, home-made-cakes (just like Mom used to make) and peaches, peaches, peaches, will make this a captivating evening you don't want to miss.

Festivities will begin at 1800 and there will be a lovely array of rosy-cheeked peaches to greet you as you enter.

If you've never attended a peach festival, this will be a "must" on our date calendar. If you've been here before, I'm sure you'll need no urging to return.

Other activities left this month are two encouraging picnics; one taking place August 20 (Meet at the cottage by 10) and a Tridelphia Fair being held on the 26, with general muster being sounded at 8 in the morning—yawn!

Any of you folks who haven't been taking advantage of these opportunities, better climb aboard right quick like. With the step up armed-forces personnel, the cottage will serve more and more as a first-class crossroads of personalities, and there isn't a better way to make your stay in Washington (whether it be long or short) both pleasant and interesting. Come on along and join the fun, we'll be happy to have you.

CAP Wing Leaders Visited Center Recently

The Center played host to the outstanding Civil Air Patrol Wing leaders from the 43 states in the Union sponsored by the Army Air Force. They visited various activities about the station which included a dip in the swimming pool and dinner at the Commissioned Officers Mess (Open).

Personalities About The Center

Harry Naugle HM 3

Harry H. Naugle, Jr., HM3, is a quiet fellow who works in the Cardiology department of the Naval Hospital. Originally he came from Ashland, Kentucky, but he now resides in Jackson, Ohio, where his folks own a hundred and twenty acres of apple orchard and dairy farm. "I want to do twenty in the Navy," says Naugle, "but after that time is up I want to go back to farming." Need it be said that farming then is his main interest? Next to farming, he loves to hunt and fish. Pheasant hunting is particular pleasing to him as is fresh water fishing for bass.

Dollars are banked by those who aren't forever depositing their quarters on easy chairs.

Naugle graduated from Jackson High School. While a student there he belonged to the Hi-Y Club and took active part in their programs. He also was quite active in baseball. Navy life began in October 1947. Both "boot" and Hospital Corps School were taken at Great Lakes. In March 1948 he was transferred to the Naval Hospital where he has worked at various jobs: ward 6B, T-17, and the G. U. Clinic. Later he took a four month course in EGG and BMR and was retained here after graduation to work in the Cardiology department. "The work in this department is very interesting. I like it very much," says Naugle.

In July, Naugle was married to Miss Marjorie Elmor of Daytona Beach, Florida. The ceremony took place in the chapel here, officiated by Chaplain P. J. Raynor and attended by close friends. After the ceremony, a small reception was held in Silver Spring.

These cadets were on their way to England; while more were going to Canada, France, Italy, Spain and Portugal as part of an exchange program between the US and foreign countries. The US sends its top honor man from each state CAP wing and from Hawaii and other territories, making a total of 53 cadets participating in this program.

(Continued in col. 4)

Barbara Brown ENS

Barbara G. Brown has approximately thirty babies...er... that is, Barabara G. Brown, ENS, NC, USNR has to do with approximately thirty mothers who have thirty babies. She works on T-7, the maternity ward.

Life was centered around Chicago, Illinois where she attended Foreman High School, Wright Junior College and three years of nurses training at St. Luke's Hospital. After graduating from St. Luke's, Miss Brown was a nurse at girl's camp for one summer.

Miss Brown entered the Navy Nurse Corps in October 1949 and came directly here for duty. After in indoctrination period, she worked on many of the wards before finally being assigned to T-7.

An avid sports enthusiast, she loves swimming, golf, tennis, horse-back riding, and skiing. While in high school, she was a member of a water ballet team and enjoyed that very much. Also, she was a life

Be not angry that you cannot make others as you wish them to be, since you cannot make yourself as you wish to be.

Thomas Kempis

guard on Chicago's North Avenue Beach during the war when women had to take over a man's job. "This was a novel situation", declared Miss Brown, "for it seemed as though not so many women were yelling for life guard assistance as when the men had the job".

Miss Brown states that she has met many interesting people since she has been in the Navy. She entered the service with Ens. Patricia Gehard who is also here. They both come from Chicago and both took their training together at the same hospital. The Mid-West is for her; she does not like the East Coast at all.

Combat Action A First For Middie

Aboard a U.S. Aircraft Carrier off Korea (AFPS)—What is believed to be the first incident in which a Navy midshipman took part in combat action since the Spanish-American War, occurred on board this fighting vessel of the U.S. Navy.

Midshipman Gordon E. Strickland, Palo Alto, Calif., flew combat air patrol over units of the U. S. Seventh Fleet while in enemy waters off Korea.

In addition to his "first", Strickland, after being waved off in two landing attempts, made the 21,000th landing on the deck of the carrier. The traditional cake was awaiting him in the officers' wardroom.

Joseph Rose HM 3

Some dark night 'bout six or eight o'clock when you are woefully biting your nails to the skin with mad anticipation of what will happen to Johnny Easygoing when he is caught by head hunters, and the film breaks...and you wait patiently...for a while...or longer...and still no movie, blame one Joseph S. Rose, HM3, a local movie operator.

Rose is a Virginian all the way (mint juleps not bared, but sipped refreshingly beneath the shade of a sprawling tree). He was born in Delaplane, Virginia, later moved to Arlington and now to Alexandria. Rose attended Marshall High School in Alexandria and finished his schooling at Washington-Lee in Arlington. High school days were buzzing with extra-curricular activities such as football and baseball. He was also president of the Sharon Chapel Young People's Organization of Alexandria. This group sponsored dances and suppers, the proceeds of which went to build a recreation center for the youth of the town.

As many have learned that Chicago is close to Great Lakes, so did Rose find out that Boot camp wasn't liberty in Chicago or boat rides on the lake, but a grueling procedure of abstention whereby one becomes what is commonly classed as, "he who travels by water". To further the picture, he also learned that to become a corpsman one does not sit at a desk and let the patients fend for themselves—anatomy, physiology, nursing, chemistry, materia medica, first aid, and a few others: physical (ouch) training, hygiene and sanitation,—and on and on.

In April of 1948, he reported to the Center for duty at NMS. After a sojourn in the NMS Board Room and on T-13 he was transferred to Center Command where he has actively (to differentiate from passively, you know) applied himself to various duties: Center Files, Crew's Library, Recreation Department, Post Office, and presently Guard Mail. He operates the movies at night, a duty for which he prepared for six weeks at the NOB Norfolk Movie Operator's School.

He was recently married to Miss Betty Jane Willson who also comes from Alexandria.

CAP WING LEADERS

(Continued from col. 2)

The CAP, functioning as an auxiliary of the Army Air Force, gives boys from 15 to 18 a course in the basic fundamentals and training in aviation. These cadets train one day a week with a two week tour on active duty a year. After this training a cadet can enter the Army Air Force as a Private First Class (Airman) or if they complete college they can become an officer. The CAP does not teach cadets to fly but only the basic fundamentals of aviation.

Navy Belles

By George

Since Nadine has gone on leave and will start school early in September, her job has "fell into careless hands." I will try and keep you posted on what I see and hear. Any help from you will be appreciated, both corrective and constructive.

The Waves had a cellar party on the 27th, our 8th Birthday you know. Thank you Commissary for the lovely cake you gave us. Joy Shrader was the Wave with the longest service, and Kathryn Yuhas with the shortest.

We are now working on a picnic, just can't seem to get enough girls off duty at the same time.

Want to thank the Gardener for the lovely flowers he has been bringing us. They sure do brighten up our lounge.

Just Around Our House

Millicent Tschaep, is saving pennies these days, only she doesn't know the name of the person helping her save them.

Betty Lou Seagraves has joined the parade of girls to change her name. New name Betty Lou Wiitala...best of everything Betty.

"Hopalong" Hamilton, has been lassoing mice in school and giving them shots.

Some nice person willed Katie Glendenning an old wooden leg, to blow smoke rings with...Have you seen the crome on it yet? Katie is off night duty now, so you may see her around. The change of night duty brings new girls back into circulation, and takes others out.

Ruth Alger sewing presents with one hand, and holding her muscle notes in the other.

Nadine Calhoun is still looking for her Maxwell...Wants to get it broken in before she starts school.

Reggie Wyka, our future carpenter of America, is still building little things.

Helen Glover, is trying to sell her Rapid Sinusoidal. See Helen for easy terms.

Joy Shrader is patiently waiting for her ship to come in...

Three little Dental gals standing in a row...Looking down, wishing there were more. Don't worry girls, they should be here soon... Number please...

The Waves come, and the Waves go, but some stay on and on. Don't they KT?...The new members of our family are: Kathryn Yuhas, HA from corps school at the Lakes for the Staff, Hope N. Littner, DT2 from Treasure Island, Calif.... Virginia J. Hermann DN from Pensacola, Florida, and Ruby G. Pringle, DN from Corpus Christi, Texas. These girls came in for Dental Prosthetic School.

The girl from the heart of Maryland says, bye for now...

NNMC Netters Down Naval Comm. Station

By C. Karolczak

Our local "netters" once again invaded the tennis courts and pulled a startling victory "out of the hat".

Playing in the position of home team, the "sunset bombers" welcomed aboard the "pride of communications" and proceeded to defeat their line of experts by a slim muster of four wins to three defeats.

Again it was Dr. Anderson, leading the way, with a double win consisting of a singles match and a doubles in which he again sought out CDR Oesterling as his ace right hand man.

The tide turned when Dr. Ruebush was defeated by Mr. Boake, from communications, and HM 1 Powell was defeated by CDR Sweath, in three grueling sets of play.

The slim defeat handed to HM 1 Cook, representing the Center, was the major surprise item of the evening. Had it not been for HM 3 Mercer defeating Captain Mason, and DT 3 Cummings defeating his opponent, NNMC would have been in a bad way.

This victory cannot be called decisive, because of the fact that two of the doubles matches were not completed due to inclement weather. NNMC wishes to thank Communication Station for their whole hearted spirit and the determination which they brought with them.

Sport Shorts

By C. Karolczak

Orchids go out to Joe Karzauzki and Don Bauer, for doing a marvelous job as umpires at recent softball games. They really know their stuff. Can you imagine anyone yelling, "Kill the umpire," and throwing a coke bottle at that big tall six-foot-two frame of Ski's?

"Smooth Sailing" should be in the plan of the day for, Bob Thompson DT2, who recently received his orders for sea duty. This sports writer will remember him well because of his never ending love for the sport of tennis. Bob was always one of the do-or-die men of the courts and it was almost entirely because of his efforts that tennis regained her foothold on the station this year. "Speedy Thompson," had his finger in every tennis match this command has been involved in for the past two years. We were honored by your stay, Bob, and we sure hate to lose you. Good luck!

Are there many people on the station that put more time in on our golf course than Lt. J. R. Barberio? And are there many people who can shoot as good a game as the doctor can? This is one case in which practice certainly does make perfect.

Some team captains must have slipped up when they by-passed center fielder, Mark Boudreaux. Man, what a wing on that fellow!

Maybe it was for the best that the NMRI team dropped out of the league, but it certainly left a lot of players who love the sport, sitting out in the cold. It's a shame that more personnel weren't interested enough to finish out the season. Every team can't be a winner!

Other than the NMRI drop-out there seems to be renewed vigor in the softball playoffs. That's the way gang, keep it up!

Practice Green

With the rainy season over and sunshiny days with us again activity on the golf course has increased noticeably. The golf course you know not only includes nine holes about the station, but a driving range by Barracks 12 and an excellent practice putting green (shown above) near the Golf Shop.

Inspections Are Measures Of Pride In Self And Unit

By Ray W. Conrad

Of course we all know of the existence of libraries great and small, and of the donations of a long and impressive list of philanthropists—Carnegie, Mellon, Guggenheim, etc., who have erected classic structures for the preservation of the written word. Many of us are familiar with the workings of the

limited usefulness to our mission. Though not a classic gem, it is definitely not an "Eighteenth Century Library" either, for our bindings contain books of learning, just as our school contains men who desire that learning, and this center contains a wealth of staff personnel who want to help us help ourselves.

Archives of the United States, and also of the Library of Congress, whose fame is limitless as the world's greatest collector of knowledge on paper. It is famous also as the shrine which houses our precious Declaration of Independence and Constitution, the Gutenberg Bible, and the letters and writings of Lincoln, Walt Whitman, and Joe Doakes. All this is a living symbol of our greatness, past and present, and of man's desire to make known of his learnings to other man.

Notwithstanding these classics of architecture and learning, in a small room, no larger than 30 x 12 feet, in the U.S. Naval School of Hospital Administration, there is housed a departmental bibliothec of a scope that would delight any administrator anywhere. We have no fiction nor comic books here, but we have a wealth of reading material within this confined area which can improve your know-how on every subject from waxing a deck to honors and ceremonies—from typing to public speaking—from naval justice to public relations—and from better grammar to serving food.

With the unwavering help and guidance of Miss Ruth Rodier and her staff at the Edward Rhodes Stitt Library, NMS, NNMC, and with an occasional plug from the Welfare and Recreation Division and Mrs. Bean's Crew's Library, we have developed a thing of considerable value and certainly of un-

This is a heart-warming epic of how big a small town can be. The morning after their dates, the guest asked the host: "How old do you think Dottie is?"

"Oh, about twenty-one or two," replied the host.

"Unh Unh—sixteen."

"What!" exclaimed the perturbed host. "I was taking her out three years ago."

The cause of the divorce was flat feet. His feet were in the wrong flat.

Distraction

The centipede was happy quite,
Until the frog, in fun,
Asked which foot went after which.

This wrought him up to such a pitch

He fell distracted in a ditch,
Considering how to run.

Naval Hospital Takes NP On Softball Opening Game

By C. Karolczak

The recent comeback efforts of NP's "mighty midgets" were quenched recently in their first contest of the second series. The powerful overwhelming forces of Pete Stanley's NH crew proudly pounced on the first victim and defeated the NP team by a slim but decisive 6-2 score.

Learn To Swim Easy Course On Paper

By C. Karolczak

(This is the 1st of a series of articles on the principle fundamentals of swimming. It is my sincere wish that this information may increase your pleasures in swimming, for, in my estimation, there is no other exercise as beneficial for the human body as the gentle art of—swimming.)

O. K. gang, let's skip the history of swimming, the necessities of swimming, and the development of swimming, and get right in there and swim!

Now, as we enter our NNMC pool—hey, wait a minute,—you forgot to take a shower. Get back in there; and don't forget behind the ears. (Pause) There! That's better.

Now, let's get into the water. Well??—what are we waiting for? Cold? Nonsense! But if you don't feel the urge to jump right in and get it over with, here's a reasonable substitute for getting used to the water.

Immerse yourself slowly by entering the shallow end of the pool. Now scoop up that water—go ahead—it won't bite you. That's it. Dash it on your neck, face, chest and arms. Now, that wasn't so hard—was it? Hey, come back here!

Now, before we take one single stroke let's get at this thing right. "Sure," you might say, "Just watch my smoke. I can swim like a rock—oops,—I mean fish." Sure, I know you can, but, did you ever watch these other folks swim? They thrash their head first to this side, then to the other—AND THERE—there it is in a nutshell, BREATHING; without proper breathing we have too much wasted motion with the result that we tire much too quickly.

Breathing in swimming is practically done all through the mouth with only a minute amount coming through the nose. We must learn to take a quick "bite" of that satisfying gulp of air, for proper swimming is done with the face in the water and we must have some oxygen remaining, in those 10 pint capacity lungs of ours, between arm strokes.

So follow this simple exercise and bring up your swimming efficiency 100%. Stand in water up to your waist, lean forward, inhale through your mouth, place your head in the water, exhale through your mouth and nose—slowly. Now roll the head to the side (right or left, depending upon which is more convenient and natural) grasp the bite of air, and repeat. Keep repeating this process and you have conquered the first step toward efficient swimming—rhythmic breathing.

An excellent exhibition of pitching was turned out by player-manager, HM3 Mercer, who kept the NH team sitting on edge during seven solid innings. (Possibly been secretly practicing during long vigils on the "night M" watches.)

Although backed up by such ters as, Jameson and Spitz, the team forced to draw back and quarter to the hitting ability of Gwin and Willy, who represent the NH team with colors flying.

The antics of NP's 1st baseman, Levi, truly signifies that the "foot men from Kansas" plays a good ball.

Winning pitcher for NH was Smiley. Noticeable item to be mentioned was the absence of Peteley from the NH lineup. The ley-Smiley combination has been the past one of the reasons for producing so many "plate shy" batters. It may be that the "good old" are about gone for NH.

Pitching Stardust

By C. Karolczak

Good news and bad news to be coming in heavy, special very packages, this month, so better call this meeting to order and get down to business.

First off, we want to know, "happened?" Yes sir,—what

happened to the first class hitting of Naval hospital? That old phrase, "There's a war on" has been hit, and hit hard. Example can be found in the "yellow jersey" starting lineup. Five regulars the team just packed up and for duty elsewhere. What a loss to the leading team of the league NH—beware! Lab. 14 and are on your trail, and it won't surprise me—well, we'll see.

That number 7 tee off in barracks 142 is a dilly. It's about an answer to a golfer's prayer, for there definitely couldn't be a better feeling than to put wing that old golf ball and send it gracefully over the creek—smack into the woods. Temper, per! Darn it! Oh well, try it. That's what makes the game interesting.

If any of you folks want a spot to go fishing, try your spot at Seneca, about 20 miles north of the base. Folks usually catch hundreds of catfish out there—but didn't! Perch? They pull em out the carload—but we didn't seem like the fish have a great appetite for those darn Japanese beetles than our down-to-the-worms. Oh well, it sure was a beautiful scenery.

BUGS BUNNY

It's Not Fair

AFPS

Helen Jacobs Famous Tennis Champion Here

Miss Helen Hull Jacobs, one of the world's foremost and greatest tennis stars, was here in the hospital for an operation recently. Jacobs is also a Lt. Comdr. in Naval Reserve and is presently stationed at the Naval Gun Factory. Assistant Public Relations Officer Lt. Comdr. Jacobs entered the Naval Service in January of 1943. During the war she served at the Naval Training School for Waves in the Bronx, New York, as Public Information Officer and later as Commandant of Seaman. When the School for Waves was decommissioned she reported to the Separation Center, New York for duty as PIO until her separation from service. She was on inactive duty from 1946 and 1947. In 1948 she returned to active duty.

She is best known as a tennis champion. Miss Jacobs began playing tournament tennis in 1923 and has played all over the world covering herself with honors. Among the many she has won are the National Junior Women's Championship in 1924 and 1925; the American Women's Single Championship, which she held for an all time record of four straight years, from 1932 to 1936. She also held the National Women's Double Championship with Sarah Palfrey Cooke three times and in 1934 the National Mixed Doubles with George Lott. In 1936 in Wimbledon, England, Miss Jacobs won the Women's World Championship. She also was a member of a team that thirteen times won the American Wightman Cup. These are international matches played between Great Britain and the United States.

Famous Fighter Here At Center

John Bowen is now a patient on Ward 109 recuperating from a bout with Rocky Mountain Spotted Fever. Bowen is one of the five brothers, all fighters, who were famous in boxing circles about twenty-five years ago.

His one brother, Ray is now a referee here in Washington. The other, Eddy boxed Villa for the World Championship. One of his other brothers, Andy, downed Joe Dundee for the Lightweight Championship. Andy died recently of cancer in the hospital here.

John fought with such fighters as Eddy, Shay and Kid Shark. He entered the ring in 1923 as the result of an automobile accident.

Operation Saves Nickie Ann Query From Fatal Condition First Surgery Of This Kind Done At Center

Little Nickie Ann Query will now lead a normal life. Previously any slight play or exertion would tire her out so that she had to stop and rest. No tricycles. No running upstairs. And all this with a maximum life expectancy of twenty years. Nickie suffered from a condition which resembles the "blue baby", but which is different in that it involves an artery, whereas the blue baby's heart is abnormal.

The artery involved was one which connects the pulmonary artery to the aorta and which usually closes at birth, but in Nickie's case remained open. To correct this condition, the Surgeons closed the artery by tying it off with nonabsorbable sutures. The child should now be normal.

This is the first time this operation has been performed at this hospital. The operation itself is relatively new, and was first accomplished in 1940 by Dr. G. S. W. Touroff of New York. Another of the doctors who first performed this surgery was Doctor R. E. Gross of Boston (no relation to Captain Gross, our Chief of Surgery).

One of the doctors who operated on Nickie Ann assured us that all the glory did not belong to the surgeons in a case like this. He started that the doctor who first diagnosed the case was of prime importance, and that expert anesthetists were necessary, as well as the best of nursing care.

Two other interesting cases involving children were reported recently. Before Philip Walseman was six days old, surgery was

necessary for the correction of a malrotation of his intestines which caused an intestinal obstruction.

Another rare baby condition was in a three months old girl who had a malformation of the anus.

Barn Dance To Be Theme For Dance On Sept. 14

Coming home for our next staff frolic, the Dance Committee announces the September Staff Dance to be held in the NNMC Gym on the evening of September 14, anchors aweigh at 2000. All hands and their guests are invited. The previous dance (and a good one it was) was held at the National Press Club.

News Shorts From The Editor's Desk

CDR and Mrs. McNamara took first place in the Scotch Foursome on the week-end August 12-13. In second place was LTJG and Mrs. Parker. The winners were awarded prizes in merchandise.

The deadline for submitting claims for unused military leave has been extended to June 30, 1951, by the provisions of Public Law No. 479, passed by the 81st Congress. The previous deadline was Sept. 1, 1948. Claims submitted subsequent to this date are invalid and should be resubmitted. Members and former members of the Armed Services who are entitled to submit claims under P.L. 479 are those who have unused leave standing to their credit on August 31, 1946, in excess of 60 days.

The NEWS has been hard hit lately with all the transfers in personnel. It will soon be Walsh, who writes the NMRI column. Walsh had a rare undercurrent of deep seated humor and sparkling satire. He will be hard to replace.

(Continued on page 4)

Twenty-Three Dental Interns Graduate Here

Twenty-three dental interns have completed a six month course of instruction at the Naval Dental School. Graduation exercises were held on August 18.

The officer-in-charge of the course is Captain B. W. Oesterling, DC, USN, Director, Officer Training and Training Aids. Presentation of certificates were made by RADM S. O. Claytor, DC, USN, Assistant Chief of the Bureau of Medicine and Surgery for Dentistry.

Those to complete the course were: LTJGs C. S. Anderson, M. F. Byers, B. E. Clarke, Jr., G. H. Cooley, W. F. Dean, D. K. Ewton, G. L. Gardner, J. Gutman, R. E. Higgins, C. J. Hill, J. F. Hutto, E. H. Lange, W. L. Lehman, W. G. Lehmann, R. J. Leopold, R. E. Oslar, R. A. Brobst, D. M. Reed, G. L. Spielberger, R. C. Standish, J. A. Stockton, W. L. Turnley, and L. J. Wiley.

The theme for this fun-frolic will be as old-fashioned and American as can be, so break out those levis, boots and loud, plaid shirts for we're going to a BARN DANCE, hayseed and all. The music will be furnished by a Navy band.

There will be about one hundred gals invited to attend. Soft drinks and a buffet lunch will be provided. If you want to have a "hot time in the old town" might be sure to come along and join in the fun.

Many Foreign Visitors Come To The Center

If travel is the best form of education, then an hour with each of the many foreign visitors who come to the Center would afford a vast amount of knowledge. Just think of surveying the mentality of the Far East in one breath, the cryptic mysteries and fascination of Egypt, and the glamour of the Near East in another!

Col. Basheer of the Pakistan Army visited the Naval Hospital recently. He was interested in seeing EENT and the hospital in general. His visit was sponsored by CAPT Ferris of the Office of Naval Intelligence.

Mrs. Louisa Porruellas, ARC, Chairman of Volunteer Services, from Puerto Rico, visited Miss Davis, Field Director here. The object of her interview was to discuss the social services maintained for the patients.

(Continued on page two)

Public Relations

Adapted from a Signal Corps
Pamphlet and a Navy Public Relations
News Letter.

Public relations permeates everything we do . . . Many think of it as just publicity for newspapers and radio . . . It is much more than that.

The way an organization answers the telephone results in word-of-mouth advertising, the most effective kind there is.

The National Naval Medical Center receives through its switchboard many hundreds of calls each day from its various publics . . . i.e., the general public, other government agencies, other Department of Defense offices. Their good will is indispensable.

If everyone who called got the impression that the Navy is an alert and efficient public servant, the amount of good publicity this would bring would be incalculable. Here is an effective system for doing it:

(1) Speak directly into the instrument with lips close to the mouth-piece. Speak in well-modulated, distinct tones.

(2) Compensate for lack of facial expressions that extend courtesy with such phrases as, "I'm sorry," "Please," "Would you mind?" "I'll be glad to."

(3) Make the person who talks to you over the telephone glad he called you, by expressing in your tone of voice a real desire to be of assistance. Be cheerful and businesslike, not glum and disinterested.

BE PREPARED . . . Keep pad and pencil handy to take notes. You waste time if you're unprepared.

Always leave word concerning your whereabouts and your whenabouts. Nothing causes so unfavorable a reaction as to be told that your office does not know when you are expected back. Well-run offices know where everyone is and what he's doing all the time.

Any call may be an important one. A ringing telephone at a vacant desk annoys those near it, and delays the caller. He may well ask himself what kind of an organization lets its people go away and leave its phones unattended. Always see that your telephone is covered.

Lift your receiver on the FIRST ring. Surveys reveal that people on the other end of the line are more annoyed at waiting ten seconds for a telephone to be answered than they do a fifteen-minute wait in person in an outer office.

Don't continue talking to someone in your office after you have picked up your receiver. It makes a bad impression—and you may be saying something you don't want overheard.

When you answer, put a smile in your voice. Since the other person can't see you, it's the only way to make a warm impression. Don't open with a gruff "Hello!" or a weak "Ye-es?"

IDENTIFY YOURSELF . . . Give your own name or the name of your office (whichever is appropriate), so that persons calling will know who you are. This is courteous—and it saves time.

WATCH SECURITY . . . Don't discuss classified matters over the telephone.

DON'T TALK WITH YOUR MOUTH FULL. Don't chew gum while talking over the telephone—and take that cigar, pipe or cigarette out of your mouth while talking!

TACT PAYS OFF. A tactful question can get a factfull answer. Even when a caller fails to identify himself, don't be blunt. Try "May I tell him who is calling, please?" "May I have your name and number, please?" "He is not here now, may I take a message, or ask him to call you?" "Perhaps I can help you."

GET IT ALL! Make full use of Call Memos. Save time by taking the name, number and office of the caller. Many man-hours a day are lost because of incomplete information.

HANDLE CALLS TO COMPLETION . . . If it becomes necessary to refer the call elsewhere, be sure that the person to whom you are referring it is the one who can handle it. If necessary, use another telephone to find out before transferring the original call. Give the caller full information, in case the transfer fails.

The size of the military establishment makes it difficult for a stranger to know where to call to obtain information. When you receive a call that does not relate to your work, do all you can to assist.

Your reputation and that of your organization will be enhanced if you attempt to handle to completion as many of the calls which come to you as you reasonably can. Not only is this helpful to the person calling, but it is an essential feature of good government teamwork.

When a call comes in for another person in the office and he is in conference, tactfully determine if the call is so urgent that he should be interrupted or if he may call back. This may be done by saying: "Captain So-and-So has a visitor with him. Should I have him return your call?"

If the person called is on another telephone, tell the caller you'll have the call returned. Don't hold the line unless the caller requests it and then don't let him think you have forgotten him. Tell him at short intervals: "He's still on the other line. Do you want to hold on?"

CUT IT SHORT . . . Be brief. Don't waste time and money with long-windedness. Don't tie up a line with unnecessary conversation.

END CALLS COURTEOUSLY. Always give a definite indication that you are ready to hang up. "Good-bye" is universal and safe. In any case, don't forget the "Thank you". And never hang up with a slam in the other person's ear.

DOES IT WORK? The above is based upon the experience of industry. It works.

Crew's Library:

Read "Behind Closed Doors" By ADM Zacharias

A new book by RADM Zacharias is always of great interest to the patients and Staff of the NNMCCrew's Library has just received his latest book *BEHIND CLOSED DOORS*, the secret history of the cold war. Lifting the lid of secrecy, Adm. Zacharias shows us what has been going on in our contest with Russia. Masses of information based on authentic documents, interviews with diplomats, exiles, scientists, secret police have been sifted down to produce this accurate picture of just where we stand.

Warden Clinton Duffy in *THE SAN QUENTIN STORY* tells how that prison became a modern laboratory for the study of criminals and how many of the inmates were found to be reclaimable when they were treated like regular people and given a chance to participate in hobbies, sports, and entertainments as well as in work and study.

In *TWELVE AGAINST CRIME* by E. D. Radin, you will meet a dozen behind-the-scenes crime solvers, responsible for cracking many murder cases in the last few decades. Overlooked by journalists and unknown to the general public, these handwriting or fingerprint experts, chemists, physicians, wood technologists or businessmen are given recognition here where many of the inside stories of their work are told for the first time.

Doesn't it make you feel cool just to read the title of Henry Beston's new book *WHITE PINE AND BLUE WATER*? Yes, it's a State of Maine reader with selections from Maine history, from the French and English era, down through the seafaring days, to the lumbering, farming, fishing and summer visitors of today. The authors are mostly all Maine folks like Mary Ellen Chase, Louise Rich, Robert Coffin, John Gould and many others.

Dr. R. Ylagan, Public Health Service, Manila, visited the Blood Bank. Miss Sproul explained the working of our Bank to the doctor. Two doctors visited the Naval Hospital recently for a general tour of our facilities. They were: Dr. J. L. Adan, of Baguio, P. L., and Dr. R. Arezalo of San Salvador.

Dr. Tatatsuo Kariyone, Japanese pharmacist, visited the Naval Medical Center. The doctor was mainly interested in seeing the pharmacy technicians school. His visit was sponsored by Col. O'Brien of the Public Health Service.

The Chaplain's Corner

By Chaplain Robert S. Sassaman

Sir James Barrie once said, "God gave us memory so that we may have roses in December." It is true that memory brings us roses in December, but that is not all of the truth. Memory also brings us winds in August; it brings tears at dawn; it brings ghosts to the banquette; it brings haunting thoughts of our cheap victories. Memory is a bane and a blessing, a curse and joy, a nemesis and an inspiration. Happiness in life depends a great deal on knowing what to do with Memories.

Strange as it may seem, if Memory is to be a blessing, we must learn what to forget. Many schemes have been devised for developing training our memories, but no one has come forward with much to help us to forget some of the grotesque thoughts that keep staining our minds. If anyone should present to us a fool proof method of forgetting the pleasant things of life he should indeed make a fortune. We know that if memory is to bring us roses in December it will be because we have learned to forget as well as to remember.

For one thing, we cannot be really happy until we are able to forget our hurts, the words and deeds of others which have bruised us and scars which we are continuously itching in public. It is not easy, but it is necessary. It is not only necessary, but it is the reasonable thing to do. After all, most of the things that hurt us aren't meant to do so at all. The deliberate insult is extremely rare. Most people are too busy to have the time to aggravate or irritate us. Our own sensitiveness is a large factor in any such unhappiness than is the other person's thoughtlessness. And our sensitiveness is a form of conceit. It is what the psychologists call a defense mechanism covering an inferiority complex. It helps a lot in forgetting our hurts if we remember that intentional injury and open insult are rare among intelligent people. Very often do we misunderstand or misinterpret the well-intentioned actions of others. In the rush of our days we do not always take time to explain the accidental collisions. It reminds us of the two cross-eyed men who ran into each other. Both were indignant, and one shouted to the other, "Why do you look where you are going?" To which the other replied, "Why do you go where you are looking?" Like these two men we constantly try to place the cause of our hurt on somebody else.

There are many other items which muddy up the waters of life. All of them to be forgotten. There are countless others which brighten life and make it sparkle. These we must never forget. A man named Paul wrote to a man named Timothy, "Remember Jesus." When we remember Jesus the hurts of life have a way of withering, drying up, falling away. Perhaps it is because this majestic Lord thinks more of us than we deserve, or perhaps it is this—that His redemption for us means shearing from us our cheap thought and unpleasant memories.

Foreign Visitors

(Continued from page one)

Mr. P. O. Pederson, Professor and Associate Dean, National Dental College, Copenhagen, Denmark, delivered a lecture recently to the Naval Dental School. "Dental Studies of the Greenland Eskimo" was the subject of his lecture.

Two Japanese doctors, in connection with the Military Government Fellowship under the sponsorship of the National Institute of Health, visited the Naval Hospital recently. The doctors were, Toyo Jiro Kato

(internal medicine) of Tokyo, and Joichi Azuma (general surgery) also of Tokyo.

Dr. Alberto Aguilar, Director, Division of Epidemiology, Board of Health, El Salvador, came to NMRI to confer with Dr. Huff on tropical diseases.

From Iran, Dr. Abdol Hosein Radji, Director and Chief Surgeon, Bank Melli Hospital, visited the Naval Hospital.

Miss Regitze Berner, Head of Public Health Nurses of Copenhagen, Denmark visited the Naval Hospital.

"Y" Cottage Here For Your Pleasure

Dancing plays an important part in the "Y" Cottage recreation program. Above, group of Center personnel step lively to a fast tune.

On the other hand, bridge claims many enjoyable evenings. A place to meet, to talk, to play. HM1 Ed. Sweeney points out a good hand, and counsels the young lady on how to play.

The "Y" Cottage, according to those who visit it frequently, is a no-kitchen affair standing at 8410 Wisconsin Ave., complete with a large living room, recreation room, snack bar and dance space, as well as a library.

There is a big back garden with a barbecue pit built by fellows from N.N.M.C.

There is music, dancing, reading, and tournaments, arts and crafts,

meetings of clubs, feasting. All sorts of activities during the week.

And home rule. Various committees, with a representation of service personnel as chairmen or members, plan a variety of activities such as dances and square dances, card parties, horseback riding, weekend trips to the beach or mountains, picnics, ballgames, concert parties, and sightseeing trips. The Sunday

night supper, with home-cooked food, gay decorations and real fellowship, is a popular feature.

It is a fine and pleasant place where all young people are welcome. It is a positive place, too. It not only combats loneliness, it undertakes to find living quarters for those who request it and it performs many another personal service.

The Cottage began its kind ca-

reer during the war as a U.S.O. venture. Bethesda Cottage became such a popular place that when in January 1948 the U. S. O.'s job was done, the people of the community were not willing to have it closed. A committee was appointed to negotiate with the Community Chest and through their financing the "Y" Cottage is still here.

It still pays particular attention to military personnel.

Personnel of N.N.M.C. have ably demonstrated during the past two and half years that they welcome the opportunity to meet other young people in the community and to share in the responsibility of maintaining this project.

Hats off to the farsighted citizens of Bethesda who realized a need for the continuation of U.S.O. services after most communities had forgotten that need.

Delicious wiener roasts are held in "the back yard." "Somehow," the Cottagers say, "things seem to taste better when cooked outside."

After filling up on hot dogs, a swift game of ping-pong helps digestion. Here, a red hot doubles team attracts the attention of spectators.

The Cottage sponsors many off-the-compound journeys. This group has just found a picnic table at Great Falls and are making ready "to partake heartily of the victuals."

In the kitchen . . . a very, very popular place at the Cottage. You have coffee or maybe waffles, as this group is in the process of making.

The techniques of art are taught by volunteers, giving their professional time for those who have a desire to learn. Ceramics is also taught.

After a snack . . . there's dishes . . . a drudgery at most times . . . but here it seems to be a lot of fun.

Dental Explorer

By Elli Karge

You will all be pleased to hear this, I'm sure . . . your reporter is off on leave. Fifteen glorious days, with nothing to do but sit, and relax in the grand state of, you guessed it, Wisconsin. Sheboygan, Wisconsin, to be exact. No more patients to worry about, no more appointments to change, either because of the doctors going to a surprise lecture, or because the patients are too tired or busy to get down. Don't you envy me? Knew you would. Believe me, I'll be thinking of you one and all, while I'm cooling off on the shores of fair Lake Michigan.

One leaving and the other just coming back. Earl Carroll Beck returning on the very day I left. Poor boy, he fell right into that job at the main information desk. Just how lucky can a boy get? Of course, he'll have wonderful help from the new Wave just in from Jacksonville, Florida and Great Lakes. Who? Who? Why little and I do mean little "Goodnight Irene" Ramos, DN. Beside the fact of her being my room-mate, she is also the helping hand at the desk. Glad to have you aboard, Irene. Even if you are too small to reach the top drawer of the filing cabinet. We can't all be tall, now can we?

A sad place this Dental School, the day CWO Paul Allers said goodbye. One and all will miss you. You have given no small amount to all the bewildered Dental personnel. Truly, Mr. Allers, we all wish you success and best of everything in Pearl Harbor. Their gain is our loss I suppose, but why did we have to lose you? Filling Mr. Allers chair in Office #160 is LCdr. J. J. Jacobs, coming to us from the School of Hospital Administration. We hope we can make your tour of duty here an enjoyable one. Well at least we'll try hard.

It's a Boy Department.

Why naturally, it's a boy, or so Dr. Paul Moore keeps telling everyone. There was just no stopping the good doctor last Tuesday, August 8. All his appointments were cancelled, with the consent of the person involved, of course, because I doubt if the doctor could have a day anyway. By the way, Dr. Moore, that was awful good candy and the cigars got the same rating from the boys. Dental school welcomes and wishes little Paul Junior (have you decided yet? all seven pounds nine ounces, the best of everything.

Horrors . . .

"The Buick" has a new owner, accomplished much that particular and of all people, Georgie Owens. Thought when Evans was transferred to the Lakes, he'd take that charming piece of junk with him, but no such luck. And I've heard tell, Georgie intends to put curtains up in the "thing."

Two corpsmen to six offices. No fun believe me!!! How to keep slim and trim.

When and where, Dr. King? Dr. Frates claims he knows who is the boss in the family. I enjoy those little chats, Dr. Frates.

Trouble Department.

The squeak-box. It is slowly driving yours truly wild. Bad enough when it's in good working condition, but now that it has decided to sing a tune all its own—well, need I say more? I get the strangest answers at times.

Time for me to find the OOD and have him sign my leave papers, so for now and the next fifteen days, have fun, you all.

International Group

This international group of doctors visited the Medical Center recently during their stay in the United States. The doctors are in this country under State Department fellowships. The program is administered jointly by the International Exchange of Persons, the State Department and the U. S. Office of Education. Front Row left to right: Doctors Nikolaus Klissius, Greece; Luis Vargas, Columbia; Jorge Escobar, Columbia; Alfonso Tijada, Columbia; Soterios Tsouras, Greece; Chrysostomos Theodorides, Greece; Anastasios Zairis, Greece; Paul Kapalas, Greece. Jaques Manceau, Brazil. and Alfredo Hernandez, Columbia.

Second row left to right: Doctors Yoshiatsu Ozaki, Japan; Jose Delgado, Columbia; Manuel Villa, Peru; Mary Paleologus, Greece; Mrs. Margaret L. Emmons, U. S.; Aurora Revilla, Bolivia; Mrs. Esther V. McGuire, U.S.; Mario Aparicio, Bolivia, and Rodrigo Loria, Costa Rica.

Third row left to right (in doorway): Doctors Rafael Lorca, Chile; Alfred Eberwein, Germany; and Samuel Vaisman, Chile. The group was accompanied by Mrs. Margaret L. Emmons Director of the Orientation Center for Foreign Students, and Mrs. Esther J. McGuire, English Teacher.

News Shorts

(Continued from page one)

Harry Fallers, versatile writer of the "Med. School Scuttlebutt" Column, is also leaving. Harry has been turning out top notch stuff since 1948.

* * *

The Educational Services Center is set up to assist service personnel in furthering their education by using the facilities of USAFI or the extension courses in selected colleges and universities. There are GED tests for those who have not completed high school, and many states issue certificates of graduation to those who successfully pass this test. There are also first and second year college development tests available.

There are some three hundred and sixty-two different self teaching manuals available for personnel. The service is located on Ward 102. Stop by and talk your problems over, and gain a little knowledge.

In a letter of commendation to the staff of the Photography De-

You can fly from New York to Miami for \$39.00 . . . but it will cost you a lot more if you land.

partment, Captain Frank P. Kreuz, MC, Chief of Orthopedic Service, singled out in particular A. L. Mallory, HM2 and L. S. Schmitz, (now at Great Lakes) for their cooperative attitude toward the department. In part, the letter reads: "Their efforts enabled this department to present a program in a technically correct and impressive manner and possible thereby enhance the professional reputation of this activity among a group of influential civilian physicians"

Correction: In the last issue of the NEWS we ran a story on page six about the NSHA library with picture and headline about the wrong story. The headline should have read: NSHA Library Small But Big In Knowledge, the picture should have been included with the story of inspections in the next issue. Apologies begged of NSHA.

Cottage Capers

By C. J. Goebel

Ahoy there, sailors! Climb aboard the U.S.S. "Y" Cottage, as quick as you can. We're building up steam and ready for an enjoyable cruise right through the month of September, with a cargo of happiness and fun for all. All aboard!

First cruise of the month will take us to the sunny sands of Rock-Creek Park; for a picnic, no less, with a good old fashioned weiner roast thrown in for extra pleasure. This event will take place on the 4th. Sailing time will be 1 p.m., from the cottage. (We always meet in front of the cottage on all activities, unless otherwise specified). Don't be late!

All you cowboys and cowgirls who hail from anyplace WEST of New York City, don't want to miss the "grand ole square dancing" party we're attending out at the wild, woolly, hills of Glen Echo. Come prepared for a shore-nuff night of dancing square dances, polkas, waltzes, and fox-trots. You don't have to know how to dance, —they show you. We'll all meet at 7:30 p.m. on the 7th. See you there, Podner!

The 14th of the month will find us preparing ourselves for some good old "Southern fried chicken," that just melts in your mouth. We're hitting the road this time on a direct course to Brook-John's, for one solid evening of dancing, eating, and entertainment. All to the tune of only \$1.00. We'll have lots of transportation! YOU bring the riders. Meet at 6:30 P.M.

If you've seen Great Falls, and liked it, come back for "seconds" when we have our second picnic of the month on the 17th. Again we'll be meeting at 1 P.M.

A record dance, "Fall Formal," will wind up the activities of the month with a direct broadside hit. The objective of the evening will be THE Woodmont Club,—no less. Price of admission will be 50c. Who said inflation has set in?

Your regular "Cottage Capers" writer will be back in time for our next "press schedule" after a most desirable vacation. Thanks for listening, and drop down to the cottage sometimes; besides the dates of the outstanding activities. We're open every day but Tuesday! There's always something doing. See ya gang!

John O'Brien, Advisory Coach, Valuable Asset To Admirals

Whenever you might have seen the Admiral's Varsity Baseball team stickler for details. He offered his services gratis to the team, a service which has been a valuable asset to the team. He wanted greater reward than to pursue his favorite sport. "Now having retirement from all wage earning drudgery; I find myself available to coach game", said Mr. O'Brien.

Med School Scuttlebutt

By O. C. "Skip" Skinner

Things are in a dither here in Med School lately, with the loss of many familiar and friendly faces and also the arrival of new ones.

Lost to the 1st Marine division at Camp Pendleton on the 17th were: H. R. Fallers HM2, D. D. Helton HMC, and E. C. Beck HMC. Also receiving orders were R. L. Keping HN to the USS Brights Canyon, and Maryfrances Coyne HM3 to the Naval Hospital at Bremerton, Wash. All hands will miss the loss of these personnel. There will probably be many more by the next issue as rumors are still flying high.

Lab 14 has only seven more weeks of the old grind and then it will be "Oh where Oh where will my next duty station be"???

Who is that jovial, smiling, good-natured chief that is wielding the stick in the Pathology Department these days? None other than E. L. Bitley HMC who came to us from the USS Grand Canyon. Chief Bitley was here before in 1947 when he was Chief in charge of the Hematology department.

Also reported aboard for 2 mos. training in Blood Bank Technique were the six smiling faces of: W. J. Mayes Jr. HMC, M. C. Sawyer HMC, H. D. Pearson HM1, W. J. Holocher HM1, D. F. Davis HM1, and last but not least J. J. Taddeo HM3.

Our NMS ball team has really gone all out lately with four straight wins under the brilliant pitching of Dr. C. E. Boonstra, and the powerful and constant hitting of G. J. Palmer, "Clutch" Walters, and E. F. "Lanky" Hawes. Also sparking the teams drive is the field play of shortstop DePalmererro.

Heartiest Congrats to Ray Inman HM3, of Lab 14, who took the fatal step August 19th with Marie Antosh of Wilkesburg, Pa.

The blushing casanova of the 3rd deck A. G. Wallace HM3 bought an engagement ring at long last and carried it over to his favorite gal Lee Pucci of Washington. Heartiest Congrats to Wally!!!

I guess its about time to sign off until the next issue when I shall return with more Med School Scuttlebutt.

Helen Jacobs

(Continued from page one)

A side that may not be so well known to all is her writings. She has books published and now being published by a London publisher. Many of these such as "Center Court", just released, are tennis stories. "Gallery of Champion" is the story of the women who, in her opinion, are the greatest women tennis champions of all times and their careers. Another book entitled "Tennis" is, as the title suggests, an instruction book on tennis. Among her many tennis books is a Junior tennis novel "Laurel for Judy".

Some of those written by Miss Jacobs not on the subject of tennis are "Storm Against the Wind", a story with its setting during the Revolutionary War period; "By

Baseball is not only a sport to him, it is a passion. He has maintained a steady interest in the game for many, many years and can tell many a tale of interest and tension. "Batters today think of pulling the ball", he declares, "there was a time where the major league players played with more discretion and purpose". Although he is a fountain of knowledge regarding baseball, O'Brien will seldom venture a comment which "looks into the future". He maintains that discretion is a highway and future telling a by-product for philanthropists or pollsters, indeed a rocky course where judgment is better reserved for the future. "I'd much rather wait for a team-takes the series, and tell friends afterwards; I knew it the time".

Mr. O'Brien was born in Rockton, Illinois in 1883. He graduated from the University of Washington in 1906 and in 1910 entered the Army as a third Lieutenant.

motions followed, from 3rd to Lieutenant in 1912, to Major in 1922, when he retired from Army. While in the Army played and coached many company and battalion teams.

After retirement, he became Lieutenant, then a Captain in Sheriff's Office, County of Los Angeles, California. On this assignment he was too busy to engage in any baseball activities, but he retained an intense interest in game, and studied all angles of it at every opportunity.

Mr. O'Brien states that the Admirals did as well as anyone expect in the 1950 PRNC League but hopes that next season will see them take top honors. He is presently living in Bethesda at Northbrook Lane.

Your Leave, Sir", is a story I wrote about the Waves and I new one soon to be published "Barry Cort", a novel about missing in the late 19th and early 20th century. Miss Jacobs is now doing her fourteenth book on tennis.

Born in Globe, Arizona, when very young she moved to California and spent most of her life around Berkeley and San Francisco's Golden Gate. She then went abroad and lived in England where she spent four years "writing, fox hunting, and playing tennis". In 1918 she returned home to live in Kentucky and Virginia. During the war she bought a farm in Virginia where she now stays when off duty pursuing her hobbies of horse riding, breeding Yellow Retrievers and writing.

Naval School Of Hospital Administration

By Ray W. Conrad

Have you ever stopped to consider the "people"? I mean just plain ordinary people of whom you have believed the Maker so loved. He created an abundance. Of these, we are inclined to take each for granted most of the time, being human as we are. However, when you're thrown into contact with so many new acquaintances in such a short time as the time between classes at the Naval School of Hospital Administration, suddenly become aware of just much of living depends upon association with these "people."

The reason for new students being here is almost universally explained by their varied comments. "I've been in a storeroom in the war and don't know any mess or clerical." Or perhaps they were in the record office, in the personnel section, and have knowledge of any of the others. In there's always the master-at-arms of the outside detail who reads, "I don't know nothing about me!"

Increasing emphasis is being placed upon personnel management, industrial relations, and similar administrative programs since countless volumes have been written by learned men and women on these high-sounding subjects. Such ample evidence of our interest in whether or not we read it. It has been said that "The art of minding your own business is commendable, but in this busy world, it is always well to remember which your neighbor does may get you and consequently it is your business."

Our correspondent likes to look back to the days when he was a hard hospital corpsman, and remember the sound advice given him by a ninety-year-old patient who had been in the Navy so long ago that he was retired as a Chief-Mas- at Arms—whose tarnished rat-badge contained the coveted "star."

During one of my frequent verbal sessions with the ward nurse, this kindly old gentleman said to me, "Young doc, you do a fine job on the ward and you're not always arguing when you argue with Miss Jones, but in spite of your ability, you've got to learn to get along with 'people' because no man in the Navy ever gets far until he does." The old sage might have stepped from the pages of Plato's "Republic" in the form of Cephalus for he had lived a long time and learned from experience that leadership, understanding, and affability are the factors about "People" which stand the tests of time. Great kings and statesmen have failed because they have underestimated the power of "people." Charles I and Louis XVI lost their heads on the block because of it. Even the great Ham- ould have established a mon-

Personalities About The Center

LCDR Wiltshire

The thirty year mark of Naval Service is just over the horizon for LCDR M. J. Wiltshire, MSC, USN who enlisted in the Navy in 1921. He joined as an enlisted man with the rate of HA 2 and steadily advanced in rate until in 1941 he was commissioned as Pharmacist. Again, advancement continued and today he is a Lieutenant Commander, a rank which he just recently made.

The "If you seek a pleasant Peninsula, look about you" State, Michigan, is home for Mr. Wiltshire. His home town is Ithaca. He attended high school in Onawa and later, in 1919, attended Michigan State Normal College for two years when he entered the Navy.

Mr. Wiltshire is one person in the medical branch of the Navy who has never had duty aboard a hospital ship, although he has seen duty on just about every type of warship going, from carriers and battle-wagons to tugs. In his shore billets he has again seen a multitude of stations: Great Lakes area, Mare Island, American Samoa, Hawaiian Islands, San Diego Area, Pensacola, Florida, and Cairo, Egypt.

In September of 1949, he was detached from the Naval Medical Research Unit #3, Cairo, Egypt and reported here for duty as Administrative Assistant to the Executive Officer, NMS. Since his arrival the title has been changed to Administrative Officer. "However," he said, "The change was only in title, the work involved is still the same." In addition to this position, Mr. Wiltshire is the Naval Medical School's Personnel Officer.

He has furthered his education since in the Navy by attending South Eastern University here in Washington, schooling sponsored by the Navy. From this school he obtained his BCS (Bachelor of Commercial Science). LCDR Wiltshire is married and lives in Bethesda at 4501 Delmont Lane.

archy in America in 1787 because of his lack of faith in the ability of the "people" to govern themselves.

But somehow these same "people" always come up on top and no manner of totalitarian dogmas can outlive their persistent will to survive as individuals with individual minds and individual personalities.

Such is the course of the affairs of "people" who gather for the classes soon to begin. We hope that we can add to their knowledge; not replace it.

We all need that knowledge which we can muster for the requirements of the world in these troubled times so that its "people" can be lead into the right course permanently but who can be forced unwillingly, and then only into the wrong course.

"As 'people', therefore, students approaching our classes for the first time would do well to take pause

Margaret Brown

Some happy sailors term the Navy as, "chow line, liberty line, and pay line." If this is so, then Margaret Ann Brown controls one of these important lines, that of CPO pay. She holds the official title of Pay Roll Clerk, handling all Chief Petty Officer pay records. The day this interview took place she was not eagerly awaiting "the mad stampede of chiefs", but hoping that it would soon be over. The question asked most of her is: "When's next pay day?"

Margaret is a life-long inhabitant of Washington, where she was born in 1927 (this makes her twenty-three... not married... not bad). She lives in Berwyn, and does not especially yearn to leave her surroundings, which she finds agreeable in all respects.

"I came to work here in 1943," she said, "And in seven years you learn a lot about your job." Valiantly spoken! She first started work in Small Stores, alongside "Grumpy" Windham. After two and a half years of selling clothes, she took her new assignment of Pay Roll clerk with enthusiasm and relish.

Since she has been here, Margaret has been quite active in the many bowling leagues which have sprung up from the Center. She hit a high of 121 on her first night out this summer, and had to face the jeers of her fellow players, after telling them that she was not too proficient at bowling. "To save my face," she said, "My game dropped constantly. But it was not through my doings. I told the truth that first night."

Education for Margaret centered about Hyattsville High where she was active in the choral group and participated in school plays and operettas. One which she remembers as particularly pleasant was Gilbert and Sullivan's "Pinafore". After two years at Hyattsville High, she attended one year at Valle Crucis in North Carolina, a girl's school. Finally she returned to Hyattsville High to finish her schooling in 1943, before coming to work here.

for lengthy consideration of the merits of the instruction material offered here, notwithstanding their backgrounds. After this consideration and/or application of the NS-HA curriculum they will be better able to broaden their knowledge, and thereby make the addition and not the replacement we have mentioned before. In omnia paratus!

Jack Hunter HN

Jack A. Hunter, HN is one of the many who work behind the scenes in the Recreation Department. Hailing from York, Pennsylvania, Hunter was born on November 14, 1930 and entered the Naval Service in November 1947.

He took his "Boots" at Naval Training Center, Great Lakes, Illinois, and well remembers those cold days on the drill field marching to and fro. From Boots he went to Hospital Corps School there at Great Lakes, learning the ways and means of caring for the ill and wounded and what it means to answer the call "Corpsman".

Hunter reported to the Naval Hospital here for duty in May 1948. While attached to the hospital he worked on many wards. Some of which were 105, 109, 3-C and 110. In January of this year he was transferred to the Recreation Department.

He went to the Edgar Faha Smith Junior High School and the William Penn High School in York, Pennsylvania until the end of his third year when he came into the Navy. For a hobby he likes "to fool around with radios".

Hunter plans to ship over soon for six years and says he can see the twenty year mark with retirement on the horizon for him.

Mrs. Rhodes Ends 30 Year Service

Friends and co-workers presented a parting gift at a farewell party for Mrs. Verna M. Rhodes on the event of her retirement from civil service.

Mrs. Rhodes who resides at 8217 Custer Road, Bethesda, has been employed by the U. S. Government for over thirty years. She served as a Yeomanette Third Class in World War I from 3 October 1918 until 31 July 1919. She then entered the Civil Service as a clerk and reported to the Disbursing office at the Medical Center shortly after its commissioning. Her final position was that of Military Pay Roll Clerk in the Enlisted Accounts Section.

Among those present were RADM M. D. Willcuts, Commanding Officer, LCDR C. L. Crawford, LCDR H. T. Dean, LT. J. I. Moon and personnel working in the Disbursing Office.

Navy Belles

By George

Hello again! I'm back and no help this time. I have been working like a cyclone blowing up something new to write.

Inspection week-end: shoe shining parties—hats to be pressed—dresses that stand alone—hunting for not to be found rating badges. All leads to a busy time toward the end of the month.

"Just around our house."

More girls moving in, and we are glad to welcome them because they are here for duty. Lucille Zimney from the Lakes for duty. Irene Ramos, DN also from the Lakes, Dental School. Laverly H. "Willy" Williams from downtown is going to Hospital Administration School. Welcome aboard to 123.

The fellow who has been helping June Miller get her home work now has a full time job, because she married the guy. Best of luck, in school and in the future, Mr. and Mrs. Moorehead.

Alma Wadenstorer has been on leave this week and I sure miss my alarm clock.

Dorothy Flemming fussing, because she made port and starboard. —Don't you think she plays the chimes well?

Betty Hopper, a cook among cooks made the best chili on Sunday. Took her two days to do it, but it was worth waiting for. Some side-line advice: Don't let Possie season yours.

Now that the old lion is dead, every ass thinks he may kick at him. —Samuel Parr

Beside Karge's many jobs at Dental, she has taken on a new one—teaching knitting. Not mentioning names, I think her pupil is doing swell.

Peg (my heart belongs in Philadelphia) Drum, all aglow at the horrible hour of six a.m.—Reason, Jack called.

Kathryn Yuhas has been sick, and we all hope she will be out and back with us soon.

The Navy says, Go west, young lady, go west, so who is first to go, Mary Frances Coyne. She leaves in the near future for Com 13. How far west can you get? Good luck, Mary Frances.

Harriet Hanson is taking Jo Feldi home with her to Wisconsin—to show her how to put holes in cheese. I know another Wisconsin girl that eats the hole in the cheese.

"Johnnie" Johnson showing Peggie Igou life in North Carolina over the week-end.

Louise Miller going to family reunions, also in the state of North Carolina.

"Carolina moon" is once again shining at Camp LeJeune for some little Wave.

Say, what has this state of North Carolina got anyway? Must be something! Anyway, bye now, from a girl deep in the heart of Maryland.

Sport Scope

By J. C. Woods

Judging from the recent conflict between the Cleveland Indians and the Boston Red Sox one might be led to believe that binoculars are now standard baseball equipment. Can you imagine the New York Yankees being picked to win the pennant because they rented out the Palomar telescope.

In the boxing arena Sugar Ray Robinson was sour grapes for foxy but not fighting Charlie Fusari. Robinson commanded the fifteen rounder from the start to finish and still had enough wind after the fight to state that he would "fight Jake LaMotta in Times Square".

Bing Croons while Pittsburgh moans, the Pirates are deep in the damp cellar, as Bob Hopes that his Indians will bury the hatchet (In Detroit's head) and cop the Pennant. The Nats are stuck with fifth place and doing a good job. Far from a Pennant threat this year, the Nats show a great improvement over previous years.

The fans are still going strong, electric ones that is, but football is just over the horizon. With the situation as it is the service teams should capture most of the spotlight this season, but no shadows will be thrown over Notre Dame and Michigan. Ohio State should march in the front column along with Southern Cal.

Switching the cameras over to the much talked about All Star everyone was impressed with the sparkling footwork of Charlie Justice. When the boarding house blew up they sang "Rumors are Flying", one came this way and said that the Redskins had an opportunity to buy Justice. But didn't saying that the price was too high. Hmm.

The Redskins shocked the Redskins last week and scalped the Frisco 49ers before a crowd of 51,000. Sammy Baugh lost no time with his passing mastery and proved that he can still juggle the old pigskin.

On the local side Pete Stanley prominent sports authority around the compound states that his hospitalmen will capture the Intermural Football Crown this coming season. The Center Command boys, three years winners have different ideas on the subject.

NP Conquers Mighty Lab 14

By C. J. Goebel

On August 8th, manager-player Silvadio, led an aggressive and overconfident Lab 14 on the NNMC softball diamond in an effort to gain their fourth victory of the second series. Their dreams of a no-loss series was suddenly shattered when contested against the might and vigor of HM3 Mercer's NP "hepcats."

Throwing in all reserves in an effort to "turn the tide," the Lab 14 lineup consisted of Karzawski, Hooker, Bacon, and Dischinger in the pitcher's box. Nevertheless, the combined efforts of the spirited NP team were not to be quelled and the total runs rallied up at the end of 7 innings was: NP-10; Lab 14-4. Umpire for the game was D. F. Polizzi.

Intramural Highlight

Play ball! And that's exactly what the "Roaring Tigers" of NP proceeded to do in their recent victory over NDS. This seems to be very well illustrated in the above photo-shots taken at their inspiring game. At left we find P. E. Bickel, manager of NDS,

doing the catching, while Eddie Goda, of NP, prepares to connect with that "ole apple." The picture on the right shows part of the snappy NP infield, with HN Rock on 3rd; Mercer at ss; and Johnson doing the chucking. Final score: NP 14; NDS-6.

Pitching Stardust

By C. J. Goebel

We see where Van Belois, DT3, and Harry Bruntmyer HN, have been sharpening up their drop-hook-slide-curve, ping pong shots at the various tables on the compound. Perhaps this is in preparation for the Table Tennis tournament anticipated during the last week in September.

Word has it that Ed. Garland HM3, has just about run out of male competition on the station and has turned his tennis talents toward the female set. "Joe" and "Millie" have been heading the competition from the vicinity of the wave's barracks, while Capt. Bradley's daughter Betty has also been lashing a terrific forearm drive on the local courts. If you think these gals don't play good tennis—you're due for a surprise.

FREE golf instructions are now being offered to groups of six, for all beginners, through the sponsorship of the Rec. Dept. Bill Downing, the local professional, will instruct 3 one-hour periods on the "fundamentals of golf" and will furnish the necessary equipment. If you've ever desired to learn the

There is only one thing in the world worse than being talked about, and that is not being talked about. —Oscar Wilde

game of golf, this is definitely your finest opportunity to learn the RIGHT WAY. For further information, contact Cdr. Frates, the station Athletic Officer, as soon as possible. Do it today!

Another September finale will be the "Fall Tennis Tournament." With the transfer of such outstanding attackers as LTJG Anderson and HMI "Shorty" Powell, reason has it that a closely knit battle will be on hand.

Don't breath a word of this to anyone, but we definitely expect the Station Bowling Tournament to begin the first week in November. Better dust off that old hook shot of yours!

A Softball Player's Heart

By C. J. Goebel

I am a softball player's heart. He has chosen to be a softball player because he believes it will teach him teamwork and to play hard; and because it is one of the greatest sports in the world...I believe it will teach him to play the game fair whether he win, lose, or draw...I believe it will help him stay young and in shape and give him "Lasting toughness"...It will set the pace for him so he may indulge in other sports.

...I believe he will work with eight other men, as one, and realize that HIS powers are needed to continue the game...He will be ready when his turn comes at bat even as he must be ready for all "good pitches" and "good opportunities" coming his way during his life...I want him to know how it feels to come out from behind and rise in shining glory over his opponent.

...I want him to know how it is to fail, then strive, try harder, and win...While he is doing this, he will be having fun; he will be learning to accept defeat and victory with the same smile...And I am glad that I'm a softball player's heart.

CDR Frates Top Golfer

By C. J. Goebel

The station handicap tournament, held on the 5-6 of August, resulted in a grueling neck-to-neck race for all participants. The old adage of "Practice makes perfect," finally paid off for one of the members of "ye local golf club", when Cdr. Frates, copped the title championship with a 67 score card for the entire 18 holes.

Practically, "breathing down his neck" throughout the entire performance, the auspicious driving power of HM2 J. D. Brown, finally possessed second place with a score of 68; just ahead of third place,

Cdr. King, who attained a score of 69 for the "day's action."

The mixed Scotch Foursome tournament, held on the following week-end, found Cdr. and Mrs. McNamara accepting the honors of first place. LTJG J. H. Parker, combined efforts with his wife to display their talents by obtaining second place. In this tournament, the players were allowed to select their drives on holes 1 and 7, then had to play alternate shots.

Results of the forthcoming tournaments will be published as they are reported in. Be sure and enter your name immediately so you also can participate in these events.

That's How It's Done

Bill Downing, the station pro, sinks a long one as R. E. Hall looks on. The above picture was taken on #4 green with main buildings in the background. Watch for the announcement of the NNMC Tournament and beginners tournament to be held soon.

Golf Enters Major Role In Center Doings

By C. J. Goebel

An abundance of golf toments have been carefully planned and supported, to make NNMC of the leading stations seeking bring GOLF recognition as a sport. With the availability wonderful 9 hole golf course, clubs, and a golf shop, the tournaments should provide proper stimulus to enable each every enlisted person on the to accept the pleasures obtain from the world of golf.

First on the agenda will "Best Ball Team Match," which to be played on the 26-27 of gust. Partners for this tourna will be drawn from the enth Following in close succession find the dates of September 2 be occupied by what is, term "Scotch Foursome."

The outstanding activity year will be the station golf championship, to which every with an ounce of do-or-die within him, shall not let pass out an attempt to exhibit his skill. (It makes no difference whether you play 120 or 70 of course). This is the "opportunity of a lifetime", due to the fact players will be divided into kets, giving each and every nie an even chance to win one of many trophies to be offered. dates will be published within next few issues.

Well, there you have it. This is up to YOU. Whether you "pro" or just a beginner, you have a chance. Sign up today the golf shop for these events. Be sure to turn in score cards when participating these activities.

To be right up to date on local golf news be sure and check the golf shop bulletin board.

NH Team Feels Sting Of Defeat

By C. J. Goebel

The greatest upset of the season occurred during a recent ball "tug of war", when Bingham 8th. place team came up with wallop, which knocked undefeated NH into their first loss in tries.

Recent daily workouts brought the Phys. Med. "Rock" into a tightly organized team. Determination alone was enough turn back the "yellow jerseys" score of 5-4.

This throws a complete wrench into the NNMC stand led by the recent upset of NP Lab. 14; NDS quickly followed when defeated by Commissary, then the surprise upset of NP NH. These three thrilling up of the top contenders for the championship crown, has given a team in the league a new inspired "crack" at the title.

At this writing, only Commissary stands alone with no defeats. A championship race this turn out to be.

Doing nothing is tiresome cause you can't stop and rest.

Only one man in a thousand leader of men. The other 999 followers of women.

A paratrooper is the only who gets up in the world by falling down on the job.

Bureau Of Medicine And Surgery Observes 108th Anniversary

The Bureau of Medicine and Surgery observed its 108th Anniversary, August 31. The Bureau of Medicine and Surgery which has served as the guiding agency for the Navy and Marine Corps in matters of health and disease through four major wars, was established on August 31, 1842. Its fundamental mission was reduced to a single phrase in World War I: "To keep as many men at as many guns as many days as possible." Statistics show that 97.8 per cent of Navy and Marine Corps battle casualties survived in World War II.

WOHC Barbee To Instruct In Maintenance

By Ray W. Conrad

We are happy to welcome CW-Forrest C. BARBEE, USN, to staff as the Maintenance Division Management instructor. Mr. Barbee comes to us from the U.S. Naval Hospital, Annapolis, Maryland. The Naval School of Hospital Administration is in the process of updating the curriculum where maintenance management is concerned. This expansion job will be Mr. Barbee's undertaking. An undertaking aimed at a better understanding of the problems of the maintenance officer.

Maintenance functions embrace about every phase of hospital management. As far as most of us are concerned our maintenance problem ends when we have submitted a form 63. But what of the patient of this request for repair? In the maintenance division necessary machinery must be in motion quickly and effectively in order that the efficient and continuous operation of the hospital is insured. A ward is cold, the trash and garbage is to be removed, a lighting fixture is not working, a sink is stopped-up, worst of all, an elevator is hanging midway between floors! All these are maintenance problems. To perform these tasks, and many others, the hospital needs a fleet of vehicles of all descriptions; a crew

(Continued on page 5)

General Clifton B. Cates, Commandant of the US Marine Corps, in a congratulatory message to RADM Clifford A. Swanson, Chief of the Bureau of Medicine and Surgery, said:

"It is especially fitting to congratulate you and your organization on the splendid service being rendered to Marines everywhere, and particularly to those now engaged in combat in Korea."

A total of 17 Navy medical personnel, mostly hospitalmen and hospital corpsmen serving with combat Marines, have been killed, wounded or are listed as missing in action in Korea. By comparison, all other Navy casualties to date total only 10, including seven Naval aviation personnel either killed or missing.

Naval medical personnel, of whom the vast majority are hospital corpsmen, were frequently cited in World Wars I and II for outstanding valor and distinguished service. The country's highest award, the Medal of Honor, has been given to thirteen hospital corpsmen. The Navy Hospital Corps received a blanket commendation from the Secretary of the Navy for its World War II service, the first time in the history of the Navy that a single corps had received such recognition.

In World War I, Navy medical personnel including hospital corpsmen who served with the Marines in France were awarded the French Fourragere. They are the only

Trips For Civilians

Moonlight cruises are often sponsored by organizations and individuals for Center personnel. These consist of trips down the Potomac, dancing on the way and usually the ship docks at a recreation center.

Certain cruises are restricted to service personnel while some are for civilian personnel as well. The Daily Bulletin announces these trips and those eligible. You can obtain Daily Bulletins at the Patient's Record Office or at the Information Desk, Main Lobby.

Occasionally there are Saturday and Sunday afternoon cruises planned for the benefit of children. The scenic value, plus a tinge of salt water life, dancing and recreation make this activity one which should be taken advantage of to the fullest degree.

LT G. Saraniero MC USN, Head Of Blood Bank

LT Gioconda R. Saraniero, MC, USN reported recently to relieve LCDR M. T. Sproul in charge of the Blood Donor Center. Doctor Saraniero will also be the Hematologist for the Naval Medical School. Doctor Saraniero hails originally from Brooklyn, New York. She received her Doctor of Medicine degree from Women's Medical College in Pennsylvania, which is believed to be the oldest college of this type in the country.

She first entered the Naval Service in the Naval Reserve in 1943. At this time her two twin brothers also joined which, with her other brother, made the entire family in the Naval Service. Her first duty station was at the hospital here. In 1945 she was ordered to the Naval Hospital, Philadelphia, Pa., where she was assigned to the Blood Bank and Hematology until 1946. She was separated from the service as a LCDR, USNR and returned to civilian practice.

In December 1948 she entered the Regular Navy and returned to active duty. She was assigned to St. Albans, Long Island, New York

(Continued on page 2)

NNMC Receives First Battle Casualty From Korean Area

The Naval Hospital here has received its first Korean battle casualty, Corporal Walter F. Johnson, a 21 year old Eagle Rock, Va., soldier.

The patient gave up work on a dairy farm a little over two years ago to enlist in the Regular Army. He was with the First Cavalry and was stationed in Japan for two years. He was wounded and two of his buddies were killed as they sought to flush out Red soldiers in a mined soybean field.

The son of Mr. and Mrs. Edward W. Johnson, of Eagle Rock, he was struck in the right hip and elbow by flying shrapnel fragments when one of the three tripped the wired trigger of an anti-personnel mine.

A member of a mechanized reconnaissance unit, Johnson was on foot. A guard, he said, had reported several Red soldiers slipping into the field, on the South Korean side of the Naktong River, Taegu sector. This was sometime in the mid-morning of August 16.

As the three soldiers advanced through the field, the mine exploded. He said the explosion knocked him off his feet and that he "black-ed-out" for a moment. He then made his way to the road where the first aid team started him on his way back.

A first-aid team treated him at the roadside and sped him back to a first-aid station and then to a medical clearing station. Before nightfall he was evacuated by air to a hospital in Japan.

He was treated in three hospitals in Japan before starting back to the States. He arrived here on Sept. 1 and is now on Ward 3-C.

News Shorts From The Editor's Desk

Congressional committees are expected to complete work soon on legislation for limited income tax relief for combat military personnel and some type of family allowance system for personnel with dependents.

The Senate recently approved a bill which would pay dependents benefits ranging from \$85 to \$155 per month. The servicemen would contribute a little less than half of the total benefits.

All Services are working on plans for effecting promotions as their ranks increase with new members. First announcement of temporary Army promotions due to the current expansion is expected early in September.

RADM M. D. Willcuts, MC, USN, Commanding Officer, NNMC was in Indiana recently on Navy Medical Department matters.

US Doctors Represent Navy In Copenhagen

A group of doctors from America represented the Medical Department of the Navy at the 18th International Physiological Congress held in Copenhagen, Denmark. They also inspected laboratories in different European cities. The doctors were: LCDR D. Minard, and doctors, K. S. Cole, Julius Sendrey, Jr., M. P. Morales, L. A. Terzian, T. H. Benzinger and C. Kitzinger.

Dr. Jan J. Hermans, Professor of Physical Chemistry, University of Groningen, Leiden, Netherlands will visit the Naval Medical Research Institute for one week this month. His visit is sponsored by the Rockefeller Research Fellowship.

A visit sponsored by the Italian Embassy brought Dr. Natesaier Parshaattam of India to NMRI. The visitor is studying for his PhD at the University of Colorado, Medical Center, where he is also

No CPO Exams Slated For 1950 BuPers States

Washington (AFPS) Because of a large surplus of Chief Petty Officers the Navy does not plan to hold examinations for promotion to this grade during fiscal year 1951, which began this July 1, according to a recent announcement of the Bureau of Naval Personnel. However, should changes in the Navy's requirements so dictate, examination for advancement will be held.

Examinations for advancement to other petty officer grades will be held as follows: For petty officer third class, January 9, 1951; petty officer second class, January 16, 1951; petty officer first class, January 23, 1951.

Certain deviations from the schedule will be authorized if movements or operations require it, providing the examinations are still conducted during the month of January, 1951.

Plans are also being made to take care of the advancement of Naval Reserve personnel on active duty, the Navy announced.

It may not be flat, but this old world is on edge.

USS Boxer Averaged 23 Knots On Pacific Sprint

San Francisco (AFPS) —When there's a rush job to do in a war, leave it to the Navy.

This was proved conclusively when the mighty aircraft carrier USS Boxer raced some 5,000 miles to Japan in eight days and seven hours to deliver desperately needed combat aircraft to the Korean war.

In so doing, the pride of the Navy's flattops set a new world's speed record. Outward bound from San Francisco, the Boxer sliced more than one-third off the old world's record of 11 days, 18 hours and 43 minutes set in 1941 by the Japanese liner Nitta Maru.

Nor was that all. The flattop averaged 23 knots and hit a top speed of "around" 32 knots. That's 27,100 tons of ship doing some 36 miles an hour.

The return trip was even faster. Elapsed time was just seven days, 18 hours and 36 minutes. The Boxer was away from port for 21 days.

Another record was established by the carrier. Built to carry but 82 planes, the carrier ferried (aside from her own aircraft) "considerably more than 150 aircraft". In addition she took along a passenger load of 1,000 Airforce and Navy pilots and ground crews. That was beside her normal complement of 2,400.

Clyde L. Taylor Wed To Miss Barbara Warner

Clyde L. Taylor, HN of the Naval Medical School was married to Miss Barbara S. Warner, a civil employee who works in the Legal Assistant's Office and the Board Room. The double ring ceremony took place at eight o'clock on September 1 in the Protestant Chapel with Chaplain H. Grady Gatlin officiating.

Best man at the ceremony was R. L. Gill, HMC of the Legal Assistant's Office and Matron Of Honor, Mrs. Verne Stoddard, a good friend of the bride. The bride was attired in a blue slipper satin dress with white accessories and a bride's corsage of white roses. The groom wore a smartly tailored suit. Mr. and Mrs. Taylor are now residing at 5420 Connecticut Avenue NW, Washington, D. C.

New Collection For Cultivation

It seems as though the Crew's Library is the natural place to ask for the solution of difficult questions, but even the librarian was astounded lately when a patron approached her and asked, "May I see the Goldberg Collection?" Never having heard of this, she rushed to her reference books and consulted every source of information at her disposal to no avail. Never had this happened before! Never had she been at so complete a loss!

"I'm sorry," she admitted finally. "I don't have it . . . By the way, what is the Goldberg Collection?"

"Oh, it's all the reference books that Chief Goldberg of NSHA has been consulting lately to prepare his 2CX college level examination . . ."

American Eagle No Nightingale

The American Eagle is not an altogether lovable bird. It is no nightingale; it sings no sweet songs of sentiment. It is no peacock; it never struts nor spreads its tail. It is no dove, although it stands for peace wherever peace is possible. But the American Eagle can fly higher, fly straighter, fly stronger, and fly longer than any other bird in the world. And when its cold and calculating eyes look through the souls of men and the diplomacy of nations, when its fierce beak and ugly claws become set in righteous determination, and when it begins to flap its majestic wings—then let all buzzards, wolves, and reptiles beware, for the American Eagle means business.

The Chaplain's Corner

By Chaplain Arthur P. Finan

Never in His life did Christ say a single commonplace thing.

You can read thru the gospels and search in vain for an anemic platitude, or useless bromidiom. Every phrase is clear-cut, vivid, unusual. Christ speaks of mountains falling on people; men so terrified they wither away with fear; camels struggling thru the eyes of needles; millstones hung about the necks of men who give scandal; great beams of good unnoticed in the eye of a man looking upon the tiny faults of his neighbor.

It is flatly impossible to rewrite anything that Christ said. His stylistic form was perfect.

In a single word or part of a sentence He can sum up a whole philosophy of life. "Let him take up his cross daily and follow me," contains enough wisdom to have made millions of men walk courageously into martyrdom.

He shot off epigrams with the explosiveness of a Bazooka.

"Judge not that you may not be judged."

"What man is there among you, if his son shall ask him a fish, will he for a fish give him a serpent?"

The story of the Prodigal Son is a short story never equalled by Maupassant or O. Henry.

He summed up the principles of political economy for all times in one breathless statement: "Render to Caesar the things that are Caesars; and to God, the things that are God's".

And everything He said was eternally true. He was not an empty stylist, a brilliant former of sentences, a clever maker of phrases. His thought warms the heart, lifts the eyes, puts humanity on its feet, turns the soul from earth to heaven.

If you really want to be smart, if you really want to read well, think well, go to the gospels where you will meet Christ the Greatest Literary Figure that ever walked into the world of literature.

WHY WE MUST FIGHT

The following statement was written exclusively for the Armed Forces by Ambassador Warren R. Austin, United States Representative in the United Nations. Although addressed to the United Nations Forces in Korea, Mr. Austin's statement is of vital importance to every man and woman in the Armed Forces.

UNITED STATES MISSION
TO THE UNITED NATIONS

August 25, 1950

To the United Nations Forces in Korea:

YOU and I have a great deal in common. Although our duties and responsibilities are somewhat different, we are partners in the international "police action" in history. We are working together to suppress the lawbreakers who have attacked not just Korea, but have attacked the whole United Nations effort to build a peaceful and better world. What we do at Lake Success and what you do in Korea affects the future of people everywhere.

OUR object together is to halt aggression. The world failed to do that when Hitler and Mussolini and the Japanese were rising to power nearly 20 years ago. Aggression in Ethiopia, Manchuria and Austria went unchallenged. Today the story is different. The United Nations has successfully challenged aggression in a number of instances.

ABOUT three years ago war broke out in Greece. It turned out that the Communists were behind it—not just Greek Communists but Communists from countries north of Greece. The United Nations sent military observers to that northern border and through their reports the whole world saw that in reality it was Communist aggression on the outside that menaced Greece—and the rest of the world, too. That instance, Greek soldiers, aided by the United States and British equipment, stood off and defeated the Communists for themselves for the rest of us.

THEN, the Communists centered their attack on Berlin. The Soviet Union tried to squeeze the rest of the world out of that city. In 1948 the whole world saw that in reality it was Communist aggression. The United States-British-French airlift, by German citizens willing to endure difficult privations by United Nations peace negotiations.

KOREA was next, and the worst of all. What is happening in Korea is part of the Communist effort to dominate the world. Your victory in Korea will be the most crushing setback the Communists have ever received. Your victory will demonstrate that the free peoples of the world are determined that aggression will not be permitted to succeed—even when it is attempted in a place so remote from our homes. Fifty-three nations are united in recognizing that a battle for freedom and for world law and order is now being fought. We know that aggression must be stopped before it gets a head start if we and the peoples of other countries are to remain free.

for duty as Chief of Hematology and Blood Bank. In August of last year she reported here and assumed her present duties.

The Doctor likes to play piano and is very fond of her collection of foreign dolls, number about forty in all.

NMC's Many Educational Activities In Review

There are a few scenes that should fall and school days back to us. Top row, left to right: T. W. Knight giving instruction on X-ray. In the middle picture shows HMC L. A. Hanney giving correct method for taking X-rays. The third picture shows

Lt F. L. Kircher, NC, giving a demonstration of preparation of sterile solutions for external use in the CDR.

In the second row, left to right: we see first W. G. Ender HM3 in Medical Illustration. The middle picture shows a typical class of in-

struction in Laboratory technique given by HMC C. F. Blackmore, Jr. the last picture second row shows a few students from Physical Chemistry in a practical problem.

Third row, Left to right: Lt. F. L. Kircher explains the proper method of preparing bone for shipment. In

the middle picture, D. J. Cummings HM3 shows A. R. Holtry the method of reading a radioactive count while in the third picture HMC Hutchinson uses a Gieger Counter to do a radioactive count.

In the last row, Left to right, Miss Frazier showing D. E. Gillman the

correct method of giving exercise in Physio-therapy. In the second picture, Lt. Ann Davidson, Occupational Therapy wedges clay for use in ceramics for R. L. Nesman, HM3 and B. D. Harvey, HM3. In the last picture LCDR M. T. Sproul shows the correct way to label and store blood for the Blood Bank.

The lounge and ballroom of the Chief Petty Officer's Mess (Open) is shown above. "Sharp and trim" is the word from all NNMCM CPOs. A club any station would be proud to own.

Bookkeeping In Inspection Beginnings Reach NSHA Course Far Back Into History For Enlisted Men

By Ray W. Conrad

Bookkeeping, being the art of keeping a systematic record of business transactions, requires an artisan capable of this art. The Naval School of Hospital Administration in no way attempts to make artisans of this kind of the enlisted students, but NSHA endeavors to give them a well-rounded and workable insight into the various phases of hospital management which includes Bookkeeping Machine Operations.

Of course, we know that the old pen and ink ledgers of yesteryear are now as obsolete as the methods of Bob Cratchet. In their stead, we now employ bookkeeping machines of unbelievable mechanical performance.

The keyboard is standard and regardless of the complexity of the figures to be recorded there are only 10 keys for writing numerals. The machines are electrically-oper-

ated which makes for uniformity and increased legibility. All types and kinds of accounting records can be kept by a single machine since the parts are adjustable to suit the needs of the form used and in some cases two or more related forms can be collated, inserted and written simultaneously.

These mental giants can calculate complex figures faster than a sailor on liberty can spot a shapely blonde—and that's fast. Finance Department Instructors at this school have been qualified to operate bookkeeping machines and to teach the class of 1950-51 the basic principles of bookkeeping machine systems. Just another step towards making ours the most complete course in hospital management that is possible in the time allotted.

Nor is any member of the naval service exempt from such duties and responsibilities. We are inclined to think of the commanding officer as someone apart from the everyday duties of naval life. However, so far from the truth is this general belief that Navy Regulations devotes the entire seventh chapter, consisting of three sections, to the duties and responsibilities of those who are to command. Article 0708 NR directs commanding officers to hold frequent inspections of material and personnel of the command to insure its maximum operating efficiency.

Nor is the commanding officer of the U.S. Naval School of Hospital Administration, LCDR M. E. ZIMMERMAN, MSC, USN, relieved of his responsibilities by virtue of the fact that this is a component command of the National Naval Medical Center. A necessary function in any military organization and of time-honored significance, inspections are measuring devices of the individual pride of person, unit, and organization which cause a man to point with pride to himself and his outfit. It has been well said, "A division that is never inspected becomes merely an undisciplined group of men and petty officers. A ship that is never inspected becomes a thing of filth and license." Look about you and decide for yourself.

The symptoms are always the same—men in unclean uniforms or without complete uniforms—lacking the common military courtesies—failing to salute (how can they without hats on?)—and all the other marks of personal pride and organizational pride which have made the fleets of Nelson and Jones symbols of national unity and subjects of international acclaim. An officer of the Army once complained to this correspondent that this nation had lost a very effective fighting force when it failed to keep local divisions intact so that men could brag that they were from the "Kentucky Volunteers" or the "New York Raiders", etc. However, it goes back much farther than that and starts with the individual, his personal pride, and his desire to improve his lot and that of his fellow man. Commanding officers are responsible to see that the maximum effort is being exerted toward that end, and we are responsible to the command for a full measure of devotion, loyalty, and unified effort for the accomplishment of one task for one nation. It's as simple as that!

Navy Belles

By George

I have been slipping around hunting news for you. If there is anything you want to know I will tell all.

We now have four classes of people at Building 123—note, they are, Port, Starboard, Night-duty, and School girls. I don't think you can find any of the same five girls in the place at the same time. You just say a hurry up, "Hello" to the girls passing by.

I hope by now you have all met our new Wave Officer, Doctor Gioconda Saraniero. She replaces Miss Sproul, who has gone to (sunny) California. Doctor Saraniero made a wonderful impression on us Wednesday and Thursday at her "Meet the Waves" in the lounge. Miss Butterfield introduced her to the girls. We were all made very happy when finding out, Miss Butterfield would be our new representative. She has been around us before and we are happy to have her for a leader, because it is basketball season, and she has always been one of our backers.

Basketball, Did you know basketball season is almost here, and every one of you will be needed in one way or another. Either in the game or on the side yelling, we need you to back us, and keep us out in front. We had a wonderful team last year, but this season should be better. We have some hold overs from last season for a starter, but we will need you. With the hours we work probably we will need a Port Team and a Starboard Team. With your help we can do it.

Just Around Our House

The place to gather news is, the Waves coffee room, at such a time the coffee gang is there and then some new faces drop in and sometime it gets so full you can't even get in the room. For non coffee drinkers like myself the other night they served tea, the best tea I've had in ages.

Two of our Waves have been nursing mosquito bites which turned out to be poison ivy.

Terry and Rusty have been going to school both day and night these days. Their classes in Pathology keep them at the hospital days and nights.

See you around, just look for the girl from the heart of Maryland.

Corpsmen, Medics, Get "Well Done" From Fighting Men

By a U.S. Navy Combat Correspondent

ON BOARD A U.S. NAVY HOSPITAL SHIP AT SEA, Aug. 1. This morning I had one of the most moving experiences I've had in combat area. I entered a ward filled with wounded soldiers and marines. The dazed men lay quietly in their bunks, some laboriously writing letters, some staring blankly at the overhead, some just watching smoke curl up from their cigarettes.

Med School Scuttlebutt

By O. C. "Skip" Skinner

The new tune we hear around the passageways these days is "Through the long and sleepless nights all I mount is slides". The midnight oil is really burning lately in Chief Spangler's Lab. 15 Pathology classroom. They are at the microtomes and mounting fluid from dawn to dusk. But there's plenty of time to sleep in your spare time, isn't there boys???

Frank Adams HM1 has been going around with a very solemn look lately. Seems that his favorite brunette has taken leave and Frankie is upset. Don't worry Frankie she'll be back soon and everything will be normal again.

Here's one that should be in Ripley's Believe it or Not: John Knight HM2 is talking very seriously on the subject of marriage these days. Here's wishing you plenty of luck, John.

Seems some of that good old California (liquid) sunshine has been coming our way the past few weeks.

Who are those two guys arguing about the weekend watch list?? None other than our good friends John Giragosian HM1, and our famed MAA Carl Norris HM1. Seems poor John doesn't like the weekend duty, but then who does? By the way both of these two notorious and friendly Med. School

To love oneself is the beginning of a lifelong romance.

Oscar Wilde

characters are expecting orders soon and I am sure that the whole command will miss them.

Quite a few of our personnel have received orders and left us for different duty stations lately. Among these were LCDR M. T. Sproul who along with Lt W. B. Hewitt, LTJG J. H. Parker, and C. E. Walters HM1, left for USNH Oakland to set up a Blood Bank. We are all sure that they will do a very good job there as they have done here in the past. Also leaving us for Green Cove Springs, Fla., was Paul K. Terrell HM2. To the receiving station at San Francisco were Roberts, J. B. HM2, Hatcher, P. B. HM3, Hunter, R. L. HN, and Smith, J. O. HN. Here's wishing the boys Smooth Sailing.

Only a few more weeks for the Lab. 14 boys and it will be "good-byes" and "hellos" as another class will be coming in to take its places. One man in the class is really counting the days until graduation, or could it be for some other reason?? It seems that our good friend Roger Luko HM3, is stepping off the deep end and getting married October 14. Best of luck is wished by all.

I tried to start a conversation but got no answers except yes or no. Then I asked a marine if there were any hospital corpsmen at front. Throughout the ward wounded men responded as if I spoke a magic word. Eyes brightened, cigarettes went up to jaw angles, letter writing stopped, the men all began to talk at same time. I took down what was said in shorthand, and the dictations will tell the story better than anything else.

A marine private said, "Hell I've seen corpsmen at the front. I'd like to get the name of the who saved my life. Our tank burning and all the crew but were killed. I was shot through shoulder and pinned under the tank. They were pouring machine gun stuff at me and it was only because I was low under the tank that they didn't knock me off."

"This here hospital corpsman runs up the hill with the enemy giving him everything, but he comes out and drags me back. Well we are safe, I ask him his name and start to thank him. He says 'don't bother me, there's another poor SOB shot up on the other side of the hill', and then he runs back through the machine-gun country."

A soldier interrupted, saying, "I saw a medic with his finger blown off put a tourniquet on wrist and then go about helping two guys with his good hand. There's no medal high enough for those guys. They should have a double Medal of Honor."

A marine spoke up, "We give the corpsmen a bad time in peace, calling them pill rollers and jugglers, but we respect them. They are quiet birds and shy the devil, but what a job they do in combat!"

Another marine said, "We have thirty men in our outfit and five of them were corpsmen. I guess the enemy knows how important they are for our morale and try to kill them first. Our corpsmen don't wear the red cross on their arms anymore."

A soldier said, "Don't take a word for it, just go out with the Ninth or the Thirty-fourth and any GI you meet on the road. Last week a lot of guys passed out from the heat, and then Koreans drove us back. The Koreans bayoneted anybody they see on the ground just to make sure they are dead. Our medics went forward after we had retreated and pulled back the guys who were still alive. One of the medics got it right through the head, but the other one got over one back okay."

Another soldier broke in with "The medics on this Navy ship sure look after us. And the nurses too. I wonder if they ever get any sleep."

I remarked, I suppose you fellows will be going home soon."

The marine private, the first one who had spoken, said, "Nope, I'm patched up and feeling better than ever. I'm heading back with my outfit. Those Koreans had their chance at me and bungled it. Nothing can touch me now. I figure I should be back with my buddies. Besides, I want to find the name of the corpsman who got me out from under that tank."

CENTER NEWS

Recreation Department and will receive any matter directed there.

Don't beat your brains out or the telephone operator's ear off asking for our telephone number—we have none as yet. Announcement will be made as soon as it is installed.

Procurement Of Draft Eligible Officers Stated

The Bureau of Naval Personnel recently announced the program for procurement of officers that are eligible for draft eligible candidates.

The Naval Reserve, applications will be processed for doctors, dentists up to their receipt of notice to report for preinduction physical examinations. After they received this notice, they must submit a request for immediate active duty if commissioned in the Naval Reserve, along with their applications.

Applications for doctors and dentists may be submitted after receiving their notice to report preinduction physicals, if they are accompanied by the request for immediate active duty if commissioned.

Also, candidates who are draft eligible, when requesting commissions in the general line of the Naval Reserve as electronic specialists will have their applications processed by procurement officers if requests for immediate active duty upon commissioning also submitted.

In applying for commissions in Regular Navy, in classifications doctors, dentists, medical service officers, lawyers, chaplains, applications will continue to be processed until the candidate is actually inducted.

Not Much Research Involved

By N. J. Marbois

To the strains of the "Marine Band" fond farewells were bid to the HMI, and to HM3's John Hardy, Walch, and French. Alohas for Chief Howard, Adelman HMI, Bullock HM3 and Nelson DN, who have departed to parts and places unknown. A welcome aboard is extended to Ensign Sharp, a former gunners mate who hails from that great center of culture and learning, Boston.

To those people with keen ears, explanation is proffered as to the nature of the rather frustrated and emanating from the dog. It is the result of the successful completion of "Operation Deaf." May the students in Med. School burn the mid-night oil in a well done to the crew of the Dental Surgery. To coin a phrase, their bite is now worse than bark.

Around the coffee messes the of conversation sometimes around is the pros and cons of occupational hazards involved with the marines, or aboard ship. As one expert put it "the relative merits of the receiver of assorted addressed general delivery to whom it may concern, the special delivery C.O.D. in the office." Against words of "Salty Sam" who says the only thing left when Davey decides to go into the salvage is to make like a fish or your name to Jonah.

What's the gurgling noise?"
It's me trying to swallow

Personalities About The Center

Henry Aguirre HMI

"If you have a good understanding of art, you can take a better picture", says Henry W. Aguirre, HMI of the Photo Lab. He has been interested in art since high school, and when he took up Photography he claimed his hobby of drawing was an invaluable asset. His theory is that through an understanding of perspective, depth and overall composition in art you unconsciously apply that knowledge to photography. He became interested in photography in 1940 when he realized the "potential possibilities in pictorial advertisement".

New York is home for Henry. He first became aware of a world about him in the thumping burrow of Manhattan in 1921, but soon after, moved to Long Island. In

In the United States there is more space where nobody is than where anybody is.

This is what makes America what it is. —Gertrude Stein

Long Island he attended the School of Industrial Art where he first became interested in drawing, Stevenson High School and George Washington High from which he graduated. While in school, he was active in many intramural sports, but did his best in the varsity swimming team where he competed in the shorter races.

As it began for many others in 1942 Navy life came as a must, but he has since decided to stay in the service. From Newport, R. I. where he took his "boots" training, he went to Portsmouth, Va., for Corps School and subsequent duty at the Norfolk Naval Hospital. From Norfolk, he went to the Brooklyn Naval Hospital and other duty stations in the New York area: Navy Yard Dispensary, St. Albans and Lido Beach.

It was at Lido Beach that he helped form a hospital unit which was sent to South Hampton, England where he remained for nine months. Then came the West Coast, Shoemaker, California and finally transfer to the USS Galia, "where I joined the ranks of the chippers." When asked if he ever graduated from the chippers on his three year tour on the Galia he said, "Yes, I was graduated from chipping paint over the side to the hold!"

While on the USS Montauk, AKN6, he participated in the invasion of Okinawa and later in the occupation of Tsingtao. In China he also visited Tiensien and later Saesabo, Japan. He also served aboard the USS Tidewater, AD 13.

Aguirre reported for duty here under instruction at the Photography Laboratory in December 1949. He is married and resides in Bethesda.

Chief Henderlite

From Roanoke, Virginia comes Ralph D. Henderlite, HMC of Center Command. He originally came from Pulaski, Va., and was educated at the Andrew Lewis High School in Salem, Va. While a student, he participated in many sports, but found himself too small at that time to join the football team. However, he played three years varsity baseball, where he developed into a grade A first baseman (a fact illustrated by his recent position on the Admiral's team).

He spent boot in Norfolk and Hospital Corps School in Portsmouth, then a term at the Naval Hospital in Portsmouth. In 1941 he was sent to the Submarine Base Dispensary in Panama, and did various other duty ashore: San Bruno, California, NAS Norfolk, Bainbridge, and the 2nd Marine Division at Camp Lejeune. During the war, the Chief qualified as a Para Marine in the 4th Marine Parachute Regiment, but the Marines never used parachute troops, so he foot-dogged it on Bougainville and later returned to the States to help form the 5th Marine Division, which he left before they were sent into the foray.

The chief has served aboard two ships: the USS Auk, AM 57 and the USS Noa, DD 841. While on the latter he coached the ship's hardball team. They defeated such outstanding clubs as the Missouri, Albermarle, and Mindora. In 1948 the ship took top honors in the Key West League.

In January of 1950 he reported here to Center Command as Chief Master-at-Arms. Now he is in charge of the Sanitation Crew. Since his arrival, the chief has been outstanding as the coach of the Admiral's Varsity baseball team. But he has not only limited himself to coaching, for he plays first base, and, according to tales told, is a heavy hitter. His 321 batting average seems to confirm this fact. "The Admirals had an excellent club," he said, "but we could not get enough practice in to really polish the rough edges." He hopes to be here again for the baseball season next year.

FOREIGN VISITORS

(Continued from page 1)

associated with the child research section. He is particularly interested in physiological functions and in human growth.

Dr. W. J. Witten, Australia, visited NMRI recently. His visit was sponsored by the Australian National University.

From Parma, Italy came Dr. Ernesto Manghi of the University of Parma to visit the Naval Hospital. Dr. Manghi was particularly interested in the Neuropsychiatry Department.

**Donald Halverson
P2LA2**

The fame of knowledge burns bright and draws many into its glowing circle. This theory is proven by one of our personalities, Donald M. Halverson, P2LA2 (Petty Officer Second Class, Laboratory Assistant Second) His Majesty's Royal Canadian Navy.

Halverson was born in Malagash, Nova Scotia, Canada, on March 2, 1924 and he attended school in Malagash. He entered the Naval Service in June 1941. Since then he has served at HMCS (His Majesty's Canadian Ship) York, Toronto, Canada; HMCS Stadacoma, Halifax, Nova Scotia; HMCS Naden, Victoria, B. C.; and HMCS Ontario, Victoria, B. C.

He is now attached to HMCS Bytown, which is the Headquarters for the Royal Canadian Navy, and reported here October 11, 1949 on Temporary Additional Duty to the Naval Medical School for a course of instruction in Laboratory.

Halverson is married and his wife and one child live in Canada. He likes to play hockey and is interested in woodcraft. "I greatly appreciate the instruction I have received here", said Halverson, "and I will be sorry to leave". He will graduate on October 6.

NEWS SHORTS

(Continued from page 1)

Test Tube Holders:—The test tube holders is a newly organizing club that is sponsored by the Maryland Society of AMT. It consists of members of Lab. 14. Soon it hopes to branch out and take in Lab. 15 and other lab workers in the Baltimore area. HMC Porter who is president of AMT in Maryland is acting as advisor. At press time the roster includes 30 members but is expected to grow rapidly as more personnel are contacted and interested. The recruiting committee is now looking for new members so all interested personnel please contact Chief Porter.

CDR J. D. Wharton, MC, USN, NMRI, has received his orders and will report to the Field Medical Research Laboratory, Camp Lejeune, N.C. for duty as Executive Officer.

While here CDR Wharton served as NMRI Executive Officer; Professional Assistant to the Executive Officer; and did research in bacteriology following a field trip to American Samoa.

Recent "name changing" of NEWS staff personnel has resulted in nothing but confusion. Comments like, "This fellow, C. J. Goebel, seems to have a style of writing similar to that former Polish sports editor, C. Karolczak. Actually they're one and the same fellow. Might be that he's looking for an excuse to get into the pay line—twice.

Salt Spray And Barnacles From The CPO Club

By Billy Bones

Scarcely had the commission pennant been struck at the main and the echoes of the Boson's pipe died away when all hands turned to getting the CPO Mess (Open) shipshape for the long and happy cruise of providing recreation and amusement for the CPO's and their dependents and guests.

The cruise has been underway now for over nine weeks and it appears that the initial rocks and shoals have been skirted and the anticipated storms have been weathered, thanks to the course set by the manager of the club, HMC Betzner, and his motley crew comprising the Board of Governors.

For the benefit of those lubbers and new members who just reported aboard, or for those who have been caulking off in the double bottoms we would like to pass along the following info on the club hours and entertainment: Open daily from Tuesday to Friday from 1630 to 2300; Open Saturdays from 1200 to 0100; Open Sundays from 1500 to 2200; Closed all day Monday for clean sweep down fore and aft plus field day.

According to the Quartermaster's Log, Bingo is held weekly on Thursday evening from around 2030 till 2230 with cash Bingo prized awarded plus a big Jackpot on the final game. Dancing each Saturday night from 2100 to 0100 music being furnished by "Hank and his Hungry Four" from the Navy Yard Band.

Commencing on or about the first Sunday in September the mess will provide special dinners on Sunday afternoons and evenings for those who are tired of eating in the Hospital Mess, or the little wife's home cooking. Give the Mrs. a treat and secure the galley fires at home. Enjoy a delicious dinner of chicken or steak at reasonable prices in a cheerful atmosphere among friends. Bring along the small fry and don't forget your Mother-in-law and friends or guests. Prices on the drinks have been reduced to suit the purse and needs of all, especially on Sundays during the cocktail hours.

So Avast Matey's, square away and heave to. If you don't have the dogwatch on Junior tonight, take the long boat to the stern entrance of the club, located in the basement of the recreation building. Parking space is provided free in the rear for all war canoes, gondolas, rowboats and punts, as well as for those who can afford gigs and barges. See you next issue.

BARBEE (Con't from page 1)

of laborers, painters, carpenters, electricians, mechanics, and chauffeurs; a gardener service; janitors; and a laundry capable of handling the thousands of pounds of linen from the surgical suite, wards, and quarters.

In order that we may perform our duties everywhere in the command we must depend upon the coordinated efforts of these people who perform their functions under the managing direction of the maintenance officer. In order that this officer may do his best job this school must offer him the best possible information and instruction on these complex subjects.

Mindful of this mission the Bureau of Medicine and Surgery has assigned officers to study maintenance problems at the Michigan State College, and the American University. The school will now have the benefit of these studies in presenting modern methods in the several phases of Maintenance Division Management.

Football! Right around the corner and coming in with a—bang! Gridiron history is yours for the making. Take a look around—a good look—and you will find the roaring, slashing, backfield horse-men of old, galloping, driving, toward higher goals—followed by the ever faithful water brigade.

GEORGE FUNK already has his "nose to the grindstone" in an effort to bring a 4th straight football crown to Center Command. Filling in as side kick, Tommy Brothers, is laying the whip to his "husky eight" with able bodied men like J. C. Woods, "Banjo," and "Fred-die the Fox," on the receiving end. Looks like a snappy backfield is shaping up in them there parts, son, mighty "snappy."

HMC P. L. Davis is having a difficult time determining whether he should go back and start over with some "formal training" in golf or just continue to shoot a 42 for 9 holes.

I watch the ball
I cup my hands,
I'm in a fog
But in a perfect stance.
I sigh
And backer off and—go
And "bam"—
I missed that doggone hole.

Welcome and greetings to Will La Fontaine, and Will Morrison, the newest additions to the NNMC lifeguard stands. Will M. has always been in favor of an NNMC swimming meet. Well boys, you're located in a strategic spot. Will you, Will, or won't you make some preparations?

Mysterious happenings and doings around NMRI lately. Is Bruce Tillman really cooking up a title contender football squad, just as he did two years back? With such able bodied men as K. L. Sealey, R. L. Johnson, "Tiny" Jones, John Parker, "Duke" Dauksha, Ray Gismond, "Butch" Conto, and 194lb. Bob Cameron—things should really be looking up. Time will tell, Bruce!

Hear tell that NH high tailed it down to PRNC to the intramural champion softball playoffs. Don Smiley's thrilling 6 inning no hitter finally ended in the 7th, and the NNMC representatives were defeated by a score of 2-1. NH is not necessarily the leading team from NNMC, for our play offs are still in session—but they're trying darn hard.

Oh, by the way, Med. School "forty-niners" have won their last three softball games. (The above advertisement was paid for by the Gismond-Palmer "Forgotten Softball Players" organization.)

Sport Scope

By J. C. Woods

Alas and alack! In the early part of May this column predicted that the Detroit Tigers would win the American League Pennant. Months of relaxation followed. Suddenly the Washington Senators (bless their valiant little hearts) decided they wanted to play baseball. In doing so they turned the snarling Tigers into a pack of meowing putty cats. By the time this article reaches the public things may have changed a little. Right now the Tigers are two and one half games out, the Yanks have developed a case of a Pennatitis which is caused by taking too many ball games, and the Red Sox have their binoculars going full blast. Incidentally, have you noticed how many games the Sox have won lately—home games that is?

Cleveland has just signed up a second Lemon. This one is Jim Lemon (no relation to Bob). The tribe will have to go a lot further to beat Washington when it comes to signing up lemons.

Football, a game invented by Sammy Baugh some years ago, is beginning to take over the spotlight. One of my colleagues Grantland Rice, ahem, predicts that Notre Dame will be the Nation's number one team this year with Army running a close second. According to Mr. Rice the Midshipmen aren't even in the race. But it is a well known fact that the Middles have a reputation for turning predictions upside down. They'll definitely be in the running this year.

The Baltimore Colts had better cut out the horsing around and concentrate on a little more football. The Colts are going into their third year of pro ball and their record thus far has been anything but impressive. Just a Johnny Lujack pass from the Colt territory is the home of the mighty Redskins. The Skins have shown themselves to be quite a threat in this years' pre-season games. Backed by the expert passing of Baugh and Gilmer they should go to the top.

In the boxing arena, Joe Louis will attempt to recover the world heavyweight boxing crown on September 27. Ezzara Charles will be the defender. Charles is by no means a champion like those gone by, but he should be able to out-box the brown bomber who is not getting any younger and has been out of circulation for quite some time. The best that can be said for Louis is his Sunday punch which, if it does come through, will be a lucky one, and his psychological effect upon Charles, which is enough to unnerve anyone.

Here at the Center football practice has all ready started and the Center Commanches show plenty of their old sparkle. Although Center has lost quite a bit of their regulars, adequate replacements have been found in Tom Brothers, Gene Medcalf, Dick Waters and F. W. Winn. The hospital crew also boosts a good team this year and according to the man who "Nose", Don Polizzi, they are going to take the title. In this the Dental Dukes should not be overlooked. The Dukes almost upset the Commanches last year but were edged out in the final minutes of the game 14-13.

In closing it must be added that none other than the great Don Nichols has consented to play football for the Center this year. This truly makes the Leagues a lopsided affair. Hey Don?

Whaaa...

According to Everett A. Hay, HM1, NMS, his three month old daughter, above does not always strike this pose. "She can be good," he states. Her name is Deborah Jean Hay. The Hays reside at Oak Crest Trailer Courts, a few miles out of Gaithersburg.

Sport's Highlights And Predictions

By O. C. Skinner

The hard pressed Detroit Tigers were handed another staggering blow last week, when their ace pitcher Art Houtteman was ordered to report to his local draft board. This is probably one of the hardest blows they have suffered all season. With the Yankees taking command of the top spot, things are looking bad for the Tigers.

Our own Washington Nats spoiled the Tigers top spot by beating them two out of three. Seems the Nats can always beat the 1st division clubs but can't whip the last place clubs.

The Red Sox Will Take The Pennant!

The Red Sox have won 15 of their last 16 games and they just can't seem to be stopped. In my opinion the Red Sox will be the top spot club in the AL this year. They had a lot of hard luck midway in the season but have found themselves again and I say: "make way for the Red Sox".

On the other hand in the National League it looks as if the Philadelphia Phils have the pennant just about tied up. They are now 6½ games ahead of the second place Dodgers.

Can Kiner Do It?

The big question that is going around these days is Can Kiner beat the fabulous Babe Ruth's record of 60 home runs in one season? He has 40 now with only 31 games left for Pittsburgh. Can Kiner get 20 home runs in 31 games? Its going to be close but my prediction for this year finds Kiner with 52 home runs.

Watch Out For The Redskins!!!

It looks as if the Washington Redskins are really on the move in their pre-season games, having won four in as many starts. With such hopefuls as Harry Gilmer and "Slingshot" Sammy Baugh doing the passing and the running of Bill Dudley they seem to have a top notch team.

The Detroit Lions seem to have compiled a neat little organization with the aid of rookies Bobbie Lane doing the passing and the all around ability of the great Doak Walker.

Even topping the Redskins and the Lions my prediction for this season's outcome will find Stephen Van Bueran leading the Philadelphia Eagles to capture the crown. The Redskins will be holding a firm 2nd, while the Lions will be in the 3rd spot.

Commissary Proves Too Strong For NP Squad

The up and coming NP "thunderbolts" finally "met their match" in the form of a highly organized Commissary crew. This resulted in a nose dive from their number one spot on the softball pyramid.

Candidates For All Star Team In Review

To be or not to be? That is the question. And what a difficult question to be answered, with a tally of approximately 100 men fighting it out for "all star honors."

Best suggestions seem to indicate that team captains should hold "heap big pow wow" and determine leading warriors for various team positions. Until such meeting is called it seems the following list of eligible players are worth considering and should be observed during play.

1st base—

Lotts (Med. Sch.) Cummings (Print Shop)

2nd base—

Oddis (NH) Gismond (Phys. Med.)

3rd base—

Dischinger (Lab. 14) Rock (NP) Karzawski (Lab. 14)

S.S.—

Kaiser (NH) Taylor (Comm.)

L. F.—

Smith (NMRI) Arata (Comm.)

C. F.—

Doverspike (NH) Pinto (NP)

R. F.—

De Fillippi (NDS) Holland (Lab. 14)

Catcher—

Palmer (Phys. Med.) Britt. (Comm.)

Pitcher—

Dias (Comm.) Smiley (NH)

There they are! Look them over. Consider them, then discard them and bring your own suggestions to the manager's meeting to determine the "Softball Players of the 1950 Season."

Quantico Tops NNMC Netters

"The Marines have landed and have the situation well in hand." A phrase often used but never so true as when Quantico MCS played the "visitor" role to NNMC recently.

After a lop-sided defeat by NNMC a short while back, the marines returned the visit with the thought of "turning the tables" on their Navy host. This they accomplished by defeating NNMC 5-4.

Number one man in the "singles" entry was Cdr. RUEBUSH, representing the Navy, who overcame the stubborn resistance of Capt. JEFFERSON. This set was quickly followed by MERCER's (NNMC) thrilling victory over FOX (Quantico).

Quantico then took possession when ATKINS, LA SPADA, and BENGART met and defeated their Navy opponents, consisting of CUMMINGS, TONG, and GARGOSIAN. Some fellow named GOEBEL disposed of ROBBINS (Quantico) after 3 backbreaking sets.

Going into the Doubles tournament, both teams were tied up 3-3. RUEBUSH and MERCER fought and finally defeated JEFFERSON and ATKINS while Quantico sewed up the remaining two matches.

All in all, a thrilling match was offered to all spectators while the hearty Bluejackets fought "nip and tuck" with the aggressive Leather-necks.

With a total of 8 strikeouts, one walk, Dias, brilliant pitcher from Commissary, with the assistance of men like Taylor, House and Horek, led his hard fighting crew to a 7-3 win.

Rock and Johnson set the rolling for NP early in the 3rd were quickly turned back in the 4th when Payne, White, and toured the bases for 3 runs. At that point on, Commissary's ing momentum added 4 runs within the succeeding innings.

Outstanding thrills and were provided by the daring of third baseman, HN Rock, and 2nd. baseman, "Guy" Me-Valuable men to a valuable

Actually, the game turned out to be a good example of the pressure applied to the umpire during the intramural game. All suggestions were taken into account and EENT would be giving tests daily for the next two weeks. Personally, I think any umpire "calling em behind the back" would do well to have his insurance paid up in full. Boys are really out there to win but—when the ump calls them out, decision is final and no amount of disputing will change that decision. But, heck, what would baseball be without a good argument?

Med. School Hits "Comeback Trail"

A "free for all" race for championship is drawing near as intramural softball league draws its finishing breath. To aggravate the situation, Med School, previously a highly outmatched team, invigorated their existing lineup, Ray Gismond, was all that was needed to hustle the Med. School team into high gear.

Dr. C. D. Boonstra has been one of the major reasons for the changing status of the Med. School "jerseys". The hitting of Dr. mererro and "Big Moose" Kov plus the brilliant fielding action of 2nd baseman R. Gismond, led up to a determined little team.

LOVELY TO SEE—on TV. The sangstress Dagmar who lends musical merriment on NBC's TV program, "Broadway Open House."

A "conference" is a group of individuals who can do nothing individually, but as a group meet and decide that nothing will be done.

Wallflower: A girl who wears a sweater to keep warm.

Little pay check in a day, You and I will go away, To some gay and festive spot, I'll return, but you will not.

T. W. W. Smith Comm. Officer Leaves NNMC

T. W. W. Smith, MSC, USN, commissary officer, and the gentleman responsible for the most popular call on the station, "Chow down," will be transferred about October 1. He will go to the naval hospital at Charleston, S. C. for duty.

TJG. R. A. Edlund, MSC, USN, will come from the naval hospital in San Diego, California as Lt. Smith's relief.

ADM Willcutts, Commanding Officer, NNMC, rates Lt. Smith 4.0 "mission accomplished" as com-

Medical School Library Redesignated In Honor Of Former Surgeon General

The medical library of the Naval Medical School was formally redesignated as the Edward Rhodes Stitt Library here at the National Naval Medical Center on Thursday September 14, at 4:00 p.m., during brief ceremonies attended by the widow of RADM. Stitt, service and civilian friends of the former Surgeon General.

RADM Morton D. Willcutts, Commanding Officer, National Naval Medical Center, presided over the ceremony and made the presentation address. CAPT. Bartholomew W. Hogan, Commanding the Naval Medical School, delivered the acceptance address. The program was opened with prayer of invocation by Chaplain Grady Gatlin. Music was furnished by the Navy Band.

Presentation address by Admiral Willcutts:

"Mrs. Stitt and Guests: We are here this afternoon for the formal dedication of this medical library, an honored division of the Naval Medical School.

I regret that due to official absence from Washington the Surgeon General is unable to be present. I am pleased to note that Mrs. Swanson is here.

Mrs. Stitt, Senator Hill of Alabama phoned me at noon, expressing his deep regrets that he would be unable to attend because of pressure of urgent Senate business. Senator Hill was a member of the Gorgas Commission serving with Admiral Stitt. He expressed his very highest admiration and warmest respects for the Admiral, stating that he had never known a more kindly and understanding gentleman.

Vice Admiral McIntire has also just informed us of conflicting official business and is unable to get out at the moment.

The Deputy Surgeon General, Admiral Pugh, is present. As Commanding Officer of this Naval Medical School, the then Captain Pugh

Soldier, Bullet, Bible Strange Story From Korean War Front

Truth is often stranger than fiction. One such instance is the case of Corporal Douglas L. Cook and his Bible; a U.S. Army Korean casualty now on Ward 6C.

Red Feather Appeal Gets Underway Today

The Community Chest Federation Fund Campaign will get under way today with a Government unit "Kick-off" meeting for volunteer workers in the Departmental auditorium.

No scale of giving has been established at the Medical Center—instead all personnel are asked to contribute at least as much as each person gave last year and to make their contributions promptly in order to complete the drive early.

NBC's "Battle Report" Televised From Tower 18

The National Broadcasting Company televised a portion of the regular weekly program "Battle Report" from the 18th floor of the Tower here on Sunday, September 19, featuring presentation of Army Korean casualties who are patients in the naval hospital.

Admiral Morton D. Willcutts, Commanding Officer of the Medical Center appearing before the camera for a brief commentary on latest facilities of the Center available for treatment of members of all the armed forces, and veterans, said, "The National Naval Medical Center is humbly proud and feels keenly the privilege of extending all of our great medical facilities to our brothers in arms sick and wounded from the distant battlefields.

We welcome all members of our sister services, the Army, the Air Force, and of course our own Navy casualties including our beloved and heroic Marines.

Our Medical Center is prepared and stands ready to meet all service medical demands."

Upon being quizzed as to the Bone Bank, the Admiral said "Yes, I am pleased to report progress in the practical use of preserved human tissue other than blood and plasma.

We have in operation a bone bank, a skin bank, and a blood vessel bank. As you know war wounds are often widely destructive of tissue and require major reconstructive surgery,—hence the value of having immediately available preserved bone, skin, and blood vessels."

After completing his basic training in the Army, Cook was sent to the Fifth Regimental Combat Team (RCT), Schofield Barracks in Hawaii. They remained there only a short time before being ordered to Korea.

The rest is best told in his own words: "The North Koreans were on top of a hill, it looked like a mountain but I guess you can call it a hill, and we were ordered to take it. I was carrying a grenade with the pin pulled. I was one of the

first ones to reach the top and when I got there the North Koreans opened up with a Burp gun. They got me eight times in the legs. I was carrying my Bible with me in my pants pocket. It stopped a bullet that would have entered my stomach. I threw the grenade and then rolled back down the hill. The medics patched me up. I guess that's all of it."

He brought the Bible back and it is now at home with his parents.

The nineteen year old soldier originally hails from Grand Rapids, Michigan. He attended Central High School there but left school and went to Detroit, Michigan to enlist in the Army on December 7, 1949.

Buses Provided For Nearby Navy Football Games

The Transportation Division, Bureau of Naval Personnel, will operate chartered buses to the stadiums in College Park, Maryland and Baltimore, Maryland for the Navy-Maryland Game, 30 September; Navy-Northwestern Game, 7 October; Navy-Southern California Game, 21 October; and the Navy-Tulane Game, 11 November. These buses will depart from in

(Continued on page 5)

MC Renard New President PO Club

MC Joseph R. Renard, USN, has been designated as the new President of the Chief Petty Officers' Mess (Open) here at the Medical Center.

Chief Renard relieves Chief Wilkins, who was the first president of its establishment in July of 1949. Chief Wilkins has been transferred to Port Huenuemea in California.

A popular chief of the naval hospital command, Chief Renard has been on the Master At Arms force since his arrival about two years ago. He has also served as Senior member of the Station Dance Committee and on the Enlisted Recreation Committee. He has always been an enthusiastic supporter of many activities of the station recreation program.

The chief and Mrs. Renard (Rosemary from Kansas) have four children, two sons—Joseph age 6 and Robert age 14 months. Two daughters—Marlene age 3 and Dede age 1. They live at 327 Second Street, Apt. 3, Washington, D.C.

St. Albans Gets New Hospital

Construction work on the \$14,000,000 U.S. Naval Hospital at St. Albans, Long Island, New York, is expected to be completed by January, 1951, three months ahead of schedule.

The new hospital includes a six story administration building, six three-story ward buildings, and a two-story subsistence building. It will be completely modern.

Special conduits are being installed for television, as well as a complete bedside radio system. The operating suites will be air-conditioned with humidifiers controlling the relative humidity at 55 to 60 percent. In addition, special terrazzo floors will eliminate static electricity and prevent explosions from anesthetics in the operating suites.

Original plans for the hospital were made before World War II. The war necessitated a quickly erected temporary hospital structure, now in use. The new St. Albans hospital will be the only Naval hospital in the New York area. The old Brooklyn Naval hospital, built in 1931, was disestablished two years ago.

Symbols of Immortality

Our immortality shines on the earth,
Mirrored by the poet, prophet, seer,
And all whose genius makes their vision clear
To Marvel at our universe and birth.
As long as Nature is the home of man,
And skies are more than dust and night alone,
And human minds reach to the farthest zone
Of thoughts and dreams beyond our finit span—
So long no science chains us to the sod,
So long our earth born beauty transcends clay.
The joy and sorrow, the faith and hope, which sway
Life are so heartfelt and so true that God
Must be both our creator and our guide,
And in His image we are deified.
—James Patrick McGovern.

Ed. Note: James Patrick McGovern was recently a patient at the hospital here. The above poem was inserted in the Congressional Record by Senator Thomas of Utah.

Patriotism is easy to understand in America. It means looking out for yourself by looking out for your country.

—Calvin Coolidge

Rating examinations for pay grades 4, 5 and 6 will be held in January 1951.

The next series of general hospital corps lectures will begin October 2 and will extend over a period of twenty weeks.

Classes will be held in the classroom of Building 135 Monday through Thursday from 1330 to 1530.

All staff hospital corpsman second class and below will be required to attend.

(Continued on page 5)

Disaster Service Important Job Of Red Cross

Disaster Service is one of the most important basic responsibilities of Red Cross. A large proportion of the agency's national budget goes into providing relief and rehabilitation for sufferers from natural disasters. Hurricanes, tornadoes, floods, explosions, forest fires, etc. leave in their wake homeless families, disrupted communities, and frequently death and physical disability.

For disaster suffering, Red Cross has a program that gets into relief operation very quickly. For some disasters, such as river floods, the damage can be anticipated and Red Cross can be on the scene before the disaster occurs. For others speed of operation is possible because of careful Chapter organization in local communities. Each Red Cross Chapter has a network of committees made up of volunteers who take their responsibilities for community planning very seriously. It is the responsibility of these committees to have all resources lined up ready to meet immediate emergency services. They make sure that a variety of temporary shelter facilities are available, that the community can have available emergency supplies of food and clothing, that doctors and hospitals in the area can be called upon, that an emergency supply of blood is available, and that some alternate transportation and communication means are at hand in case the normal ones are disrupted. Volunteer workers are trained so that they know what to do when disaster strikes.

There are two types of assistance given in disaster situations. During the emergency period, mass shelters with mass feeding programs are organized and operated. As soon as possible, however, Red Cross workers deal with disaster needs of people on an individual basis. From Red Cross funds it is possible to replace those disaster losses of families that are actually needed for shelter and basic maintenance. Disaster caused injuries and illnesses are given medical and hospital care at the cost of Red Cross when the victims do not have the means for providing this care for themselves.

Now that this Nation is engaged in another civilian defense program, it is only natural that the great Red Cross network of disaster preparedness should play an important role.

Lt. Smith

(Continued from page 1)

missary officer here. He also served as an Instructor in Commissary Technique at the School of Hospital Administration.

Lt. Smith entered the Navy in 1925 as an Apprentice Seaman from his home state of South Carolina. Hospital Corps School came early in his career followed by many other types of duty.

Before the war he served at most of the large hospitals, with the Marine Corps for five years at Marine Corps depots and recruiting stations, and on several kinds of ships, destroyers, minesweepers, and tenders to mention a few.

With the beginning of the Neutrality Act, Mr. Smith went on a destroyer which patrolled the Atlantic, assisted convoys, and hunted for enemy submarines. This duty lasted only eleven days before the Japanese attack on Pearl Harbor.

During the war, Mr. Smith, who had received his commission as Warrant Officer in 1942, moved about quite a bit helping with the establishment of the new hospitals.

Gen. A. A. Vandegrift Famed Marine Corps General, Patient Here

General Alexander A. Vandegrift, eighteenth Commandant of the Marine Corps is now a patient on T 16 here at the Naval Hospital, served as Commandant from 1 January 1944 to 1 January 1948. He commanded the First Marine Amphibious Corps in the landing at Eniwetok, August 1944, Bougainville, and the First Marine Division, Reinforced the battle for Guadalcanal during World War II.

second lieutenant on January 1909.

The famed General has many duty stations in the U. S. States and foreign countries. He rose from a second lieutenant in 1909 to a four star General in 1945. He was the first Marine Officer on active duty to reach star rank.

General Vandegrift holds an honorary degree of Doctor of Military Science from Pennsylvania Military College, and honorary degree of Doctor of Law from Harvard University, Brown, Columbia, and several other Universities and John Smith College.

In addition to the Medal of Honor, Navy Cross, and Distinguished Service Medal, his decorations and medals include Presidential Unit Citation with Bronze Star, Solomon Islands, 1942; Navy Unit Commendation with one Bronze Star, Expeditionary Medal with three Bronze Stars, Cuba, 1912; Nicaragua, 1915-24; China, 1921; Nicaraguan Campaign Medal, Mexico, 1914; Haitian Campaign Medal with one Star, Haiti, 1919-20; Victory Medal, West Indies Campaign and one Star, Haiti, 1917; Yangtze Service Medal, Shanghai, 1927; American Defense Service Medal, 1939-41; Asiatic-Pacific Campaign Medal with four Bronze Stars, Solomon Islands, 1942; American Campaign Medal; and the World War Victory Medal.

He has received the following foreign decorations: Haitian Distinguished Service Medal, 1919-20; Medaille Militaire, one Silver Star, Haiti 1921; Honorary Knight Commander of the Military Division of the Most Excellent Order of the British Empire; Companion (Honorary) of the Military Division of the Honourable Order of the British Solomon Islands; Cruz de Aviazione de Primera Classe, Peruvian Government, 1944; don Calderon of the 1st Class, Ecuador, 1944; Knights of the Cross in the Order of the Orange Nassau with Swords, Netherlands, 1945; the Order of Pao-Ting (Sacred Tripod) with Special Class, China, 1947; and the Legion of Honor (Grand Officer) of France.

For outstanding services as Commanding General of the First Marine Division, Reinforced during the attack on Guadalcanal, Tulagi, and Gavutu in the Solomon Islands, on August 7, 1942, he was awarded the Navy Cross and for the subsequent occupation and defense from August 7 to December 9, 1942, was awarded the Medal of Honor.

His citation for the latter reads in part, "With the adverse factors of weather, terrain and disease making his task more difficult and hazardous undertaking, and with his command eventually including sea, land, and air forces of the Army, Navy and Marine Corps, Major General Vandegrift achieved marked success in commanding the initial landings of the United States Forces in the Solomon Islands and in their subsequent occupation."

"His tenacity, courage and resourcefulness prevailed against a strong, determined and experienced enemy, and the gallant fighting spirit of the men under them to withstand aerial, land and sea bombardment, to surmount all obstacles and leave a disorganized and ravaged enemy."

"This dangerous but vital mission, accomplished at the constant risk of his life, resulted in securing a valuable base for further operations of our forces against the enemy."

General Vandegrift was born on March 13, 1887, in Charlottesville, Virginia. He attended the University of Virginia and was commissioned in the Marine Corps as a

The Chaplain's Corner

By Chaplain Dennis R. Kerrigan

For her class in International Relations, a Sophomore in an Oakland, Calif. college decided to survey her fellow students on World Events. Her findings rocked the campus. Of 100 girls questioned, 70 confessed ignorance of the term 'bi-partisan foreign policy', 28 were "totally uninformed" about the Atlantic Pact, 39 could not name the President of Argentina ("I don't know his name, but he has a pretty young wife," volunteered one girl) 9 never read the papers and 56 merely glanced over the headlines.

Fumed the Mills College "Weekly"; "It costs our parents \$1550. a year, plus transportation, clothes, allowances and incidentals to send us here to be educated—educated for what? To become a nation of bridge and canasta players?"

If this is an indicative cross section of American College youth, education is in a sad state. Just as sad however are the reasons proffered to a questionnaire on "Why I Don't Go to Church". Let me paraphrase this however, and ask, "Why I Don't Go to the Movies". It makes as much sense:

1. I was made to go too often when I was young.
2. No one ever speaks to me when I do go.
3. When I go they always ask for money.
4. The manager never called to ask why I had not been there lately.
5. The people there do not live up to what they show in their films.
6. The music is very poor.
7. I was ill for six weeks and nobody from there ever came to see me.

Edward Rhodes Stitt Library

(Continued from page 1)

delivered the speech of acceptance of the dedication of the portrait of the officer to whom we are again giving just homage. He will address you briefly as representative of the Bureau of Medicine and Surgery and of the Surgeon General. It is fitting to recall that almost a century ago,—1902—Edward Rhodes Stitt, in the grade of Naval Surgeon with the rank of lieutenant, was placed in charge of planning of the construction of the medical library and laboratories at the Museum of Hygiene and the Naval Medical School located in Washington at "E" and 23rd Streets, N.W. The Naval Hospital for this site was in planning stage only, the hospital proper being located at 9th and Pennsylvania Avenue, S.E. I see among you many who will recall the origin of our Naval Medical Library.

At that time Admiral Riggs, then assistant surgeon with the rank of lieutenant, was medical officer of the U.S.S. DOLPHIN. Dr. Strine is a member of the class of 1902 of the Medical School. That seems long time ago. Admiral Rossiter had not yet entered the Navy. Vice Admiral McIntire was just finishing grammar school in Oregon, a bare-lyt boy of 14. Admiral Bunker is still a resident of Iowa. Admiral Dorsey, in Maryland, was just beginning to think of the Navy as a career. Admiral Harold W. Smith had just completed his medical work at Harvard. Admiral Edgar L. Woods was probably duck hunting in Virginia. Admiral Sutton, Commodore Wagner, and Admiral Calver were still in school in the District of Columbia. Admiral Johnson was in Virginia, with no thoughts of entering the Navy. Admiral Stephenson was in Tennessee, being needed by his famous uncle to look into Navy medicine. Captain Espach, a youth of 16, was finishing high school in Ohio. Beloved Sam Joe Mundell, age 23, was in his senior year at Georgetown and looking forward to an active Naval medical service. Captain O. D. King, age 14, a North Carolina boy looking forward to medicine at the University of Virginia. Admiral Pugh, age 7, was learning to plough in the old homestead in Virginia. It is indeed pleasing and good that such a representative group of Naval Medical officers and friends should come aboard this afternoon in order to pay tribute in commemoration of our former Surgeon General and distinguished medical officer.

I shall not attempt a recital of Admiral Stitt's brilliant career. He entered the Navy when we veterans of World War I were infants, in fact in many instances, still unborn. Captain Hogan will tell us the highlights of Admiral Stitt's career. We all know of his pioneer work in the field of tropical medicine and of his great contributions to the basic science of naval medicine. Admiral Stitt died, respected, honored, and loved by our entire Medical Corps and by a host of medical men world-wide in distribution. Shortly after the death of Admiral Stitt, his good shipmate, lifelong friend and admirer, Admiral Harold W. Smith, suggested that the medical library should be named in honor of its founder and greatest contributor.

I was favorably impressed with Admiral Smith's sincerity, as we all would be, for surely the living spirit of this medical library, from its very inception, was Admiral Stitt. I transmitted the suggestion to the Bureau of Medicine and Surgery. The Surgeon General, Admiral Swanson, and Admiral Pugh were delighted. They took the necessary steps to present the matter

Mrs. Stitt unveils the portrait

to the Secretary of the Navy, Honorable John L. Sullivan. The proposition met instant approval at all official levels.

Formal dedication of the library was delayed while Mrs. Stitt graciously and painstakingly collected the Admiral's professional papers, books, medals, fraternal and honorary keys, as gifts to the library for permanent display.

This has been accomplished. We are very grateful, Mrs. Stitt, for your thoughtful collection of these archives. I assure you that they will be treasured by the Medical School and library.

War clouds again threaten the peace of the world. The wounded and sick again being received, and in mounting numbers, from distant battlefields. Korea is notoriously unsanitary. Soon the menace of Asiatic diseases may well exceed battle wounds.

I am confident that this library, the Medical School, so beloved by Admiral Stitt, will continue the good fight against disease. The library is honored and enriched by his name.

I shall read the Department of the Navy orders:

19 April 1949

From: The Secretary of the Navy
To: The Chief of the Bureau of Medicine and Surgery

Subject: Designation of the Library at the U.S. Naval Medical School, National Naval Medical Center, Bethesda, Maryland, as the Edward Rhodes Stitt Library.

1. You are hereby directed to designate the Medical Library at the U.S. Naval Medical School, National Naval Medical Center, Bethesda, Maryland, as the Edward Rhodes Stitt Library in honor of the recently deceased Rear Admiral Edward R. Stitt, (MC), USN, the Surgeon General of the Navy from 1920 to 1928.

2. You will initiate the necessary procedures to promulgate this action to appropriate offices in the field.

Signed: John L. Sullivan

24 April, 1949

From: Chief of Bureau of Medicine and Surgery
To: Medical Officer in Command, National Naval Medical Center Bethesda, Maryland
Subj: Designation of U.S. Naval Medical School Library

1. The Medical Library at the National Naval Medical Center, Bethesda, Maryland, is a continuation of the Medical School Library established by Doctor Edward R. Stitt of the Navy Medical Corps in 1902. Inasmuch as Admiral Stitt was a distinguished pioneer and leader in the field of tropical medicine, and served as Surgeon General of the United States Navy from 1920 to 1928, it has seemed fitting that his eminent career in medicine and in the Navy should be appropriately memorialized.

2. To this end, in accordance with the authorization of the Secretary of the Navy given 19 April 1949, the Medical Library at the U.S. Naval Medical School, National Naval Medical Center, Bethesda, Maryland, is designated the Edward Rhodes Stitt Library, in honor of the recently deceased Rear Admiral Edward R. Stitt, (MC) USN.

Signed: C. A. Swanson

28, April 1949

From: Commanding Officer, National Naval Medical Center
To: Commanding Officer, U.S. Naval Medical School

1. Delivered. The Medical Library, Naval Medical School, shall be known henceforth and referred to in all communications as the EDWARD RHODES STITT LIBRARY, Naval Medical School, National Naval Medical Center, Bethesda, Maryland.

Signed: M. D. Willcutts

Captain Hogan, it is a great privilege for me to deliver these orders to you for compliance. I am delighted that Mrs. Stitt and family, with so many old friends, are present, and I again wish to repeat my personal acknowledgement and warmest thanks to Admiral Smith for his early efforts in launching this project.

Address of acceptance by Captain Hogan:

"Admiral Willcutts, Mrs. Stitt and friends of Admiral Stitt, as Commanding Officer of the Naval Medical School, it is with deep pleasure and great honor that I accept the designation by the Secretary of Navy of our Library as the 'Edward Rhodes Stitt Library.'

There are certain men who streak across the human sky with the rocket force of a meteor. There are others who shine steadily like fixed stars; and from them, so sure is their position, the rest of us can take our bearings, plot our courses, and dock in port on the exact time of our estimated arrival. Admiral Stitt, physician, scholar, author, officer, courteous gentleman is one of the latter.

Like any other true physician, he stands unblinking before the stare of the world as an artist. For according to the razor-edged distinctions of Aristotle, art resides in the intellect, and the qualification of that intellectual faculty is executed in a facility of constant, untiring and productive thought. The doctor then, and in particular Admiral Stitt, must ever be considered as a man with a keen mental adroitness translating itself fluidly and graciously into all medical fields, teaching, research, clinical and administrative.

It is in recognition of this artistry that lodged in the heart, and mind, and intellect of Admiral Stitt that we gather this afternoon to perform a fitting dedicatory task.

The man whose name this library bears was never independent of reality. Admiral Stitt prepared the ideal visions within his own personality based on the reality of grim disease. The physician, the professor at Georgetown and

Admiral Harold W. Smith, MC, USN (Ret)

George Washington Universities, the scholar who could dangle the Phi Beta Kappa key from his watch chain, was real enough to become a recognized master of tropical diseases.

With the skilled consummate artistry of a musician who arranges intellectually the sounds in his soul, Admiral Stitt arranged intellectually the principles of goodness, healing, brotherliness, complete self sacrifice, that drove within him

all the force of a dynamo.

Admiral Stitt was associated with books and men during his span of life, and it is properly fitting that his memory be associated with books and men.

The power of knowledge echoes the word of Omnipotence on the morning of creation: "Let there be light." To the books of this library in future years many men will come: To consult, To compare, To uncover, To grasp, To learn, beneath the solemn eyes of him to whom it is dedicated; and then they will go out to the far flung corners of the world to reshape distorted humanity. And there will be light: sensible, intelligible; for all the world to see; and having seen for all the world to be glad.

For some men streak across the sky like meteors; and others shine steadily like fixed stars. And Admiral Stitt is one of the latter."

Among the notables and their families invited to attend the ceremony and reception given by Admiral and Mrs. Morton D. Willcutts in the Officers' Club at the Medical Center were: Mrs. Edward Rhodes Stitt, widow of Admiral Stitt; Honorable Francis P. Mathews, Secretary of the Navy; Admiral Forrest P. Sherman, USN, Chief of Naval Operations; RADM. Clifford A. Swanson, MC, USN, Surgeon General of the Navy; RADM. Herbert L. Pugh, MC, USN, Deputy Surgeon of the Navy; RADM. Spry O. Claytor, DC, USN, Chief Dental Division BuMed; RADM. Alfred W. Chandler, DC, USN; Vice Admiral Ross T. McIntire, USN (Ret.), former Surgeon General of the Navy; RADM. Charles W. O. Bunker, MC, USN (Ret.), former Commanding Officer, National Naval Medical Center; RADM. Percival S. Rossiter, MC, USN (Ret.), former Surgeon General of the Navy; RADM. Charles E. Riggs, USN (Ret.), former Surgeon General of the Navy; RADM. Benjamin H. Dorsey, MC, USN (Ret.); RADM. D. G. Sutton, MC, USN (Ret.); RADM. H. W. Smith, MC, USN (Ret.), former Commanding Officer of National Naval Medical Center; RADM. C. S. Stephenson, MC, USN (Ret.); RADM. Edgar Woods, MC, USN (Ret.); RADM. George W. Calver, MC, USN (Ret.), Capitol Physician; Commodore Richard W. Warner, MC, USN (Ret.); CAPT. Joseph J. Kaveny, MC, USN (Ret.); CAPT. J. J. Mundell, MC USNR (Ret.); CAPT. Otis Wildman, MC, USN (Ret.); CAPT. Paul P. Maher, MC, USN (Ret.); CAPT. Walter C. Espach, MC, USN (Ret.); CAPT. W. P. Blake, MC, USN (Ret.); CAPT. A. A. Martsteller, MC, USN (Ret.); CDR. W. A. Bloedorn, MC, USN (Ret.); CDR. Charles Wheatley, MC, USN (Ret.); General Paul H. Streit, MC, US Army; Brig. General Raymond O. Dart, MC, US Army; Colonel A. W. Spitzer, MC, US Army; Colonel J. F. Siler, MC, US Army; Maj. General Merritte W. Ireland, MC, US Army (Ret.); Mr. and Mrs. Stephenson (daughter of Mrs. Stitt); the Honorable Mr. Lister Hill, Senator from Alabama; Mrs. Joel T. Boone; Dr. R. E. Dyer, Director of NIH; Dr. L. A. Schelle, Surgeon General, USPHS; Dr. Norman H. Topping, Deputy Director NIH; Dr. L. L. Williams, Dr. Alberto Lleras, Honorable Maurice H. Thatcher, Dr. Alexander Wetmore and Dr. Newton Richards, of the Gorgas Memorial Executive Committee; Miss Ruth Rodier, Librarian Edward Rhodes Stitt Library, and Mrs. Bean, Crews Library, NNMCC.

News From The Lab. 15 Under Bo'sun Locker Low Power

By Billy Bones

Well shiver me timbers Matey's, took a gander at the local chronometer and calender and hit the deck with a mighty thud, for 'tis time once again for another edition of the ships paper to go to press and judging by the looks of the weather and the alarming manner in which the barometer has risen and fallen like a new bride's biscuits, one can't be sure when reveille goes; to call a taxi or borrow the neighbor's punt and scull merrily to work. Ah me, the life of a side cleaner was never like this.

Your reporter has been "Bewitched", "Bothered" and "Bewildered" this past week, being "Bewitched" by the happy prospects of getting the knot spliced and taking a swim in the sea of matrimony, "Bothered" by the inclement weather, which this past week has been neither fit for man nor beast, and "Bewildered" by just what type of scuttlebutt to include in the coming column. News is as scarce as a surprise "72" any weekend. But don't get me wrong Mateys this being landlocked and shorebound should not be construed as hankering for the pitch of a rolling deck or the tang of salt spray in a howling or-easter aboard a tin-can, for any resemblance betwixt meself and those buccos what follow the sea, is purely accidental.
